WARNING

Every effort has been made to ensure that the information contained in this *Guide* is correct. However, it will be clearly understood that this publication is intended as a guide only, that the information cannot be *Guaranteed* correct and that the final responsibility must (as always) rest with the Shipmaster.

At certain ports, items of navigational routeings and aids have been included as a means of general guidance only. Shipmasters should have in mind that full and due reference MUST ALWAYS be made to corrected charts of the area, to the appropriate Notices to Mariners, and all or any other navigational notices, warnings or amendments issued by proper Authorities and/or navigational aid services.

The sketch maps are for general assistance and must not be used for navigational purposes. In particular, the shapes of buoys should be disregarded since these are indicated by varying symbols which may be consequent upon local usage and without resemblance to internationally applied symbols.

PLANS

All plans, unless otherwise stated, are reproduced by kind permission of the Port Authority.

IMPORTANT NOTICE

All users of this edition of the guide are advised to retain it after purchasing later editions, as future editions may not contain some older Shipmaster's Reports and navigation information which is mentioned in other publications and pilots.

This action is being taken in order that the Guide may be contained within two volumes.

All rights reserved. No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photo-copying, recording or otherwise without the prior permission of the publishers.

Shipmasters, Shipowners or Managers, Port Authorities, Administrators and Agents, are earnestly requested to assist our work in up-dating the Guide *by providing written comment, information, amendments or corrections, plus additional details of any ports or terminals, to the following address:*

SHIPPING GUIDES LIMITED,
SHIPPING GUIDES HOUSE,
75 BELL STREET,
REIGATE,
SURREY,
RH2 7AN,
ENGLAND

All communications will be acknowledged and will be most useful, since it is only by this means that the *Guide* will remain of great value to the user and will be up to date and thoroughly professional in content.

N.B. PLANS, DIAGRAMS, DRAWINGS AND SKETCHES: As you will note, this 1993/94 edition of "Guide to Port Entry" contains nearly three thousand two hundred plans and mooring diagrams that have been reproduced from plans and drawings very kindly sent to us by numerous Port Authorities, Agents and shipboard personnel. We hope that the special plan section will prove interesting and useful.

Presently however, the special plan section is to an extent incomplete, since there are many ports and mooring facilities for which we have not yet received the necessary plans for reproduction purposes. We are anxious to secure plans, diagrams, drawings or sketches of ports and facilities not presently shown in our special plan section, and therefore request that Port Authorities and/or Agents at the places concerned be kind enough to pass us this data together with the necessary permission for reproduction. We would also be very grateful if ship's officers calling at ports not already covered in our special plan section, could find it possible to provide us with diagrams or sketches of the facilities which would be suitable for reproduction in our later editions and/or which might be re-drawn as required by our own art department prior to reproduction.

Kenya

MOMBASA: 04.04 S. 39.40 E. (See Plan)

DOCUMENTS:

Health Certificates: Forms obtainable from Pilot.
6 Crew Lists.
10 Passenger Lists.
Dangerous Cargo Lists.
Ship's Register.

Shipmaster's Report: 1981.
Declaration of Health (Form Med-284).
Port Health Clearance of Ships (Form GPK-160).
Set Vaccination Lists.
4 Crew Lists.
4 In-transit Passenger Lists.
4 Landing Passenger Lists.
Arrival Declaration for Passengers (Landing Only) (Form F1).
Stores List (Form C7).
Crew Declarations (Form C8).
Parcel Lists (Form C3).
Ship's Register (Copy).
Ship's Record & Master's Report (Form KPA/Rev. 92) (to Pilot).
Shore Passes (Company Forms).
Arrival & Sailing Reports (Agency Forms).

Shipmaster's Report: April 1984.

Please note that the "East African Countries" (Kenya, Tanzania, etc.) Customs Union does not exist any more and separate Customs Declarations are needed for each country. Consequently Bonded Stores seal can be broken after Mombasa or Dar Es Salaam.

PILOTAGE: ETA through ships' Agents, 48 hours' notice. VHF Channel 12 (Mombasa Radio VHF Channel 16). Pilot boat 72 ft. launch, international orange hull, white superstructure. No signals for Pilot – call on VHF Channel 12 (Mombasa Pilots) or by signal lamp to lighthouse. Pilot boat position 1 mile outside "Turning Buoy" on Ras Serani leads (301°). No special bad weather regulations. Pilot ladder 6 ft. from water – must have manropes – lit at night.

Tankers: For deep laden tankers, Pilot boards 1 hour before HW. Because of strong currents, deeply laden tankers must not attempt to "close" in before sighting pilot launch. Good lee and some headway recommended.

Special attention is drawn to the fact that ships bound for Kipevu must be in the agreed pilot embarkation position at the agreed time. The time agreed is chosen, such that, ships may transit the dredged channel with maximum advantage of the rising tide and arrive off the berth just before the ebb sets in. At that moment only little time is left to position the vessel and tie up sufficient moorings to hold vessel on to the jetty face, before the force of the ebb, diverted to an abeam direction by the jetty causeway, comes to bear on the ship's side.

Distance to Shimanzi Jetty, about 6 miles.
Distance to Kipevu Jetty, about 7 miles.

ANCHORAGES: No safe outer anchorage.

RESTRICTIONS:

Tankers:

1. By day: Max. length 850 ft.
   By night: Max. length 680 ft.
   Trim to be between 4 ft. to 6 ft.
2. Restrictions for night movements for Crude Oil or Black Oil ballasted vessels up to 850 ft. LOA provided: (Rigid requirements.)
   (a) movement takes place on last 3 hours of flood tide;
   (b) all anchorages between berth and sea are vacant;
   (c) the Duty Pilot holds a Master's Certificate;
   (d) ballast draft to be 18 ft. forward, 22 ft. aft.

No night movements are permitted for Low Flash White Oil product vessels. Masters of vessels ready to sail at night are strongly advised to notify the Authorities of the time of sailing; the vessel is to be ready to sail before 1600 hrs. and preferably before 1500 hrs. of the day in question.

This should be done by Radio direct to the Chief Pilot and through Agent. The Agent must also make the request in writing to the Harbour Authorities so that proof of requirements exists.

This is a standing regulation.

MAX. SIZE: Length 850 ft. Draft 43 ft. 06 in. Also see "Restrictions", "Berthing" and "Tankers".

HEALTH: Radio Port Health Officer, Mombasa, giving last port of departure, ETA Mombasa, condition of crew, any sickness on board, passengers. Must have "Q" Flag until doctor visits vessel.

RADIO/VHF: Mombasa Radio Coast Station M/F, H/F, W/T & R/T and VHF R/T Services:

Station 5ZF (W/T) 500 – 524 kHz; traffic list 0100, 0500, 0900, 1300, 1700, 2100; Continuous watch; listening freq. 500 kHz.

Station 5ZF2 (W/T) 8710.4 kHz; traffic list 2018; schedules 2018 –2030, OBS only 0080 – 0030, 0600 – 0630, 1200 – 1230, 1800 – 1830; listening freq. 8354 – 8374 kHz.

Station 5ZF3 (W/T) 13065 kHz; traffic list 0448, 0830, 1518; schedules 0448 – 0530, 0830 – 0900, 1518 – 1545; listening freq. 12531 – 12561 kHz.

Station 5ZF4 (W/T) 17175.2 kHz; traffic list 1248; 1248 – 1315; listening freq. 16708 – 16748 kHz.

Station (R/T) 2595, 2181 kHz; traffic list 0603, 1203; schedules 0600 – 0630, 1200 – 1230; continuous listening watch outside schedules 2182 kHz; listening freq. 2182 kHz.

Station (R/T) 4409.4 kHz; traffic list 0533, 1303; schedules 0530 –0600, 1300 – 1330; listening freq. 4104.4 kHz.

Station (R/T) 8805.6 kHz; traffic list 0633, 1233; schedules 0630 –0700, 1230 – 1300; listening watch on 8255.6 kHz; 0330 – 1530 listening freq. 8255.6 kHz.

Mombasa Radio also provides continuous R/T service on VHF for the benefit of ships in and around Mombasa within radius of 30 miles. Channel 16 for calling and Channels 26 and 27 for working. All times in GMT.

TUGS: 3×4,000 h.p. Tugs join vessel inside harbour between Ferry and Kilindini Reef. Tug lines no additional charge.

BERTHING: All berths fendered. Nos. 8, 9 and 10 and Shimanzi Oil Terminal berths, no berthing on ebb tide, with range of 6 ft. or more. Kipevu Oil Terminal berthing on first of ebb with tankers over 650 ft.

Draft alongside	Nos.	1 to 5	32 ft. at datum
,,	,,	7	32 ,, ,, ,,
,,	,,	8	31 ,, ,, ,,
,,	,,	9	34 ,, ,, ,,
,,	,,	10	31 ,, ,, ,,
,,	,,	SOT	32 ,, ,, ,,
,,	,,	11 to 14	30 ,, ,, ,,
,,	,,	16 to 18	36 ,, ,, ,,
,,	,,	Mbaraki	36 ,, ,, ,,
,,	,,	KOT	44 ,, ,, ,,

Draft in Buoys varies from 24 ft. to over 60 ft. at datum

Channel depth 40 ft. at datum, plus tide. Therefore, max. draft given as 44 ft. as this is the controlling factor for KOT.

CARGO HANDLING: Berth No. 9 has been arranged for bulk export of soda ash. Berth for Roll-on/Roll-off traffic operates at Berth No. 14. Container berths at No. 16, 17 and 18. One 40 tonne container crane at No. 16. 3 ship-to-shore gantry cranes, 11 rubber mounted yard gantry cranes and 2 rail mounted gantry cranes available. Also see "Developments".

Mbaraki cement berth for bulk export of cement clinker and automated loading of cement in bags, also used for bulk import of coal.

Shimanzi oil terminal now handles all imports of bulk vegetable oil as well as all other oil products except crude oil.

Bulk Molasses exports handled at Berth No. 9 and Mbaraki.

Bulk cargoes are at present handled by grabs, railway wagons and lorries.

STEVEDORES: ETA preferably 48 hours in advance in order to arrange gangs. Advisable notify Harbour Master ETA and also give quantity of cargo to be loaded and/or discharged and other matters of importance.

Working Hours: Weekdays: 3 shifts, 0700 – 1500, 1500 – 2300 and 2300 – 0600. Saturday and Sundays: One shift, 0700 – 1500.

Stevedoring carried out by Kenya Ports Authority.

MEDICAL: In emergencies necessary to receive advance notice. Hospital facilities available. Inoculations required – yellow fever (endemic zones in Africa and South America), cholera (all ships from Asia).

TANKERS: Discharge and load white oils at Shimanzi. Discharge and load Heavy oils at Kipevu.

Shimanzi Oil Terminal: T-head jetty with 200 ft. long berthing head. Depth alongside 32 ft. LWOST. Bunkers and fresh water available.

Kipevu Oil Terminal: T-head jetty with 225 ft. long berthing head. Tankers up to 65,000 d.w.t. berth at dolphins alongside jetty head; depth alongside 44 ft. LWOST. Max. length 820 ft. Max. draft 44 ft. (over 42 ft. by arrangement). Slop reception facilities for 3,000 tons.

At Kipevu, tankers normally berth starboard side to at slack tide, on the beginning of the ebb. Masters should assist Pilots to moor as quickly as possible, in view of the abeam current in a direction off the jetty, which is created by the jetty causeway configuration. This current will increase with the ebb tide and ships with all wire moorings are advised to use their first-ropes-ashore with priority. Mooring launches are low powered and can only handle 1 wire at a time, and mooring dolphins are not fitted with winches and require manual handling of wires. In view of the above, and in view of the accurate positioning required to connect to chiksan arms, it is vital that the ship be brought against the breasting dolphins as soon as possible.

In cases where vessel's mooring is delayed by whatever reasons, Pilots may require extra tugs to assist in keeping the ship alongside.

Report:

Approaches: The approaches to Mombasa either from North or South must be conducted with extreme caution as Andromache Reef on the S.W. side and Levin Reef on the N.E. side and a great number of shallow waters, all of them not detectable at HW, pose a threat to navigation.

Consideration should also be given to the very strong East African current, setting North, which reaches 4.5 knots during the months from April to November then declining to about 1.5 knots in February.

It is strongly suggested that no attempt should be made to negotiate the approach to the turning buoy without the Pilot on board, and that the positioning of the ship on the leading line to approach the turning buoy be taken at least 1.5 miles from the turning buoy, to properly evaluate the drift.

The suggested waiting area is in Lat. 04° 04′ 12″ S. and Long. 39° 42′ 12″ E. in about 20 fathoms of water.

Anchorages: (Outside). A suggested anchorage postion is in Lat. 04° 06′ 12″ S. and Long. 39° 42′ 12″ E. (same as suggested waiting area). The anchorage is not sheltered, rather exposed to currents, wind and sea, and bottom holding capacity is doubtful.

Anchoring is not suggested unless the ship has to wait for a long period of time. In this case, Pilots should be consulted on VHF Channel 12 for the most suitable position.

Anchorages: (Inside). There are 6 approved anchorages in the port area, 3 of which are located between Ras Mzimba and Kilindini Reef. The remaining are situated respectively 2 in Port Kilindini and 1 in Port Reitz.

The suggested anchoring point for all of them is along the leading line.

Tankers are usually not allowed to anchor inside the port, except for short waiting periods. VLCCs are sometimes moored on buoys to await berth.

Pilotage: Pilots hold Master's Certificate of Competency. Only Senior Pilots with Master's Certificates and at least 1 year's experience as Pilots in Mombasa Roads are authorised to Pilot large ships. There are currently 12 Pilots employed in Mombasa.

Some delays in obtaining the Pilot can be expected due to shortage of Pilots.

Pilots board the ship approximately in Lat. 04° 06′ 12″ S. and Long. 39° 42′ 12″ E. (waiting area) or up to 1.5 miles from the turning buoy, from an orange hull cutter with white superstructure on which 'Pilot' is painted in black.

When leaving the port, during the S.W. monsoon period with heavy swell affecting the port entrance, the Pilot disembarks just after the Ras Serani turn, before the turning buoy, but may be retained past turning buoy.

Both pilot hoist and pilot ladder are acceptable for boarding and leaving the ship although the ladder is preferred. Manropes obligatory.

Mombasa is a natural port and very well protected where navigation must be conducted with the utmost care and precision.

The port has recently been dredged to permit entrance by vessels with 1,100 ft. LOA.

Chart B.A. 666 is very well detailed and meets all necessary requirements for a safe in-port passage. A very recent Hydrographic Survey following major dredging activities will be added on a New Edition due 1985.

When the ship is set on the approaching leading line, up to the turning buoy the navigation should be checked with utmost care as this leading line sensitivity is rather poor, since the 2 Mackenzie Pt. beacons are too close to each other.

After having rounded the turning buoy navigation proceeds on the heading line 301° and in the area South of Ras Serani, the ship has to make a sharp turn to West to proceed on course 238°. In this turning area tidal currents set North and a good berth must be given to shallow waters, marked by a buoy which is well inside the 6 fathom line.

When on course 238° the ship approaches the narrowest passage in the port, about 600 ft. wide. This passage is marked by a buoy on the South side of the channel and a beacon on the North side.

After Ras Mzimba, when on course 309° another narrow passage must be negotiated before entering Port Kilindini. This passage, about 600 ft. wide, is usually well marked.

After this passage, navigation up to the oil jetty does not present any particular difficulty.

After Ras Serani up to Port Reitz the tidal currents run in the same direction as the channel.

The port navigation is controlled by VHF from the Harbour Master's office.

Shoals in the port area are marked by beacons. It may occur that some of them are missing without any warning. Caution should be exercised as in some areas leading line beacons could be obscured by growing vegetation or by anchored ships.

DENSITY: 1025.

FRESH WATER: Available at all berths; in stream ex-tug at Harbour Master's discretion or barge of 300 tons capacity. 30 t.p.h. on quay.

FUEL: *Main Quay Berths:* Marine fuel oil, viscosity 1500 secs. Marine diesel fuel. Gas oil cannot be delivered by pipe-line at these berths but delivery can be made by bulk lorries up to only 10 tons at extra delivery cost. Minimum 48 hours' notice required. Quantities of 10 to 30 tons can be made by rail tank wagon if 48 hours' advance notice given. Thin fuel oil viscosity below 1500 secs. can be delivered at all berths through Fisher blender. Only 1 Fisher blender available and can deliver fuel to only 1 vessel at a time.

Shimanzi Oil Terminal: All grades, i.e. fuel oil, marine diesel, gas oil and thin fuel oil (through Fisher blender).

Cased Oil Jetty: Only marine diesel and gas oil can be delivered at this jetty.

Kipevu Oil Terminal: Only fuel oil of viscosity between 1500 secs. and 3500 secs. available. Fuel oil viscosity below 1500 secs. not available. At least three days' clear notice required by EA Oil Refineries for arranging bunker delivery. Not possible to deliver any marine diesel or gas oil either ex pipe-line or rail tank-wagons/bulk lorries at this berth.

CONSULS: The following countries are represented in Mombasa: Belgium, Denmark, France, Germany, Greece, India, Italy, Netherlands, Norway, Sweden, USA.

REPAIRS:

1. See "African Marine" below.
2. Helmaco Engineering Company Ltd., P.O. Box 99111, Mombasa. Tel: 316776/7 or 316051/2. Telex: 21003, 21045 A/B COMARCO. Almost every aspect of repair work of vessels afloat can be undertaken. Slipway for small vessels.
3. Divecon Limited, P.O. Box 99111. Mombasa. Telephone and telex as for Helmaco. Underwater cleaning and repairs undertaken.
4. Comarco Communications Ltd., P.O. Box 99111, Mombasa. Telephone and telex as for Helmaco. Marine electronic repairs of all kinds carried out.

DRY DOCKS:

African Marine Dry Dock:

Principal Dimensions:

Length	590 ft. 00 in.	180.00 m.
Entrance width	80 ft. 10 in.	24.75 m.
Dock width	86 ft. 00 in.	26.40 m.
Minimum water depth LWS	13 ft. 00 in.	4.00 m.
Maximum water depth HWS	26 ft. 00 in.	7.90 m.

Cranage: 1×30 ton fixed, adjacent to the dock gate.

1×7 ton mobile on rails which can traverse the full length of the West side of the dock.

1×5 ton mobile on rails which can traverse the full length of the East side of the dock.

1×5 ton fixed at the jetty.

1×7 ton mobile.

1×12 ton mobile.

Berths: One piled jetty capable of mooring ships of up to 280 ft. length overall, with certain draft restrictions. A second berth capable of taking ships of up to 300 ft. length overall situated at the dock gate entrance for all but very deep drafted vessels.

Slipways: Two slipways capable of slipping barges, lighters and other small craft.

Tugs and Harbour Craft: For towing and transport. Paint pontoons, barges and catamarans, welding generators and air compressors (either self-propelled or 'dumb') which can be berthed alongside a 'gash' barge and a barge containing workshop facilities.

Electrical Shop: A fully equipped workshop (A/C and D/C).

Carpenter's Shop: Fully equipped to carry out all types of work.

Foundry: All types of castings in cast iron and non-ferrous metal. Maximum single pour in cast iron normally 15 c.w.t. with larger pours by special arrangement.

Paint Shop: All types of ship's paintwork.

Design Office: Chief Draftsman and Design Draftsmen undertake all types of work.

Air Conditioning and Refrigeration Workshop: Specialises in the installation, repair and servicing of General Electric air conditioning units and ship's refrigeration equipment.

General Labour: Gangs of men for cleaning, storing ship available at short notice.

Power Supplies: A/C and D/C power supplies are available at the alongside berths. Two power barges are available which contain: 1×400 KVA, 440 volt, 600/S 3-phase diesel generator; 1×210 KVA, 440 volt, 60 C/S 3-phase diesel generator; 3×60 kW, 220 amp 220 volt D/C diesel generators.

Machine Shops: Comprehensively equipped to handle all types of engineering work.

Plate Yard: For all types of ship repairs, ship construction and steel prefabrication work. A blacksmith's shop for forging and smithying work and a shop for sheet metal work.

Welding Shop: Electric arc welding, both in shop and in the port area. Approved to Lloyd's Register of Shipping standards.

GANGWAY/DECK WATCHMEN: Watchmen available for gangway and deck and recommended.

OPENING/CLOSING HATCHES: Normally done by stevedores except MacGregor type hatches.

CERTIFICATES: Normal port requirements for safety cargo equipment.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes for each crew member for 8 days. Wine and/or Spirit, 8 small bottles of beer for each crew member for 4 days.

CARGO GEAR: All cargo gear supplied by stevedores.

REPATRIATION: Possible. Facilities available.

AIRPORT: About 7 miles from port. Served by regular airlines.

TIME: GMT plus 3 hours.

HOLIDAYS: New Year's Day; Good Friday; Easter Monday; Labour Day (1st May); Madaraka Day (1st June); First Monday in August; Kenyatta Day (20th October); Independence Day (12th December); Christmas Day; Boxing Day (26th December).

Also for persons belonging to Islamic Faith: Idd ul Azha and Idd ul Fitr. Christmas Day is normally only holiday on which port closed except for necessary pilotage of ships in and out and for dealing with mails, passengers and their baggage, livestock and perishables. On other public holidays restricted working at Mombasa may be carried out at overtime rates. Overtime rates also apply on Saturdays after 1500 hrs. and on Sundays, and to third shift between 2300–0600 hrs.

POLICE/AMBULANCE/FIRE: In Port Area – Police 567 444 and 374; Ambulance 33; Fire 333.

TELEPHONES: Telephones supplied on board. Charges include cost of local calls. Telephone essential per port regulations.

SERVICES: All solvents for tank cleaning available. Repairs to Gyro compass, radar and most other electronic aids to navigation. Compass adjusting by arrangement with port.

SHIP SUPPLY SERVICE: Kenya Ports Authority, P.O.Box 95009, Mombasa – Kenya. Tel: 312211. Telex: 21243 Bandari. Cables: Kenports.

Private Organisations:

Comarco Ltd., P.O.Box 99111, Mombasa – Kenya. Tel: 316776/7, 315319. Telex: 21245 Comarco.

Murri International Salvage Company, P.O.Box 82345, Mombasa – Kenya. Tel: 20822/3 – 24 hours. Tel: 24912 – Office hours. Telex: 21215 Kboat.

Allied Oil Services, P.O.Box 99570, Mombasa. Tel: 315627.

SHORE LEAVE: All crew members allowed ashore and to travel except those from Socialist countries who must stay on Mombasa Island.

IDENTIFICATION CARDS: Port passes issued by the Port Authority.

GARBAGE DISPOSAL: Drums provided alongside. Contact Tel: 312211 for details and charges.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: The Missions to Seamen.

CURRENCY: Kenya Shillings (KSH). U.S.$ 1.00 = KSH 27.514 (25.4.91).

PORT REGULATIONS: White tankers and vessels carrying explosives enter port daylight only. No vessels carrying explosives or dangerous cargo allowed to berth at Main Quay.

DELAYS: Usually no waiting days.

NOTICE: *From the General Manager, East African Oil Refineries Ltd. To Ships' Masters.*

Spillage of Oil and Air Pollution:

I would like to draw your attention to the serious consequences which will arise from any spillage or discharge of oil into the waters of Kilindini Harbour. This part of the Kenya shoreline, with its famous coral reef, is an extremely beautiful and popular tourist attraction as well as providing a means of livelihood for many local people.

Any spillage of oil can harm the environment and raises a great deal of criticisms from the residents of the area. The same applies to excessive funnel smoke.

In the event of any spillage or leak from ship or jetty facilities, ship's officers should immediately warn refinery personnel, who will instigate emergency measures. If there is any delay in notifying the refinery, then any oil spillage or pollution into the sea must be reported to:

(1) Ras Serani Lighthouse (Mombasa Port Control) manned 24 hours. Telephone Mombasa 312895 (21211 ext. 357 office hours only). VHF Radio Channel 12.

(2) Manager Marine Operations Kipevu, Office hours telephone Mombasa 24864 or 312211 ext. 259. Other times telephone Mombasa 312895 or through signal station in (1).

I am sure you will agree that both you and your staff as well as ourselves should do all that we can to protect this part of the environment against pollution. Moreover, it is a firm belief that we should try our utmost to avoid adverse publicity for the oil industry of which we are both part.

NOTICE: *Notice from ship's Agent to Masters:*

Stowaways from Mombasa:

We wish to inform you that stowaways from the Port of Mombasa are a very serious problem and we have had a number of vessels leaving Mombasa with half a dozen stowaways on board causing the Owners considerable expense and inconvenience.

Please, therefore, take every precaution to ensure your vessel is not boarded by stowaways whilst in Mombasa. We would suggest you employ shore watchmen to guard the vessel and also perhaps to have members of your crew on duty at all times to protect the ship. Please, just before sailing, carry out a thorough search of the whole ship with your crew and the watchmen. We also suggest that once you have sailed and you are outside the port limits, you steam around the area for a few hours to give any stowaways the impression that the vessel is fully underway, and again during this period have your crew thoroughly search the ship.

If stowaways are found on board of non-Kenyan nationality then the authorities do not permit them to be landed in Mombasa. Most of the stowaways from Mombasa tend to be Tanzanians.

We would stress again that stowaways are a serious problem in Mombasa and it is up to you to ensure your vessel does not sail with stowaways on board. Please inform your crew about stowaways and that they should be on the look out at all times for any suspicious persons on board.

DEVELOPMENTS: New equipment installed includes additional gantry cranes (5×15 tons capacity) for container handling at Mombasa and inland container depot, now open at Embakasi, Nairobi.

Berths No. 16, 17 and 18 (total length 600 m.) have been modified to take the above mentioned cranes.

SHIPMASTER'S REPORT: July 1991.

1. The Approach Buoy is painted red and white (Fl. W. 5 s), and is located in position Lat. 04° 05′ 34″ N., Long. 39° 42′ 46″ E.
2. Strong N.E. currents in the pilot boarding area sometimes reach 5 knots. Pilots are often late to meet the vessels, and they reduce the speed of a pilot launch and order vessel to reduce speed to dead slow. This should not be done, as current will rapidly drive vessel on to the shoal to the East.
3. The rainy season lasts from May to June.
4. All berths are supplied with good fenders. A majority of the berths are provided with shore cranes.
5. In order to avoid filtering of stowaways on board, I recommend taking a local watchman.
   When staying at the roadstead at night time, a vessel should use maximum lights, including lamps for lighting ship's hull, and have 2 seamen on deck (forecastle and stern). The deck itself should be visible to the watch officer.

During our stay in the port, cases of theft took place on several vessels.

BANABA (Ocean Island): 00.52 S. 169.35 E.

PHOSPHATE MINING HAS CEASED. ALL INSTALLATIONS HAVE BEEN DISMANTLED.

TARAWA (Betio): 01.25 N. 172.54 E. (See Plan)

DOCUMENTS:
Customs: Boards vessel at anchor.
Clearance from Last Port.
4 Crew Lists.
3 Passenger Lists.
1 Stores List.
1 Ship's Report Inward.
1 List of Unmanifested Cargo.
1 Crew's Stores List.
1 Marine Form.
Health:
Pratique granted by Health Department who board at anchorage with Customs.
Vaccinations against Cholera (if required can be carried out).
Name of ports visited and date of arrival at respective ports.
Immigration:
2 Crew Lists.
2 Passenger Lists.
Last Port of Call.
Next Port of Call.
Passports.
Final Destination.
Agent:
3 Bills of Lading.
5 Manifests.
Last Port.
Next Port.
1 Crew List.
1 Passenger List.
Agriculture:
Plants Certificates.
Animal Certificates.

PILOTAGE: Pilot available and must be informed of vessel's ETA 24 hours in advance through the Agent. Entering vessels are strongly advised to await Pilot one mile West of Fairway buoy. Pilot can be contacted by VHF on Channel 16. Pilot boards from small tug, painted yellow, which flies "H" flag at stern. Buoys in lagoon are likely to be missing. Also see "Radio".

ANCHORAGES: See Chart BA. 3269. Betio anchorage main anchorage. Inside the lagoon, safe in all weather although in rare strong winds it may not be possible to work vessel in the lagoon.

RESTRICTIONS: Vessels arriving after 1800 hrs. are advised not to enter the passage and should drift 5 miles away from the entry point.

MAX. SIZE: Any vessel drawing up to 26 ft. may enter at LWOST and 30 ft. HW. Length and breadth are not critical, however vessels over 600 ft. to navigate with extreme care.

HEALTH: See "Documents".

RADIO: Tarawa Radio (T3K) on 500 kHz, 2182 kHz and 6215 kHz. Contact Senior Pilot 4 hours before arrival on VHF Channel 16. Pilot will arrange all formalities, Customs, Health, stevedores, etc.

RADAR: No port radar service.

TUGS: 3 tugs (available for towing barges).

BERTHING: None (lighterage port).

CRANES: 1 × 20 ton container crane on wharf (stationary). 2 × 5 ton mobile cranes.

STEVEDORES: Available 24 hours. Discharging rate 12 t.p.h. Labour available weekends and holidays if required.

MEDICAL: Medical attendance could be obtained through the Agent during working hours. Hospital available where suspected disease could be medically examined.

TANKERS: Vessels drawing up to 14 ft. can anchor close to the jetty where lines are connected to shore pipes. Maximum working pressure 50 lb. No tanker berth and vessels must provide lines. Floats can be provided by Mobil Oil Agency with labourers if required.

DENSITY: Sea Water.

FRESH WATER: Available in limited quantities in an emergency only and delivered by water barge. Cost of water A$5.00 per 500 gallons. Delivery charge A$3.90 per 200 gallons. Water may be contaminated.

FUEL: Diesel only (in very short supply), in restricted quantities and delivered by barge in tanks. Refuelling cost A$11.20 per 500 gallons.

FIRE PRECAUTIONS: No special precautions other than normal precautions for tankers.

CONSULS: British and Australian High Commissioners and South Korean Honorary Consul stationed at Bairiki (also see "General").

REPAIRS: Small but well equipped and capable workshop for light repairs.

DRY DOCK: Small patent slip, capable to slip ships of 150 tons displacement.

SURVEYORS: Marine Superintendent of the Ministry of Transport and Communications will also act as Lloyd's Sub-Agent and cargo surveyor.

WATCHMEN: Not required.

HATCHES: Opened and closed by Stevedores.

CUSTOMS ALLOWANCES: 25 cigarettes per day and 6 cans (310 ml.) beer per day.

REPATRIATION: All facilities available for crew changes.

AIRPORT: 13 miles from anchorage point. Air service to Nauru on Wednesday only, by Air Nauru, arrives from Nauru 0900 hrs. and departs 1000 hrs.; and to Honolulu once a week by Air Tungaru (the national airline) via Maduro, Marshall Islands.

TIME: GMT plus 12 hours.

HOLIDAYS: New Year's Day (January 1st); Good Friday; Easter Saturday; Easter Monday; Public Holiday (July 14th); Youth Day (first Monday in August); Christmas Day (December 25th) and Boxing Day (December 26th). No cargo work can be arranged.

POLICE/AMBULANCE: Police and Ambulance 999.

SERVICES: Ship's laundries.

BANK: Bank of Kiribati, P.O.Box 66, Betio. Tel: 26124.

SHORE LEAVE: All crew are allowed to go ashore after inward clearance is granted.

IDENTIFICATION CARDS: No shore passes issued. Passport or Seamen's Book are not required when on shore leave.

REGULATIONS: No food waste, ballast, engine oil to be discharged in the lagoon.

DELAYS: Expected delays can be caused by heavy rain and port congestion.

GENERAL: Tarawa is the main port of entry for Kiribati. Other entry port is Christmas Island.

Tarawa Atoll is roughly triangular in shape. A number of islets, separated by shallow passages, dry at low water, form the Southern and Eastern sides of the Atoll. The Eastern side is approximately 19 miles North and South and the Southern side is 16 miles in an East-West direction.

Causeways link up the islets along the Southern side and part of the Eastern side. On the Western side there is a barrier reef, most of which is sunken, enclosing a large lagoon navigable by vessels drawing 26 ft. at LWOST and 30 ft. at HW.

The President's and Main Government Offices are at Bairiki Islet which is connected by causeways to the Tungaru Central Hospital, Government Schools at Bikenibeu and the international airport at Bonriki and the Port of Betio.

DEVELOPMENTS: "L" shaped jetty with length 50 m. and width 8.0 m. at head to be constructed at North end of Eastern Mole. Depth alongside 5.5 m.

AUTHORITY: Ministry of Transport and Communications, Marine Division, P.O.Box 506, Betio, Tarawa, Republic of Kiribati. *Tel:* 26468. *Telex:* 77022 Mincomm. *Cables:* Harbour Master, Tarawa. *Contact:* Captain B. Highland, Harbour Master and Marine Superintendent.

AGENT: Shipping Corporation of Kiribati, P.O. Box 495, Betio, Tarawa, Republic of Kiribati. Tel: 26525, 26521. Cable Address: Portco Tarawa. Contact: Captain T. D. Murdoch, General Manager.

Democratic People's Republic of Korea

GENERAL

ETA PROCEDURE: The Notice of ETA is applicable to the Owners (operators and charterers) and the Master of foreign vessels calling at ports of the D.P.R.K.

1. The Owners who fix vessels every month, provide the monthly fixture of ships to the Ocean Shipping Agency of the D.P.R.K. (Head Office) and Branches (herein after called the Agent) before 25th of the previous month and advise immediately if any change.
   - (a) Vessel's name, flag and call sign.
   - (b) ETA and port of call.
   - (c) Description and quantity of discharging and loading cargo.
2. The Owners send the Agent the following documents before arrival in the port: (1) Bill of Lading 3 copies, (2) Manifest 3 copies, (3) Stowage Plan 3 copies, (4) Charter party or handling terms, (5) Others if any.
3. The Owner or Master advise the Agent of the Notice of ETA at the Pilot Station 10 days and 3 days, 24 hours, 12 hours and 4 hours prior to arrival.

(A) 10 days' Notice:
- (a) Vessel's name, flag and call sign.
- (b) ETA and port of call.
- (c) Vessel's particulars (g.r.t., n.r.t., d.w.t., number and size of hatches, derricks and their capacity, LOA, breadth, draft.)
- (d) Numbers of crew, passengers and nationality.
- (e) Description and quantities of discharging/loading, details of heavy lift if any.
- (f) Copies of charter party or handling terms.
- (g) Provisions, ship's stores, repair.
- (h) Flag of the D.P.R.K.
- (i) Last port and ship's position.
- (j) Full address of Owner or Operator, payer of disbursements and banker.
- (k) Others if any.

(B) 24 hours', 12 hours' and 4 hours' Notice of ETA at the Pilot Station; Ship's position and speed only.

(C) The Master should advise the Agent of the ship's position and the time when she passes the following line.

(a) Korea East Sea.

Lat. 42° 24′ N., Long. 131° 10′ E.
Lat. 41° 43′ N., Long. 132° 20′ E.
Lat. 38° 00′ N., Long. 130° 00′ E.
Lat. 38° 00′ N., Long. 128° 45′ E.

(b) Korea West Sea.

Lat. 39° 50′ N., Long. 123° 20′ E.
Lat. 37° 00′ N., Long. 123° 20′ E.
Lat. 37° 00′ N., Long. 126° 30′ E.

(D) The Master should navigate to the pilot station at least 15 miles from the coast after passing the above lines mentioned in item 3-(3).

(E) On arriving at the pilot station the Master should give the Agent the Notice and enter the port under pilotage.

(F) The Owner should deposit disbursement funds before ship's arrival at the port and inform the Agent of the following;
- (a) Name, amount, date, No. and other details of T.T.
- (b) Ship's name and port of call.

	Coast Radio	HMR

CHUNGJIN: 41.43 N. 129.42 E. (See Plan)

DOCUMENTS:
8 Crew Lists.
2 Vaccination Certificates.
2 Lists showing currency, gold and valuables in possession of crew members.

The following information should be radioed to Port Authorities before arrival:

Number and nationality of crew.
Name of last port.
Ports called at during last month.

PILOTAGE: On reaching North Korean waters, vessels required to give a position report every 3 hours to KOSA Chungjin. Pilot and Port Authorities board in position 41° 30′ N., 130° 05′ E. where vessels should await Pilot. Water depth too deep to permit anchoring.

ANCHORAGES: No possibility of anchoring outside harbour limits.

CLEARANCE: On arrival in port, the radar, echo sounder, main and emergency transmitters and all optical equipment is sealed. An inspection team board the vessel to verify currency and valuables declarations. Seamen's Books required to be stamped with landing pass.

BERTHING: Berth No. 1, max. draft 24 ft. Berths No. 2 and 3, max. draft 27 ft. Berths No. 4 and 5, max. draft 28 ft.

CARGO GEAR: Vessels loaded and unloaded by ship's gear. At Berths 4 and 5 there is a conveyor belt facility for coal loading.

SHORE LEAVE: Seamen not allowed to visit other vessels, or leave the harbour area.

Unauthorised money changing forbidden, and it is prohibited to take Korean currency out of the country.

No bathing in harbour area.

SHIPMASTER'S REPORT: December 1980.
There are 2 harbours in Chungjin, the Western harbour and the Eastern harbour which are about 2.5 miles apart. Western harbour is mostly for export of coal and iron and Eastern harbour for import of general and bulk cargo.

The following port information is for the Eastern harbour:
Documents: Immigration, Customs and Quarantine Officials board the vessel at the pilot station. The Korean Authorities bring on board their own forms for ship's stores, currency, valuables, binoculars, cameras, etc., and fill these in by using the information contained in the ship's forms. However they also take the original of the ship's paper.

Papers required for entry:

5 copies Crew List (IMO Form).
1 copy Vaccination List (Cholera).
1 copy Crew's Effect Declaration (IMO Form).
1 copy List of Currency and Valuables (Free Form).
1 copy Ship's Stores Declaration (IMO Form).
1 copy Ports of Call List.
1 copy Maritime Declaration of Health.

A "General Information" sheet, containing such particulars as vessel's name, call sign, Port of Registry, official number and all the normal data contained in the ship's register, including cargo on board, amount and where loaded etc., was found to be of great help in filling out their forms and speeded-up the entry and clearance process. 5 copies of above should be made for distribution to Agent, Customs, Immigration, Harbour Master and Quarantine.

Master's Advice: It is important that all crew members strictly comply with the Rules and Regulations in Korea, especially concerning cameras and binoculars as photography and the use of binoculars is strictly prohibited in the harbour area as well as in the City and the surrounding area. If the Customs, during their second cabin check, find a camera or binoculars the matter will be treated very seriously.

For landing permit, Immigration will stamp the passports or the seaman's books. However I managed to persuade the Immigration Officer not to stamp the passports because of the trouble in certain countries when they see a D.P.R. Korean stamp but it took 2 days and higher Immigration Authorities to get this permission.

When filling out the Customs and Immigration Forms, the name North in North Korea should not be written on any of above mentioned forms or any other documents as well as on private letters. The Authorities don't accept a divided Korea and will cross out the name North, in any place it is written.

It is not necessary to take cash advance in Korean Won. American Dollars and Yen are most welcome.

Pilotage: Method of contact: VHF or radio contact not possible. Agent will inform the pilot station of vessel's ETA.

Boarding Position: Lat. 41° 42.8′ N., Long. 129° 50.5′ E. (4 miles S.S.E. of breakwater). Pilot is compulsory. Service Time: Daytime only.

Anchorage: From 0.5 miles – 4 miles S.S.W. of Chungjin Harbour in 8 – 30 fathoms. Good anchorage in mud/sand and protected from Northerly wind. However during strong South-westerly wind there is a heavy sea and swell.

Approaches: Simple and straightforward. Practically due North along Korea's East coast until abeam of Cape Kozakof, then straight for the Pilot boarding position or anchorage.

Restrictions: Entry: 30 ft. even keel on entry to the harbour.

Special Regulations: Vessel received orders by cable to navigate 15 miles off the Korean D.P.R. coast and pass through position 41° 38.9′ N., 129° 52′ E. en route to the pilot boarding position.

Max. Size: Max. draft alongside at the grain and general pier was 28 ft. and in the harbour 30 ft.

Health: Radio Pratique not available.

Radio: Contact through Congjin Coast Radio Station, call sign "HMC" frequency; Call on 500, work on 428 kHz., ships work 425 kHz. Traffic list every hour plus 20 minutes. After initial call on 500 kHz., usually followed by QRU. MF only.

After arrival, radio station on board is sealed and there is no VHF in the port. However after arrival in the port, Agent will bring on board a small transmitter/receiver for daily communication between Master and Agent's office. The set working on 24 volts. Very few people speak English. I found only the Pilot and Agent had a fair command of English.

Arrival Notice: Five days then 72, 48 and 24 hours to Agent. Also 5 days and 3 days to receivers.

Tugs: Two tugs available, about 500 h.p. maximum. Tugs always take ship's line.

Berthing: Mooring Method: Vessels drawing more than 28 ft. must first lighten her draft at anchor in the inner harbour. Vessel is brought up in a North/South direction in the harbour and moored aft to the bollards on the breakwater with 4 lines and port and starboard anchor forward, 6 shackles in the water (Mediterranean Mooring).

Along the grain pier, which is only 150 m. long, a strong mooring is recommended partly because the after part of the vessel overhangs the end of the pier and partly because of the occasionally heavy swell along the pier.

Grain Wharves: Vessels only allowed alongside with draft of 28 ft., but a sounding with a line showed about 32 ft. It was not possible to get exact information of water depth alongside the general pier. I found the total wharves length to be about 1,500 m. The grain pier is 150 m. long. Certain wharves in the Eastern part of the harbour, which are shown on BA. Chart No. 1271, do not exist anymore as usable wharves.

Facilities for Bulk Carriers: There are a total of 8 cranes in the harbour, each of about 10 tons capacity. Two of the cranes are serving the grain pier and connected with a conveyor belt system. No difficulty with height of vessel.

Cargo Operations: At the harbour anchorage (Mediterranean mooring) the cargo is discharged by ship's gear. Stevedores operating the cranes. Operation is slow and there is often damage to the vessel with grabs due to inexperienced stevedores.

Two cranes serve the vessel alongside the grain pier. They are able to discharge about 3,000 tonnes per day but actual quantity discharged per day (taken over a 7 days period) was only 1,600 tonnes, mostly due to lack of stowage space, transportation problems and crane breakdowns.

Stevedores work 24 hours a day, 7 days a week.

The cranes bring the grain to a conveyor belt system which again brings the cargo to the store house. The store house has a maximum capacity of 12,000 tonnes.

There is a railroad system serving the grain and general pier. Stevedore damage must be reported to the foreman immediately. All damages are repaired before departure by shore repair workers.

Medical: Services available.

Density: 1026.

Fresh Water: Good quality fresh water available at the pier. Charge Won 2.75 per ton (U.S.$1.75). Fresh water can also be delivered by barge to the anchorage.

Fuel: Available but expensive.

Repairs: According to the Agent, all deck and machinery repairs can be carried out. I expect that to be correct as there is a big shipyard in Chungjin.

Surveyors: Local Surveyor only.

Customs: The Bonded Stores are not sealed but all cameras and binoculars are collected before entering the harbour and sealed in a locker. Radio room and echo sounder also sealed.

When the vessel has berthed alongside the pier, Customs will once more come on board and this time check thoroughly for binoculars and cameras throughout the ship. It is possible they will confiscate all cameras and binoculars found during the second check.

Time: GMT plus 9 hours.

Shore Leave: Crew members are not allowed outside the harbour area. Permission is only given for a visit to the Seaman's Club, just outside the gate, but only a walk, straight from the gate to the club. There is an armed guard at the gangway to whom crew members must present their Passport or Seaman's Book and also once more at the harbour gate. Shore leave is from 0800 hrs. to 2300 hrs. There is a new Seaman's Club near Western harbour (about 8 km. from Eastern harbour – by car about 10 minutes). Transportation to and from this club costs U.S.$7.00 per bus.

General: Current: Experienced a slight South-westerly set towards the shore in Kyongusogu Bay when approaching from the South.

Tide: Port not effected.

Charts: BA. 1271, 1316. J.A. 162.

Swell: A heavy swell can cause problems for vessels alongside the wharves, especially in July/August. At times the swell may cause vessels to leave the wharf and shift to the anchorage.

Distress: In case of distress a long blast followed by a short blast with the whistle and repeated 3 times, this will warn the Harbour Master who will take action.

Derat: Derat exemption certificate can be issued.

Laundry: Available and requires about 3 days. Laundry service is satisfactory.

Provisions: Available in limited quantities.

SHIPMASTER'S REPORT: January 1990.

Documentation/Officials: Quarantine and Immigration Officers board with the pilot. Documents necessary as per "Guide". In addition a blank form in English and Korean language is presented by Customs where Master should fill in number of cameras, binoculars, radios, tapes, televisions and sign. They also presented Korean forms for crew and ship's stores which Master only signed and attached IMO forms, which we already had prepared, without objection.

Four crew members are required to accompany the search party to search the deck, engine room, living quarters and provision stores. There is a representative of the Agriculture Ministry who inspects the dry provisions room for insects. They found 2 small cockroaches and ordered fumigation, which ship's crew carried out. All cameras and binoculars were placed under seal. Radio equipment, D/F, echo sounder were sealed but VHF and walkie talkies were not sealed and can be used throughout ship's stay at anchorage or alongside for daily communication with Agent. Bonded stores were sealed after berthing. There was no second search after berthing, only similar search prior to departure, where 2 Immigration Officers will remain onboard up to pilot station and disembark with pilot.

Pilotage: Pilot boards as indicated on the chart from a tug equipped with VHF.

Radio: Cable received from agents Korea Ocean Shipping Agency (KOSA) as follows: Please navigate 15 miles away from our coasts. Pass through 41° 23′ N., 130° 08′ E., thence to pilot station. Chongjin working frequency short wave as follows:

16,995 kHz. from 0900 hrs. – 1800 hrs. (local time).
4,231 kHz. from 0800 hrs. – 1800 hrs. (local time).
8,693 kHz. from 0000 hrs. – 2400 hrs. (local time).

VHF: Chongjin Port Radio and KOSA are both equipped with VHF. Contact can be established on Channel 16.

Berthing: Vessel berthed in Western Harbour.

Cargo Work: Shore cranes were used. Working 24 hours a day, 7 days a week. We loaded steel billets and all cargo arrived by rail. Any damage by stevedores will be repaired by them.

Medical: All crew to have valid health card. Injection for Cholera will be done onboard if required.

Costs: 5 Won for each injection, plus 5 Won for each new card plus 10 Won for Doctor's visit.

Fresh Water: Available alongside by hose provided by water company.

Costs: 2.50 Won per ton, plus supply fee of 1 Won per ton plus Winter charge of 20% (Holiday charge is 125% and night charge is 75%).

Fuel: We received 20 tonnes of diesel oil 7 days after request.

Costs: 980 Won per ton, plus supply charge of 3 Won per ton, plus commission.

Surveyor: D.P.R.K. Register of Shipping surveyor will attend on request.

Repatriation: A vessel in port sent 20 crew to Manila via Pyongyang.

Shore Leave/Shore Pass: An armed guard is on duty at the gangway at all times. I requested Immigration not to stamp Seamen's Books or passports, which they accepted. Ready made shore passes are issued without names, only numbers. There is a U.S.$100.00 fine if shore pass is lost.

Shore leave possible from 0900 hrs. to 2100 hrs., but only within harbour area. Crew can only visit Seaman's Club which is about 2 km. from the gate, by using the bus provided by the Seaman's Club, through shipchandler. Single trip costs 10 Won (U.S.$1 = 2.22 Won).

Excursion tours can be arranged by Agent to museum or hotel. Shopping only possible from Seaman's Club or hotel, although there is a shop in Agent's building. Agent advised me there is an Agent's branch office near East Port.

Provisions: Provisions are very cheap and can be obtained through shipchandler. The supply of fresh provisions is very limited.

HAEJU (Haijuube): 37.59 N. 125.42 E.

SHIPMASTER'S REPORT: August 1978.

DOCUMENTS: Same as Nampo, but Korean Forms must also be filled in on arrival.

PILOT STATION: B.A. Chart 1258. Situated between following points:

37° 40′ 30″ N.	125° 35′ 00″ E.
37° 42′ 00″ N.	125° 35′ 00″ E.
37° 42′ 00″ N.	125° 32′ 24″ E.
37° 40′ 30″ N.	125° 32′ 24″ E.

The ship should anchor and wait. It is imperative to anchor within Pilot Station Area, which is used by North and South Korea, otherwise the Authority will not board the vessel. Approaches to Haeju are not covered by B.A. Charts, Korean (Nos. 15–1354, 1328, 1329) not obtainable. Pilot boards together with Quarantine and Immigration officer. The inspection starts immediately, all crew must have Seaman Book for identification. Food stores and pantries also inspected. Pilotage is carried out depending on tide and ship's draft, daytime only. Berthing at slack tide. After berthing arrival inspection continues (Harbour Master, Customs, Coast Guard).

ANCHORAGE: Ships sometimes complete loading at the Anchorage in position 37° 55.5′ N., 125° 46′ E., depth 11.4 m., but probably swinging space for one ship only. Ships waiting for berth anchor in the vicinity of the wharf. With no chart it makes the situation difficult, as there are no lights or light buoys. Position only obtained by radar. One anchor used due to strong tide which sometimes reaches 4 knots.

ARRIVAL ADVICE: The arrival notice to be sent to KOSA Haeju giving all particulars same as Nampo, first contact via Haeju Coast Radio Station, call sign HMJ, to be made 48 hours before arrival. Earlier contacts via Shanghai Radio.

RADIO: Haeju Radio, call sign HMJ.

BERTH: Old berth described in China Sea Pilot, Vol. III, page 540. Extension works in progress. Shore cranes. Depth at low water about 6.8 m.

EXPORTS: Zinc concentrates, cement from the new factory connected with Port by conveyor belt.

FRESH WATER: From hydrant alongside, at anchor by barge (dredger).

FUEL: In restricted quantities, price unknown.

SERVICES: Provisions and Laundry, available through Seamen's Club.

AUTHORITY: Port Master and Harbour Master.

HEUNGNAM (Hungnam): 39.50 N. 127.45 E. (See Plan)

SHIPMASTER'S REPORT: November 1983.

PILOTAGE: The pilot station is at Lat. 39° 44.8′ N. and Long. 127° 41.0′ E. When arriving at this position and no Pilot is available, vessels are ordered to anchor. Ships are also ordered to navigate at least 12 miles off the coast.

ANCHORAGE: The anchorage is secure and safe with a depth of water of at least 36 ft., however soundings were unobtainable because of the sealing of all equipment.

If vessels arrive with a draft of over 25 ft., cargo is discharged into barges at anchor approximately 1 mile South of the breakwater.

The white light at the end of the breakwater can be seen at a distance of approximately 5 miles.

MAX. SIZE: The minimum depth in the harbour is 28 ft. and ships of up to 25 ft. draft are allowed alongside.

BERTHING: The length and direction of the quays etc. in the harbour are reasonably accurate as they were obtained using radar (See Plan).

The berths are used as explained on the plan. Also the two cranes at the Southern end of the Pier "D" are used for the export of bulk cement.

GARBAGE DISPOSAL: Service is available. One compulsory collection is required for each vessel. Charges vary with n.r.t., from 50 won to 300 won per collection.

WASTE OIL DISPOSAL: Service is available provided oil is in drums.

SEAMAN'S CLUBS: Hungnam Foreign Seamen's Club provides facilities such as shopping, football, other games, cinema and restaurant.

CURRENCY: Local currency is the Won. Exchange rate varies.

NAMPO (Chinnampo): 38.43 N. 125.25 E. (See Plan)

SHIPMASTER'S REPORT No. 1.

ARRIVAL ADVICE: The following information should be radioed to KNSA Nampo before arrival:

(1) ETA Nampo Station, Lat. 38° 37′ 30″ N., Long. 124° 49′ 30″ E.
(2) Nationality.
(3) Gross Registered Tonnage.
(4) Net Registered Tonnage.
(5) Deadweight.
(6) Length overall.
(7) Height of Freeboard.
(8) Speed.
(9) Last Port of Call.
(10) Colour of ship's hull.
(11) Number of crew and passengers.
(12) Hatch Loading/Discharging cargo Plan.
(13) Draft.
(14) Ship's position together with ETA 24 hours before arrival within area connected positions Lat. 37° 00′ N., Long. 124° 30′ E., Lat. 38° 08′ N., Long. 123° 35′ E., and Lat. 39° 50′ N., Long. 124° 07′ E. Also vessel should advise position and time passing above connected lines.

DOCUMENTS:

8 Crew Lists.
2 Vaccination Lists.
2 Lists showing currency, gold and valuables in possession of crew.

Bonded stores must be declared but not sealed.

PILOTAGE/ANCHORAGE: Pilot and Port Authorities (Quarantine Officer and Immigration Officers) board at position Lat. 38° 37′ 30″ N., Long. 124° 49′ 30″ E. where vessels should anchor awaiting Pilot.

Night pilotage prohibited, according to port regulations.

CLEARANCE: After embarkation of Port Authorities at Nampo Station the Radar, Echo sounder, VHF, DF, Radio Room and all optical equipment is sealed. On arrival in Port, Customs Officers board the vessel and together with Immigration Officers search the whole ship.

Seamen's Books required to be stamped with landing pass and they are taken ashore by Immigration Authorities for formalities.

RADIO: Nampo Radio. Call sign HML.

BERTHING: Coal berth can accommodate vessels up to 20,000 d.w.t. There are 2 conveyor belts for coal loading but 1 only can work at a time. Conveyor belts are not movable, the vessel has to shift. Vessels loaded and unloaded mostly in the roads by ship's gear. There are 3 other berths but have no information.

FRESH WATER: Only available by barge.

TIME: GMT plus 9 hours.

SHORE LEAVE: Seamen allowed to go ashore by boat or bus only. Seamen are not allowed to leave harbour area. In order to visit other vessels in port, application should be made to Immigration Authorities.

GENERAL: *Currency:* It is prohibited to take Korean currency out of the country.

Bathing: Prohibited.

Fishing: Prohibited.

Provisions: Limited quantities available at the Seamen's Club.

SHIPMASTER'S REPORT No. 2.

Information covering Nampo, Democratic People's Republic of Korea, previously known as Chinnampo. See in connection with this B.A. Chart 1257 and 1656, China Sea Pilot III.

The following general information was produced by the navigating officers of a vessel in 1974.

NAVIGATIONAL INFORMATION: Pilot boarding point Lat. 38° 37′ 5″ N., Long. 124° 49′ 5″ E. Wreck at Lat. 37° 38′ 2″ N., Long. 124° 48′ 2″ E., 3 masts above water at all states of tide. Radar echo good at 6 miles. Buoy – old position Lat. 37° 37′ 4″ N., Long. 124° 51′ 4″ E., moved to Lat. 37° 37′ 2″ N., Long. 124° 50′ 7″ E.

Light Sei To – flash every 23 sec. Visible for 8 miles
Light buoy at Lat. 37° 37′ 4″ N., Long.124° 53′ 6″ E., flashes 18 sec.
Light Shimai To flashes 18 sec.
Light San extinguished
Light Chiri extinguished
Light Hi To extinguished
Light at Lat. 38° 41′ 7″ N., Long. 125° 18′ 1″ E., (Bachishin) flashes 30 sec.
Light at Nanryoki extinguished
Light at Lat. 38° 43′ 3″ N., Long. 125° 24′ 6″ E., extinguished.

PILOTAGE, ANCHORAGES, INSPECTION AND CLEARANCE: The Pilot boarding point is at the same time the outer limit of Nampo Harbour and the clearing inwards point. To await Pilot and further instructions before proceeding into Nampo, vessels must wait here. Information can be obtained via coastal radio Nampo (details in Nautical Wireless Service Standing Instructions), VHF is not available.

The anchorage at the pilotage waiting point is good, and the bottom is a thin layer of grey mud with clay underneath it. With wind from the S.W., there is a slight swell. Depth of water between 25 m. and 26 m., vessels should anchor with a chain length of at least 100 m. on the capstan and calculate adequate room for swinging, since there is a very strong tidal flow at all states of the wind and weather, running up to 4 knots according to our observations.

The Pilot comes on board with clearance authorities. As pilot cutter (also no VHF) a normal tug is used, which in Winter is also used as an ice-breaker. The tug does not display a Pilot's flag, only the national flag. The hull of the tug is black, superstructure white with large Korean characters on the front of the bridge. Pilotage only available during daylight hours.

At clearance inwards point (pilotage boarding point) all binoculars, including bridge binoculars, and photographic equipment is gathered together and sealed for the total time in port. It is only released after the Pilot leaves the vessel on departure from the port. Likewise all echo-sounding, radar, direction finding equipment is sealed. The use of such equipment and filming and photography in Democratic People's Republic of Korea is completely forbidden.

From the clearance inwards point the journey to the anchorage in front of the town is usually at full speed for most of the way. The anchorage is selected by the Pilot. The Pilot gives a good impression and from our observations knows his job well. However, one can only expect very rudimentary English from him. The same applies to the clearance authorities who have only a very few words of English. Clearance proceeds slowly but is carried out very correctly.

GENERAL INFORMATION: When at anchor in front of the town, further official authorities come on board. These check the whole ship, and go through the deck and engine room areas accompanied by one chosen member of the crew. Whilst the ship is being examined, all other crew members must remain in their cabins. The crew member accompanying the authorities must have his seaman's book with him as identification. When the authorities leave the ship finally they take the log away, and bring it back after a few days. Going ashore is permitted, but normally only in the port area. There is a seaman's hostel there. Travel further inland is possible, but only by giving 24 hours prior notice to Immigration via the ship's Agent. Also from time to time it is possible for crew members to fly out, but this must be arranged via the state shipping Agent. Visits to other ships is also possible, but only by giving 24 hours prior notice to Immigration. Radios and cassette recorders may not be taken on land or even on deck. Their use is only permitted within the ship and cabins. Fresh water and fresh food are available. In the roads, water is delivered by water boats. Removal of rubbish is also possible by due notice through the Agent, and is even possible at the anchorage. Boat manoeuvring can likewise take place, but it must be reported, and may only take place in the vicinity of one's own ship.

For clearance inwards, the following documents are required:

7 Crew Lists.
1 List of Items in Possession of Crew divided into gold, valuables, money, signature.
1 Vaccination List and 1 Maritime Declaration of Health.
1 Passenger List, even if none on board.
1 Narcotics List and 1 List of Tobacco and Personal Goods.

The authorities bring a list of provisions with them and fill it out after declaration on board. Stores, such as alcohol and cigarettes are not sealed.

The Health Authorities place greatest score by cleanliness of toilets, refrigerators, food stores, kitchens, pantries, hospital and first-aid station.

Generally, it may be stated that the ship's broker and Agent speak and understand good English, but from the authorities normally one can expect no knowledge of Western languages.

The port roads offer anchorages for at least 15 sea-going vessels and enough room for swinging. However, in each case at least 170 m. chain should be allowed so that the vessel lies securely. The tidal current, in accordance with our observations, runs at a good 4 knots. The anchorage bottom is good and comprises grey mud. The depths of water shown in the charts are, in accordance with our observations, roughly correct.

To the West of the port on the town shore there is a large shipyard with a mobile gantry crane over a slipway under construction. The slipway is about 150 m. long. Normally, the crane is at night directly on the bank (high water mark) and is illuminated and thus constitutes a good bearing, particularly at night, since otherwise no long-range port lights are available.

Position of the crane is about Lat. 34° 43′ 2″ N., Long. 125° 24′ 1″ E. This area where the shipyard is located is designated as "Iron works" in Chart 1656, map of Chinnampo Ko. The waterside there no longer has an inlet, but has been straightened out, and building work is still in progress. See "Plan Section" of "Guide".

Likewise building works are in progress along the whole shore line between the shipyard and Nampo Ki. The shore line is also straightened here, and to all appearances has been developed as anchorage and repair yard for the Korean Navy. The 2 red/black buoys to the South of the iron works in the chart are no longer there. In this area there is only a small fixed buoy for guard boats and fishing craft.

In the middle of Shienshin Island there is a 9-storey white hotel, which is a good landmark by day.

The tidal pole in front of Nampo Ki is no longer available. On the Southern end Nampo Ki is a bunker with a small house on top. The lower part of the house is pink and the upper part white. The West pier of Hibatsu To has 5 mobile port cranes, with lifting capacity up to 5 tons. At the Southern end of the pier are 2 new large warehouses. A floating crane is available with a capacity of about 160 tons. On the Western pier is likewise a small warehouse and 2 mobile port cranes (up to 5 tons). At the Southern end of the Western pier, are two berths for deep sea freighters with a good 9 m. water depth N.W. alongside. At the Southern part of the Western pier there is a good 8 m. of water along a length of some 210 m. At Berth 1 (West pier, Southern berth), vessels up to 32 ft. draft can go alongside in normal water conditions. The depth of water in the inner part of the port could not be exactly determined, but judging by the vessels there must be about 5 m.

The old coal pier has a berth with at least 10 m. depth of water. East of this pier is also a further coal pier, equipped also with conveyor belts and about 10 m. depth of water alongside.

For berthing and unberthing there are one large and three small tugs available. The large tug acts as pilot craft and for the authorities to visit for clearance. It has been previously described.

From our observations, in the inner roads loading and unloading rarely takes place. There are only a few lighters available. As the port is overloaded, a long waiting time must always be allowed for (at least 14 days).

Medical care for crew members here is somewhat difficult, since one tries with all means to avoid having to have the crew member transferred beyond the confines of the port. In this connection, the doctor comes only once on board and a decision is taken as to whether or not a visit to hospital is necessary. For such a hospital visit one has further to go through the Agent to the authorities to obtain permission to go beyond the port area.

Below are some soundings of the roads. The vessel's draft = 8.35 m. First bearing is Nampo Ki, second bearing is the pier light, fixed red, in front of the East pier:

Weather (Wind)	*Bearing*	*Time* (GMT)	*Measured depth, taking into consideration vessel's draft* (m.)
15° 8 knots	344°, 38°	2330	21.15
100° 8 knots	355°, 42°	0130	19.93
360° 5 knots	355°, 39°	0715	15.97
340° 5 knots	343°, 37°	0900	18.41
070° 9 knots	340.5°, 38.5°	2330	21.15
060° 5 knots	343°, 39.5°	0100	21.46
Circulating 5 knots	324°, 41°	0430	16.88
270° 13 knots	339°, 37°	0000	21.46
300° 20 knots	357°, 40.5°	0300	19.93
290° 10 knots	345°, 40°	0840	18.43
Circulating 5 knots	360°, 45°	0640	16.58

The pier structures have shuttering walls at the bottom, and the upper part is composed of equal-shaped stone blocks. At the mooring points fenders are composed of car tyres strung together on wires. The pier itself is in a satisfactory condition. Rail connection is available, and lorries may run along it. Water connections are also available. As the two cranes on pier Berth No. 1 have very large beams, they are often positioned between two hatches and then work the two hatches alternately.

Loading and unloading is made difficult since it is not possible to obtain precise information as to the number of gangs, the time they will turn up for work, whether they will work with their own equipment or with cranes or with the mobile cranes available. It continually happens that suddenly port workers will appear or disappear, although shortly beforehand the Agent will inform to the contrary.

Telephone connections with Europe are possible. Connections can be obtained at the Seaman's Club in the port after 1600 hrs. On average it takes an hour to get through. It is advisable always to try to get a line to Moscow, and then ask for the required connection oneself in English from the Moscow operator. This noticeably hastens the connection. Comprehension is at times very bad, calculation of charges is dreadful, and one must be prepared to pay three or four times the price as would appertain for a similar call in Europe.

The local currency is the Won. 1 US dollar = approx. 2.15 Won. In the Seaman's Club all customary Western currencies can be changed into Wons.

Loading rigging can be positioned from the ship. If for example this has to be done at night, it must be discussed in advance with the Agent as to whether this has to be done by the ship or the port personnel. If the rigging is done by the port personnel, it must be checked carefully.

Clearance outwards occurs in the harbour roads and not at the pier. It takes a good 3 to 4 hours. Here also, all crew members must be in their cabins for checking purposes, and if the authorities require it, personnel must be available to guide them around the ship. On leaving the port, yet another list must be presented of currency which each crew member has spent in Korea.

They are only interested in foreign currency which has been exchanged for Wons in the Seaman's Club, since Wons may not be exported.

On the journey out from the port, the Pilot is accompanied by an assistant and member of the coastguard. The latter, shortly after coming on board, removes all seals from apparatus sealed when coming into port. The Pilot leaves the vessel at a position Lat. 38° 35′ 5″ N. and Long. 124° 55′ 5″ E.

Herewith some soundings, taking into consideration draft of vessel. First bearing – pier light East side Hibatsu To – fixed red. Second bearing chimney at Lat. 38° 44′ 1″ N. and Long. 125° 25′ 9″ E. (shown on the chart as Chy.)

GMT	*Weather*	*Bearing*	*Line sounding* (m.)
0030	Calm 1022 mb	338° 43°	21.78
0130	Calm 1022	338° 42°	24.79
0430	Changeable 1022	335.5° 40°	21.03
0530	250° 14 knots 1022	312° 38°	24.18

SHIPMASTER'S REPORT: No. 3

VHF: Agent "KOSA" can be contacted on Channel 16. Generally port (Pilot, etc.) do not communicate with the ship directly. All communications (VHF) to be done through "KOSA". General watch keeping time (VHF) – 0900 hrs. to 1030 hrs.; 1200 hrs. to 1300 hrs.; 1400 hrs. to 1630 hrs.; 1900 hrs to 2100 hrs. and 2330 hrs. to 0030 hrs.

FRESH WATER: Also available from shore connections alongside in Berths No. 1 and No. 2.

SURVEYORS: State surveyors of D.P.R.K. (Democratic People's Republic of Korea) available. Survey fees about U.S.$1,900.00 per visit.

REPAIRS: Facilities available.

New Dry Dock: is in operation which can handle ships over 180 m. in length. *Shipyard* builds ships (2 – 3 ships at a time) of moderate size (about 10,000 d.w.t.).

Dry Dock/Shipyard Workshop undertake ships repair. They have boat fully equipped with diving equipment and diver.

Factory Engineer/Technician (Electronic) undertake Radar/Echo-sounder/VHF repairs.

GENERAL:
Marine Note of Protest: No Notary Public or Court of Law. Masters wishing to lodge a "Note of Protest" can write to the Harbour Master who will endorse his (Master's) letter.

People strongly object calling their country "North Korea", it is to be called Democratic People's Republic of Korea.

Fresh Provisions: Fresh provisions also available through the ship chandlers (owned/controlled by the Government). It is advisable to take stores through the seaman's club, where quality can be checked before the provisions supplied on board.

SHIPMASTER'S REPORT: No. 4. May 1986.

Korean Regulations require foreign vessels to stay 15 miles off coast until abreast of port and we were tracked from 37° 00′ N., Northwards to ensure that we did so. As well as ETAs at 5 days, 24 hours, 12 hours and 4 hours before arrival at pilot station, vessel required to report position and speed 24 hours before and on crossing Lat. 37° North.

Approached Sei To Island on course 075° on flood tide with very strong Northerly set and carrying 15° for set to clear shoals to the North. Passed Sei To at 1.1 miles and 7 cables North of Hoko To then course 050° between red can buoy marking Southern end of Chu Shu or Naka Su and black conical buoy marking Northern limit of Kashi or Shimo Su, then 055° to Pilot Station No. 1 and waiting anchorage North of Shimai To. Neither of the above buoys appeared to have lights and were poor radar targets, so approach at night not advisable.

Instructed by cable from Agents (KOSA) to anchor at No. 1 Pilot Station to await Pilot, who arrived unexpectedly after only 2 hours at anchor. We could hear Agents KOSA on VHF Channel 16 but they did not answer.

2 Pilots, 2 Immigration Officials and Port Health boarded from tug which came out from Shimai To. Clearance to enter procedure carried out here which included placing all cameras and binoculars in radio room and sealing the door, took about one hour. The 2 Immigration Officials stayed onboard for passage up river. Echo-sounder sealed but not radars.

Channel to locks at Hito Suido passes close Northwards of Shimai To, 067° through No. 2 pilot station and waiting area to 8 cables N.N.W. of San To, thence straight course to locks.

The damming of the river and the river sealed off from the sea was completed in April 1986. The old main channel (Hito Suido) South of Hi To Island closed with sluices and three locks. Two for large ships in way of the old deep water channel, of which the largest is 270 m.×36 m. and a small lock for fishing vessels close to the Southern shore. The 2 main locks are side by side with a large control tower and large swing bridge on the centre dividing islands, which is extended East and West by 100 m. long leading jetties on piles. Leading jetties have vertical wood fendering against piles and locks have floating wood fenders for full length, both sides. One tug available to assist large ships to enter lock.

East of locks, channel close to South bank to avoid shallow patch in mid-river for first 3 miles, after which appears to be plenty of water for virtually full width, expect changes in the future though, with silt washing down river which cannot pass dam.

We went straight on to berth and the rest of the entry procedure which took 2 hours carried out, normally this is done at anchor before berthing. Papers required were as previous Master's Reports in 'Guide to Port Entry'. All Cholera vaccinations must be valid and all foreign currency must be declared. Before sailing a list is required of all foreign currency changed, which is readily possible at the Seaman's Club, all Hotels and most of the shops in Nampo amd Pyongyang.

Officials searched ship thoroughly on arrival. They require 4 Officers/men to accompany searches, with their passports, and all other personnel have to be in their cabins. Even deck stores and engine room searched. The same procedure takes place before sailing, but this time they are looking for stowaways and Korean currency which it is illegal to take out of the country.

Shore leave for ship's crew is only allowed between 0700 hrs. and 2300 hrs. local time daily and only inside port area, which includes Seaman's Club. Even for this, shore passes and passports must be taken, which are checked by guard at foot of gangway, on and off. Special permission has to be obtained for visits to Nampo City or the capital Pyongyang. This is readily given, though always accompanied by an official guide from either the agency or the Seaman's Club. We were allowed cameras out of seal for a guided tour of Pyongyang, but they were returned under seal, immediately on return to the ship.

Taking of soundings with hand lead, making drawings or sketches of anything in port area, visiting other ships, taking radios or tape recorders on deck and taking anything ashore without declaring to Customs are all strictly forbidden.

Garbage is collected from ship every 3 days, which service has to be paid for (about 300 Won each time). All garbage must be kept in closed bins, and nothing must be thrown overside.

Very keen on rat guards and net under gangway.

Fresh water readily available by barge, in 90 tonne quantities. Seemed to be of good quality though quite expensive (4 Won per tonne).

The Seaman's Club provides chandlery and laundry services. Good fresh vegetables available.

Rate of exchange (May 1986) 2.2 Won to US dollar and 3.4 Won to Pound Sterling.

Bulk handling berth consisted of three large concrete dolphins on steel pillars and joined by steel girders, on which tracks for bulk handling equipment run. Connected to shore by narrow walkway only. Total length of berth about 150 m. so stern was overhanging.

Berth equipped to discharge grain and to load bulk cement (cement being the largest export from the port).

Cargo of bulk wheat was discharged by three methods:-

(1) By vertical belt lift to conveyor belt, thence to silo.
(2) By ship's grabs via hopper to conveyor belt, thence to silo.
(3) By ship's grabs to barges overside.

The majority of cargo being discharged by the latter two methods as, though the vertical lift belt was the fastest when working, it was continually breaking down. Also best work done at night as there was frequently a shortage of shore electrical power during the day.

Draft survey carried out to confirm quantity discharged and surveyor signed a statement to the effect that full B/L quantity discharged. Vessel not given clearance to sail until this had been done.

Although nearly everyone from the agency (KOSA) spoke good English, there was nobody from stevedores who did and consequently ship's personnel had very little control over which hatches were worked and when.

Agents: Korea Ocean Shipping Agency (KOSA) very attentive and said to have 24 hour Channel 16 VHF watch in their office, though this was not put to the test outside normal working hours. Requests for everything has to be by written application, i.e. money, fresh water, repair firm, etc.

SHIPMASTER'S REPORT: No. 5. August 1986.

ARRIVAL: *Pre-arrival notices:*
The state Agent, Korea Ocean Shipping Agencies, cable address "KOSA" will send by cable, instructions regarding reporting position at sea before arrival. In our case we had to send position 24 hours, 12 hours and 4 hours before arrival at pilot station together with course and speed.

The position is also to be sent when crossing a line joining the following positions:

Lat. 40° 00′ N., Long. 123° 20′ E.
Lat. 37° 00′ N., Long. 123° 20′ E.
Lat. 37° 00′ N., Long. 126° 30′ E.

The coast must be kept at a distance of 15 miles until the approach to the Island of Sei To (Lat. 38° 33′ N., Long. 124° 46′ E.)

Note: North of Lat. 37° 00′ N., the ships are challenged by Korean Navy vessels either by VHF or Morse Lamp. They request ship's name, nationality, cargo on board, destination, port of origin. Sometimes they approach close to vessel (3 – 4 cables) to check the name with powerful projector.

PILOTAGE/APPROACHES: *Pilot boarding anchorage:*
After passing Sei To Island the ship proceeds to the pilot waiting anchorage bounded by the following positions:

A. Lat. 38° 41′ 24″ N., Long. 124° 59′ 12″ E.
B. Lat. 38° 41′ 54″ N., Long. 124° 58′ 06″ E.
C. Lat. 38° 43′ 06″ N., Long. 125° 00′ 24″ E.
D. Lat. 38° 42′ 06″ N., Long. 125° 01′ 36″ E.

The tide is very strong but the holding ground is good, pay out sufficient chain to avoid dragging.

Approaches: The red buoy on the SW end of Naka Su Shoal, to be left on the port side when entering, is in position 37° 36′ 51″ N., 124° 50′ 42″ E. (7 cables S.W. of charted position).

The black buoy, starboard hand, 2 miles N.E., is 3 cables W.S.W. of the charted position.

The black buoy 1 mile N.E. of Shimai To Lighthouse has been changed to red and is in position (A) of the waiting anchorage (38° 41.4′ N., 124° 59.2′ E.).

LOCKS: A dam has been erected across the river from a position (approx) 38° 43.4′ N., 125° 14′ E. in a SW direction to the '5 1/4' wreck East of Hi To Island, then in a 263° direction to the Datum Rock (38° 40.8′ N., 125° 11′ E.) The area between Datum Rock and Hi To Island has been reclaimed and a large esplanade built.

Another dam with gates join Hi To Island to the mainland in a SSW direction (198°). 3 locks have been built on the SSW part:

Lock No. 1: The SSW most, is used for barges.

Lock No. 2: In the centre, is for large vessels up to 50,000 d.w.t., the dimensions are 275 m.×36 m. A training wall extends on both ends of the lock on the Northern part. The walls of the training wall are protected with wooden fenders, the lock has floating wooden fenders.

Lock No. 3: The Northernmost is for medium size ships, the dimensions are length 225 m. and beam 26 m. 2 ships can be accommodated at the same time.

Note: The lack of co-ordination between the Lock Master and Authorities operating the gates of the dam is frightening, when the gates are opened a very strong current sets across the Western part of the lock and it is impossible to leave the lock as the ship is pushed toward the shallow water still existing just outside the lock. Small craft may try to enter the lock when the gate is opened.

A road and railway line on the dam and lock system through a swinging bridge.

2 tugs are available to assist large vessels to enter the lock.

We entered the lock in loaded condition with a draft of 10.00 m. without any difficulties. Our vessel is 37,500 d.w.t.

The locks have been operating since April and the Pilots do not have much experience.

A very tall monument stands on Hi To Island.

PORT: See "Plan". Since the building of the dam there is no tide in the port and the current is negligible.

Salinity is lowering. At the time of our stay it varied from 1009 to 1005, it is said that in future it will be completely fresh water.

5 new berths have been built over the last 5/6 years in addition to Berth No. 1 and No. 2 in Hibatsu To.

Berth No. 3 extends in a Northeasterly direction for 220 m. from the light in position 38° 43′ N., 125° 24.6′ E. There is about 11 m. depth alongside the berth 2 cranes of 5 tons are available.

Berth Nos. 4 and 5 are inside a basin just North of Berth No. 3 and are used by barges.

Berth No. 6 (NE of Berth No. 3) is formed by 3 large platforms is equipped with 2 discharges and one loader for grain. There are minimum depths of 11.5 m. on the inside part of this berth (where we discharged most of the cargo).

Berth No. 7 (Eastward of Berth No. 6) is about 340 m. long. Berth No. 7 has minimum depth of 6.0 m. at the Eastern part and is used for general cargo. It also has a fixed hopper connected by belt to a silo. The berth is equipped with 2 cranes of about 5 tons capacity.

Berth No. 8 is equipped with 3 special loaders for cement in bags. It probably has a minimum depth of 11 m. as we have seen vessels loading up to a draft of 10 m.

Berth No. 9 (further Northeastward) is a loading berth for coal and is about 180 m. in length with depth of more than 12 m.

One loader runs on the pier for loading of coal in bulk.

Note: Cranes and equipment for handling grain are locally built and subject to frequent breakdowns. Safety guidelines are absolutely ignored by the stevedores who use wires and equipment of poor quality.

Electric cable connections are exposed to the weather.

Regulations: Port Regulations must be strictly followed and ships are subject to heavy fines for non observance of the regulations. Pollution is strictly prohibited. In future the discharge of sewage into the water will be prohibited.

General: There is another berth further upriver to discharge iron ore at a steel factory but details are not known.

The Agent KOSA has a VHF radio operating day and night.

Binoculars, ship's radio station and echo sounder are sealed at waiting anchorage, Radars are left open for operation.

SHIPMASTER'S REPORT: No. 6. December 1986.

Vessel called at Nampo with a cargo of bulk wheat from India (about 22,400 tonnes).

1. The Nampo pilot ground has been established in an area enclosed by the positions:

(a)	Lat. 38° 41′ 24″ N.	Long. 124° 59′ 12″ E.
(b)	Lat. 38° 41′ 54″ N.	Long. 124° 58′ 06″ E.
(c)	Lat. 38° 43′ 06″ N.	Long. 125° 00′ 24″ E.
(d)	Lat. 38° 42′ 36″ N.	Long. 125° 01′ 36″ E.

2. The binoculars are put away under seal, also the use of transmitters and echo sounders beyond the lock gate is forbidden.

3. Vessel berthed at Berth No. 6, and the Pilot informed me that a 10 m. fresh water draft is safe.

4. Berth No. 6 is a mechanised berth serviced by 2 conveyor belts and claims of a discharge rate of 3,000 tonnes per day. There are, however, breakdowns and we managed about 1,000 tonnes per day with a high of 1,400 tonnes per day. A silo receives the wheat and has a capacity of 20,000 tonnes. Berth No. 6 is also the loading berth for bulk cement, serviced by one loader. Supposedly a load rate of 3,500 tonnes per day can be achieved. The storage facility for the bulk cement is a silo of 60,000 tonnes capacity.

5. Galley garbage is cleared every 3 days. The Harbour Authorities are strict and among other things are very particular about rat guards being in position and the satisfactory operation of sewerage treatment plants.

6. The Agents are co-operative and helpful, and going by earlier Masters' reports, I think there is vast improvement in telex and telephone facilities.

7. Agent's cable address: Kosa Nampo.

SHIPMASTER'S REPORT: No. 7. January 1992.

This information is to be read in conjunction with Guide to Port Entry, B.A.Chart No. 1257, China Sea Pilot Vol. 111 and Radio Signals Vol. 6, Part 2. This report gives the differences with information from above mentioned publications only.

DOCUMENTS: On arrival:

Declaration of total foreign currency on board, including crew member's currency.

List of radios on board (separate tuners and tape recorders).

If tuner and tape recorder is one set, show as tape recorder.

On departure:

Declaration of total foreign currency spent in the port.

RADIO: Telex No. 24051 (was advised by charterers) operated well, but Agent uses telex for receiving information only. Instructions were sent by Agent via Nampo Coast Radio (call sign – HML, frequency MW – 500, SW – 8736, 24 hours duty). This station replies in case of need to send Agent's instructions to vessel only.

VHF Channels 16 and 11 are used by KOSA. Communications with other parties via Agent only.

Use of SATCOM telephone is strongly prohibited in the port. In case of need, a 24 hour advance application is required via Agent to Immigration.

PILOTAGE: Pilot and Port Authorities board at Waiting Area No. 1 for foreign vessels, where ships have to drop the anchor as instructed by Agent. Sea and port pilots are experienced.

APPROACHES/ANCHORAGES: Vessel was instructed by Agent to navigate 12 miles off the coast of D.P.R.Korea. Waiting Area No. 1 for foreign vessels is indicated on B.A.Chart correctly. All buoys indicated on this chart in approaches and inside the river are missing. Electronic chart for Norcontrol Data Bridge 7 was used in approaches as prepared in good time. In this case, there were no difficulties with approaches. Awaiting Area No. 1 for foreign vessels, as an anchorage, is dangerous for ships in light condition, when N.W. wind increases to gale force or more. In case of a bad forecast, it is recommended to leave this anchorage.

LOCKS: Both times (on arrival and departure), vessel used Lock No. 3 (the biggest). Most wooden fenders are missing. There are small rubber fenders with wire ropes on the lock's walls. In loaded condition, vessel's freeboard was 4.5 m. All of these fenders were above ship's main deck when the lock was opened.

One tug with capacity 1,000 h.p. is available to assist the ship to enter the lock.

Locks' regulations: Vessel can pass through the lock if the wind is less than 7 m./sec., and waves less than 0.5 m., especially with swell from the West. Locks operated in daytime only.

TUGS: There are three old tugs in the port with 1,000 h.p. Usually pilots use these tugs for pushing only.

GENERAL:

(1) Radio-room, binoculars, navigation and photo equipment were not sealed.

(2) Discharging of sea water ballast and sewage is strictly prohibited after passing the lock. It is recommended to discuss this matter with Agent in good time, especially for ships which call at Nampo for loading.

(3) It is recommended to avoid mooring between sunset and sunrise, due to the fact that electric lights are missing in the port and very often on the berths.

(4) It is necessary to declare all audio equipment/radio tuners and tape recorders twice: First time, during Clearance inward procedure, which is carried out at Awaiting Area No. 1; and second time, on arrival at the port.
The local form for radio equipment has to be filled in very carefully. It is compulsory to declare all broken audio equipment, including those inside the store rooms, in order to avoid the fines from Immigration. Master signs this form before Officials search ship thoroughly. During this inspection, Immigration Officer counts all audio equipment.

(5) On arrival, the Quarantine Officer demanded the Certificates of Cholera Vaccination for all crew members, but after long "discussions" this demand was cancelled.

(6) The visit to the Seamen's Club is not restricted from 0900 hrs. to 2300 hrs., but is 24 hours a day. Application to Immigration via Agent is required for visit the town. The visit to another vessel in port is possible if vessel is same flag only.

(7) Large amounts of cigarettes were given out by Master as presents to representatives of local Authority.

(8) The permission to enter Government Waters was legalised by Protecting Agent, and number and date of issuance were advised by charterers.

(9) The vessel loaded coal. Average rate of loading is about 4,000 tonnes per day. As usual, cargo was collected in daytime and vessel was loaded in the night. The reason for this is lack of electricity in the port most part of time. The ship was shifted along the berth for loading Holds No. 1 and 2. The stowage factor of coal is around 36 cu.ft./ton. The trimming of cargo inside the holds is carried out by trough only.

SENBONG: 42.20 N. 130.24 E.

SHIPMASTER'S REPORT: March 1987.

DOCUMENTS:

8 copies Crew Lists (One additional copy required for each application for shore leave and an additional 2 copies on vessel's departure).

4 copies Vaccination List.

2 copies International Maritime Declaration of Health.

2 copies Crew Declaration.

2 copies List of Valuables and Currency.

1 copy Bills of Lading.

To be presented on arrival:

Vegetable form indicating quantities and country of origin.

Cameras and binoculars form.

Local health form.

PILOTAGE: Compulsory for foreign ships. There is no VHF response prior to arrival at pilot station. Pilot boards from tug.

ANCHORAGE: Bounded by following points:

42° 17′ 00″ N.	130° 26′ 30″ E.	42° 17′ 00″ N.	130° 19′ 00″ E.
42° 15′ 30″ N.	130° 26′ 30″ E.	42° 15′ 30″ N.	130° 29′ 00″ E.

Pilot and Health Officer board in this area.

RESTRICTIONS: VLCC movements only carried out at night and during poor weather conditions with the Harbour Master's permission.

HEALTH: No Radio Pratique. Doctor boards with Pilot and Immigration Officers. All vaccination certificates checked for validity, any expired inoculations given. For hygienic reasons, ship supplied disposable hypodermics. If any crew joined vessel within preceding month, all personnel to have temperature taken by Doctor.

RADIO: Call Radio Station HMR (Ragin) on 500 kHz between 0800 hrs. and 2400 hrs. (local time). When out of range, messages sent via VPS Hong Kong.

Arrival Advice: All communications for Port and Pilots to be sent via Agents (36 hour, 24 hour and 12 hour messages). Initial message to include present position, speed, DWT, GRT, NRT, LOA, Breadth, number of crew and confirm Democratic People's Republic of Korea flag on board. After initial report, send position reports every 4 hours.

VHF: We were informed after arrival that VHF contact is possible, but local operators only respond to Russian and Korean languages. We made very brief contact with Pilot when tug 0.5 miles off.

TUGS: 1 × 1,000 h.p. and 2 × 800 h.p. tugs available. Aft tug makes fast using ship's line, which should be of the floating type. One tug is used to keep buoy mooring lines coiled on deck.

BERTHING: S.P.M. located in approximate position 42° 18.3′ N., 130° 25.5′ E. and shows LF.2R.12s. There is an inner harbour for smaller vessels bunkering, size not known.

MEDICAL: Hospital and dental facilities available at Rajin. 24 hours notice required for Immigration.

TANKERS: S.P.M. has 1 × 16 in. hose string which is connected and disconnected by shore personnel. Maximum back pressure allowed at ship's rail is 9 kg. Loading rate averaged 1,300 t.p.h. Shore tanks of 20,000 tons capacity are located approximately 7 km. from the buoy.

Moorings: Two buoy ropes of 130 mm. diameter are made fast on bitts. Ship lowers 2 mooring ropes with lashings and messengers to small line boat which then passes them to a tug near buoy.

DENSITY: 1025.
FUEL: I believe fuel is available to vessels using the port if advance notice given. There is an inner harbour draft restriction of 7.50 m. Barges not available.
FIRE PRECAUTIONS: Minimal, vessel carried out own checks.
CUSTOMS ALLOWANCE: 200 cigarettes, 1 bottle of spirits, no limit for beer. Bonded store not sealed.
TIME: GMT plus 9 hours.
STORING: Small amounts of fresh produce are available, depending on time of year. Payment in cash (U.S. dollars) is preferred.
SHORE LEAVE: Application to be made to Immigration 24 hours in advance. Crew only allowed to visit Seamen's Club in Rajin. Bus takes crew from jetty to Club where crew must remain until return journey. Shore pass and Seaman's Book to be carried at all times. These are checked by Immigration on the ship and on jetty outward and on return.
GENERAL: The initial Quarantine and Immigration inspection takes two hours, therefore it is advisable to anchor.

Immigration Officials seal radio, cameras, binoculars and distress rockets. They also require radars and depth recorder to be sealed but were persuaded to leave this until vessel berthed for safety purposes.

Once berthed, Customs, Agent, Harbour Master, Receivers, S.P.M. Operators and Interpreter board, at which time there is a second Immigration and Customs inspection of whole ship.

Accommodation required for 11 persons and meals for 15 persons. Officials come and go daily.

Prior to departure there is a Customs and Immigration inspection. Once completed, Harbour Master issues Clearance Certificate.

Two Immigration Officials remain onboard until vessel drops Pilots in Quarantine Area.

Pilot remains on bridge throughout discharge and controls the tug which is secured at the stern to keep the vessel off the S.P.M.
Chart: BA. Chart No. 2431 (Unggi).
Agents: Korea Shipping Agency, Rajin Branch. Cables: "KOSA RAJIN". Telex: 6204 RJKP. Telex manned during office hours only.

NOTES

Please also advise Shipping Guides Ltd.

Republic of Korea

GENERAL:

FOREIGN FLAGS: Ministry of Transportation issued following instructions regarding entry and exit of foreign flag vessels in Republic of Korea waters.

Item 1: Director, local Marine Bureau shall not grant permission for entry of foreign flag vessels under ownership of North Korea, Vietnam and China.

Item 2: Director, local Marine Bureau shall not grant permission for entry of foreign flag vessel bound for North Korea or falling short of 90 days of departure from ports of North Korea.

Item 3: No restriction shall be applied for entry of foreign flag vessels unless same appertained to above clauses in accordance with internationally accepted practices.

ETA: The following requirements apply to vessels carrying dangerous cargoes, deep draft vessels and vessels and their tows exceeding 200 m. in length. Such vessels should inform the District Maritime and Port Authority, 12 hours in advance, of their name, tonnage and estimated time of entry into the designated area of the following ports: Yosu, Pusan and Ulsan.

HEALTH: Radio Pratique is available at Inchon, Busan, Yosu, Ulsan, Pohang, Masan, Mokpo, Gunsan, Chungmu, Bukpyong and Cheju.

Masters are required by the Ministry of Health and Social Affairs to include in a telegram requesting Radio Pratique the following information in the order shown:

1. Notice in accordance with Art. 22 (RPM).
2. Name and nationality of vessel.
3. Number of sanitary certificate.
4. Date and place of departure.
5. All ports of call with dates.
6. Name of entry port and ETA (Korean time).
7. Name of issuing authority, date and validity of fumigation certificate.
8. Number of crew and passengers on board.
9. Any transhipment of crew or cargo within 7 days prior to arrival.
10. Name of any patient on board ill within 7 days of arrival and symptoms.
11. Any death on board within 7 days of arrival.
12. Discovery of infected rats, dead or alive.
13. Infection of cargo by quarantinable disease.
14. Any crew or passengers without valid WHO inoculation certificates.
15. Availability of doctor on board.
16. Name of Master.

TIME: GMT plus 9 hours all year round.

BUKPYUNG: 37.29 N. 129.08 E. (See Plan)

SHIPMASTER'S REPORT: June 1982

LOCATION: Bukpyung (Lat. 37° 29.5′ N., Long. 129° 08.5′ E.) lies some 5 miles to the South of Mukho, it has been under construction for the past 4 years and now ranks as the third largest port (by tonnage) in Korea. The port consists of 2 breakwaters extending from the shore and has been constructed primarily for the export of cement in bulk, clinker and bagged forms.

The port is linked to the Donghai Cement Plant which in itself is the largest unit cement factory in the world with an annual production capacity of 8.7 million tons.

This report is mainly directed to the facilities associated with the export of cement, however where possible relevant information has been included which could prove useful to other vessels trading in the area.

PORT LIMITS: Approximately 1 mile radius off the port but mainly to the North of the E./W. Line, passing through the South Breakwater Light. Port limits are indicated on Korean Chart No. 141.

DOCUMENTS:

6 Crew Lists (on blank paper).
3 Vaccination Lists.
2 Port Itineraries for past 6 months.
2 Passenger Lists.
2 Arms Lists.
2 Drugs Lists.
3 Personal Manifests.
3 Cargo Manifests.
3 Stores Lists (including fuel on arrival).
3 Bonded Stores Lists.
Korean Maritime Declaration of Health.
Various Korean entry forms.

APPROACHES: B.A. Chart 882, also Korean Chart 141. Best to run up 5 miles off the coast to keep clear of 3.5 fathom patch reported in position Lat. 37° 28.5′ N., Long. 129° 13.0′ E., then alter course to 270° for approaches to anchor area off the port.

PILOTAGE: Generally operate from 0600 hrs. – 2100 hrs. 3 Pilots available and appear quite competent. As an exception they will sail vessels up to 2200 hrs. from the berth. Small pilot launch painted white. No VHF (1982). Pilot ladder required almost to the water, no manropes.

In heavy swell the Pilot refuses to come out to the vessel and no dispensation is given for the vessel to come under the lee of the North Breakwater to pick the Pilot up, even though there is ample room. Pilotage is relatively simple with a wide deep water entrance to the port and a large swinging basin.

ANCHORAGE: Recommended anchorage about 1 mile to 1.5 miles off the breakwater in about 12 fathoms to 14 fathoms of water. We anchored with South Breakwater Lt. Ho. bearing 180° (T)×1.27 miles, with 7 shackles down on the port anchor and happily rode out a day of winds in excess of 40 knots, though engines were kept on immediate notice. A confused back swell is sometimes thrown off the breakwater during strong onshore winds. Bottom mainly sandy with some rocks. Ample visual and radar targets available to check anchorage position.

MAX. SIZE: No limitations to length or beam. Max. draft 11.8 m. (SW).

HEALTH: Quarantine Officials generally attend at the anchorage and inspect store rooms, galley, etc. Derat sighted and Vaccination List required. Korean Maritime Declaration of Health made out. Pratique granted. Various vaccinations can be obtained at the Port Health Office at Bukpyung. The doctor/nurse will not attend onboard to do injections. No specific vaccinations required for Bukpyung unless vessel from infected area.

RADAR: No port radar at present.

VHF: Bukpyung Port Radio operates on Channels 16 and 12. Daylight operations only. Initial contact is made via this station and arrival time and ships' particulars noted. Berthing instructions are generally relayed through Mukho Radio, VHF Channels 16 and 26 from Agents. Local and overseas calls are also possible through Mukho, with a 24 hour watch kept.

TUGS: Three available: 2×2,000 b.h.p. and 1×1,000 b.h.p. Make fast with tugs' lines with the tugs joining vessel just inside the breakwater. There are an additional 2 tugs at Mukho (5 miles to the North) and these will work at Bukpyung if required. Communication with tugs is by walkie talkie.

BERTHING: Vessels generally berth port side alongside the South Pier (Ssangyong) and starboard side alongside the North Pier. Tugs join just inside the breakwater, the offshore anchor is used when off the berth. Boat takes the headlines only. The North Pier is more exposed than the South and a substantial tie up is recommended. The bollards are 25 m. apart and the jetties very well protected with modern horizontal rubber type fenders. The gangway can be swung out prior to berthing with no obstructions to cause damage. South Pier length 735 m., North Pier length 540 m.

Present Capacity: 4×30,000 d.w.t., 1×10,000 d.w.t. and 4×5,000 d.w.t.

Additional Future Capacity (1986): 6×50,000 d.w.t., 1×20,000 d.w.t. and 1×10,000 d.w.t.

BULK HANDLING FACILITIES:

Coal: One coal berth lies at the seaward end of the South Pier, whilst the other berth is at the inner end of the North Pier. Vessels use their own cranes and grabs for discharging the coal onto the quayside, whereupon it is handled by payloaders and loaded into road trucks. Discharge rate is in the region of 5,000 tonnes per day but could improve if more payloaders were brought in to handle the quayside operation. Generally speaking, only two payloaders are used at any one time. Road trucks carry the coal to a stockpile 3 miles away and there appears to be ample supply of trucks available. The final few hundred tonnes in each hatch is shovelled by stevedores into savealls and rubber mats. No bulldozers are available for hatch work.

If a vessel is not equipped with her own grabs then the complete discharge is handled using savealls and manpower. Using this method a discharge rate of about 3,000 tonnes per day could be expected. The crane drivers are quite competent and stevedores helpful. Any damage to ship can be repaired on the spot and stevedores accept full liability.

Bagged Cement: Two companies export cement from Bukpyung. Ssangyong Corporation, the largest, operate from the South Pier whilst Tongyan M&G work off the North Pier. Ssangyong have the facility for loading clinker/bulk and bagged cement by conveyors and loaders. Tongyan can only handle clinker and bulk cement by loader, any bagged cargo being handled by ship's gear.

The Ssangyong export terminal serves the largest unit cement plant in the world with an annual production capacity of 8.7 million tons. This main plant, situated a few miles away at Donghai, is linked to the port of Bukpyung by an extensive conveyor system. Further conveyors link the storage facilities to 2 ship loaders (for bagged cargoes) and 2 spout loaders for clinker and bulk cargoes.

The bagged ship loaders were each rated at 150 tonnes per hour, though actual loading rate worked out at nearer 75 tonnes per hour, with both loaders suffering occasional breakdowns. In addition to the loaders, ship's cranes were also used to lift bagged cement directly from lorries. In all, 5 gangs were used (2 loader and 3 crane) and a daily load rate of about 4,000 tonnes experienced. The cement was bagged in triple skinned paper/polythene and very little breakage was observed, the loader however throws off some cement dust and the ship receives a liberal covering.

The bagged cement was initially ordered, by Charterers, in nett weight i.e. bags each weighing 50 kg. (gross 50.17 kg.), however as loading progressed it became obvious that the actual weight loaded was considerably more than that tallied aboard. On checking the actual weight of a number of bags, all were found to be in excess of 50.50 kg. (gross). Initial instructions from Charterers required the vessel to load a cargo geared to a limiting draft of 32 ft. at the discharge port, but when realising the full shore tally weight could not be lifted then authorisation was received to load the shore figure. By shore tally and Bills of Lading we loaded 490,000 bags cement at 50 kg. nett per bag equalling 24,500 tonnes.

Actual deadweight on board by draft survey showed some 24,886 tonnes of cargo. One per cent. of spare bags were also loaded with the cargo.

The bagged cement was pre-slung wherever possible in the hatch to facilitate a quick discharge, the discharge port, was not nominated however, this depending upon the number of cement ships discharging on the Indian coast. Ahjin intend sending a supercargo to India to assist in the discharge.

No problem exists with the loaders regarding height clearance over the coamings, however conversely if the vessel is too deeply ballasted then the base of the shoot cannot reach the tank top and it is then necessary to de-ballast to bring the ship up to the loader.

Cargo manifests, etc., were prepared, by the Agents, prior to sailing. Normal procedure is to authorise Agents to sign Bills of Lading on Master's behalf.

Stevedore companies: Ssangyong Cement Co. Ltd., Tongyan M&G Co. Ltd., Korea Express Co. Ltd.

MEDICAL: Doctor and hospitals situated at Mukho some 5 miles away. Agents will arrange car to transport crew members to and from doctors. Medical attention is quite expensive. Medical reports issued on request. An ambulance service is available if required.

FRESH WATER: Available by barge in 100 tonne quantities.

FUEL: Supplied only by barge either alongside or whilst the vessel in the anchorage. The bunker barges are not equipped with heaters and consequently the pumping rate very slow (about 90 tonnes per hour for heavy oil and 120 tonnes per hour for diesel oil). Each barge has a capacity of about 400 tonnes; No blending on the barge, this being performed at the refinery. The barges generally sail up from Pohang and have to clear customs formalities at Bukpyung. Fenders on the barges are virtually non-existent and if taking bunkers at the anchorage in any kind of weather extra tyres etc., should be used. We were supplied by Korean Marine Bunkering: Seoul 776-8531.

REPAIRS: Engine and general dock repairs possible from Donghai Marine Engineering Co. Ltd. The company has a staff of about 12 and are capable of handling most repairs. Welders are Korean registered. Various Customs formalities have to be completed before spare parts are removed from the port area. Prices appear reasonable though slightly higher than Ulsan and Inchon. Radar repairs can be arranged with ample notice. Chemical cleaning of heaters, etc., can be arranged.

SURVEYORS: Local Korean inspectors/surveyors are available at Mukho for draft surveys, on/off hire surveys, etc.

Lloyd's and Bureau Veritas are available from Seoul and will attend vessels at Bukpyung if necessary, with ample notice.

WATCHMEN: Available from Sanghyup Kongsa (again) recommended mainly for their ability to use telephone especially with the Agency 5 miles away. Cost about £12 per day.

CUSTOMS: Attend on berthing. Quite casual and friendly. Spirits and cigarettes sealed though beer and wine left unsealed. Normal allowances per person and an issue available after vessel has been in port for 5 days. One Customs Officer remains on the vessel during the stay in port, he requires a cabin and meals. Drugs are also sighted and sealed.

REPATRIATION: No difficulties in this area. Seoul some 300 km. away is served by an express bus service. Sub-Agents liaise with main Agents and all repatriations seem to run smoothly. An overnight stay is normally arranged at Seoul for incoming and outgoing crew members though this depends on flight times. The journey between Bukpyung and Seoul takes about 4.5 hours. It is necessary for joining crew members to fill out a personal manifest once aboard the vessel, this is collected prior to sailing.

HOLIDAYS: See "Inchon".

Arbor Day (April 5th) is also an official holiday at Bukpyung. Work is possible during all holidays.

TELEPHONES: Available at all berths. Only local calls taken.

SHORE LEAVE: No restrictions, no curfew.

GENERAL:

Weather: Refer to Pilot Book.

During the latter part of March and April long periods of relatively calm weather were disturbed by severe Lows and Fronts causing strong on shore winds and high seas. During these periods the port remains closed for berthing vessels, though sailing is possible. Smaller ships in the anchorage generally steam offshore during these periods.

Stores: Fresh supplies and all chandlery items supplied by Sanghyup Kongsa Co. Ltd., Bukpyung (the only chandler in the area). Fresh vegetables, fruit, fish, etc., are in plentiful supply locally. Deck and engine stores also available in the area, though more selective items can be obtained from Seoul. Local supplies are reasonably priced, though meat expensive. Bonded stores are also available. Medical supplies can be obtained from Seoul as well as current BA. Charts and Admiralty publications. These again are quite expensive.

Immobilisation: Possible with Port Authority approval.

Port Regulations: Bukpyung also serves as a naval port and consequently no photography allowed. No written port regulations. Painting over the side not allowed for fear of pollution, similarly no painting allowed from the quayside.

Launch Service: A launch service is available from the anchorage and is useful for crew repatriation. It can also be used for shore leave, once vessel has been cleared, though price is unknown.

Garbage: Arranged by Agents, taken away from ship by road truck. Rubbish should be retained on board, even at the anchorage, various naval craft regularly patrol around the port area and anchorage.

Consuls/Notary: No Consular offices at Bukpyung or Mukho, it being necessary to travel to Seoul for these purposes. It is also impossible to Note Protest at Bukpyung or Mukho.

Laundry: Adequate laundry facilities exist at Mukho, again arranged by Sanghyup Kongsa Co. Ltd., a 24 hour service is available.

Cleaning Gangs: These are available and will clean hatches between cargoes. It is not possible to pump out hold residue whilst alongside. Cleaning gangs do not generally work at night so some pre-planning required if vessel to discharge and load at the same port. Work requires constant supervision. Labour for the gangs picked up off the street.

Immigration: All passports inspected: Shore passes issued for all crew members and these renewable every four or five days. No Curfew exists at Bukpyung or Mukho. It is necessary to pass through Customs Office and Immigration Office before leaving the port area. Again all Immigration Officials most helpful and friendly and eager to practise their English. Shore passes collected prior to sailing before obtaining clearance.

Air Freight: Little difficulty in obtaining spare parts, air freight etc., from other countries. Main Agents at Seoul arrange necessary customs clearance and transport.

Agency: Main Agents at Bukpyung: Chokwang Shipping Co. Ltd. They are sub-Agents for most of the main Korean Agencies. Their office is situated at Mukho. With the number of vessels entering and using Mukho and Bukpyung they are kept extremely busy, however all Agency work is eventually attended to and their services are quite satisfactory. Telex and telephone facilities exist at their office, most telexes are directed through the main Agents in Seoul, however a direct line can be obtained if necessary.

SHIPMASTER'S REPORT: November 1985.

On British Admiralty Chart No. 882 BUKPYUNG. Name seems interchangeable on signs, etc.

The anchorage off the port between 0.5 – 0.75 miles W.N.W. of the South Breakwater Light seems good but exposed to E'ly weather. A good swell was running when we anchored off and vessel did not berth for 24 hours. Contact could be made with Agents through Mukho Radio on VHF Channel 16, switching to Channel 26. Language is a problem.

Panamax bulk carriers are the largest vessels taken at the port. Max. permitted draft 12.5 m. 2 moderate powered tugs and 2 small tugs. In bad weather would advise a panamax not to berth.

The commercial port is dominated by Ssang Yong cement works which exports over 2 million tons of cement a year. The bulk berth is clear and modern. Two grab dischargers are said to work 24 hours a day. But there are many stoppages. The jetty is well fendered, good bollards at approximately 100 ft. intervals. We would suggest 4 head/stern lines, 2 breast and 2 springs each end. Extra moorings in bad weather.

Pratique: Vessel was informed before arrival that Pratique was granted. After anchoring vessel was boarded and store rooms inspected, Derat not asked for. Pratique was again granted timed and dated.

Documents: Only Register asked for. Ship had made out stores, personnel goods, narcotic and arms lists on our paper and these were accepted. Only narcotics in Master's safe being checked. Shore passes were made out (by ship). These are required and checked at gate every time. Bond not sealed.

I was unable to Note Protest either here or at Mukho. No ABS surveyor available locally. Checked with Agent before lowering and running lifeboat for normal upkeep. I was informed that it was in order. A small naval craft wanted to arrest it shortly after it was lowered into the water and so we recovered it fast. Painting over the side is allowed.

Nearest airport at Seoul. There is an express bus service (5 hours) or train (6 hours) to Seoul.

Fresh water is available by barge. Bunkers, heavy fuels, diesel, lub oils, can be supplied if several days notice is given, I understand a coaster brings same from Busan.

AUTHORITY: Donghae (Bukpyung) District Maritime and Port Authority. *Tel:* (0394) 32 3631. *Telex:* K24336 Mhdmpa.

BUSAN (Pusan): 35.07 N. 129.02 E.

DOCUMENTS:

9 Cargo Manifests.
3 Transit Cargo Manifests.
8 Crew Lists.
8 Passenger Lists.
4 Passenger Baggage Lists.
4 Mail Lists (forms supplied by Agent).
5 Parcels Lists (forms supplied by Agent).
2 Arms-Narcotics Lists.
2 Tobacco Lists.
4 Currency Lists.
4 Stores Lists.
4 Crew Personal Effects Lists.

Immigration: All Seamen's Books examined and shore passes made out. These passes to be carried at all times when ashore.

Certificates:

Derat Certificate or Exemption.
Inoculation and Vaccination Certificates for all crew members.

Shipmaster's Report: November 1988.

3 copies Transit Cargo Manifest.
8 copies Crew List (Customs).
10 copies Crew List (Immigration).
8 copies Passenger List, (if any).
2 copies Arms/Narcotic List.
2 copies Currency List.
2 copies Stores List.
2 copies Crew Personal Effects List.
2 copies Ports of Call List.

Quarantine:

1 copy Maritime Declaration of Health.
1 copy Vaccination List.

Immigration: Keep record of times of departure and returning to the ship of all crew members for handing over to Immigration.

PILOTAGE: Professional Pilot service is available at Busan and contact can be made by telephone No. 44-1651. Necessary for arriving vessel to notify Pilots of arrival 24 hours in advance. VHF unavailable. Formal address is: 15 4-Ka, Jung Yang-Dong, Jung-Ku, Busan, Korea. Blast signal from vessel used to call Pilots. Pilot boarding position Lat. 35° 04.25′ N., Long. 129° 07.17′ E.

Pilotage is compulsory and available day and night. Pilot boards off the entrance to the outer harbour. Pilot boat is white launch with pilot signals. Tugs cannot be employed unless Pilot is on board.

ANCHORAGES:

Designation	*Depth*	*Capacity*
S-anchorage	8-9 m.	4 vessels of 300-2,000 tons
E-anchorage	11-12 m.	6 vessels of 8,000-12,000 tons

RESTRICTIONS: Vessel having called at Communist ports within 3 months of contemplated entry of Busan needs to obtain permission of authorities.
MAX. SIZE: Max. size 50,000 d.w.t. LOA 330 m. Max. draft 12.5 m.
HEALTH: Pratique granted to vessels anchored in a circular quarantine anchorage located in Outer Harbour. Quarantine Inspection can be arranged by day or night if sufficient advance notice given although regular hours are sunrise to sunset. Valid Cholera Certificates required. Inoculations against typhoid and typhus may be required depending on prevalent conditions.

Quarantine Anchorages:
(a) Lat. 35° 05.14′ N., Long. 129° 07.34′ E.
(b) Lat. 35° 04.78′ N., Long. 129° 07.12′ E.

RADIO: Busan Harbour Radio Station: call sign, "6MF".
Vessels to submit ETA to Busan Port and Maritime Authority 72 hours and 24 hours before vessel's arrival, message also to include name of Owner and Agent. 3 hours before arrival vessel must communicate with Busan Port Control.
Radio-Telegraphy: Calling 500 kHz (operating throughout 24 hours), working 520 kHz, 512 kHz.
Radio-Telephony: Calling 2183.4 (operating throughout 24 hours), working 1881.4 kHz, 2320 kHz.
VHF: Busan Harbour Control, calling on Channel 16, working Channel 12, 14, 20 and 22.
RADAR: A radar station is sited in the Harbour Office to assist vessels approaching the port in poor visibility.
TUGS: Tugs join an arriving vessel immediately inside the breakwater of Busan Harbour. Ship's own lines are used. Tugs can join large vessels outside the breakwater. 11 tugs, 1,000 h.p. – 3,200 h.p.
BERTHING: Normally in daylight only.

CRANES: 80 cranes with capacity 10 tons – 100 tons. 4×20 t.p.h. cranes for scrap iron.
CONTAINER FACILITIES: 6×30.5 ton and 2×40.5 ton capacity gantry cranes at the container terminal (Nos. 5 and 6). 2×40.5 ton and 7×30.5 ton transtainers available. 354 reefer points available.
BULK HANDLING FACILITIES: Grain terminal located at Pier No. 5. Storage capacity 83,000 tonnes. 2×400 t.p.h. ship unloaders and 1×450 t.p.h. conveyor.
Coal handling facilities at Pier No. 7. 2×300 t.p.h. unloaders and 1×600 t.p.h. conveyor.
STEVEDORES: On basis using full gangs per day, the capacity is : 1,000 L/tons on general cargo.
MEDICAL: Service is available at short notice.
TANKERS: A T-head oil pier extends about 700 ft. on the S.E. side of the North Harbour. Least depth at pier head is 32 ft. Used by tankers servicing Korea Oil Corporation.
FRESH WATER: Available. Rate of water supply, 80 L/t.p.h. Supplied at pier, or by barge.
FUEL: Availability on Bunker "A", Bunker "C", LRFO, LO and diesel oil.
FIRE PRECAUTIONS: Port has separate anchorage for tankers. Port requests for compliance with regulation not to contaminate waters with inflammable substances, e.g. petroleum products. Tankers are prohibited to clean tanks in port.
CONSULS:

Consul, Republic of China	Tel: 23-3617
Consul, Japan	Tel: 43-9221

REPAIRS: All repairs can be effected.
DRY DOCKS:

GANGWAY/DECK WATCHMEN: This service is available.
OPENING/CLOSING HATCHES: Usually carried out by stevedores.
CUSTOMS ALLOWANCES: One carton cigarettes or 1 lb. of tobacco, and 1 bottle wine or spirits allowed, each man.
REPATRIATION: World wide connections are available from Busan via Seoul or Tokyo.
AIRPORT: Airport is at Kim Hey about 28 km. from Busan. Japan-bound plane takes off every 3rd day.
HOLIDAYS: 1st-3rd January; 1st March; 10th March; 5th April; 6th June; 17th July; 15th August; 3rd October; 9th October; 1st October; 24th December; Buddhist Birthday 8th April (by the Lunar Calender), Choo Sug (Thanksgiving Day), 15th August (by Lunar Calender).
POLICE/AMBULANCE/FIRE: Police, 22-0863/2497; Ambulance, Busan Quarantine Station, 44-0119/0619.
TELEPHONES: "Port Telephone Service" operates for purpose of serving communication on board-shore.
SERVICES: Adjustment of compass available.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Crew required to carry valid identification cards at all times.
DELAYS: Port congestion is experienced occasionally.
DEVELOPMENTS: An additional 3 berth container handling facility to be built. 6 container cranes will be available.
AUTHORITY: Pusan District Maritime and Port Authority, 1116-1 Jwadchun-dong, Dong-ku, Pusan, Republic of Korea. *Tel:* (051) 65-0933. *Telex:* K53377 Bdmpa.

CHINHAI (Jinhae): 35.07 N. 128.42 E.

SHIPMASTER'S REPORT: 1977.

LOCATION: Lat. 35° 09′ N., Long. 128° 40′ E. (Town); Lat. 35° 07′ N., Long. 128° 42′ E. (Pier).
DOCUMENTS:
8 Cargo Manifests.
8 Crew Lists.
4 Stores Lists.
3 Lists of Crew's Personal Effects. Tobacco/Spirits.
1 Vaccination List.
1 Health Declaration.
2 Currency Lists.
All documents are Standard Form. Although currency lists are required, there are no restrictions on importing or exporting either Korean or other currencies.
PILOTAGE: Pilotage not compulsory but recommended. Pilots are ordered through Agents and board vessel about 10 cables West of Kadok Do Island. VHF not available. No pilotage during night hours. Pilot boat is a wooden launch exhibiting International pilotage signals.
ANCHORAGE: Recommended 7 cables in Northwesterly direction off Tongdu Mal Lt. Ho. (Kadok Do.). Depth 25 m. Good anchorage in sand and mud. Quarantine anchorage is located about 1 mile N.N.W. from Chori Som Island.
HEALTH: Radio Pratique not available. Pratique granted after inspection.
RADIO: Busan Radio, call-sign "HLP".
TUGS: Required for mooring and unmooring. 2 tugs available of 600 h.p. and 1,000 h.p.
BERTHING: Chinhai is a principal naval base. Vessels drawing up to 17 ft. can be accommodated alongside inner harbour.

A buoyed channel with a depth of 36 ft. MHW leads from East of Madang So, to the only berth available for deep-sea vessels about 1.5 miles N.E. The berth, about 660 ft. in length, belongs to the Chinhai Chemical Co. and can accommodate vessels with a maximum draft of 34 ft.

Depth-sounding alongside showed at least 43 ft. 3 in. at HW. (officially 34 ft.). Distance from HW level to deck of pier 2.10 m. Bottom thick mud, and density 1025.

Vessels not exceeding 34 ft. salt water draft berth 2 hours prior HW., and discharging commences immediately.

The berth is equipped with 1 grab only, and with conveyor-belt to nearby factory. The berth is used for discharging phosphate and potash, and very few general cargoes are handled. Discharge rate for phosphate is a maximum of 8,000 tons per 24 hours, with average of 6,200 tons.

Also see "Masan" – Bulk cargo facilities.
STEVEDORES: Work is continuous throughout 24 hours including Sundays, and without meal breaks.

MEDICAL: Attention available.
FRESH WATER: Available ex-barge from Masan, minimum 200 tons at U.S.$3.00 per ton.
FUEL: Available ex-barge from Masan.
CONSULS: Nearest at Busan.
REPAIRS: Minor repairs only.
GANGWAY/DECK WATCHMEN: Available and recommended.
REPATRIATION: Possible from Busan.
CUSTOMS ALLOWANCES: No restrictions. Stores remain unsealed.

SHIPMASTER'S REPORT: February 1979.

PILOTAGE: Pilotage for the Port of Chinhae is compulsory, Pilots only available during daytime.

Pilots board in position Lat. 35° 02′ N., Long. 128° 47.5′ E. Ships waiting for a Pilot should anchor in the recommended anchorage situated North-east of the recommended track 306°/126° and extending from about 1 mile West to about 2 miles S.E. of Yon Do Island.

PROHIBITED ANCHORAGE AREA: A "Prohibited Anchorage Area" is situated between the existing prohibited area (approx. position 35° 00′ N., 128° 45′ E.) and the Western shore of the Kadok To Island.

The Northern limit of the "prohibited anchorage" area consists of a line running from position Lat. 35° 01.4′ N., Long. 128° 47.2′ E. in a 070° direction to the Western shore of Kadok To Island.

The Southern limit consists of a line running from Lat. 34° 58′ N., Long. 128° 47.3′ E. in a 061° direction to the Southernmost point of Kadok To Island.

According to the naval authorities, anchoring within the above mentioned area is prohibited because of existing submarine cables.

BUOYS: The red conical Buoy "No. 14" in position Lat. 35° 04.9′ N., Long. 128° 42.1′ E. is reported non-existent.

The red conical lightbuoy in position bearing 135° and 8.5 cables from the above mentioned Buoy No. 14 is also reported non-existent.

The black conical lightbuoy Gp. Fl(2) 6 sec. in position Lat. 35° 04′ N., Long. 128° 42.8′ E. is to be moved 4 cables in a 043° direction.

AUTHORITY: Masan District Marine Bureau.

DAESAN: 37.02 N. 126.21 E. (See Plan)

SHIPMASTER'S REPORT: October 1988.

Note: First vessel to call at Daesan S.B.M.

Pilot station for VLCCs proceeding to the SBM is located in the outer harbour of Daesan (Lat. 36° 51′ 40″ N., Long. 126° 08′ 24″ E.) in vicinity of 2 nautical miles South of Shin-do, where the Harbour Pilot boards to lead the vessel to Quarantine Station which is the same as SBM location. Location of SBM is Lat. 37° 01′ 46″ N., Long. 126° 20′ 50″ E.

The vessel arrived at the pilot boarding area on October 13th and due to strong wind and rough sea the Pilot was unable to board. The anchor was dropped 4 nautical miles S.W. of Entrance Buoy No. 1 in a depth of 37 m., with good holding ground.

The Pilot boarded the next morning and the ship entered the buoyed channel approaching the SBM. At Buoy No. 3 in the channel the ship had to turn around due to obstructions by a large number of protesting fishing boats. They suddenly came from everywhere and the vessel was not able to navigate through a fleet of obstructing fishing boats. The Pilot disembarked from the ship and the anchor was dropped at the same position as on arrival.

The Pilot boarded the ship the next morning and commenced approaching the SBM. When the vessel passed Buoy No. 1 a large number of fishing boats sailed from the shore and headed towards the vessel and within a short time stopped in front of the vessel very close to the bow. The vessel's engine was now on full astern in order to have her dead in the water. One man was on lookout forward as we were not able to see the fishing boats close to the bow from the bridge. The Pilot advised me that an attempt to sail through the protesting fleet of fishing boats would have caused a serious and dangerous situation. Luckily they obstructed the vessel where the buoyed channel was wide and deep enough to turn around by her own power so again the vessel turned around, dropped off the Pilot and anchored 4 nautical miles S.W. of Buoy No. 1

October 16th was a Sunday and the Agent informed me that no berthing was possible on holidays and Sundays. He also informed the Agent to make sure the fairway was clear prior to lifting anchor and shifting to the SBM.

The Pilot boarded the vessel again on the morning of 17th October after receiving confirmation from the Agent that the fairway was clear. The vessel commenced shifting to the SBM and, this morning the buoyed fairway was clear.

En route to the SBM the vessel passed in the middle of the channel from Entrance Buoy No. 1 to the SBM. Navigational aids, lighted buoys, are located both sides of the channel.

After passing Kainso Lighthouse on the starboard side, the SBM can be seen 2 nautical miles ahead of the vessel.

Apart from the fishing boats, there are many fishing nets in the channel and close attention is needed to avoid fowling the propeller. The fishing nets are normally attached to white ball-shaped floating buoys. The current in this area may have a speed of up to 5 knots, depending on tidal flows.

Berthing at the SBM will take place from one to two hours before low water and approaching the buoy only from the West in a North Easterly direction. Distance from pilot boarding area to the SBM is 15 nautical miles.

As the SBM at Daesan is new, the Pilots had no experience in berthing in this area and no experience in SBM berthing.

The berthing, assisted by 2 large tugs, took longer than usual for SBM berthing, but without any difficulties.

There is only one mooring hawser from the SBM and the chafing chain was too short to reach the chain bow stopper so bollard strops and bow shackles were used as an alternative to secure the chafing chain. Two additional mooring ropes from the ship were connected to the SBM as one mooring hawser ws not considered to be safe due to a very strong current. I was told that a second mooring hawser and longer chafing chains will be fitted to the SBM in future. During mooring the Pilot was on the bridge and the Loading Master forward, to inform the Pilot and supervise the mooring.

Connecting of 2 × 16 in. floating hoses was carried out by shore workers. The hoses were connected to the ship's manifold by Camlock quick release system.

Whilst moored to the SBM one tug was on stand-by aft with a tug's line connected to the vessel. I believe the tug is necessary so as to keep the vessel clear of the SBM during the change of tide.

Maximum discharge rate was 6,000 tonnes p.h., but will later be increased to 8,000 tonnes p.h. Upon completion of discharge, the shore hoses were flushed with sea water for 30 minutes.

The vessel unberthed without using tugs. The vessel commenced outward passage and the Pilot disembarked between Buoy No. 1 and Buoy No. 3.

At present there is no possibility for supply of food, fresh water, spare parts, etc. at this port.

The SBM is operated by Kukdong Oil Co. Ltd., Daesan Refinery.

General information on the crude terminal (SBM).

The diameter of SBM is 10 m.
Maximum size of crude carrier is 250,000 d.w.t.
Minimum size of crude carrier is 30,000 d.w.t.
Depth (MLLW) is 30 m.
Bottom nature: Clay, sand with boulders.
Korean Charts HO No. 306, 307 and 353 cover the area from Buoy No. 1 to the SBM.

Information required by Daesan port prior arrival: ETA message to be sent at least 72 hours prior to arrival via Agent.

Quarantine Doctors boarded the vessel on completion of mooring and after inspection of the vessel, and gave Port Clearance for Customs and Immigration.

From the SBM to shore, to the Refinery, takes about 40 minutes by service boat. There is no housing in this part of the country apart from the Refinery and its related offices.

During normal conditions this new oil terminal is considered to be easy to approach and the weather is usually clear and fine.

As this was the first ship calling at this new port every operation took longer than usual, but I believe this is quite normal. The mooring, discharging and unmooring went on without any difficulties and with excellent co-operation between ship and shore.

SHIPMASTER'S REPORT: April 1989.

LOCATION: Daesan is about 20 miles due South of Inchon pilot boarding area.

SBM: Position: Lat. 37° 1.8′ N. Long. 126° 20.8′ E. Light: Fl. (3) Y 7 sec. Horn 30 sec.

VESSEL: 155,000 d.w.t.

DOCUMENTS:
2 copies Crew Effects List.
2 copies Bonded Stores List.
2 copies Stores List.
8 copies Crew List.
1 copy Maritime Declaration of Health.
1 copy Vaccination List.
2 copies Narcotics List.
2 copies Arms and Ammunition List.

PILOTAGE: Pilot boards VLCCs proceeding to the SBM 2 miles South of Sin Do or in position Lat. 36° 51.4′ N., Long. 126° 8.24′ E.

RESTRICTIONS: There are no restrictions. Depths not less than 30 m. at chart datum.

VHF: Pilot calls at Channel 16, working on Channel 12.

BERTHING: Pilot boards about 2 hours before slack water at Uno Do in order to be at the SBM just after the tide has turned.

Vessel secures to buoy (SBM) with the aid of 2 tugs, one on each bow, using tugs lines. Vessel picks up mooring and secures to SBM with its chain on vessel's AKD Stopper.

When vessel is fast, one tug using tug's line makes fast aft and remains there until sailing time.

CARGO OPERATIONS: *Hoses:* 2 × 16 in. on port side.
Discharging Rate: Max. rate 50,000 bbls/hr.

REPATRIATION: No difficulties encountered. Seoul Airport is 4.5 hours by car.

GENERAL: *Chart:* B.A. Chart No. 1270.
Accommodation: Required for Mooring/Loading Master, Agent and Customs. If possible a rest room should be provided for up to 6 mooring personnel.

SHIPMASTER'S REPORT: March 1990.

Position: 37° 01.5′ N., 126° 24.5′ E.
Location: 30 miles South of Inchon.
Berth: Product Berth.

The port is under the jurisdiction of the port of Kunsan (Gunsan), some 60 miles further South.

Daesan is a newly developed industrial area, with amongst others an oil refinery. The refinery is operated by Kukdong Oil Company Ltd. The import to the refinery is served by a SBM, which can accommodate the largest ships. About 30 ships call at the SBM each year, and the oil imports total about 40 million barrels per annum. All exports from the refinery are shipped through the jetty facilities. Water depths near the buoy and in the approaches are not less than 30 m.

Export of oil products is from a large jetty with 3 berths which can accommodate ships with a maximum length of 200 m. The jetty is a steel construction on steel pylons with concrete dolphins. The jetty runs in a 110° – 290° direction. A large catwalk connects the jetty with a 20 m. wide causeway. Each of the dolphins is fitted with 2 hydraulically operated steel quick release hooks and rope handling capstans. Steel wires are not permitted for mooring, due to the large tidal range which makes their handling almost impossible. All lines are handled by heaving lines and messengers. The least depth alongside is said to be 11.0 m.

During the approach and mooring, the vessel is assisted by 2 powerful tugs of the typical Japanese design. Both are identical 4,200 b.h.p. tugs, fitted with dual Schottel propulsion. Tugs lines are used from their bow with the 10 in. braided nylon ropes stowed onto the fore deck winch.

During the time the vessel is alongside, one of the tugs will remain alongside to cope with eventualities, caused by the large tidal range and strong tide of up to 4 knots.

The two dolphins on either side of the centre of each berth are fitted with 2 heavy wood lined fender boards, which extend from the dolphin tops to a few metres below water level.

Mooring is done with a fairly regular layout of 2 head/stern lines, 2 breast lines and 2 springs each end.

Vessels will dock heading into the tide, which means starboard side to on ebb and portside to on flood tide.

Berthing and unberthing is done during daylight only. Berth No. 4 is fitted with an approach control system with large digital readout, indicating separate values for bow and stern. The system however on this occasion was not used. No explanation was given whether it was operational or not. The larger ships use Berth No. 4. The maximum size handled so far is 35,000 d.w.t.

Each berth is fitted with 2×12 in. Chicksans. One is used for black product and ballast, the other for clean products. No confirmation could be obtained that shore lines were fitted with non-return valves, which could adversely affect clean product ships discharging ballast.

Products available are: Fuel Oils A, B and C, Gasoil, Kerosene, Unleaded, Premium and Regular Motor Gasolines, Naphtha, Solvent (TN), DF 1, JP4 and Jet A1. Loading rates are said to be 1,200 cu.m./hr. maximum.

Heavy Fuel Oils and fresh water are also available from the jetty. No information is available as to the grades of Heavy Fuel Oil and the rates, quality or price of fresh water.

Dirty ballast reception facility of 60,000 cu.m. All cargo ballast must be discharged to shore facility. Maximum back pressure allowed is 1.5 bar. Rates should be around 400 cu.m./hr., but only 225 cu.m./hr. was achieved. Segregated ballast may be discharged to sea after permission is granted by Loading Master. A document prepared by shore is to be signed, stating the amount of ballast water or slops that was actually pumped ashore.

There is no easy means of access to the shore. Use of ship's gangway is not recommended, due to the large tidal range and a shore gangway is not available. In way of the centre manifold, however, there is a steel stairway leading to the water level, which is used by all shore officials and personnel. We did not object to this situation, also because no permission is granted for shore leave. Even jetty access is denied by the police.

The port lies in the Southern part of the delta where also the port of Inchon is situated.

The port as such is not indicated on the chart, but crude indication of the existence of a jetty is given on B.A. Chart No. 1270, Approaches to Inchon.

Initial approach is made using B.A. Chart No. 1258, Kyongnyolbi Yolto to Taechong Gundo.

Both B.A. Charts, although not part of the standard chart index, are absolutely required for a safe access to the port, and had to be supplied from the Japanese Admiralty Agent.

The approach channel is fairly wide and well marked with red and green light buoys of medium size. The paint is of the fluorescent type, which makes the buoys stand out even in the slight haze which was encountered. The lights on the buoys are not very strong and only switch on very late after sunset. Especially the channel entrance when lining up for the entry on a course of 039° must be given ample attention, as the tide sets in and out in a direction roughly parallel to the track, with maximum rates of about 5 knots.

Anchorage was obtained about 1 mile West of Kain So in a depth of 35 m. Vessel was brought up while heading into tidal stream of about 3 knots using 6 lengths of cable. Generally it can be said that ships will swing on their chains in a counter-clockwise direction with the turning of the tide. We experienced sudden quick veers halfway through the tides, but there was never any stress on the cable. The pilots claim that the tidal streams in this part of the channel never exceed 4 knots, which is confirmed by the information on B.A. Chart No. 1270.

Tides and currents all refer to Inchon (Standard Port). Generally HW and LW differences are +00.10 from Inchon. Off the jetty the tidal stream follows the direction of the channel with rates up to 3.5 knots, but there seem to be unpredictable sudden sets across.

Directions: B.A. Chart No. 1258, Kyongnyolbi Yolto to Taechong Gundo; and Korean Chart No. 306, An Do to Inchon Hang.

When approaching from the South, shape course to pass about 3 miles West of Ong Do Lt. (Racon Z), and about 3 miles East of Kadae Am Lt. (Racon X). Thence proceed to pass between the red and green buoys, marking the entrance of the channel just South of Sin Do, and about 5 miles South of An Do Lt. Once past the buoys steer 039° through the centre of the channel until passing Buoys No. 5 and No. 6, when course should be altered to 053°, proceeding up to a position between Buoy No. 7 and Kain So Lt., where the recommended anchorage is located.

As the tidal stream runs roughly parallel to the channel, only minor adjustments to ship's heading are necessary to allow for set.

From the anchorage steer 058° to pass between the SBM and Buoy No. 10. Thence continue on 070° and steer for the green Buoy No. 13. Speed should be reduced to about 3 knots. By this time tugs should have been engaged and ready for assisting. Thence alter course to starboard and steer around Buoy No. 12 until vessel is on a S.E.'ly course, and proceed slowly through the channel until off the jetty.

This channel has a least depth of 10.4 m., and is also used for anchorage by smaller vessels awaiting berth.

The two tugs will then assist in easing the vessel gently alongside.

The pilot vessel, which is a regular work boat, is fitted with VHF but the range is very small. Pilot communicates with tugs and pilot boat with handheld VHF radio. All communications were by telex via agents. The terminal is also equipped with VHF. Call "Kukdong Terminal" on Channel 12.

Documents required:
5 Crew Lists.
3 Stores Lists.
3 Crew Personal Effects Lists.
1 Narcotics List.
1 Ports of Call List for last 90 days.
1 Arms and Ammunition List.
1 Vaccination List.
1 Passenger List.
1 Maritime Declaration of Health (Korean Form).

Vessel will be attended by Agents, Customs, Police and Quarantine Officers. All documents may be prepared on plain ships stationery.

Agents will try to help translate queries by other officers, who did not speak or understand English. All Seamen's Books will be checked against Crew List, and even minor differences in spelling are noticed and to be corrected, although differences between Seamen's Book and Passport entries are accepted. There is a minor sanitary inspection carried out by the Quarantine Officer, who specifically wants to inspect vegetable rooms. He will then make out a Korean version of the familiar Japanese Sanitary Certificate, where all quantities of the entries must be recorded. They are however not checked. Customs Officer will seal the bonded store, and will check the ship's narcotics. A Korean Health Form was presented and made out without any problem, and subsequently Free Pratique was granted as per special form.

Agents claim that Daesan is an "open port", and consequently no shore leave can be granted. The nearest village seems to be 40 minutes drive away and the larger cities of Gunsan and Seoul, 2.5 hours and 4.5 hours drive respectively.

Only very limited quantities of vegetables and fruits are available from the local or nearby markets. Only cash payment is accepted, either Korean Won or US Dollars (US $ 1.0 = 680 Won). Quality of provisions was found to be excellent but prices rather high, because local market caters mainly for seasonal crops.

Problems: One of the major problems is that communication is very difficult. Only the agents had a minor working knowledge of English. Refinery and jetty personnel do not speak one single word of English, which proves particularly dangerous while handling cargo or in an emergency. For reasons of safety, we kept a seaman on standby at the shore manifold to assist in conveying messages, and if need be to close the Chicksan valve during topping up. Suppliers personnel were very reluctant to sign letters of protest, mainly because nobody wants to accept any responsibility, and agents had to try to translate most of the wording before all were signed for receipt.

REPORT: October 1991.

Terminal: Samsung Terminal.
Position: Lat. 37° 00′ 15″ N., Long. 126° 20′ 40″ E.
Pilot Stations: Shindo Pilot Staton (not compulsory):
Lat. 36° 51′ 40″ N., Long. 126° 08′ 24″ E.
Gainseo Pilot Station (same as Quarantine Station):
Lat. 37° 00′ N., Long. 126° 18′ E.

Details of Samsung Jetty:

Jetty	*Length* (m.)	*LOA* (m.)	*Depth* (m.)	*Deadweight* tonnes
A	120	350	18.0	10,000 – 200,000
B	83	180	12.0	1,000 – 10,000
C	83	180	12.0	500 – 10,000

Products:

*Product**	*Jetty*	*Loading Arm* (in.)	*Rate* (t.p.h.)	*Remarks*
Naphtha/gas oil unloading arm	A	2 ×16	3,000	
LP Ethylene	C	1 × 6	450	Piggy back vapour return arm
Propylene	B/C	1 × 8	450	
Butadiene	B/C	2 × 8	400	
C4	A/B/C	2 × 8	40	
Benzene	C	2 × 8	450	
Meg	B	2 × 8	350	
Porolyss gasoline/ Naphtha	B	1 × 8	450	
Bunker C unloading arm	C	1 × 8	660	
SM/KB	A/B/C	3 × 8	500	

* Unloading arm unless otherwise stated.

SHIPMASTER'S REPORT: April 1992.

DOCUMENTS:

Clearance from last port of call.
6 copies Crew List.
3 copies Personal Effects List.
3 copies Stores List.
1 copy Narcotics List.
1 copy Passenger List.
1 copy No Arms and Ammunition List.

Note: Agent requires a new Crew List and Personal Effects List before departure, if new crew members have joined the vessel, stating names and personal effects of new crew members.

PILOTAGE: Pilot does not board for anchoring. Pilot boards for berthing and unberthing only. Pilot boards at the anchorage, after Free Pratique is granted. Pilot arrives with tug. Pilot launch also available.

APPROACHES: The approach channel to Daesan is narrow, however it is well marked by buoys and lights. We navigated in the approach channel during darkness only. Good radar identification from buoys, small islands (rocks) and adjacent coastline. Racons are present (refer to charts). There is plenty water in the buoyed channel (over 30 m.).

ANCHORAGE: Agent advised vessel by telex to anchor in position Lat. 37° 01′ N., Long. 126° 20′ E. (approx. 1 mile West of SBM and 1 mile of Samsung Terminal), in good holding ground.

HEALTH: Radio Free Pratique is not granted, if vessel not in possession of Korean Sanitary Certificate.

Quarantine Officer and Agent board at the anchorage. No difficulties with documentation. No checks or inspections were made.

BERTHING: *Samsung Terminal (Alpha):* Depth 18.0 m.

Two powerful tugs assisted (tug's lines). Approach control system, indicating separate values for bow and stern, operative.

Moorings: First 2 lines are springs by heaving lines.

Only one mooring boat available. It starts forward and afterwards moves aft to complete mooring.

Total lines: 3 lines, 3 breast lines and 2 springs at each end. Attention to be paid to position of ship's gangway due to change in height of tide.

Discharging (Naphtha): Chicksan arms, 16 in. connections (hydraulic clamps). Permitted back-pressure 9 bar. Max. rate 6,000 cu.m./hr. Length and diameter shoreline: 1.5 km. × 30 in. Labour available on jetty. Communication by means of ship's handy-talky.

Disconnecting and Unberthing: Disconnecting after discharge is possible on the falling tide, due to ship's freeboard.

Unberthing after sunset is possible, and took place approximately 1.5 hours before low water at Inchon, with assistance of 2 tugs.

Pilot disembarks off the jetty, when tugs are dismissed.

SHORE LEAVE: Only if arranged via Agent. There is no transport organised by the Terminal and walking is prohibited.

GENERAL: *Customs and Immigration:* Board after vessel is alongside. Clearing is simple. Certificates were not checked. Bonded store was sealed by Customs.

Charts: B.A. Charts No. 1270, 913 and 1258.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Cargo tank slops can be discharged by mixing with cargo. No other facilities available.

SEAMAN'S CLUBS: None.

CURRENCY: Korean Won. U.S.$ 1.00 = 729 Won (May 1991).

AUTHORITY: Kukdong Oil Company Ltd., Daesan Refinery, 640-6, Daejook-ri, Daesan-myun, Seosan-gun, Chungchongnam-do, Korea. *Tel:* 0455-605379. *Telex:* K45566. *FAX:* 0455-605118. *Contact:* Capt. B.W.Won, Mooring Master.

Head Office: 223, Naeja-dong, Chongno-gu, Seoul, Korea. *Tel:* (02) 735-6300. *FAX:* (02) 733-5481.

DAIPORI (Daepo): 38.10 N. 128.36 E.

Vessels bound for Daipori to load iron ore must first call at Mukho for quarantine and customs clearance.

Pilotage from Mukho to Daipori, distance of 50 miles, is not compulsory, but recommended.

INCHON: 37.28 N. 126.37 E. (See Plan)

DOCUMENTS:

Arrival:

- 8 Crew Lists.
- 4 Cargo Manifests.
- 4 Stores Lists (Bond and shop).
- 4 Crew Customs Declaration.
- 4 Narcotics List.
- 4 Arms and Ammunitions List.
- 4 Ports of Call Lists (last 90 days).
- 1 Vaccination List.
- 2 Money Lists.
- 4 Passenger Lists (Marked "Nil").
- Derat Certificate or exemption.

All the above lists are typed on ship's plain paper.

Coasting on Korean Coast: At each port after the first, one requires the same papers but only 2 copies of each, with the exception of the Crew List, of which 5 copies are required.

Vessels with hazardous cargo must complete application to carry hazardous cargo and an application for anchorage of hazardous cargo vessel.

PILOTAGE: There are 2 Pilot stations for entering Inchon (Tel: 883-8111/4):

Ando: At the Ando Light 38 miles off Inchon, position Lat. 37° 03.9′ N., Long. 126° 16.5′ E. (good weather) and Lat. 37° 06.95′ N., Long. 126° 19.6′ E. (bad weather) located in entrance to channel approaching Inchon from the Yellow Sea. 48 hours advance notice to Agent required for vessels requesting to meet Pilot at Ando, customary boarding point for deep-draft vessels.

Palmido: Pilotage from Palmido to Inchon or Inchon to Palmido is compulsory. This pilot station is at Palmido Island and Light, 8 miles off Inchon, position Lat. 37° 21′ N., Long. 126° 31′ E.

ANCHORAGE: Anchorage is divided into 5 large areas according to cargoes of the vessels.

A 1 – 5 (Logs, pulp)
B 1 – 6 (Ships waiting for entry to the inner harbour)
B 7 – 10 (Oil tankers and ships unloading scrap. Coal)
C 1 – 8 (Small tankers, LPG ships)
D 1 – 3 (Logs)
E 1 – 5 (Ships waiting for entry to the inner harbour)

RESTRICTIONS: A peculiarity of Inchon Port is the wide tidal range, i.e. max. 30 ft. difference between the low and high tides. Because of the extreme tidal range in Inchon Harbour and the strong tidal currents which result, the importance of maintaining strict surveillance of the vessel's mooring lines is emphasised. In this regard, the ship's officers and crew must be diligent in the performance of their duties. All vessels to discharge or load commercial cargoes should invariably obtain prior permission for berthing/anchoring from the Inchon District Maritime and Port Authority at least 24 hours before arrival, then proceed to a nominated anchorage in the stream under direction of a compulsory Pilot.

Lock Particulars:

	For 50,000 d.w.t. Vessels	*For 10,000 d.w.t. Vessels*
Lock Chamber	1 base	1 base
Total length	381.0 m.	288.25 m.
Usable length to		
Inner gate	280.0 m.	183.00 m.
Outer gate	310.0 m.	208.00 m.
Width	36.0 m.	22.50 m.
Height	18.5 m. from sill	18.50 m. from sill
Height	19.0 m. from bottom	19.00 m. from bottom
Number of gates	3 sets	3 sets
Length of gates	38.0 m.	24.50 m.
Width of gates	8.3 m.	6.40 m.
Height of gate	18.5 m.	18.50 m.
Weight per gate	1,050 tons	590 tons
Time required for opening-closing	5 minutes	3 minutes

MAX. SIZE: Max. size 50,000 d.w.t. Max. LOA 302 m. Max. draft 13.0 m.

HEALTH: The Quarantine Anchorage is located outside the harbour in position Lat. 37° 22′ 37″ N., Long. 126° 32′ 06″ E. A vessel which sailed from an "Affected Zone" and not passed 10 days thereafter is compelled to receive 24 hours quarantine before entering the discharging anchorage. Quarantine is available only for the period from sunrise to sunset.

RADIO: Inchon Radio.

	Frequency	
Call Sign	*Calling*	*Working*
6 MF3	MF 500 kHz	MF 512 kHz 520 kHz
or		
Inchon Harbour Control	VHF Channel 16	VHF Channel 12 Channel 14 Channel 20 Channel 22

TUGS: There are 17 tugs (1,000 h.p. – 3,200 h.p.). 2 – 3 tugs are required for each vessel.

All tugs are operated by private companies.

CRANES: 4 Gantry Cranes (35 ton class), 4 Transtainers (30 ton class), 3 Floating cranes (20 ton – 100 ton class), 101 land-based cranes (10 ton – 100 ton class).

BULK CARGO FACILITIES: No. 7 Pier is exclusively used for grain (Rate 800 t.p.h.) by 2 silo operators. Handling capacity is 4 million tons per year and storage capacity is 326,000 tons.

Taihan Bulk Terminal: Accommodates 2×50,000 d.w.t. vessels at dolphins. 2×700 t.p.h. pneumatic suction elevators at each berth. Storage capacity 138,000 tonnes.

BERTHING:

Pier No.	*Berth No.*	*Total Length (m.)*	*Depth (m.)*	*Capacity (d.w.t.)*	*Remarks*
1	11-13	964	8.0	4,500	Dry Cargo
	14-17		7.5	2,000	Dry Cargo
2	21-22	1,442	12.0	20,000	Dry/
	23		12.0	30,000	Bulk Cargo

	42		14.0	30,000	Terminal
	43		14.5	50,000	and Bulk
	44		14.5	30,000	
	45		14.5	50,000	
5	51-52	604	14.0	50,000	Dry/Bulk Cargo
6	Under Development				
7	71-72	604	14.5	50,000	Grain
	73-74		14.5	50,000	Terminal
8	81-83		13.0	50,000	Scrap/Bulk

SPECIALISED CARGO HANDLING FACILITIES: No. 4 Pier (Berth Nos. 41-43 – (3 berths) – 625 m.; Berth No. 44 – 225 m. and Berth No. 45 – 310 m.) is used exclusively for containers. It has 2 container yards which are capable of storing 15,457 TEU. Ro-Ro ramp available.

STEVEDORES: There are 16 stevedoring companies with 105 fork-lifts and 17 cranes. Annual cargo handling capacity is 11,625,000 tonnes.
MEDICAL: Launch is provided in emergency call to evacuate sick men. Modernised hospital is available.
TANKERS: There are six private companies handling oil, LPG and liquids. Maximum quantity of LPG loaded in a single operation is 1,500 tons.
Kyung In Energy Co. Terminal:
Designed for 50,000 d.w.t. over 50 ft. depth at LW. The marine terminal is situated at Lat. 37° 30′ 12″ N., Long. 126° 36′ 19″ E. The face of the dolphin fendering system is on a bearing of approximately 347° true.

The vessel will be berthed alongside the main and secondary berthing dolphins with the vessel's hull against the fenders, which are an integral part of the dolphins. All the dolphins are equipped with electric capstans and quick-release mooring hooks. A navigation light and fog horn is located on the Southern Exterior Mooring Dolphin (Exterior Mooring Dolphin No. 1). A navigation light is also located on Exterior Mooring Dolphin No. 2 on the N. side of the terminal facilities. When a vessel of the 50,000 d.w.t. class is moored to the terminal, the bow and stern lines will perform the function of the breast lines. Therefore, the spring lines must be led out through the chocks on board which will provide sufficient leads ahead and astern to restrict the movement of the vessel along the face of the dolphins. In this regard, due consideration must be given to the rise and fall of the tide.

Loading Arms: There are 3 "Continental-Emsco" loading arms situated on the loading platform. The one to the extreme North and the middle one of the three are for the discharge of crude oil. Both are fitted with 16 in. swivel connections having 150 pound flanges. The loading arm to the extreme South is for the loading of naphtha and is fitted with a 12 in. 150 pound flange. The loading arms are designed for a working pressure of 100 p.s.i.

During the connecting and disconnecting of the loading arms to the vessel, the loading arms will be manipulated and positioned by shore personnel. During the period of time when the loading arms are connected to the vessel's manifold, they will be in the "float" position and will be self-adjusting.

General Information:

Under no circumstances should any member of the ship's crew activate or operate the controls for the loading arms. Authorised shore personnel will perform this function.

The "Continental-Emsco" loading arms will tolerate only a minimum amount of transverse movement by the vessel in either direction. In other words, the movement of the vessel along the face of the dolphins is restricted. For this reason, it is mandatory that the vessel be kept in position, and that the mooring lines be properly tended. It is the responsibility of the vessel to maintain sufficient deck crew on duty to properly tend the mooring lines, and to ensure that the vessel maintains proper position relative to the loading arms.

Discharging Crude Oil:

The distance from the loading platform to the tanks is approximately 2.2 km. (1.4 miles). A 30 in. block valve is situated near the location where the trestle joins the island causeway. Block valves are also installed in the pipe-line system near the inlet to each of the crude oil storage tanks.

There are three crude oil storage tanks on Yul Do Island. Each has a capacity of 200,000 barrels. The tanks are 48 ft. in height with an overflow at 46 ft. There are no check valves in the crude oil pipe-line system. Thus, the vessel must take precautions against back-filling due to head pressure on the system.

It may be necessary to discontinue the discharge of crude oil when changing from one tank to another ashore. The vessel will be given adequate notice for the stoppage of the ship's cargo pumps.

Ballast:

It is unlawful to discharge dirty or oily ballast water into the waters of Inchon Harbour. Severe penalties may be invoked against the vessel by the Republic of Korea in the event of pollution of harbour waters.

The centre loading arm provides a dual function. It is used for discharging ballast from the vessel as well as for the discharge of crude. The ballast flows through a 12 in. pipe-line to the ballast storage tank on Yul Do Island. This tank has a capacity of 30,000 barrels, and is situated about 1.1 km. (0.68 miles) from the loading platform.

Loading Naphtha:

Naphtha is stored in two mainland storage tanks each of which has a capacity of 125,000 barrels. Three pumps provide the flow for shipping naphtha. Each pump has a capacity of 1,600 g.p.m. The pumps are on independent circuits. Thus, the loading rate of the naphtha can be governed by the number of pumps used.

The pipe-line from the pumps to the loading platform is 18 in. and is reduced to 12 in. on the loading platform. A block valve is located in the 18 in. pipe-line near the point where the island causeway joins the trestle. Another block valve is provided in the 12 in. pipe-line on the loading platform.

The pumps which are used for shipping naphtha can be stopped from the Marine Terminal Loading Platform, but they must be started from the mainland. Under normal conditions the vessel's deck officer on watch should give the terminal personnel 10 minutes notice prior to requesting that the loading rate be reduced, and the same notification prior to the completion of loading. As previously stated, the pumps can be stopped from the loading platform in case of an emergency.

The approximate distance from the mainland naphtha storage tanks to the loading platform is 5.4 km. (3.35 miles).

Regulations:

1. Sufficient number of crew members are to be on duty at all times to properly tend the mooring lines and ensure that the position of the vessel is maintained alongside of the dolphins.
2. Except in the case of an emergency, the deck officer on duty shall give the terminal personnel at least 10 minutes notice prior to changing the loading rate of the naphtha, and at least 10 minutes notice prior to the completion of loading cargo.
3. Under no circumstances is the vessel's main propulsion engine to be disabled, or are any repairs to be undertaken while the vessel is moored to the marine terminal.
4. The vessel's fire-fighting equipment is to be kept ready for immediate use. A sufficient number of hoses shall be led out forward and aft to provide full deck coverage.
5. Lights must be provided by the vessel to illuminate the water area in the vicinity of the bow, stern and off-shore side.
6. Smoking will be permitted in such *Interior* spaces as may be designated by the vessel's Master. However, smoking will not be permitted on any open deck areas.
7. The loading of ship's stores and supplies will not be permitted during the time ballast is being discharged, or naphtha is being received by the vessel.
8. Ullage hole screens are to be used at all times while bulk oil transfer operations are in progress.
9. Galley ranges, unless electric, are not to be used while the vessel is loading naphtha.
10. Except for the period of time actually required for passengers to embark or disembark from a launch, no boats, launches or vessels will be permitted to moor alongside a vessel which is berthed at the marine terminal.
11. Safety practices which are common to marine terminals on a world-wide basis will apply.

Honam Buoys: Lat. 37° 29′ 00″ N., Long. 126° 36′ 03″ E., draft acceptable 30 ft., at East side of A–3 anchorage. This berth is the private facility of the Honam Oil Refinery Co. (joint company with Caltex) for discharge of their own petroleum products. Consisting of 4 mooring Buoys and sub-marine pipe-lines.

Union Oil Terminal, 42 ft. depth alongside. Berthing/unberthing in daytime slack water only.

Also see "Daesan".
DENSITY: Varies between 1022 and 1024.
FRESH WATER: Can be supplied by lighter, max. quantity 500 tons.
FUEL: Available by barge only.
CONSULS: None locally. Many Consuls and Embassies in Seoul, 50 minutes by train from Inchon.
REPAIRS: Deck and engine repairs possible by Inchon Shipbuilding Company.
GANGWAY/DECK WATCHMEN: Ship security guard service is supplied by 2 companies.
OPENING/CLOSING HATCHES: Normally carried out by stevedores.
CUSTOMS ALLOWANCES: One carton cigarettes or 1 lb. of tobacco, and 1 bottle wine allowed, each man.
REPATRIATION: Facilities for crew changes or repatriation.
AIRPORT: Regular flights worldwide from new international airport.
HOLIDAYS: January 1st (New Year's Day); February 20th (Folklore Day, first day of first lunar month); March 1st (Independence Movement Day); April 5th (Arbor Day); May 5th (Children's Day); Buddha's Birthday (8th day of fourth lunar month); June 6th (Memorial Day); July 17th (Constitution Day); August 15th (Liberation Day); September (Thanksgiving Day, 15th day of eighth lunar month); October 1st (Armed Forces Day); October 3rd (National Foundation Day); October 9th (Korean Alphabet Day); December 25th (Christmas Day).
POLICE/FIRE/AMBULANCE: Police (883) 0011, Fire (882) 4069, Ambulance (73) 9000 (Inchon City Hospital).
TELEPHONES: Portable communication facility is available.
SHORE LEAVE: Launch service provided by 3 private companies.
IDENTIFICATION CARDS: Crew required to carry valid identification cards at all times.
ACCOMMODATION LADDER: Essential for Port Officials on entry. Also for tanker berth no access allowed through plant. Rig on port side.
DELAYS: Can be caused by bad weather.
GENERAL: Tide condition is critical, swift currents (high tide: 9 m. to 10 m.) special attention is required.
DEVELOPMENTS: Coal Terminal to be built in the outer harbour to accommodate vessels up to 100,000 d.w.t. Length of berth 240 m., depth 16 m.

SHIPMASTER'S REPORT: 1974.
Approaches: Inchon, the port for Seoul, the capital of South Korea, is situated in Lat. 37° 28′ 20″ N., Long. 126° 37′ 09″ E., and is approached from the South through the Yellow Sea. From Kyoknyolbi Do (Clifford Is.) LH. a course should be set to pass 1 mile North of An Do LH., in the vicinity of which the pilot boat will be waiting. Pilotage is not compulsory from this point but is recommended and the Pilot should be ordered at least 48 hours before arrival through the Agent, in Inchon.

From An Do, vessels proceed via the Dong Soodo (East Channel) which is very winding and narrow in places. All lighthouses now show lights in accordance with B.A. Charts and Publications (1984).

Pilotage is about 38 miles to the Inchon Anchorage for deep-sea vessels, about 3 hours steaming. The Pilot was good even in thick fog, and all Pilots seem to speak reasonable English. The pilot launch is fitted with VHF.

The anchorage is extensive, with room for about 30 ocean-going vessels, holding ground is good and no trouble was experienced in currents of 5 knots, although even stronger currents are experienced at Spring tides.

The Port: Can be divided into three sections according to location and function; the Inner Dock, Outer Harbour and Northern shoreline.

The Inner Harbour basin is presently operated for the accommodation of cargo ships up to 50,000 d.w.t. The Outer Harbour, of new construction, is largely for coastal and fishing vessels of less than 500 tons, and is located just outside and to the S.W. of the Inner Basin.

The Northern shoreline, North of the closed basin has unloading facilities at many private plants. These are lighter berths.

With the completion, in May 1974, of the new lock system and second tidal basin, the berthing facilities in the port have changed the cargo handling capacity from 1,420,000 tons to 6,270,000 tons per year by providing 3,820 m. length of quay and container berths.

Within the Inner Harbour is the first tidal basin (the older lock system dating from 1923). This basin is accessible through the new lock system. *Equipment in Use* (August 1974): Tugs, 2 of 2,000 h.p.; 3 of 3,600 h.p.; Floating cranes, 1 of 75 tons capacity; 1 of 30 tons capacity; Container crane, 1 of 30 tons capacity.

Bulk Grain (1984): Pier No. 7: Jetty berths Nos. 71 – 72: 2 discharge towers, 1 conveyor belt, 1 ship at a time can be handled, capacity 800 t.p.h.

Pier No. 7: Jetty berths Nos. 73 – 74: 2 discharge towers (Simporters), 1 conveyor belt, 1 ship at a time, capacity 22,000 tons per day.

However, due to congestion of cargo in the elevators the maximum capacity on both jetties is reduced to 6,000 – 8,000 tons per day each. *Additional Equipment Planned:* Tug boats, 4 of 7,000 h.p. Floating cranes, 1 of 100 tons capacity; 1 of 70 tons capacity. Container cranes, 4 of 35 tons capacity.

Further expansion is planned for the Northern side of the inner harbour. When completed there will be an additional 800 m. of quay at Pier 6 and 780 m. at Pier 8. This will add a total of 10 new berths for vessels from 5,000 to 50,000 d.w.t.

The Port of Inchon is administrated, managed and operated by the Government, represented by the Inchon District Marine Bureau (IDMB) in the Ministry of Transportation.

Decisions on administration and operation of the port, particularly to daily activities, are made by the Director, District Marine Bureau of the above Ministry.

Port activities, such as cargo in transit sheds, or in storage and port facilities of Government property, are in the custody of the Association of Port Management. This Association is formed from members of the various port users associations and was formed in 1972, under the control of the Minister in charge of Port Operations.

Port service companies and Stevedoring companies are still privately owned.

Repatriation and relief of crew members was made without any apparent difficulty.

SHIPMASTER'S REPORT: 1975.

The Ando pilot vessel is equipped with VHF Channel 16. If berthing in the tidal basin it is necessary to use vessel's sewage tank or sanitary tanks provided from ashore. Immigration require 2 copies of Crew List forwarded before arrival to Agents, also require ports of call list for previous 3 months. If any crew member is caught smuggling in Republic of Korean ports the vessel is liable to be detained indefinitely.

SHIPMASTER'S REPORT: October 1986.

Pilot is quoted as being at Ando, as in Charterer's telexes, the actual pilot station is Chang-An-So, approximately 2.5 hours steaming to Inchon Anchorage. Pilot not compulsory, but unless vessel is a local trader, strongly recommend use of Pilot. Outside there is no draft problem, shallow patches to be avoided are well marked on charts.

Vessel anchored off Inchon Main Lock at 1930 hrs. on 10th October. Shortly after which 2 Berthing Pilots boarded. 4 tugs made fast, each bow and each quarter. There are strong currents. Lining-up for lock entrance not easy. Due to language it was not possible for Master to communicate with tugs. Max. draft for Inchon Lock, 12.5 m. at high tides and 12.2 m. at neap tides. Cleared lock and moved into container berth. Vessel berthed safely with no damage to or against vessel. All fast 2318 hrs. on 10th October.

Charterer's Agent attended vessel on arrival with Port Health for Pratique. At approximately 0900 hrs. next morning Customs, Immigration and other officials boarded and vessel was properly cleared. Inspection of ship followed. Accommodation spaces all found clear. Insects were found in holds in corn cargo so at 1100 hrs. was informed all but essential crew would be taken off for a day at 1400 hrs. for vessel to be fumigated. I remained on board with 2nd Officer, 3rd Engineer and 3 seamen. I requested to know what gas was being used and that some safety equipment be left on board. As only cargo space involved Charterers informed me, but not in writing, that they would bear all expenses.

Crew returned on board at 1400 hrs. on 12th October. Vessel still under fumigation. Crew then opened hatches. The actual fumigation was carried out in an efficient manner, but if something had gone wrong company would be responsible.

Discharge commenced 1905 hrs. on 12th October. Work is around the clock. But if a container ship comes in, the gantries are moved to her. Discharging also stops when it rains. There are 4 container gantries. All have grab facility, I noticed 40 tonne SWL on grabs.

The berth is well fendered, with adequate mooring bollards. Fresh water is supplied by barge. Medical facility appears to be good. Shore passes are issued and must be taken ashore. The guards at the dock gates are very strict. The dock system is large. No taxi or private car allowed in. This assists vessel to keep unauthorised people off ship.

Container berth also seems to discharge timber carriers and grain. The stevedore permanently on board, co-operated well with Chief Officer. Port Health came on board to renew Derat, no difficulties encountered.

SHIPMASTER'S REPORT: November 1989.

Vessel:

LOA	159 m.
Beam	22.85 m.
Type	Santa Fe 77.
G.R.T.	12,376 tons.
N.R.T.	8,369 tons.
D.W.T.	20,949 tonnes.
Cargo	15,730 tonnes of tapioca pellets in bulk.
Max. arrival draft	31 ft. 00 in.

Approaches: Pilot boarded about 1 mile off Changnanso Lighthouse in fair weather. No difficulties found when approaching, but much attention must be given to fishing boats and their fishing nets.

Both channels (inbound) East and (outbound) West, are well marked as on BA. Charts No. 1258 and 1270.

Inbound: Steaming about 3 hours from Changnanso Lighthouse (Pilot position) to Inchon anchorage with one Pilot only. Another Pilot used from the anchorage to lock and berthing.

Outbound: Only one Pilot used for unberthing, lockage and steaming in channel. Pilots are very good, co-operative and experienced.

Anchorage: The holding ground of Inchon anchorage is very good, even with strong currents. Waiting time at anchorage depends on berth congestion and fumigation. Port Authorities boarded at anchorage (Quarantine) for clearing the vessel. Accommodation and cargo inspection by quarantine officers. Cargo found without insects so no fumigation carried out. Very strict inspection of provisions, store rooms and galley. They are looking for cockroaches and rat excrement.

Boat service from anchorage to port is available but rates are very high.

Port: Outer Harbour: For tankers and dry cargo vessels with up-to-date loading/unloading facilities.

Inner Tidal Basin: For dry cargo vessels up to 50,000 d.w.t. and approximately 11 m. – 12 m. draft. All berths are well fendered.

Special attention must be given to standard port regulations in the tidal basin area as authorities are very strict on violators.

No chipping or painting permitted to the vessel's outer hull.

Tugs: 2 – 4 tugs used for berthing, unberthing and locking, depending on wind/weather, d.w.t. and draft of the vessel.

Lock: Special attention shall be given to the Safe Lockage Regulation and Inchon District Maritime and Port Authority Law No. 14, which is presented on arrival by the local Agents.

Actual tests to vessel's engines, steering gear, telegraphs, whistle, etc. must be carried out by the vessel prior to entering the lock.

All movable projections over vessel's side must be moved inboard and movable fenders are to be ready for use if necessary. Lock is well fendered.

For entering the lock, 3 tugs are used.

For safe lockage, trim and list (port/starboard) must be adjusted to proper conditions or as required by the authorities.

East side of the lock (tidal basin entrance) is under construction and large works are being carried out.

When entering the lock for mooring, use only polypropylene ropes (no wires) as they are easier for handling. Vessels are moored at the centre of the lock chamber.

Stevedores: Work round the clock and mostly use ship's gear. Bulk cargoes are discharged very quickly, rates from 2,000 tons – 3,000 tons per day, depending on number of gangs.

Fresh Water: Available by barge only, due to general repairs and renewal of piping system at the port. Cost is about U.S.$5.00 per ton.

Shore Passes: Crew members shall always carry their passport or Seaman's Book and landing pass when going on shore leave.

Port Authorities are very strict, and in cases where landing passes are lost, heavy fines are imposed and have to be paid.

Density: Inner harbour tidal basin 1023.

Repatriation: Repatriation possible without difficulty. International connections are via Seoul which is 1.5 hours by car from Inchon.

AUTHORITY: Inchon District Maritime and Port Authority, 1-17 Hang-dang 7-ga, Jung-gu, Inchon, Republic of Korea. *Tel:* (032) 883-4061. *Telex:* K23380 Idmapa. *Contact:* Kyu Jin Whang, Director General.

KUNSAN (including Changhang): 35.55 N. 126.45 E.

The Port of Kunsan is situated on the Southern mouth of the Kum River which flows into the Yellow Sea, and North Changhang.

DOCUMENTS:

- 6 copies Report (Entry/Departure).
- 6 copies Crew List.
- 6 copies Passenger List.
- 2 copies Crew Personal Effects List.
- 3 copies Passenger Luggage List.
- 2 copies Store List.
- 9 copies Manifest (Dis./Loading) only.

NOTICES: All vessels bound for Korean ports should give an ETA to the local Agents 27 hours prior arrival. This is essential to enable the Agents to notify the Port Authorities and arrange Pilot if necessary.

RESTRICTIONS: Vessels should enter during daylight hours only. Many small Korean fishing and cargo boats in this area display dim navigation lights or none at all at night. Pilot is not compulsory but all vessels calling at this port recommended employ a Pilot in view of the hazardous channel and tidal difficulties. Controlling depth 8 ft. at Bar. Keel clearance of 2 ft. required.

PILOTAGE: The pilot station is situated at the Southern side of Piun Do (Hiyo To) Island the correct position of which is at Lat. 35° 56′ N., Long. 126° 27′ E.

The boarding point near Piun Do is about 14 miles from Kunsan. Pilot to be ordered at least 24 hours in advance. Pilots cannot board in rough weather. Due to constantly changing bottom conditions, vessel should not attempt to enter without Pilot.

ANCHORAGE: Outer anchorage about 5.5 miles West of Kunsan for vessels drawing up to 28 ft.

Inner anchorage off Kunsan suitable for vessels of 21 ft. draft.

MAX. SIZE: Draft 18 ft. to 27 ft. dependent on height of tide.

RADIO: Kunsan Radio, call sign HLN operating on 500 and 484 kHz.

TUGS: 5 tugs with respective capacity of 300 h.p. (1) 150 h.p. (2) and 80 h.p. (2) are available. 1 floating crane with capacity of 30 tons owned and managed by the Korea Dredging Corp. is available.

BERTHING: The port is controlled by Kunsan District Marine Bureau and all vessels come under jurisdiction of Kunsan Custom House. The anchorages in stream inner harbour can accommodate 1 or 2 vessels less than 1,000 gross tons, and outer anchorage (Yubudo Anchorage) accommodates 1 ocean-going vessel drawing about 28 ft. There are 5 pontoon piers (3 for Kunsan and 2 for Changhang) each of which can accommodate an ocean-going vessel with maximum draft of 27 ft.
STEVEDORES: There is 1 stevedoring company with 14 wooden barges, 3 steel barges and 3 tug boats. Discharging capacities: average records per day of 24 hours: coal 1,500 tons; grain and wheat 1,600 tons; fertilizer 1,300 – 1,400 tons; cement 1,000 – 1,100 tons; lauan log 500,000 B/F. Daytime only.
MEDICAL: Crew members should be in possession of health certificate showing vaccinations for typhoid. In case health certificate has expired, the person(s) will be vaccinated/inoculated by a quarantine doctor.
CURFEW: In Korea the curfew is still effective from midnight to 0400 hrs. every day.
HOLIDAYS: Public Holidays – New Year (January 1-3); Independence Movement Day (March 1); Labour Day (March 10); Arbor Day (April 5); Memorial Day (June 6); Constitution Day (July 17); Liberation Day (August 15); Nation's Foundation Day (October 3); National Alphabet Day (October 9); United Nations Day (October 24); Christmas Day (December 25). (Can be worked if requested.)

Local Holidays. Work cannot be carried out on Lunar New Year's Day and the Moon Festival, about 15th August.
SHORE LEAVE: Crew shore passes will be issued by Port Immigration Office.
DEVELOPMENTS: Major developments underway which are scheduled for completion in 1993.
AUTHORITY: Kunsan District Maritime and Port Authority. *Tel:* (0654) 3 4131/4. *Telex:* K66666 Gsdmpa.

MASAN: 35.11 N. 128.35 E.

PORT LIMITS: *Port Boundary:* 35° 09′ North.
Arrived ship: A vessel is considered as "arrived" when in the Quarantine Anchorage.
Laytime: (Subject to Charter Party). Generally commences at 0800 hrs. if Notice of Readiness tendered p.m. day before and 1300 hrs. if tendered a.m. day of arrival.
DOCUMENTS:
- 11 copies of Crew Lists (inward and outward).
- 3 copies of Personal Effects.
- 3 copies of Stores List.
- 3 copies of Bonded Stores Lists.
- 11 copies of Passenger Lists.
- 3 copies of Narcotics Lists.
- 3 copies of Arms and Ammunition Lists.
- 4 copies of Manifests (entry clearance only, excluding manifest for consignee, stevedore, checker's firm and other related firms)
- 2 copies of Bill of Lading.
- 5 copies of Entry Report (only entry clearance).
- Ship's Certificates and Seaman's Books or Passports.

PILOTAGE: Kaduk Pilot Station: Lat. 35° 02′ N., Long. 128° 47′ E. ETA required 24 hours prior to arrival. (Tel: 2-9225).

Two pilot boats "An Se" and "Be Yun". VHF to be installed in pilot boats.

At the present time contact with Pilot made through Agent or Masan Harbour Control on VHF. Vessels to display usual pilot signals.

In case of bad weather vessels wait for Pilot at the pilot station.
ANCHORAGE: Mooring capacity at anchorages: A-1, A-2, A-3 Depth 30 ft.; A-4, A-5, A-6 Depth 24 ft.; A-7, A-8 Depth 23 ft. Quarantine Station Depth 36 ft.
RESTRICTIONS: Should take Pilot's guidance as a Korean Navy base is located very close to Masan port.
MAX. SIZE: 20,000 d.w.t. LOA 210 m. Max. draft 11.0 m.
HEALTH: Crew members should be in possession of health certificate showing vaccination for typhoid. If the health certificate has expired, the person(s) will be vaccinated/inoculated by a Masan National Quarantine Doctor.
RADIO: Seoul Radio.
VHF: VHF at Masan District Maritime and Port Authority (Call "Masan Harbour Control").
RADAR: None.
TUGS: Two tugs, "Chung Ryong" (Government owned) 1,000 h.p. and "Yong Ma" (Private) 2,000 h.p. Generally, ship's lines used and tugs join vessel at Quarantine Anchorage.
BERTHING:

	Depth (m.)	*Length* (m.)	*Max. Size*	*No. of Berths*
Pier No. 1	8.0	445	8,000	2
Pier No. 2	5.0	385	500	2
Pier No. 3	11.0	210	20,000	1
	11.0	210	20,000	1
Pier No. 4	11.0	1,050	20,000	5
Dolphin	7.0	88	5,000	1
KHIK	11.0	240	20,000	1
Yukong	7.0	100	3,000	1

CRANES: Cranes with capacity 40 – 60 tons expected to be installed at Chang Won Pier. Cargo operation is generally by ship's own gear.
BULK CARGO FACILITIES: There are two bulk cargo piers (Nos. 1 and 3), average discharge rate is 1,500 – 1,800 tons (0800 hrs. – 2100 hrs.) a day, and sulphur is generally discharged at port of Chinhae, where there is a chemical firm.

Length of pier: 210 m. Depth (low tide) 11 m. and one gantry crane (capacity 6 tons bucket) discharging rate is approximately 5,000 tonnes a day (24 hours).
SPECIAL CARGO HANDLING FACILITIES: None.
BRIDGES: None.
STEVEDORES: Advise stevedores number of hatches, number of derricks and capacity, and supply stowage plan on arrival.
Average Discharging Rate by Commodities: (0800 – 2100 hrs.).

Coal	1,500 tonnes
Grain	1,500 tonnes
Wire Rods	700 tonnes
General Cargo	700 tonnes
Others	600 tonnes

MEDICAL: Masan National Quarantine Office is responsible for any matters relating to vaccinations. Master should prepare a medical report form for patients visiting Masan hospital.
TANKERS: No facilities (Transhipment if any, carried out by lighters).
FRESH WATER: Available at Masan.
FUEL: Available by grades.
FIRE PRECAUTIONS: One fire boat stands by 24 hours a day at Central Pier.
CONSULS: None.
REPAIRS: Available anytime (two companies).
DRY DOCKS: 3 minor dry docks.
SURVEYORS: Various survey firms located at Masan, but not Lloyd's or ABS.
HATCHES: Generally, first opening and last closing is by ship's crew and others by stevedores.
GANGWAY/DECK WATCHMAN: Available at Masan.
CUSTOMS ALLOWANCES: Daily consumption quantity only.
CARGO GEAR: Using of cargo gear (utilisation) depends on negotiation.
REPATRIATION: Possible. Application for transferring and reason required. Agent's guarantee letter (for Crew) also required.
AIRPORT: Kimhae Airport: 70 km. from Masan. Kimpo Airport: 436 km. from Masan. Regular services.
HOLIDAYS: New Year's Day (January 1st); New Year's Day (by Lunar calendar) (January 1st), Independence Movement Day (March 1st); Labour Day (March 10th); Arbor Day (April 5th); Buddha's Birthday (Lunar calendar) (April 8th); Children's Day (May 5th); Memorial Day (June 6th); Constitution Day (July 17th); Indpendence Day (August 15th); Armed Forces Day (October 1st); National Foundation Day (October 3rd); National Alphabat Day (October 9th); Christmas Day (December 25th).

Cargo operations on the above days depend on negotiations.
POLICE/AMBULANCE/FIRE: Telephone Numbers:

Police (Foreign Section) 2-1206; Fire 2-1334; Ambulance 2-1151.
TELEPHONE: Not available on board vessels.
SERVICES: Security guard, garbage disposal, line handling, shoring, launch, laundry and provision supply available at Masan.
SHORE LEAVE: Crew shore pass issued by Immigration and has to be extended every 120 hours.
IDENTIFICATION CARDS: Shore pass available from Immigration.
DELAYS: There are no delays for berthing or bunkering.
GENERAL: ETA to authorities concerned no later than 24 hours before arrival.
DEVELOPMENTS: A large container yard to be built.
AUTHORITY: Masan District Maritime & Port Authority. *Tel:* (0551) 31176. *Telex:* K53676 Msdmapa.

MOKPO: 34.46 N. 126.24 E.

PORT LIMITS: A vessel is an "arrived ship" when within the harbour.
DOCUMENTS:
- 6 copies Report (Entry/Departure).
- 10 copies Crew List.
- 6 copies Passenger List.
- 3 copies Crew Personal Effects List.
- 3 copies Passenger Luggage List.
- 3 copies Stores List.
- 3 copies Arms, Ammunition and Explosives List.
- 3 copies Narcotics List.
- 9 copies Manifest (Dis./Loading only).

PILOTAGE: Pilots stationed at Kasado Island, 34° 27′ N. 126° 04′ E. 30 miles from Mokpo (Tel: 73-2105). 24 hours notice to Agent required to arrange Pilot. Although not compulsory, vessels strongly recommended not to enter without Pilot as there is a 9 m. shoal patch at Talipakji (Tallibakchi).

Pilot also available at Pulmugido Pilot Station (34° 45′ N., 126° 14′ E.) which is 10 miles from Mokpo inner harbour.

Only one pilot serves the port and he is available day and night.

All vessels bound for Korean ports should give an ETA to the local Agents 24 hours prior to arrival. This is essential to enable the Agents to notify the Port Authorities and arrange a Pilot if necessary.
APPROACHES: Vessels should keep clear of 1.3 m. depth (rock) in vicinity of Shihado Lighthouse which is marked by a buoy in position Lat. 34° 41′ 30″ N., Long. 126° 13′ 35″ E.

The "Wooden Wreck 1950" in position Lat. 34° 41′ 58″ N., Long. 126° 14′ E. has rotted away and is no longer a danger to navigation.

Also see "Pilotage".

ANCHORAGES: *Quarantine:* Anchorage in Outer Harbour in position Lat. 34° 45′ 10″ N., Long. 126° 20′ 17″ E. in depth of 16.0 m. – 23 m. (see "Plan"). There is also a Quarantine Anchorage in the Inner Harbour. *Inner Harbour:* Anchorages No. 2 and 6 for vessels up to 20,000 d.w.t. and Anchorages No. 3, 4 and 5 for vessels up to 45,000 d.w.t. Anchorage No. 1 is not suitable for operations as it is too close to the fairway.

No cargo operations take place in the Outer Anchorage at present.

RESTRICTIONS: *Overhead Cable:* There is an overhead cable at Mokpo-Gu in position Lat. 34° 45′ 18′ N., Long. 126° 18′ 40″ E., clearance is 60 m.

MAX. SIZE: Vessels of 45,000 d.w.t., LOA 230 m. and max. draft 12.0 m. can be accommodated in the Inner anchorage. Max. size at berth 38,000 d.w.t.

RADIO: Use Seoul Radio for initial contact. Mokpo Radio. Call sign HLM operating on 500 and 484 kHz.

VHF: Pilots on Channels 12 and 16.

TUGS: 1 × 2,000 h.p. tug stationed at Mokpo.

Vessels of 12,000 d.w.t. – 30,000 d.w.t. are required to use tug of 3,000 h.p. or more for berthing and unberthing, so an additional tug of 2,000 h.p. has to be hired from Kunsan (122 miles from Mokpo) at a cost of U.S.$ 6,500 for the round trip.

BERTHING:

Berth No.	*Length (m.)*	*Depth (L.W.) (m.)*	*Depth (Neaps) (m.)*	*Remarks*
1-11	168	8.4	9.0	Max. size 20,000 d.w.t. Ship's gear used.
1-12	250	10.5	11.1	Max. size 38,000 d.w.t. 1 level luffing crane for coal and logs.
1-13	240	10.5	11.0	Ship's gear used. Only pier apron usable.

Remarks: Usable length at Pier No. 1-12 is 230 m. At Pier No. 1-13 the usable length is 200 m. as the pneumatic suction conveyor uses the berth.

Pier No. 1-12 is equipped with a luffing crane which can handle coal at a rate of 450 t.p.h. (hours 0800 – 2200).

STEVEDORES: There are 3 general stevedores and one exclusive stevedore (Han Kook Flour Mills Industries Co. Ltd.).

1. Korea Express Co. Ltd.: 2 payloaders and 12 trucks (10 tons – 15 tons).
2. Dong-A Transport Co.: 2 mobile cranes (30 tons – 80 tons) and 2 payloaders.
3. Daijin Corp.: 10 mobile cranes (25 tons – 60 tons), 1 payloader, 2 forklifts, 3 trailers and 10 trucks (15 tons).
4. Han Kook Flour Mills Industries Co. Ltd.: Handle their own wheat in bulk only. 6 steel barges (total capacity 1,500 tons), 1 × 370 h.p. tug and 1 silo of 24,800 tons capacity. They also operate a pneumatic suction conveyor at Pier No. 1-13. Ships are unloaded into barges by ship's gear at Anchorage No. 5 which is 400 m. from the quay.

Cargo Handling Rates:

Cargo	*Daily Discharge Rate*	*Working Hours*	*Location (Pier)*	*Receiver*
Coal (anthracite)	6,000 tons	0800 – 2200	1-12	Dai Han Corp.
Coal (steam)	6,000 tons	0800 – 2200	1-12	Koryo Cement
American Logs	850,000 board ft.	0800 – 1800	1-12 1-13	Various companies.
New Zealand Logs	2,200 cu.m.	0800 – 1800	1-12 1-13	Various companies.
Chilean Logs	2,500 cu.m.	0800 – 1800	1-12 1-13	Sammi/Hyosung
Yellow Maize	1,300 tons	0800 – 1800	1-11	Samyangsa
U.S. Wheat	2,100 tons	0800 – 1800	Anchorage No. 5	Han Kook
Butanol/DOP	300 tons	0800 – 2200	1-11 1-13	Lucky Goldstar (Export)

Night shift labour not available due to labour shortage.

Delays can be expected when wheat vessels and yellow maize vessel in port at the same time.

MEDICAL: Hospital and Dentist available. Crew members should be in possession of Health Certificate showing vaccinations for typhoid. In case the Health Certificate has expired, the person(s) will be vaccinated/inoculated by a quarantine doctor.

FRESH WATER: A 50 ton barge can supply 100 tons a day. No pipelines on quay. 24 hours notice required. Cost U.S.$ 4.50 per ton.

FUEL: Duty free bunkers not available in Mokpo. Bunkers are supplied from Yosu, with 5 days notice to main Agent in Seoul.

SURVEYORS: Korea Registry Inspector, Komsa and Kimsco.

AIRPORT: Domestic flights operate from Kwangji Airport which is one hour by car from the port.

HOLIDAYS: Public Holidays; New Year (January 1st-3rd); Independence Movement Day (March 1st); Labour Day (March 10th); Arbor Day (April 5th); Memorial Day (June 6th); Constitution Day (July 17th); Liberation Day (August 15th); Nation's Foundation Day (October 3rd); National Alphabet Day (October 9th); United Nations Day (October 24th); Christmas (December 25th). Work can be arranged on all above holidays. Local Holidays; No work can be done on Lunar New Year or on the Moon Festival about August 15th.

SHORE LEAVE: Crew shore passes will be issued by Port Immigration Office. Extension of shore passes should be made every 72 hours.

GARBAGE DISPOSAL: Collection service is available. Skips are provided to the ship by disposal company. Tel: (0631) 42-6742. Fax: (0631) 42-4405. Collection time: Every 2 or 3 days if skips are full.

WASTE OIL DISPOSAL: Collection service is not available.

SEAMAN'S CLUBS: No Seaman's Club available. Facilities available in the port: Shops, international telephone service, church services, minibus, postage facilities, games, indoor swimming pool, etc.

SERVICES: Seawoon Shipping Services Inc. (See "Agent") can arrange for crew repatriation, urgent fresh water supply, cranes, crew medicals/ambulance, ship's supply services, renewing Derat Certificate, Banks, crew shore leave, Maritime Rescue boat, etc., including urgent Agency assistance.

BANKS: Korea Exchange Bank. Tel: (0631) 72-8301. Fax: (0631) 74-3581.

Seoul Trust Bank. Tel: (0631) 42-4461. Fax: (0631) 42-4464.

Kwangju Bank. Tel: (0631) 42-5102. Fax: (0631) 43-6564.

AUTHORITY: Mokpo District Maritime and Port Authority, 80-7 Samhak-Do, Sanjong-Dong, Mokpo City, Chonnam, Korea. (530-350). *Tel:* (0631) 42-1301. *Telex:* K 66767 MPOSMPA. *FAX:* (0631) 43-1307. *Cables:* MPOSMPA Mokpo. *Contact:* Won-Myung Kim, Harbour Master. Kyu-Sang Choi, Port Manager. Captain I.C.Jung, Pilot.

AGENT: Seawoon Shipping Service Inc., Mokpo, Korea, 6 Hang-Dong, Mokpo, Korea (530-140). Tel: (0631) 43-3478, 42-6742, (43-3470 night). Fax: (0631) 42-4405. Telex: K66713. Cables: Seawoon Mokpo.

MUKHO: 37.33 N. 129.07 E. (See Plan)

PORT LIMITS: The port limit is established by lines joining the following points:

A. Lat. 37° 33′ 12″ N., Long. 129° 07′ 25″ E.
B. Lat. 37° 33′ 12″ N., Long. 129° 08′ 12″ E.
C. Lat. 37° 32′ 00″ N., Long. 129° 08′ 23″ E.
D. Lat. 37° 32′ 00″ N., Long. 129° 07′ 02″ E.

DOCUMENTS:

6 Crew Lists.
6 Passenger Lists (In case of any passenger aboard).
3 Stores Lists.
3 Personal Effect Lists.
3 Cargo Manifests (In case of any cargo on board).
2 Port Itinerary Reports (For the last 6 months).

PILOTAGE: Compulsory and 3 licensed Pilots are available from 0500 – 2200 hrs., and usually join ship in position Lat. 37° 32′ 30″ N., Long. 129° 08′ 25″ E.

VHF Radio is available for contacting pilot station (Tel: 2-2324/3740).

ANCHORAGE: Outer Harbour offers anchorages for the vessel awaiting docking order with a rocky and sandy bottom.

Vessels lying anchored in this anchorage which is open roads, are recommended to pay attention to weather conditions. The depths vary from 9 m. to 26 m.

RESTRICTIONS: Pilot for entering inner harbour is available from 0500 hrs. to 2200 hrs. due to close of port.

The max. available depth of inner harbour is 8.5 m. The max. tidal range is 0.4 m.

MAX. SIZE: The max. permissible length, breadth and draft for entering inner harbour is as follows:

Length – 180 m. Breadth – 25 m. Draft – 8.5 m.

HEALTH: Pratique is automatic. For Pratique it is necessary to prepare the following documents: Yellow cards. Derat Certificate and/or Derat Exemption Certificate. In the event of any suspected disease or fever on board it should be reported without delay to Quarantine Station and/or Agent in Mukho.

RADIO: Shore Radio Stations: Seoul Radio, Kangreung Radio, Busan Radio and Mokpo Radio.

Mukho harbour Network 6MF2.

VHF: Call sign "Mukho Radio" Channel 16 for calling station. Channel 26 for communication.

RADAR: None.

TUGS: 2 tugs of 1,000 h.p. each equipped with their own towline are available.

BERTHING: *No. 1 Pier.* (Exclusively for loading Coal/Graphite in bulk).

Berth A: Exclusively for loading Coal/Graphite in bulk. Length 100 m. Available draft at LW 7.5 m. 2 lines of belt conveyor and 2 loaders, height above HWL 7 m. Loading rate per hour per loader 300 tonnes.

Berth B: Exclusively for loading Coal/Graphite in bulk. Length 110 m. Permissible draft at LW 8 m. 2 lines of belt conveyor and 2 loaders, height above HWL 7 m. Loading rate per hour per loader 400 tonnes.

No. 2 Pier: Exclusively utilised for Naval and Coast Guard ships. Length 140 m. Depth available 4 m.

No. 3 Pier: For loading bulk cement, bagged cement and cement clinker in bulk, and loading/unloading general cargoes. Length 330 m. Available draft at LW 8.5 m. or 28 ft. 1 line of conveyor and 1 loader (air slider) for loading bulk cement. 2 lines of belt conveyor and 2 loaders for loading bagged cement. 1 line of belt conveyor and 1 loader for loading cement clinker in bulk. Available height above HWL 8 m. Loading Rate: Bulk cement 400 tonnes/p.h. Bagged cement 1,500 tonnes per day per loader. Cement clinker 350 tonnes/p.h.

Loading rate for General Cargo as follows:

Average discharging rate per hour/gang:

Steel material	Various	30 tonnes
Machinery	Case	30 tons
Grain	Bulk	25 tonnes
Gypsum	Bulk	25 tonnes
Coke	Bulk	15 tonnes
Fertiliser	Bag	20 tonnes

Average Loading Rate per hour/gang:

Iron Ore	Bulk	20 tonnes

No. 4 Pier: For loading bulk cement and loading/unloading general cargoes. Length 150 m. Permissible draft at LW 7.5 m. 1 line of belt conveyor and 1 loader (air sliding chute) for loading bulk cement. Height above HWL 8 m. Loading Rate: Bulk Cement 400 tonnes/p.h. Loading rate of general cargoes same as at No. 3 Pier. Discharging rate of general cargoes same as at No. 3 Pier.

Central Pier: For loading/unloading general cargoes. Length 120 m. Permissible depth at LW 6.5 m. No shore facilities. Loading/unloading general cargoes same as at No. 3 Pier.

CRANES: Mobile Cranes 1 × 20 ton and 1 × 30 ton.

BULK CARGO FACILITIES: No discharging facilities. Loading facilities see "Berthing".

STEVEDORES: Vessels bound for this port are to radio Agent Shipper/Consignee and Harbour Master, at least 24 hours prior to arrival, draft on arrival, description/quantity of cargo.

Average Discharge Rate per gang/hour:

Steel materials	Various Types	30 tons
Machinery	Case	30 tons
Grain	Bulk	25 tons
Ores	Bulk	25 tons
Fertiliser	Bag	20 tons

Average Loading Rate per gang/hour:
(Only with labourer hands – manually)

Ores	Bulk	20 tons

Average Loading Rate per gang/hour:
(By shore loading facilities)

Coal/Graphite	Bulk	350 tons
Cement	Bulk	350 tons
Cement	Bag	60 tons
Cement Clinker	Bulk	350 tons

MEDICAL: Several hospitals available.
TANKERS: No facilities.
DENSITY: Average salinity of water in the port is 1.025.
FRESH WATER: Supply of fresh water available by water barge and from shore water works.

Supply at pier	50 t.p.h.
Supply by barge	100 tons per day

FUEL: Most grades of domestic and bonded oil available with 4 days prior notice.
FIRE PRECAUTIONS: None.
CONSULS: None.
REPAIRS: None.
DRY DOCKS: None.
SURVEYORS: Classification Surveyors are in Seoul and/or Busan.
GANGWAY/DECK WATCHMAN: Owner's/Master's option.
HATCHES: First Opening/Final Closing by crew and intermediate handling by stevedores.
CUSTOMS ALLOWANCES: Cigarettes: 1 carton. Wine/Spirit: 2 bottles.
CARGO GEAR: Shore loading facilities, see "Berthing". No heavy lift cranes.
REPATRIATION: Possible.
AIRPORT: No airport locally, however there is an express bus service between Mukho and Seoul.
HOLIDAYS: *Official Holidays are as follows:*

The New Year Day	1st January	Work cannot be arranged
Independence Movement Day	1st March	Can be arranged
Memorial Day	6th June	Can be arranged
Constitution Day	17th July	Can be arranged
Independence Day	15th August	Can be arranged
National Foundation Day	3rd October	Can be arranged
Hangul (Korean Alphabet) Day	9th October	Can be arranged
Armed Forces Day	1st October	Can be arranged
Festival Days:		
Lunar Calendar New Year	1st January (Lunar)	Work not possible
Labour Day	10th March	Work possible
Children's Day	5th May	Work possible
Buddha's Birthday	8th April (Lunar)	Work possible
Moon Festival Day	15th August (Lunar)	Work not possible
Christmas Day	25th December	Work possible

POLICE/AMBULANCE/FIRE: Police – 3112. Ambulance – 3900. Fire – 119, 3005.
TELEPHONES: None.
SERVICES: None. Should be arranged from Busan/Inchon.
SHORE LEAVE: Possible.
IDENTIFICATION CARDS: Shore passes are issued for every Crew member who wishes to go ashore.
REGULATIONS: No particular regulations.
DELAYS: Normal delays.
GENERAL: None.
AUTHORITY: Donghae Maritime & Port Authority. *Tel:* (0394) 32-3631. *Telex:* K24336.

POHANG: 36.01 N. 129.24 E. (See Plan)

PORT LIMITS: The sea within the line joining the position of Yeonam Southern Cape Long. 129° 25′ E. to that of Lat. 35° 59′ 50″ N., Long. 129° 27′ 30″ E.
DOCUMENTS: See "Busan".
PILOTAGE: Compulsory, 4 licensed pilots available. Tel: 2-9221/2.
ANCHORAGE: 18 anchorages with depths 8.0 m. – 23.0 m. Bottom is mud and sand.
MAX. SIZE: See "Berthing".
Ship Operator's Report: Posco Mineral Quay:

July 1979: Vessel of 142,767 d.w.t., with 112,012 tons of cargo on board docked at No. 1 B-2 with a draft aft of 49 ft. 6 in. (15.08 m.). The officially accepted draft is 14.50 m.

HEALTH: Quarantine Anchorage: Lat. 36° 03′ 47″ N., 129° 26′ 55″ E.

Radio Pratique to be requested 36 hours prior to arrival.

RADIO/VHF: Port Control on VHF Channel 16.
TUGS: 3 tugs available of 3,000 h.p. The tugs are stationed at the third pier.

BERTHING:

Pier No.	*Berth No.*	*Max. Draft (m.)*	*Max. LOA/Beam (m.)*	*Max. Airdraft (m.)*	*Max. Size (d.w.t.)*	*Remarks*
1	11	16.5	350/50	15.0	150,000	2×1,500 t.p.h. unloaders
	13	14.5	310/42	15.0	100,000	3×1,500 t.p.h. unloaders (outreach 30 m.)

	84	9.5	224/35		20,000	
	85	9.5	224/35		20,000	

CRANES: 12 Shore cranes. (Lifting capacities 3,138 t.p.h.)
MEDICAL: 2 hospitals available.
FRESH WATER: Can be supplied alongside the quay or by water barge.
FUEL: Available locally. For large quantities 48 hours notice required. All grades obtainable from oil companies.
CUSTOMS ALLOWANCES: Tobacco: 400 cigarettes. Wine: 1,500 cc.
REPATRIATION: All facilities available for crew changes.
AIRPORT: Kimpo 200 km., Kimhae 150 km.
HOLIDAYS: New Year's Day – 3rd January, 1st March, 5th April, 5th May, Buddha's Birthday, 6th June, 17th July, 15th August, 3rd October, 9th October, Christmas Day.
POLICE/AMBULANCE/FIRE: Police 2-3419. Fire 119. Ambulance 2-5269.
SERVICES: Sub-Agents. Ship's laundries, etc.
SHORE LEAVE: Crew members allowed ashore.
IDENTIFICATION CARDS: Seaman's Book is sufficient.
DEVELOPMENTS: Central breakwater under construction.

Works in progress to increase capacity at first pier to 150,000 d.w.t. and draft to 16.5 m.

SHIPMASTER'S REPORT: 1975.
Pilot: Usually boards the vessel after anchoring in position Lat. 36.03 N., Long: 129.26 E.
Anchorage Position for Quarantine Clearance: Same as for Pilot.
Berthing: Entry and departure are only permissible during daylight hours, vessels are not allowed to berth at night.
Fresh Water: Available at all times ex-wharf without limit on quantity taken.

SHIPMASTER'S REPORT: 1975.
Approaches: There are no British Admiralty Charts covering this port. The coastal approach to Yongil Man can be made on Chart B.A. 3666, thereafter an American Chart No. 95166 (formerly H.O. 3257) is suitable for making the approach to the Quarantine Anchorage.

There are no offlying dangers, and depths shelve gradually from the entrance to the head of the bay.

A good lookout should be maintained for fishing nets which are many.

Quarantine: Port Health Officials board at the Quarantine Anchorage – Position Lat. 36° 02′ N., Long. 129° 26′ E. in a depth of 19 m. No Radio Pratique available.

If vessel arrives at night, officials board at daybreak next morning. No port movements during the hours of darkness.

Notice of Readiness: Accepted at time of Free Pratique granted.
Pilotage: Pilot boards with Port Health at anchorage. Pilot stated that our vessel 72,072 d.w.t. was too big for the port, which was designed for max. size 50,000 d.w.t. However, no difficulties experienced, berthing in calm weather conditions. Berthing and sailing in daylight hours only.
Entrance Channel: Entrance to harbour is made via dredged channel, commencing between 2 buoys, (Nos. 1 and 2), about 200 ft. apart, situated about 1 mile off Southern Breakwater head.

Axis of approach channel, from midway between the buoys to midway between the breakwater heads, is a straight line 259° True.

Dredged depth in the channel is stated to be not less than 13 m. However, according to the echo sounder, depth beneath keel was never less than 11 ft. until vessel entered the harbour basin, when further depth recording was impossible due to 'noise' from propeller wash caused by astern movements, obscuring echo sounder signal propagation. As the vessel's draft was 36 ft. 08 in. min. depth of water was therefore 47 ft. 08 in. = 14.5 m. approx. This was verified on the outward passage. The 13 m. minimum probably refers to the basin within the harbour entrance.

Tide: The rise and fall of tide is only about 1 ft.
Tugs: There are only 2 tugs available, both very weak. Pilot kept complaining that the tugs were inadequate for a vessel of this size, which was a fair assessment.

Berth: See sketch (Plan) for depth alongside POSCO mineral quay. Min. depth at berth stated to be 12 m. (39 ft. 04.5 in.) Max. permissible draft 11.2 m. (36 ft. 09 in.) Density was 1026.

Loaded vessels berth head in, starboard side alongside. Can prepare accommodation ladder starboard side before arrival.

The face of the quay is protected by permanent heavy-duty rubber fendering.

Moorings: A minimum of 3 head lines, 1 breast line, and 2 backsprings, each end, is recommended. Although the port is well sheltered from the prevailing W. – N.W. winds, it is wide open to the N.E. from which strong gales can suddenly develop.

Discharge: 2 modern transporter grabs discharge into a conveyor belt system. Discharge rate overall about 1,100 t.p.h., on a 24 hour basis. Holds were well swept clean on completion.

A meticulous draft survey was held upon arrival and after completion, to verify Bill of Lading.

Fresh Water: Plentiful supply from pipe line on the quay. Apply to Agent for services of waterman.

Customs: The bond is not sealed, but a Custom's Officer is stationed on board at the gangway throughout.

Shore Leave: The crew are not allowed to pass through the steelworks, going ashore. A liberty boat must be hired, which plies between the end of the quay and Pohang town pier, about a half hour run.

Last boat returning to ship at night leaves the town at 2200 hrs. First boat in the morning leaves at 0600 hrs. Shore passes issued on arrival.

Documents: The following arrival papers are required:—

Quarantine Declaration and Vaccination List.
14 Crew Lists.
3 Stores Lists.
3 Crew's Effects Declarations.
10 Cargo Manifests in Metric Tons.

N.B. The cargo manifests can be made up on board by typing on plain paper, but quantities must be stated in *metric tons*.

Repatriation: Possible. A complete Chinese crew change (25 men) was carried out during vessel's stay, plus one officer to the U.K.

Communications: There is no Telex system in Pohang. Cables are passed by telephone to General Agents in Seoul, for onward transmission. There is no problem arranging telephone communication with the U.K., but it is not possible to reverse the charges (call collect). Average waiting time about 1 hour.

Repair Facilities: Most engine and hull repairs can be carried out. There are 4 repair firms available, but it is advisable to take the Agent's advice as 3 of these firms are very small, with limited manpower. Materials not immediately available, can be brought by road from Busan, about 3 hours' journey. Lloyd's Hull & Engine Surveyors based in Busan.

SHIPMASTER'S REPORT: July 1975.

Port Limits: By a line drawn from Lat. 36° 04′ 10″ N., Long. 129° 25′ E., to Lat. 35° 59′ 50″ N., Long. 129° 27′ 30″ E., Korean Chart No. 135 Pohang Harbour and Approaches refers.

Documents: See "Busan".

Pilotage: Pilots board either at the Quarantine Anchorage or off the channel entrance as required. Pilotage within the harbour breakwaters is compulsory. No VHF available but Pilots are equipped with transceivers for port operations.

Anchorages: In roadstead, open to the N.E. in depths of 15 m. to 20 m. – Numerous mooring buoys and marker buoys for reclamation are in the vicinity. Vessels should anchor to seaward until a Pilot boards.

Restrictions: Vessels may arrive and sail from the roadstead at any time, but in daylight only if using the inner harbour.

Max. Size: No restriction in the roadstead, 12 m. in the inner harbour.

Pratique: It is advisable to give advance notice of Pratique. Pratique is granted to vessels anchored in a circular quarantine anchorage, radius 500 m., the centre of which is located in Lat. 36° 03′ 20″ N., Long. 129° 25′ 25″ E.

Radio: All messages to Pohang should be routed through Busan Radio HLP.

Tugs: A number of tugs are available, the 2 largest being 2,500 h.p. each. Tugs join the vessel at the breakwater entrance.

Approaches: Vessels using B.A. Chart 3666 should find flashing seabuoy in the entrance to Yon Iru Bay located in position Lat. 36° 05′ 50″ N., Long. 129° 30′ 35″ E., and from there steer a course 227° True (6.8 miles) to the Inner Harbour Fairway Entrance, which is marked by 2 buoys marked 1 and 2 and Qk. Fl. G. and Fl. R. 3 seconds, respectively each visible 5 miles. An anchorage should be found close seaward of the entrance buoys whilst awaiting a Pilot.

Berthing: A number of inner harbour berths are available at depths ranging between 8 and 12 m. datum.

The entrance fairway has a minimum depth of 12.4 m. Harbour developments are still in progress.

Stevedores: Arranged through Agents. Advance notice desirable.
Medical: Available.
Fresh Water: Limited quantities available by barge, if advance notice given.
Consuls: None.
Repairs: Only repairs of a minor nature can be undertaken.
Drydock: None.
Surveyors: Lloyd's available from Busan.
Gangway/Deck Watchmen: Not required.
Opening/Closing Hatches: By Crew.
Customs Allowance: See "Busan".
Repatriation: Not available.
Airport: Busan (Suyeng).
Shore Leave: Permitted, but even if vessel berthed alongside, launch service must be used.
Identification: Shore Passes.
Developments: Considerable reclamation and harbour developments in progress.

General: Last call of vessel was July 1975. B.A. Chart No. 3666 does not show the new port of Pohang at all but can be used for approach work. Korean Chart No. 135 should be obtained if possible.

SHIPMASTER'S REPORT: June 1980.

The port is situated in the S.E. part of the country at the head of a bay and fully exposed to any weather from between North and East. Approaching the port there are very few navigational hazards except numerous small fishing craft. The B.A. Chart No. 3666 covering the area is out of date and the inset showing Pohang gives insufficient detail. I would recommend that with only B.A. Chart No. 3666 entry to the port should be attempted in daylight only. Korean Chart Nos. 132 and 135 cover the port and approaches and appear to be more up to date.

The Korean Pilot Book Supplement No. 9 1978 on Page 71 gives information on minefields and swept channels for approaching the port but the Harbour Pilots have no knowledge of these swept routes. However, there is a large area within the bay that is dangerous to navigation and anchoring but not marked on the chart. Vessels should not pass between the shoreline and a line drawn through the positions of the following lighthouse and buoys:

Fl. G. Lt. – Lat. 36° 05′ 18″ N., Long. 129° 33′ 35″ E.
Buoy RW – Lat. 36° 05′ 30″ N., Long. 129° 30′ 30″ E.
Buoy RW – Lat. 36° 03′ 12″ N., Long. 129° 28′ 20″ E.
Buoy – Lat. 36° 01′ 25″ N., Long. 129° 27′ 50″ E.

Also it is advisable to pass at least 2 miles North of the lighthouse so as to avoid the numerous fishing vessels and fishing stakes off the port, enter the bay passing the buoys on the port hand.

The indicated Quarantine Anchorage has only a limited depth of water and larger vessels are permitted to anchor in the vicinity of the second buoy where the vessel will be cleared by Quarantine Officers before the Pilot boards.

The ore/coal berth is situated in the new harbour where there is still a vast amount of new building and reconstruction taking place. The maximum draft is 14.5 m. and the approach through a short buoyed channel which offers no problems. The berth lies in an 035° – 215° direction with a depth alongside of 16.0 m. for 950 m. and vessels berth starboard side alongside. Standard moorings of 4–2–2 at each end and the port anchor with about three shackles, the latter being used for heaving off when unberthing.

Cargo discharge facilities are three units, with two more under construction, which should be completed by 1981, all suitable for the discharge of ore or coal. Discharge rate was about 30,000 tonnes per day using 2–3 units continuously.

Four tugs are used for berthing and unberthing operations, two of which are modern tugs. The two older tugs are due to be replaced soon with more powerful modern units.

Bulldozers are used for clearing hold bottoms and some shore labour is engaged sweeping up excess fallout off hatches, etc. Food and some form of accommodation has to be provided for the shift foremen on a continuous basis.

Fresh stores and provisions of good quality and reasonable price were obtainable but no frozen foods of any description available. Laundry service available and fair results.

Fuel oil bunkers were available by previous arrangements with Owners.

Shore leave is by launch only. Launch lands personnel in the old harbour about 5 miles away outside the breakwaters of the new harbour. No shore gangways available. Accommodation ladders required on each side as Port Officials and Agents board via the quay and ship's personnel are not allowed to walk on quay.

Repatriation for 26 Officers and Crew was done with very little effort and minimum paperwork. Personnel travel by coach to Busan thence by air to Osaka and Tokyo for London.

Arrival papers were as those required for Pusan and some company forms readily accepted.

The present maximum draft for the port is 14.5 m. but this is expected to increase to 14.75 m. next year.

Port limits have been extended and now join the following positions: Lat. 36° 04′ 30″ N., Long. 129° 25′ 20″ E.; Lat. 36° 03′ 00″ N., Long. 129° 28′ 00″ E.; Lat. 36° 01′ 12″ N., Long. 129° 29′ 54″ E.

SHIPMASTER'S REPORT: September, 1982.

Health: Radio Pratique not possible.
VHF: 16 then 6 with Pilot boats; 16 with Pohang Port Authorities; 16, 25, 26 and 27 with Pohang Radio.
Tugs: Four modern tugs.
Berthing: Depth alongside Berth No. 1 is 17 m. Vessels berth either side alongside. Berthing in daylight only for large vessels.
Fuel: All grades of bunkers and lubricants available from Korea Marine Bunkering Co., Ltd. Cable address: K Bunker Seoul. Telex: K28412.
Repairs: Sae Won Marine Engineering Co., Ltd., Cable address: Sae Marine Pohang. Telex: K4395. Tel: (72) 5400-1 (riding crew are available for ship repairs on passage).

Sam Yang Marine Engineering Co., Ltd., Telex: Symeco K4415. Tel: (3) 2251-2, (3) 4451., Agent for Unitor Service.

AUTHORITY: Pohang District Maritime and Port Authority, 58-7 Hangku-Dong, Pohang, Republic of Korea. *Tel:* (0562) 421812/5. *Telex:* K54300 Hangman.

PYEONG TAEK: 36.57 N. 126.01 E.

PILOTAGE: Pilot boards in position Lat. 36° 57′ 05″ N., Long. 126° 01′ 00″ E., which is 38 miles from the LNG Berth.
RESTRICTIONS: Vessels berth at daytime HW only.
MAX. SIZE: Berth designed for vessels 90,000 d.w.t. – 100,000 d.w.t.
BERTHING: The dolphin berth, for LNG only, is 480 m. long and has a depth of 14.0 m.
Storage: 4 tanks, each with a capacity of 110,000 cu.m.
AUTHORITY: *Owner:* Korea Electric Power Corporation.
Operators: Korea Maritime Port Authority and Korea Gas Corporation.

SAMCHEOG HAN (Sam Chuck): 37.30 N. 129.10 E.

(See Plan)

SHIPMASTER'S REPORT: June 1981

DOCUMENTS:
Ship's Register (1 copy required to be kept ashore)
Last Port Clearance.
10 Crew Lists.
3 Lists of Private Tobacco and Liquors.
4 Personal Effects Lists.
4 List of Foreign Money.
4 Stores Lists.
4 Ship's Property Declarations.
PILOTAGE: Pilot will board at Quarantine Anchorage.
After departure Sam Chuck vessel has to return Pilot to Bukpyung. During night time no pilotage.
HEALTH: On arrival Sam Chuck the vessel has to proceed to Bukpyung, about 5 nautical miles North of Sam Chuck, and has to anchor at the Quarantine Anchorage in position: Lat. 37° 29′ 36″ N., Long. 129° 10′ 30″ E.
The Port Health Officers will board the vessel and arrange Free Pratique.
Documents Required:
1 Crew List.
1 Maritime Declaration of Health.
1 Vaccination List.
VHF: "Mukho Radio" calling Channel 16, communication Channel 26 (slight interference).
TUGS: One tug available, equipped with own tow line.
BERTHING: Conveyor pier, left side of port entrance, exclusively for loading cement clinker in bulk.
Draft allowed according to Pilot is 6.8 m. Other berths, draft allowed is 6.7 m.
One belt conveyor with a loading rate about 300 tonnes per hour.
DENSITY: 1027.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits. Bonded store will not be sealed, as long as the Master only has the key.
One Customs Officer will stay on board for the whole time at berth.
SHORE LEAVE: Possible, shore passes issued for every crew member, have to be returned before departure.
GENERAL:
Ship Chandler: Available from Mukho.

SAMCHEON PO: 34.52 N. 128.05 E.

(See Plan)

SHIPMASTER'S REPORT: June 1983.

DOCUMENTS: Formalities similar to other Korean Ports, but local Authorities are not used to Foreign going ships yet and Port Clearance is very slow. All crew members issued with shore passes by Immigration Authorities, these passes are collected in again before sailing, to hand back to Immigration.
PILOTAGE: Although the Port Information Sheet states that pilotage is not compulsory, I feel that it would be unwise to attempt both berthing and sailing without the benefit of local knowledge. The streams can be very strong, we estimated up to about 4 knots whilst we were there.
Pilot boards at the Quarantine Anchorage. Pilot boarding regulations similar to those at other Korean ports.
Requests for a Pilot should be made through the vessel's local Agents.
ANCHORAGES: Quarantine Anchorage 34° 51′ 56″ N., 128° 05′ 23″ E. (600 m. radius). Good holding ground – yellow mud. Depth 17.2 m. Anchorage is open to South. Channel to quay dredged to 18 m. and is well buoyed.
RESTRICTIONS: Berthing/unberthing carried out at slack water, during daylight hours only.
MAX. SIZE: 100,000 tonnes deadweight. Max. depth alongside 18.1 m. Rise of tide 1.6 m.
TUGS: Two tugs are required. They come from Masan, 3 hours' notice required.
BULK CARGO FACILITIES: Two ship unloaders with 35 tonne grabs available for coal discharge. Capacity 1,500 t.p.h. each.
BERTHING: Wharf is 540 m. long and is divided into 2 berths. Principal commodity is coal for the power station.

	Length	Depth	Max. Size
Northwest end	270 m.	15.10 m.	50,000 d.w.t.
Southeast end	270 m.	18.10 m.	100,000 d.w.t.

Wharf is very well fendered, and has lrage rubber, 'Buffer', type fenders at regular intervals. There is a 2 m. high wall, which runs along the entire wharf frontage, the mooring bollards are set in breaks in this wall; but the set up is dangerous; very awkward for the linesmen, and virtually impossible to get a gangway out, ship to shore.
STEVEDORES: Working hours per day – 16 hours.
FRESH WATER: Not available.
FUEL: Not available.
CONSULS: Nearest Consuls at Busan.
REPAIRS: Limited repairs may be undertaken by local boat yard.
GANGWAY/DECK WATCHMEN: Three Watchmen and two Customs Officers on board at all times, and have to be fed and accommodated. The Watchmen will use one room, but the Customs want to be accommodated separately.
AIRPORT: Nearest at Pusan.
SHORE LEAVE: Shore leave by liberty boat only, takes crew to the small fishing port of Sam Cheon Po, itself about 1 mile further West. Crew members are not allowed to walk ashore through the power station, so only the liberty boat can be used.
IDENTIFICATION CARDS: See "Documents".
GENERAL: Fairly good quality fresh provisions may be obtained, Agent handles chandler's work as well. Agents very willing to be of assistance, but there are very grave language problems, hardly anyone speaks English, and those that do are usually very limited in what they understand.

SHIPMASTER'S REPORT: May 1984.

CHARTS: B.A. No. 127; American 95142; Korean 452.
DOCUMENTS:
9 copies Crew List.
1 Declaration of Health.
1 Vaccination List.
3 Passenger Lists (Nil return required).
2 Crew Declaration of Personal Effects.
2 Currency Lists.
2 Ship's Currency Lists.
2 Bonded Stores Lists.
2 Ship's Stores Lists (all foodstuffs on board to be declared).
1 List of Ports of Call (previous 9 months ports and countries).
2 Ammunition and Firearms List.
2 Narcotics Lists (sealed once checked).
7 Reports of Entrance/Departure (Agent supplies and completes).
ARRIVAL: 2 Customs and 2 Immigration officials and 1 army official board when vessel alongside, Agents assist.
PILOT: Boards in position Lat. 34° 50′ N., Long. 128° 6.5′ E., from small blue coloured boat. Advance notice of arrival important as Pilot comes from Masan (3 hours by bus) and there are no telex facilities in Samcheon Po. All messages in and out by telephone from/to respective radio stations. Best to use Seoul Radio. At least 24 hours notice after which it is too late to change. Pilot boards and takes vessel to Quarantine anchorage, waits onboard until vessel cleared, then berths vessel alongside, with the aid of 2 tugs.
BERTH: The berth is 1,550 m. long with depths of 14 m. at West end and 16 m. at East end. Very well fendered for whole length, but high due to very heavy swell during S.W. Monsoon, sufficient bollards along whole length.
There are 2 gantries for 2 berths with 20 ton grabs, onto conveyor belts to large storage yard. Air draft at least 25 m. from quay. Outreach about 30 m.
Only import at this berth is coal for power station (Korean Electric Company).
FRESH WATER/FUEL: Available by barge only. Bunkers by barge from Yusan or Busan. Fresh water obtained locally but costs U.S.$4.0 per ton.
PROVISIONS: Available locally, usual Korean standard.
SHORE LEAVE: Possible by launch from ship, nobody allowed through installation except Master.
AGENT: Only one Agent in Samcheon Po. (Boo Young Shipping Co. Telephone No. 8111) No telex available.

SHIPMASTER'S REPORT: November 1985.

Approach easy from South. Straight up between Jang Got and Suu Do.

Approximately 16 m. of water in sheltered Quarantine Anchorage. Pilot not required for anchoring. VHF communication with Port Control just possible. Poor reception and language problem. Many small fishing boats and small buoys in the area. 2 tugs arrived by themselves and stood off. Unable to contact them, presumably they had come from Busan. Later a Pilot boarded who spoke a little English. Channel is well buoyed to the power station berth.

Vessel berthed at 1830 hrs. and commenced discharge at 1640 hrs. the following day.

A modern power station type berth, well able to cope with Panamax type vessels. Jetty well fendered with adequate mooring bollards. Unfortunately a wall 6 ft. (2 m.) high has been constructed along jetty edge with spaces left for bollards. The edges of which tend to chafe moorings. It also makes it hard to land gangway or accommodation ladder. This done by shore labour as crew not allowed to walk ashore. Boat service only, which ran to Si Racha.

There are guards on the jetty. Two modern grab dischargers available. There is no airdraft problem. Damage was done to hand rails in No. 4 hold, which ship repaired itself.

Cargo was completed at 0045 hrs. (56 hours after commencement) and vessel cleared at 0532 hrs.

ULSAN (Including Onsan): 35.27 N. 129.23 E.

(See Plan)

(a) GENERAL CARGO FACILITIES.
(b) YUKONG LIMITED – SBM.

(a) GENERAL CARGO FACILITIES

LOCATION: Ulsan is located on the Southern part of Korea's East coast 65 km. by sea from Busan. It is the site of the Hyundai Heavy Industries yard.

PILOTAGE: Compulsory. Quarantine/pilot station situated in position Lat. 35° 27′ 26″ N., Long. 129° 24′ 30″ E.

VHF: Port Control on VHF Channel 16. Vessel's to advise requirements and ETA 3 hours prior to arrival.

TUGS: 7 tugs. 600 h.p. – 2,600 h.p.

BERTHING: The commercial port handles steel products, coal, and chemicals required by the Ulsan Industrial Complex, which is adjacent to the port area and houses a car factory, an oil refinery, and a number of other heavy industry and chemical plants.

Berth	*Length* (m.)	*Depth* (m.)	*Remarks*
No. 1	130	8.0	General cargo
No. 2	260	12.0	General cargo, coal, cars
No. 3	347	9.0	
No. 4	322	7.5 – 11.0	Fertiliser, cars
No. 5	220	11.5	General cargo
KPC Pier	100	7.0	LPG
Coal Pier	273	10.0	Coal

Onsan – see "Shipmaster's Report", March 1987.

FRESH WATER: Available alongside and by barge at anchorage and mooring buoys.

FUEL: Available with 24 hours' notice.

GARBAGE DISPOSAL: Two companies provide these services: Kwangmyung Marine Service Co., Tel: 0522-74-5746, and Samhan Marine Enterprise Co., Tel: 0522-73-7895.

Collection charges:

1) Within 10 km. of Custom Gate:	62,480 Won/trip
2) 10 km. – 15 km. from Custom Gate:	117,180 Won/trip
3) 15 km. – 18 km. from Custom Gate:	149,630 Won/trip

Collection one per day.

Additional charges levied for holidays, Sundays or night work.

WASTE OIL DISPOSAL: Service available from Yusung Ltd. Tel: 0522-77-0671/2/3. Fax: 0522-77-0513. Capacity of shore tanks: 8,000 cu.m. Barge: Two barges available (1,500 cu.m. and 80 cu.m.). Tanker trucks of 16 cu.m. available. Basic charge: 200,000 Won for 3 cu.m. Additional charge: 80,000 Won/cu.m.

SEAMAN'S CLUBS: Seamen's Club, 2116 Mae-Am dong, Nam-ku, Ulsan, South Korea. Tel: 0522-40-6901, 24 hours service. Facilities available: Currency exchange, international telephone, shopping and bar service. Mini-bus service free of charge.

CURRENCY: Korean Won. U.S.$ 1.00 = 720 Won (May 1991).

DEVELOPMENTS: Grain terminal under construction for handling vessels of 15,000 d.w.t. – 60,000 d.w.t. 2×750 t.p.h. ship unloaders will be available.

A coal import facility is to be built, Korea Oil Corporation will be the user.

CHIEF OFFICER'S REPORT: 1975

Vessel's Particulars:

Length Overall – 162.18 m. Breadth – 22.8 m.
Summer Draft – 10.382 m. Summer d.w.t. 21,705 m./tons.

Anchorage: Local Agents generally wireless the Quarantine Anchorage position which is approx. 1.5 miles W.N.W. from the position shown on BA Chart No. 898. Care should be taken while anchoring as there are innumerable fishing floats, nets, etc. North of 35° 28′ N., and West of 129° 23.7′ E.

Restrictions: No pilotage between sunset and sunrise.

Pilotage & Berthing: The standard of pilotage was generally good. Pilot arranged by Agents and embarks at Quarantine Anchorage after vessel is cleared by Authorities. 1 anchor is used while going alongside. 1 tug of unknown h.p. and 2 mooring boats assist while berthing. 4 berths are available:

No. 1 Pier – Length 300 m. Depth variable.
No. 2 Pier – Length unknown. Depth supposed to be 36 ft.
No. 3 Pier – Length 165 m. Depth 29 ft.
No. 4 Pier – No details known.

Local Authorities themselves do not have any idea as to the actual depths alongside. It is advisable to sound the bottom twice daily especially at No. 1 Pier as the depths were found to vary almost every 10 ft. Cargo is loaded/discharged by vessel's cargo gear. Rate of loading bagged urea is approx. 400 m/tons per gang per day. Working hours are normally between 0700 hrs. and 1900 hrs. every day, Saturdays and Sundays included. Only on National Holidays no cargo is worked. Discharge of bulk sulphur and gas/product carriers is around the clock. A vessel carrying 28,000 tons of bulk sulphur was discharged in 5 days. There is 1 crane and conveyor belt on No. 1 Pier only for handling sulphur. It was observed that sometimes small coasters were loaded/discharged by mobile cranes.

Stevedores: Ulsan Port has a rule that a gang engaged for one particular hatch will only work that hatch from start to finish and will not work any other hatch, not even the other end of the hatch if the hatch has more than 1 set of derricks. Gangs have to be ordered before noon for the next day.

Medical: Local hospital used, patients normally taken there by watchmen.

Density: Apparently varies. Once 1016 was obtained while 10 days earlier 1020 was obtained.

Fresh Water: Available from barge whose capacity appears to be 150 tons. At least 24 hours notice necessary.

Fuel: Not available.

Repairs: Facility available but rates high.

Dry Docks: Hyundai Shipyard located at Ulsan builds VLCCs.

Watchmen: Essential on foreign vessels. Arranged by Agents.

Hatches: As per charter party but suggest use own crew as labour are only experienced with wooden hatchboards.

Repatriation: Usually done through Seoul which is about 5 hours away by bus. We changed Radio Officers and experienced no difficulty.

Telephones: Placed on board, but only for local calls via exchange.

Services: Only 1 ship chandler who handles everything including providing watchmen, laundrymen, etc.

Identity Cards: Shore pass issued for Ulsan valid for 3 days. To be renewed every fourth day. Usually done by watchmen who collect all passes and go to Immigration Office.

Surveyors: Lloyd's can be arranged from Busan.

General: Ulsan is a very busy port with a large amount of local and Japanese coastal traffic. Local Agents keep trying to shift bigger vessels ahead and astern to try and squeeze in small coasters. It is advisable to strictly adhere to the charter party rules at all times in this port to prevent delays and expense on vessel's account.

SHIPMASTER'S REPORT: May 1979 (Updated 1986).

Vessel: Summer d.w.t., 37,300; LOA, 194 m.; breadth, 28 m.; Summer draft, 36 ft.

Vessel loaded 30,000 tonnes of bagged fertiliser at No. 2 Berth using ship's cranes. The loaded departure draft was 33 ft.

Port Limits: As shown on Korean chart 119, arc passing through:

Lat. 35° 28′ 29″ N., Long. 129° 24′ 25″ E.
Lat. 35° 26′ 00″ N., Long. 129° 24′ 23″ E.
Lat. 35° 24′ 13″ N., Long. 129° 22′ 00″ E.

Documents: As per "Guide to Port Entry".

Pilotage: The Pilot was ordered through the Agent. The Pilot joins the ship in the anchorage from a white coloured pilot boat which has no VHF. A portable VHF is carried by the Pilot for communication with tugs and pilot station. Only 2 Pilots are on duty each day and there are no movements in port between 1900 hrs. and 0600 hrs. The standard of pilotage was good.

Anchorage: The Quarantine Anchorage as shown on Korean Chart 119 is centred on Lat. 35° 27′ 25″ N., Long. 129° 25′ 34″ E. (Radius 400 m.)

Depth in this anchorage is 33 m. to 47 m. This anchorage is outside the harbour limits. A good anchorage was found 1 mile N.E. of No. 2 Imodco Buoy in 24 m. A boat service is available from the anchorage.

Restrictions: No night movements.

Max. Size: Not known.

Health: As per "Guide".

VHF: "Ulsan Radio" maintains a listening watch on Channel 16, contact is made on this Channel then switched to a working Channel. This station is used for local calls only.

Radar: No port radar.

Tugs: There are 2 tugs available of unknown horsepower. The tugs join the vessel off the berth and use their own lines.

Berthing: No. 2 Berth: Length approximately 250 m. The depth alongside was 11 m. with 13 m. offshore, the density varied but averaged 1006. There are no fixed shore facilities at this berth and it appears that it is often used by car carriers.

Cranes: Stevedores have 100, 60, 30 and 10 tonne mobile cranes available.

Bulk Cargo: 30,000 tonnes of bagged fertiliser was loaded using 4 ships cranes. Cargo was delivered to the berth in trucks and made up into slings on the jetty. The loading rate was 700 tonnes per hatch/day.

Stevedores: Gangs should be ordered before 1400 hrs. the previous day. There are a limited number of gangs available. Normal working hours are from 0700 – 1900 hrs. with 1 hour break. It is possible to shift gangs to different hatches under certain circumstances and night working is possible but not advised as same men work through to next day. The standard of cargo handling equipment supplied by stevedores is good.

Medical: Medical treatment and hospital facilities are available.

Hatches: Hatches should be opened before stevedores arrive on board or waiting time is incured.

Fresh Water: Fresh water is available and is delivered by barge.

Repatriation: Repatriation was carried out via Busan about 2 hours drive away without any problems.

Airport: Nearest airport Ulsan, regular daily flights to Seoul.

Telephones: A telephone is placed on board which is for local calls only via exchange. Overseas calls can be made from shore, these calls are collect, person to person, only with a waiting time of 2 hours (approximately).

Identity Cards: A shore pass is issued for Ulsan which is renewed every fifth day, usually done by watchmen who collect all passes and take them to the Immigration Office.

Stores: There is only 1 ship chandler and all stores are ordered through him. The quality is poor and the prices high.

SHIPMASTER'S REPORT: Port of Onsan. March 1987.

This port is, to all intents and purposes, part of the Port of Ulsan – all services (tugs, Pilots, Agents etc.) – are from Ulsan.

The port itself consists of a dolphin jetty, with berths on both sides and is owned and operated by "Ssangyang Oil Co." (See B.A. Chart 898 (Ports on East Coast of Korea) "On San Hang").

Berthing/unberthing is during daylight only.

Normal berthing is on either side of the jetty, with ship's head to the N.E. (vessel swung before berthing). It is recommended that good moorings, and as many as possible are used, as the jetty is open to Easterly swells which are common during summer months.

No services are available at the berth. Any fresh water or bunkers come, by barge, from Ulsan.

Cargo Connections: There appear to be only 2 per berth (on our call we used 1×8 in. Chicksan attached to a flexible length of hose. Aft of the "deep sea" berths there are coaster berths which appear to have larger Chicksans.

Maximum draft on the berth is reputed to be 10.8 m.

Documents are as listed in the "Guide".

SHIPMASTER'S REPORT: April 1988.
Restrictions: Vessels carrying dangerous cargoes are not allowed to berth/unberth during hours of darkness.
Health: Quarantine deadline is 1700 hrs.
Currency: Currency Lists no longer required. Japanese Yen may be taken ashore.
Shore Leave: No restrictions.

AUTHORITY: Ulsan District Maritime & Port Administration, 139-9, Maeam-Dong, Nam-Ku, Ulsan, Korea 690. *Tel:* 0522-75-4881/3. *Telex:* K 53425 USPORT.

(b) YUKONG – SBM.

DOCUMENTS:

3 copies of Manifested Parcels on board.
3 copies of the Stores List.
3 copies of List of Narcotics on board.
3 copies of List of Arms and Ammunition on board.
3 copies of List of Vessel's Tobacco, Cigarettes, Spirits, etc.
13 copies of the Crew List.
3 copies of List of Crew's Personal Effects, Tobacco, Cigarettes, Spirits, etc.
Crew's Vaccination Certificates.
Derat Exemption Certificates.
Clearance from Last Port.
10 copies of List of Landing Passengers, if any.
10 copies of List of Passengers in Transit, if any.
3 copies of List of Passengers Baggage.

PILOTAGE: The seaward approaches to the Imodco Terminal mooring site are free of underwater obstructions, and existing landmarks and navigation aids are adequate. Depth of water not less than 65 ft. in approaches. The Imodco Terminal can be approached with the summit of Pongdae San bearing 333° true. When in position the following navigation fix will obtain at the mooring site:

Pongdae San (summit)	bearing 333° true	distance 2,915 yd.
Pongjin Hang Light (end of breakwater)	" 053° true	" 4,770 yd.
Chuck To (centre cut)	" 255° true	" 3,800 yd.

A good radar echo will be obtained from the tanks ashore at approximately 20 miles, the Imodco buoys at a distance of 8 miles, and the small buoys, marking the floating hose heading off the Imodco Buoy, at 1.5 miles.

Lights ashore, lights on the Imodco Buoys and on the small buoys appear to be unreliable.

After clearing Customs a Harbour Pilot will board the vessel to direct it to the buoy and conduct the mooring operations if required. There is no night mooring. However, unmooring is carried out during darkness as well as in daylight.

ANCHORAGE: Anchor the vessel about 1 mile S.E. of the buoy, if the weather permits. In this location it is less difficult to find vessel, when in fog. Do not anchor less than 1 mile from buoy, and under no circumstances can the anchors ever be used on approaching the buoy terminal, chain cables and pipelines are located at this site and anchoring is strictly prohibited.

RESTRICTIONS: No night mooring at any time at SBM. Unmooring possible at any time.

MAX. SIZE: Max. mooring capacity 325,000 d.w.t. Max. draft 64.5 ft.

HEALTH: Entry prediction to be supplied to Quarantine Authorities by vessel's Agent 24 hours before arrival. Master required to complete Health Declaration when officer boards on arrival. Free Pratique is automatic when coming from another Korean port.

RADIO: It is recommended that vessel communicates with Agent through Busan Radio or Ulsan Radio.

VHF: Communication available in Ulsan Port 24 hours a day.

"Ulsan Harbour Control" on Channels 14 and 16 for reporting vessel's arrival and departure.

"Ulsan Pilot" on Channels 13 and 16 and "Ulsan Port Radio" on Channel 16 for calling and working channels are Channels 24, 25, 26 and 27 for public messages.

TUGS: 2 workboats assist in mooring operations and 1 workboat assists with unmooring operation.

Workboats will join vessel about 1.5 miles East of No. 2 SBM.

BERTH DESCRIPTION: 2 berths at single buoy moorings.
Yukong Terminal No. 1 SBM:
Position: Lat. 35° 27′ 03″ N., Long. 129° 23′ 44″ E.
Max. Size: 200,000 d.w.t. – 312,000 d.w.t.
Depth: 23.0 m.
Max. Draft: 64.5 ft. (19.66 m.).
Description: A 12.5 m. diameter yellow buoy installed in August 1988.

2×16 in. hoses with length 980 ft. and 945 ft. respectively installed. The hose connections are made to the port manifold of the vessel only and lifted one at a time for connection to the ship's manifold. Each hose when full of oil is over 10.5 tons in weight.

Light: Gp. Fl. 4 yellow, 8 seconds. Visibility over 5 miles on radar.

Radar Reflector and Fog Horn: Radar reflector equipped, battery powered fog horn with a range in excess of 0.5 miles.

Yukong Terminal No. 2 SBM:
Position: Lat. 35° 27′ 03″ N., Long. 129° 23′ 44″ E.
Max. Size: 325,000 d.w.t.
Depth: 23.0 m.
Max. Draft: 64.5 ft. (19.66 m.).
Description: A 11.4 m. diameter yellow coloured buoy. Hose arrangement same as Buoy No. 1.

Lights: On buoy: Gp. Fl. Y. 6 secs. visibility over 5 miles. On hoses: 4 red winking marker lights equally spaced along the 980 ft. floating hoses, visible for 2 miles.

Fog Horn: A battery powered fog horn with a range in excess of 0.5 miles.

Weather: The berth is open to the weather and a short sharp swell is experienced when the wind is from the N.E.

BERTHING: 2 workboats (16 tons and 10 tons) are in attendance during mooring operations.

1 workboat will keep the hoses clear and the other handles the mooring ropes.

Both bow anchors are to be hove well up in the hawse pipes and properly secured before reaching the buoy.

Anchors are never to be used while at the buoy. They can foul buoy cables and pipeline on the bottom if released.

The vessel will be moored with chain (OCIMF recommended).
Onsan: See "Shipmaster's Report", dated March 1987, in Section (A).

HOSES: There are 2×16 in. hoses, 980 ft. and 945 ft. respectively in length. The hose connections are made to the port manifold of the vessel only and lifted one at a time to the ship's manifold. Each hose, when full of cargo is over 10 tons in weight.
Hose Mooring and Connection: Mooring and hose connection, disconnection will be carried out by Berthing Master and shore gangs, and while the vessel is at the buoy, 1 Berthing Master and 6 crew will remain on board during entire operations on the buoy. The vessel will be required to provide sleeping quarters and meals for them. They are mainly kept on board for emergency.

BUNKERS AND WATER: Available by barge at the anchorage. Bunkering is prohibited at SBM.

BALLASTING: After the vessel has discharged about half of her laden cargo, the vessel should be ballasted to a safe margin, to draw not less than 18 ft. forward.

This will avoid the vessel yawing widely on the buoy with strong winds and assist in avoiding contact with the buoy and hoses. Vessel will be moored at all times about 120 ft. from buoy.

REPAIRS/DRY DOCKS: All types of repairs possible at Hyundai Mipo Repair Yard, Hanjin Heavy Industry and Hyundai Heavy Industry. Seven docks available, largest being 380 m.×65 m.×12.7 m.

ENGINES: The ship's engines must remain ready with full power for immediate use and to keep the vessel a safe distance from the buoy. Any repair work or hot work prohibited without the Berth Master's permission.

CUSTOMS ALLOWANCES: One carton cigarettes or 1 lb. of tobacco, and one bottle wine or spirits allowed, each man.

REPATRIATION: Nearest facilities for crew repatriation are at Pusan.

HOLIDAYS: 1st, 2nd, 3rd January; 1st March; 10th March; 5th April; 5th May; 6th June; 17th July; 15th August; 1st October; 3rd October; 9th October; 25th December and New Year's Day, (Lunar Calendar Day 1st January); Buddha's Day (Lunar Calendar Day, 8th April); Moon Festival Day (Lunar Calendar Day, 15th August).

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Crew required to carry valid identification cards at all times.

REGULATIONS:

Notice to Vessels Arriving at Yukong Limited – IMODCO Buoy Terminal at Ulsan

In the interest of your vessel and Yukong IMODCO buoy we wish to bring to your attention the peculiarities that are most likely to occur while your vessel is moored to this terminal for discharge of cargo.

The buoy in its location is subject to wind, sea and tides and although the weather here is generally favourable we find that during each change of tide the vessel is quite frequently inclined to ride up on the buoy.

Our past experiences have taught us that *the best way to avoid this hazard is by use of the vessel's engine. In this instance we will require the co-operation of you and your officers.* The Berth Master who will assist you in mooring will also remain with the vessel throughout its entire discharge.

Tide or wind changes may cause the ship to ride up against the buoy. *In this case the Berth Master will anticipate the ship's movements and advise a dead slow bell astern to avoid ship's contact with the buoy. When the tide or other condition has again resumed its normal trend your engineers will be notified that the Berth Master is finished with the engine.*

During this period while the ship's engineer is on stand-by, one of your deck officers will be required to stand-by on the bridge, to pass the engine order from the Berth Master, who will be stationed on the ship's bridge to observe and direct this operation. The SBM's crew will stand-by at ship's bow and will inform of ship's movements to the Berth Master.

The seaward approaches to the Yukong Ltd. IMODCO terminal mooring site are free of underwater obstructions. Depth of water is more than 64.5 ft. in the approaches. Existing landmarks and navigation aids are adequate (Chart No. 119, published by H.O. of Korea is useful). A good radar echo will be obtained from the radar reflector located at buoy body.

Do not anchor within one mile of buoy and under no circumstances can anchors ever be used on approaching the buoy site and anchoring is strictly prohibited.

Vessels should be anchored 1.5 miles East of No. 2 IMODCO buoy where the vessel could be in sight of shore people and the people can board ship safely. Vessel should not be confused with the Yukong No. 2 Buoy and Ssangyong Refinery Buoy, which is located at Lat. 35° 25′ 13.5″ N., Long. 129° 23′ 08.5″ E. on the South side of Yukong No. 2 Buoy.

Use of Korean Government Pilots is compulsory. They will board the ship in daytime within the anchorage and before commencement of mooring operations. *There is no night-time mooring. Vessel unmooring is carried out day or night upon completion of cargo discharge.*

The Berth Master will board the ship while at anchorage and will take charge of mooring the vessel to the IMODCO buoy. He will be stationed at the ship's forecastle during mooring.

Two tugs assist with mooring and one tug with unmooring operations. Two launches are in attendance, one launch will keep the hose string free of the vessel while the other launch handles the mooring ropes during mooring operations. If the bight of the floating hoses protrudes a considerable distance beyond the buoy, the above hoses will be tended to avoid fouling the mooring buoy system while unmooring.

In the event it becomes necessary to vacate the buoy due to inclement weather or any other emergency, we caution you not to turn the propeller because it may foul hoses drifting near the ship's stern. A boat in attendance will tow the hoses away and clear of your vessel so that the ship's propeller can be used.

To avoid undue strain on the buoy, anchors, floating hoses, mooring ropes and chains, it will be necessary to ballast your vessel while on the buoy. Approximately 40% of her deadweight may be required as ballast to prevent undue strain on the buoy system. Dirty ballast tanks should be selected before hoses are connected to the manifold so that discharge of cargo and ballasting can be carried out simultaneously without contamination of cargo. The vessel will moor about 120 ft. from the buoy which will assist in avoiding contact with the buoy.

When the cargo has been discharged, your tanks inspected and found dry and the hoses disconnected, we will then request that you vacate the buoy mooring. If you desire to take on ballast or more time is required to complete your vessel's business you may go to anchorage to do so.

Yukong Limited will provide you with a copy of our crude oil unloading procedures which provides information and instructions for safe unloading of the crude oil cargo. It will be necessary to release tank inert gas pressure after the tugs have left. *The Yukong procedure specifies certain methods for gauging, water cut, temperature reading, sampling cargo and calculation of cargo. These procedures will be strictly followed by the Cargo Inspector together with Surveyor.*

If a VLCC is going to carry out crude oil washing, her equipment must satisfy Ulsan open sea buoy's crude oil washing regulations and peculiarities. Crude oil washing can be done under ship's responsibility and she must confirm to Yukong Ltd. not less than 7 days before her arrival that vessel's crude oil washing system is operational. Yukong Ltd. crude terminal provides booster pump to increase pumping rate, also an in-line sampler is installed in the shore line to monitor BS&W plus crude oil contamination with water.

The Berth Master is responsible for carrying out terminal's cargo unloading procedures. The Cargo Inspector will be on board for cargo inspection and will carry out cargo gauging and inspection of cargo compartments. Yukong Inspectors will also be on board prior to cargo unloading for sampling of cargo. Slop oil and BS&W shall be substracted from the quantity of cargo. When the Cargo Inspector is satisfied that all obtainable crude oil cargo is discharged to shore tanks, he will inspect the ship and sign the ship's empty and dry certificate along with the appointed ship's officer and the independent Surveyor.

Health: ETA to be supplied to Korean Quarantine Authorities by the vessel's Agent 24 hours before ship's arrival. The Ship's Master is required to complete the Health Declaration upon arrival of the Korean Quarantine Officer. Free Pratique is automatic when the ship is coming from another Korean port.

Radio: It is recommended that the Master communicates with the ship's Agent through Pusan Radio, which covers Ulsan port.

VHF communication is available in Ulsan port 24 hours/day, every day. Call sign "Ulsan Port Radio", calling Channel 16, working Channels 25, 26, and 27. A small walkie-talkie can communicate with the shore by the attendant launch. Pilot office: Tel: 72-7703/0419. Sunjin Tugs Co. Tel: 72-1278.

Ship's Repairs: Possible if arrangements with local shipyards are made prior to the vessel's arrival at Ulsan.

Identification Cards: Seaman's Book is sufficient, a ferry boat operates at all times.

SBM Team of Stand-by Men: While the ship is on the buoy, the vessel should provide sleeping quarters and linen for 8 men, this includes one Berth Master and Cargo Inspector. The stand-by men connect and disconnect hoses, clear floating hoses when necessary and are mainly kept on board for emergency purposes. Under certain conditions should it become necessary, they may ask the vessel for meals.

Safety: All ships and their Agents or concerned persons shall follow good safety practices including, in particular, but not limited to, those described in the International Oil Tankers of Terminal Safety Guide as issued by the OCIMF.

1. The vessel's personnel are responsible for the safety of the vessel and must take all necessary precautions, whether or not so advised by the Berth Master, bearing in mind the weather conditions, or any other circumstances requiring special care or attention.
2. While the vessel is moored or within the vicinity of moorings, all vessel's personnel and vessel's operations must comply with or be in accordance with the following safety rules:
   The ship's engines must remain ready with full power for immediate use.
   Not less than one deck officer and two seamen shall be available on deck at all times while vessel is in the moorings.
   Power must be available at all times on all deck winches and on anchor windlass during vessel's stay at the buoy.
   A good floodlight will be required to illuminate the area around the submarine and cargo hose connections during cargo transfer operations.
   During the discharge of ballast at night, the sea area around the vessel must be adequately lighted.
   Engine repair work is prohibited without the Berth Master's permission.
   Hot work is strictly prohibited while cargo is being discharged.
   Laundry service is available if requested prior to ship's arrival.

General: Many ship repair parts and equipment are obtainable in Pusan, located some 40 miles away from Ulsan. Allow about 4 hours for their procurement.

OPERATOR: Yukong Limited, 26-4 Yoido-Dong, Youngdungpo-Gu, Seoul, Korea 150. (Postal Address: Yoido P.O.Box 548, Seoul, Korea). *Tel:* (02) 784-0051. *Telex:* OILKOR K23654. *FAX:* 82-2-784-6075. *Contact:* H.B.Shim, Assistant Manager, Crude Oil Operations Section.

YOSU (including Kwangyang): 34.44 N. 127.45 E. (See Plan)

(A) CRUDE WHARF, HONAM OIL REFINERY
(B) PRODUCT WHARF, HONAM OIL REFINERY
(C) NAKPO WHARF, BERTHS NO. 1, 2, 3, 4 AND 5
(D) PIER, LUCKY ADVANCED MATERIALS
(E) DRY CARGO, YOSU HARBOUR
(F) YOSU ENERGY
(G) KWANGYANG STEEL MILL, RAW AND PRODUCTS BERTHS

DOCUMENTS:
Last Port Clearance.
Register.
13 copies of Crew List.
12 copies of Passenger Manifest.
3 copies of Stores List.
3 copies of Bonded Store List.
3 copies of Arms and Ammunition List.
3 copies of Livestock List.
5 copies of Cargo Manifest.
1 copy of Vaccination List showing dates of last yellow fever vaccination, etc.

PILOTAGE: There are 2 pilot stations. Pilot station for vessels of less than 30,000 g.r.t. is located at Lat. 34° 44′ N., Long. 127° 49′ E., and for more than 30,000 g.r.t., such as crude tankers, is located at Lat.34° 39′ N., Long. 127° 58′ E.

RESTRICTIONS: 2 overhead power cables with clearance of 27 m. and 39 m. respectively in approximate position: Lat. 34° 44′ N., Long.127° 45′ E.

HEALTH: Before proceeding to respective berth vessels must anchor at the Quarantine Station to obtain Free Pratique.

RADIO: Yosu Port Radio Station, call sign 6MYS, operates on 500 kHz on 24 hour service.

The station's range is about 100/150 nautical miles and it is recommended that tanker Masters should contact the station giving their ETA at the pilot station.

Vessels calling at Yosu must cable the exact time of arrival at the pilot station to ship's Agent and Harbour Pilot's office. VHF Radio for calling Agent is Channel 16, name Agent and switch to Channel 26 to talk.

TUGS: 3×4,200 h.p., 4×3,000 h.p., 1×2,000 h.p. and 5×1,000 h.p.

MEDICAL: ETA to be supplied to quarantine authorities by vessel's Agent 24 hours before arrival. Master required to complete Health Declaration when officer boards on arrival. Free Pratique is automatic when coming from another Korean port.

There are medical facilities in Yosu town. Inoculations and vaccinations can be arranged by the quarantine doctor.

The Quarantine Stations are located at Lat. 34° 42.5′ N., Long.127° 52.7′ E., for deep drafted vessel and Lat. 34° 45.2′ N., Long.127° 46.3′ E., for less drafted vessel. The Quarantine inspection can be made at other than the above location depending on the situations. The inspection takes place during daylight.

DENSITY: 1025.

FRESH WATER: Fresh water is available for delivery to ships.

FUEL: Bunkers available by barge, subject to advance notice being given.

REPAIRS: There are repair facilities in Yosu.

CUSTOMS ALLOWANCES: One carton cigarettes or 1 lb. of tobacco, and one bottle wine or spirits allowed, each man.

REPATRIATION: Crew changes or repatriation can be arranged.

HOLIDAYS: 1st, 2nd and 3rd January, 1st March, 10th March, 5th April, 5th May, 6th June, 17th July, 15th August, 1st October, 3rd October, 9th October, 25th December. 1st January (Lunar Calendar), 8th April (Lunar Calendar), 15th August (Lunar Calendar).

SHORE LEAVE: Shore leave for ship's personnel is arranged by ship's Agent and the local authorities.

IDENTIFICATION CARDS: Crew required to carry valid identification cards at all times.

CHARTS: Republic of Korea H.O. Charts No. 209, 241 and 242.

(A) CRUDE WHARF, HONAM OIL REFINERY

GENERAL DESCRIPTION: The crude wharf is located at Lat. 34° 51′ N., Long. 127° 46′ 55″ E. running in a 336°/156° direction.

APPROACHES: En route to the wharf, at approximately Lat. 34° 47.3′ N., Long. 127° 48.8′ E. vessels pass narrowest part of channel, Sam Gi, which has about 22.5 m. depth of water at MLLW, and marked by 5 light-buoys and one lighthouse. The course is laid midway between the 5 buoys.

PILOTAGE: Pilot station for crude tankers is located at outer harbour in positon: Lat. 34° 39′ N., Long. 127° 58′ E. in the vicinity of Tae Do Island, where the Harbour Pilot boards to lead the vessel to Quarantine Anchorage.

RESTRICTIONS: Berthing and operating restrictions are as follows:

1. Maximum approach angle: 10°
2. Maximum approach velocity: 0.15 m./sec.
3. Maximum current speed: 2.1 m./sec.
4. Winds
   - (a) Non-operating conditions
     Maximum design velocity 38 m./sec.
   - (b) Operating Conditions (Moored at berth)
     Maximum sustained velocity 18m./sec.
     Maximum instant gust 27 m./sec.
   - (c) Maximum berthing wind velocity
     13 m./sec. of Southerly wind
     15 m./sec. of Northerly wind

MAX. SIZE: Crude Wharves No. 1 and 2:

Maximum crude carrier:	285,000 d.w.t.
Maximum products carrier (Clean):	80,000 d.w.t.
Maximum draft:	21 m.
Minimum crude carrier:	80,000 d.w.t.
Minimum products carrier (Clean):	30,000 d.w.t.

HEALTH: Normally vessels who could not be granted Radio Pratique anchor at the Quarantine Station which is located at around Lat. 34° 42.5′ N., Long. 127° 52.6′ E. At this anchorage, Quarantine doctors come on board. After quarantine inspection, the vessel should have port clearance of Customs, Immigration and so on.

BERTHING: *Approaching the Wharf:* It will be normal tanker practice that all tankers be berthed bow seaward to ensure a quick and uncomplicated departure in the event of an emergency. Main conditions for following this practice are as below:

1. Natural environment's conditions to be favourable.
2. Early passage of Sam Gi Channel prior to high tide to meet slack tide while berthing.
3. Vessel should swing to the North of Crude Wharf with the assistance of tug-boats and approaching course will be about 160°.

When the above is impracticable due to the limited effective manoeuvring space in the vicinity of the wharf, vessels will approach almost parallel to the wharf whose direction is about 336°.

All tugs will come alongside to the vessel's bow, mid-ship and quarter at No. 3 Buoy. At about half mile off the wharf, the vessel's speed should be 2 knots and when abreast of the wharf, the vessel should be stopped. When stopped, the abreast distance between vessel and wharf should be about 100 m. – 200 m.

Abreast distance will be reduced with the assistance of tugs. Closing speed must be 10 cm./sec. or less at a distance of 20 m. and less than 5 cm./sec. at a distance of 3 m. between the vessel and wharf. Distance and speed for both bow and stern will be displayed on the gangway tower of wharf upon vessel reaching about 160 m. from wharf.

Mooring: The wharf has 8 dolphins for mooring VLCCs as shown in the "Plan Section". Nos. 1 and 4 dolphins are to be used for head and stern lines, Nos. 2 and 3 for breast lines, and Nos. 5, 6, 7 and 8 dolphins for fore and aft spring lines. Each dolphin has quick release hooks with a capstan and about 100 m. of 3 in. messenger lines to pick up mooring wires/ropes.

To monitor tanker approach, the wharf is equipped with docking sonars which detect distance and approaching speed, which are also displayed on top of the gangway tower with visibility of about 200 m.

Line handling service agency will render services to handle lines on the wharf. The agency will provide 2 launches relaying mooring lines from berthing vessel to the wharf and 9 men including a chief in charge of the team hooking mooring lines to the dolphins.

About 20 mooring lines for 200,000 d.w.t. tanker are required. Type and quality of mooring lines are in accordance with ISGOTT paragraph 3.3.3 – i.e. "Preferably the mooring lines used to secure the tanker should all be of the same materials and construction. Wire ropes are recommended especially for larger tankers as they limit the tanker movement at the berth. Moorings composed entirely of fibres, especially synthetics, are not recommended as their high elasticity can allow excessive movement due to strong wind or current forces or passing ships. Wire ropes and fibre ropes should never be used together in the same direction because of the difference in their elastic properties".

Vessel puts out springs first, then breast lines and finally head or stern lines or vice versa. Normally breast and long lines will be relayed by launches to the wharf. While making fast spring lines, vessel should adjust centre of her manifolds to wharf loading arms at the request of shore operator. Vessels should be held tightly to breasting dolphins with the assistance of tug-boats, mainly by tug stationed midship, until mooring has been completed.

Anchoring in the vicinity of the wharf is not allowed except in an emergency.

Unberthing: Tugs will be stationed on seaward side of the vessel's bow, midship and quarter as necessary and will push the vessel so as to hold the vessel tightly to the breast dolphins while letting-go all mooring lines. Sequences of letting-go lines is the reverse of mooring. Therefore, long head and stern lines let go first, breast next and springs last.

DISCHARGING: *Prior to arrival:* Prior to arrival at the wharf, vessels should stand-by/warm-up her cargo pumps and designate 3 manifolds which are convenient for unloading cargo. The designated manifolds should be marked by rags or other materials so as to be able to identify them easily from the wharf and adjust the vessel's position correctly to loading arms of the wharf. All the vessel's manifolds should be kept blinded until vessel is moored. Also, all crude oil tankers must be equipped with 16 in. ASA type flanges on her manifolds.

Connection of hoses: Discharging arms are as follows:

Berth No.1: 3×16 in.
Berth No.2: 3×16 in. flanged for crude oils.
2×12 in. flanged for products (clean).

After completion of berthing, terminal representative and wharf operators will come on board and check readiness to connect discharging arms, fire fighting equipment, drip pans and oil removing materials. The 3×16 in. discharging arms for crude oil are rotary counter-weighted marine arms with hydraulic quick connect couplings. Remote controlled hydraulic positioners are provided and wharf operators will position and connect the outboard flanges of the arms to the tanker manifold. The vessel's crew, consisting of one responsible officer and 4 other crew, standby at the manifolds, prepare manifolds to be used, and co-ordinate with wharf operators in adjusting, connecting and securing discharging arms.

Operating Envelope: The unloading arms have been designed for an operating-height envelope that accounts for the elevation changes due to tide and varying freeboard of the largest and smallest tankers for which the wharf is designed. The 16 in. unloading arms will accommodate a maximum 255,000 d.w.t. tanker and a minimum 80,000 d.w.t. tanker, or heights of 26.3 m. to 5.2 m. above the lowest water level. The 12 in. unloading arms will accommodate a maximum 80,000 d.w.t. tanker and a minimum 30,000 d.w.t. tanker, or heights of 19.6 m. to 4.6 m.

A longitudinal drift of ±5.0 m. and a lateral drift of ±4.57 m. have been allowed for both sizes of unloading arms.

Rates and Pressure: After hoses have been connected, all shore valves will be opened and vessel's Chief Officer informed of shore readiness. Vessel will open all valves necessary to discharge except manifolds' valves which will be opened just prior to start of discharge.

After confirming that the cargo is flowing into designated shore tank, tanker rail pressure for all vessel sizes shall be 140 p.s.i.g., and maximum discharging rates are:

Arab Medium Crude Oil	70,000 b.p.h.
High Pour Low Sulphur } Crude Oil	40,000 b.p.h.
Naphtha	30,000 b.p.h.

Crude Oil Washing (COW): Crude oil washing of cargo tanks using fixed tank washing machines in conjunction with fully inerted gas tanks is permitted on Master's acceptance of Honam Oil's conditions to carry out COW at the crude wharf which will be delivered to the vessel. The vessel requiring COW should notify it to Honam Oil in advance together with the information of previous COWs conducted and COW schedules to be carried out.

BALLAST: The ballasting operation should be discussed and agreed with the terminal representative regarding the approximate time of commencement and duration of ballasting both into permanent ballast tanks and cargo tanks.

To obtain quick turn around, the terminal encourages simultaneous handling of cargo and ballast, other than permanent ballast, if the vessel is so equipped. Ballasting should be minimum after discharging cargo.

FRESH WATER: Not available.

FUEL: Not available.

SERVICES: Honam Oil provide the following services: Telex service every day from 0800 hrs. to 1800 hrs., except Saturdays when service is available from 0800 hrs. to 1300 hrs., and no service on Sundays and holidays.

Telephone service every day from 0800 hrs. to 1900 hours.

A list of emergency telephone numbers will be available at the wharf.

AUTHORITY: Honam Oil, Yocheon Refinery. *Tel:* 80-2114. *Telex:* 66762. *FAX:* 82-2228.

Head office: Seoul. *Tel:* 787-1114. *Telex:* Honam K-27234 or K-23261. *FAX:* 787-6051, 785-5451.

(B) PRODUCTS WHARF, HONAM OIL REFINERY

APPROACHES:

Navigation: The route for product tankers up through to Yosu Gulf is easy, without any navigational hazards. After passing the Nak-Po, vessels will steer in a Northwesterly direction for about one nautical mile and then Westerly, keeping within the 10 metre contours.

There are 10.5 metres' shallows at approximate LLW along Myodo Sudo, so vessel's draft limit to pass this channel on high tide will be up to 10.5 m. or more, depending upon tidal rises and in accordance with OCIMF.

The hydrographic charts for navigation and approaching to the Product Wharf area have been published by the Republic of Korea Hydrographic Office.

Approaching and mooring to the Wharf:

a. Pilotage is compulsory for vessels over 1,000 gross tons in accordance with Yosu Port Rules. Tankers calling at the Product Wharf of Honam Oil for loading or unloading products should notify the latest ETA by radio to Port Authority and related Agents for Pilot.

b. The direction of tidal current stream in the vicinity of the wharf is nearly rectilinear and parallel to the wharf, running about 272° on flooding and 084° on ebbing at about 3 knots, the tidal range between maximum high and low water is about 4.0 m. The duration of ebb/flood is about 6.75 hours and 5.5 hours respectively.

c. Vessels are to be berthed with bow to seaward whenever possible, in order to facilitate unberthing as quickly as possible when an emergency situation arises. Use of anchors is not allowed while berthing, except in an emergency.

RADIO: See "Radio" in section "A".

BERTHING: *Product Wharf:* The Product Wharf is located in approximate position Lat. 34° 51′ 40″ N., Long. 127° 44′ 10″ E.

The Product Wharf is designed to accommodate 7 tankers simultaneously. Berths No. 1 and No. 4 for approximately 5,000 d.w.t., Berth No. 2 for 2,000 d.w.t., Berth No. 3A for 35,000 d.w.t., Berth No. 5 for 50,000 d.w.t., Berth No. 6 for 5,000 d.w.t. and Berth No. 7 for 6,000 d.w.t. tankers, respectively.

The wharf is designed to moor and unmoor tankers on a 24 hour basis, depending on the tidal conditions at the time and the Master's judgement. The illumination for night work is satisfactory.

Cosmos Wharf: There is one berth located in position Lat. 34° 51′ 20″ N., Long. 127° 42′ 45″ E., designed to accommodate LPG and Chemical vessels of less than 5,000 d.w.t. Shallowest depths of water in the approach channel and wharf area are 3.2 m. and 6.2 m. respectively. Therefore, vessels approaching the wharf should choose high tide to pass through this channel. Illumination for night work is excellent.

Berth Assignment for Loading/Unloading: Berths will be assigned to the vessel after review of the vessel's size and types of product to be loaded. The berth designations will be advised in advance, to the vessel through vessel's Agent.

Flanges: Honam Oil Refinery Wharves are equipped with ASA type flanges for loading arms and hoses.

LOADING:

Supervision: All cargo operations of loading, unloading, switching of tanks and topping-off should be supervised by a ship's responsible officer, and sufficient personnel should be on deck at all times to attend to the loading and/or unloading operations.

Loading Arm/Hose Connection: It is Honam Oil Refinery's policy that vessel's crew shall be responsible for connecting/disconnecting loading arm/hoses to and from vessel's manifold. Also proper reducers and elbows to fit to wharf loading arm couplings must be connected and disconnected by ship's crew. Wharf operators are always on watch to handle loading arms and winches for loading hoses.

Sequences: After mooring at the berth, Honam Oil Wharf Operators will come on board and check readiness to connect loading arms, fire fighting equipment, oil drip pans or oil removing materials. When the vessel is in all respects ready to connect loading arms/ hoses, the following loading procedure will apply:

a. The loading arms/hoses will be swung on board the vessel.
b. Connect loading arms/hoses by vessels's crew.
c. Notice must be given by the vessel to the wharf shift foreman one hour before the vessel completes deballasting.
d. Loading will be commenced by gravity. When the vessel advises wharf operator that the cargo is flowing into vessel's tanks, the loading rate will gradually be increased by pumping until the desired rate has been reached.
e. The vessel must give 30 minutes' notice to the wharf operator before starting "top-off", and shall advise if a decreased rate is desired.
f. The vessel must give 15 minutes' notice to the wharf operator prior to completion of loading at which time the wharf operator may reduce loading rate and/or stop loading pumps.
g. Ship's valves shall not be closed while loading pump is operating.
h. On completion of loading, loading arms/hoses must be drained and disconnected immediately. Samples must be taken upon completion of loading.

Loading Rates: The loading rates vary and depend upon kinds of products, sizes of loading arms and pipe lines, vessel conditions, etc. Detailed loading rates will be determined by close co-ordination between responsible vessel's officer and the wharf operator.

Each berth is equipped with counter weighted marine loading arms. Sizes of these arms' flanges are 6 in., 8 in., 10 in. and 12 in. ASA.

Deballasting: The discharge of dirty ballast within the territorial waters and entrance is strictly prohibited. Shore facilities for disposal of dirty/ oily ballast water is available at Honam Oil Refinery. The deballasting operation should be discussed and agreed with the Product Wharf representative regarding the approximate time of commencement, duration of deballasting and kind of ballast oil.

FRESH WATER: Vessels requiring fresh water request required amount of water to ship's agent in advance.

REPAIRS: There are no repair facilities and also repairs are not allowed on the product wharf. In the event of emergency cases, Honam Oil will assist in carrying out repairs under the supervision of refinery's safety personnel to expedite vessels from the wharf and a quick turn around.

AUTHORITY: Honam Oil Refinery.

(C) NAKPO WHARF, NAMHAE CHEMICAL CORPORATION

A straight berth which could accommodate one 50,000, one 30,000 and two 20,000 d.w.t. vessels is located at about Lat. 34° 51′ 40″ N., Long. 127° 44′ 40″ E. The wharf is handling raw material by 800 tons crane and product of fertiliser by 300 tons crane.

(D) PIER, LUCKY ADVANCED MATERIALS, INC.

Located close to the product wharf of Honam Oil Refinery at about Lat. 34° 51′ 30″ N., Long. 127° 44′ 05″ E. Maximum vessel size and draft are about 4,400 d.w.t. and 5.5 m. respectively.

(E) DRY CARGO, YOSU HARBOUR

PIERS: 3 piers are located in Yosu town at about Lat. 34° 44.3′ N., Long. 127° 45.3′ East and consist of No. 1, No. 2 and No. 3 Piers.

RESTRICTIONS: No. 1 Pier is used for only small vessels. No. 2 Pier for vessels of less than 20 ft. draft and max. draft at No. 3 Pier is 26 ft. At anchor draft up to 35 ft.

CARGO-HANDLING FACILITIES: Crane barge of 30 tons capacity is available.

(F) YOSU ENERGY

LOCATION: 34° 51′ 38.96″ N., 127° 46′ 10.91″ E.

BERTH:

(1) Principals:

Max. size: 75,000 CBM., LOA 230 m.
Max. draft allowable: 13 m.
Required minimum U.K.C.: 2.5 m.

(2) Operating Condition:

(a) Allowable conditions for mooring:

Max. Wind Speed	*Wind Direction*
13 m./sec.	Southerly
15 m./sec.	Northerly

Max. wave height: 1.64 m.
Approach speed: 0.15 m./sec.
Tidal time for mooring: Mooring at slack tide.
Tugs will assist with berthing when strong tidal current.
Time limit: Berthing operation only carried out in daylight.

(b) Circumstances where unloading is not allowed:

Wind Speed: Over 18 m./sec.
Max. wave height: 0.93 m.
Speed of tidal current: Tugs will assist with berthing when there is a strong tidal current.
Time Limit: No restriction.
Other conditions: (1) Lightening.
(2) Lack of proper safety plan and safety regulations on board.

SHORE CONNECTION: For LPG tanker, cargo operation and shore facilities.

(1) Shore Connection: (P: Propane, B: Butane, L: Liquid, V: Vapour)

(a) Arrangement as seen from seaward (from right to left): BL, BV, PV, PL.

(b) Specification:

Standard of Flange	12 in. ASA 150	8 in. ASA 300	8 in. ASA 300	12 in. ASA 150
Use	BL	BV	PV	PL
Range of temperature	−9°C/0°C	−9°C/5°C	−50°C/5°C	−50°C/−30°C
Max. press.for operation	10 kg./sq.cm	5 kg./sq.cm	5 kg./sq.cm.	10 kg./sq.cm
Max. flow rate	2200 cu.m.p.h.	2200 cu.m.p.h.	2200 cu.m.p.h.	2200 cu.m.p.h.

(c) Movable range:

Limit angle: 60°
Max. distance for angle of depression: 0.9 m. – 10.6 m.
Height above sea level: 22 m. (Mean sea level)

(d) Required ship's manifold position:

– Distance between bow/stern and manifold: About 110 m.
– Distance between side plating and manifold: Minimum 1.0 m.
– Height above sea level: 20.5 m. (Mean sea level)
– Distance between each centre of flange: 2.0 m.

(e) Size and number of reducers with onshore facilities:
2×10 in. ASA 150 and 2× 8 in. ASA 300.

(2) Cargo Operation:

(a) Requirements of ship's cargo tank and liquid line for discharging:

	Propane	*Butane*
Tank pressure:	Not exceeding 0.25 kg./sq.cm.	Not exceeding 0.25 kg./sq.cm.
Line Temperature:	Not exceeding −42°C	Not exceeding −5°C

(b) Procedure for purging and cool down for connection (Arm and unloading line):

Procedure for purging before: 3 – 5 times vent with shore vapour.
Procedure for purging after: 3 – 5 times loading arm flushing with ship's hot gas.
Procedure for cool down: Not required.

(c) Procedure and Rate of Discharging:

	Series Discharging		*Parallel Discharging*	
	Propane	*Butane*	*Propane*	*Butane*
	(cu.m.p.h.)			
Rate at start	500	500	500	500
Average Rate	1,200	1,200	1,200	1,200
Max. Rate	2,000	2,000	2,000	2,000
Rate of Finish	500	500	500	500
Vapour Return from Shore	6.9	8.9	6.9	8.9

(d) Discharging quantity for B/L: Ship's calculated figure.
(e) Circumstances when unberthing is requested:
- Wind speed: Over 30 m./sec.
- Wind direction: N.W., S.W.
- Max. wave height: 1.64 m.
- Other Conditions: (1) Typhoon.
  (2) In case of emergency.

MOORING:
(a) Required numbers and quality of mooring ropes:

Fore lines:	4 wire and P.P. ropes.
Fore breast lines:	3 ,, ,, ,, ,,
Fore spring lines:	2 ,, ,, ,, ,,
After lines:	4 ,, ,, ,, ,,
After breast lines:	3 ,, ,, ,, ,,
After spring lines:	2 ,, ,, ,, ,,

(b) Additional mooring ropes from shore: None.
(c) Gangway: Shore gangway will be used.
(d) Ship's derrick: To be kept on stand-by.
(e) Indication of ship's manifold position: Required.
(f) Mooring facilities – requirements:
- Types of bitts: Quick release hooks.
- Distance between bitts: 50 m. (average).
- Location and types of oil fence: Not available.
- Availability and location of speedmeter for approaching speed: Docking sonar on No. 1 breasting dolphin.
- Place for bonding cable: Not necessary.

(g) Operation system at berth:
- Mooring personnel: At the bow: 5 persons.
  At the stern: 5 persons.
- Connection of arms: 5 persons.
- Required time: 15 minutes for each arm.
- Disconnection of Arms: 4 persons.
- Required time: 15 minutes for each arm.
- Unmooring Personnel: At the bow: 3 persons.
  At the stern: 3 persons.
- Communications: Shore can supply a walkie-talkie.

(h) Disaster prevention system:
- External System: None
- Internal System: Emergency shut down system.
  Fire fighting system (fire hose).
- Disaster prevention facilities at the berth: E.S. system – fire fighting system (monitor).
- Availability of sea water pollution prevention facilities: None.

SHORE FACILITIES:
(a) Shore liquid lines: (Distance from tank (heater) to ship's connection, diameter and max. pressure).
- Propane: 1,600 m. (600 m.) – 18 in. – 23 kg./sq.cm.
- Butane: 1,800 m. (600 m.) – 18 in. – 14 kg./sq.cm.

(b) Flare stack capacity: Nil.

SUPPLIES AND SERVICE:
(1) Drinking water and bunkers:
(a) Supply place: Yosu Anchorage.
(b) Method of supply: Barge.
(c) Advance notice: Advise Agent.
(d) Average rate: Bunkers: 100 – 200 t.p.h.
Water: 800 tons per day.

(2) Provisions:
(a) Available.
(b) Method of supply: From barge.
(c) Advance notice: Advise Agent.
(d) Kind of provisions available: Meat, fish, vegetables, etc.
(3) Medical:
(a) Preventive injection: Cholera available.
(b) Advance notice: Advise Agent.
(4) Landing: Possible.
(5) Ship's repairs availability:
(a) Hull
(b) Machinery } Only at anchorage.
(6) Surveyor/Diver: Available.

BERTH SAFETY REGULATIONS:
Pier I: (Ocean and Coastal Tanker).
(1) Vessel size:

Ocean:	Max. 75,000 CBM.
	Min. 30,000 CBM.
Coastal:	Max. 3,500 CBM.
	Min. 1,000 CBM.

Pier II: (Only Coastal Tanker).
(1) Vessel size – Max.: 3,500 CBM.
Min.: 1,000 CBM.
(2) Loading Arms:
2 self-standing for liquid LPG, equipped with 8 in. ASA 300 RF manual quick release couplings.

(G) KWANGYANG STEEL MILL, RAW AND PRODUCTS BERTH

LOCATION: 34° 54′ N., 127° 45′ E.
GENERAL: Port under construction.

Pohang Steel Co. discharge will handle vessels of 250,000 d.w.t. at a 900 m. length berth with depth of 20 m. The loading berth of 700 m. will accept vessels of 50,000 d.w.t.

2×2,000 t.p.h. grab unloaders and 1×2,000 t.p.h. shiploader will be available in the initial stages.

A 280 m. long quay is to be constructed to accommodate container vessels up to 50,000 d.w.t. Container handling equipment and other facilities will be available.

SHIPMASTER'S REPORT: July 1988.
Pohang Iron & Steel Company's complex is built on about 9 square kilometres of reclaimed land on the North side of Kwangyang Hang. It started production in May 1987 and at present manufactures about 5.5 million tons of steel products annually, with 8 million tons planned for 1991. The wharf fronting this area runs in a 101°/281° direction with an eventual length of 5.4 km. by 1991.

At the Eastern end a causeway running North and South has been built connecting Chijin Do Island with the complex.

Charts: B.A. Chart No. 3391. Korean Chart No. 241.
Documents:
10 copies Crew List.
5 copies Stores List.
5 copies Personal Effects List.
3 copies Arms & Ammunition List (See "Notice").
3 copies Narcotics List.
2 copies Ports of Call List (previous 3 months).
5 copies Cargo Manifest.
5 copies Through Manifest (where applicable).
1 copy Maritime Declaration of Health.
Last Port Clearance.
Ship's Register.
Derat Exemption Certificate.

Pilotage: There are 5 licensed Pilots available at the present time. Vessels exceeding 30,000 g.r.t. embark their Pilots at 34° 39′ N., 127° 58′ E., and vessels under 30,000 g.r.t. at 34° 39′ N., 127° 29′ E. Pilots should be contacted on VHF Channels 16 and 14, 2 hours before arrival. This message should be repeated to Yeosu Harbour Control at the same time. There are no overhead power lines or bridges in the buoyed channel, but many fishing vessels operate in the area and they are usually cleared out of the way by a tug steaming ahead of the ship from the Quarantine Anchorage to the berth. When in ballast southbound, the Pilot leaves in the vicinity of the Quarantine Anchorage and the ship should stay outside the buoyed channel.

Anchorages: Large vessels are usually instructed by Yeosu Harbour Control to anchor in the vicinity of Tae Do Island, there is plenty of water and good holding ground (mud) here. The Pilot takes the ship up to the Quarantine Anchorage for Clearance by Port Officials from Yeosu. No mail is delivered unless requested. No Radio Pratique available.

Max. Size: 250,000 d.w.t. LOA 1,030 m. Beam 50 m. Draft 20.0 m.

Tugs: Tugs usually start to make fast off Nakpo Gak Light, using tugs' ropes. This ship (loaded inbound) used 4 tugs, both for berthing and unberthing. The Pilot communicates with the tugs on VHF Channel 14.

The following tugs are available: 3 × 4,200 h.p., 1 × 3,400 h.p., 1 × 3,200 h.p., 1 × 2,600 h.p., 1 × 1,900 h.p. and 2 × 1,200 h.p.

Berthing: Most ships using the Bulk Handling Berth are moored port side to (i.e. head out). This ship, 141,000 d.w.t. used 4 headlines, 4 sternlines, 2 breastlines each end and 2 back springs each end. 2 mooring boats are used to run the first ropes. On the quay is a digital readout giving the distance off for bow and stern and speed of approach.

There are no berthing or sailing operations during the hours of darkness.

Bulk Handling Berth: This is used for the import of iron ore, coal and limestone to feed the steelworks. Coal, via the conveyor system, also feeds the Coal Loading Berth for transhipping coal for coastal distribution. The berth is built on heavy steel piles, running 101°/281° with its present length of about 1.5 km. It is well fendered at 40 m. intervals with buffer type fenders having face pads 7 m. in width and 4 m. vertically, these keep vessel about 3 m. off the quay. The ship must provide its own brow for the gangway platform for access. The minimum depth alongside is 21.5 m. at MLWST, minimum keel clearance 1.5 m. Bottom is sand.

Discharging Facilities: 1×20 ton cantilever crane is situated at the Eastern end of the quay, usually the limestone berth.

Five electric gantry cranes with grab trolleys are mounted on rails which run the full length of the pier. Maximum air draft is 18 m. at HW. Outreach from the face of the fenders is 34.85 m. Grab capacity about 30 tonnes.

Discharging Rates: Maximum 40,000 t.p.d., normally 25,000 t.p.d. each.

Three separate conveyor belts run the full length of the pier to enable limestone, coal and ore to be discharged simultaneously.

Coal Loading Berth: This has been built into the Chijin Do Causeway and runs from the Eastern end of the Bulk Handling Berth, North and South, for about 350 m. It has a moving arm loader and handles ships of up to about 30,000 d.w.t., mainly coasters, the coal can come via the belt system either from the stock-pile or from larger ships discharging at the Bulk Handling Berth, at up to 20,000 t.p.d. There is a regular run down to Yeosu by coal barges.

Steel Products Berth: This lies about 2 km. West of the Bulk Handling Berth in the same line and will eventually make up the Western end of a continuous line of berths. It has 2 container type gantry cranes and 3×20 ton cantilever cranes. Main exports at present are steel coils.

Container Terminal: This is still under construction at Golyak-myon. The channel is being widened from 300 m. to 500 m. by dredging. There are up to 4 dredgers at a time working in different parts of the Bay.

Stevedores: Foremen, labour and crane drivers are in different Unions, this combined with language difficulties causes some confusion, hopefully over a period of time this will resolve itself.
Medical: Medical treatment and hospital facilities available.
Density: Ranges from 1022 to 1025, depending on the season.
Fresh Water: Available only by barge.
Fuel: Available only by barge, at least 2 day's notice required.
Repairs: Minor repairs are available at Yeosu, about 23 km. by launch, and divers are also available, but both are expensive.
Watchmen: From the time of obtaining Clearance to the time of sailing, a Customs Guard lives on board.
Repatriation: Possible. Normally by launch to Yeosu then by mini-bus to Yeosu Airport.
Time: GMT plus 9 hours.
Shore Passes: Necessary for aliens, renewed weekly. Korean crew have their Seaman's Books kept by Immigration until sailing time. As the dock gate is about 5 km. from ship and Kwangyang about 25 km., it is necessary to hire a mini-bus from the Agent at about U.S.$40 per trip.
Telephone: No telephones available from shore.
Stores: Local chandler can deliver alongside by truck. Western style meat and dry stores are usually imported and expensive, fruit and fresh vegetables plentiful in season. Spares are not easy to obtain.
Notice:

Declaration of Weapons

As you might know, the Republic of Korea is in a "Quasi-War" status with North Korea. Therefore, national security is of the utmost importance in our country.

For the above mentioned reason, you must declare/report any guns, bullets, explosives, etc., to this country.

At the time of your departure from this port, you will be permitted by the Custom's Office to take your weapons with you.

For your own peace of mind, however, the overall security in Korea is well provided for and it is therefore unnecessary to carry weapons.

Additionally, you are reminded that failure to properly declare/report your weapons is illegal and punishable by law.

Thank you for your co-operation.

Signed: .... Customs Director.

NOTES

Please also advise Shipping Guides Ltd.

Kuwait

GENERAL

VISA REGULATIONS: *Crew Changes:* Crew members joining ships at Kuwaiti ports can enter Kuwait with a valid Seaman's Book, against a "Seaman's Guarantee Letter" from Agent, allowing 24 hour transit only to join a vessel in port.

For the preparation of a Seaman's Guarantee Letter (S.G.L.) and to arrange an "Airline's OK Board Telex" from Kuwait (to allow crew to board a flight to Kuwait without Kuwaiti visa), please telex the following particulars to vessel's Agent:

Full Name
Nationality
Seaman's Book Number/Date and Place of Issue
Age/Date of Birth
Profession
Flight Details

Once a seaman enters/joins vessel on S.G.L. as above, it is not permitted for him to sign off/leave the vessel in Kuwait due to Immigration restrictions applicable to seamen entering on S.G.L.

Visitors to ships, repairmen and business visitors should obtain a visa before travelling to Kuwait. It is also possible for the Agent to obtain a visitor's visa (N.O.C.) locally in Kuwait. However, visitors must send, 15 days prior to arrival, a photo-copy of the passport pages containing full passport particulars (imperative) and 3 passport size photographs to the Agent in order to apply for such a visa.

SPARES/MAIL: *Air Freight of Ship's Spares, Mail etc.:* Air-freighted spare parts and ship's mail should be addressed to the Master c/o the Agent, and marked: "Ship's Spares (Stores) in Transit" and be accompanied by packing list and commercial invoice and Certificate of Origin both in original, with name and address of manufacturer (imperative) and certified by Chamber of Commerce and legalised by any Arab Embassy/Consulate.

Contents and weight of consignment should be correctly stated in all documents and air way-bill.

Customs clearance formalities and delivery of air freight consignments in Kuwait will take 10-14 days. It is, therefore, advisable to despatch air freight parcels sufficiently well in advance of ship's arrival. The flight details and air way-bill number should be telexed to the Agent enabling the Agent to collect delivery order from the airline and commence clearance formalities immediately.

N.B.: No documents are needed for ship's mail. It is advisable to send ship's mail/printed matter/documents by air courier, due to faster handling at airport, and to avoid the lengthy procedures applicable to air freight consignments.

PACKING REGULATIONS: *Chemicals in Bags:* The following is from the Director General, Ports Public Authority.

"You will appreciate that chemical materials arriving in bags require careful and special handling to prevent tearing and contamination, and we would, therefore, request you to ask all Steamship Agents and Owners of vessels to give their best attention to shipments of this type of cargo, in an effort to ease its handling by the stevedoring labourers without obstacles.

The bags should properly be bundled and placed on pallets, covered by thick plastic and/or canvas covers for safety and security of the cargo and fast discharging.

It should be noted that unless this type of cargo is shipped on vessels under the condition mentioned above, the Ports Public Authority shall not permit discharging and the cargo will remain on board the on-carrying vessel".

In Transit and Kuwait Cargo Mixed Together in Ships' Holds: The Kuwait Ports Public Authority have reported a recent incident which occurred during discharge of cargo from a vessel.

The berthing of the vessel as usual was arranged according to the cable from the Master that Kuwait cargo was clear for discharge in all respects, but when the discharging operation was carried out, they observed that the in transit and Kuwait cargo in all hatches were mixed together. Such being the case the Ports Public Authority were compelled to move one truck out to receive Kuwait cargo, and then bring back the truck of receivers of the in transit cargo, and so on until the discharging was completed. This situation naturally entangled the work altogether and caused considerable delay in discharging the cargo from the vessel.

Therefore, the Ports Public Authority have requested that we draw Principals' attention to this and ask you to take good care in stowing cargo properly in ships' holds and that it not be mixed together.

MINA ABDULLA: 29.02 N. 48.11E. (See Plan)

LOCATION: Mina Abdulla bounded on South by parallel of Lat. 28° 56′ N. on the East by Long. 48° 18′ E. and on North by a line joining following points:

(1)	29° 01′ 45″ N.	48° 09′ 25″ E.
(2)	29° 01′ 45″ N.	48° 10′ 06″ E.
(3)	29° 02′ N.	48° 10′ 18″ E.
(4)	29° 02′ N.	48° 18′ 00″ E.

FLAG: Every merchant ship when entering or leaving port between sunrise and sunset shall fly her national flag and national flag of Kuwait and, when entering port, shall fly her signal letters. All vessels required to fly Kuwait flag on foremast during daylight hours. Flags may be obtained from Agent.

APPROACHES: Mina Abdulla is easily located as it is the Southernmost refinery of the group of refineries which form Ahmadi, Shuaiba and Mina Abdulla. A number of flares will be seen. The Sea Island is situated about 3 miles offshore of the refinery.

When a vessel is ready to enter at the same time as another vessel is ready to leave the port, the outgoing vessel shall have priority over the incoming vessel, subject always to the provisions of the International Regulations for Preventing Collisions at Sea and to the requirements of safe navigation.

DOCUMENTS: Before leaving Kuwait the Master shall be responsible for obtaining a Port Clearance Certificate. The documents necessary for vessels to enter and leave Mina Abdulla are:

Enter
Ship's Manifest.
Bill of Health.
Crew List.
Clearance from Last Port.
Light Dues Certificate.

Clear
Register.
Load Line Certificate.
Radio Certificate.
Safety Certificate.
Last Port Clearance.

Masters and Agents of vessels shall, when called upon by a Customs Officer or Marine Officer, produce any documents relative to the landing or shipment of their vessel's cargo in the port. The Master or his representative is required to hand to the Company a written Notice of Readiness to load.

Discharging certificates of oil cargo loaded from Kuwait and Partitioned Zone ports are to be sent to vessels' local Agents immediately duly attested by the Customs Authorities and Arab Consulate covering full quantity as per Bill of Lading.

If a vessel which has not submitted the certificate for the previous voyage calls for the second time, she will be allowed to load and sail only after paying a cash deposit of KD 2,000.

In order to avoid delay in berthing, loading and outward clearance for vessels, all owners must give instructions to Agents at discharging ports to forward relevant cargo discharge certificates to Agents at loading ports without delay.

PILOTAGE: Pilot normally boards the vessel about 1.0 miles – 1.5 miles to the Eastward of the Sea Island. Vessels are requested to have pilot ladder of approved pattern, safely and securely rigged, and ready for immediate use. When it is necessary for a vessel to anchor before berthing, she should do so in the recommended anchorage area. At all times a Pilot will be available on the Sea Island.

Vessel with a Pilot on board shall display International Code Flag "H" in a prominent position whilst manoeuvring under his advice, and shall, if so instructed by Pilot, display a flag indicating berth to which vessel is proceeding.

ANCHORAGES: Vessels requiring to anchor for any reason in port limits should do so within area enclosed between positions:

29° 02′ N.	48° 14.3′ E.	29° 01.2′ N.	48° 15.1′ E.
29° 02′ N.	48° 15.1′ E.	29° 01.2′ N.	48° 14.1′ E.

or within reasonable proximity to the East if congestion arises in anchorage area.

All vessels and craft within the port shall be navigated with care and caution, at a speed, and in a manner which shall not endanger the safety of other vessels or craft. In particular, special care and caution is to be observed in passing vessels or craft of the following category: weight-lifting or deeply-laden craft, vessels or craft in tow and vessels or craft engaged on diving, dredging, grabbing, pile-driving or construction work, survey operations or the removal of obstructions.

All vessels within the port shall anchor, or moor and unmoor, when and where required by the Pilot, and shall be moved from place to place as required and by such means or appliances as may be ordered by the Marine Officer.

Vessels or craft shall not anchor near any submarine lines within the port limits, unless engaged on work which, in the opinion of the Pilot, necessitates their doing so.

MAX. SIZE: Mina Abdulla Sea Island consists of 2 berths, primarily for loading, although unloading facilities are also available. The offshore berth (No. 19) is designed to receive tankers up to 276,000 tonnes displacement in ballast to load products and can also accommodate loaded tankers of 35 ft. It is envisaged that loaded tankers will only be handled in an emergency.

The inshore berth (No. 18) is designed to receive tankers from 25,000 to 140,000 tonnes deadweight in ballast annd can also accommodate loaded tankers of 25,000 – 90,000 tonnes deadweight in emergencies.

The minimum depth of water at Berth No. 19 is 59 ft. and at Berth No. 18 minimum depth is 57 ft.

MOORING: Pilots may decline to moor any vessel if in his opinion it is not equipped with satisfactory mooring facilities, lines and gear, etc.

The Sea Island consists of 6 mooring dolphins and 8 breasting dolphins all connected to the loading platform by walkways.

Mooring hooks and capstans for handling ropes are provided. Hooks are of the quick release type, and in an emergency can all be immediately released from the Control Tower. A shore gangway is provided at each berth.

All vessels berthing at Mina Abdulla must be provided with a minimum of 8 mooring ropes forward and aft.

HEALTH: Quarantine regulations administered by Kuwait Government's Quarantine Medical Officer. Pratique granted at anchorage or berth.

Vessels calling at Mina Abdulla are requested to send following information to "Health Shuaiba Port" via Harbour Master at Mina Al-Ahmadi:

(1) Name of vessel.
(2) Last port of call.
(3) Health condition of crew.

(4) Validity of Cholera Certificates.

(5) Request for Free Pratique.

No craft, other than one having on board the Mooring Master or Port Health Officer, may approach any vessel entering the port and no other person may board any such vessel until Free Pratique has been granted.

Adequate covers shall be placed over all overside discharges.

Masters shall be responsible for ensuring that no unhealthy or offensive matter is deposited from their vessels on port premises. Any such matter so deposited that is, or becomes offensive, or, in the opinion of the Port Health Officer, injurious to health, may be removed, confiscated or destroyed and the place of deposit cleaned or disinfected on the direction of the Marine Officer at the expense of the Master responsible.

Any vessel, having on board offensive goods, or goods which, in the opinion of the Port Health Officer, are injurious to health, may be ordered to leave the port by the Marine Officer.

No ashes, refuse or other objectionable matter shall be thrown overboard from any vessel either on to any premises or into any waters of the port.

RADIO/VHF: All communications are to be made through the vessel's Agent, with the request that they be passed to K.O.C. Mina Al-Ahmadi, Harbour Master and Marine and Export Operations Department.

TUGS: 2 large tugs are available to assist in berthing and will operate to the Pilot's instructions, but will normally both be used while berthing, usually making fast on the starboard side, by means of 2 ropes each of which will be provided by the tug.

Both tugs are fully fitted with Fire Fighting and Dispersant spraying equipment.

LOADING: All products are loaded at the Sea Island by means of rigid loading arms. They are all fitted with hydraulically operated quick connect/disconnect couplings.

The black products are loaded by means of 10 in. connections and the white products by 16 in. connections.

The maximum loading rate will be approximately 2,000 tons per hour.

Caution: The incoming oil stream is pumped from shore and it is extremely dangerous to close a ship's valve against the incoming oil stream. Such a procedure creates an excessive pressure, which may damage submarine lines, ship's pipe-lines or the terminal facilities. Vessels will be held liable for damages resulting from failure to observe this precaution.

Loading and discharging of petroleum vessels shall not be undertaken without permission of the Oil Movements Department.

Loading and discharging of petroleum vessels shall not commence until:

(1) Master or Chief Officer has certified to the Oil Movements Department that all necessary valves are open and that vessel is in proper condition to receive or discharge cargo.

(2) Master or Chief Officer has certified to the Oil Movements Department that all ship's sea valves are closed or blank flanged except those required for water circulation purposes, and that these regulations are being and will be observed.

(3) Ship's tanks have been inspected by an authorised inspector and passed as suitable for loading.

Throughout period of loading and discharging operations, following conditions shall be observed:

(1) A responsible Ship's Officer shall be on watch on board at a point near tanks which are receiving oil during process of loading. The company's staff have received instructions to stop loading immediately whenever this rule is disregarded.

(2) A capable member of ship's crew shall be stationed by ship's tank valves which are receiving oil during loading.

(3) All pipe-lines shall, while rigged for loading or discharging petroleum, be directly and continuously earthed and kept constantly under supervision.

(4) No petroleum shall be allowed to escape or overflow.

(5) The following signals will be observed, as well as the radio communications, between ship and shore:

Signal Flag by Day		*Light Signal by Night*
	Starting	
1 Red Flag	Slow Speed	1 Red Light
2 Red Flags	Full Speed	2 Red Lights
	Stopping	
1 Red Flag	Slow Speed	1 Red Light
All Flags Down	Stop	No Lights

(6) When normal ship-to-shore communication fails, the emergency signal to stop the oil flow will be a continuous blast on the ship's whistle until the oil ceases to flow. Steam or air should never be shut off from whistle during loading. When practical, means should be provided for blowing the whistle from the after section of the cat walk. Whenever an Emergency Whistle Signal is used, all loading operations in the berths will be shut down until normal communication is restored. For this reason it is requested that ships in the area refrain from using ship's whistle for other than essential purposes.

Load Lines: Masters are warned that their load lines are subject to scrutiny by the Port Officer from Mina-Al-Ahmadi on completion of loading or bunkering. It is in their own interest therefore, to observe the regulations, as vessels are liable to be delayed and have to pump ashore or be fined if overloaded, and Port Clearance withheld.

MEDICAL: Patients will in normal course of events be treated by Quarantine Medical Officer on board. Neither medical nor hospital facilities are provided by the Company. However, in cases of emergency those requiring urgent hospitalisation may be taken by vessel's Agent.

BALLAST: As soon as practicable after arrival, all vessel's tanks will be inspected for evidence of oil in ballast. During discharge of ballast, similar inspections will continue. If evidence of oil appears at any of these inspections, the ship must return at once to a point not less than 100 miles from the coastline and there clean tanks and segregate slops.

Masters will be required to sign a declaration certifying that any water ballast intended for discharge from vessel is clean and free from oil.

No deballast reception facilities are available.

POLLUTION: Cases of discharging dirty ballast or oil spillages will be investigated and vessels are liable to fines and/or detention. Vessels shall not discharge into the water of the port any part of the content of their cargo, slop, or ballast tanks or bilges which is liable to pollute these waters. Masters shall ensure that pipe-line and equipment are clean before using them for discharging anything into the water of the port. Scuppers shall be plugged effectively and no leakage or spillage of petroleum on board shall be allowed to leak or be swept overboard.

The State of Kuwait has stringent laws in force concerning the pollution of the sea by oil. The following are 2 amended paragraphs of this law:

Paragraph 1, Art. 4. "A person responsible for any pollution as described in Articles 1 and 2 shall be punished by a fine of not less than 1,500 Dinars and not more then 40,000 Dinars. In the event of his committing a similar crime within a period of 1 year from the date of his conviction, such a person shall be punished by a fine of not less than 3,000 Dinars and not more than 40,000 Dinars, and in the event of his committing yet another crime within a year from this last conviction he shall be punished by a fine of not less than 6,000 Dinars and not more than 40,000 Dinars".

For each offence a bond of 40,000 Kuwaiti Dinars must be deposited prior to release of vessel.

Paragraph 3, Art. 6.. "The person responsible for pollution may suspend the detention order against the ship on payment, as a cash guarantee, of 40,000 Kuwaiti Dinars to the official entrusted with the execution of such order".

TIDE: The maximum tidal range is 10 ft. 6 in. and velocity of tide is from 0.5 to 2 knots.

DENSITY: 1025.

FRESH WATER: Cannot be supplied at Mina Abdulla. In case of utmost need Agent may hire a barge with a capacity of 100 tons of fresh water from Kuwait, and send to Mina Abdulla.

FUEL: Fuel oil bunkers can be loaded in either berth at a max. rate of 500 t.p.h, thus raising the max. loading rate of either berth by 500 t.p.h. for fuel oil cargoes only.

CONSULS: See "Shuwaikh". Consuls are situated just outside Kuwait town, some 30 miles from the terminal.

CERTIFICATES: There is no organisation for dealing with Derat Certificate at Mina Abdulla. Agents are responsible for presentation of Oil-discharging Certificate to Customs Authorities as guaranteed by them. All Cargo Discharge Certificates duly attested by the Arab Consulate are to be sent to Agents directly.

REPAIRS: No facilities.

CUSTOMS: Import of firearms and ammunition is forbidden. Under Kuwait Law No. 46, it is an offence to sell or trade liquor within the State of Kuwait. Any person convicted for selling, purchasing, giving away, accepting or acquiring in any manner, liquor or any intoxicating drinks for the purpose of trading and marketing shall be punished by a maximum 3 year's imprisonment and a maximum fine of KD 300 or by only 1 of the 2 aforesaid penalties. Alcoholic beverage is strictly prohibited to be held out of bond. Master allowed to keep limited quantity in his cabin.

REPATRIATION: See "Visa Regulations" under General before first port

AIRPORT: Kuwait.

TIME: GMT plus 3 hours.

PROVISIONS: K.O.T.C. does not provide any chandlering facilities. Masters of vessels calling at Mina Abdulla must arrange for supplies through ship's Agent. Foodstuffs, beverages, tobaccos, etc., are available from ship chandlers in Kuwait in limited kinds and quantities. Prices a little more expensive than in Kuwait due to long transportation. Ship's Agent should be advised by cable well in advance.

SHORE LEAVE: At present, crews not allowed ashore at Mina Abdulla, and this rule will be strictly adhered to.

GARBAGE DISPOSAL: Vessels have to retain garbage on board.

WASTE OIL DISPOSAL: No service available.

SEAMAN'S CLUBS: None.

CURRENCY: Kuwaiti Dinar. 1.0 KD = U.S.$ 3.41 (June 1992).

REGULATIONS: Main engines shall always be kept ready for use. Steam pressure shall be maintained at minimum necessary to operate auxiliaries and to manoeuvre in case of need. Deck steam is to be maintained at all times.

Engine repairs which may prevent working of main engines may only be undertaken with written permission of the Oil Movements Department.

Master shall at all times retain on board sufficient crew to work vessels.

Vessels shall have both anchors ready for immediate use on arrival and departure.

Vessels berthed at sea terminals shall not carry out engine trials without permission of the Oil Movements Department.

No swimming in vicinity of vessels or from vessels in berth is allowed.

DEVELOPMENTS: The CBM berths formerly used have been removed, but the pipelines and ground tackle remain in place. The former position of the CBM berths, which are about 1 mile South of the Sea Island, are marked by a navigation buoy and Masters are cautioned from anchoring in this area.

AUTHORITY: Kuwait National Petroleum Co. (KSC), Mina Abdulla Refinery, P.O.Box 69, Safat, 13001-Safat-Kuwait. *Tel:* 3260233 ext. 3232/3535. *Telex:* Kunpema 44204 Kt. *Cables:* Kunpema Kt-Marine Mina Abdulla. *FAX:* 3260280. *Contact:* G.S.Operation Zone III-MAB.

All shipping movements are directed by Mina Al-Ahmadi Harbour Master. *FAX:* 3262265.

MINA AL-AHMADI: 29.04 N. 48.09 E. (See Plan)

OPERATORS: Kuwait Oil Company.

LOCATION: Port of Mina Al-Ahmadi is open roadstead situated on Western shores of the Gulf.

PORT LIMITS: From the shore at Lat. 29° 02′ 50″ N. Eastward to Long. 48° 09′ 42″ E. Thence in a S.E. direction to position Lat. 29° 02′ 45″ N., Long. 48° 09′ 47″ E. then in an Easterly direction towards Long. 48° 11′ 30″ E. and the Northerly limit Lat. 29° 10′ 00″ N. from the shore to Long. 48° 11′ 30″ E.

Note: Southern limits liable to slight modification due to Shuaiba Port expansion. Changes of no consequence to visiting vessels.

FLAG: National flag of Kuwait is to be flown at foremast head during vessel's stay in port.

DOCUMENTS:

1. To obtain clearance inwards, following documents required by Agents:
   (i) Ship's Register.
   (ii) Safety Equipment Certificate.
   (iii) Safety Radio Certificate.
   (iv) Load Line Certificate.
   (v) Last Port Clearance.
   (vi) Two copies of Crew List showing names, nationalities and Passport/Seaman's Book numbers.

Items (i) to (v) are returned to Master together with Port Clearance (valid 24 hours only) prior to sailing.

2. Customs boarding officers require following:
   (a) One copy of Crew List.
   (b) Log Books covering period from last visit.
   (c) Completed Customs Declaration Form (supplied by boarding officer).
   (d) List of Ports visited with arrival and departure dates since last visit (form also supplied by boarding officer).
   (e) Completed Ballast Form (also supplied by boarding officer).

3. Immigration Officials require the following:
   (a) Valid Passport or Seamen's Book – the latter is preferable for landing.
   (b) Letter of Guarantee from Agents.
   (c) Two copies of Crew Lists.

4. Early Departure Procedure: KOC Documents Section are now operating an Early Departure Procedure to cut down delays in documentation. Masters may opt to use this scheme, full details of which can be obtained from KOTC. Those vessels not accepting this system of documentation are unberthed to anchorage to await documentation and therefore subject to delay in sailing until documents are ready and delivered onboard by launch. Weather conditions may prolong such delays on occasions.

5. Discharge Certificates: Discharging certificates of oil cargo loaded from Kuwait and neutral zone ports are to be sent to vessels' local Agent immediately, duly attested by Customs Authorities and Arab Consulate covering full quantity as per Bill of Lading.

If a vessel, which has not submitted the certificate for the previous voyage, calls for the second time, she will be allowed to load and sail only after paying a cash deposit of KD 2,000.

In order to avoid delay in berthing, loading and outward clearance for vessels, all owners must give instructions to Agent at discharging ports to forward relevant cargo discharge certificates to Agent at loading ports without delay.

NAVIGATIONAL AIDS:

Current hydrographic information may be obtained by radio from the "Middle East Navigation Aids Service, Bahrain".

Lights and Fog Signals: A fog signal on the extreme South end of South Pier – MAA with characteristics of one 3-second blast every minute. Approx. position Lat. 29° 03′ 42″ N., Long. 48° 09′ 42″ E.

A fog signal situated on the North Pier with a characteristic of 2.5 second blast, 3 second silence, 2.5 second blast, 3 second silence, 2.5 second blast, 46.5 second silence, Approximate position Lat. 29° 07′ 24″ N., Long. 48° 09′ 00″ E.

A fog signal situated on MAA – KOC Sea Island with a characteristic of 2×3 second blasts every 90 seconds. Approximate position Lat. 29° 06′ 48″ N., Long. 48° 17′ 29″ E.

A fog signal situated on MAA – KOC Single Point Mooring with a characteristic of a 10 second blast every 60 seconds. Approximate position Lat. 29° 06.9′ N., Long. 48° 19.2′ E.

A fog horn situated on the Shuaiba Petroleum Products Pier – SPPP – with a characteristic of a 3 second blast every 17 seconds. Approximate position Lat. 29° 02′ 46″ N., Long. 48° 10′ 46″ E.

A fog horn situated on the Mina Abdullah Sea Island – MAB – with a characteristic of prolonged blast duration of 2 seconds on and 18 seconds intervals off. Followed by morse "LI". Approximate position Lat. 29° 01.5′ N., Long. 48° 12′ 45″ E.

PILOTAGE: Vessels should arrive with sufficient clean ballast for safe manoeuvring under prevailing weather conditions. Under certain conditions the Pilot, after consulting the Harbour Master, may require additional ballast to be run in before berthing.

All berthing, unberthing and manoeuvring of vessels within the port limits, restricted area and prohibited anchorage must be done under the supervision of a KOC Pilot.

It is the duty of the Master to inform the Pilot of any special conditions, difficulties, or peculiarities whatsoever pertaining to his vessel which might impose hazards in connections with the handling, mooring, unmooring, loading or discharging of the vessel.

The Pilot boarding places for North Pier and for South Pier are 2 miles East of the respective piers, and for the offshore terminals 2 miles off the terminals.

Caution: Vessels are cautioned to keep well clear of the port area and on no account to pass within a distance of 2 miles of North or South Piers without a Pilot on board.

ANCHORAGES: The suggested anchorages in the Port of Mina Al-Ahmadi have been laid out to facilitate shipping in general. These anchorage areas are outside of the port limits and clear of the prohibited anchorage and restricted areas. Depths in the anchorages range from 10 to 15 fathoms, the seabed is of sand and soft coral with mud patches and affords good holding ground.

Incoming vessels are assigned berths by the Harbour Master in accordance with time of arrival, type of cargo required, size of vessel and loaded draft. Endeavour is made to berth vessels on arrival and Masters will be advised, prior to arrival, of the pier at which they will berth. If a berth is not available, vessels will be requested to anchor in one of the three anchorages as follows:

1. To the North-West or South-East of the Sea Island and inside of the Restricted Area.
2. To the East of the North Pier, outside of the port limits and to the North of the Prohibited Anchorage.
3. To the East of the South Pier, outside of the port limits and between the Southern limit of the Prohibited Anchorage and the Northern port limit of Shuaiba Port.

To the East of the port limits exists a Prohibited Anchorage and a Restricted Area which embraces the Sea Island and submarine-feeder pipe-lines.

Positions of these areas are:

Prohibited Anchorage	29° 05′ 00″ N. 48° 11′ 30″ E.	to	29° 05′ 00″ N. 48° 15′ 00″ E.
	29° 07′ 00″ N. 48° 11′ 30″ E.		29° 07′ 00″ N. 48° 15′ 00″ E.
Restricted Area	29° 05′ 00″ N. 48° 15′ 00″ E.	to	29° 05′ 00″ N. 48° 20′ 00″ E.
	29° 05′ 00″ N. 48° 15′ 00″ E.		29° 05′ 00″ N. 48° 20′ 00″ E.

Prohibited anchorage for Mina Abdulla is the area formed by lines joining the following position:

1.	29° 02.0′ N.	48° 13.0′ E.	3.	29° 00.8′ N.	48° 09.5′ E.
2.	29° 00.8′ N.	48° 13.0′ E.	4.	29° 02.0′ N.	48° 09.4′ E.

HEALTH: Vessels calling at Mina Al-Ahmadi are requested to radio the following information to "Health Minahmadi Port":

(1) Name of vessel.
(2) Last port of call.
(3) Health condition of crew.
(4) Validity of Cholera Certificates.
(5) Request for Free Pratique.

Free Pratique will be considered at the discretion of the Quarantine Officer, and vessels must hoist the yellow flag unless they are informed by Agent or Harbour Control that Free Pratique has been granted.

Regulations.

(i) All vessels must exhibit quarantine signals until quarantine formalities are completed or Free Pratique granted. By day, International Code Flag "Q"; by night, red light over white light. No person other than the Pilot is allowed to board any vessel either alongside pier or at anchorage until pratique has been granted.
(ii) Valid Cholera Certificates will be required from travellers coming from infected areas with the exception of children under one year.
(iii) Ratguards must be fitted to all moorings – this is being rigidly enforced.
(iv) Maritime Declaration of Health Form (supplied by boarding Quarantine Officer) to be completed.
(v) One copy of Crew List containing dates of vaccination and inoculation is required.
(vi) International Certificates of Vaccination and Inoculation to be available for inspection if required.
(vii) Details of air-conditioning available in vessel (form supplied by boarding officer).
(viii) A valid Derat Certificate must be produced. Facilities are available locally for renewal.

RADIO:

1. *Station:* All radio communications to the Company should be quoted in Greenwich Mean Time and should be routed through Kuwait Coast Station 9KK, details of which are given below:

412G Al Kuwait (9KK) Lat. 29° 10′ 09″ N., Long. 47° 45′ 42″ E.

Frequency			*Hours*
(9KK) 430*, 450, 500	A1, A2	2 kW.	0300–2100
(9KK2) 4,287	A1	0.75 kW.	On request
(9KK3) 6,370	A1	0.75 kW.	On request
(9KK4) 8,525	A1	0.75 kW.	0300–2100
(9KK5) 12,895	A1	0.75 kW.	0300–2100
2,182, 2,200, 2,750	A3	0.1 kW.	0300–2100

*On request.

Procedure: Transmits traffic lists on 450 kHz each even hour; 8,525 and 12,895 kHz each odd hour plus 35, listens for 30 mins. thereafter: 2,750 kHz each odd hour plus 05.

2. *ETA:* 72 hours before arrival Masters should transmit to KUOCO through Al Kuwait Radio (9KK) the following information required by Kuwait Oil Company.
   1. ETA.
   2. Cargo and Bunkers required.
   3. Notice of any repairs which may immobilise vessel.
   4. Any special requirements regarding cargo documents.
   5. Max. loading rate and ballast discharge time, special loading instructions if any.

The ETA should be confirmed 24 hours before arrival. The Master should also provide Agent with following information prior to arrival:

1. ETA.
2. Last port of call.
3. Any sickness on board.
4. Number of crew to see doctor or dentist.
5. All requirements – provisions, supplies, lubricating oils, repairs, stores, machinery for landing, crew repatriation, etc.

VHF: A short range VHF Radio Telephone. Port control system is in operation and continuous watch is maintained on International Channel 16. Port working Channels are:

11 12 14	General Port Working.
15 17	Sea Island Operations and General Port Working.
73 74	Pilot/Tugs Pier Controller North Pier/South Pier.

Vessels bound for Mina Al-Ahmadi should make contact, as soon as they are within range, calling "Mina Al-Ahmadi Port Control" on Channel 16.

Note: As Channel 16 is reserved for calling, safety and emergency, stations should refrain from using this Channel unnecessarily.

RADAR: Norcontrol VTS installed in the Marine Control Centre at the South Pier. It covers the approaches to the Sea Island and the South Pier.

NOTICE OF READINESS: Vessels are accepted for loading either by being given a range date or "As convenient". If a crude oil loading tanker arrives within her nominated range date (a 3 day period) her Notice of Readiness will be taken as the time of her arrival whether or not she is berthed on arrival. An LPG vessel is nominated an "Acceptance Date" plus 1 day and her Notice of Readiness will likewise be taken as the time of her arrival, whether or not she berths so long as her arrival time is within her range. If a vessel arrives "As convenient" or for lifting bunkers only then her notice of readiness will be taken as the time that the Pilot boards. Time of anchoring, together with position relative to South Pier Control should be advised to the Harbour Master by VHF or through 9KK as soon as possible. All vessels at anchor are required to be ready on receipt of 1 hour's notice from Port Control, this notice will be given by VHF or Lamp and vessels should ensure an efficient watch is maintained to receive notice.

Cancellation of Notice of Readiness: In all cases, including vessels having Range Dates, if after having received 1 hour's notice a vessel is not ready to berth when Pilot boards, at the expiry of that notice the original Notice of Readiness will be cancelled and the Pilot withdrawn. The new Notice of Readiness will be the time the Pilot re-boards the vessel concerned. As vessels are normally berthed in strict Notice of Readiness sequence, a vessel could lose considerable time through not being ready and Master should ensure that delays of this nature do not occur.

TUGS: K.O.C. maintain 3 diesel tugs for port use. They are 5,200 h.p. with a designated bollard pull of 70 tons. 2 tugs are normally on duty at all times. Hire charges for the services of Pilots, tugs and rope launches are covered by comprehensive port charges. Under normal operating conditions no tugs or other craft will come alongside the vessel before the Pilot boards. Ship's personnel must not signal for tugs or other boats to come alongside.

Tugs will make fast during all berthing operations, two lines will be given to the vessel. A messenger line is recommended for handling these lines from the tug to the vessel's deck. Tugs could also be used for vacating purposes.

MOORINGS: When at berth, vessels must be moored to entire satisfaction of Pilot. Vessels must be ready at all times to put out extra moorings as requested by pier personnel or dictated by weather changes.

Mina Al-Ahmadi is subject to sudden fierce squalls; winds of 70 knots have been recorded, therefore vessel's mooring lines must be checked frequently to prevent excessive movement of vessel in berth. Experience has shown that wholly synthetic moorings have too much elasticity and allow vessel to range or drift away from the berth during periods of adverse weather. Whilst these moorings are acceptable as head/stern ropes, it is felt that the ideal breast moorings should be of wire or a wire rope combination with the end being sent ashore fitted with a synthetic pennant or tail. This type of mooring provides the necessary elasticity while still being able to hold the vessel in position. All vessels moored with automatic tension winches must set the manual brakes on these winches.

BERTHING: Vessels can berth at any time of the day and night. Berths are allocated by the Harbour Master depending on various factors and the berthing position is advised by VHF. All vessels must establish contact with Mina Al-Ahmadi Port Control before anchoring to ascertain position. Vessels should remain at 1 hour notice for berthing at all times and maintain a continuous listening watch on VHF Channel 16.

The Port facilities consists of 4 Piers, 1 Buoy Mooring (Sea Berth), 2 Sea Islands and Single Point Mooring.

South Pier: The South Pier is connected to the shore by an approach trestle, which leaves the shore in position Lat. 29° 04′ N., Long. 48° 09′ E., and runs seaward in an 071° 26′ direction for a distance of 4,200 ft. (1,280 m.). The "T" head is formed by the oil pier running Northwards in a 341° 26′ direction for 2,805 ft. (855 m.) and the South arm running in a 174° 26′ direction for 1,076 ft. (328 m.). The pier is a steel piled structure with a wooden deck, 24 ft. above zero tide. The South Pier has 4 oil-loading berths and 2 L.P.G. berths. New fendering system independent of main structure installed to berths towards sea. Vessel to provide safe access between ship and terminal.

Bitumen Pier: A Bitumen Pier, for the export of Bitumen is located in an approximate position Lat. 29° 03.9′ N., Long. 48° 09′ E. The Pier approach projects out from the shore opposite the Bitumen plant in an 071° direction for approximately 600 m. The Pier head is 100 m. long and runs in a 341° – 161° direction. Water depth approximately 20 ft 6 in. (zero tide). Largest vessel to be accommodated 5,000 ton S.D.W.

North Pier – MAA: The North Pier is situated 3.5 nautical miles North of the South Pier – MAA and is connected to the shore by an approach trestle which runs seaward from Lat. 29° 07.1′ N., Long. 48° 08.2′ E. in a direction of 071° for a distance of 4,754 ft. (1,449 m.). The head is formed by the Oil Pier which runs Northward in a direction of 341° for a distance of 2,304 ft. (702 m.). The pier is a steel piled structure with a wooden deck, 20 ft. above zero tide. The North Pier has 4 oil-loading berths. An independent berthing dolphin and associated mooring dolphin have been recently installed as improved facilities at the South end of the Pier, together with an independent protective dolphin to improve docking facilities at the Northwest end of the Pier. Vessels to provide safe access between ship and terminal.

Sea Island: The loading platform of this Terminal is located in position Lat. 29° 06.8′ N., Long. 48° 17.5′ E. approximately 7.4 miles East of the North and South Piers. It is a steel piled structure in 94 ft. of water (zero tide). It consists primarily of a central loading platform with control tower, 6 mooring and 8 breasting dolphins all interconnected by catwalks. The Terminal which lies in a 330° – 150° direction, is some 1,620 ft. in length (494 m.). The height of the loading platform above zero tide is 44 ft.

The Sea Island – MAA KOC has 2 loading berths. Crude oil is fed to the Terminal by a 48 in. submarine line and heavy fuel oil by a 20 in. submarine line. The submarine lines are marked by 3 light buoys letttered "A", "B" and "C". Details are given in the navigational aids. L.F.O. and D.O. bunkers are not available at the Sea Island.

Multi-pile Single Point Mooring: A Single Point Mooring is located in position Lat. 29° 06.9′ N., Long. 48° 19.2′ E. approximately 1.5 nautical miles East of the Sea Island. The SPM is currently mothballed. The hose strings have been removed to store.

Sea Berth: There is 1 sea berth located South of South Pier. Berth "A" is maintained only for the import of refined products.

MAB – Sea Island: This terminal has 2 cargo handling berths. This terminal is for loading products only which are fed to the terminal by 4×24 in. white product lines and 1×24 in. black product line. Shore gangways available on this terminal.

Shuaiba Petroleum Products Pier: This terminal has 4 product handling berths. The terminal is connected to the shore by an approach trestle which leaves the shore at 29° 02′ 25″ N., 48° 09′ 55″ E. and runs seawards in an 062°T direction for distance of 997 m. The "T" head is formed by the oil piers running Northwest in a 331.5° T direction for 336.1 m. and Southwards in a 151.5° T direction for 453.7 m. Vessels to provide safe access between ship and terminal.

Limiting Depths and Berth Lengths:

Berth	*Depth at Zero Tide* (ft.)	*Nominal Length* (ft.)
South Pier – MAA		
1.	47	930
3.	47	930
4.	48.5	960
5.	41.5	765
6.	43	705
9.	44.5	615
10.	49.5	1,050
North Pier – MAA		
11.	59	1,490
12.	59	1,152
15.	57	870
16.	57	840
Sea Island – MAA KOC		
20.	94	1,420
21.	94	1,420

Loading Manifold, Loading Connection Sizes: South Pier: Berths 5 and 6 only are equipped with 10 in. cargo hoses and 8 in. bunker hoses – standard 150/ASA.

Berth 1 is equipped with	5×16 in. Cargo Arms. 2×12 in. Bunker Arms.
Berths 3 and 4 are equipped with	1×12 in. Cargo Arm, white products 2×16 in. Cargo Arms, white products 2×16 in. Cargo and Bunker Arms, black products
Berth 10 is equipped with	4×16 in. Cargo Arms. 2×12 in. Bunker Arms.
Berth 9 is equipped with	6 in. bunker hose only. All Standard 150/ASA.
North Pier:	
Berths 11 and 12 Loading Arms	3×16 in. Cargo Arms. 2×12 in. Bunker Arms. 1×16 in. Chicksan for P.C.NA. (Berth 12)
Berths 15 and 16 Chicksan Units	4×12 in. Cargo Flanges. 2×8 in. Bunker Flanges. Standard 150/ASA.
Sea Island:	
Berths 20 and 21 Loading Arms	4×16 in. Cargo Flanges. 2×12 in. Bunker Flanges. Standard 150/ASA.
SPM:	
Berth 22 Floating Hoses	2×16 Cargo Flanges. 1×12 in. Bunker Flanges. Standard 150/ASA.

Reducers: All vessels using the Port of Mina Al-Ahmadi should be equipped with reducing spools to fit these loading connections. These fittings should be in place, prior to berthing to help expedite the vessel's turn around.

Crude/Product Loading Rates: The following table shows the crude and products available at each berth and the nominal loading rates.

Grade	*Location*	*Nominal Rate* (t.p.h.)
Crude Oil	Sea Island	15,000
Crude Oil	North Pier	7,200
Crude Oil	South Pier	2,100
HFO Bunkers	Sea Island	750
HFO Bunkers	North Pier	500
HFO Bunkers	South Pier	500
HFO Cargo	North Pier	2,000
HFO Cargo	South Pier	2,000
LFO Bunkers	North Pier	500
LFO Bunkers	South Pier	500

Grade	*Location*	*Nominal Rate* (t.p.h.)
LFO Cargo	South Pier	1,100
D.O. Bunkers	North Pier	500
D.O. Bunkers	South Pier	500
Line Blend Fuel Oil	South Pier	1,200
Gas Oil	South Pier	1,500
L.S.F.O.	South Pier	2,600
A.T.K.	N. & S. Piers	1,500
M.S.	N. & S. Piers	1,200
P.C.NA.	N. & S. Piers	2,600
Bulk L.P.G.	South Pier	2,000

L.S.F.O.: Low Sulphur Fuel Oil.
A.T.K.: Aviation Turbine Kerosene.
M.S.: Motor Spirit.
P.C.NA.: Petrol Chemical Naphtha.

Note: All blended cargoes containing crude oil as one of the components can be loaded at any crude berth.

K.O.C. are in the process of installing a new metering system for Exports.

Slops: A 10 in. slop-line is available on all berths on North and South Piers for reception of slops. For first 3 hours use of this facility is free, for each additional hour or part thereof, a charge is made. Reception of slops is necessarily slow and a vessel may be considerably delayed in having to pump slops ashore. Vessels are therefore expected to arrive with clean ballast and Masters are asked to certify that all tanks and lines have been thoroughly washed unless "load on top" techniques are being operated.

MEDICAL: Patients will normally be treated at State Quarantine Clinic, where doctors are on duty between 0800 – 1200 hrs. and 1500 – 2000 hrs. daily. In emergencies doctors are available any time. Patients requiring hospital treatment will be transported by Agents to either KOC hospital in Ahmadi or to State hospital in Kuwait. Dental treatment can be arranged by Agents.

FRESH WATER: Fresh water is not available at Mina Al-Ahmadi. Vessels should contact their Agents for supply from alternative sources, such as Shuwaikh Anchorage, Shuaiba Port, etc.

FUEL: Heavy, light and diesel fuel can be supplied on all berths except the Sea Island, where only heavy fuel is available. There are no bunkering facilities on the Bitumen Pier.

	API	*Viscosity*	*Sulphur content*
Heavy Fuel	15.2–15.8	2,900–3,400	4.0 or less
Light Fuel	19.0–20.0	600	3.5 or less
Diesel Fuel	35.5–36.5	36	1.5 or less

LUBRICATING OILS: The stock of marine products of BP, Shell and Gulf Oil are maintained at Mina Al-Ahmadi and requests indicating the quantities are to be made in advance. All drums are to be handled during deballasting or before loading. Vessels will not be allowed to load more than 9 drums after loading unless under special circumstances and depending on shipping congestion. No bulk luboil delivery service available in Kuwait.

CONSULS: Most friendly countries maintain Embassies or Consulates in Kuwait Town.

CUSTOMS: Customs Officials will board vessels to inspect log books to ascertain violation of Israeli Boycott Rules and seal the liquor bond during stay in berth. An accurate list of alcoholic drinks in *Bonded Store* only is to be presented to the officials sealing the bond and the seal is not to be broken until vessel leaves the port.

(i) Personal effects mainly required for personal use and not for re-sale or purpose of commercial gain are allowed free of duty. However, all other goods are subject to a 4% ad valorem duty (CIF value). Suppliers' invoices and Certificate of Origin are required for clearance.
(ii) Importation and the sale of alcoholic beverages is strictly prohibited.
(iii) All goods for landing from tankers must be declared to boarding Customs Officer and necessary documentation completed.
(iv) Israeli goods, goods made by companies having interest or branches in Israel, Israeli vessels and vessels trading with Israel are boycotted and not allowed entry into Kuwait.

IMMIGRATION:

(i) Nationals of all friendly countries normally allowed to land. Israelis forbidden entry into Kuwait.
(ii) Transit visas should be obtained from Kuwait Embassies and Consulates abroad. However, in emergencies entry visas can be arranged at airport.
(iii) Transit passengers having valid connecting airline ticket to next port are allowed to land without visas up to 24 hours, extendable to 48 hours if required.
(iv) Seamen of all friendly countries normally allowed to land in transit to join vessels, without visas but on Agents guarantee. Advance information regarding names, nationalities, age, sex, etc. is required by Agents in order to facilitate reception and immigration clearance.
N.B. Thursdays and Fridays are Company holidays.
(v) Seamen allowed to land for hospitalisation, repatriation, transfer, etc., on a written undertaking that all expenses are met by Agents on behalf of Owners.
(vi) Passports must be valid for Kuwait for citizens of all countries. Stateless persons are required to have a visa before arrival in Kuwait.

Also see "Visa Regulations" in "General" before first port.

TIME: Kuwait State bases local time on the 45th meridian (GMT plus 3 hours). This time is in force the whole year.

STORING: Vessels can only be stored by barge at the anchorage. When storing alongside at the berth, trucks can only proceed to the head of the jetty. From this point hand carts are used to the berth. No fork lifts can be used on the jetty. The labour force is supplied by the Ship Chandler who also deals with the Customs Regulations.

DEEP WATER DEPARTURE CHANNEL: A comprehensive survey was carried out to determine the route of the Departure Channel for the larger and deep draft vessels leaving the port of Mina Al-Ahmadi in a loaded condition. This channel is some 28 miles in length; it extends from the Sea Island Terminal to Madira Reef and is marked by 21 light buoys and 2 light beacons, one established on Taylor Rock and the other on Madira Reef. In addition to the above aids, Madira Reef Light Vessel has been re-positioned further to the East and renamed Ahmadi to act as a fairway mark. Water depth in the departure channel is from 91 ft. to 100 ft. and above. Two shallow patches, one is about 9 miles from Sea Island with a minimum 91 ft. and the second is 14 miles from Sea Island with 92 ft. minimum water. Vessels which by reason of their draft are confined to this deep water channel and consequently hampered in their freedom to manoeuvre, will exhibit the following signals:

(i) *By day.* A black cylinder 4 ft. long by 2 ft. in diameter exhibited where it can best be seen.
(ii) *By night.* Four red lights vertically disposed spaced 3 ft. apart with an all round visibility of 4 miles exhibited where they can best be seen.

The exhibition of these signals in no way absolves any vessel from taking all appropriate action to avoid collision as required by the International Rules and Regulations for Preventing Collisions at Sea, but if a deep draft vessel is in doubt that an approaching vessel is not giving her sufficient room to manoeuvre she should indicate such doubt by giving at least 5 short and rapid blasts on her whistle.

Vessels having less draft should, when able to do so, give way to vessels exhibiting and sounding these signals and indicate this intention by giving 1 short blast followed immediately by 1 long blast on the whistle. Normal sound signals for vessels in sight of another should then follow.

Anchoring and fishing are forbidden within deep water Departure Channel.

The Departure Channel is marked by the following buoys and beacons conforming to the I.A.L.A. "A" system:

Number/ Letter	*Shape & Colour*	*Position* *N. Lat.*	*E. Long*	*Character*	*Port/Starboard/ Special/Cardinal*

Buoys A1, B1 and C1 mark the submarine pipeline from shore to North Pier Terminal (See "Plan").

SERVICES: To avoid delay all vessels advised to cable Agent of all their requirements in advance, giving full details.

Repairs:

(a) *Ship Repair:* All running repairs are undertaken through local contractors.
(b) *Radar/Radio and Electronic Equipment:* Maintenance service of this equipment is available through KOTC whose engineers/technicians are available for service on request.

Supplies: Supply of chemicals, paints, spare parts and provisions are available through local Agents.

Laundry: Laundry service is available on advance notice.

Oil Inspection: An independent oil inspection service is maintained at Mina Al-Ahmadi by the following: E. W. Saybolt & Co., B. & R. Redwood Ltd., and Chas. Martin.

Seamens' Services Centre: Situated at South Pier. Provides recreational facilities for all visiting seamen. Personnel mail service, beverages, snooker, toiletries, souvenirs and Walport Film Exchange service available. Open 0800 hrs– 2000 hrs. daily.

Classification Societies: Lloyd's Register of Shipping has a Resident Surveyor in Kuwait and maintains an office with Kuwait Maritime & Mercantile Co., who attend marine and non-marine work. Other societies have non-exclusive surveyors and their services can be obtained through KOTC.

Divers: Divers' services are available, including underwater hull cleaning service, through KOTC.

SHORE LEAVE: Ship's personnel and passengers not permitted ashore for any purpose whatsoever until pratique granted. All shore leave is contingent upon compliance with quarantine regulations and, under limited conditions and hours, shore leave may be granted. Masters should consult Agents to obtain the necessary passes.

REGULATIONS:

(a) Local Laws: The laws of Kuwait are in force at the Port of Mina Al-Ahmadi. Masters and crew members are advised for their own protection to abide by them. Comprehensive regulations governing the use of the port are promulgated in Law No. 21 of 1961. Masters of visiting vessels should acquaint themselves with this law.

(b) Pollution: The State of Kuwait has stringent laws in force concerning the pollution of the sea by oil. For information, the following are two paragraphs of this law:

Para 1, Art. 4: "A person responsible for any pollution as described in Articles 1 and 2 shall be punished by a fine of not less than 1,500 and not more than 40,000 Kuwaiti Dinars. In the event of his committing a similar crime within a period of one year from the date of his conviction such a person shall be fined not less than 3,000 and not more than 40,000 Kuwaiti Dinars, and in the event of his committing yet another crime within a year from the date of this last conviction he shall be punished by a fine of not less than 6,000 but not exceeding 40,000 Kuwaiti Dinars.

Para 3, Art. 6: The person responsible for pollution may suspend detention order against the ship on payment, as a cash guarantee, of 40,000 Kuwaiti Dinars to the official entrusted with the execution of such order".

(c) Certificates: All vessels must comply with International Safety Regulations and ensure that ship's certificates, i.e. Safety Radio, Safety Equipment and Load Line are valid. Facilities are available for renewal or extension providing proper notice is given. At least 48 hours should be allowed *excluding* Thursdays, Fridays or other local holidays.

(d) Load Line Regulations are strictly enforced, vessels overloaded will not be allowed to sail and subject to lengthy delay awaiting suitable facilities for pumping ashore. No facilities for pumping cargo ashore from Sea Island and S.P.M. are available.

(e) A Cargo Discharge Certificate for cargo loaded from Kuwait each voyage is to be presented to the Customs and Ports in Kuwait through the Agents within 4 months from sailing and these certificates are to be signed and stamped by local Customs officials and authenticated by an Arab Embassy or Consulate in the country of discharge.

PORT TAX: Introduced by the State of Kuwait at the rate of 45.25 fils (KD. 0.4525) calculated on ship's g.r.t. and outward clearance is subject to payment of their dues before departure.

Declaration of g.r.t. and n.r.t. details essential to avoid overcharge.

AUTHORITY: Kuwait Oil Company (K.S.C.), P.O.Box 9758, Ahmadi-61008, Kuwait. *Tel:* Kuwait 3261558, 3262268. *Telex:* 44233 KT, 44293 KT. *Cables:* Kuoco Kuwait. *FAX:* 3262265. *Contact:* Captain A.M. Salem, General Superintendent, Marine and Export Operations Department.

AGENT: For all tankers loading/discharging or sundry errands on a sole agency basis. Address: Kuwait Oil Tanker S.A.K. (Agency Branch), P.O. Box Fahaheel No. 7055, Kuwait. Telex: 4201, 4202. A/B Minatank Kwt. Tel. 911753/5; 911758/9; 911811. Cables: "Minatank Kuwait".

KOTC Agency is also connected with direct short range telephone VHF system and continuous watch is maintained on Channel 16. Working channels are and can be reached by calling "Minatank". Channel 16, calling only. Channel 26, Agency Working. Channel 27, Agency Working.

MINA SAUD (Mina Al Zoor): 28.45 N. 48.24 E.

(See Plan)

OPERATORS: Mina Saud Marine Terminal operated by Getty Oil Company, a subsidiary of Texaco. (hereinafter referred to as the Company). Weather and other circumstances permitting, ships will be loaded, moored and unmoored at all hours of the day, 7 days a week. Company representatives available at all times to discuss with Master any problems affecting vessel turnaround.

LOCATION: Mina Saud located just South of Ras Az Zaur approximately 23 miles 244° from Madira Light Vessel. Terminal connected to field and production centre at Wafra, 31 miles to N.W., by 16 in., and 10 in. oil pipe-lines, and 8 in. gas line.

The most conspicuous object at the terminal is the refinery flare, in position Lat. 28° 44′ 13″ N., Long. 48° 23′ 19″ E. Other objects conspicuous to the navigator: Ras Al Zour Beacon: Lat. 28° 44′ 48″ N., Long. 48° 24′ 16″ E. A 35 ft. high frame exhibiting 1 flash every 5 secs.

A conspicuous power station/desalination plant close South of the terminal with two chimneys 192 m. high in position Lat. 28° 42′ 21″ N., Long. 48° 22′ 30″ E.

FLAG: All vessels required to fly Kuwait flag at foremast during daylight hours. Flags may be obtained from Agents.

APPROACHES: Vessels on passage direct to Mina Saud up Gulf should pass about 1 mile South of Madira Reef Light Vessel, thence make good a course of 242° to an anchorage off Mina Saud in 17 m.

DOCUMENTS:

Ship's Manifest.
Bill of Health.
Crew List.
Clearance from Last Port.
Passengers Manifest, if any.
Stores List.
Bonded Stores List.

Agents are responsible for presentation of Oil Discharging Certificate to Customs Authorities as guaranteed by them. All cargo discharge certificates duly attested by Arab Consulate to be sent to the Agents directly.

Cargo documentation carried out by Terminal. Masters will greatly assist Terminal Staff by prompt provision of ship's tank ullages on completion of loading. Normal practice is for Master to sign blank documents during loading in order to save time on departure. (Should the Master desire, he may protect Owners interest by issuing a protest letter at time of signing blank documents. This letter can be rescinded if document figures are acceptable.)

PILOTAGE: Vessels boarded by Mooring Master either on approach or at anchorage. Mooring Masters are Licensed Masters Foreign Going. They act in an advisory capacity to Master and have expert knowledge of local conditions.

Mooring Master will pilot the vessel into the berth, supervise the mooring and unmooring, and advise Master with respect to the connecting and disconnecting submarine hose. A ship's deck officer must be on the bridge at all times while ship is manoeuvring, and deck officer must direct ship's crew in all hose handling. During loading operations Mooring Master will act as Company's representative. A shore crew of 5 persons handle ropes to and from buoys during berthing and unberthing.

The same crew connect/disconnect hoses and remain on board throughout loading.

ANCHORAGES: Centre of the recommended anchorage area is in position 090° from Flare 4.3 miles, which has good holding ground with mud and sand bottom.

Prohibited anchorage area defined as follows: beginning at refinery flare 060° 3.5 miles thence 180° 1.75 miles thence 270° 3.0 miles to refinery flare.

MAX. SIZE:

Guidance for Maximum Dimensions:

	Berth No. 1	*Berth No. 2*
LOA	800 ft.	1200 ft.††
Beam	No limit	No limit
Max. Sailing Draft	41 ft.	52 ft. (56 ft.*)
Max. d.w.t. (for full cargo) approx.	50,000†	approx. 140,000†
Min. depth in berth	43.6 ft.	55.8 ft. (48.5 ft. on inshore bar)
Min. depth on exit route	43.6 ft.	53.8 ft.

*Tidal loading to 56 ft. allowed in suitable conditions.

†Larger vessels (up to 370,000 d.w.t.) are allowed for part cargo or bunkers providing other parameters are satisfied.

††Limiting parameter is maximum distance stern to manifold of 600 ft.

HEALTH: Vessels calling at Mina Saud are requested to include the following information.

1. Name of vessel.
2. Last port of call.
3. Health condition of crew.
4. Validity of Cholera Certificates.
5. Request for Free Pratique or details or any cases or suspected cases of infectious diseases during the last four weeks.

Free Pratique will be considered at the discretion of the Quarantine Officer and vessel must hoist the yellow flag unless informed by Agent or Harbour Control that Free Pratique has been granted.

RADIO/VHF: *Communications:* Messages should either be telexed direct (Telex: 23074 Kt, Fax: 3950126) or by cable via Kuwait Radio (call sign 9KK on 500 kHz) for onward transmission to Gettymar Mina Al Zour (Mina Saud).

Kuwait Radio transmits traffic lists on 450 kHz at 25 minutes past every even hour and on 8525 kHz and 12895 kHz at 35 minutes past every odd hour.

VHF Service maintained by Mina Saud Marine. Listening on Channel 16 (156.8 MHz). Operating hours: Continuous 24 hours a day, 7 days per week.

Masters are requested to advise ETA 72 hours before arrival Mina Saud, and to confirm this when 48 hours and 24 hours distant from the Port.

It will assist if the following information is passed to "Gettymar Mina Saud" before vessel's arrival.

Bunker fuel requirements in metric tons or U.S. bbls. at 60° F.
Cargo requirements in long tons or U.S. bbls. at 60° F.
Confirmation that only clean ballast is to be discharged and expected deballasting time.
Confirmation that ballast and pipe-lines are clean, 2 ropes or wires and both anchors forward and 9 synthetic ropes or wires available aft.
Arrival draft fore and aft, expected sailing draft fore and aft.

When berthed at Mina Saud contact with the shore is maintained by VHF R/T portable units supplied by the Company.

TUGS: Two tugs are available to assist berthing and unberthing, also to stand-by for emergencies while vessels are in berth.

Tug charges of 160 KD. per tug, per hour or part thereof based upon hours of actual usage when made fast or standing by ready to assist the vessel e.g. during berthing/unberthing operations. (whilst vessel is in the berth and throughout deballasting/loading operations. Additional tug charges will be levied if called to assist, e.g. tug(s) called to assist vessel to remain in berth in the event of bad weather or for any other reasons concerning safety).

READINESS: Notice of Readiness will be received by Company within terms of Charter Party or Contract when known, otherwise during ordinary business hours, which shall be between 0700 hrs. and 1800 hrs. local time except on Fridays and Public Holidays.

Laytime to commence 6 hours after time of acceptance or upon commencement of loading, whichever occurs first, except that when Notice of Readiness received before 1600 hrs. local time the 6 hours shall be continuous, but if received after 1600 hrs. then such 6 hours shall be daylight hours, daylight hours for such purpose being between 0600 and 1800 hrs. local time.

If after giving Notice of Readiness, vessel is delayed in getting into berth or in loading, such delay shall not count as used laytime unless delay shall be due to default of Company. On completion of loading, laytime shall cease upon disconnecting cargo hoses.

Should Company Mooring Master be handed a Notice of Readiness out of business hours and before commencement of loading he will note it as "Received" at that time, for acceptance by the Company at earliest recommencement of business hours, or at time of commencement of loading, whichever shall be first.

If Notice of Readiness given after latest accepted nominated lifting date, laytime shall not commence before commencement of loading.

BALLAST: Vessels must have enough clean ballast to permit safe manoeuvring under any conditions. All vessels, particularly VLCCs must retain ballast during early stages of loading and discharge ballast as necessary during latter stages of loading.

Mooring Master will advise when ballast discharge may commence. Inspection of ship's tanks for suitability to receive cargo carried out by Mooring Master or by qualified petroleum inspectors if required.

GEAR: For handling 2×10 in. strings of hoses ship's derrick should have a minimum safe working load of at least 5 tons. Outreach overside should be at least 5 ft.

2 lengths of 1 in. diameter good quality rope each of 20 fathoms in length should be available for use as slip ropes for flexible hoses.

Reducers should be available for connection of hoses to ship's manifold and to ship's bunker line connection.

Company provides snub lines of manila and wire rope for hanging off hoses.

In the event that ship's derrick gear is inadequate for loads required, a work barge can be made available. Charge for this barge, including positioning and personnel, is equivalent of 250 U.S. Dollars per hour (approx.).

BERTHING: There are 2 loading berths, each conventional multi-buoy moorings which are connected by a 20 in. submarine line for fuel or crude and a 12 in. submarine line for naphtha. Each berth has a 10 in. hose for fuel or crude and a 10 in. hose for naphtha.

Vessels taking bunkers will use fuel cargo hose before or after loading cargo. Manifolds should be prepared with 10 in. 150 ASA standard connections.

The outer berth, 073° – 2.6 miles from refinery flare, is equipped to take vessels of up to approx. 140,000 d.w.t. for full cargo. Larger vessels can be accommodated for bunkering only or part cargo. Max. draft allowed is 52 ft. In exceptional circumstances tidal loading to 56 ft. is allowed. See Appendix below.

Appendix A. Mina Saud Tidal Loading Procedure, December 1975: Assuming 1,000 ft. ship has berthed. Starboard anchor between 150 ft. and 300 ft. South of starboard anchor marker and one ship's length (1,000 ft.) inside, (Course made good 270°T). Starboard anchor ranged along bottom and port anchor let go when 11 – 12 shackles out on starboard. i.e. 1,000 ft. West of starboard (allowing for slack). Vessel would be in berth with between 8 – 10 shackles on each anchor.

When letting go at HW with ebb tide and heaving port anchor. Vessel should manage to remain in at least 16.4 m. charted depth, heading about 340°T with stern in line with, or to seaward, of manifold marker buoy.

Every effort should be made to pick up port anchor without slacking too much on starboard anchor. Ideally, last shot of port cable is dragged home whilst starboard cable is fairly tight, so that when port anchor is aweigh vessel swings to starboard and presents her port side to the ebb, thus regaining a mid berth position. (Sometimes necessary to put engines ahead in order to clear manifold marker hose buoys).

Pilot should endeavour to have vessel heading North when starboard anchor is aweigh. Vessel should then steam North or slightly West of North in order to maintain a distance of approx. 1,000 ft. from starboard anchor marker buoy. Vessel should start turn to starboard (bearing in mind ebb tide) when abeam of starboard anchor marker buoy, and endeavour to turn on radius of about 1,000 ft. with starboard anchor marker buoy at centre. A course of 066°T should be made good until deep water is reached. If this procedure is followed, the minimum depth should be not less than 16.4 m. (chart datum).

Note: 16.4 m. exists in berth and on exit channel. Close attention must be paid to vessel's position, as depths of less than 16 m. are in close proximity to exit channel.

Vessel should finish loading cargo or bunkers at least 3 hours before HW thus ensuring maximum height of tide for bottom clearance plus ebbing tide for easier control. (Ebb tide usually commences 2 hours before HW). See "Tides".

16.4 m. must be reckoned governing depth.

Calculate thus: 16.4 + height of tide then subtract 1 m. Result will be max. allowable draft (only if weather conditions are ideal).

eg.

16.4 m.
+ 1.8 m. height of tide

18.2 m.
– 1.0 m. clearance

17.2 m. allowable draft (56 ft. 5 in.)

It must be borne in mind that mentioned clearances are the absolute minimum that can be tolerated in ideal conditions.

Seismic survey indicates feasibility of dredging or burying pipe-lines should it ever be necessary and also indicates good anchor holding power potential throughout area. *End of appendix.*

The inner berth, 073° – 2.0 miles from refinery flare, has a minimum depth of 44 ft. at LLW and can accommodate vessels up to 800 ft. in length. Max. draft allowed is 41 ft.

MOORING: *(a)* Port is an open roadstead and ships must be prepared to use main engines, unmoor and leave at any time.

(b) Mooring and unmooring carried out during day or night, as required. Except mooring at Berth No. 1, during daylight only.

(c) Vessels moored to ebb tide stream at both inner and outer berths. Resilience in mooring achieved by weight of clump anchor and catenary of chain cable. Remotely operated quick release hooks connect ship's ropes to the buoy. (At outer berth (No. 2) only.)

(d) Both port and starboard anchors should be lowered clear of hawse pipes and ready for instant letting-go from brakes.

Spar buoys established to mark starboard and port anchor dropping positions.

(e) 9 good quality synthetic ropes (or wires for VLCCs) should be flaked ready for running from the stern. After anchoring, as vessel proceeds astern in berth, quarter lines are run by Company launch and secured to quick release hooks on quarter buoys. 2 Lines are then run to No. 5 buoy on the Port Bow.

(f) When securely moored in correct position for handling hoses, each anchor should have about 8 shackles out and it is advisable that tankers using these submarine berths be provided with not less than 10×15 fathom lengths of cable on each anchor.

(g) Masters are requested to ensure that power to deck machinery and sufficient seamen to operate it are immediately available at all times when in berth.

LOADING: Submarine line marked by permanent red coloured buoy at each berth, and marker buoys fitted to all hoses.

Recovery of flexible hoses is by fleeting with ship's tackle making use of beckets fitted to recovery chain.

"Ship's Stop" is invariable rule except in an emergency. Ship must give reasonable stand-by time to Mooring Master, 15 to 20 minutes, to alert Terminal staff on shore for closing valves.

Loading rate at present averages 1,500 t.p.h. (Max. 2,000 t.p.h.)

MEDICAL: In emergency only. For normal cases, Agent arranges visit to Port Health Doctor.

FRESH WATER: Not available.

FUEL: Bunker fuel (Max. 1500 secs Redwood No. 1 equivalent to 180 Cst.) at loading berths through 12 in. submarine line with single 10 in. flexible hose, at Berth No. 1, and 10 in. hose at Berth No. 2.

FIRE PRECAUTIONS: Masters are responsible for enforcing "No Smoking" regulations for their vessels and Mooring Master will stop loading if he considers them to be inadequate or if they are not being obeyed. Smoking in Company craft in the berths is forbidden.

CONSULS: See "Kuwait."

REPAIRS: Repair facilities are available. Fully qualified divers are available from Terminal. Underwater cutting gear, welding equipment and a full range of underwater tools are available.

Services of divers and equipment are available at rates to be arranged for the job and agreed by Superintendent of Marine and Terminal Operations, Mina Saud.

Repairs to main engines must not be carried out in the berth without permission of Superintendent of Marine and Terminal Operations. Normally vessels requiring to immobilise engines will be anchored well clear of other ships.

CUSTOMS: Alcoholic beverages strictly prohibited to be held out of bond.

It is important to remind Owners and Masters that all goods, either landed or embarked, must be cleared by Agent through local Kuwait Government Customs.

Import of firearms and ammunition forbidden.

REPATRIATION: Crew changes normally effected through Kuwait.

Also see "Visa Regulations" in "General" before first port.

TIME: GMT plus 3 hours. Permanent.

STORES: Provisions and stores are available from Kuwait. Requirements should be arranged with Agents through Kuwait Radio prior to arrival at Mina Saud.

SHORE LEAVE: Can be arranged through Agent.

WEATHER: In Summer months of June, July and August light to moderate Northerly and North-westerly winds are general rule at Mina Saud. Occasional strong N.W. winds of Gale force. Strength and duration governed by strength of S.W. monsoon blowing outside the Gulf.

During Autumn and early Winter months fine weather is generally experienced associated with moderate N.E. monsoon prevailing outside the Gulf. Occasional 'Shamals' (N.W. winds) occur.

In late Winter period and Spring, strong S.E. winds with moderately heavy seas frequently experienced at Mina Saud. These are due to approach of low pressure systems from Atlantic and Mediterranean Sea spreading Eastwards across Levant and Iraq. Extremely violent local storms sometimes occur without warning especially at change of seasons. These disturbances sometimes attain hurricane force and are accompanied by erratic changes in wind direction and poor visibility due to suspended sand.

TIDES: Tide cycle is combination of diurnal and semi-diurnal tides giving a Higher High, Lower High, Higher Low and Lower Low Waters during a 24 hour period. Range of tide is average 7.5 ft. at Springs and 5 ft. at Neaps.

Commencement of ebb stream (direction 190°) after HW may be taken as 2 hours before predicted time of HW at Mina Saud published in Admiralty Tide Tables.

Main direction of flood and ebb streams are 010° and 190° respectively. Direction is extremely variable between LHW and HLW period. Average direction during this period about 045°.

Tide heights are affected by meteorological conditions and could vary by more than 3 ft. from predicted heights in extreme circumstances. Times of high and low water may also be considerably affected.

The Mooring Masters have access to information from the Marine Meteorological Station at Mina Saud.

AUTHORITY: Getty Oil Company, P.O.Box 6, Mina Al Zour (Mina Saud), Zone Code 66051, Kuwait. *Tel:* 3950444 (ext. 339) or 3950221 or 3950096. *Telex:* 23074 Kt. *FAX:* 3950126. *Cables:* Gettymar. *Contact:* Captain Hadi M. Al-Abbas, Marine Superintendent.

SHUAIBA: 29.02 N. 48.10 E. (See Plan)

PORT LIMITS: From a point on the coastline in position:

(a) 29° 03′ 09.7″ N., 48° 09′ 04.6″ E. in direction 090° to
(b) 29° 03′ 09.7″ N., 48° 09′ 27.58″ E. thence 116° to
(c) 29° 02′ 45″ N., 48° 10′ 24.6″ E. thence 090° to
(d) 29° 02′ 45″ N., 48° 15′ 09″ E. thence 180° to
(e) 29° 02′ 00″ N., 48° 15′ 09″ E. thence 270° to
(f) 29° 02′ 00″ N., 48° 10′ 16.8″ E. thence 180° to
(g) 29° 01′ 15″ N., 48° 10′ 16.8″ E. thence 270° to a point on the coastline at
(h) 29° 01′ 15″ N., 48° 09′ 29.4″ E.

The above limits are shown on Admiralty Chart No. 1223, and the coordinates of the first two points are amended according to last agreement with KOC in May 1983.

Ships whilst in port limits during daylight hours shall fly their national flag at the after part of the ship and where a ship is of foreign registry also the Kuwait National Flag at the fore.

DOCUMENTS:
Manifest: 15 copies which should clearly indicate weights in metric tons and measurements in cubic metres and each copy should be duly signed and stamped by the loading port Agent.

The copies of the manifest may be photostat copies or carbon copies but it is imperative that the stamp and signature made by the loading port Agent is appearing in original on each copy.

If cargo is carried in-transit a separate Transit Cargo Manifest (15 copies) is also required in same fashion as above.

Bills of Lading: 5 sets of non-negotiable copies Bills of Lading, i.e. ordinary carbon copies of Bills of Lading. Photostat copies will not be accepted.

In addition the following documents are to be provided:

4 copies of Final Stowage Plan, duly signed and stamped on each copy by the loading port Agent. Photostat copies are accepted as long as same are signed and stamped.

4 copies of Hatch List as above.

If dangerous cargo is being carried 2 copies of a separate Dangerous Cargo List are also required and again each copy to be duly signed and stamped by the loading port Agent.

Also 2 copies of Crew List to be presented to Customs Office.

N.B. Since all cargo for discharging at Port of Shuaiba has to go on direct delivery, and Customs clearance has to be completed prior to berthing of a vessel, it is therefore imperative that all documents, as above, are in Agent's hands for submission to relative authorities at least 7 working days prior to vessel's ETA, otherwise berthing of vessel is likely to be delayed.

Certificates: All usual documents such as:

Ship's Manifest.	Stores List.
Crew List.	Bonded Stores List.
Clearance from Last Port.	SOLAS Certificates.
Passenger Manifest.	Bill of Measurements, etc.

PILOTAGE: Pilotage is compulsory and requests for Pilots may be made to Shuaiba Port Communications Centre (call sign "Shuaiba Port"). The Port Communications Centre is equipped with VHF Channels 16, 9 and 13. Shuaiba Port Pilots Telex No.: 44235KT PORTS. HF 2,182 kHz., Fax: 3262943. All working around the clock.

ANCHORAGES: Ships bound for Shuaiba Port, with cargo to load or discharge, or intending to use facilities supplied in the port such as bunkering, will be permitted to use Shuaiba Port Anchorage between Lat. 29° 02.75′ N. and Lat. 29° 02.00′ N. and between Long. 48° 15.11′ E. and Long. 48° 12.72′ E. Ships are not permitted to anchor to the West of Long. 48° 12.72′ E.

All other ships not falling in the categories listed in the first paragraph, such as vessels waiting for orders or which have not been nominated for bunkers, are not permitted to anchor in the Shuaiba Port Anchorage and must anchor well to the East of Long. 48° 15.11′ E.

RESTRICTIONS: Ships whilst in port limits during daylight hours shall fly their national flag at the aft part of the ship and where a ship is of foreign registry also the Kuwait National Flag on the main mast at the fore.

Vessels over 250 m. LOA, berth/unberth during daylight hours only.

MAX. SIZE:

Dry Cargo Berth No.	*Max. Draft Permitted* (m.)	*Max. Ship LOA* (m.)
1	9.50	120
2	9.50	120
3	10.50	180
4	6.71	170
5	6.71	170
6	10.00	180
7	11.00	180
8	11.00	180
9	13.00	200
10	13.00	200
11	13.00	200
12	13.00	200
13	13.00	200
14	13.00	200
15	13.00	As these berths will be utilised by container and Ro/Ro vessels, no limitations and subject only to berth occupancy.
16	13.00	
17	13.00	
18	13.00	
19	13.00	200
20	13.00	200

The seaward side Berths No. 4, 5, 6, 7 and 8 are occasionally affected by bad weather.

Agents of vessels with dimensions in excess of the above must make due representation to the Port Authority for permission for these vessels to be accepted and ample notice is necessary when submitting such requests.

HEALTH: Vessels calling at Shuaiba are requested to send the following information to "Health Shuaiba Port".

(1) Name of vessel.
(2) Last port of call.
(3) Health condition of crew.
(4) Validity of Cholera Certificates.
(5) Request for Free Pratique.

Free Pratique will be considered at the discretion of the Quarantine Officer, and vessels must hoist the yellow flag unless they are informed by Shuaiba Port Communications Centre that Free Pratique has been granted.

RADIO: All vessels calling at Shuaiba Port are required to submit an initial ETA 72 hours and 36 hours prior to arrival followed by a firm ETA 12 hours before arrival. ETAs should be passed through Kuwait Radio (9KK) either to the ship's Agent or to the Harbour Master, Shuaiba.

Vessels equipped with VHF should contact Shuaiba Port Communications Centre when within range.

ETAs should contain details of arrival draft, LOA and beam.

TUGS: Three tugs of 4,000 h.p., 3,600 h.p. and 3,200 h.p. respectively. One of these is an ocean-going/salvage tug and equipped with Voith Schneider unit, and is 4,000 h.p. The use of tugs is mandatory whenever directed by the Pilot or Harbour Master.

BERTHING: The port is divided into 3 main component areas:

1. Dry Cargo Berths.
2. Small Craft Harbour.
3. Barge Harbour.

See "Max. Size" for LOA and draft restrictions.

Dry Cargo Berths: Berths No. 1 and 2 are entirely for the export of fertiliser (Urea), bagged and bulk, by means of a conveyor belt.

Berth No. 6 is entirely for the export of bulk sulphur, by means of a conveyor belt.

Berth No. 14 is usually for the export of bulk petcoke, by means of a conveyor belt. Other general cargo can be discharged at Berth No. 14.

Berths No. 12, 13 and 14 are equipped with shore cranes, each with 15 ton capacity and movable on rails.

Berths No. 3, 7 and 8 are entirely for general cargo, clinker and iron ore.

Berths No. 9, 10, 11, 12, 13, 19 and 20 are entirely for general cargo and equipment. No warehousing facility, direct delivery.

Small Craft Harbour: Entirely for small craft. 3 berths with a total length of 476.2 m.

New Barge Harbour: Entirely for tugs and barges. 4 berths with a total length of 936.23 m.

CONTAINER FACILITIES: Berths No. 15 – 18: A modern container terminal (S.A.C.T.) occupies Berths No. 15, 16, 17 and 18 with a total length of 880 m., and a total storage area of 31 hectares, equipped with 3×41 tons gantry cranes, straddle carriers, heavy duty forklifts, tractors and trailers.

Both LCL and reefer services available. Ro/Ro vessels accepted, gantry cranes can be supplied for discharging/loading of containers stowed on deck. Cargo discharged/loaded via vessel's stern ramp will be handled by S.A.C.T., providing it is mobile. No length restrictions for vessels; but subject to berth occupancy and prior Port Authority's acceptance.

Breakbulk cargo loaded on flat beds or flat racks can be handled by 20 ft. – 40 ft. container spreaders in conjuction with the port overheight gear.

STEVEDORES: Stevedores shall be nominated by Owner or Agent from a list of stevedores registered by the port for cargo handling operations. A common tariff published by the port applies.

Vessels will be required to maintain a minimum daily tonnage dependent on the type of cargo they are carrying.

Permission for the landing of heavy lifts on the quays must be obtained from the Port Management each time in advance.

MEDICAL: There is a medical centre ashore which provides a very efficient service for vaccinations. Advance notice required if medical attendance needed on board.

TANKERS: *Petroleum Products Pier:* Operated by KNPC. Located to the East of the Southern Quay Mole and consisting of 4 berths for the accommodation of tankers. Berths No. 1 and 3 comprise the Eastern Berths whilst Berths No. 2 and 4 are located on the Western side.

Berth No. 1 Length 350 m., draft 13.71 m.
Berth No. 2 Length 369 m., draft 12.19 m.
Berth No. 3 Length 369 m., draft 13.71 m.
Berth No. 4 Length 331 m., draft 12.12 m.

The above lengths are inclusive of mooring dolphins positioned Northward and Southward of the pier. Because of draft restrictions at Berths No. 2 and 4, tankers in excess of 230 m. in length will be subjected to the Port Authority's acceptance. Each berth is supplied with 2×20 in. fuel lines and 5×16 in. supply lines for naphtha, avtur and gas oil. All lines reduce to 12 in. at the loading arms. Additionally at Berth No. 2 there are lines for discharging lubricating oil and for loading liquid ammonia (See "Shipmaster's Report"). An 8 in. line for slops is available. Each berth at the Petroleum Products Pier is equipped to provide bunkers by means of 2×20 in. lines for fuel oil and marine diesel oil whilst light fuel oil is supplied by an 8 in. line.

DENSITY: 1028.

FRESH WATER: Available at all berths except Berths No. 6, 7 and 8.

FUEL: Bunkering facilities are available by means of a bunkership (barge), while the vessels are discharging/loading cargo alongside the berth, except to vessels loading/discharging dangerous cargo. Vessels at anchor can replenish bunkers as and when needed.

REPAIRS: Small repairs can be arranged if sufficient notice is given.

DRY DOCK: No arrangements at Shuaiba Port. Drydocking facility available with Kuwait Shipbuilding and Repairyard Co., Kuwait. Telex: 24438KT A/B DOCKYARD. Tel: 4835488.

CONSULS: Most countries represented.
SURVEYORS: Lloyd's, ABS and others are represented in Kuwait.
GANGWAY/DECK WATCHMEN: Watch to be maintained by ship's crew.
CUSTOMS ALLOWANCES: Tobacco, no restrictions. Wine and/or Spirit, alcoholic beverage strictly prohibited to be held out of bond.
REPATRIATION: Can be arranged.

Also see "Visa Regulations" in "General" before first port.

AIRPORT: 35 km. to Kuwait International Airport.
TIME: GMT plus 3 hours.
HOLIDAYS: Every Friday, New Year's Day (1st January), Kuwait National Day (25th February).

The following Islamic holidays are celebrated but dates are subject to alteration: Prophet's Birthday, Prophet's Ascension, Eid Al Fitr, Eid Al Adha and 1st Muharram.

POLICE/AMBULANCE/FIRE: Port Security Police, Ambulance and Fire Department assistance available upon request.
TELEPHONES: There are presently no facilities for shipboard telephones but it is programmed to provide telephones for the use of ships in the future.
SPECIAL SERVICES: The services of Classification Society Surveyors, Tank Cleaning Operators, Compass Adjusters, Divers and Underwater Cleaning and D/F Calibration Adjusters are available in the area.
BANKS: Almost all the commercial banks in Kuwait have their branches at Shuaiba Industrial Area.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Passport or Seamen's Book necessary.
GARBAGE DISPOSAL: Skips can be provided and placed alongside a vessel. Requests for this service should be made to the Port Authority.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: Kuwaiti Dinar (KD). U.S.$ 1.00 = KD 0.290 (approx.). U.K.£ = KD 0.550 (approx.).
PORT REGULATIONS: The following are excerpts of some of the more important port regulations:

Fire fighting appliances to be kept in readiness for immediate use.

Pumping or discharging in any way into the sea oil fuel tanks, bilges, dirty ballasts, etc., is prohibited.

Disposal of garbage over the side of the ship into the harbour is prohibited.

The presence of a Pilot on board a vessel shall not relieve the Master of his responsibility regarding the safety of the vessel. The Port Authority shall have the right to claim against a vessel for any damage caused by that vessel to berths, shore installations, tugs, buoys, etc.

The Harbour Master or his deputy may order a vessel to leave the berth at short notice in the case of emergency, bad weather, etc.

Vessels carrying explosives or dangerous cargoes must declare quantities and categories of same when they report their ETA.

Crew members are prohibited from swimming within the harbour.

Lowering into the water of ship's life-boats, launches or life-rafts is prohibited without the written approval of the Harbour Master or his deputy.

Mooring of ship's life-boats, launches or life-rafts to navigational marks and buoys is prohibited.

Due regard shall be given to the safety of divers when they are working within the Port Limits. Engines should be stopped when approaching their working area at a circle of 150 m. The launch attending divers displays the International flag letter "Alfa" during diving operations.

SHIPMASTER'S REPORT: May 1980 (Updated 1990). Vessel loading ammonia.

Approaches: Charts B.A. 3773 and BAP1223. The complex lies about 1.5 miles South of the port of Mina Al-Ahmadi.

At the time of call the Decca chain was not operating. Approach is fairly straightforward with good positions being obtained by radar and from the various light floats and buoys that abound.

Currents appear to follow the trend of the coastline.

Anchorage: There is no night berthing allowed on the Ammonia Berth. Vessels arriving during the hours of darkness are asked to anchor about 2 miles due East of the berth.

Pilotage: Pilots will board the vessel about 1.5 miles due East of the berth, usually from a tug.

Call Port and Pilots on Channel 16 VHF, usually work 13 or 14 thereafter. Communication was good, fluent English. Vessel has the option of berthing either side alongside and, if not heavily loaded, would suggest starboard side to with the head out.

Two powerful tugs available for berthing, usually only one required for sailing. Tug's lines, lying alongside.

Length of pilotage about one and a half hours to being secured.

Berth: Consists of a "T" jetty, the head of which lies about 340°/160°. The stem of the "T" is 1,000 m. long and the head about 800 m. long.

The Ammonia Berth lies on the Northern side of the "T" and inside.

Quoted depth is 40 ft. which was borne out by soundings. The Pilots however quoted a max. sailing draft of 36 ft.

The Ammonia Berth itself is about 350 m. long. The concrete sections of the jetty are currently undergoing repair and this affected the mooring arrangements. Besides this there are lamp standards which may interfere with lines in the future. Usual mooring arrangements, 3 headlines, 2 breastlines and 2 springs.

Gangway: It is only possible to use ship's gangway when lying starboard side to as it fouls the Chicksan area when head in. Careful positioning and tending is required.

There is a group of Chicksans which handle oil products about halfway along the jetty and the ammonia Chicksans lie just South of these.

No VRL. No venting.

Shore personnel connected the Chicksan (bolted) and no reducer was necessary.

Cooldown: Charterers asked us to limit the amount of coolant taken to 300 tonnes. Petrochemical Industries Company (who operate the berth) would have allowed us to take this coolant into more than one tank had it been possible or necessary. They were very conscious of us having to vent excess pressure (using 'cascade' system for atmospheres) and went to great lengths to ensure no ammonia vapour was discharged to atmosphere.

Control of cargo rate was very good.

Vessel has to anchor at least three miles off berth to complete cooling.

Notice of Readiness: Was tendered on arrival and again on completion of purging/cooling operations. Cable "Ammoniaship". This was not accepted until secured in the loading berth and ready to load.

Loading: Despite the length of pipe-line from the refinery the product was reasonably cold and they have a recirculating system which enables stopping cargo at very little notice.

Berth operators were quite happy with bottom temperatures only at −32°. Loading rate is quoted at 1,000 t.p.h. but our overall average was only 605 t.p.h. at which the operators expressed themselves as satisfied.

Throughout the whole cooling and loading programme the vessel was under continual close scrutiny from shore personnel. The technical ability of these people was very high indeed (although very fair and practical minded). Pressure graphs and temperatures were checked and noted hourly together with hourly rates.

Redwoods attended as surveyors throughout. Bills of Lading are presented before sailing and are usually claused "Freight Prepaid".

Output of the plant is quoted as about 700 tonnes of liquid per day, but the fertiliser division apparently has first call on product which may result in short loading.

Note: The port office, which is situated at the junction of the "T", is very sensitive to ammonia smells and the personnel there test the atmosphere using Draeger tubes.

Bunkers: Diesel oil taken at this call and vessel has to position under the oil chicksans. This requires shifting ship to or from the loading chicksans.

Bunker suppliers, KNPC, will NOT accept bills signed over Time Charterer's stamp. Ask Owner for permission to sign the bills 'clean' prior to arrival.

General: Shore passes required. Prior arrangements to be made by sending necessary information to the agent concerned, at least 3 days prior to ship's arrival.

Transport: Necessary to get from jetty to shore. This is provided on a continual basis.

Alcohol: Customs will allow alcohol to be issued to bars. It is better to arrive with these emptied and ask for an allowance. As usual, it is a very grave offence to offer alcohol to shore personnel.

Fresh Water: Available but none taken.

Medical: There is a medical centre ashore which provides a very efficient service for vaccinations.

General: Service is available for radars and Decca Navigator.

No stores taken.

Items may be landed for despatch to UK after informing the Customs and providing a description of the packages, etc.

Personnel may be repatriated (no alcohol in baggage) and there is a frequent service to UK.

Agents: Kuwait Oil Tanker Company, cables 'Minatank Kuwait'.

In case of emergencies they have an office on the shore which is manned 24 hours. If necessary to telephone UK one has to go to the head office at Ahmadi. Agents usually work Channel 26 VHF.

Departure: About four hours should be allowed for completion of paperwork before sailing. Vessel may leave the berth at night.

AUTHORITY: Ports Public Authority, P.O. Box 3874, Safat, 13039 Safat, Kuwait. *Tel:* 4812623, 4833709. *Telex:* 22740 Hmshp Kt. *FAX:* 4819714.

Contact: Captain A. R. Al Naibari, Director General.

Ibrahim A. Aziz Al-Fulaij, Shuaiba Port Director., Shuaiba Port., P.O.Box 10099, Shuaiba, 65451 Kuwait. *Tel:* 5394375. *Telex:* 44235 PORTS. *FAX:* 3260114.

AGENT: International Shipping Agency Limited, POB 20637, 13067 Safat, Kuwait. Old KIC Building, 1st Floor, Safat Square, Ahmad al Jaber Street, Kuwait, State of Kuwait. Tel: 2441860, after hours 5390567. Fax: (965) 2415732. Telex: 22208 (Answerback "Isaship Kwt") and 22396 (Answerback "Isatug Kt"). Cables: "Shipagent, Kuwait".

In the case of tankers, agency services are provided by the Kuwait Oil Tanker Company.

SHUWAIKH (Kuwait Harbour): 29.21 N. 47.56 E.

(See Plan)

PORT LIMITS: According to the General Port Rules (1959) the Seaward Limits comprise all waters in the area confined by line drawn in direction 000° from Ras Al Ajuza, (Lat. 29° 23′ 27″ N., Long. 48° 00′ 24″ E.) to the parallel of Lat. 29° 30′ 00″ N. Hence in direction 230° to Ras Al Ashairij Lat. 29° 23′ 15″ N., Long. 47° 51′ 00″ E. For the seaward boundaries of the Port within which a vessel is considered to be on "arrived ship", refer to "Anchorage".

DOCUMENTS:

Manifest: 15 copies which should clearly indicate weights in metric tons and measurements in cubic metres and each copy should be duly signed and stamped by the loading port Agent.

The copies of the manifest may be photostat copies or carbon copies but it is imperative that the stamp and signature made by the loading port Agent is appearing in original on each copy.

If cargo is carried in transit a separate transit cargo manifest (15 copies) is also required in same fashion as above.

Bills of Lading: 5 sets of non-negotiable copy Bills of Lading i.e. ordinary carbon copy Bills of Lading. Photostat copies will not be accepted.

In addition the following documents are to be provided:

4 copies of Final Cargo Stowage Plan, duly signed and stamped on each copy by the loading port Agent. Photostat copies are accepted as long as same are signed and stamped.

4 copies of Hatch List as above.

If dangerous cargo is being carried 2 copies of a separate Dangerous Cargo List is also required and again each copy to be duly signed and stamped by the loading port Agent.

Also 2 copies of Crew List to be presented to Customs Office.

1 copy of Crew List, 2 copies of Passenger List, all Seaman's Books or Passports, 1 photograph of each crew member for the Immigration Office.

1 copy of Crew List, 1 copy of Vaccination List, all vaccination books for Quarantine Office. Immediately on berthing place the rat guards on mooring lines.

Ship's Registry, Loadline, Cargo Safety Equipment Certificate, Safety Radio Certificate and Last Port Clearance to be presented for port clearance.

APPROACHES: Vessels arriving at Shuwaikh port:

1. All vessels calling at Shuwaikh Port shall abide by taking their course at 000° from position: 28° 36′ 02″ N., 48° 54′ E. up to one nautical mile North East of Ahmadi Light Vessel.
2. To observe its course through 294°, from one nautical mile towards North East Ahmadi Light Vessel, up to a distance of 3.8 nautical miles towards 160° from the Sea Island. From such a position the vessel shall take the course and observe the direction leading it to Shuwaikh Anchorage.
3. Speed of vessels shall not be less than 10 knots until passing Ras Al Ard Lighthouse.

PILOTAGE: Pilotage service available and request for Pilot should be made to Port Signals Station, or to look-out Signal Station when in use. Ships proceeding through the dredged channel to Shuwaikh are boarded by the Pilot in the anchorage. Pilotage not compulsory in the Outer Anchorage.

MAX. SIZE: Max. draft at Berths No. 1 to 14, 9.5 m., and Berths No. 18 to 21, and dolphin berths, 8.0 m. Max. draft at Berths No. 15 to 17, 6.0 m. These drafts allow 0.6 m. of water under the keel. Tidal range is about 3.5 m. Berthing draft dependent upon tide at time of arrival.

ANCHORAGES: Ships may take up anchor berth in the Outer Anchorage, without the Pilot.

Because of congested anchorage, and for the benefit of all concerned, the Outer Anchorage (BA Chart 1214) was divided into areas, and the approach waterway of 3.0 miles in width from Ras Al Ardh to anchorage and vice versa, is left free for navigation.

Anchorage Areas:

(a) Anchorage area reserved for the national fleet.
(b) Waiting area for vessels which have received berthing instructions.
(c) Anchorage area for vessels with cargo to discharge in Kuwait.
(d) Anchorage area for vessels calling for fresh water, provision, crew changes, transhipment, or any reason other than discharging cargo.
(e) Temporary anchorage area for vessels awaiting entry to anchorage (D).

When the movement is confirmed the vessel should hoist:

By Day: "G" Flag over a Black Ball or Shape.

By Night: A White Light over a Red Light, visible all round.

Note: (1) The Master shall advise the Director of Marine Operations (D.M.O.) and/or the Pilot of any damage or disability to the ship under his command, *before berthing.*

Ship unable to comply with the berthing instructions, should notify the D.M.O. in ample time of their inability to do so, by VHF, or by Telex No. 22740 HMSHP KT/44800 TCRA KT or by Fax No. (0965) 4818472/4814196.

Any ship sailing from the outer anchorage for any reason, should notify the Kuwait Harbour Control that she is sailing and give the reason.

(2) The D.M.O. may direct any vessel to move from one berth to another, or vacate a berth as circumstances demand.

HEALTH: Vessels calling at Shuwaikh Port must send the following information to "Health Port Shuwaikh" by cable:

(1) Name of vessel
(2) Last port of call
(3) Health condition Crew members
(4) Validity of Cholera Certificates
(5) Request for Free Pratique

Vessels arriving at Outer Anchorage must hoist "Q" flag, and keep it hoisted until Free Pratique is granted.

Free Pratique will be granted usually at anchorage, and in some cases alongside, at the discretion of the Quarantine Officer.

No person, except the Pilot, shall board the vessel, before Pratique is granted.

RADIO/VHF: *Signal Station:* (Call Kuwait Harbour Control)

There is Lookout Signal Station at Ras Al Ajuza (Lat. 29° 23.3′ N., Long. 47° 59.8′ E.) and a Port Operation VHF/RT Service at the same position. The VHF/RT is a Single Frequency Simplex Service, operating on Channel 11 (156.550 MHz) and 12 (156.600 MHz). Working restricted to messages relating to the Movements and Safety of Ships.

All vessels arriving should establish contact with Kuwait Harbour Control as soon as possible by VHF. Tel: 2449154, 2435873.

Kuwait Coastal Station (9 KK) operates throughout 24 hours.

Radio Station:

2182 kHz 8802.4 kHz
2765 kHz 13182.5 kHz
2750 kHz 17328.5 kHz
4434.9 kHz 22699.0 kHz
6518.6 kHz

Radio Telegraphy – 9 KK:

9 KK 9 KK 2 – 4299.4 kHz
500 kHz 9 KK 4 – 6381.4 kHz
450 kHz 9 KK 6 – 8525.4 kHz
9 KK 8 – 12895.4 kHz
9 KK20 – 12925.7 kHz
9 KK22 – 16995.7 kHz
9 KK23 – 22504.7 kHz

Marine Communications

This Service links the ship directly with their Agent or Principal in Kuwait and the Call for this Branch is "Kuwait Maritime".

The "Kuwait Maritime" Service covers all the ship's calls with Kuwait and abroad. The procedure is as follows:

Agent to Ship

Call by telephone No. 108 Kuwait Maritime, asking for connection, giving the Name of the Ship, and her Call Sign. The Kuwait Maritime operator will contact the ship for you on Channel 16 (156.800 MHz) and then transfer to vessel's frequency for communication.

Ship to Agent or Abroad

Call "Kuwait Maritime" on VHF Channel 16 (156.800 MHz) and ask to be connected to Agent or abroad.

TUGS: Join vessel entering dredged channel, Tug's lines used. The use of tugs by ships manoeuvring within Shuwaikh port limits under direction of D.M.O. or Pilots.

Charges:

(a) 75.000 K.D for over 750 h.p. tug per hour or a part of hour.
(b) 25.000 K.D for less than 750 h.p. tug per hour or a part of hour.
(c) Using of tug is compulsory, in the limit of port.
(d) Use of tugs is compulsory for ships over 63 m. length.

REGISTRATION PROCEDURE: Notification of vessel's arrival. According to port regulations a questionnaire issued by the D.M.O., duly filled in and signed by the Master of the vessel, is to be submitted to the port prior to berthing. In many cases vessels arrive and obtain berth immediately and thus there is no possibility of presenting the questionnaire to Authorities in time. In order avoid berthing delays Masters should cable following information to the D.M.O. directly, 48 hours before arrival:

(a) ETA.
(b) Total cargo for discharging Kuwait.
(c) Distribution quantity each hatch.
(d) Declaration hazardous, flammable and explosives cargo, and guns and ammunition.
(e) Declaration all vessel's winches in good working condition and cargo clear for discharging at Kuwait.
(f) Draft fore and aft.

We quote below specimen cable covering the above:

"Vessel XXX ETA Kuwait 21/8 0600 local quantity discharging 1,400 tons general hatch one 300 hatch two 300 hatch three 250 hatch four 300 hatch five 250 no hazardous, flammable explosives guns ammunition stop All winches derricks good working condition draft fore 7.0 m. Aft 8.0 m. Kuwait cargo clear for discharging".

The above cable sent to the D.M.O. will facilitate berthing vessel on time. ETA to be reconfirmed before 24 hours, if any change.

Also see "Shuaiba – Notice".

Also cable Health, Port of Shuwaikh: ETA, last port, crew health, validity of certificates, and request Free Pratique.

Apart from above, on dropping anchor contact Port Health, Tel: 4811344, through Kuwait Maritime Channel 16 and request Free Pratique, and on receiving same inform Agent by VHF or by cable.

When approaching the anchorage vessel should hoist her "Call Sign" and "Quarantine" flag.

On arrival at anchorage contact Harbour Control and standby VHF Channel 16 when at anchorage.

Also send acknowledgement to ship's Agent stating time cable sent to Director Marine Operations Department.

BERTHING/CRANES:

Berth No.	*Overall Length (m.)*	*Depth Below ACD (m.)*	*Max. LOA of vessel allowed to berth (m.)*	*Max. Permitted draft (m.)*	*Cranage*
1	186	10.06	175	9.6	Grain elevator 250 t/hr.
2, 3, 4, 5	180	10.06	175	9.6	2 cranes×3 tons capacity (For each berth) 1 crane×6 tons capacity (For each berth)
6, 7	180	10.06	175	9.6	3 cranes×3 tons capacity (For each berth) 1 crane×6 tons capacity (For each berth)
8	218	10.06	200	9.6	Cement elevator 350 t/hr. 3 cranes×3 tons capacity 1 crane×6 tons capacity
9, 10	200	10.06	220	9.6	3 cranes×3 tons capacity (For each berth) 2 cranes×6 tons capacity (For each berth)
11	200	10.06	220	9.6	3 cranes×3 tons capacity 2 cranes×6 tons capacity
12, 13	180	10.06	225	9.6	2 container gantry cranes 40 ton capacity under the spreader. 1 mobile crane, 30 tons capacity

Berth No.	Overall Length (m.)	Depth Below ACD (m.)	Max. LOA of vessel allowed to berth (m.)	Max. Permitted draft (m.)	Cranage
14	200	10.06	220	9.6	3 cranes×3 tons capacity 1 crane×6 tons capacity
18	185	8.53	200	8.0	3 cranes×3 tons capacity
19, 20	200	8.53	220	8.0	2 cranes×3 tons capacity (For each berth)
21	200	8.53	220	8.0	3 cranes×3 tons capacity
15	185	6.7	180	6.0	3 cranes×3 tons capacity 1 crane×6 tons capacity
16	140	6.7	110	6.0	1 crane×3 tons capacity
17	200	6.7	220	6.0	3 cranes×3 tons capacity
17A	75	6.7	50	6.0	
14A	80	10.06		9.6	For Ro/Ro ships only

Note: There are 2 Dolphin Berths with depth alongside of 8.53 m. below ACD and capable of taking vessels up to 185 m. in length and 8.0 m. draft.

Entrance channel is 150 m. breadth and 8.53 m. depth (below ACD).

The Curvature of the channel has been recently widened, allowing vessels of 260 m. to pass through. Such vessels are allowed to berth provided that their draft is not greater than 9.6 m.

Closed Stores:

Store No.	*Area* (sq.m.)	*Store No.*	*Area* (sq.m.)

Areas North of Ghazali Street	260,000	

Total area of open storage: 488,600 sq.m.

Container Stacking Areas:

Container Terminal	120,000 sq.m.
New Extension	145,000 sq.m.
Total Container Stacking Area:	265,000 sq.m.

STEVEDORES: All stevedoring and transport inside the port is performed by an authorised contractor.

Container work is handled by Shuwaikh Container Terminal (SCT). Plans are under consideration for specialised container berth facilities.

There are four Cement Silos of capacity 14,000 tons each adjacent to Berth No. 8. Discharging rate is 350 tons per hour.

Working Hours: General Cargo Handling:

Winter (1st November – 31st March):

Saturday – Wednesday	0700-1430 1430-2200
Thursday	0700-1230 1230-1800

Summer (1st April – 31st October):

Saturday – Wednesday	0630-1400 1400-2130
Thursday	0630-1230 1230-1830

Overtime is compulsory for all vessels. On Fridays, only work on vessels which are to be completed during the day.

Container Terminal: 24 hour working.

MEDICAL: Masters to radio prior arrival if medical attendance required on board. Hospital facilities available.

A rescue vessel, 90 ft. and 20 knots speed, equipped with surgery, operating theatre and all medical appliances is maintained by the Ministry of Health.

DENSITY: 1028 (Winter); 1036 (Summer).

FRESH WATER: All berths except Berths No. 1 to 7, have fresh water connection, and water can be supplied by pipe-line. Rate 20 to 25 t.p.h. In addition to water available alongside the berths by pipe-line and hose, water may be supplied by barge to ships alongside dolphin berths. There are 2 private companies supplying fresh water alongside and at anchorage by barge.

FUEL: Fuel oil and gas oil supplied by bunker tankers. For quality and prices please enquire from the Agents.

FIRE PRECAUTIONS: Shuwaikh Fire Brigade is responsible for all fire fighting in port areas and storage areas. There is also a fire station situated near the Small Boat Harbour, where the 3 fire fighting tenders are berthed. A salt water main for the fighting services is laid at all berths. There are two 90 ft. fire fighting tenders capable of pumping 5,000 gallons of water per minute from 4 nozzles. In addition they can pump 900 gallons of foam per minute. The 98 ft. fire fighting tender is capable of pumping 9,000 litres of water per minute and 650 litres of foam, and the capacity of her pump is 4,500 litres of water or 143.5 litres of oil. The tender has 8 nozzles for water and 2 nozzles for foam. These modern fire-fighting units are equipped with radio, radio-telephone, radar, etc.

REPAIRS: All deck, hull and machinery repairs can be carried out by local shipyard. Repair facilities available for Gyro, Radar and electronics.

DRY DOCK: Floating dock lifting capacity 35,000 tonnes, dimensions 190 m. × 32 m. Syncrolift rated lifting capacity 2,000, tonnes.

SURVEYORS: Lloyd's Register of Shipping (Kuwait): American Bureau of Shipping (Kuwait); Bureau Veritas (Kuwait); Norske Veritas (Bahrain).

GANGWAY/DECK WATCHMEN: Gangway Watchman compulsory (see "Regulations").

OPENING/CLOSING HATCHES: Opening and closing of hatches is normally carried out by the stevedores on liners, and by ship's crew on charter vessels.

CERTIFICATES: A survey of life rafts may be carried out unless vessel's safety certificates indicate that life rafts were surveyed less than 12 months previously.

CUSTOMS ALLOWANCES: Tobacco: No restrictions. Wine and/or spirit allowance: Alcoholic beverage is strictly prohibited to be held out of bond. Master allowed to keep limited quantity in his cabin.

CARGO GEAR: Ship's gear and cranes used for discharging.

REPATRIATION: Can be arranged.

Also see "Visa Regulations" in "General" before first port.

AIRPORT: Served by regular airlines. Airport 17 km. from town.

TIME: GMT plus 3 hours.

HOLIDAYS: New Year's Day, Id Al Fitr, National Day (February 25th), Mount Arafat Day (Wakfa), Id Al Adha, New Hijra Year, Birthday of Prophet Mohammad, Isra walma'raj. The above days are subject to alteration.

TELEPHONES: Cannot be arranged on board.

SERVICES: Swedish Welfare for Seamen. Lloyd's Surveyor. Butterworth Tank Cleaning Machines and Equipment and also underwater cleaning.

PROVISIONS: All kinds of food available at reasonable prices.

SHORE LEAVE: Only permitted for Consular matters, medical reasons and making emergency telephone calls. Contact Agent for further information.

Shore passes are issued and must be returned to Immigration prior to departure, if not returned a heavy fine will be imposed. Crew members require a photograph but this is not returned.

IDENTIFICATION CARDS: Passport or Seaman's Book necessary.

GENERAL: The following is required from all vessels calling at Kuwaiti ports for the first time:

Quote:

> The Harbour Master Department of the Ports Public Authority, with immediate effect, request that Masters of vessels calling for the first time at Shuwaikh Port should give in their ETA cables, details of cargo on board, the length, width, number and condition of hatches, discharging facilities, and any other information which they may consider necessary in assisting the Ports Authority to allocate the vessels the best berth possible.
>
> Such information will considerably help all concerned and at the same time prevent unnecessary delay and unjustified extra charges to owners, since in the event that the allocated berth is not suitable, the Harbour Master shall have no alternative but to shift that particular vessel to another suitable berth, or take it out to anchorage.
>
> Furthermore, it has been observed some Masters of vessels are not indicating in their ETA cables to the Harbour Master the word "Kuwait" when indicating the tonnage figures of cargo onboard, clear and ready for discharging. It is imperative that the Master should say in his cable 'ETA . . . hours. Cargo for Kuwait . . . tons clear and ready for discharging draft . . . ft.

Unquote.

REGULATIONS: The State of Kuwait has stringent laws in force concerning the pollution of the sea by oil. The following are two amended paragraphs of this law:

Paragraph 1, Art. 4. "A person responsible for any pollution as described in Articles 1 and 2 shall be punished by a fine of not less than one thousand and five hundred and not more than forty thousand Dinars. In the event of his committing a similar crime within a period of one year from the date of his conviction, such a person shall be punished by a fine of not less than three thousand and not more than forty thousand Kuwaiti Dinars, and in the event of his committing yet another crime within a year from this last conviction he shall be punished by a fine of forty thousand Kuwaiti Dinars".

Paragraph 3, Art. 6. "The person responsible for pollution may suspend the detention order against the ship on payment, as a cash guarantee, of forty thousand Kuwaiti Dinars to the official entrusted with the execution of such order".

The Master shall advise the Harbour Master and/or Pilot of any special damage or disability to the ship under his command before berthing or unberthing.

A vessel in outer anchorage receiving a Movement Order in writing, by signal or VHF, and awaiting the Pilot, shall carry:

By Day: "G" Flag, over a black ball or shape.

By Night: A white light over a red light.

Ships that receive instructions to berth at specified hours and not adhering to these instructions could lose their turn and be liable to pay charges for the time lost at the berth, and facilities arranged for and not used due to such delay.

Ships that receive instructions to unberth at specified hours and not adhering to these instructions, i.e. retarding the movement of incoming ship, will be liable to pay charges for time lost at the berth and the facilities for the incoming ship, and not used, due to such delay.

Ships unable to comply with the berthing or unberthing instructions should notify the Harbour Master in ample time of their inability to so do by VHF, visual signals, personally or through Agent.

A ship entering or navigating within the dredged channel or inner basin shall have at least 1 anchor ready for immediate use.

The Master of a ship alongside Shuwaikh Wharf or dolphin berth, shall ensure that:

(a) Vessel not allowed to use VHF to any vessel except to call Kuwait Harbour Control or Kuwait Maritime.

(b) A safe and proper accommodation ladder to the quay is provided, adequately lit during the hours of darkness.

(c) A Quartermaster or watchman is stationed on deck, in charge of the ship's gangway, who shall inform the Master or the Duty Officer whenever required by the Port Authority Officials, and shall check that no authorised persons will enter the officer's or crew's accommodations. Gangway must be lifted up whenever vessel is not working, and at 2200 hrs. daily.

(d) The crew or watchman to attend the mooring ropes and lines, and shall cause their adjustment from time to time, as necessary on the rise and fall of the water.

(e) That no substance, matter or material is thrown overboard, either into the water or on to the wharf.

(f) That no engine repairs are undertaken which would prevent the movement of the vessel under her own power, without first obtaining the permission of the Harbour Master.

(g) That all pipe discharges on that side of the ship nearest to the wharf are either adequately and properly covered to prevent their effluent falling on to the wharf, or their use discontinued while the ship remains alongside.

(h) It is forbidden to jettison or ballast other than clean water or pump out the bilges or oil of any description within the port limits.

(i) All ships loaded with petroleum or crude oil at the wharf shall have the end of a steel hawser of sufficient strength, paid out to the water edge, at the offshore bow and quarter, to enable tugs to take the vessel to place of safety with the least possible delay.

(j) The Master shall at all times retain on board sufficient crew to work his ship.

(k) Ratguards to be fixed to all ship's mooring ropes.

(l) The Master shall not shift his vessel while alongside the wharf, prior to receiving permission from the Harbour Master or Berthing Master.

(m) The Master shall not connect water hoses to the water supply points and take water on board before receiving permission from the person in charge of water distribution.

(n) The Master shall report to the Harbour Master or Berthing Master any incident, accident or unusual happening on board his ship.

The Master not complying with the above-stated Port Rules, shall be liable to suffer the penalties prescribed for contravention.

Warning: Port tugs are supplied with nylon and polypropylene hawsers, which require particular attention when securing to ship's bollards, in order that they do not slip. Extra turns than normal on the bollards are recommended.

NOTICE:

Supplied to Ship's Master, on arrival, by Agent (October 1984).

1. One watchman to be kept regularly on gangway.
2. Immediately the labourers leave the vessel after each night shift the gangway should be taken up and not to be lowered before 0600 hrs. next working day.
3. Strictly forbidden to sell any alcoholic drinks onboard or to bring on to jetty.
4. Rat guards to be fixed properly on the ropes.
5. No cleaning of decks, painting of hull or welding on deck is allowed when vessel is alongside jetty.
6. Neither fresh nor dirty water should be pumped out alongside jetty for any reason and under any circumstances.
7. No garbage should be thrown either on jetty or in to sea at any time and under any circumstances.
8. Any pollution either during supply of bunkers or at any other time and for any reason is entirely your responsibility.
9. No repairs or dismantling of engines are allowed unless prior written approval from the Harbour Master is granted.
10. Vessel's draft should not exceed that draft on which she was allocated a berth.

Maximum drafts of/on various berths are:

Jetty Nos. 1 – 14 inclusive	31 ft. 6 in.
Jetty Nos. 18 – 21 inclusive	26 ft. 6 in.
Dolphins	26 ft. 6 in.
Jetty Nos. 15 – 17 inclusive	19 ft. 6 in.

NOTES

Please also advise Shipping Guides Ltd.

Latvia

RIGA: 56.58 N. 24.06 E. (See Plan)

GENERAL: A Baltic seaport, Riga is situated at the mouth of the Daugava (Western Dvina) River falling into the Gulf of Riga.

The water area of the port is formed by the lower part of the Daugava River from the mouth up to a bridge, thence by the Milgravis Channel and Sarcandaugava Creek.

The roadstead of the port is situated at the mouth of the Daugava River.

The port is open for navigation all the year round, but ice-breaker assistance is required about 4 months of the year.

The Gulf of Riga is frozen over for quite a long time. On the coast of the Gulf, ice first appears in December and finally disappears in April. The middle part of the Gulf gets frozen over only in severe Winters and for a short period. Usually ice in this area is mostly drift ice.

Considerable changes of the water level may be caused by strong winds and variation in atmospheric pressure ("Seish" effects).

The range of the water level caused by winds depends on the force of the wind, direction and period of time it blows.

Most sharp rises and falls of the water level are observed at the mouth of the Daugava River. They may reach at times 1.3 m. – 1.8 m. higher and 0.9 m. – 1.1 m. lower than the datum at Kronshtadt.

The level of the water in the port usually depends on the ordinary water level in the Daugava River.

The max. rise of the water level caused by winds may reach 2 m. higher and fall 1 m. lower than the mean water level observed over a period of many years.

The entrance channel is available for ships with maximum draft 12.5 m. from Light Buoy "B" to the inner road situated 3 miles from the Daugava River.

DEEP SEA PILOTAGE: See "Baltic Deep Sea Pilotage".

PILOTAGE: Compulsory. Agent will arrange Pilot on receipt of ETA at Receiving Buoy "B", which is to be given 96, 48, 24 and 4 hours prior arrival. Also advise with ETA details of cargo, last port of call, passengers if any, ship's draft and length.

Pilot meets vessel at Receiving Light Buoy "B" (Lat. 57° 06′ N., Long. 23° 57′ E.). In case of bad weather, when Pilot is unable to come aboard, vessel should follow in the wake of a pilot boat, up to the mouth of the river, where Pilot will board vessel.

4 hours prior to arrival at this buoy the Master should advise his ETA by VHF, Channel 9, via CPR.

Vessels leaving the port should navigate under Pilot control to Receiving Buoy "B".

Ships going to the port of Riga may receive a Pilot for the passage of the Irben Strait at the roads of the port of Ventspils. ETA to agent in Riga 2 days prior to arrival at Ventspils Roads.

The order for the Pilot from Riga to Ventspils Roads must be given to agent in Riga 1 day prior to sailing.

Pilotage in the Irben Strait is not compulsory but it is recommended for ships with a large draft.

The Pilot assistance will be particularly useful during Winter, when navigation is effected as a rule, with an icebreaker in the convoy.

Also see "Radio/VHF".

ANCHORAGE: The position in which to anchor will be advised by the Duty Officer at the Port Radar Service. The best anchorage can be obtained in the Port of Riga Roads, at a distance 7.3 miles off the Daugavgriva Lighthouse, bearing 312° (N.W.) of Light Buoy "B". Depths in the anchorage are from 32 m. to 35 m. The bottom is mud and sand. It is not recommended to come closer to the shore without a Pilot on board.

The Port of Riga Roads are situated N.W. of the entrance to the mouth of the Daugava River.

The Roads are open to winds blowing between S.W. and N.E.; therefore, in Autumn, when these winds prevail, anchorage there is unsafe.

In periods when heavy waves in the roads are caused by fresh Northerly winds, vessels are recommended to leave the roads for shelter in the port or go to the open part of the Gulf of Riga.

RESTRICTIONS: Permitted draft for the entry into port is 10.06 m. at the mean water level.

Entry to the Daugava River and the Port of Riga is accessible for vessels having drafts ensuring safe passage across the river bar.

As a rule, vessels passing along the channel are requested to have keel clearance not less than 0.45 m.

The speed of vessels navigating in the Daugava River should not exceed 6 knots.

There is no restriction on time of entry to the port.

Large vessels laid up with ballast water are not allowed to shift berth during winds Force 6 Beaufort Scale and over.

Passage of the Daugava River is prohibited for ships having anchors under water.

The speed of the Daugava water stream in a low-flow period is insignificant, but it may sharply rise at the time of discharge of water through the overflow weir of the Riga hydro-electric power station. The operational schedule of the station requires such discharges.

To avoid damages, to the underwater parts of a berth while mooring or unmooring, every vessel must have the main engines going "dead slow" until her stern is not less than 15 m. from the quay.

MAX. SIZE: Max. LOA 225 m. Max. permitted draft for vessels going to berths of the port for discharging is 10.06 m. in fresh water, if the water level is "O" datum at Kronstadt.

Vessels having draft more than 10.06 m. are discharged into barges in two inner roads which have 3 mooring buoys, each 3 miles from the mouth of the river. Max. permitted draft for vessels going to the inner road for lighterage is 12.5 m. in fresh water, if the water level is "O" datum at Kronstadt.

HEALTH: Pratique obtainable after vessel's mooring when Health Officials visit vessel with Immigration and Customs Officers. Health Inspector to be informed of any medical assistance required.

RADIO/VHF: Vessels can establish ship-shore radio contact via the port radio station Riga Radio, operating 24 hours a day.

Station	*Call Sign*	*Channel*
Port Radio	Riga Radio 1	16, 14
Port Controller	CPR	9, 14
Port Dispatcher	Riga Radio 2	14
Harbour Master	Riga Radio 5	9,16
Ship Movement Control (SUDS)	Riga Radio 9	9
Radar Control		9
Control Post	Riga Radio 17	67
Control Radar Service Post		20

Arrival Advice: Send ETA at the Approach Lt. Buoy "B" 96 hours, 48 hours, 24 hours and 4 hours in advance. The following information should be forwarded along with the ETA:

(a) Type and name of vessel.
(b) Nationality and name of owners.
(c) Time of approach (to area of operation of SUDS).
(d) LOA, beam and freeboard.
(e) Actual draft and draft in fresh water.
(f) Type and quantity of cargo.
(g) Last port of call and passengers (if any).

Information Broadcasts:

(1) SUDS provides vessels with navigational, hydrographic and hydro-meteorological information. SUDS also assist in establishing communications between ships, onshore organisations and services.

(2) The Port Authority broadcasts weather reports, valid for the following 24 hours on VHF Channel 14 at 0815 hrs., 1200 hrs. and 1700 hrs. LT.

Notes:

(1) Messages can be sent through, and the port may also be reached through Riga, (UDH) (UKB).

(2) Harbour Master accepts requests for deep sea pilots for the Baltic.

VTS: This is a mandatory system which applies to all vessels navigating within the area controlled by the Ship Movement Control Service (SUDS).

Area: All the waters of the port including the inner and outer roadsteads. All waters within an area of radius 10 nautical miles from the Approach Lt. Buoy "B".

TUGS: Use of tugs is obligatory. The number of tugs depends on length of the vessel and place of berthing.

BERTHING: Berths of the port with depths up to 10.0 m. alongside are equipped to handle general, containers and bulk (ore, coal) cargoes, metals, timber, grain, food products and passenger traffic.

Number of tugs to be ordered for entry assistance or for shifting berth is decided by Master in accordance with Pilot's recommendation.

Cranes of up to 40 tons capacity are operated on the quays and by the warehouses. Also, there are floating cranes with lifting capacity of up to 100 tons, other cargo handling equipment and intra-port transport.

SPECIALISED CARGO HANDLING FACILITIES: Berths No. 16 – 19 are suitable for handling of ships type Ro-12. Berths No. 32 – 33 are suitable for handling of ships type Ro-12, Ro-30 and Ro-60.

BRIDGES: Minimum height of electro-transmission line crossing the Daugava River is 61 m.

MEDICAL: All medical assistance available.

STEVEDORES: Master's and/or Shipowner's information of cargo details, stowage, etc. is required in advance. Information should be addressed to agent in Riga.

DENSITY: About 1002.

FRESH WATER: Available. Delivered from shore or by barge to Inner Roads.

FUEL: Bunkers may be delivered to the Roads or supplied at berth by barges during loading/discharging of non-inflammable cargoes.

CONSULS: None.

REPAIRS: Repairs possible for hull, machinery, radio and navigational equipment. Floating crane available, capacity 100 tons. All kinds of repairs for vessels up to 30,000 d.w.t. can be carried out.

GANGWAY/DECK WATCHMEN: Recommended. These duties normally performed by crew.

OPENING/CLOSING HATCHES: Opening and closing of hatches is usually done in accordance with conditions of Charter Party.

CUSTOMS ALLOWANCES: No restriction on quantities, but nothing may be taken ashore.

REPATRIATION: Crew changes and repatriation possible.

AIRPORT: International airport not available. Internal communications between Riga and most cities is possible.

TIME: GMT plus 3 hours in Summertime in from last Sunday in March until last Saturday before last Sunday in September.

HOLIDAYS: See "Ventspils".

TELEPHONES: Installation and use charged according to existing tariffs.

SHORE LEAVE: Crew allowed ashore.

IDENTIFICATION CARDS: Seaman's Book required.

AUTHORITY: The Port of Riga Authority, 6 Vilis Latsis Street, 226180-Riga, Latvia. *Tel:* 32-93-54, 32-92-54, 32-92-35. *Telex:* 161117 Buhta. *Cables:* Morport Riga. *Contact:* Y. Silayev, Harbour Master.

VENTSPILS: 57.24 N. 21.33 E. (See Plan)

GENERAL: A Baltic Sea port, Ventspils is situated at the mouth of the Venta River. Ventspils is ice free throughout the year.

There are periodical alterations in the water level of the Venta River, chiefly due to the effects of the wind. The rise of the water level is usually due to moderate Westerly winds, and the fall is caused by Easterly winds.

The maximum rise of the water level is observed in the Venta River at the time of Spring floods and during Winter time.

The port of Ventspils aquatorium includes the Avant-port and the Commercial port. A fairway, direction 323.6° – 143.6°, 130 m. wide leads to the port from seaward of Reception Buoy "Venspils-B".

The West fairway direction 289.9° – 109.9°, 130 m. wide from the "Ventspils-A" Buoy. Both fairways are suitable for all vessels. The draft of vessels passing through the fairway should not exceed 12.48 m. (FW).

Vessels can enter the port by this fairway only after having obtained the Harbour Master's permission, as after continuous Westerly winds the fairways have soundings of 11.0 m. or less.

DEEP SEA PILOTAGE: See "Baltic Deep Sea Pilotage".

PILOTAGE: Pilotage is compulsory both for entering and leaving the port.

Pilots board and leave vessels in the areas of Reception Buoys "Ventspils-A" and "Ventspils-B". Pilot service is available round the clock when entering and leaving the port.

Port Control on Channels 16, 9 and 67.

ANCHORAGES: Anchorage in the outer port road for vessels loaded with chemical cargoes is allowed in Area No. 50, co-ordinates:

Lat. 57° 29.75′ N.	Long. 21° 28.62′ E.
Lat. 57° 29.12′ N.	Long. 21° 29.90′ E.
Lat. 57° 30.82′ N.	Long. 21° 31.75′ E.
Lat. 57° 31.48′ N.	Long. 21° 30.40′ E.

Anchorage in outer port road for tankers, vessels loaded with explosive or inflammable cargoes and also for vessels holding up in quarantine is allowed in Area No. 51, co-ordinates:

Lat. 57° 29.40′ N.	Long. 21° 28.82′ E.
Lat. 57° 28.08′ N.	Long. 21° 27.15′ E.
Lat. 57° 27.90′ N.	Long. 21° 30.80′ E.
Lat. 57° 27.02′ N.	Long. 21° 28.72′ E.

Anchorage in outer port road for all the other vessels is allowed in Area No. 52, co-ordinates:

Lat. 57° 27.98′ N.	Long. 21° 26.40′ E.
Lat. 57° 26.65′ N.	Long. 21° 24.87′ E.
Lat. 57° 26.05′ N.	Long. 21° 27.10′ E.
Lat. 57° 26.21′ N.	Long. 21° 28.88′ E.

These Areas are announced by Notices to Mariners. Depths in the anchorage are from 10 m. to 12 m. The bottom is sand; the holding ground is good.

When the wind is over 20 m./sec., it is recommended that vessels weigh anchor and drift in order to avoid losing an anchor.

The Master of a vessel has to inform the Port Administration through their Agent of the exact position of the anchorage stating the bearing and the distance from the North breakwater lighthouse.

The anchorage in the outer road is not safe during strong Westerly winds therefore vessels are recommended to drift while awaiting entry to the port or to go to sheltered places situated in the areas of the Kolkasrags Point and the Gotland Islands.

MAX. SIZE: *Tankers:* Max. LOA 235 m. Beam 32.0 m. Max. draft 12.48 m. in fresh water.

Cargo vessels: Max. LOA 215 m. Max. draft 11.50 m. in fresh water. Limitations depending on type of cargo to be handled.

When proceeding along the fairway and passing through the Venta River channel, vessels should have speed not exceeding 5 knots.

HEALTH: Pratique obtainable after mooring. Sanitary Inspector visits vessel after mooring together with Immigration and Custom House Officer. If medical care required the Sanitary Inspector has to be informed.

It is strictly forbidden to throw any type of garbage materials overboard from the ship into water areas of the port (bilge water, sanitary water and other infected pollutants). There are three barges for these services; one barge is self-propelled and two are non-self-propelled.

Note: Pratique may be granted on arrival in the roads if vessel reports "Healthy" by means of radio, radio-telephone, etc.

RADIO/VHF: Radio contact should be established via the Ventspils Radio-1 Port Radio Station which operates 24 hours a day.

Dispatcher oil/ chemical area	Ventspils Radio 15	16, 33
Traffic Control (SUDS)	Ventspils Radio 17	16, 9, 30, 67
Sea Channel	Ventspils Radio 20	16, 29
Bunker Base	Ventspils Rava Russkaya	33

All vessels should maintain a continuous listening watch on Channel 9 whilst within the area.

VTS: Traffic Control on VHF Channels 16, 9 and 67.

RADAR: The port has a Shore Radar Vessels' Control System.

TUGS: Use of tugs for tankers and gas tankers is compulsory. For dry-cargo vessels over 90 m. LOA use of tugs is also compulsory, otherwise subject to Pilot's/Master's decision.

Normally tugs join vessels within the port area.

BERTHING: Berthing of vessels and shifting berths is carried out round the clock. Vessels having length over 185 m. and draft over 9.5 m. (FW) when approaching the port through the Venta River Channel are allowed to enter or leave the port, moor and shift berth during the day only and when winds do not exceed Force 5.

Cargo berths with depths alongside up to 11.9 m. situated on the right bank of the Venta River are equipped for handling general, bulk cargoes and metals. Berths of the Avantport are equipped for handling crude oil, liquid gas chemicals and oil products. They can receive vessels with the maximum permitted draft of up to 12.48 m. (FW) (at the datum at Kronstadt). There are covered warehouses and open concrete floor sheds in the port.

There is a potash handling plant.

Depths Alongside Berths:

Berth No.	*Depth* (m.)	*Berth* No.	*Depth* (m.)
1	10.0	17	6.2
2	10.1	18	6.3
3	10.0	22	6.2
4	12.8	26	6.0
5	4.9	27	5.7
6	9.3	28	11.5
7	9.1	29	11.5
8	8.6	30	13.2
9	9.8	31	13.2
11	5.2	32	13.8
11 A and B	9.0	33	13.7
12	6.5	34	8.9
13	5.7	36	14.1
14	5.9	37	13.2
15	5.6		

CRANES: Quays are equipped with electric cranes of up to 45 tons capacity. There are floating cranes of up to 100 tons capacity, cargo handling equipment for bulk cargoes and machinery.

STEVEDORES: Master's and/or shipowner's information of cargo details, stowage – especially for ships with inward general cargoes – is required in proper time. Information has to be addressed to Agent in Ventspils.

ETA notification 72, 48, 24 and 4 hours before arrival to Agent in Ventspils.

MEDICAL: Hospital facilities available. Advance notice desirable, however depends on kind of sickness. Master should place orders concerning inoculations, vaccination, fumigation, hospitalisation and etc., with representative of Sanitary Inspection. Veterinary Certificate is compulsory for all kinds of animals and cargoes of animal origin; phyto-certificate is compulsory for cargoes of vegetable origin.

TANKERS: All grades oil loaded by shore loading hoses in diameter of 200, 250, 280, 300 and 350 mm. Total 6 berths all fitted with deballasting installations for slops. Max. draft from 11.00 m. up to 12.48 m. (FW).

There are 2 new berths for gas/chemical carriers, max. draft Berth No. 34 – 8.2 m. and Berth No. 36 – 12.48 m. (FW). Grounding to be supplied by vessel.

DENSITY: In port about 1002.

FRESH WATER: Fresh water available, delivered from shore or by barge (capacity 450 tons).

FUEL: All grades available subject to prior inquiry. Bunkers can be taken from the oil jetty or supplied by lighters.

CONSULS: No Consulates.

REPAIRS: Small deck and engine repairs, diving inspections can be carried out.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Service of watchmen recommended; however, Master's option.

HATCHES: Opening and closing of hatches is normally done by the ship's crew. However, this will be done by stevedores at extra charge if requested by Master.

CERTIFICATES: Required to be on board:
International Tonnage.
International Class.
Load Line.
Safety Equipment.
International Radio.
Derat Certificates.
Certificate of Financial Security in respect of civil liability for oil pollution damage, 1969.

CUSTOMS ALLOWANCES: There is no restriction for crew use and bond locker is not sealed.

REPATRIATION: Repatriation of crew left behind by a vessel in hospital is arranged by other tramp-ships with Master's consent or by rail or air after the necessary documents have been arranged.

TIME: From 1st October till 1st April GMT plus 2 hours. From 1st April till 1st October (Summertime) GMT plus 3 hours.

HOLIDAYS: January 1st; April 17th (Easter); May 1st (Labour Day); June 23rd and 24th (Midsummer's Day Holiday); 18th November (Day of Independence); December 25th, 26th and 31st (Christmas and New Year). Cargo work never stopped on holidays.

POLICE/AMBULANCE/FIRE: If required have to be called through Maritime Agency.

TELEPHONES: No arrangements exist for placing telephones on board.

SERVICES AVAILABLE: Tankers' deballasting installation for slops; service for radar and VHF repairs; compass adjusting; workshop for ordinary deck and engine repairs; ship chandler service; bunker, water, garbage removal, bilge cleaning, surveyors.

SHORE LEAVE: Crew members allowed ashore.

GARBAGE DISPOSAL: Vessels shall deliver rubbish, garbage, any other solid waste, dirty ballast, bilge water, feces, and other sewage waters to special cars/lorries/barges. Master should give an order through agent. Services to be charged according to the tariffs effective at the time.

WASTE OIL DISPOSAL: Collection service available, capacity of shore tanks 55,000 cu.m./day, rate 5,800 cu.m./hour. Charges: £10/hour, minimum 6 hours, gasoline and vegetable oils excepted. Contact Tel: 6337, 66237.

SEAMAN'S CLUBS/SERVICES: 20 Dzintaru Str., Ventspils 229910, Latvia. Tel: 67068, 68356, 68292. Facilities include currency exchange, shop, bar, minibus collection.

CURRENCY: At present, local currency is the Rouble (SUR). U.S.$ 1.00 = SUR 0.5962 official rate (5.6.91).

IDENTIFICATION CARDS: Seaman's Book required.

SHIPMASTER'S REPORT: 1976 (Updated 1990).

Anchorages: Bounded by the following positions:

Tankers		Cargo Vessels	
Lat.	Long.	Lat.	Long.
57° 28.4′ N.	21° 27.3′ E.	57° 25.3′ N.	21° 26.8′ E.
57° 29.7′ N.	21° 29.2′ E.	57° 28.0′ N.	21° 26.4′ E.
57° 28.2′ N.	21° 31.2′ E.	57° 26.1′ N.	21° 29.0′ E.
57° 27.2′ N.	21° 29.3′ E.	57° 26.7′ N.	21° 25.8′ E.

Buoyage:

No. 2 B.W. Conical Fl. 5 sec. (Approx. position Lat. 57° 25.7′ N., Long. 21° 29.85′ E.) to be expunged.

New Buoys:

No. 2 Fl.W. 5 sec. in position Lat. 57° 25.6′ N., Long. 21° 28.3′ E.
No. 3 Fl.W. 3 sec. in position Lat. 57° 24.1′ N., Long. 21° 30.65′ N.
No. 4 Fl.R. 3 sec. in position Lat. 57° 25.16′ N., Long. 21° 30.82′ E.

In harbour, No. 4 Fl.R. Con. and Red Conical Buoy about 2 cables E × S to be expunged.

See U.S.S.R. Notices No. 28041 and 28033 for latest changes.

Oil Piers: 3 in number.

No. 1 Pier, Berths No. 28 and 29 – light outer end Qk, Fl.W.
No. 2 Pier, Berths No. 30 and 31 – light outer end Qk. Fl.Or.
No. 3 Pier, Berths No. 32 and 33 – light outer end Qk. Fl. Blue.

Depths alongside:		
	Berth 28:	10.10 m.
	Berth 29:	10.00 m.
	Berths 30/33:	12.00 m.

After dredging in channel is completed to 12.5 m., depth at Berths 32 and 33 will be 12.5 m.

Oil Pier No. 3 (Bearings, distances and positions here not confirmed). Existing dock face continued 24.5° approx. 1,100 ft. to join Northern Breakwater.

No. 3 runs 283° for 1,100 ft. from position 24.5°, 2,000 ft. from Fl. R.Lt. in Lat. 57° 01′ N., Long. 21° 33.5′ E.

Northern Breakwater: Inner extension from position Lat. 57° 24.69′ N., Long. 21° 32.2′ E. 012° for 890 ft. to join main breakwater.

Under Construction: 3 berths for Petro-chemical industry along inner face of Northern Breakwater.

Small harbour beside pilot station, Southern side, completed and in use by small craft and fishing vessels. Small repairs in operation. Depth said to be 3.5 m. – 4.0 m.

Port operation in foggy weather said to be controlled by radio and millimetre (aircraft) type radar installation, one scanner of which is situated on tower near root of Southern Breakwater.

Tugs: Alleged that 5 are available; 1 icebreaker type of 5,000 h.p. 4 medium size, and 1 small, 1 at least of which was propelled by Voith-Schnieder gear of about 750 h.p.

Pilots: To call Pilots, use Channel 16 and 67 and call Ventspils Radio who make arrangements with Harbour Office and Agents.

During time vessel de-ballasting and loading; any problems can be resolved by call to Agents through Ventspils Radio.

Regulations: Fire Officers demand that suitable bonding wire be fitted (supplied by ship). No shore facility available.

Facilities: No. 1 Pier has (building) tower crane for handling hoses. Berths No. 2 and 3 are fitted with loading arms hoses and towers. Fresh water available. Bunker fuel available but not necessarily marine diesel.

Cargo Berths: There are believed to be 8 dry cargo berths, within the river port area, some with cranes, suitable for general cargo, together with storage buildings. Refrigerated/chilled cargoes have been handled regularly.

Max. Size: Pilot stated that tankers of up to 60,000 tonnes displacement were possible at present, and that after dredging it should be possible to take up to 100,000 tonnes displacement.

To contact Agents, call Ventspils Radio on Channel 27 and they make arrangements.

SHIPMASTER'S REPORT: May 1980 (Updated 1990).

Vessel: LPG carrier of 10,000 g.r.t.

Landfall/Approaches to Pilotage: Approaches clearly defined by radar, Decca coverage good. Vessels anchored in dry cargo anchorage provide a good guide. Two approach channels with tankers generally using the Southern channel. Pilot boarded close to Buoy A (Fairway Buoy for South channel) or Buoy "B" (Fairway Buoy from Main channel).

Pilotage: ETA notification 96, 48, 24 and 4 hours before arrival to "Inflot Ventspils" (Agents), thence further communication by VHF calling Channel 16, then working Channel 9. Answered to "Ventspils Port Control" and not "Nadzor" as stated in Radio Signals Volume 6. Pilots will advise instructions, in this case, to proceed to Buoy A or Buoy B. Pilot cutter/launch (speed 6 knots) proceeds from inner harbour. Pilot ladder on appropriate side for weather conditions rigged 1 m. above water. Pilotage time to berth approximately 40 minutes. On this visit, despite Pilot boarding at Buoy A, vessel entered using North channel.

Upon departure, Pilot arranged by Agent upon completion of documentation. Southerly channel used for departure with Pilot disembarking mid-channel.

NOTE: LPG vessels are not permitted to enter or leave port during adverse weather conditions.

Anchorage: Tanker anchorage lies to N.E. of Northerly channel.

Tugs:

(a.) Inbound: Tugs join vessel close to breakwater entrance. Three tugs used for berthing (standard port cost for tugs whatever the number used – five tugs available). Made fast on port bow and quarter using ship's lines with one tug pushing. Vessel berths port side alongside – strong Northerly winds (off-shore) on this visit.

(b.) Outbound: Tugs join vessel at berth – one tug made fast on starboard bow using ship's line. Second tug in attendance. Tugs gone and clear before clearing breakwater.

Berth: (Ammonia only – See "Plan"). Modern fendered concrete quayside with depth alongside 13 m. to 14 m. No tidal range but atmospheric conditions affect Baltic water level – density alongside 1001.

Vessel generally berths port side alongside. Berth equipped with 12 in. 150 ASA liquid and vapour Chicksans. Ship's reducer used on vapour manifold. Ship's gangway used.

Cargo: Anhydrous ammonia received at −33° Celcius. Loading rate agreed before commencing loading (in this case requested 650 t.p.h.) and increased to over 1,000 t.p.h. after officially requesting for increased rate through agency. The rate agreed prior to loading is expected to be maintained throughout loading with usual reductions for topping off as required. Average rate for 10,230 tonnes loaded was 714 t.p.h.

Vapour return line connected but not required or used – high back pressure on line. Documentation slow – cargo documentation cannot commence until ship cleared and Chicksans not connected until cargo documentation completed. Shippers "Sojuzchimexport" require Quality Certificate for cargo heel onboard – accepted ship's declaration of purity. Also require cargo plan showing 100% tank volume for each tank – to prevent overloading. Bill of Lading quantity = cargo as measured onboard by shore surveyor (accompanied by interpreter).

Bunkers/Water/Chandler: None required but all available.

Agents: Efficient and friendly service. All representatives speak perfect English and very helpful in dealing with Authorities. Inflot require ship information, cable 24 hours prior to arrival with following information:

(a) Ship's name, signal letters, nationality.
(b) Last port.
(c) Draft forward and aft, length, gross and nett tonnage.
(d) Cargo requirements.
(e) Owner's name and telex number.
(f) Bunkers, water and provisions required.
(g) Number of crew and health declaration.
(h) ETA at pilot station.

If Agents are required in port, call "Ventspils Radio" on Channel 16 and ask for connection to Agency.

Authorities:

Customs: Usual Bond Declaration required but unconcerned with bonded items onboard and bond locker not sealed in port.

Currency Declaration most important. Customs are not interested in personal cash holdings but must have a "TOTAL Cash Onboard Declaration" and the currencies involved. This total to include personal cash, bar cash, safe cash, etc.

Persons going ashore MUST obtain receipts for all expenditure which are then compared with the total declaration prior to departure.

Immigration: Usual Crew Lists required plus Discharge Books or Passports of all onboard. These are taken ashore, stamped and returned onboard. Persons going ashore will then be required to exchange Discharge Book for shore pass with guard at bottom of gangway. Prior to departure, all personnel must report to Immigration onboard for an identification check.

There is a strict Curfew after 2400 hrs. and personnel must be onboard before that time. No restrictions placed on the Master.

Port Health: Doctor boarded on arrival but formality only. Cursory inspection of store rooms only.

General: Time in port was 26 hours 48 minutes. Time loading was 14 hours 20 minutes (documentation 10 hours). Total disbursement for visit was U.S.$9,630.

SHIPMASTER'S REPORT: November 1980. (Updated 1990).

Pilotage: Pilotage is compulsory. 12 Pilots available. Pilot boards at Fairway Buoy at the beginning of the old entrance channel and disembarks at Buoy No. "A" in the new deep water channel or Buoy B of the Main Channel. Docking and undocking without the aid of a Pilot is not allowed.

Restrictions: Vessels can enter and leave port during hours of darkness at any stage of the tide, however, vessels are not allowed to manoeuvre in fog or at times when the wind is strong. Shore radar is used at night and in fog for berthing.

Max. Draft: Vessels max. draft on sailing was 11.6 m. (FW).

Tugs: 4 tugs available.

Radio: Ventspils Radio, call sign "UNI", on 500, 2182 and VHF Channel 16.

VHF: Pilot uses Channels 9 and 14 after initial call on Channel 16. Port Authority and Agent on Channels 16 and 27.

Facilities: The following are available: Fresh water, fresh provisions, small repairs, small machine shop, Lloyd's Surveyor, Salvage Surveyor (Lloyd's), laundry service, bunker fuel oil, diesel oil, small stock of lubricating oils, Doctor and hospital, groceries and meats, slop tanks – there is no slop storage – slops are segregated during discharge.

Tankers: There are 6 berths at the oil terminal at 3 piers (Berths No. 28 – 33).

Vessel berthed at No. 31. Ballast is required when arriving or sailing in a light condition (clean ballast may be discharged into the sea with permission from shore).

The tanker terminal exports crude oil, nafta and gas oil but no petrol. Ship's hoses are used. 2×12 in. lines are connected direct to the ship's manifold. No shore booster pump available. Max. pressure 5 kgs.

General Cargo Facilities: There are facilities for handling bulk cargo. Large number of cranes available.

Ro-Ro facilities are not yet ready. There is a floating crane with a 100 ton capacity. There is equipment for handling 20 ft. containers only, however, there is very little storage space available for containers.

Fuel: There are 2 barges, capacity 2,000 tons each for fuel and diesel oil.

Fresh Water: There is one water barge, capacity 100 tons.

AUTHORITY: The Port of Ventspils Authority, Dzintaru 22, 229910 Ventspils, Latvia. *Tel:* 22821, 68220. *Telex:* 161867 VCP. *FAX:* 21231. *Cables:* Ventspils Comport. *Contact:* O.Stepanov, Port Director. A.Shupeensky, Harbour Master.

Lebanon

GENERAL:

TANKERS: Report dated April 1992:
New Regulations for Tankers Calling at Oil Terminal:
New regulations for tankers calling at Lebanese Oil Terminals for discharging of petroleum products:

All tankers calling at Lebanese Terminals will be allowed to approach Beirut Port for Customs inspection as per patrol brigade regulations, but will not be allowed to moor at petroleum products berths, nor start discharging prior to receipt of satisfactory analysis results from the surveying company appointed by the Ministry of Petroleum.

In this respect, the receivers, after vessel's arrival at Beirut Port, must advise the Ministry of Petroleum of the cargo specifications intended for discharge at their Terminal, in order for the Ministry's surveyors to take cargo samples for analysis.

CUSTOMS INSPECTION: By law, all vessels calling at Lebanese Ports/Terminals must first call at Beirut Port for Customs inspection.

In this respect, please note that 40 miles from Beirut Port, Master will have to contact Oscar Charlie on VHF Channel 11, giving his clearance number and cargo details (two days prior to vessel's arrival, Agent will obtain the clearance number which they will relay to Owner/Master).

Again when 12 miles from Beirut Port, Master will have to contact "Oscar Charlie" on VHF Channel 11, and he will thereafter receive the clearance to proceed to Beirut Port for Customs inspection, which is usually carried out during daylight hours.

Please note that only after completion of Customs inspection, will the vessel be able to berth at Beirut Port and/or resume her voyage to any other Lebanese Port/Terminal.

BEIRUT (Beyrouth): 33.54 N. 35.30 E.

See "General" before first port.

DOCUMENTS:
Manifests should be visaed by Lebanese Consul at ports of shipment, or at any port *en route* where there is a Lebanese Consul. If on account of non-existence of Lebanese Consul at ports of shipment or at any of these *en route* the manifests are not visaed, then such consular visa dues are collected at Beirut.

5 Copies of Cargo Manifests.
2 Store Lists.
5 Passenger Lists.
2 Lists of Cigarettes and Tobacco (see "Customs Allowances").

For cargoes loaded for Lebanon, there are new regulations concerning documentation as follows:

Original Cargo Manifest to be presented to the Authorities should be rubber stamped and signed by the Customs Authorities at the port of loading.

Copy of each Bill of Lading should be attached to the above Manifest.

A letter from Owners/Charterers indicating the Agents at the respective port.

PILOTAGE: Agent arranges Pilot via Harbour Master. Agent therefore to be kept well informed of ETA, 48 hours and 24 hours prior arrival. Pilot boat white with red funnel. Sound signals, 2 long and 1 short or contact can be made via VHF to Harbour Master. Pilot boards outside main breakwater. Assistance of Pilot outside daily normal hours, Sundays and official holidays, will be cost calculated at 100% more. Official normal working hours for pilotage station as follows: from 1st October up to 30th April, 0700 till 1700 hrs.; from 1st May up to 30th September, 0700 till 1800 hrs., For tankers outside harbour, the pilotage dues will be 100% extra.

Also see "Shipmaster's Report – January 1982".

ANCHORAGE: In Roads outside breakwater. Also see "Shipmaster's Report – January, 1982".

RESTRICTIONS: No particular restrictions. Pilot normally available between sunrise and sunset otherwise by special agreement.

MAX. SIZE: Max. draft in port 13 m. No limitation to breadth or length.

HEALTH: Health Authorities board in Roads. Health Form obtainable from Agent or doctor. Yellow fever certificates required for ships coming from Far East and Red Sea. Owners should check with Agents respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for Crew members.

RADIO: Cables via Beirut Radio to and from Agent.

VHF: VHF Channels 13 and 16.

TUGS: Tugs of 1,000 h.p. join vessel inside port when necessary. Ship's lines to be used.

BERTHING: If port congested priority given to vessel already registered. Passenger-tourist vessels and cargo for Army have priority. Harbour capable of berthing 24 ships simultaneously and 3 moored on buoys, discharging into barges. All discharging is by ship's gear.

Dock No. 1: Surrounded by Quay Nos. 1, 2, 3. Depth of water varies between 3 m. and 8 m. Parts of Quay No. 1 and Quay No. 2 with 3 m. depth of water are reserved for floating units of port company and for launches of Harbour Master and pilotage service. Slipway of 1,000 tons capacity and workshops.

Dock No. 2: Surrounded by Quay Nos. 4, 5, 6, 7, with water depths varying between 8 m. and 10.5 m. On Quay No. 5 berthing priority is given to passenger ships, while the other quays are for cargo vessels.

Dock No. 3: Surrounded by Quay Nos. 8, 9, 10, 11, with depths varying between 10.5 m. and 13 m. All these quays can berth ships bringing general cargo. At Quay No. 8 of 13 m. depth, priority of berthing is given to grain ships.

Grain Silo: There are 120,000 tonnes capacity silos. Ships will be unloaded by means of 2 gantry type suction machines, mobile on rails with a capacity of 6×100 t.p.h.

Containers: A ship's Master advises that containers should be loaded on one side of the vessel and vessel berth that side to the berth as crane unable to reach outboard side.

Ro-Ro: All quays in Docks No. 2 and 3 can receive Ro/Ro vessels.

CRANES: Lifting capacities:
44 × 20/100 tonnes.
4 × 127 tonnes.
4 × 150 tonnes.

STEVEDORES: Ordered by Agent. No ETA to Stevedores necessary. Working hours, 0800 – 1200, 1300 – 1600. Otherwise overtime on Sundays and on official holidays.

MEDICAL: Master to advise Agent by cable prior to arrival if medical attendance required.

TANKERS: Notice: The Coral Oil Co. Ltd.: Dated November 1984. To the Master.

TANKER MOORING AND DISCHARGING PROCEDURE AT CORAL OIL TERMINAL, BEIRUT.

We should be grateful if you would kindly note the following:

1. Berthing: The following is for your guidance:

Our moorings have been laid so as to give you a stern mooring for the old lines and amidships mooring for the new line (see item 2) using ship's anchors at the head. It is recommended that both anchors should be dropped when the vessel is discharging.

The ideal position for your ship is such that she would be heading N.N.W., in which position you will be clear of all obstructions in the event of an emergency. As you are aware, there is a wreck lying on the seabed to the East of the moorings and a half-submerged rock to the West.

When the significant wind speed is 10 knots, it is recommended that you stop cargo operations and advise our representative on board (see item 4 below) accordingly. Our hoses will be disconnected immediately after that. Please ensure close co-ordination with him.

When the significant wind speed rises to 15 knots you are recommended to unmoor and leave the berth. It is your responsibility to ensure that arrangements are made for the Pilot's mooring boat to unmoor the ship's lines.

Please keep in touch with the Meteorological Office in periods of unstable weather, and keep your engines in a state of readiness.

N.B. For amidships discharge (see item 2 below) you are advised to have enough mooring ropes available to cover extra distance to our mooring buoys (roughly 4 × 200 m.).

Please do not "Hang On" in wind speed beyond the above limits.

2. Cargo Discharging System:
There are two systems:

(a) The "Old Lines": The so called "Old Lines" system is to be connected through our submarine hoses to your stern discharge point. At that point the following products may be discharged: Lubricating base oil through one line and Jet A-1 and a limited number of chemicals, Gasoline or Gasoil through another line. In this particular case, you are requested to pump sweet or sea-water plugs, as the case may be, to clear our submarine and shore line between products.

(b) The "New Line": The so called "New Line" is for amidships discharge and is exclusively used for chemicals through a 'pigging' arrangement. Ideally, you should have Nitrogen aboard as well as compressed air for use in conjunction with this system, bearing in mind that Nitrogen must be used (not compressed air) with low flash point products.

3. Quality of Cargo: Please hand our representative the Certificate of Quality, issued by the Refinery, corresponding to the cargo destined to us.

The cargo may not be discharged unless the Certificate of Quality is handed to us beforehand and found to be fully conforming to the latest issue of the relevant specifications.

Furthermore, we shall carry out a few tests on representative samples drawn from your tanks before discharge.

If the results of the analyses are unsatisfactory, the cargo may not be discharged.

4. Personnel on Duty: A member of our staff with a few assistants will be on duty day and night on your ship and we trust they will be allowed to use your mess-room from time to time. Installation personnel are also on constant watch checking the shore tanks, inspecting the pipe-lines and manipulating the signals.

We would ask you to ensure that a responsible member of your crew remain on duty at the stern or amidships to answer shore signals promptly and react accordingly.

A member of our staff is always present at the Installation while the ship is discharging and you are requested to contact him if anything should be required.

5. Security and Safety:

(i) No engine repairs should be carried out at this berth.

(ii) The Port Authority forbids gas freeing while the tanker is berthed. Besides, fishermen's practices in the immediate vicinity of the berth may endanger your ship in case of gas-freeing.

(iii) You will appreciate that we cannot be held responsible for the security of your ship or prevent unauthorised persons from going on board.

Peddlers might attempt to board tankers, in which case the safety of your operations might be affected. It is strongly recommended that you post watchmen to prevent their access to the ship.

6. Communications: (a) Pumping Signals: Shore signals are made with White and Red discs by day and coloured lights by night from the Yard Arm of the signalling mast at the shore end of our jetty.

Ship signals are a series of short blasts of 5 seconds' duration.

(i) Amidships Discharge:

	Shore Signals		*Ship Answering Signals*
	Day	*Night*	
Launch pig or sphere	One disc	One white light	One blast
Pump product	Two discs	One green light	Two blasts
Pump air or Nitrogen	Three discs	Two green lights	Three blasts
Stop pumping product, air or Nitrogen	Four discs	One red light	Four blasts
Disconnect	No disc	Two red lights	Several short and long blasts

(ii) Stern Discharge

Pump water	One disc	One white light	One blast
Pump product slowly	Two discs	One green light	Two blasts
Pump product full speed	Three discs	Two green lights	Three blasts
Stop pumping product or water	Four discs	One red light	Four blasts
Disconnect	No disc	Two red lights	Several short and long blasts

In the event of the ship having to stop pumping, please sound 4 short blasts before closing the valve, whereupon pumping should not be resumed until the appropriate signal has been run up again on our signal mast.

(b) "Walkie-Talkie": Walkie-Talkie communication is established between ship and the shore, but the equipment may fail and the above signals are essential.

(c) Motor-boat: Motor-boat is on Company service while the ship is at mooring.

7. Pumping and pumping speed: Delivery of all products may proceed day and night.

(i) "Old Lines" Jet A-1, some Chemicals, Gasoline or Gas Oil:

When delivering the above products through the "Old Line" (i.e. using water plugs), the following pumping speeds must be observed:

During the first half hour, pump slowly to clear the water plug in the pipe-line and avoid development of unrelaxed static electricity. The pumping rates must be limited as follows: Kerosene/Jet A-1 90 t.p.h., Water 115 t.p.h.

After the first half hour, the rate of pumping should be commensurate with a pressure at the stern connection to the submarine hoses not exceeding 100 p.s.i. It should not be less than 300 product t.p.h.

At the end of the cargo pumping operation, sea-water is to be pumped to clear the product contained in the pipe-line into the shore tanks. Pumping speed must not exceed 115 t.p.h.

(ii) "Old Lines" – Lubricating Base Oils: No restrictions except to pressure at the stern which is not to exceed 100 p.s.i.

(iii) "New Line" – Chemicals: No restrictions except to pressure at the amidships discharge point which is not to exceed 150 p.s.i.

The detailed procedure concerning the use of the sphere or pig and Nitrogen, Compressed Air, or Chemical products to push the sphere or pig will be discussed and agreed with you beforehand.

8. Quantities to be discharged: Will you please ensure that the quantities discharged agree with the B/L figures. Any difference in these figures should be confirmed in writing to the member of our staff on board your ship. In any case, the shore tanks' dips are those that will serve as a final basis for acknowledgment of the cargo received. They are witnessed and certified by the shore Customs Authorities, as well as the Insurance Surveyor.

9. Ship's Agent: The ship's Agent is expected to deal with all questions of port and harbour regulations, currency, health, etc.

Reminder: Hose-lifting derrick, air compressors and nitrogen; the tanker must be fitted with derricks of 3 to 4 tons lifting capacity (depending on the height of the connection above sea-level) to lift part of the submarine 8 in. hoses required for connection to its stern discharge or amidships discharge, as the case may be.

In the case of lubricating base oils, the tanker must be provided with an air compressor to clear the line before pumping the next grade of base oils.

In the case of chemicals, except for those to be discharged at the "Old Lines", the tanker must have Nitrogen and compressed air available in adequate quantity.

Signed: Manager Operations.

Also see "Shipmaster's Report" dated February 1983.

DENSITY: 1025.

FRESH WATER: The port company has equipped all quays with hydrants. Ships moored on buoys can also be supplied with water from cistern barge. By shore installation or by barge. Delivery rate 20/25 t.p.h. Outside harbour double price per barge.

FUEL: Fuel, gas oil, diesel obtainable. 48 hours' notice required.

FIRE PRECAUTIONS: Special berths for tankers.

CONSULS: Most countries have consulates.

REPAIRS: Most types of repairs carried out.

DRY DOCKS: None except for 500/1,000 tonner.

GANGWAY/DECK WATCHMEN: Available and recommended.

OPENING/CLOSING HATCHES: For liners, by stevedores, otherwise per agreement.

CUSTOMS ALLOWANCES: (Tobacco) 40 cigarettes per Crew member (Master 2-3 cartons). Customs very strict, and will search crew cabins. Regulations are as follows:

1. That the quantity of tobacco to be allowed on board vessels upon their arrival at a Lebanese port, will be fixed on the basis of 2 packets per crew member, passenger per day and to be calculated on a maximum period of 4 months, if the vessel emanates from an American, Asian or African port - not central Africa; and for 2 months if the vessel last port of call is in Europe, Central Africa or Mediterranean, which will be deducted port of call, until arrival at a Lebanese port. That the number of passengers to be taken into account on a tourist vessel, will be the number of berths the vessel can accommodate and not the number of passengers actually on board. As to cargo vessels, the actual number to be accounted for will only be the crew members and the Master of the vessel.

2. In the event that it is the first call of the vessel at a Lebanese port and not aware of such regulations, and it was found onboard her an excess quantity to the actual one allowed, as indicated above, a Process Verbal will be established for the excess quantity found and the cigarettes placed under seal. An undertaking is also to be obtained from either the Owners and/or her Agents to the effect that they will submit a certificate, within 1 month, to be issued by the relevant Customs Authorities of the next port of call of the vessel after a Lebanese port. While the seizure on the vessel will be lifted when a Bank Guarantee equalling the amount of fine and dues is placed, or a personal guarantee from the Agent – if solvable – and in the event that the undertaking is not fulfilled the usual penalties will be inflicted according to the Law.

3. In the event the vessel is aware of such restriction, and for one reason or another, she is carrying an excess quantity, this excess must be, as per official regulations, shown on the manifest legalised and issued at the last port of call touched by the vessel prior to Beirut. Any excess found over and above such declaration will be considered as smuggling and the law will be applied.

Wine and/or Spirits: 1 bottle per crew member. Master allowed 3 or 4 bottles.

REPATRIATION: Very good facilities for repatriation.

AIRPORT: About 10 km. distant, served by regular airlines.

TIME: GMT plus 2 hours. Summertime, GMT plus 3 hours.

HOLIDAYS:

Holidays	*Date*	*Days*
New Year's Day	January 1st	1
St. Maron	February 9th	1
Good Friday (Catholic)	Varies	1
Easter Monday (Catholic)	Varies	1
Labour Day	May 1st	1
Good Friday (Orthodox)	Varies	1
Easter Monday (Orthodox)	Varies	1
Al Fiter (Ramadan)	Varies	1
Assumption Day	August 15th	1
Al-Adha	Varies	2
Moslem New Year's Day	Varies	1
Achoura	Varies	1
All Saints' Day	November 1st	1
Independence Day	November 22nd	1
Prophet's Birthday	Varies	1
Christmas Day	December 25th	1

Port closes completely: New Year's Day, Al-Adha, Easter Monday, Labour Day, Independence Day, 1st day of Ramadan and Christmas Day. On other holidays, day work in port carried out against overtime payment.

POLICE/AMBULANCE/FIRE: Telephone numbers: Police 16, Ambulance 18, Fire 17.

TELEPHONES: Available on request by shipping agency.

SERVICES: Tank-cleaning equipment. Facilities for discharge of tank-washings, compass adjusting, laundry, etc., available.

SHORE LEAVE: Crew allowed onshore.

IDENTIFICATION CARDS: Shore pass given to each crew member. Passport and Seaman's Book to remain in Master's care.

DELAYS: 1. Unavailability of berth or barges due congestion mainly during Winter months (December to April). 2. Vessel already registered will lose turn if not returned to port in time. 3. Barge ordered for bunkering might be occupied if vessel's arrival delayed.

DEVELOPMENTS: Report: July 1992.

To bring the port up to maximum standards in its existing structure, the following measures and works remain to be carried out:

Tenders for the repair of the last four warehouses.

Purchase of equipment for Dock 3 (Estimated cost: U.S.$ 27 million).

Completion of Dock 4: Extension of the breakwater (+280 m.), construction of the breakwater head and of Quay 15 (U.S.$ 24 million; duration: 18 months).

Restoration of the superstructure and purchase of handling equipment, especially 4 container gantry cranes on Quay 14 (U.S.$ 50 million).

The rehabilitation of Beirut Port and its 4 docks should be completed by the end of 1993.

In addition to the capacities of Docks 3 and 4, a fifth dock with a draft of 15.0 m. is projected to receive fourth generation container ships. With a 330,000 sq.m. open storage area, 2,000 m. of quays and 8 gantry cranes, it is designated to handle 400,000 containers per year, which will add to the handling capacity of Dock 4, i.e. 200,000.

The cost of Dock 5 and ancillary equipment is approximately U.S.$ 200 million.

SHIPMASTER'S REPORT: 1978.

Navigation Buoy: The buoy off the end of the breakwater has been replaced in approximately the same position as the original buoy. The present buoy is painted green with a 'cone top mark'. Although the buoy is a light buoy the flash was not observed. On no account should the vessel pass between the end of the breakwater and the buoy as rubble is being dumped to extend the breakwater. The actual dumping position is marked.

The local Pilots are now working VHF Channel 16 from the Harbour Office.

SHIPMASTER'S REPORT: January, 1982.

Vessels approaching Beirut Harbour from a Southerly direction are advised to make Ras Beirut Light on a bearing of 132°. When the light is approximately 3 miles away alter course to 090° until the Eastern end of breakwater is abeam and alter course to 150° to pass Green Buoy (near end of breakwater) to starboard. The Pilot will board vessel near the green buoy or at anchorage.

Good anchorages may be obtained East of breakwater with good holding ground. In view of the prevailing tension it is advisable to approach Beirut during daylight hours as incidents of sniper fire and shelling have been reported.

Shore leave for seamen/ship's personnel may be granted during daylight hours from 0900 to 1500 only in the Christian (Eastern) Sector. It is not advisable to visit the Muslim sector of the Western Beirut.

Provisions, bonded stores and good shopping available despite tension.

SHIPMASTER'S REPORT: February 1983.

Tankers: The following are the requirements for product delivery vessels calling at tanker berths operated by Dora Terminals.

Medco Terminal:

I – TECHNICAL CONDITIONS

1. Tanker mooring should take place during daylight at the berth specially provided for discharging opposite our installations at Dora i.e. "Baie Saint Georges".
2. Tanker's d.w.t. (dead weight tonnage) must not exceed 25,000 – 30,000 metric tons.
3. Only stern discharge is permissible.
4. Submerged portion of the tanker's stern must not exceed 28 ft. – 29 ft.
5. Discharge hose facilities provided are of 6 in., 8 in. and 10 in. diameter. Working pressure must not exceed 5 – 6 kg./sq.cm.
6. Upon arrival, the Shipmaster shall abide by the instructions given to him by Beirut Pilot and Harbour Master and by employees of this company, it being understood that putting the ship at anchor immediately upon arrival is subject to weather conditions. In other words mooring, anchorage and discharge of load are not possible when sea is rough.
7. Ship must be equipped with all necessary international documents in accordance with universally accepted rules and regulations because discharging takes place under supervision of Lebanese Customs Authorities and other Government Officials.
8. Swivelling tanker's crane boom to extend outside tanker minimum 3 m. in order to lift vertically flexible hoses. Also suitably located hang-off bitts for submarine hose.
9. Discharge line to be fitted with ASA 150 8 in. flange connected (or ASA 150 6 in. connection) and pressure gauge, conveniently located.
10. Pumps to be preferably centrifuge with by-pass (or relief valve) set at 9 kg./sq.cm.
11. Tanker shall be responsible for any and all damages which may occur to our installations whether it be due to weather, natural or technical reasons. Tanker shall likewise be responsible for damages caused by negligence or faulty manoeuvres on the part of the Master or the crew.
12. The company's Superintendent at his own discretion may refuse admission to a tanker or discharge of a cargo when he notices that the tanker is not adequately equipped technically for the discharging process as is usually required. Shipowners shall then carry out all necessary repairs, wherefore demurrage, if any, shall be exclusively at the tanker's expense.
13. When the discharge process has been completed and all formalities done, hose disconnected and mooring ropes released, the tanker, using its anchor to move forward, shall leave the mooring place immediately and clear a suitable distance off marine installations without using the propeller.
14. Should weather conditions worsen during discharge operations, the Superintendent shall have the right to disconnect the hose and request Shipmaster to leave discharge berth immediately for protection of human lives, installations and ship.
15. All harm befalling divers and/or company workmen during discharge activities shall be at the tanker's expense as long as these men are on board the tanker.
16. Both tanker and company shall be prepared to tie-in the discharge hose within 6 hours period effective from the time mooring at company's berth has been performed by Beirut Pilot.
17. Master is requested to give 72/48/24 hours' pre-arrival notice through "Radio Orient" to our cable address "Geochammas Beirut".

II – GENERAL CONDITIONS

1. Details of tanker arrival and discharge must be arranged beforehand. Should two tankers arrive at the terminal preference shall be accorded the tanker that has arrived first.
   In those cases where a Government-bound tanker comes in for unloading at the same time as another tanker is discharging at our installations, no demurrage shall be due by the company.
2. Quantities received are those measured in our tanks. The company shall not be responsible for any shortage due to leakage or otherwise, notwithstanding the fact that the company shall spare no effort to avoid any such loss.
3. It is clearly understood that all discharge activities such as anchorage, discharge, material receiving, storage, etc. are for the responsibility and expense of the Government. It is likewise agreed that all damage which may befall our marine installations, tanks and the company's other installations at Dora, irrespective of cause, even if it be a force-majeure, are the responsibility of the Government as the company shall then be working in accordance with the Government's request and for its account.
4. All port dues and other charges connected with the tanker or the cargo are for the Government expense.
5. All expense for products delivered by tank trucks are for the account of the receiver.
6. Under all circumstances the company shall be held free of any responsibility whether for reasons mentioned above or omitted. It is likewise not responsible in all instances where the terms "cas fortuit, force majeure" and applicable.
7. The company may be contacted through the following means:
   (a) Radio Orient Ogero.
   (b) Telex: 22259 Menira/20816 Mecham/20112 Ctctco.
   (c) Telegram: Geochammas-Beirut.
   (d) Tel: 894077 (working hours: 0800 – 1400 hrs.)
   (e) Marine Band: Channel 16 when 30 miles away.

Wardieh Terminal:
Max. draft at Terminal 30 ft.
Max. quantity which can be received through the sealine is 200 metric tons per hour.
Type of flange – 8 in. flange.
Pumping can be effected through a 10 in. submarine pipe-line.

AUTHORITY: Compagnie de Gestion et D'exploitation du Port de Beyrouth, B.P. 1490, Beirut, Lebanon. *Tel:* (01) 580211/16. *Cables:* Beyrouport-Beirut. *Contact:* J. Khazen, Port Director.

AGENT: Gulf Agency Co. (Lebanon) Ltd., P.O.Box 4392, Beirut, Lebanon. Tel: 446189, 446086, 446097, after office hours 446189. Telex: 44874, 48161 ("GAC LE"). Fax: 446097 or via Cyprus (357) 9522991.

CHEKAA (Including Enfeh Terminal): 34.20 N. 35.43 E. (See Plan)

See "General" before first port.
Port is used for cement loading and discharge of sulphates.

ANCHORAGE: Safe anchorage in Chekaa Bay.
MAX. SIZE: See "Berthing" and "Tankers".
TUGS: None.
BERTHING:

1st Quay	Length:	40 m.
	Depth:	30/31 ft. (at pier).
	Draft:	28 ft.
	Permissible d.w.t.:	15,000 tons. **
	Working Time:	Around the clock, daily outturn about 5,000 tons/WWD.
2nd Quay	Length:	45 m.
	Water Depth:	30/31 ft. (at pier).
	Draft:	27 ft.
	Permissible d.w.t.:	15,000 tons.
	Working Time:	Around the clock, daily outturn about 5,000 tons/WWD.

** Larger vessels can be accepted, but this is subject to approval from receivers.

Discharge facilities:
2 shore cranes available: 1 fixed, 1 mobile.
Discharge effected by screw conveyors.
Maximum water-line to hatch-coaming in ballast: 9.0 m.

TANKERS: *Enfeh Terminal:* Position: Lat. 34° 20′ 31″ N., Long. 35° 43′ 54″ E. Port is used to load and discharge gasoline and bitumen.
Anchorage: Safe anchorage in Chekaa Bay.
Max. size: Draft up to 20 ft.
Berthing: Using 2 anchors and moored stern to shore facilities. In event of swell vessel required to leave quay and anchor in bay.
Storage Capacity: 5,000 tons for gasoline. 2,500 tons for bitumen under construction.
Load/Discharge: Rate 150 t.p.h. Tankers to use stern discharge and communicate with shore 48 hours prior to arrival on VHF Channel 16.
Agent: Gefco.

REPORT: November 1982.
Slag is from time to time discharged at this port.

1. Max. draft permissible: 27 ft.
2. Length of berthing quay: about 40 m. – 45 m. Therefore vessels must do several shifts ahead and astern in order to discharge all holds.
3. Discharging by 2 shore cranes (1 fixed at quay and 1 mobile) using grabs.
4. Daily quantity discharged: about 2500 – 3000 tons per weather working day of 24 hours (receivers and stevedores working 24 hours round the clock, subject weather permitting).
5. The quay is at an open road, not sheltered and well exposed to South Westerly winds.
6. Agency attendance was monopolised in Chekaa since 1975 (when war started in Lebanon) and the only agents attending are:
   (a) Messrs. Kfoury, the Pilots of Chekaa for:
   The Societe des Ciments Libanais Sal Chekaa.
   (b) Pilot and Agents: Kfoury. Cimenterie Nationale S.A.L. Chekaa, the Company who owns the above mentioned quay. (Mailing address: c/o IMS 285, P.O.Box 895, Larnaca, Cyprus).

AGENT: See "Beirut".

RAS SELAATA: 34.17 N. 35.40 E. (See Plan)

See "General" before first port.

(A) LEBANON CHEMICAL CO. PLANT WHARF:
(B) SELA'ATA TERMINAL PORT:

(A) LEBANON CHEMICAL CO. PLANT WHARF:

LOCATION: Lat. 34° 16.2′ N., Long. 35° 39.2′ E.
Lebanon Chemical Co. Port is located to the South of Tripoli and is used for dry and liquid chemical cargoes.
PILOTAGE: Pilotage is provided by the Company, and the Pilot meets vessels one mile to the S.W. of the quay.
ANCHORAGE: Good anchorage is available in Sela'ata Roads.
MAX. SIZE: Depth in manoeuvring area is 21 ft. Maximum permissible draft is restricted to 21 ft.
HEALTH: Health Authorities board in harbour. Health form obtainable from Agent. Owner should check with Agent with regard to any recent imposition of anti-epidemic regulations and requirements for additional injections for crew members.
RADIO: Cables to and from Agent sent via Beirut Radio.
VHF: See "General".
BERTHING: One pier 90 m. long, suitable for vessels up to a maximum of 6,000 tonnes d.w.t.
STEVEDORES: Cargo handling is carried out by the Company's crew round the clock.
MEDICAL: Master to advise Agent by cable prior to arrival if medical attendance required.
DENSITY: 1026 – 1027.
FRESH WATER: May be available alongside pier.
FUEL: Diesel oil available by truck.
CONSULS: Most countries have consulates in nearby Tripoli.
AIRPORT: Kleiate (Tripoli) or Beirut.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summertime.
HOLIDAYS:

Holiday	*Date*	*Days*
New Year's Day	January 1st	1
Al-Adha (Karban Bairam)	varies	2
Ashoura	varies	1

GENERAL: Lebanon Chemical Co. have VHF set in management building. Call sign is "Pilot Lebanon Chemical Co.". It has a range of 35 miles and listens on VHF Channel 16 from 0630 hrs. to 1600 hrs.
Agent: P. Adem may be contacted on VHF Channel 16 or through the Company.
Cables: Cables to Agents and Company are routed through Beirut Radio.

(B) SELA'ATA TERMINAL PORT:

LOCATION: Lat. 34° 16.97′ N., Long. 35° 39.87′ E.
Sela'ata Terminal Port is located to the South of Tripoli, and is used for dry, liquid, general cargoes and containers.
The entrance to the harbour and the channel entrance are restricted to vessel's having a maximum draft of 13.0 m.
PILOTAGE: Agent arranges for qualified Pilot to meet vessels 2 miles N.W. of breakwater.
ANCHORAGE: Good anchorage available in Sela'ata Roads.
MAX. SIZE: Depth at entrance 13.0 m. Max. draft alongside quay 13.0 m.
HEALTH: See Section "A".
RADIO: Cables to and from Agent (ASLAC) via Beirut Radio (OGERO).
VHF: See "General".
TUGS: There is one tug at Sela'ata (250 h.p.). A second tug could be made available upon request.
BERTHING: One pier about 140 m. long, 2 berths, 2 shore cranes and 1 grain unloader (250 t.p.h.), suitable for vessels up to 30,000 tonnes d.w.t.
STEVEDORES: No ETA to stevedores necessary. Working hours are 0700 hrs. – 1500 hrs. Overtime on Sundays and on official holidays.
MEDICAL: Master to advise Agent (ASLAC) by cable prior to arrival if medical attendance required.
TANKERS: *Liquid Cargoes:* A 6 in. connection is available at plant wharf with a length 800 m. and a discharge capacity of 200 t.p.h. Vessels to be equipped with a 6 in. discharge hose of 10 m. length.
DENSITY: 1026 – 1027.
FRESH WATER: May be available inside harbour premises.
FUEL: Diesel oil is available in trucks.
GANGWAY/DECK WATCHMEN: Recommended. Shore watchmen available round the clock.
OPENING/CLOSING HATCHES: For liners by stevedores, otherwise per agreement.
CUSTOMS: Available on request.
IDENTIFICATION CARDS: Due to prevailing situation, on shore passes issued to crew members.
CONSULS: Most countries have consulates in nearby Tripoli.
AIRPORT: Beirut or Kleiate (Tripoli).
TIME: GMT plus 2 hours. Summertime GMT plus 3 hours (15th June – 15th October).
HOLIDAYS: See Section "A".
GENERAL:

Agent	A. Sinno (Huiles et Derives) on Channel 16 (ZOUYOUT).
Cables	Cables to Agents routed through Beirut Radio (ASLAC).
VHF:	
Equipment	Fixed Station sited in Terminal Building and used by Supervisor.
Call Sign	ZOUYOUT.
Range	Approximately 35 miles.
Frequency	Transmitting on Channel 16. Receiving on all frequencies.
Watches	0630 hrs. – 1430 hrs.
Mobile Station	
Equipment	Portable, battery operated, carried aboard vessel with loading/discharging Supervisor.
Call Sign	ZOUYOUT.
Range	Approximately 2 miles.
Frequency	Transmitting on CB bands (Domestic). Receiving on CB bands (Domestic).
Watches	Continuous, whilst vessel loading/discharging.

Note: The VHF system is not connected to the main telephone switchboard, and only selected shore stations have access to it.

AGENT: See "Beirut".

SIDON: 33.30 N. 35.21 E. (See Plan)

See "General" before first port.

BERTHS NO'S. 1, 3 AND 4 HAVE BEEN TAKEN OUT OF SERVICE AND ALL MOORING BUOYS HAVE BEEN REMOVED. THE SUBMARINE LINE IS STILL THERE.
BOTH THE WHITE AND THE RED SEABUOYS ARE MISSING.

OPERATORS: Trans-Arabian Pipe-line Company, Sidon Terminal. The Company transports crude oil from Saudi Arabia via pipe-lines and exports from terminal South of Sidon (Saida). Terminal operates 24 hours a day, 7 days a week.
Advance Information: Prior to acceptance of nomination of vessels, Tapline requires advance information regarding maximum draft, vessel's equipment and location of manifold in reference to distance from the stern of the vessel, permanent ballast, simultaneous loading of cargo and discharging of ballast, etc. Acceptance or rejection will be made after evaluation of above data by Sidon Marine personnel.
FLAG: All vessels required to fly Lebanese Ensign on foremast during daylight hours. Lebanese flags may be obtained from ship's Agent.
LOCATION: Sidon Terminal is open, unsheltered roadstead, situated immediately North of Zahrani River, about 5 miles South of City of Sidon (Saida), Lebanon. It is approximately 35 miles South of Beirut, and 17 miles North of Tyre.
DESCRIPTION: Terminal's Tank Farm consists of 23 storage tanks situated East of terminal at 360 ft. (average) above sea level. Marine and administrative offices, a laboratory for testing stocks, 2 large and 2 small storage tanks all located within area just above sea level. An "L"-shaped pier for harbouring Company's marine craft extends approximately 1,000 ft. from shore near Southern end of berthing area.
NAVIGATIONAL AIDS: Radio beacon tower located 1,200 ft. back from beach, S.E of moorings. Occulting red light (about 30 flashes per minute) mounted on top, elevation 184 ft. above sea level; position Lat. 33° 30′ 04″ N., Long. 35° 20′ 31″ E. Tower also marked with 2 sets fixed red lights located respectively 45 ft. and 90 ft. below occulting red light. Radio beacon is automatic and operates on 24 hr. basis on frequency of 296.5 kHz, with "SAD" as the identifying call sign. It will signal 2 times over a 10-second period and then give a constant 1,000 cycle tone for 72 seconds. Tower is of cage-type construction, painted red and white. About 2.5 miles S.W. of terminal sea buoy and approximately 2 miles offshore is rocky shoal with approximately 32 ft. of water over it.
Vessels approaching from Southward should keep offshore until radio beacon tower bears 100° true before hauling-in.
Defense Mapping Agency (DMA) Pub. 132, "Sailing Directions (Enroute) for Eastern Mediterranean" (6th Edition 1989) reads in part:
Caution: Vessels should keep at least 3 miles offshore along this part of the coast, and in depths of not less than 27 m. (15 fathoms).
During darkness terminal range lights and mooring buoy marker lights may be visible. These lights are located inside the restricted area.
A conspicuous water tank (painted aluminium) on a tower located Lat. 33° 29′ 27″ N., Long. 35° 21′ 10″ E., the top of which has elevation of 460 ft. above sea level. Location is seaward of centre oil storage tanks.
There are a number of smaller radio towers to N.W. and S.W. of beacon tower. South of terminal, at Medreco Refinery, is a conspicuous black stack located Lat. 33° 29′ 31″ N., Long. 35° 20′ 08″ E. A little further N.W. from this stack is a tall pipe painted aluminium with a flare on top at Lat. 33° 29′ 35″ N., Long. 35° 20′ 03″ E.

Berth Locations:
Berth No. 1 (7 buoys) Lat. 33° 30.8′ N., Long. 35° 19.9′ E.
Berth No. 3 (6 buoys) Lat. 33° 32.0′ N., Long. 35° 20.4′ E.
Berth No. 4 (5 buoys) Lat. 33° 32.4′ N., Long. 35° 20.8′ E.

DOCUMENTS:
Health Declaration: International Health Form to be filled out by Master on arrival.
Cargo Manifest: No cargo arrival manifest required, as same usually prepared by local Agent.
Clearance: No clearance required.
Crew List: 4 copies required on arrival.
Passenger Manifest: If any passengers on board.
Store List: 2 copies.
Bonded Store List: 2 copies. Present regulations at Sidon Terminal allow each seaman to retain in his possession a maximum of 40 cigarettes or the equivalent weight of tobacco or cigars. The balance of all smoking items must be collected and carefully listed prior arrival. This list will be checked by Customs before sealing lockers. If any discrepancies, vessel subject to a fine.

PILOTAGE: Vessels to be moored at Sidon will be boarded by Mooring Master of Company within 2 miles to seaward of terminal sea buoy. Mooring Master will advise Ship's Master on approaches to berth, mooring, unmooring, connecting and disconnecting submarine hoses and in all other operations within berthing area. All manoeuvring of ships within berthing area shall be done only in accordance with advice of a Tapline Mooring Master, subject to the understanding that in all cases and circumstances Master of the vessel being manoeuvred shall remain solely responsible, on behalf of vessel's owner, for safety and proper manoeuvring of vessel. Ship's Master or qualified deck officer must be on bridge at all times while ship is manoeuvring.

Vessels must have a pilot ladder safely and securely rigged, and all vessels over 45,000 d.w.t. should have an accommodation ladder rigged in combination with pilot ladder for safe boarding of Mooring Master and Government officials. Pilot ladder should be abaft and close to accommodation ladder so that Mooring Master, after climbing a few steps, can use accommodation ladder for remaining climb. Since hoses handled on port side at Sidon, it is advisable to rig ladders on starboard side. If at night, adequate lighting must be rigged over-side for Mooring Master to approach side of ship and climb ladder safely.

Note: Vessels having special rigs, such as hoisting equipment on short sections of pilot ladder, are not required to rig pilot/accommodation ladders per the above.

ANCHORAGE: For vessels awaiting berth, good anchorage just W.S.W. of terminal sea buoy in 16 to 20 fathoms, sandy bottom. Vessels should under no circumstances anchor North of terminal sea buoy as depths are excessive for safe anchoring.

RESTRICTIONS: Berthing and unberthing during daylight hours only.

Vessels must not arrive with more than 50,000 tons cargo on board.

MAX. SIZE: Berth No. 2, depth approx. 67 ft. Tankers up to 80,000 d.w.t. or approx. 55 ft. draft are considered max. size which should be handled during Winter months at Sidon, and then only if vessel meets all of below recommended requirements. Otherwise, vessels of over 80,000 d.w.t. should not be nominated for liftings at Sidon during period November-April. In Summertime max. 100,000 d.w.t.

Based on previous experience, sudden and severe storms of long duration are not expected from April through October. Vessels over 80,000 d.w.t. may, therefore be accommodated during this period. However, prior to acceptance of nomination of vessels over 80,000 d.w.t. Tapline requires advance information regarding max. draft, vessel's equipment and location of manifold in reference to distance from stern of vessel which should not exceed 450 ft. Acceptance or rejection will be made after evaluation of above data by Sidon Marine personnel.

Summary of Recommendations for Vessels over 40,000 d.w.t.:

1. Capable, efficient and reliable anchor windlass(es).
2. 15 shots on starboard chain – 13 shots on port chain are satisfactory.
3. Mooring wire winches, 1 on aft well deck, 3 on poop deck, 200 fathoms wire on each, with adequate number of manila or synthetic ropes to double up as needed.
4. Capability of lifting 16 in. hose string – 6.5 tons static weight.
5. Suitably located hang-off bits.
6. Capability of keeping vessel in a reasonable safe ballast condition (November-March) by permanent ballast or loading while deballasting, or a combination of both.
7. Ship's manifold located not more than 400 ft. from stern.

RADIO:
(a) Facilities. Tapline has own ship-to-shore radio telegraph, and VHF radio telephone station at terminal. This station is not open to commercial traffic. Services limited to traffic between Tapline and tankers within 3 days' sailing time from terminal. Messages to or from tanker agents classed as "Commercial" and must be routed via Radio Orient, a commercial radio station. Its call sign is ODR.

Radio Orient Beirut, call sign ODR, transmits (CW) on 8702 kHz and 13101 kHz simultaneously half-past each hour beginning at 0630 until 2130 hrs. GMT, the traffic list; 524 kHz each hour beginning at 0600 hrs. until 2100 hrs. GMT, the traffic list. Listens on 8534–8374 kHz and 12531–12561 kHz for replies and calls each hour from half-past the hour until the hour; 500 kHz 0600 to 2200 hrs. GMT and 425, 454, 468 and 480 kHz from the hour until half-past the hour for replies and calls. Keeps watch only between 0600–2200 hrs. GMT on 500 kHz.

(b) Advice of Arrival. It is important that ships establish radio contact with "ODR" when 3 days distant from Sidon and maintain this contact at regular intervals until just prior to arrival at the terminal. All ships should send a 72-hour ETA message to Tapline, giving the best estimate of ship's arrival time, a statement of bunker requirements and other relevant information. Shorter notice may result in berthing delay. Further ETA messages should be sent when vessel is 24 hours and 12 hours distant and to cover any other time changes occurring in the original ETA or those subsequent thereto. The 12-hour ETA should include a statement regarding "ship's readiness to load" on arrival, and time required to discharge clean ballast after ship is moored. A further contact when 4 hours away is desirable for exchange of weather data and mooring schedule. Vessels failing to give minimum of 12 hours arrival notice may be subject to delays in acceptance.

(c) Ship-to-Shore Communications. Ship-to-shore communications, while ships are in moorings, will be by portable VHF radio units used by the Mooring Master only. The use of the ship's radio station (except Channels 16-14) and/or battery charging equipment is prohibited for safety reasons during cargo transfer operations.

In the event of normal ship-to-shore communications failure, the (ship's) emergency whistle signal should be used.

VHF: Tapline VHF radio telephone system operates on international Channels 14 and 16, 156.7 MHz and 156.8 MHz respectively. Channel 16 used to establish contact while all traffic handled on Channel 14. Tapline guards these channels on a 24 hour basis, and contact can generally be made at distances up to 100 miles from terminal. Conversations on these channels will be carried out in English language only.

Mooring Master only will be in direct charge of portable VHF ship-to-shore radio communications.

HEALTH: Rules governing quarantine of vessels are same as found in other ports.

BERTHING: 7 buoys at Berth No. 2. Berths numbered 1 to 4 from South to North. Vessels moored on 1 heading (West) basis using both bow anchors with max. possible spread of anchors to increase ship's anchor beam holding components. Ship's stern moored to cylindrical buoys fitted with release hooks, using 7 ropes (or wires) to respective mooring buoys. Permanent moorings consist of 7 steel cylindrical buoys in each berth.

Certain mooring buoys in all berths fitted with 1.5 in. diameter preventer wires, one end of which is secured to mooring buoys. When required, other end is brought on board vessel by a messenger line after ship moored in position. Preventer wires supplemental to ship's regular moorings during adverse conditions. Ships should have chain stoppers for handling these wires.

BALLAST: Masters are warned that no dirty ballast or bilge water may be discharged within an area extending 100 nautical miles seaward of the Lebanese coastline. All pipe-lines, sea suctions, strainers and pumps that are to be used for the discharge of clean ballast must be flushed clean prior to entering the 100 mile zone. Except for oil retrieved under "load-on-top" procedures, Masters must assure themselves that all oil tanks, pipe-lines and pumps are free of all traces of oil.

The terminal has no facilities for receiving oily ballast. A vessel must have sufficient ballast for safe manoeuvring. However, by carefully watching the weather, especially in the Summer months, by frequent interchange of weather information and berthing instructions, and, by a knowledge of the behaviour of his own vessel, a Master may desire to arrive at the terminal with minimum ballast thereby lessening any possibility of infringement of the pollution restrictions of this section, and also reducing time in berth.

As soon as practicable after arrival and prior to acceptance, all the vessel's tanks will be inspected for evidence of oil in ballast tanks. Inspection will continue during discharge of ballast. If evidence of oil appears at either of these inspections, the ship must return at once to a point not less than 100 miles from the coastline and there accomplish the necessary tank cleaning. Any vessel required to return to a position at least 100 miles offshore for the purpose of discharging dirty ballast, cleaning tanks or for any similar reason, automatically nullifies any Notice of Readiness already tendered, and at the same time loses any priority held for loading. On return from sea, vessel will be entered for loading at the time of the second arrival, when a new Notice of Readiness will be tendered.

Vessels discharging dirty ballast within the prohibited 100 mile zone may be subjected to action by the Lebanese Government. In addition, ship's owners and charterers will be promptly notified of any violation.

Masters are also warned that ship's garbage or trash should not be dumped within 50 miles from the Lebanese coast.

LOADING: *(a) Readiness:* Tenders to load will normally be accepted and berths assigned to vessels in order of arrival, provided vessels have nominations for cargo valid at the time, carry clean ballast and are in all respects equipped and ready to moor. In event berthing delayed on account weather, vessels will ordinarily keep their loading priority in order of arrival. Vessels required to leave port area on account of weather (port closed), should keep in contact with terminal via VHF in order that they will be available when weather moderates. Company will make every effort to load vessels on arrival, or as promptly as berth is available, weather permitting. Notice of readiness will not be accepted unless vessel ready to load. Arrival time will be considered as time Mooring Master boards vessel underway or time vessel anchors, whichever occurs first.

(b) Connecting-up. Ships loaded by means of submarine pipe-lines. Weight of the 16 in. hose in No. 2 Berth about 6.5 tons. Hoses lifted by ship's gear on port side. Detail of flange templates shown in drawings below. Ships should provide manifold fittings to allow connection of flanges shown in "Plan Section".

Mooring Master advises ship's personnel in lifting, connecting, disconnecting and lowering of hoses. A ship's deck officer must be present, and must direct ship's crew in all hose handling. There must be sufficient crew on deck to perform this work.

(c) Rates: Loading is by gravity flow from tank farm which is approximately 360 ft. above sea level. Loading rates as follows (approximate maximum):

	Rates (BPH)	
Berth	*With 1 Hose*	*With 2 Hoses*
2	40,000	70,000 (16 in. hoses)

Order save ship's time and to ballast vessel as quickly as possible, as well as to make berth available for others, it is requested that ships receive oil as fast as it can be delivered, with due regard for safety. The removal of any restrictions, such as strainers, etc., is recommended.

DISCHARGING: Ships unloading crude or refined products in Tapline Seaberth must:

1. Be able to discharge at least 1,000 t.p.h.
2. Be equipped with centrifugal cargo pumps only. Piston pumps will NOT be accepted due to the damaging effect they have on the submarine hoses.
3. Ships without permanent ballast tanks must be able to discharge cargo and load ballast simultaneously.
4. Vessels must NOT strip (drain) their cargo tanks into the sealine. Air injected by this operation may cause the line to float and buckle.

Report: 1983. Cargo discharged through 8 in. line (old bunker line).

MEDICAL: Neither medical nor hospital facilities provided by Tapline. Private doctors and hospital facilities available at Sidon and Beirut. Agents acquainted with situation and can make necessary arrangements.

If unable make radio contact, then vessels requiring emergency medical assistance should hoist International Code Flag "W" in daylight, and at night, send "W" (· – –) on blinker light to attract immediate attention, the same signal "W" (· – –) should be given on ship's whistle in either day or night hours. Signal should be repeated until acknowledged visually by either another ship in berth; from shore station or from Company launch. As soon as signal is received, terminal officials will advise ship's Agent as soon as possible of the emergency medical aid required.

DENSITY: Salinity of the sea is same as open Atlantic Ocean. Temperature ranges from 60°F. to 85°F. (15.6°C. to 29.4°C.) depending on season.

FRESH WATER: Not available.

FUEL: Bunker fuel loaded at rate of 3,000–5,000 bbls.p.h. through 8 in. deck hose. Bunker connection should be located near ship's cargo manifold. Ships calling at Sidon to load crude oil should arrange for bunker fuel nominations through one of the offtaker companies well in advance of arrival. Bunker fuel will not be delivered until Tapline has received a firm nomination. Bunker fuel will be loaded as promptly as circumstances permit, but Tapline assumes no liability for any delays incurred by a vessel in berthing or loading bunker fuel. Maritime lubricants available, through marketing representatives in Beirut by arrangement through Agents.

PRECAUTIONS: *(a) Valve Control.* Ship's valves must not be closed against the oil stream.

(b) Emergency Signal. When, and if normal ship-to-shore communications fail, the emergency signal to stop oil flow will be a continuous blast on ship's whistle, until oil ceases to flow. Steam or air should never be shut off from the whistle during loading. Whenever emergency whistle is used, all loading operations in all berths will be shut down until communications can be established with vessel giving the signal. For this reason, it is requested that ships in the area refrain from using their whistles for other purposes.

(c) Readiness to Leave Berth. Port is considered an "open roadstead", and under no circumstances may engine be shut down for repairs while ships moored in submarine berths. Vessels in submarine berths must be able to clear, and shall clear immediately upon advice of Mooring Master. Ship's engine and gear must therefore be ready at all times with full power for immediate use.

(d) Loading and Deballasting Simultaneously. Properly equipped vessels will be encouraged to discharge clean ballast and load oil simultaneously. This capability is especially necessary during unsettled weather order keep vessel reasonably ballasted.

CONSULS: Italy and Norway. Consular or diplomatic representatives for most nations maintain offices in Beirut.

REPAIRS: No facilities.

SURVEYORS: Available from Beirut. Saybolt also available.

OFFICIALS: Lebanese officials, such as Customs Director, Quarantine Officer, Immigration Officer, Captain of the Port and Police, stationed at Sidon. Should Customs guards be stationed on board while in berth, it is expected that ship will provide food for these guards and other officials.

STORING: See "Prelims".

1. Barge only.
2. No storing during loading/discharging.
3. Open sea-berth.
4. Open sea-berth.
6. No.

SHORE LEAVE: Arranged between Agent and Lebanese Security Officer aboard vessel. Ship's personnel (other than emergency or medical cases) not allowed to disembark at terminal. All personnel going ashore must land at Sidon where small boats must cross a shallow and sometimes impassable bar. Delays have been caused to vessels whose personnel have been unable to rejoin their ship. Sufficient personnel must be aboard at all times for letting go lines so that vessel can clear berth whenever required.

GENERAL: *(a) Mooring Wires and Winches.* Use of mooring wires to powered drums for all vessels calling at Sidon is strongly recommended. Because there are no mooring tugs available, a ship's ability to moor during marginal weather conditions is dependent upon its ability to warp itself into position. Vessels with capable wire winches and deck mooring equipment that are able to place 1 or 2 mooring ropes on a windward mooring buoy, usually able to moor without difficulty. Vessels over 40,000 d.w.t. should have mooring wires to powered drums, 1 on aft well deck and 3 on poop deck. The wires should be 200 fathoms in length and so secured as to be easily let go from ship if necessary.

(b) Ropes. Vessels should have 2 suitable, best quality mooring ropes of 200 fathoms each located on aft part of after well deck for use on either port or starboard side, 3 (min.) suitable, best quality mooring ropes of 200 fathoms each and 3 additional ropes of 150 fathoms each on poop deck plus properly located warping winches and bitts. Vessels equipped with mooring wire winches on poop deck may reduce required "additional" ropes accordingly. Wires are not used on port side of aft well deck due to possible fouling of wire with hose or pipe-line underwater facilities. In this position a suitable, best quality mooring rope must be used. 2 ropes of 200 fathoms each recommended, to be used on either side while mooring, and used on port side only for securing ship in berth.

SHIPMASTER'S REPORT: February 1983.

Tankers: The following notices are presented to the Master on arrival at the terminal.

TRANS-ARABIAN PIPE-LINE COMPANY
SIDON, Lebanon
Tanker Loading Advice

Master .... 19............

Your vessel is scheduled to moor in Berth No.............at.............. hours..............................19........

A Mooring Master will board your vessel prior to this hour. Engines, deck machinery, mooring lines and crew should be in readiness to proceed to berth.

The cargo (a 5 ton lift) and fuel hose will be picked up on the PORT SIDE.

The Mooring Master advises ship's personnel regarding the lifting and connecting of the submarine hoses, and after loading is completed, regarding the disconnecting and lowering. In this connection, he acts in an advisory capacity and assumes no liability on behalf of the Company. A ship's deck officer must be present, and he must approve the hose connection on board. The ship's crew will do the actual connecting and disconnecting of the hose.

The Mooring Master will be in charge of all ship to shore communications.

One prolonged blast of ship's whistle is the emergency signal to shore to stop the flow of oil to the ship and apply vacuum on the submarine lines.

SHIPS MUST NOT CLOSE VALVES AGAINST INCOMING OIL. Ships will be held liable for damage resulting from such closures.

Vessels in submarine berths must be able to clear immediately upon instructions from the Mooring Master.

CAUTION: It is the ship Master's responsibility to see that no oil (crude, bunker C, diesel or bilges) is pumped or spilled overboard from his ship either in the vicinity of the Company's Terminal area or within the area of 100 miles from the Lebanese coast. In the event of any oil spillage or loss from your vessel as the result of any act or omission of the vessel, such as but not limited to, pumping of oily water over side from ballast or bilge, or oil spill during loading, the vessel shall be responsible for all costs and expenses of clean up, or for any damages to property or injury to persons resulting from such spillage or oil loss. Tapline reserves the right to take all reasonable measures to clean up any resulting pollution or contamination on land or sea and will charge to vessel for all costs and expenses incurred thereby. In addition, since Tapline, as operator of the Terminal, is responsible (as a guarantor of the ship) for any damages to property of or injury to third persons, resulting from such spillages or oil losses, in the event Tapline pays or settles valid claims of third parties for such damages or injury, Tapline shall have the right to recover from the vessel all costs and expenses arising from its handling, payment and settlement of such third party claims.

The Port Authorities are very strict in this matter and a written report is submitted to ship's owners. WELL DECK SCUPPERS MUST BE PLUGGED DURING LOADING.

Please sign the attached duplicate of this notice, acknowledging receipt of same.

TRANS-ARABIAN PIPE LINE COMPANY.

TRANS-ARABIAN PIPE LINE COMPANY
SIDON, Lebanon

Master .... 19............
Sidon, Lebanon

Dear Sir,

It is the ship Master's responsibility to assure that no oil including without limitation crude, bunker C, diesel or bilges is pumped or spilled overboard from his *vessel* in the vicinity of the Company's Terminal area or within the Prohibited Zone offshore Lebanon as defined in the International Convention for the Prevention of Pollution of the Sea by Oil, 1954, as amended in 1962. In the event of any oil spillage or loss from your vessel including but not limited to spillage due to pumping of oily water over the side from ballast or bilge or oil spill during loading, the vessel and her owners, operators, *Agents, and Master* shall be responsible for all costs and expenses of cleanup and for any injury to persons or damage to property, *including Tapline employees and property,* resulting from such oil spillage or loss. Tapline reserves the right to take all reasonable measures to clean up any resulting pollution or contamination on land or sea, but only as a contractor on behalf of your vessel and/or her owners, operators, *Agents or Master* and will charge the vessel and/or her owners, operators, *Agents or Master* for all costs and expenses incurred thereby.

Tapline, as operator of the terminal, is responsible as a guarantor of the ship for any injury to third persons or damage to property resulting from such oil spillage or losses. The Port Authorities are very strict in this matter and a written report is submitted to *the vessel's owners, operators, Agents or Master* for any such incidents. In the event Tapline settles or is required to pay valid claims of third parties for such injury or damage, Tapline shall have the right to recover from the vessel and/or from her owners, operators, *Agents or Master* all costs and expenses arising from its handling, settlement and payment of such third party claims.

Please sign and return the attached duplicate of this notice acknowledging receipt of same.

TRANS-ARABIAN PIPE LINE COMPANY.

AUTHORITY: 1. Zahrani Terminal, Lebanon, P.O.Box 28, Sidon, Lebanon.

2. Trans-Arabian Pipeline Company, P.O.Box 11-1348, Beirut, Lebanon. *Tel:* Beirut 341270-5. *Telex:* 20769 Le Taplin. *Cables:* Tapline Beirut. *Contact:* Captain K. E. Hopen, Asst. Terminal Superintendent.

AGENT: See "Beirut".

TRIPOLI: 34.28 N. 35.49 E. (See Plan)

(a) DRY-CARGO PORT
(b) OIL TERMINAL

(a) DRY-CARGO PORT.

See "General" before first port.

Manifests should be visaed by Lebanese Consul at ports of shipment or at any port *en route* where there is a Lebanese Consul. If on account of non-existence Lebanese Consul at ports of shipment or at any ports *en route* the manifests are not visaed, then such consular visa dues are collected at Beirut.

Non-Liner vessels calling at Tripoli, are to present on arrival to the local Customs' authorities, one copy of each manifest of cargo on board (even "IN BALLAST" manifests), DULY STAMPED AND SIGNED by the Customs' Authorities at the Loading Ports.

Otherwise, the vessel is subjected to a Customs' FINE.

DOCUMENTS:

1 Legalised copy of Cargo Manifests.
5 copies of Cargo Manifests.
2 Store Lists.
5 Passenger Lists.
2 Lists of Cigarettes and Tobacco (see "Customs Allowances").

In addition to documents listed, 2 copies of each Bill of Lading are to be handed over on arrival to the Agents, for Local Customs' Authorities control and check.

APPROACHES: Sunken wreck in position Lat. 34° 30′ N., Long. 35° 49′ E.

Depth in channel 9.0 m.

PILOTAGE: Compulsory. Agent arranges with Harbour Master, therefore keep Agent closely advised ETA. Harbour Master may also be contacted on VHF Channel 16.

Pilot boarding position: Lat. 34° 29.6′ N., Long. 35° 49.5′ E.

ANCHORAGE: Good anchorage.

MAX. SIZE: Max. LOA 150 m. (occasionally 175 m.). Max. draft alongside berth 22 ft. 6 in.

HEALTH: Health Authorities board in roads. Health form obtainable from Agent or doctor. Yellow Fever Certificates required for ships coming from Far East and Red Sea. Owners should check with Agents respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for crew members.

RADIO: Cables via Beirut Radio to and from Agent.

VHF: Harbour Master on Channels 16 and 6.

BERTHING: New pier about 600 m. length. 2 berths. 20 cranes, capacities 5 tons – 100 tons. 2 forklifts with capacity 20 tons each. Lighters available for discharging alongside vessel. Ship's gear often used for discharging. There is a grain silo with capacity of 4,000 tonnes. 30 steel barges of 350 tons capacity each. 40 wooden and steel barges of 200 tons capacity each. All cranes, forklift and barges are privately owned. 50 ton floating crane available, owned by port company.

STEVEDORES: Ordered by Agent. No ETA to stevedores necessary. Working hours, 0700 – 1500, otherwise overtime included on Sundays and on official holidays.

MEDICAL: Master to advise Agent by cable prior to arrival if medical attendance required. Hospitals available.

DENSITY: 1025.

FRESH WATER: Available by barge.

FUEL: Available alongside by tanker trucks.

REPAIRS: Possible.

SURVEYORS:

1. Cargo inspectors are available in Tripoli.
2. Surveyor's (Lloyd's and A.B.S.) are also available in Tripoli.

GANGWAY/DECK WATCHMEN: Available and recommended.

OPENING/CLOSING HATCHES: For liners by stevedores, otherwise per agreement.

CUSTOMS ALLOWANCES: Tobacco. 40 cigarettes per crew member. Customs very strict, checking crew cabins. Regulations are as follows:

1. That the quantity of tobacco to be allowed on board vessels upon their arrival at a Lebanese port will be fixed on the basis of 2 packets per crew member, passenger per day, and to be calculated on a maximum period of 4 months, if the vessel emanates from an American, Asian or African port – not Central Africa; and for 2 months if the vessel's last port of call is in Europe, Central Africa or Mediterranean, which will be deducted from the quantity, and on the same basis the consumption by the crew members and passengers during their trip, and this to start from the last port of call until arrival at a Lebanese port.

That the number of passengers to be taken into account on a tourist vessel will be the number of berths the vessel can accommodate and not the number of passengers on board. As to cargo vessels, the actual number to be accounted for will only be the crew members and the Master of the vessel.

2. In the event that it is the first call of the vessel, at a Lebanese port and not aware of such regulations, and it was found on board her an excess quantity to the actual one allowed, as indicated above, a Process Verbal will be established for the excess quantity found and the cigarettes placed under seal. An undertaking is also to be obtained from either the Owners and/or her Agents to the effect that they will submit a certificate, within one month, to be issued by the relevant Customs Authorities of the next port of call of the vessel after a Lebanese port. While the seizure of the vessel will be lifted when the Bank guarantee equalling the amount of fine and dues is placed, or a Personal Guarantee from the Agent – if solvable – and in the event that the undertaking is not fulfilled, the usual penalties will be inflicted according to the law.

3. In the event the vessel is aware of such restriction, and for one reason or another she is carrying an excess quantity, this excess must be, as per official regulations, be shown on the manifest legalised and issued at the last port of call touched by the vessel prior to Beirut. Any excess found over and above such declaration will be considered as smuggling and the law will be applied.

Wine and/or spirits: 1 bottle per crew member; Master allowed 3/4 bottles.

CARGO GEAR: Ship's gear to be used.

CONSULS: Most countries have consulates in Beirut.

AIRPORT: Beirut International Airport is 100 km. from Tripoli.

TIME: GMT plus 2 hours. Summertime, GMT plus 3 hours.

HOLIDAYS:

Holidays	*Date*	*Days*
New Year's Day	January 1st	1
St. Maron	February 9th	1
Good Friday (Catholic)	Varies	1
Labour Day	May 1st	1

BANKS:

The British Bank of the Middle East, Mina Street, Tripoli, Lebanon. Telex: 21850 Bbme.

Banco di Roma, Tell Street, Tripoli, Lebanon. Telex: 21818 Romtri.

STORING: See "Prelims".

1. Cargo ships can be stored by barge and truck and tankers by supply launches.
2. Cargo ships Yes. Tankers can be stored only at anchorage.
3. Yes.
4. Yes.
5. Storing can be done around the clock.
6. Storing is done by ship chandlers or their Agents.

IDENTIFICATION CARDS: Shore pass given to each crew member. Passport and Seaman's Book to remain in Master's care.

AUTHORITY: The Harbour Master, Ministry of Public Works and Transport, El-Mina, Tripoli, Lebanon. *Tel:* 600283 (Harbour Master). *Telex:* 46030 LE A/B Tihama. *Contact:* V. Ghazi, Harbour Master.

AGENT: See "Beirut".

(b) OIL TERMINAL.

See "General" before first port.

Note: Terminal storage tanks were partly destroyed in late 1983. Sea berths were re-commissioned in March 1984.

DOCUMENTS: See "Section A – Dry-cargo Port".

PORT LIMITS: There are three spar-buoys to indicate the limits of the Company's Sea Terminal boundaries.

The location of these buoys is as follows:

1st.	Lat. 34° 30′ 03″ N.	Long. 35° 52′ 30″ E.
2nd.	Lat. 34° 29′ 42″ N.	Long. 35° 52′ 26″ E.
3rd.	Lat. 34° 29′ 03″ N.	Long. 35° 51′ 04″ E.

PILOTAGE: The company's Mooring Masters will meet tankers 2 miles N.E. of Tripoli Breakwater Head. Tankers of 40,000 d.w.t. and over should have rigged, when in light condition, an accommodation ladder lowered to about 12 ft. above water. This can be adjusted to suit conditions. A pilot ladder should be rigged immediately abaft the accommodation ladder, to within 2 ft. above the water. This will enable Pilot to ascend pilot ladder clear of launch and then step on to the lower platform of the accommodation ladder. United Kingdom Merchant Shipping (Pilot Ladders) Rules are relevant.

ANCHORAGE: Good anchorage immediately W.N.W. of No. 4 sea berth buoys.

MAX. SIZE: Least depth of water available in berth, and swinging circle, after deducting 6 ft. for the height above sea bed of the sea line and cradle is as follows: No. 1 Berth, 62 ft.; No. 2 Berth, 66 ft.; No. 3 Berth, 53 ft.; No. 4 Berth, 38 ft. The swinging circle is defined as 1.5 ship's lengths from dropping position of ship's inshore anchor. The approximate draft limits quoted are based on an under-keel clearance, in the berths, of 6 ft.

VLCCs will be handled in Berth No. 2 and loaded to a draft of 60 ft. During the period April to October, and subject to the Master and Mooring Master being satisfied that weather conditions permit loading to a reduced under-keel clearance of 4 ft., then the loaded draft may be increased to 62 ft.

HEALTH: See "Section A – Dry-cargo Port".

RADIO: The Lebanese Oil Installations Limited, Tripoli, must be informed 48 hours prior to arrival of a vessel's ETA, quantity of cargo required, maximum loading rate, SWL of derrick for lifting hoses and confirming that the ballast for discharge in port waters is clean. Communication with Iraq Petroleum Company, Limited, should be by cable addressed to "Petriraq, Tripoli, Lebanon", or direct to Tripoli Terminal Radio Station.

Tripoli Terminal Radio Station. Call Sign – ODC 8.

Waveband	*Hours (GMT)*	*Watch Details*
	0800–0830	ODC 8 Broadcast Traffic List and calls ships on 8514 kHz. Listens on 8354–8374.
	1200–1230	Will transmit on 12831 kHz on request.
High Frequency	1600–1630	
	2230–2300	
	0000–2400	Monitor 500 kHz for calls and answers only.
	0730	Broadcast on 500 kHz QSW 442 kHz.
	0730–0800	Transmit Traffic List on 442 kHz, receives ship frequencies – 425, 454, 468, 480 and 512 kHz.

High Frequency	1130	Broadcast call on 500 kHz, QSW 442 kHz.
	1132–1200	Transmit Traffic List on 442 kHz, receives on normal ship frequencies – 425, 454, 468, 480 and 512 kHz.
Medium Frequency	1530	Broadcast call on 500 kHz QSW 442 kHz.
	1532–1600	Transmit Traffic List on 442 kHz, receive on normal ship frequencies – 425, 454, 468, 480 and 512 kHz.
	2200	Broadcast call on 500 kHz, QSW 442 kHz.
	2202–2230	Transmit Traffic List on 442 kHz, receive on normal ship frequencies – 425, 454, 468, 480 and 512 kHz.
	2232	Broadcast call QSY QSX 500 kHz.

Cables to Agents may be routed through Beirut Radio.

VHF: Tripoli:

Equipment: Fixed Station sited in Terminal Building and used by Control Room.
Call sign: Tripoli Control
Range: Approximately 15 miles.
Frequency: Transmitting on 163.6 MHz.
Receiving on 159.1 MHz.
Watches: Continuous.

Mobile Station

Equipment: Portable, battery operated, carried aboard vessel with Mooring Master.
Call sign: Ship's name (before mooring), or Berth No. (after mooring).
Range: Approximately 8 miles.
Frequency: Transmitting on 159.1 MHz.
Receiving on 163.6 MHz.
Watches: Continuous, whilst Mooring Master on board.

Notes

1. Tripoli also keeps a continuous watch on the international calling frequency of 158.8 MHz. This has a range of approximately 15 miles and its call sign is "Tripoli Control".
2. The VHF System is not connected to the main telephone switchboard and only selected shore stations have access to it.

TUGS: There is no tug at Tripoli.

BERTHING: *Sea Line Berths.* 5 berths numbered from N.E. to S.W. specifications as follows:

Berth No.	*Max. t.p.h.*	*Fixed Sea Line*	*Strings of Flexible Hoses*	*Approximate Limits*	
				Draft	*Deadweight*
1	5,000	2×24 in.	2×16 in.	56 ft.	140,000
2	6,000	1×32 in.	2×16 in.	60 ft.	250,000
3	5,000	1×32 in.	2×16 in.	47 ft.	87,000
4	Products	2×16 in.	2×12 in.	32 ft.	25,000
5	LPG	1×6 in. 1×3 in.	1×6 in. 1×3 in.	30 ft.	5,000

As loading is by gravitation, the maximum rates are dependent upon availability of suitable shore tanks and loading lines.

LOADING:

1. *Readiness to Load,* will be received by the Mooring Master, who is the Company Representative on board. The advice from the vessel which states she is ready to receive cargo is considered as final, and as indicating that every operation necessary aboard the vessel has been completed. As soon as possible after such a signal has been received, and without further advice, loading will commence. Damage to hoses can occur if ship's valves are not open at the start of loading.

2. *Derricks*

(a) Two hoses are connected on the port side amidship.

(b) Derricks or cranes reaching over the hose connection should be capable of lifting the flexible hose from the sea-bed to a height of up to 30 ft. above the deck.

(c) A minimum SWL of 5 tons is required for 12 in. hoses.

(d) The faster loading berths equipped with 16 in. hoses are available only to vessels with derricks and tackle with a minimum "Safe Working Load of 7 tons". Such vessels will be given berthing priority when queuing occurs and these berths are free but other vessels have not the capacity to handle the larger hoses.

3. *Hose Hang-off Bitts* are required at about 10 ft. from the ship's rail at the loading manifold to secure the submarine hoses on the port side.

4. *Hose Connection/Disconnection.* Ship's crew with a responsible officer in charge to perform all operations as advised by the Mooring Master, to lift, connect, disconnect and lower hoses.

5. *Ship's manifold* – to be prepared for the connection of 12 in. or 16 in. hoses with flanges of 150 series, dependent on berth allocation.

6. *Loading – Supervision and Commencement*

(a) All operations in connection with starting of loading, discharging, switching of tanks on board and topping-off must be directly and personally supervised by a responsible ship's officer.

(b) The advice from the vessel that she is ready to receive cargo is considered as final, and as indicating that every operation necessary aboard the vessel has been completed. As soon as such a signal has been received, and without further advice, loading will commence. Damage to hoses can occur if ship's valves are not open at the start of loading.

Caution: The oil loading stream to the ship is controlled on shore and it is extremely dangerous if a ship's valve is closed against the flow of oil.

To prevent excessive pressure from surge in ship and shore lines, ship's valves must not be shut-off against the stream, and when switching tanks, ship's valves must be closed slowly. Vessels will be held liable for damages resulting from any mal-operation of valves on board.

7. *Tank Dips.* During loading frequent checks should be made by the responsible ship's officer to ensure that cargo is entering the designated cargo tanks only and that there is no escape of oil into pump-rooms or through sea and overboard discharge valves. Particular care must be exercised by ship's personnel in "Topping-off" tanks and towards completion of loading to ensure that the terminal is given timely advice of any decrease in loading rate required. Adequate "standby" notice must be given before the final "stop".

8. *Loading Operations*

(a) The Mooring Master will not transmit any loading instructions to the shore until the responsible ship's officer is satisfied that the hoses are connected correctly and that all valves have been set for receiving cargo.

(b) Loading rates requested by the vessel or quoted by the terminal will be the peak or maximum rate at any time during the loading period.

(c) While in berth, ships should be ready to move under their own power in the event of their breaking adrift, catching fire, fire in adjacent berths or other emergency. No repair should be carried out while in berth which would immobilize the ship or impair her fire-fighting efficiency.

Failure to vacate the berth on completion of loading may result in delays to other vessels, demurrage, and loss of throughput which shall be accountable to the vessel.

(d) The Mooring Master will advise the Master of the ship as to any signals needed for local requirements.

(e) The Mooring Master brings a portable radio on board for ship to shore communication.

Products: *Requirements for a Product Delivery Vessel:*

1. The discharge berth is an open sea berth.
2. Tripoli Terminal Call Sign is ODC 8 and Master's ETA should be sent at least 48 hours prior to vessel's arrival on 500 kHz.
3. Vessel to be equipped with centrifugal pumps capable of maintaining a ship's rail pressure of 120 p.s.i. (reciprocating pumps are totally unacceptable).
4. Max. draft loaded 32 ft. in Berth No. 4 and 62 ft. in Berth No. 2.
5. 5 ton derrick SWL.
6. 6 mooring ropes 120 fathoms each.
7. Port and starboard anchors to have a minimum of 8 working shackles each.
8. Midship connection (Portside 1×12 in. 150 ASA).
9. Pumping is against a head of 270 ft.
10. Laytime to be calculated at an average discharge rate of 250 t.p.h.

DENSITY: 1025.

FRESH WATER: May be available at anchorage before berthing, but it is expensive.

FUEL: Fuel oil is available at Berths 2 and 3. The 12 in. bunker hose is raised on the port side of the vessel. Bunkering rates are 100 t.p.h. to 350 t.p.h.

CUSTOMS ALLOWANCES: See "Section A – Dry-cargo Port".

GARBAGE DISPOSAL: Garbage collected from alongside upon request. Collections are carried out only during office hours (0700 hrs. – 1500 hrs.). Charges are nominal.

WASTE OIL DISPOSAL: Not possible for large quantities, but small quantities in drums may be possible through ship's agent.

SEAMAN'S CLUBS: None.

CURRENCY: Lebanese Pound (L£). U.S.$1.00 = L£ 940.
U.K.£ 1.00 = L£ 1,600.

GENERAL:

1. *Ballast*

(a) Vessels should arrive with sufficent clean ballast for safe handling of vessel under prevailing weather conditions.

(b) Ballast water must be clean and a declaration signed by the Master and delivered to the terminal to this effect. Vessel's scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard.

(c) *Pollution of the sea – warning.* It is an offence to discharge dirty ballast or pump out bilges. The authorities are very strict and your attention is drawn to the Lebanese Notice to Mariners No. 23/1 of 29th July 1965, and to the volume entitled "International Conference on Prevention of Pollution of the Sea by Oil", issued by IMO London.

In the event of your vessel discharging dirty ballast or spilling oil, cost for cleaning the pollution, third party claims and port fines shall be borne by the vessel.

It is recommended that vessels carry an adequate amount of dispersants with means of application in case of oil spills.

2. *Gear to be provided by the ship*

(a) Anchor to be fitted with marker buoys and 20 fathoms line.

(b) 4 good mooring lines of not less than 150 fathoms each and of suitable size for the vessel. 2 additional 150 fathoms lines securely tailed to the first lines for cases where 150 fathoms may not reach to the stern buoys initially.

(c) For vessels of 50,000 d.w.t. and larger, powered mooring winches with 200 fathoms of wire rope.

(d) 4 suitable rope stoppers to be available aft.

(e) 2 good chain stoppers for use on 5.5 in. circumference wires (preferably carpenter's patent stoppers).

(f) 2 good 4.5 in. circumference boat ropes 200 ft. long placed one on each side of the vessel.

(g) 2 good ropes, 15 fathoms × 3.5 in. circumference and 2 heaving lines for lowering hoses.

3. *Lighting.* Manifold and poop mooring areas should be adequately lit to enable night mooring and loading operations to be carried out with safety. Sea area around the ship to be illuminated.

4. *Deck Watch.* A deck watch must be maintained at all times the vessel is in berth. In addition to its normal duties, the watch must inspect the hose connections and area around the ship against oil spillage, pollution, and prevent unauthorised persons from boarding your vessel.

5. *Boarding of vessel.* The control of persons boarding your vessel is the ship's responsibility. Boarding should be restricted to Company employees on duty and to persons authorised by the Port Authorities as advised by your Agents.

6. *Stores/Provisions* or other items should not be received or discharged whilst loading is in progress. Launches other than the Company's mooring launch, should not lie alongside the vessel.

7. *Tanker Safety.* Masters are at all times responsible for the application of all safety precautions as prescribed in the International Oil Tanker and Terminal Safety Guide.

8. *IOTTSG Safety Check List.* The Tanker Safety check list must be completed after inspection of each item prior to commencement of and during loading. The Mooring Master is authorised to stop all loading operations should he consider that the safety of lives and property is endangered by the infringement of safety rules.

9. *Action in case of Emergency.* In the event of a fire, oil spillage or other emergency on the vessel,

The Emergency Signal is:—

3 or more blasts of not less than 10 seconds duration each on whistle or siren supplemented by a continuous ringing of the general alarm bells.

SHIPMASTER'S REPORT: February, 1983.

Documents:

1 Copy Cargo Manifest.
3 Copies Crew Lists.
1 Copy Personal Effects Declaration.
1 Copy Bonded Stores List.

Approaches: Admiralty Chart No. 2903 – Tripoli Roadstead.

Ramkin Isle Light visible on approaches to the port but cannot be relied upon for full power.

Fairway Light Buoy (flashing green every 4 seconds):
Position: Lat. 34° 30′ 00″ N.
Long. 35° 52′ 28″ E.

N.B. – The Fairway Buoy has been removed.

All buoys should be treated with caution as some removed and all unlit. Breakwater and mooring buoys give good radar targets.

Pilotage: Pilotage is compulsory. In an emergency, vessel could dock/undock without Pilot. Area on chart marked 'Pilots' should be avoided due to a wreck with only 21 ft. clearance. Most suitable position for boarding is 1 mile East of this area.

It is requested that tankers of 40,000 d.w.t. and over should have rigged, when in light condition, an accommodation ladder lowered to about 12 ft. above the water. A pilot ladder should be rigged immediately abaft the accommodation ladder, to within 2 ft. above the water (U.K. Merchant Shipping – Pilot ladders – Rules 1965 is relevant).

Pilot ladder used for boarding. Accommodation ladder unsuitable due to swell.

Anchorage: Area for boarding Pilot is also suitable for anchoring, if awaiting berth due to adverse weather, and for approaches to the sealine berths. Good holding with 7 shackles of cable.

Restrictions: No night navigation.

Max. Size: Draft restricted to 62 ft. No restrictions on length or beam.

Health: Pratique granted on arrival.

Radio: Initial ETA sent to Beirut via Portishead Radio.

(a) Advice of ETA, is required 48 hours prior to vessel's ETA stating quantity of cargo required, max. loading rate, SWL of derrick for lifting hoses, and confirming that the ballast for discharge in port waters is clean.

(b) Lines of Communication:
   i. Tripoli Terminal Radio Station. Call sign ODC8.
   ii. By cable to "Petriraq Tripoli – Lebanon".
   iii. International VHF 156.8 MHz – range approx. 15 miles. Call sign "Petriraq Tripoli".

Tripoli Oil Installations – Lebanon.

Station: Tripoli Oil Installations – Lebanon, Tripoli Lebanon, private station for communication with tankers bound Tripoli, Lebanon.

Call sign: ODC8. Address: Toil, Tripoli Lebanon.

Periods open for traffic: ODC8 keeps a continuous 24 hours watch on 500 kHz for calls and answers only.

Medium Frequency Schedules: ODC8 transmits traffic list on 442 kHz and listens in the band 425-512 kHz.

0750 – 0800 hrs. GMT. 1530 – 1600 hrs. GMT.
1130 – 1200 hrs. GMT. 2200 – 2230 hrs. GMT.

High Frequency Schedules: ODC8 transmits traffic list on 8514 and 12831 kHz simultaneously and listens in the band 8554 – 8374 kHz:

0800 – 0830 hrs. GMT. 1600 – 1630 hrs. GMT.
1200 – 1230 hrs. GMT. 2230 – 2300 hrs. GMT.

Note: In addition to above, Tripoli Terminal keeps a continuous watch on the international calling frequency of 156.8 MHz. This has a range of approximately 15 miles and its call sign is "Toil, Tripoli Lebanon".

It is essential that tankers bound Tripoli Lebanon, communicate with station ODC8 at least 48 hours before arrival, and thereafter maintain contact (It may, at any time, be necessary to change orders regarding port of loading).

Radio station reported to be operating at reduced power but no contact made at all to date. Reasons given: No operators, no technicians, no maintenance, to name but a few. Contact made by VHF to 'Tripoli Oil Terminal', range varies from 15 miles down to 3 miles.

VHF: See "Radio". Pilots Channel 16, Port Channel 16, Agents' Channels 16 and 14.

Tugs: Not available. Vessels can dock/undock without tugs under favourable weather conditions.

Conditions of Use:

Notice: The facilities and assistance provided by TOIL to ships visiting the port for any purpose whatsoever are subject to the following conditions whether or not any charge is made therefor:

1. Assistance, Advice or Instructions.

   Neither the TOIL (which expression shall hereafter include any other owner of property used in conjunction with the property of TOIL) nor its servants or agents (in whatever capacity may be acting) shall be responsible for any loss, damage, injury or delay from whatsoever cause arising out of any assistance, advice or instruction whatsoever given or tendered in respect of any vessel. In all circumstances the Master of the vessel shall remain solely responsible on behalf of his Owners for the safety and proper navigation of his vessel, and the vessel and her Owners shall indemnify TOIL or its agent against all loss or damage sustained by TOIL or its servants or its agents, or for which TOIL shall be legally liable by reason of negligent navigation of the vessel.

2. Use of Sea Berths, Sea Loading Lines, Harbours, Jetties and Gear.

   (a) While TOIL has taken all reasonable care to ensure that the berths, facilities and other premises of TOIL and the gear and equipment used in connection therewith are safe, TOIL does not represent or warrant that the sea berths, sea loading or bunkering lines, harbours and jetties of TOIL or the gear and equipment (including gangways where provided) used in connection therewith are safe or suitable for any vessel, and any vessel using them or any of them shall be and remain at the sole risk of the Owners or Master thereof and in particular (but without prejudice to the generality of the foregoing) the safety or suitability of the gangway is the sole responsibility of the Master.

   TOIL does not warrant the seaworthiness of any craft hired or used by any vessel nor its fitness for any particular purpose.

   (b) TOIL will not be responsible for the acts or defaults of any of its servants or agents or of any Port Authority or its servants or agents nor for any loss, damage, injury or delay from whatsoever cause arising that may occur to the vessel or her cargo or equipment or to the Master or any member of her crew whether on board or otherwise, or in the course of mooring or unmooring or raising or lowering of the loading or bunkering lines or loading or discharging or otherwise howsoever, or to any third party, and the vessel and her Owners shall hold TOIL or its servants or agents harmless and indemnified against all claims, damages, costs and expenses arising therefrom.

   (c) TOIL will not be responsible for any loss, damage, injury or delay directly or indirectly caused by or arising from strikes, lock-outs or labour disputes or disturbances whether TOIL or its servants or agents are parties thereto or not.

   (d) If during or by reason of the use of the vessel of the sea line terminals, harbours or jetties or other premises of TOIL or its agents or the gear or equipment used in connection therewith or any craft of TOIL, any of them shall be damaged or become dangerous or unusable and irrespective of whether or not such damage has been caused or contributed to by the negligence of TOIL or its servants or agents or of any Port Authority or its servants or agents, the vessel and her Owners shall hold TOIL or its servants or agents harmless and indemnified against all loss arising therefrom.

3. These conditions shall be construed according to the law of Lebanon and if so required by TOIL the vessel and her Owners shall submit to the jurisdiction of the Lebanese Courts.

Notice of Readiness: Notice of Readiness accepted by Mooring Master at his time of boarding.

Ballast: Our vessel required a minimum of 6,000 tons of ballast on sailing light.

No facilities for dirty ballast or slops.

Loading: Mooring Master remains aboard at all times. Mooring boat and crew also stand-by throughout. Meals to be provided for the extra personnel.

Loading/Discharge Operations: Ship's pumping pressure not to exceed 120 p.s.i.

Discharging: Reducers supplied by terminal. No problems for 10 in. manifold.

Programme of operations:

During Mooring Operations:

	Action
1. Ullage, Water Dip and Sample Ship's Tanks.	Terminal for Refinery
2. Labelled Samples ex ship and any forwarded from loading port to Refinery for checking prior to commencement of discharge.	Terminal for Refinery
3. Authority to discharge cargo after testing of ship's samples.	Refinery
General Sequence of Operations:	
1. Ship to pump sea water to clear into shore tanks the amount of gas oil contained in the sea and shore lines.	All concerned
2. When advised follow up with ship's cargo, warning of any stoppages in the ship's pumps is essential.	All concerned
3. On completion of discharge, ship to pump sea water, as required, to clear sea/shore lines.	All concerned
4. Sea/Shore Pipe-line systems to be left with sea water.	All concerned

Prior to commencement of Discharge:

1. Pressure gauge to be fitted at hose on ship's manifold connection.	Marine Supervisor
2. Discharge pressure at ship's manifold not to exceed 120 p.s.i. (9 kgs.).	Mooring Master
3. Refinery to gauge tanks and prepare lines for the reception of gasoline (estimated at 180 long tons) and to confirm to Terminal Shift Supervisor when ready to receive the stream (time to be logged).	Refinery
4. Terminal Supervisor to ensure shift attendants are on duty to operate and supervise the booster pump at the transfer manifold.	M.M.S. and Terminal Supervisor
5. A Fireman will be required to be in attendance at the Booster Pump Manifold throughout discharge operations.	Refinery

Commencement of Discharge:

1. Vessel to commence pumping sea water, gradually increasing pressure to maximum when all the system to the shore tank is checked and shore tank is receiving stream.	Mooring Master on board, also Ref. and Terminal Shift Supervisor
2. The booster Pump will pick up the stream at the Transfer Manifold, Pump attendants must be instructed to maintain a minimum positive suction pressure of 5 p.s.i. and operate within permissible amperage readings.	M.M.S. and Terminal Supervisor
It is VERY IMPORTANT that ship/shore operations be co-ordinated to ensure that the Booster Pump is never on stream when the ship's pumps are stopped, as this would cause DANGEROUS overheating conditions, especially dangerous in low flash point refined products.	Mooring Master, (Terminal Shift Supervisor for immediate instructions to Pump Attendant).
3. Pressure readings at ship's manifold and at Foreshore Manifold to be recorded hourly by Foreman.	Mooring Master and Terminal Foreman

During Ship's Pumping/Discharge:

1. Refinery to sample at manifold of Tank 39 or any other points and advise when the line content of gas oil has been displaced and pumping of sea water by the ship should stop.	Refinery to Terminal Shift Supervisor
2. Refinery to advise when vessel may commence pumping its cargo.	Refinery to Terminal Shift Supervisor
3. Refinery to sample stream at Manifold of Tank 39 etc., where sea water would be drained out and switch stream into appropriate storage tanks when the required product appears in the sampling.	Refinery
4. IMPORTANT: Comply with Safety Code precautions when gauging receiving tank, especially when the oil level is below roof supports, to avoid the discharge of static electricity by the introduction of any "Conductors", such as a metal gauge tape and weight, into the space between the roof and level of the oil being received.	Refinery

Completion of Cargo:

a) Mooring Master to advise when cargo discharge is completed and ship's tanks are dry.	Mooring Master
b) When advised, vessel to resume operations by pumping sea water to displace the line content of Blend Stock.	Mooring Master, Terminal Shift Supervisor
c) Refinery to advise when pumping of sea water may be stopped.	Refinery to Terminal Shift Supervisor
d) Refinery to gauge tanks and prepare certificate of quantity for cargo received in accordance with general procedure.	Refinery/ Terminal
e) Shore line to be re-set to "CLOSED" and to be left with sea water up to Tank 39.	Refinery to Terminal Shift Supervisor

Also see "Loading".

Density: 1025.

Fresh Water: Available by barge. Arranged through ship's Agent.

Fuel: Fuel oil is available in Berths 2 and 3 through a 12 in. hose lifted on the port side. Rates may vary between 100 and 350 t.p.h.

Diesel and lubrication oils not available.

Consuls: Nearest British Consul at Beirut.

Repairs/Dry Dock: Not available.

Surveyors: Lloyd's.

Gangway/Deck Watchmen: Due to attempted theft of paint stores by armed men, security guards recommended at the anchorage and on the berth.

Shore Leave: Not permitted.

Customs Allowances: Bond checked by Customs but not sealed.

Airport: Nearest at Beirut.

Services: Available: Laundry service, telex (unreliable), doctor, hospital, provisions, recovery of anchors, etc.

Not available: No facilities for discharge of slops or dirty ballast.

NOTICE: Responsibility for the safe conduct of operations on board your ship while at our terminal rests with you as Master. Nevertheless since our personnel, property and other may suffer serious damage in the event of accident aboard your ship, we wish before operations start, to seek your full operations and understanding on the safety requirements set out on the Ship/Shore Safety Check List.

The Safety requirements have been drawn up by ourselves in conjunction with other Terminal Operators in Middle East and representative section of the International Tanker Industry.

They are based upon the provision of the codes of safe Practice currently accepted by the Oil and Tanker Industries. We therefore expect you and all under your command to adhere strictly to them, throughout your stay in this Terminal. We, for our part, will ensure that our personnel do likewise and co-operate fully with you in the mutual interest of safe and efficient operation.

In order to assure ourselves of your compliance with these Safety requirements we have instructed our Mooring Master to report to you or your deputy and join one of your officers in a routine inspection of Cargo Decks and accommodation spaces.

If you observe any infringement of these requirements by Terminal or any other personnel on board your ships, please bring this immediately to the notice of our representative. Should you consider any immediate threat to the safety of your ships arises out of any action on our part or equipment under our control, you are fully entitled to demand an immediate cessation of operations.

Our Mooring Master is the Company Representative on board. WE RESERVE THE RIGHT IN THE EVENT OF CONTINUED OR BLATANT DISREGARD OF THESE SAFETY REQUIREMENTS IN YOUR SHIP, TO STOP ALL OPERATIONS AND ORDER YOUR SHIP OFF THE BERTH FOR APPROPRIATE ACTION TO BE TAKEN BY THE CHARTERERS AND THE OWNERS CONCERNED.
For TRIPOLI OIL INSTALLATIONS – LEBANON

AUTHORITY: *Operator:* Tripoli Oil Installations Lebanon, P.O.Box 150, Tripoli (via Beirut), Lebanon. *Tel:* 601995, 430501-8. *Telex:* 46313, 46069. *Cables:* Petriraq Tripoli. *FAX:* 06-530503. *Contact:* Captain George Abed, Marine and Terminal Manager.

AGENT: See "Beirut".

NOTES

Please also advise Shipping Guides Ltd.

Liberia

GENERAL

COURTESY FLAG: Masters of vessels should check with the Pilot the correct times for raising and lowering (0600 – 1800 hrs.) the courtesy flag as heavy fines are imposed if raising and lowering is carried out at the wrong time. It is also advisable to carry a spare courtesy flag aboard the vessel.

PIRACY: *Notice to Mariners:*

1. Mariners are advised to exercise caution when sailing near the coast of Liberia.
2. A cargo vessels was seized by small craft believed to have been operated by the National Patriotic Front of Liberia. Information indicates that the rebel ships may be flying two flags – flag of Liberia and the flag of the National Patriotic Front (Red with Black Scorpion).
2. Mariners are advised to keep at least 30 miles off the coast.

BUCHANAN: 05.52 N. 10.02 W. (See Plan)

PORT LIMITS: A vessel shall be considered to have arrived at Port of Buchanan when she enters a circle with a 3 nautical mile radius from the beacon on the main breakwater head (Fl.G.3 sec.). The above does not affect present stipulations of ore ships' Notice of Readiness, which remain unchanged nor does it limit Port Authorities exclusive right to decide in which order ships shall be worked.

Notice of Readiness: Notice of Readiness will not be accepted from vessels anchored more than 3 miles off the head of the main breakwater.

DOCUMENTS:

1 copy Clearance from last Port of Call.
1 copy Health Declaration.
6 copies Number of Passengers.
4 copies Ports of Call
6 copies Cargo Manifest (even in ballast).
7 copies Crew List.
3 copies Stores List (ship).
3 copies Personal Effects List.
1 copy Vaccination List.

Customs, health and passport inspection normally takes place at the berth.

It is recommended that the Master of the ship himself attends at the boarding party to clear the ship upon arrival and that the above documents are prepared upon the ship's arrival.

PILOTAGE: Lamco provides pilotage. Pilot boarding approximately 1.5 miles off the main breakwater, bearing 095°/110°. Pilot to be provided with a clean and safe ladder on the lee side. Buchanan Pilot on VHF Channel 16.

ANCHORAGE: If waiting for Pilot, anchor off main breakwater on bearing 090° – 110°, 1.5 miles – 2.5 miles off main breakwater (South).

Exit Channel: Anchoring is prohibited within a sector with a bearing of 060° – 080° to the head of the main breakwater, as this is the exit sector.

RESTRICTIONS: Harbour traffic hours – towage and pilotage (ore ships), 0000 – 2400 hrs. General cargo ships (tankers), 0700 – 2300 hrs.

MAX. SIZE: See "Bulk Handling Facilities", "Berthing" and "Tankers".

Arrival Draft: Maximum arrival draft for ore carriers must not exceed 8.85 m. and air draft should not exceed 15.0 m. Maximum arrival draft for cargo vessels must not exceed 9.15 m.

HEALTH: Customs, health and passport inspection normally takes place at the berths. Quarantine signal must not be hauled down before "Free Pratique" is received. If diseases are suspected on board contact the Port Authorities or Agents by radio for instructions. After call at other Liberian ports where Free Pratique has been granted, Port Health will also board here.

RADIO: Buchanan Harbour will call on 6520 kHz, 4 days before ETA, between 0800 hrs. and 0830 hrs. GMT, or when within 200 miles call Buchanan Harbour on 2182 kHz at 0800 hrs. GMT. Communications with ore ships per HF, call 2182 kHz. Traffic, 2638 kHz, 2738 kHz. VHF, call Channel 16. Traffic, Channels 6, 9, 12 and 14.

Contact immediately before arrival:

Watch schedule of Buchanan Harbour:

From about 2 hours before expected arrival of an ore ship, the LAMCO Clearing Office is keeping continuous radio watch on VHF Channel 16 and call frequency 2182 kHz, for possible subsequent switching over to VHF Channels 6, 9, 12 or 14 and 2738 kHz or 2638 kHz.

The call sign is "Buchanan Harbour", ELM 1.

All ore ships heading for Buchanan are requested to establish radio contact with "Buchanan Harbour", ELM 1, using the above frequencies approximately one hour before estimated time of arrival.

Contact 24 Hours Before Arrival:

Whenever an expected ore ship is to arrive in the Port of Buchanan within about 24 hours, the LAMCO Clearing Office will for the purpose of securing timely and accurate information on the ETA of the ship, maintain the following radio watch schedule.

Morning watch	:	0800 – 0900 GMT
Afternoon watch	:	1500 – 1600 GMT

Frequencies:

The radio watch is kept on call frequency 2,182 kHz for subsequent switching over to 2638 kHz, or 2738 kHz, or 6520 kHz (0830 – 0900 and 1530 –1600 GMT).

The radio set used on shore has a reach of approximately 600 miles. In accordance with the above, ore ships heading for Buchanan and having radio sets operating on frequencies listed are requested to establish radio contact with "Buchanan Harbour" and give ETA message as soon as possible after they have come within 600 miles distance from the port.

Contact at a distance of approximately 1,400 miles and on sailing from last port:

Sailing from last port: On sailing from last port for Buchanan, the owner or the Master shall telegraph to "GIMSALES", Stockholm (Telex No. 17549) and to "LAMCO", Buchanan (Telex No. 44260) stating expected date of arrival and furthermore indicate to the latter the vessel's preferred radio working frequency in the 4000 kHz – 8000 kHz range.

Radio watches: Starting 4 days before the vessel's ETA at Buchanan, "Buchanan Harbour", ELM 1, will call the vessel on 6520.0 kHz between 0830 – 0900 GMT and 1530 – 1600 GMT.

Every day, except on holidays and Sundays, Buchanan Harbour keeps watch on 2182.0 kHz between 0800 – 0830 GMT and 1500 – 1530 GMT and on 6520.0 kHz between 0800 – 0830 GMT and between 1530 – 1600 GMT. These watches will also be kept on holidays and Sundays in case a vessel is expected on those days or the following workday.

Notice in advance: The Master shall give telex or cable notice 72 hours and 36 hours prior to the vessel's expected arrival at Buchanan to LAMCO, Buchanan, if no radio contact has been established previously.

TUGS: Lamco provides towage with two tugboats 1,640 h.p. and one tugboat 3,300 h.p. Tugs join vessel about 0.5 mile North of red buoy.

BERTHING: Ore Quay: Length 257 m., depth alongside 14.0 m.
Commercial Quay: Length 320 m., depth alongside 10.0 m.
Tug Quay: Length 126 m., depth alongside 10.0 m.

Storage: A commercial warehouse with a storage capacity of 2,300 sq.m. built on the harbour along with the Customs warehouse of 1,000 sq.m.

Iron ore storage capacity: 1.7 million tons on shipping stockpiles. 0.4 million tons on feed stockpiles.

CRANES: 1×150 ton derrick crane and 1×20 ton portal crane at the Commercial Quay.

BULK HANDLING FACILITIES:

Instructions for the handling of ore ships with a draft of 39 ft. or more:

The departure shall be arranged in such a way that the following conditions are fulfilled:

1. *Minimum clearance "C"* under the ship's keel shall be 3 ft. except for ships having a beam "B" exceeding 125 ft., for which minimum clearance required shall be calculated by the following formula:

$$C = \frac{B}{125} \times 3 \text{ ft.}$$

2. *Maximum advisable draft "D" Max* in the basin shall at any time be based on the actual height of the sea level "H" at that time (measured from the project O-level) and on the required minimum clearance "C" under the keel shall under normal conditions be estimated as follows (for – 12.95 area):

$$D \max = 42.5 + H - C \text{ (all measurements in feet).}$$

3. *Departure on falling tide* is permitted only when it can be shown that the minimum clearance "C" as per above will be maintained during a period of at least 2 hours from the time the tugs start pulling. (This means as a consequence that for a ship that commences departure less than one hour *before* high water the draft shall be based on estimated level of the falling water 2 hours after commencement.

Note that the level one hour after high water has sunk about 7% and the level 2 hours after high water 25% of the total tidal range.

Deep Water Basin at Buchanan Ore Loading Quay: With the completion of the deep water basin at the Ore Loading Quay, the water depth alongside the quay is increased from 12.95 m. to 14.00 m. below the zero level of the General Elevation System.

The required keel clearance is 3 ft. for ships up to 125 ft. beam. The max. permissible draft alongside the quay is thus:

$$46 \text{ ft.} - \left(\frac{\text{beam in ft.}}{125} \times 3\right) \text{ft.} + \text{tide}$$

Tidal range:
MHWS = +1.18 m. above zero level of the General Elevation System.
MLW = +0.05 m. above zero level of the General Elevation System.
MLWS = – 0.15 m. below zero level of the General Elevation System.

Because of the necessity to save a rock shelf to support the sheetpiling of the cells when blasting and dredging the deep water basin, new fenders have been installed at the quay in order to keep the bilges of the vessels well clear of those rocks. The new fenders have a diameter of 1.20 m. A ship loaded to maximum permissible draft can have a list of 5° without touching the rock slope but since she would touch the bottom with a list of about 3° such lists will not be tolerated.

Height of Shiploader: 17.0 m. above the water level at MHWS. A 1.0 m. safety margin is normally sufficient.

Maximum shiploader outreach (including throw) from the new fender line is 24.0 m. whereby a max. 48 m. wide vessel can be loaded. Loading rate 6,000 t.p.h. (3,000 t.p.h. July 1987).

It must be clearly understood that the sailing drafts are unchanged. The width of the deep water basin is only 60 m. It gives however, the great advantage of being able to continue loading without stopping for low water, whereby loading can often be completed 12 hours earlier than without the deep basin.

An even greater advantage is probably the increased safety, should a large ship develop engine trouble after she has exceeded the former maximum permissible low water draft, in which case operators have no alternative but to pull vessel out at HW as "dead ship" which could very easily result in a major accident with enormous economic consequences. Now operators can let vessel remain alongside over the next low tide without any risk.

Vacation of Berth: Vessels should vacate their berths immediately after completion of loading or discharging.

Ore carriers are allowed a maximum stay of 30 minutes, whereafter U.S.$1,000 per hour or any part thereof will be levied at the Harbour Master's discretion. (This may be exempt if vessel on max. draft awaiting high water sailing.)

STEVEDORES: As early as possible advance notice of ETA required latest by 1500 hrs. on day preceding arrival if a weekday, or Saturday before noon if arrival on Sunday.

Shore working hours: Ore handling: 24 hours a day.

General cargo handling:

Morning Shift:
  Monday through Friday 0700 – 1500
  Saturday 0700 – 1200
Afternoon Shift:
  Monday through Friday 1500 – 2300
  Saturday 1200 – 2300
Night Shift:
  Monday through Saturday 2300 – 0700
Holidays: 0700 – 0700 of next work day.
Container vessels/Ro-Ro vessels (Afternoon Shift):
  Monday through Friday 1500 – 2300
  Saturday 1200 – 2300
Container vessels/Ro-Ro vessels (Night Shift):
  Monday through Saturday 2300 – 0700
Container vessels/Ro-Ro vessels (Sundays and Holidays):
  Sundays & Holidays 0700 – 0700

MEDICAL: Hospital and medical care is provided; advance notice should be given in serious cases. Yellow fever and cholera vaccinations are compulsory to enter the Republic. Vaccination book is required.

TANKERS: One tanker berth with 1×8 in. pipeline for discharging only. Hose connections are 6 in. and 10 in.

Max. size: 8.2 m. draft if length 170 m. or less and 7.0 m. if length over 170 m.

Oil depot capacity:
  22,000 cu.m. diesel oil.
  1,000 cu.m. gasoline.
  15,000 cu.m. heavy oil.
Various storage tanks:
  1,500 cu.m. diesel oil.
  450 cu.m. heavy fuel.

DENSITY: Varying but around 1020/25.

FRESH WATER: Fresh water is available, ex-quay only, rate is 20 t.p.h. Subject to availability.

FUEL: No bunker facilities available.

GANGWAY/DECK WATCHMEN: Agent strongly recommends employment of night watchmen as thieving is commonplace.

OPENING/CLOSING HATCHES: Performed by stevedores.

CONSULS: Swedish Vice-Consul only; however, most countries are represented either by Embassy or Consul at Monrovia.

REPAIRS: No commercial facilities available. In cases of emergency Lamco might assist with minor repairs.

CUSTOMS ALLOWANCES: Direct sales from ships are strictly forbidden.

REPATRIATION: Can be arranged.

AIRPORT: Roberts International Airport about 1 hour ride by car; several connections to the rest of the world.

TIME: GMT; no alterations during the year.

HOLIDAYS: January 1st; February 11th; Second Wednesday in March; March 15th; April 12th; May 14th; July 26th; August 24th; First Thursday in November; November 29th; December 1st; December 25th. Special holidays as proclaimed from time to time by the Liberian Government. No work will be performed on January 1st, July 26th and December 25th.

POLICE/FIRE/AMBULANCE: No phone available; however the Lamco Plant Protection Force should be contacted; one Officer is normally assigned to each quay/gate.

SHORE LEAVE: Apart from South African citizens, who are not allowed ashore, no restrictions.

IDENTIFICATION CARDS: Not required.

DELAYS: Generally, no major delays have occurred. For ore carriers and tankers the tide may occasionally involve 24/36 hours waiting time depending on the size of ships expected to load: general cargo ships; no delay.

GENERAL: *Customs:* Two Customs Officers stay on board the ship during ship's entire stay and they should be given meals in the Officers' Mess and if necessary night quarters.

Cabins: It is recommended to keep all cabins locked during the stay in port.

Provisions: There are some chandlers in Buchanan for fresh fruits, fish, etc. No duty free or wholesale facilities provided.

Tide: Range of tide 0.90 m. – 1.50 m. (3 ft. – 5 ft.)

AUTHORITY: *Port Operators:* Lamco J. V. Operating Company, c/o Roberts International Airport, Robertsfield, Liberia. *Tel:* Monrovia 224238 (local), Monrovia 221190 (overseas), Buchanan 1545, 1546. *Telex:* 44260, 44293 Lamco. *Cables:* LAMCO Buchanan (Liberia) KTB. *Contact:* Harbour Master.

AGENT: All ore carriers must employ LJVOC as their Agent.

GREENVILLE: 04.59 N. 09.03 W.

PORT LIMITS: Sea Buoy: 04° 58.27′ N., 09° 04.27′ W.

DOCUMENTS:
6 Crew Lists.
6 Passenger Lists.
4 Customs and Crew Declaration.
2 Vaccination Lists and valid Cholera/Yellow Fever Certificates.
2 Copies Manifests.
2 Copies, Bills of Lading.
Load Line and Safety Construction Certificates.
Licences of Officers (for Coast Guard).
Cargo Gear Certificate.

PILOTAGE: Compulsory. Pilot embarks in position of Sea Buoy or at the authorised anchorage. Boarding is done from a launch painted black and white with the word "Pilot" inscribed. Contact can be established on a normal working day between 0730 – 1700 hrs., on Saturdays 0730 – 1200 hrs., holidays and Sundays – Office not open, but should a vessel be expected the Pilot can be contacted during the expected time of arrival on VHF Channel 16 or 12.

ANCHORAGES: Indicated on the Chart by a dotted line commencing in position Lat: 4° 58.8′ N., Long: 9° 03.4′ W. running in a direction 309° for 11 cables thence 092° for 10 cables then 188° for 7 cables with a minimum depth of 6.5 fathoms. Care should be exercised as there exists a 4 fathom patch at the edge of the anchorage area. Vessels proceeding to the anchorage area should proceed with the Sea Buoy and the North Point Lighthouse, bearing 059° to within a distance of one mile from the breakwater, thereafter altering course for the anchorage.

RESTRICTIONS: Pilotage is carried out between 0500 hrs. and 2300 hrs. daily. Under extenuating circumstances pilotage can be done after 2300 hrs., if previous arrangements are made.

MAX. SIZE: Length 156 m., beam no restriction, draft 7.31 m.

HEALTH: Pratique granted by Port Health Officer on arrival at berth, no Radio Pratique granted.

RADIO: None, ETA's should be routed to Agents via telex or cables.

VHF: Contact can be established with the Marine Office or the various Agencies during normal working hours Monday – Friday 0730 – 1700 hrs., and on Saturdays 0730 – 1200 hrs. on Channel 16 VHF.

RADAR: No Port Control radar.

TUGS: One twin screw tug of 1,450 b.h.p. available for assisting vessels. This tug is equipped with modern fire fighting appliances, and can also execute coastal towage of vessels if required. Ship's lines are preferable for towing, but if not available then tug's line can be used.

Two 192 h.p. launches are available for assisting coasters, and the towing of logs when rafting is being done.

BERTHING: One jetty 585 ft. in length with a depth of 8.1 m. Smaller jetty for vessels not exceeding 180 ft. in length with a depth of 4.9 m. alongside. In addition vessels loading floating logs can be berthed safely in the middle of the basin parallel to the main jetty with a depth of 8.1 m. Under favourable weather conditions (November – April) a third vessel can be accommodated at right angles to the jetty in a similar depth to the inner basin. All loading and discharging must be done by ship's gear.

CRANES: None presently available, but plans are underway to purchase a 70 ton mobile crane.

BULK CARGO FACILITIES: Cargo handled-forestry products only i.e. logs, boules, sawn timber and plywood.

SPECIALISED CARGO HANDLING FACILITIES: None.

BRIDGES: None.

STEVEDORES: Arrangements can only be made on vessel's arrival as this depends on the availability of the logs and sawn timber to be loaded. The required loading rate for vessels alongside the jetty is 800 cu.m. per 24 hours and vessels in the basin 500 cu.m. per 24 hours.

MEDICAL: One Government owned hospital with 50 beds, and one private clinic, both with limited facilities available.

TANKERS: Facilities for small coastal tankers only, but larger tankers loading palm oil can use the large jetty with portable hoses/pipes connected from the permanent installation.

DENSITY: November-April 1025; May-October 1010.

FRESH WATER: Available at berth or by tug.

FUEL: Small amounts of diesel can be delivered by truck.

FIRE PRECAUTIONS: Usual precautions.

CONSULS: Nearest at Monrovia.

REPAIRS: No facilities.

DRY DOCKS: None.

SURVEYORS: All classification societies are represented at Monrovia. Surveyors will travel to Greenville if arrangements are made by Agents.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

HATCHES: Opening/closing carried out by crew but alternative arrangements can be made for shore labour.

CUSTOMS ALLOWANCES: 200 cigarettes/1 bottle spirits per crew member, but depending on duration of stay.

CARGO GEAR: Ship's gear only.

REPATRIATION: Carried out via Monrovia.

AIRPORT: Small domestic airport 5 miles from the port with two flights daily to Monrovia, approximately 45 minutes flying time.

TIME: GMT is observed throughout the year.

HOLIDAYS: There are 13 National Holidays, January 1st, New Year's Day; February 11th, Armed Forces Day; 2nd Wednesday in March, Decoration Day; March 15th, J. J. Roberts' Birthday; Good Friday; 2nd Friday in April, Fast and Prayer Day; April 12th, National Redemption Day; July 26th, National Independence Day; August 24th, National Flag Day; 1st Thursday in November, Thanksgiving Day; November 29th, Tubman's Birthday and December 25th, Christmas Day.

No work is permitted whatsoever on January 1st, New Year's Day; April 12th, Redemption Day: July 26th, Independence Day and December 25th, Christmas Day.

POLICE/AMBULANCE/FIRE: Within reach. Not available by telephone.

TELEPHONES: Not available.

SERVICES: No facilities exist for tank cleaning or compass adjusting.

SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not required.
REGULATIONS: No unusual regulations.
DELAYS: Can be expected during the rainy season (April-November) when adverse weather conditions (heavy swell) exist causing vessels to part their moorings. This usually lasts not more than 2 days in any given period. At such times, vessels are moved to the inner basin or to the roadstead until the conditions improve.

GENERAL: The port designed for the handling of logs and related wood products has just completed a re-habilitation project which included the dredging of the basin and approaches, new rafting and lighting facilities, also the placing of both fresh and salt water mains to the quay. Feasibility studies are now underway with a view to increasing the length of the Main Quay by 33 m. Despite the fact that the present facilities are for vessels of 156 m., vessels of 160 m. were safely berthed in the past year.

Navigational aids installed in 1987 as follows:

Sea Buoy R. & W. HOR. bands, Posn., 04° 58.27′ N., 09° 04.27′ W. Fl. W. ev. 10 secs.

Buoy marking mutine patch R. & W. HOR. bands, Fl. W. ev. 6 secs.

Red Buoy bearing 337° × 2 cables from the breakwater marking the Northern extremity of the Harbour, Fl. R. 3 ev. 8.5 secs.

North Pt. Lt. Ho. Sectored Fl. R. & W. 2 ev. 11 secs.
130° – 310° Obscured
310° – 040° Red
040° – 080° White
080° – 130° Red

Light at the Northern extremity of Jetty, Fl. G. ev. 3 secs.

AUTHORITY: National Port Authority, Port of Greenville, P.O.Box 165, Greenville, Sinoe County, Liberia. *Tel:* 9538/9. *Cables:* "Sinoe Port". *Contact:* Captain S. L. Wynter, Chief Pilot.

HARPER (Cape Palmas): 04.22 N. 07.44 W. (See Plan)

SHIPMASTER'S REPORT: August 1991.

Harper Port (Cape Palmas) located in position Lat. 04° 21.7′ N., Long. 07° 43.8′ W. is a small port with major export of logs, mainly to Europe.

The port is situated on the N.E. side of Russwurm Island.

There are buoys placed in directions and distance measured from Sea to Cape Palmas as follows (also see "Plan"):
Buoy No. 1 – 072° × 1.6 miles. Buoy No. 2 (red) – 093.5° × 1.14 miles, near Congo Rock. Buoy No. 3 (green) – 092° × 0.6 miles, near Yoruba Rock.

Buoy No. 1 in line with beacons at Yoruba wreck (easy to spot), buoy in line with the beacons 045° × 1.8 miles which lead to Cape Palmas anchorage.

When entering the port of Harper from Buoy No. 1 steer 067°. This will bring vessel to the middle of the harbour entrance. A red buoy near Outer Rock and Cape Rock has to remain close on the portside. When entering the port the Old Jetty will remain close on starboard side. When the Old Jetty is abeam to starboard, vessel is swung to starboard in order to go portside alongside at the New Jetty. There is very little space in the port, just sufficient to swing around.

The New Jetty is about 100 m. long. There are just enough bollards to moor the ship. Several bollards are broken. Moorings break regularly and if they do not break during periods of high swell the bollards will, as happened to us, be ripped off the pier. The swell is most frequent between May and August (rainy season). The port is dangerous in the months June/July (in my opinion) when the swell is very high, especially for ships over 2,000 tons.

The New Jetty is designed for ships up to 2,000 tons but ships over 3,000 tons enter the port. Safe draft is 5.20 m., but according to personnel it is 6.0 m. at high water, but I would not recommend this. We did several trips and touched the bottom during low water with a draft of 5.2 m. (there was a big swell at the time). The swell is at times very big and it is not advisable to stay alongside the pier at night in those periods. Night navigation is also not advisable.

There are no Pilots or tugs and there is little or no communication possible by VHF or radio.

There is one working mobile crane but usually ship's gear will be used. The shipper acts as the agent so few services can be expected.

No provisions, water or fuel are available.

The following documents will be requested: 7 copies Crew List; 2 copies Narcotics List; 2 copies Stores List; 2 copies Crew Declaration; 6 copies Arms and Ammunitions List; 1 copy Health List; 6 copies Stowaway List; 6 copies Animals List; 6 copies Last Port of Call List; 2 copies Vaccinations List.

MONROVIA: 06.20 N. 10.50 W. (See Plan)

DOCUMENTS:
4 Crew Lists.
4 Passenger Lists or Statements "Nil" if none aboard.
2 Manifests for Customs. This should state ballast if no cargo aboard.
4 List of Ports of call from commencement of voyage with date of calls.
1 International Health Declaration.
1 List of dates of yellow fever and cholera vaccination.
4 Stores Lists.
2 Crew Customs Declarations.
Immigration now stamp all seamen's Discharge Books or Passports.
2 Livestock Lists.

Notice:
The National Port Authority have issued Circular No. 1/1988 which reads:
"The National Port Authority, Freeport of Monrovia, is herewith announcing the following:

1. Ship's ETA, draft – and corrected ETA – shall be furnished to the Harbour Master in writing, minimum 24 hours prior to ship's arrival.
2. The following cargo documents shall be furnished minimum 48 hours prior to ship's arrival to the Operations Manager (with the exception of those cargo documents of last coastal port in West Africa, which shall be made available at ship's arrival).

Import:
6 complete and legible sets of Cargo Manifests, classing separate:
– containers (size and type to be indicated)
– rolling units
– general cargo (loose)
– LCL-container manifest (separate per unit)
– summary.
2 Manifests of cargo to be shifted via quay
1 Stowage/bay plan
3 List of Dangerous Goods (as to IMDG-codification) for Monrovia
1 List of Dangerous Goods (as IMDG-codification) in transit

Export:
2 copies of the provisional Booking List shall be furnished minimum 48 hours prior to ship's arrival to the Operations Manager
3 complete and legible sets of Export Manifest classed as the Import Manifests – Customs passed and stamped, shall be furnished minimum 48 hours after ship's departure to the Operations Manager.

All cargo documents shall use metric system in weight and measurement.

3. As from 1st May, 1988 a new billing procedure has been established. As from this date, vessel's billing shall comprise of 2 invoices of same old form.

The first invoice shall cover marine services and facilities including water supply only, while the second invoice shall cover Operations Department tariff items i.e. shift surcharges for gangs, overtime, etc.

Payment is expected within 14 days after receipt of invoice, thereafter, port's services shall be suspended, until payment has been effected completely."

APPROACHES: The artificial harbour is protected by 2 rock breakwater extending 1.25 miles out into the open sea, encompassing some 750 acres of protected waters. The distance between the breakwater entrance is 970 ft. and in the centre of the opening a 500 ft. wide channel marked by buoys has been dredged to 49 ft. MLW. This channel is 1.33 miles long with a 30° turn half way and marked by means of 4 lighted channel buoys. North and South Mole ends of the breakwater are marked by red and green rotating light beacons respectively. The channel within the breakwaters gradually widens into a turning basin whose depth towards the Iron Ore Piers is dredged to a depth of 45 ft. MLW and 30 ft. off the General Cargo Pier.

PILOTAGE: Pilot is compulsory. Pilotage available day and night, except for vessels berthing at the oil jetties. Pilot ordered through local Agent. 24 hours or minimum 12 hours notice of ETA by Radio Telephone on 2182 kHz. Pilot instructs ship through signal tower or direct on VHF Channel 16.

Pilot comes out from inside breakwaters by pilot launch, displaying "H" flag by day and white over red light at night and "Pilot" in large black letters on side of the launch. Pilot will inform ship by VHF which direction to proceed to meet the pilot launch by the Fairway Buoy. Vessels should always keep clear of the Fairway Channel, as very large bulk carriers sail on deep draft.

ANCHORAGE: Recommended anchorage is 3 miles from breakwater (45 ft. – 60 ft.) in roadstead is to the South of the buoyed channel which provides goods holding ground on a sand and mud bottom. Vessels are not anchored within the Inner Harbour except for very short periods of time.

RESTRICTIONS: Pilot service is day and night. Loaded oil tankers berth in daylight hours only. Deep loaded vessels i.e. 40 ft. draft and over are restricted to tide for berthing and sailing. Maximum draft for main ore piers is 45 ft. Vessels up to 860 ft. length can be accommodated at these piers. No restriction on beam except that carriers with beam in excess of 126 ft. may experience difficulty in loading with present loading gantries. Bulk carriers of 90,000 d.w.t. and over will berth only in daylight hours.

MAX. SIZE: Vessels loading at the Iron Ore Piers are limited to a max. draft of 45 ft. and sail from 2 hours before HW up to the time of HW. At the bunker pier vessels are limited to a draft of 32 ft. and at the marginal cargo wharf to a draft of 30 ft. Vessels exceeding these drafts can be heavily fined.

Also see "Restrictions" and "Berthing".

HEALTH: Vessels entering must fly International Code flag "Q". Port Health Officials board upon berthing. Pratique automatic for vessels having cleared at other Liberian ports, but vessel must still clear Customs.

RADIO: ETA messages from ships are received in the Freeport through Liberian Government Radio Station, Monrovia and through French Cable Station, Monrovia.

Monrovia Radio call sign ELC-2150 (6° 17′ N., 10° 48′W.) is fitted with VHF and HF radio at the Freeport, working from 0800 hrs. to 2400 hrs. The VHF is of the Marine type with Channels 6, 8, 9, 10, 11, 12, 13, 14, 15 and 16. Also transmits on 482-500-512 kHz and receives on 500 kHz A1 2.5 kW.

Other Frequencies:	8518 (8 MHz Channels 5 & 6) A1 2.5 kW
	12709 (13 MHz Channels 5 & 6) A1 2.5 kW
	16983 (16 MHz Channels 5 & 6) A1 2.5 kW
	17146 (17 MHz Channels 5 & 6) A1 2.5 kW
	22491 (22 MHz Channels 5 & 6) A1 2.5 kW

Telex Address: National Port Authority - NATPORT 44275.

VHF: Vessels arriving or sailing must make contact with Freeport Control Tower on Channels 16 and later 14 or 12 within the port area and Pilots' Office and for manouvering Channel 9.

TUGS: Use of tugs compulsory. 3 tugs available. 'Nana Kru' and 'Stockton Creek' 1,700 h.p. each and 'Bentol' 3,900 h.p. Join vessels just inside breakwater entrance. For berthing, tug lines used; for sailing, ships lines often used.

BERTHING: *Cargo Wharf:* The marginal cargo wharf is 2,000 ft. long (230 ft. leased to Amoco) and 36 ft. wide with 8 transit warehouses. The wharf has a concrete deck and has a depth alongside of 30 ft. at MLW. All cargo is discharged and loaded by ship's gear. Sufficient amount of cargo handling equipment is available such as forklift trucks ranging from 4 tons to 35 tons capacity. Tractors and trailers are available. A 40 ton capacity steam crane is available at No. 2 Berth for heavy lifts. There are also 2 mobile cranes with capacities from 25 tons to 35 tons but they are not suitable for ship discharge. Fresh water is available at this wharf, loading rate is approximately 25 t.p.h.

Bunker Pier: This is a "T" jetty on the South edge of the dredged basin with a depth of 34 ft. at MLW. No fresh water is available at this pier.

Port Authority Circular: October 1985.

"The maximum Summer deadweight of vessels allowed to berth at the Bunker Pier should not exceed 30,000 tonnes. The vessel must be provided with a minimum of 10 manila mooring ropes and under no circumstances will wire mooring lines be accepted especially those from auto-tension winches. It is also recommended that special shackles be provided by the vessels to be used in case of any unfavourable weather that will endanger the safety of the vessel while she is berthed alongside."

The bunker pier can accommodate vessels of max. LOA 700 ft. and draft 32 ft.

LPRC Crude Oil Discharging Berth: This is situated between the Bong Mine and NIOC Ore Piers and consists of one breasting dolphin and an after mooring dolphin. Tankers discharging crude oil are moored by means of 2 anchors with starboard side to the dolphin and the stern made fast to the mooring dolphin. Discharge is by means of submarine and floating pipe-lines connected on the starboard side amidships. Tankers are limited to a length of 700 ft. and draft of 40 ft. Fresh water is available at this pier.

Fish Pier: A pier with its own dredged channel and turning basin is used by fishing vessels to discharge cargo into cold storage. This pier is situated on the Northern Breakwater with the Cold Storage Facility located on the inshore side of the breakwater. Fresh water is available at the pier. The channel to the fish pier is 90 ft. wide and dredged to 20 ft. MLW. Size of vessels using this pier is limited to 240 ft. length and 19 ft. draft.

Iron Ore Piers:

Bong Mining Company Pier:

Approaches max. draft on MLW	45 ft.
Alongside max. LOA of vessel	900 ft.
Max. beam of vessel	125 ft.
Max. draft on HW	45 ft.
Alongside pier length	886 ft.
Depth alongside MLW	45 ft.
Loading boom height above HWOST	45 ft. 6 in.
Loading boom outreach from fenderline	57 ft.
Pier length covered by loading boom	750 ft.
Loading rate	3,200 t.p.h.

National Iron Ore Company Pier:

Approaches max. draft on MLW	45 ft.
Alongside max. LOA of vessel	1,000 ft.
Max. beam	114 ft.
Max. draft on HW	45 ft. North side 42 ft. South side
Alongside Pier length	900 ft.
Depth alongside MLW	45 ft. North side 42 ft. South side
Loading boom outreach from fenderline	60 ft.
Loading boom height above HWOST	43 ft.
Pier length covered by loading boom	640 ft.
Loading rate	1,200 t.p.h.

Fresh water available at this Pier.

Liberia Mining Company Pier: (Now used to accommodate vessels).

Approaches max. draft on MLW	45 ft.
Alongside max. LOA of vessel	830 ft.
Max. beam	130 ft.
Max. draft on HW	45 ft. North side 38 ft. South side
Alongside Pier length	825 ft.
Depth alongside MLW	45 ft. North side 42 ft. South side
Loading boom outreach from fenderline	61 ft.
Loading boom height above HWOST	46 ft.
Pier length covered by loading boom	560 ft.
Loading rate	2,000 t.p.h.

Fresh water available at this Pier.

BRIDGES: None.

STEVEDORES: Several stevedoring companies. Port Authority handles all cargo on shore and accepts cargo ex-ship's hook only.

A daily meeting with all ship's agents is conducted by the Operations Manager regarding the arrivals and departures of ships and to arrange for required gangs to load or discharge ships including requests for overtime and night work.

Stevedores gangs have to be ordered the day before required, therefore essential for Agents to receive ETA messages in sufficient time.

Working Hours: Monday-Friday: 0800-1200 and 1300-1600. Saturday: 0800-1200. Overtime is permitted at night, Sundays and Holidays if requested.

MEDICAL: Whenever possible Masters should cable Agents if require medical attention especially when arriving week-ends or during night. Hospital facilities available. Port Health require yellow fever vaccinations for crew members.

TANKERS: See "Restrictions" and "Berthing".

DENSITY: Density varies with the tide. Also varies during rainy season as river flow increases. Varies from 1009 to 1024 oz. per cu. ft. with average of approx. 1019 oz. per cu. ft.

FRESH WATER: Available (See "Berthing"). Average rate of delivery approx. 20 t.p.h.

FUEL: Light diesel oil and heavy fuel oil available and these can be blended to specification by supplying oil company. Fuel and diesel only available on bunkering pier.

CONSULS: Majority of foreign countries have Consuls.

REPAIRS: Limited deck and engine repairs can be carried out by private companies.

DRY DOCKS: One very small floating dock capable of lifting 300 tons with max. draft of 8 ft. This dock is used for small coastal craft and only accepts very limited outside work. There is also a synchrolift of about 250 tons, owned by private fishing company.

GANGWAY/DECK WATCHMEN: Private security men are engaged by the Agent. Port Security also maintain regular patrol.

OPENING/CLOSING HATCHES: Normally done by stevedores.

CUSTOMS ALLOWANCES: Tobacco, reasonable quantities for consumption while in port. Wine and/or Spirit, as tobacco.

REPATRIATION: Repatriation of crew is possible.

AIRPORT: Roberts Field International Airport 45 miles distant. Served with daily international flights to Europe and America.

TIME: GMT.

HOLIDAYS: Many official holidays during year but cargo work carried out those days on overtime rates. Port closes 3 times a year: 26th July (Independence Day), Christmas Day and New Year's Day.

POLICE/AMBULANCE/FIRE: Port Authority have own Security Force and Fire Service, situated in port area. There is also an ambulance service.

TELEPHONES: There are no facilities for telephones on board.

SERVICES: Hull, deck and engine surveys can be obtained through Lloyd's, German Lloyd, B.V., Norske Veritas, America Bureau Agents and most of the other classification societies.

Provisions are available from duty-free bonded warehouses in the Freeport area. These include frozen, chilled and tinned food, spirits and tobacco products. A wide variety of housekeeping items, such as soap, paint, etc. are also available. Fresh vegetables and fruits are available through ship chandlers. 1×100 ton capacity lighter available.

SHORE LEAVE: No restriction on shore leave.

IDENTIFICATION CARDS: Not required, but Seaman's Books are endorsed aboard by Immigration.

GARBAGE DISPOSAL: Service not available.

WASTE OIL DISPOSAL: Arranged by P & I Club.

SEAMAN'S CLUBS: None.

CURRENCY: Liberian Dollar, equivalent to U.S.Dollar.

WEATHER: *Tides and Currents:* The rise of tide varies from 2.0 ft. to 3.9 ft. from neaps to springs. The flood tide runs in a north easterly direction at approximately 1 knot and the ebb to the S.W. at approximately 1 knot. Inside the harbour a tidal flow of 0.5 – 1.0 knots is experienced. There is no prediction of the directions of flow as the water circulates around the harbour sometimes in one direction and sometimes in the opposite. The currents along the coastline are variable and not predictable.

Prevailing Wind: The prevailing wind is West to Southwest during the dry season. A Northerly wind is sometimes experienced for 2 or 3 weeks. The stronger winds are experienced during the wet season of April to November and during this period the average wind force is about Force 4 (Beaufort Scale). The wind usually rises in the afternoon or early evening and falls off during the night. During the dry season the wind is usually Northerly during early mornings and backs to the S.W. by late afternoon. Dangerous winds are revolving line squalls of intense force and usually of very short duration. Heavy rain/winds normally comes from the landside. These conditions are considered dangerous to vessels only during the process of berthing, but cause no danger to vessels in port securely moored. These infrequent tornadoes occur during the seasonal transition months of March/April and October/November.

Vessels alongside piers will sometimes experience a surge, which may part mooring lines. This is due not to the wind, but to a swell entering the harbour and is a condition which seldom occurs.

PIRACY: Acts of piracy have taken place at the port.

SHIPMASTER'S REPORT: February 1983.

Pilotage: Pilot launch has black hull, white housing and green housing top. The word "Pilot" is painted in large white letters.

Pilot boards near the Sea Buoy, 7.3 cables from Southern Breakwater.

Health: 2 Coastguard Officials and 1 Immigration Official board with the Pilot to complete formalities. We do not think that this is the case for all vessels.

Radio: The Freeport of Monrovia no longer maintains a watch on HF 2182 kHz.

Tugs: 3 tugs available.

When sailing, vessel takes 1 tug at stern, using 2 ship's lines.

Gangway/Deck Watchmen: Port security personnel maintain continuous watch while vessel is berthed.

Opening/Closing Hatches: Normally done by ship's crew.

AUTHORITY: National Port Authority, Freeport of Monrovia, P.O.Box 1849, Monrovia, Liberia. *Tel:* 221454, 222932. *Telex:* 44275. *Cables:* "Natport". *FAX:* 231-224615, 225556. *Contact:* A.Lamii Kromah, Managing Director.

AGENT: Scanship (Liberia) Inc., P.O. Box 10.0.209, Burshrod Island, 1000 Monrovia 10, Liberia. Tel: 222832, 225500. Fax: 225300. Telex: 44281 and 44344. Cables: "Scanship Monrovia".

GENERAL: All ports:

NAVIGATION REGULATIONS: The following telex received from Libyan Marine Department on 21st October 1985.

Quote:

Please be advised that the following general information to be added to next edition of "Guide to Port Entry".

1. The following is a resume of instructions issued by the Libyan authorities to which all ships must abide in Libyan territorial waters (limited by 12 nautical miles and in Gulf of Sirte by parallel 32° 30′ N.).

2. Ships bound for Libyan ports must inform the authorities of the port by writing or telegram 24 hours prior to entering the Libyan territorial waters including name, flag, nationality, destination, cargo, agent, date of arrival, duration of stay in the port, port of origin and the approach route to Libyan port and the port of destination after leaving Libyan waters, they must insure continuous monitoring on Channel 16 and contact the port authorities on Channels 16, 11 or 12.

3. Commercial ships may pass on innocent passage within territorial waters only during day time provided they inform the Libyan authorities at least 12 hours prior to entering and giving the latitudes and longitudes of the points of entering and leaving, duration of stay in territorial waters, courses and speed.

4. All ships must keep to the anchorage areas shown in charts and strictly refrain from causing pollution of waters.

5. The following are declared as prohibited areas:

(A) 32° 52.8′ N., 13° 24.5′ E.
32° 57.7′ N., 13° 24.5′ E.
32° 57.7′ N., 13° 18.0′ E.
32° 53.8′ N., 13° 22.3′ E.
(B) 32° 53.7′ N., 13° 20.6′ E.
32° 55.9′ N., 13° 18.0′ E.
32° 55.9′ N., 13° 15.0′ E.
32° 54.5′ N., 13° 15.0′ E.
(C) 31° 09.0′ N., 19° 42.0′ E.
31° 09.0′ N., 19° 19.0′ E.
31° 56.0′ N., 19° 42.0′ E.
31° 56.0′ N., 19° 19.0′ E.
(D) 32° 58.0′ N., 13° 06.0′ E.
32° 53.0′ N., 13° 06.0′ E.
32° 58.0′ N., 12° 48.0′ E.
32° 52.0′ N., 12° 44.0′ E.

6. Ships that violate the instructions and the prevailing laws will be subject to punitive penalties, including opening fire at the ship and forcing her to obey the orders of the Libyan Arab Fleet.

7. All ships shall proceed to any of the following ports through the approaching point and shall inform the Port Control of her course and speed.

Tripoli Port:
(A) 33° 00′ N., 12° 58′ E
(B) 33° 07′ N., 13° 10′ E
(C) 33° 05′ N., 13° 19′ E
(D) 33° 05′ N., 13° 04′ E
Benghazi Port:
(A) 32° 03′ N., 19° 50′ E
(B) 32° 09′ N., 19° 49′ E
(C) 32° 17′ N., 19° 53′ E
(D) 32° 20′ N., 20° 06′ E
Zwara Port:
(E) 33° 03′ N., 12° 15′ E
Misurata Port:
(F) 32° 34′ N., 15° 16′ E
Oil Terminals (Gulf of Sirte):
(G) 32° 22′ N., 18° 30′ E
Derna Port:
(H) 32° 58′ N., 22° 42′ E
Tobruk:
(K) 32° 10′ N., 24° 02′ E

8. All ships shall maintain communication with the coastal stations.

9. All ships shall follow the instructions of the Port Authority about the anchorage position.

10. No ship shall have the right to change her anchorage location without port authority permission.

Unquote.

The following telex was received from Libyan Marine Department on 1st October 1990.

Quote:

The following is a resume of standard marine regulations issued by Libyan Authorities to which all ships must abide in Libyan waters, which are limited by 12 nautical miles from coastline and in Gulf of Sirte by parallel 32° 30′ N.

1. Ships bound to any Libyan port must:
   (a) Inform her Agent in Libya, from her sailing port, of the following: Name, call sign, nationality, name and address of owner, name and nationality of Master, No. of crew and passengers (if any), G.T., type of cargo, destination port, date and ETAs or (departure), date of arrival.
   (b) 24 hours prior to arriving at the selected approach point, vessel must contact the nearest coastal station to confirm the above information and include the following:
   Position, speed, course at that moment, approach point to use, state of sea, ship's condition (trim, list, draft (fore and aft)).
   (c) On arriving at the approach point, vessel must contact the port of destination to confirm ETA, course and speed.
2. Ships leaving any Libyan port on international voyage must:
   (a) Advise her Agent, at least 4 hours before departure, of the following:
   Name, call sign, No. of crew and passenger (if any), next port, cargo on board, course and speed from the outer limits of the port to the end of Libyan territorial waters.
   (b) Insure regular communication with the port radio and coastal station on VHF Channel 16.
3. Ships on voyages between Libyan ports must:
   (a) Advise her Agent of the following:
   Name, call sign, ETAs or (time of departure), cargo on board, next port, ETA, draft (fore and aft), course and speed or courses and speeds.
   (b) Insure continuous monitoring on Channel 16.
   (c) Insure regular contact with the port radio and/or coastal station every 4 hours or when possible.
4. All ships must abide to the anchorage and prohibited areas and must adjust their course to pass by one of the approach points.
5. All ships must insure that they have on board all certificates and documents required, including the Safe Minimum Manning Certificate, when going to any Libyan port or passing through Libyan territorial waters.
6. Ships that violate these standard regulations and prevailing laws will be subject to punitive penalties.
7. These regulations will come into force on 10th October 1990.

Unquote.

CLEARANCE: ETA to be advised to Port Authority 24 hours before arrival, including the following information: Ship's Name, type, Nationality and port of Registry; Owner, Master and Agent names; Gross and Net tonnage; Ship's length and draft forward and aft; Expected duration of stay in the port; Last port of call, tonnage, quantity and kind of cargo for discharging and loading; Full details of any dangerous liquids or cargo; Number of passengers and crew; Health situation.

Before arrival at the outer limits of the port, vessel requested to hoist the following signals: Flags of her call-sign; Flag of Quarantine; Flag of ship's Nationality; The Libyan Flag on the foremast; Red Flag during daylight and Red light during night-time, if carrying explosives or any inflammable cargo; Pilot Flag and the international flag code signals must be respected.

DOCUMENTS: *On Arrival:* Last Port Clearance; Full sets of cargo documents; Copies covering consignment; Certificate of Origin; Bills of Lading, etc. Not less than 7 copies of Crew and Passenger Lists. Other documents as required at each port.

Ship's Certificates should be delivered to the Marine Inspection Office at the port.

During the First 24 Hours of Arrival: Valid certificates to comply with all the International conventions in force for the State whose flag the ship is flying. Certificate of Registry. For the National ships, moreover, the official log book, engine log book and ship's articles.

Agency Requirements: The following agency requirements in respect of pre-arrival notices and documentation in addition to official documents and certificates needed for ordinary port clearance should be complied with. Pre-arrival notice to be communicated by telex to Agents containing following information:

(a) vessel's name and flag;
(b) g.r.t./n.r.t./s.d.w. and nature of cargo;
(c) ETA and quantity of cargo to be handled;
(d) exact address to whom disbursements accounts should be sent.
For dry cargo vessels further information should be submitted:
(e) conditions of stevedoring, whether basis liner terms or F.I.O.S.;
(f) net freight earned along with all cargo details specifically each Bill of Lading.

Upon arrival the following documents are to be handed over:

1. Masters of tankers should produce and hand over to Port Authorities 'Certificate of Discharge' pertaining to previous calls (non-compliance will cause delay in berthing);

Following only applying to dry cargo vessels:

2. 14 copies of Cargo Manifest (clearly stating measurements and weights);
3. 2 copies of Freight Manifest;
4. 2 copies each Bill of Lading;
5. 2 copies Cargo Plan.

Report: May 1984. From State Agent.

Agent to submit all ship's documents/certificates, cargo documents and crew documents and/or any other declarations connected thereto, in the Arabic language. This is effective from 1.6.84, noting until this date, we shall arrange for the required translation as a transitional period, after which and effective from the above mentioned date, all ships shall arrive with all above said documents/certificates/ declarations, etc., in the Arabic language.

Your full and strict adherence to the above is required avoiding unnecessary inconveniences to all parties concerned as any failure on your part shall never be tolerated by the concerned authorities.

Report: June 1984. From State Agent.

Please note: Temporarily vessels should arrive with the following ship certificates already translated into Arabic, otherwise vessels shall be delayed in sailing. The other documents we shall arrange for translation of same at our end on a temporary basis:

Certificate of Registry.
Safety Construction Certificate.
Safety Equipment Certificate.
Radio Telegraphy Certificate.
Load Line Certificate.

Report: September 1984. From State Agent.

Following documents imperative to be translated at your end, and not by Agent:

1. Ship's documents:

Registry Certificate.
Load Line Certificate.
Safety Construction Certificate.
Safety Equipment Certificate.
Safety Radio – Telegraphy Certificate.

2. All Cargo Manifests.

3. All other lists and declarations such as Crew List, Officers' List, Stores, etc.

Note that the competent authorities at our end (namely the Ports and Lights Department of Tripoli) are presently insisting on collecting from ship direct all the documents in question in Arabic translation upon vessel's arrival thus leaving no possibility whatsoever for any assistance previously rendered by the Agent.

PILOTAGE: Pilotage is compulsory for all vessels. Pilot boat will meet ships outside the harbour. Ships should wait for Pilot at anchor outside the harbour if weather is good. In case of bad weather, after getting permission from Harbour Master ships may enter the harbour at their own risk and anchor inside.

ANCHORAGES: *Benghazi:* Area between Lat. 32° 11′ N. and 32° 07′ N. and Long. 19° 56′ E. and 19° 59.2′ E.

Derna: Within 1.5 miles radius of position Lat. 32° 49.3′ N. and Long. 22° 39′ E.

Es Sider: Area between Lat. 30° 41.5′ N. and 30° 43.0′ N. and Long. 18° 22′ E. and 18° 25′ E.

Misurata: Within 1.5 miles radius of position Lat. 32° 23.0′ N. and Long. 15° 18′ E. (about 4.7 miles from main lighthouse).

Tobruk: Area between Lat. 32° 03.7′ N. and 32° 05.5′ N. and Long. 24° 02.0′ E. and 24° 03.0′ E.

Tripoli: Area between Lat. 32° 55.5′ N. and 32° 56.5′ N. and Long. 13° 09.8′ E. and 13° 11.7′ E.

Zuara: Within 1 mile radius of position Lat. 32° 57′ N., Long. 12° 10′ E. (in direction 065° from main lighthouse).

Also see individual oil terminals.

HEALTH: The following documents to be provided for the doctor: A valid Fumigation Certificate; International Vaccination Certificate for every person on board; Health Certificate for any animal or bird on board. No automatic Free Pratique between the Libyan Ports.

TUGS: Tugs are available at all Libyan Ports.

BERTHING PRIORITY: The berthing priority scheme, according to law, as follows: (1) Passenger ships. (2) Animal ships. (3) Liner and mail ships. (4) Cargo ships. (5) Tankers and dangerous cargo ships. Ships with cargo of less than 300 tons, may not have to comply with the scheme; subject to Harbour Master's decision.

CONSULS: Embassies in Tripoli. No consuls at any ports.

SURVEYORS: The following addresses are Agents for the mentioned Classification Societies and may be contacted for the necessary surveys on request:–

Lloyd's Register of Shipping: P.O.Box 111115 Tripoli. Telephone: 74383. Telegraphic Address: Lloydsreg Tripoli Libya.

Bureau Veritas: Tripoli: Orfelli Agencies, 109 – 1st September Street, P.O.B. 2283, Telephone: 35338 and 37398, Telegraphic address: Shetaf Tripolilibia.

American Bureau of Shipping: Tripoli: Libyan Arab Shipping, Baghdad Street, Andalus Building, P.O.B. 882, Telephone: 41712 and 39358, Telegraphic Address: Arabship Tripolilibia, Telex 20033 Arabship.

Germanischer Lloyd: Tripoli: Johs Rieckermann, Baghdad Street, Andalus Building, P.O.B. 2121, Telephone: 37021 and 31069, Telegraphic address: Rieckermann Tripolilibia.

Registro Italiano Navale (RINA): Tripoli: Mr. Mahmoud Gamar, c/o Libyan Arab Shipping Co., Baghdad Street, Andalus Building, P.O.B. 2325, Telephone: 41712 and 39358, Telegraphic address: Gamarin Tripolilibia.

OPENING/CLOSING HATCHES: To be done by crew.

CUSTOMS ALLOWANCES: 200 cigarettes for each crew member or passenger. All kinds of alcoholic drinks are forbidden, even wine and beer, and to be kept in the store under the Customs seal. Also arms, perfume, saccharine and all kinds of anaesthetic. The sum of 10 Libyan dinars allowed for each crew member. All Libyan and Foreign currency to be declared in the Currency Declaration. All personnel effects and electronics to be declared in the Crew Declaration.

BLACK LIST: Libyan law prohibits vessels from having on board any goods or containers of Israeli origin. Any vessel having such goods or containers on board on arrival in the harbour will be liable to heavy fine and confiscation of the goods or containers. The Libyan Authorities may, moreover, refuse to clear the vessel.

TIME: Local time at all the seasons is GMT plus 2 hours.

HOLIDAYS: Friday is the weekly day off. 2nd March; Revolution Day (1st Sept. yearly); Evacuation Days (28th March, 11th June, 7th October; yearly), Syrian Revolution Day (8th March, yearly); Sudanese Revolution Day (25th May, yearly); Egyptian Revolution Day (23rd July, yearly); Hijra New Year (1st Moharam, Muslim year); Ashoura (half day, 10th Moharam, Muslim Year); Mohammadan birthday (12th Rabih Awel, Muslim Year); Israa Wa Merag (half day, 26th, Rajeb, Muslim Year); Eid El-Fitr (1st, 2nd & 3rd Shawal, Muslim Year); Eid El-Adha (9th, 10th. 11th, & 12th Zi Al-Heja, Muslim Year).

TELEPHONES: All calls through Tripoli and Benghazi Coastal Stations – No calls allowed when the ship is alongside.

SHORE LEAVE: Crew members permitted ashore during daytime. Shore leave not permitted at oil terminals.

IDENTIFICATION CARDS: Seaman's Book or Discharge Book, Passports, Identity Cards — all should be valid.

Shore passes issued and Seaman's Book to be kept at the gate at port entrance.

MINE FIELDS: The following areas are prohibited area and dangerous for navigation due to mines:

(1) Lat. 32° 52.78′ N. Long. 13° 24.6′ E.
Lat. 32° 57.67′ N. Long. 13° 24.46′ E.
Lat. 32° 57.67′ N. Long. 13° 18.00′ E.
Lat. 32° 53.82′ N. Long. 13° 22.30′ E.

(2) Lat. 32° 53.70′ N. Long. 13° 20.61′ E.
Lat. 32° 55.93′ N. Long. 13° 18.00′ E.
Lat. 32° 55.93′ N. Long. 13° 15.00′ E.
Lat. 32° 54.45′ N. Long. 13° 15.00′ E.

(3) Lat. 32° 37.00′ N. Long. 23° 13.00′ E.
Lat. 32° 14.50′ N. Long. 23° 31.00′ E.
Lat. 32° 10.50′ N. Long. 23° 28.50′ E.
Lat. 32° 37.50′ N. Long. 23° 7.50′ E.

ATTENTION: It is imperative that vessels contact the wireless stations on the Libyan coast at a distance of 30 miles from the proceeding port, giving the ship's position. Ship's winches and cargo gear should be in good order otherwise they will be liable to heavy fine if any delay occurs.

FLOATING DOCK: See "Tripoli".

REGULATIONS: Foreign currency not to be taken ashore. Crew members' visits between ships are not allowed without the prior permission of Customs and Immigration. Ship's lifeboats are not to be used within harbours limits without the prior permission of the authorities. No engine repairs to be carried out in port whilst alongside or at anchor in the port without prior permission of authorities. Movements of ships in the port are not allowed without instructions. Using ship's propellers whilst in port is not allowed without permission. Ship's whistles not to be used without good reason. Cleaning funnels or making smoke whilst in port is strictly forbidden. Ship's gangway to be in position at all times whilst alongside. Rat guards to be fixed all times on every rope. Painting or scraping the outer hull of the ship not to be carried out without prior permission of authorities. Duty officer to be on board all the time accompanied by sufficient crew.

For tankers or vessels laden with dangerous cargo; moreover, the mentioned hereabove: Red flag to be hoisted in daylight and red light to be on in the night-time. No movements allowed between sunset and sunrise for such ships. Electricity to be off from ship's holds whilst loading or discharging. Towing wires with suitable shackle to be ready fore and aft. Smoking and any kind of fire are strictly forbidden on deck. All steps for safety to be carried out.

POLLUTION: Pollution of any kind is strictly forbidden. Any ship causing any kind of pollution will be liable to heavy fine.

DELAYS: Delays in berthing and load/discharging can normally be expected.

AUTHORITY: Libyan Marine Affairs Department, P.O.Box 648, Tripoli, G.S.P.L.A.J. *Tel:* 609011/40. *Telex:* 20400, 20533 Minsco Ly. *FAX:* 605149. *Contact:* Head of Marine Department.

AGENCY: IMPORTANT.

Universal Shipping & Maritime Agency at Benghazi can attend to vessels at Benghazi, Marsa el Brega, Marsa el Hariga and Zuetina.

Universal Shipping & Maritime Agency,
P.O.Box 2450,
Omar Mukhtar Street,
Benghazi.
Cables: "Universal" Benghazi/Libya.
Telex: 40101/40025.

Universal Shipping & Maritime Agency at Tripoli can attend to vessels at Tripoli, Misurata, Zuara, Zawia, Ras Lanuf and Es Sider.

P.O.Box 3703,
Tripoli.
Cable Address: "Uniship" Tripoli.
Telex: 20677, 20263.

Shahat Shipping & Stevedoring Co. will attend to agency matters at Benghazi, Derna, Marsa el Brega, Marsa al Hariga, Tobruk and Zuetina.

Shahat Shipping and Stevedoring Co.,
P.O.Box 2973 and 1496,
Benghazi,
Cable Address: "Shahat Ship" Benghazi.
Telex: 40231.

Germa Shipping and Stevedoring Co. will attend to agency matters at Misurata, Es Sider, Ras Lanuf, Tripoli and Zawia.

Germa Shipping and Stevedoring Co.,
(Temporary address Baghdad Street),
P.O.Box 985,
Tripoli.
Cable Address: "Germa Ship".
Telex: 20058.

BENGHAZI: 32.06 N. 20.03 E.

Also see "General" before first port.

PORT LIMITS: (a) The water area existing within the actual breakwater and that which may fall within any new breakwater eventually constructed up to the bridge across the shallow water basin at the Eastern side.

(b) The water area known as the navigational channel outside the harbour commencing as from the harbour entrance along the distinguishing marks of the channel for a distance of 1 mile (2 km.).

ANCHORAGE: See "General" before first port.

RESTRICTIONS: Vessels are not permitted to enter harbour between sunset and sunrise.

MAX. SIZE: All types of ships with 27 ft. draft and less in Wintertime and 28 ft. and less in Summertime are safe to enter the harbour.

RADIO: Benghazi Port Radio, from 0800 to 1800 hrs., call sign 5AV, R/T 2182, VHF Channel 16.

VHF: Port Radio on Channels 16 and 12.

BERTHING: Up to 15 vessels can be berthed at one time.

Quay No.	*Length* m.	*Depth* m.
1	310	9.0
2	280	9.0
3	170	9.0
Libya No. 1	40	5.5
Libya No. 2	130	5.5
Libya No. 3	115	5.5
F.J. No. 1	135	5.5
F.J. No. 2	135	5.5
F.J. No. 3	135	8.0

Note: F.J. No. 3 not in use at the present time.

CRANES: Electric floating crane available up to 200 tons.

STEVEDORES: All stevedoring operations and formalities to be done by Agent, 2 stevedoring companies will be formed in the near future.

MEDICAL: All facilities available.

TANKERS: *Ras al Mingar:* The jetty is near Benghazi.

One side of the jetty handles dirty products and LPG.

Max. d.w.t.: 10,000 tonnes.
Max. draft: 22 ft. in Summer and 21 ft. in Winter.
Max. LOA: 140 m.

The other side handles clean petroleum products.

Max. d.w.t.: 9,000 tonnes.
Max. draft: 21 ft.
Max. LOA: 120 m.

A derrick with SWL of 5 tonnes is required. The derrick must have a minimum outreach of 2.7 m.

FRESH WATER: Available by barge and alongside. Should be obtained from Port Authority through ship's Agent.

FUEL: Available through Agents. A notice of 48 hours needed, advisable for Chief Engineer to check what grades are available.

CONSULS: None.

REPAIRS: Minor repairs are possible. Also see "Tripoli".

WATCHMEN: Compulsory, provided by Port Authority.

REPATRIATION: Facilities exist without difficulty.

AIRPORT: Benina Airport situated 29 km. away.

POLICE/AMBULANCE/FIRE: Police 99, Ambulance: 2131, 2132, 2281, Fire: 5555, 5599.

SHORE LEAVE: Allowed after Free Pratique, Customs and Immigration formalities completed.

DEVELOPMENTS: Port extension project underway.

AUTHORITY: Port Manager and Harbour Master.

AGENCY: See "General" before first port.

BOURI: 33.54 N. 12.39 E. (See Plan)

LOCATION: The position of the AGIP NAME FSO "Sloug" is:

Lat. 33° 54′ 32.94″ N., Long. 12° 39′ 19″ E.

The FSO is moored to a single point mooring structure by a hinged bracket. The water depth is 166 m.

FSO "Sloug": LOA 348.9 m.; Length between perpendiculars – 330.7 m.; Moulded depth 25.5 m.; Moulded breadth 51.8 m.; Max. draft 20.012 m. and Minimum draft 10.0 m.

DOCUMENTS: Documents required to obtain clearance are as follows:

5 copies Crew List.
5 copies Passenger List.
2 copies Tobacco/Spirits Declaration.
2 copies Personal Effects Declaration.
2 copies Stores Declaration.

Following certificates will also be inspected by the Libyan authorities:

Clearance from Last Port.
International Maritime Health Declaration.
Animal List, with proper Health Declaration.
Entering and Leaving Territorial Waters Certificate.
Report Inwards Certificate.
Report Outwards Certificate.
Boycott Certificates.
Tankers Characteristics Certificate.

Certificate of Discharge, signed by the discharge port authorities, of the last port (cargo) loaded in Libya.

Tovalop Certificate.

Port Entry: Offtaking Vessel's Free Pratique, Customs Entry and Clearance, Immigration inspection and documentation for the loading operation will be arranged by vessel's agents.

Agency: An Agency representative is stationed on the FSO for ship's Clearance.

APPROACHES: Two production platforms (DP4, DP3) are situated respectively in position Lat. 33° 55′ 23.38″ N., Long. 12° 40′ 50.96″ E. and Lat. 33° 53′ 39.45″ N., Long. 12° 36′ 23.83″ E.

Subsea lines run between the 2 platforms and the FSO. All ships are warned that it is strictly forbidden to anchor within 0.5 miles of the line joining the two platforms.

No ship should approach any of the structures closer than 0.5 miles and should proceed to the "Waiting Area" (2 miles South of the FSO) adhering strictly to this regulation, and await for further instructions from the FSO.

PILOTAGE: The Mooring Master will board the Offtaking Vessel in the "Waiting Area" which is located 2 miles South of the FSO. Depth of water 166 m.

Also see "Mooring/Unmooring".

RESTRICTIONS: Mooring operations normally take place during daylight.

MAX. SIZE: 35,000 d.w.t. – 150,000 d.w.t. Max. LOA 283.0 m. Max. beam 44.0 m. Draft – no limit.

RADIO/VHF: *ETA:* Vessels will inform "Agip Name Tripoli", through their local agents, of their ETA at the designated "Waiting Area" located about 2 miles South of the FSO "Sloug" Terminal.

Notices Procedure: All vessels destined to load Crude Oil at the Bouri Field are requested to inform "Agip Name Tripoli" of their ETA 72 hours, 48 hours and 24 hours prior to their arrival at the "Waiting Area".

The "72 hour notification" must include the following information:

1. Firm ETA (local time and date).
2. Name of tanker and Master's name.
3. Flag.
4. Gross tonnage.
5. Nett tonnage.
6. DWT.
7. Quantity of cargo required.
8. Confirm 2×16 in. connections (ASA 150) on port side manifold.
9. Confirm existence of a Smit Bracket forward.
10. LOA and Draft.
11. Distance from bow to manifold and stern to manifold.
12. Minimum vessel's speed and equivalent RPM.
13. Confirm availability of at least 6 mooring lines forward and 6 mooring lines aft (mooring lines should be suitable for the intended service).
14. Shipper.
15. Agent.
16. Consignee.
17. Destination.
18. Last port of call.
19. Any requirements needing early attention.
20. Confirm inert gas system operating correctly and that vessel will maintain a maximum oxygen content of 8% in the tanks throughout berthing, deballasting, loading and unberthing operations.

The 48 hour and the 24 hour notification shall specify only the latest ETA, plus any amendments to the details already advised under the "72 hour Notification".

After the initial notification has been made, any change in ETA of more than 12 hours must be immediately communicated to "Agip Name Tripoli" through the ship's agent.

Radio Contact with the FSO "Sloug": Vessels in VHF range of the FSO will call "Bouri Terminal" on Channel 16, working on Channel 17. Once in contact, a mutually agreed upon channel will be used.

A private channel will normally be used between the FSO and the Offtaking Vessel during operations. The Mooring Master will supply portable sets equipped with this channel for operations use.

Communications during Loading Operations: Medium and high frequency radio systems are to be shut down during cargo transfer and deballasting.

Communications Failure: Should communications fail during any part of the operation (mooring, cargo transfer, unmooring), the party affected shall sound the International Code Signal "K" on her whistle and cargo operations, if in progress, will be stopped until normal communications are re-established.

MOORING/UNMOORING: To ensure coordination between the FSO and Offtaking Vessel, a Mooring/Loading Master will be in attendance to advise the operational procedures necessary to ensure a safe, accident and pollution-free operation.

Mooring Master: The Mooring Master will board the Offtaking Vessel at the "Waiting Area" by a tug that will remain in attendance. Necessary mooring gear (when applicable) will be transferred to the Offtaking Vessel.

Lifting Gear: The Offtaking Vessel must have her own lifting gear rigged and ready for use on her port side *but not swung out.*

Accommodation Ladder: The Offtaking Vessel must have her accommodation ladder and pilot ladder, rigged in combination, on her starboard side and lowered to about 1.5 m. above the water level. Crews in attendance should be in radio contact with the vessel's bridge.

Lee Side: The Offtaking Vessel shall manoeuvre in a way to make a lee on her starboard side, to allow the Mooring Master and other Terminal personnel to board the vessel.

Mooring Master's Station: The Mooring Master shall be stationed on the bridge of the Offtaking Vessel and advise the Master on the mooring procedures. Safety Check List(s) must be signed by the vessel's Master prior to the beginning of any operation.

Aborting of Mooring Operation: The Mooring Master will always be prepared to abort the mooring operation, either on his own initiative or upon instructions of the Master of the Offtaking Vessel. The decision should be taken in ample time whilst the situation is still under control. If, for any reason, the Terminal Superintendent on the FSO requires to abort the operation, he will inform the Offtaking Ship immediately.

Mooring Master's Duty: The advisory service of the Mooring Master will continue until the Offtaking Vessel is safely secured to the FSO, either alongside or in tandem and will resume during the unmooring and departure operations, until the Offtaking Vessel is at a safe distance from the FSO (i.e. in the Waiting Area).

Mooring Monitoring on the FSO: A second Mooring Master, based on the FSO, will monitor the mooring of the Offtaking Vessel until vessel is securely tied-up and preparations for loading have begun. At that time he will assume the advisory control of the operation, including the rigging and connection of the FSO loading arms/hoses.

Fenders: The fendering system of the FSO consists of 5 "Yokohama" rubber fenders, secured to the FSO's side prior to the beginning of the operation. Offtaking Vessel must be ready to use her own secondary fenders.

Mooring Operations Hours: Mooring operations will normally take place in daylight hours only. In special cases the Terminal Superintendent may authorise the Operations Head to perform mooring operations during night hours.

Mooring Manoeuvre (Side to Side): The Offtaking Vessel will manoeuvre in a safe way so as to approach the FSO's starboard side, making use of her engines and *if necessary* utilising the services of the tug in attendance, under the Mooring Master's advice. A wire rope suitable for towing should be made ready and lowered from the starboard bow to the water level when approaching the FSO until securely moored, to be used by the tug *if necessary*.

Caution: No anchors must be used. Anchors must be secured in such a way as to avoid accidental release.

Line Throwing Device: A pneumatic line throwing apparatus will be, *if necessary,* used by the FSO to establish contact with the Offtaking Vessel.

Number of Mooring Lines (Side to Side): A minimum of 6 suitable lines will be secured fore and 6 aft, 2 of them must be spring lines at each end.

Unmooring Manoeuvre (Side to Side): The unmooring manoeuvre will again be monitored by one of the Mooring Masters, stationed on the FSO. The tug will be in attendance. A rope suitable for towing should be made ready and lowered, from the Offtaking Vessel's starboard bow, to the water level, to be used by the tug *if necessary*.

Mooring Manoeuvre (Tandem): The Offtaking Vessel will manoeuvre in a safe way so as to approach the FSO's stern, making use of her engines and, *if necessary,* utilising the services of the tug in attendance under the Mooring Master's advice.

Caution: No anchors must be used. Anchors must be secured in such a way as to avoid accidental release. A wire rope, suitable for towing, should be made ready and lowered from the stern central fairlead to about 1.0 m. from the water level, but *no further,* unless so instructed.

The tandem mooring assembly floating pick-up rope will be heaved up from the Offtaking Vessel's bow Panama Fairlead by a polypropelene messenger rope of 1.5 in. diameter and at least 300 ft. long, that must be made ready while approaching. The Mooring assembly will then be heaved up and the chafing chain stoppered in the bow Smit Bracket. In case no suitable Smit Bracket is available, the chafing chain will be stoppered by 2 wire snotters made fast on the ship's bollards (wire snotters and necessary gear will be supplied by the FSO when the vessel is at the "Waiting Area").

Immediately after the chafing chain is made fast, the tug will pass to the offtake vessel, a nylon towing rope, 14 in. circumference, to be made fast to one of her stern bollards. The tug maintains the towing rope on its quick release hook.

Care should be taken not to move the propeller during this operation. The tug will remain in attendance during the whole time the vessel is in "tandem", in order to avoid any contact between the Offtaking Vessel and the FSO's stern.

Caution (Tandem and Side-to-Side Mooring): Offtaking ship's main engines must remain in constant readiness to move under its own power, during the whole time spent moored at the FSO.

Tandem Mooring Assembly Composition:

The system is composed of:

1. About 30 ft.×3.5 in. diameter chafing chain, stoppered by a Smit Bracket on the FSO

   connected to

2. About 200 ft.×20 in. circumference nylon rope

   connected to

3. About 30 ft.×3.5 in. chafing chain that will be stoppered on the Offtaking Vessel by a Smit Bracket or by 2×2.75 in. diameter (approx.) wire snotters. The chafing chain is held afloat by a metalic buoy connected by a 1 in. "O" Chain, about 9 ft. long, to the extremity of it

   connected to

4. About 600 ft.×14 in. polypropelene floating pick-up line.

LOADING: Max. loading rate 9,000 cu.m.p.h. (56,610 bbl.p.h.).

Crude Oil: Name: Bouri. Pour Point: About 21°C.
API: 23.5. Loading Temp: +40°C. or more.

Hydrogen Sulphide: Masters are warned that Bouri Crude might contain Hydrogen Sulphide (H_2S). Crew members involved in cargo operations should be warned of the hazard that can be faced and how to deal with it.

Loading Operations at the FSO: Loading operations will be carried out either:

1. Side-by-Side: Export tanker moored to the FSO's starboard side by her own mooring lines (minimum 6 lines forward and 6 lines aft, of which 2 must be spring lines each end)

   or

2. Tandem: Export tanker moored to the FSO's stern by the FSO's mooring assembly. Export tankers should have a Smit Bracket fitted. In case no Smit Bracket is available, suitable wire snotters and ancilliary equipment will be supplied by the FSO to allow the mooring.

Check List: Before commencing any loading operations a Check List will be completed and signed by the Offtaking Vessel's Master and retained by the Mooring Master.

Mooring Arms or (alternative) Hoses: The FSO is equipped with 2×16 in. (150 ASA) loading arms and alternatively with 2 suspended 16 in. (150 ASA) hoses strings. The Offtaking Vessel could be requested to use her own lifting gear to connect and hold suspended the (alternative) cargo hoses.

Stern Loading Hose: The FSO is equipped with 1×16 in. hose floating string, about 950 ft. long, connected to the stern for "Tandem loading". The string end will be picked-up after the completion of stern mooring, by the ship's own lifting gear and connected to the port side manifold.

Deballasting: The Offtaking Vessel must be able to load while discharging ballast from her clean ballast tanks to the sea. In case the Offtaking Vessel could not load while discharging ballast, she should be prepared to load part cargo before discharging ballast, in order to maintain a proper draft and trim, while always ensuring that no oil pollution could arise.

Commencement of Loading: Loading operations will start as soon as the mooring arms (or hoses) are connected and as soon as agreed between the Offtaking Vessel's Master/Chief Officer and the Mooring Master, who will assist with the whole operation.

Loading Rate: Loading will start at low pumping rate to ensure the tightness of the system and will then be brought to the maximum *previously agreed upon* rate.

Watches during Loading: Manifolds and mooring line watches will be continuously kept on the Offtaking Vessel during the whole loading operation.

Lack of Communications: Communications between the Offtaking Vessel and the FSO will be ensured by means of portable radio sets supplied by the Mooring Master. In no case should there be a breakdown in communications during the loading operations. In event of such breakdown, the International Morse Signals, letter "K", will be blown by the Offtaking Vessel or by the FSO whistle. Loading operations will be stopped until communications have been re-established.

Completion of Loading: As soon as the loading operation is completed the loading arms/hoses will be disconnected and the Offtaking Vessel will be unmoored and sailed to a safe distance from the FSO, with the advisory services of the Mooring Master. Cargo documents will be brought to the vessel later by the tug.

BALLAST: There are no facilities for receiving clean/dirty ballast at the Terminal. Only clean ballast can be discharged overboard.

MEDICAL: In case of need of medical attention, the following information should be sent to the Agents:

1. Name, rank, nationality and passport number of the crew member.
2. General symptoms and/or any particular requirements.

FRESH WATER/FUEL: Available in cases of emergency only.

SHORE LEAVE: Crews are not allowed shore leave, however sick crew members can be repatriated or go ashore for medical attention. In case of repatriation, the Master must agree the correct procedure with his agents.

GARBAGE DISPOSAL: No service available.

WASTE OIL DISPOSAL: Service may be available from nearby drilling rig.

WEATHER: *Winds:* Radial distribution shows an increase of wind blowing from N.W. and a decrease when blowing from E.S.E. Maximum observed wind speed can reach gale Force 8 (sometimes more) from N.W. during Winter time.

Waves: Waves are mainly from West to North and from East to S.E.

Waves generated by cyclonic disturbances come from N.W. to S.E. across the Thyrrenean Sea. High pressure in the Bouri area direct waves from E.S.E. to North.

Currents: The prevailing current is flowing Eastward with a maximum rate of about 1.5 knots.

Miscellaneous:

Max. sea surface temperature:	31°C.
Min. sea surface temperature:	7°C.
Max. air temperature:	33.5°C.
Min. air temperature:	5°C.

Rain:

Annual average is about 381 mm. Significant periods are January – February with 68 mm. and November – December with 80 mm.

Max. tide range:	0.95 m.

Bottom conditions: 18 m., thick top silty carbonate sand.

GENERAL: *Flag:* All ships calling at Bouri Field must fly the Libyan flag and the Quarantine signal must be displayed upon the authorities visit.

Gangway: Normally no gangway will be rigged between the FSO and the Offtaking Vessel. Should one be used, a safety net must be fitted underneath.

Visitors: Unauthorised personnel are not allowed to visit the FSO or the Offtaking Vessel.

OPERATOR: AGIP (N.A.M.E.) Ltd., Dahra Building, P.O. Box 346, Tripoli, S.P.L.A.J. *Tel:* 35135-35153. *Telex:* 20282 Ly. *Contact:* Marine Co-ordinator – Production Department.

DERNA: 32.45 N. 22.40 E. (See Plan)

Also see "General" before first port.

PORT LIMITS: (a) The water area existing within the actual breakwater and an imaginary line connecting the end of the breakwater and the damaged breakwater existing at the Southern side.

(b) The water area known as the navigational channel outside the harbour commencing as from harbour entrance for a distance of 1 km.

ANCHORAGE: See "General" before first port.

RESTRICTIONS: Vessels are not permitted to enter harbour between 2100 hrs. and 0600 hrs.

MAX. SIZE: Depth of Inner Bay – 8 m., Entrance – 9 m. and Outer Channel 10 m.

RADIO: Recommended that radio messages for Agents be sent via Malta Radio or any other near coast station.

VHF: Port Control on Channel 16.

TUGS: 3 tugs available.

BERTHING: Old Quay, Length 120 m., depth 6 m. New Quay, length 950 m., depth 9 m.

CRANES: 3 cranes available.

STEVEDORES: All stevedoring operations and formalities to be done by Agent. Two new companies will be formed in the near future.

MEDICAL: Available.

TANKERS: Max. size 18,000 d.w.t. Max. draft 11.5 m. if weather conditions permit.

FRESH WATER: Available alongside, to be supplied by Port Authority through ship's Agents.

FUEL: Available through Agents, a notice of 24 hours needed. Advisable for Chief Engineer to check what grades are available.

CONSULS: None.

REPAIRS: Not available. See "Tripoli".

WATCHMEN: Compulsory, provided by Port Authority.
REPATRIATION: Available via Benghazi.
POLICE/AMBULANCE/FIRE: Call Port Manager, 2063 and 2074.
SHORE LEAVE: Allowed after Free Pratique, Customs and Immigration formalities completed.
DEVELOPMENTS: New port facilities to include 1 quay, length 280 m. for general cargo and container vessels, depth alongside 9 m. – 10 m.

One quay, length 500 m., depth alongside 9 m. – 10 m. This quay will have 4 berths, one for grain cargoes, one for the Port Police, one for vessels loading and for mooring of a dry dock.
AUTHORITY: Port Manager and Harbour Master.
AGENCY: See "General" before first port.

ES SIDER: 30.38 N. 18.22 E. (See Plan)

Also see "General" before first port.

DOCUMENTS: Waha acts on behalf of tankers loading at Es Sider and shall prepare all crude oil loading documents. Germa Shipping and Stevedoring Co. or Universal Shipping Co. Agency is contracted by Waha for all normal agency duties. This agency is currently the only agency used by the four Owner Companies.

After a tanker arrives at the anchorage or is moored in a berth, an agency representative will come aboard, accompanied by Jamahiriya Customs Officials and Immigration Police. The agency representative will present certain clearance forms to the Master, which should be completed as soon as possible. After these forms have been signed by the Master, they shall be returned to the agency representative, who shall make the necessary distribution.

Crude oil loading documents shall be prepared by the Waha documentation group prior to and during loading operations, to expedite their final completion. When the tanker has been loaded, the documents shall be completed and endorsed by the Customs Officer and by the representative of the Secretariat of Petroleum. The documents shall then be distributed aboard the tanker and elsewhere, in accordance with previously arranged standard documentation schedules.

The tanker shall be considered clear to depart Es Sider when the crude oil loading documents have been delivered to the Master.

Jamahiriya Customs Authorities:

(a) List of the crew with a declaration of their personal belongings (Form supplied by the Customs Authorities).
(b) List of tanker's stores.
(c) List of passengers.
(d) Six copies of Cargo Manifest for cargo to be discharged at Es Sider.
(e) One copy of Cargo Manifest for cargo in transit.

Blank copies of "Certificate of Discharge" are placed on board every vessel at Es Sider. These certificates must be endorsed by the Customs, or other recognised authority, on completion of discharge. One completed certificate must then be forwarded to the Libyan Customs Authorities according to the instructions contained in the "Certificate of Discharge". At least one further copy should be retained on board, to be produced to the Customs on any subsequent voyage to a Libyan port. Failure to produce the certificate may result in delays to loading, or even rejection of the vessel by the Libyan authorities.
APPROACHES: Coastal landmarks in the area are as follows:

(a) The most prominent landmark is a water tower in the terminal area which is painted white and is 180 ft. above sea level. This water tower is located at Lat. 30° 38′ 00″ N., Long. 18° 21′ 01″ E. and displays a fixed red light at night.
(b) A communications tower in the Terminal area is a most conspicuous landmark. It is located at Lat. 30° 37′ 59.5″ N., Long. 18° 20′ 54.5″ E. Approximate height above chart datum of this tower is 246 ft. It is lighted at night with 2 vertical red lights, and has a height above ground of 200 ft.
(c) A radio antenna tower which is 395 ft. above sea level is located at Lat. 30° 36′ 56″ N., Long. 18° 16′ 55″ E. At night this tower is lighted by an occulting red light, flash two seconds, eclipse one second, and there is a fixed red light halfway up the mast. It is flanked by two dish shaped aerials.
(d) There is a water tower at Ras Lanuf Terminal with a highest elevation of 179.5 ft. above sea level located at Lat. 30° 30′ 42″ N., Long. 18° 32′ 22″ E. It is white in colour. A white light, characteristics:– flash two every 5 seconds, height above sea level 163 ft., is mounted on the seaward side. There is also a fixed red air warning light on the top of the structure.
(e) An omni-directional aircraft radio beacon is situated at Lat. 30° 37′ 29.8″ N., Long. 18° 21′ 07.7″ E. transmitting "OJ" 5 times every 60 seconds on 300 kHz.

Range lights and mooring buoy marker lights will appear and disappear with unscheduled frequency. These lights are for the use of the Mooring Masters at the Terminal and should be disregarded by any tankers using the Terminal.
PILOTAGE: Vessels to be moored, anchored or manoeuvred will only be boarded within the recommended anchorage area (Pilot boarding area centred at Lat. 30° 41′ 54″ N., Long. 18° 23′ 30″ E.). A vessel is not considered arrived until it is in the recommended anchorage area. The Mooring Master will advise the Master on approaches to berths, mooring, unmooring, connecting and disconnecting the hoses and in all operations within the anchorage or berthing area. All manoeuvring of ships shall be done only in accordance with the advice of a Waha Mooring Master, subject to the understanding that in all cases and circumstances the Master shall remain solely responsible for the safety and proper manoeuvring of the tanker. The Master or one of his qualified deck officers must be on the bridge at all times while the tanker is being manoeuvred.

Tankers not equipped with pilot hoists shall provide a pilot ladder, or ladders, constructed and placed in accordance with latest Safety of Life at Sea Convention. Tankers having a large freeboard are requested to use a combination of pilot ladder and accommodation ladder, which is also in accordance with the above Convention. A ship's officer, plus the necessary crew members, shall be present at the ladder or hoist to ensure the safe embarkation and disembarkation of Mooring Masters and Port Authorities. All such ladders and hoists shall be thoroughly tested and inspected before the vessel arrives in the recommended anchorage.

The Mooring Master shall be in direct control of all tanker communications while in the Terminal area. Any unauthorized communications will result in the immediate cessation of all operations excepting clearing of the berth. Such tanker immediately nullifies its Notice of Readiness.
ANCHORAGE: The recommended anchorage area is within an area centred on Lat. 30° 41′ 54″ N., Long. 18° 23′ 30″ E. with a radius of 1,000 m. The anchorage area has a sandy bottom with a depth of approximately 110 ft.

Great care should be taken approaching anchorage from the North or N.W. to give mono-moorings a wide berth.
MAX. SIZE: The following are the approximate berth limitations:–

	Length	*Draft*
No. 1 Berth	920 ft.	51 ft.
No. 2 Berth	890 ft.	51 ft.
No. 3 Berth	950 ft.	51 ft.
No. 4 Mono-Mooring	1,150 ft.	62 ft. 6 in.
	Max. beam 158 ft.	Max. d.w.t. 250,000
No. 5 Mono Mooring	1,165 ft.	73 ft.
	Max. beam 184 ft.	Max. d.w.t. 300,000

Note: No. 4 Mono-Mooring: The max. length overall is 1,150 ft. The max. draft to which vessel can load in good weather is 62 ft. 6 in., and when vessel lies within 30° of loading line. During adverse weather causing vessel to roll and pitch, draft may be restricted to 58 ft. The max. draft limitation in good weather is due to depth to top of loading line being 63 ft. at distance of 1,900 ft. from buoy.

Length, beam and d.w.t. could all be extended provided draft does not exceed 62 ft. 6 in.

All the above limitations are based upon standard tankers in normal weather conditions.

Waha reserve the right to vary the above limitations, depending on vessel's freeboard, (OBO's – ore/oil vessels, etc.) and also the prevailing weather conditions.
RADIO/VHF: Waha maintains direct communication with Tripoli Radio, details of which are shown in publication 205 of the U.S. Hydrographic Office and are included in the Berne Lists. Waha also maintains a VHF station at Es Sider Terminal.

Cables should be addressed to: Wahaoil Pipeline Tripolilibya. Cables addressed in this manner will be received directly by the Waha Communications Centre in Tripoli and relayed immediately by voice radio or teletypewriter to the terminal at Es Sider. Vessels with a telex facility on board should telex directly to 20158 Wahalibya, Attention Marine Superintendent.

Within 6 hours of clearing its last port for its voyage to Es Sider, each tanker shall provide the Terminal with the following information by cable addressed to Wahaoil Pipeline Tripolilibya:

(a) The name of the tanker.
(b) The name of the port from which the tanker last cleared.
(c) The date and hour of the ETA at Es Sider Terminal.

When the Master of the tanker en route to Es Sider is of the opinion that his tanker is within 72 hours of arrival at Es Sider, he shall notify the Terminal by cable addressed to Wahaoil Pipeline Tripolilibya, or telex as above, providing the following information:

(a) The name of the tanker.
(b) ETA at Es Sider.

When the Master of the tanker en route to Es Sider is of the opinion that his tanker is within 24 hours of arrival at Es Sider, he shall notify the Terminal by cable addressed to Wahaoil Pipeline Tripolilibya, providing the following information:

(a) The name of the tanker.
(b) ETA at Es Sider.
(c) Quantity of cargo required, maximum draft on departure Es Sider, and deballasting time required before vessel can commence loading.

When the Master of the tanker en route to Es Sider is of the opinion that his tanker is within 12 hours of arrival at Es Sider, he shall notify the Terminal by cable addressed to Wahaoil Pipeline Tripolilibya, or telex as above, providing the following information:

(a) The name of the tanker.
(b) ETA at Es Sider.

4 hours before the Master expects to arrive at Es Sider to receive a Mooring Master on board, he shall notify the Terminal by cable addressed to Wahaoil Pipeline Tripolilibya, or telex as above, and also pass the same by VHF radio, providing the following information:

(a) The name of the tanker.
(b) Precise ETA at Es Sider.

If the tanker is equipped with a FM radio-telephone in the 156–162 MHz band, communications may be established with the Es Sider Terminal Dispatcher by calling on Channel 16, 156.8 MHz. This frequency is monitored continuously. The range of the Terminal station is approximately 100 miles.

VHF Channel 12 is also available for use as a marine working frequency, although it is not monitored.

When the Master submits his first estimated time of arrival to the Terminal he shall indicate if the vessel is to load a part cargo, in which case it should be stated clearly whether it is first or second part of loading.

Jamahiriya Local Time is GMT plus 2 hours (GMT plus 1 hour in Winter).

N.B. Vessels are requested to refrain from using VHF Channel 8, as this is used as a tanker loading frequency, until such time as other frequencies are available and equipment is installed.

ARRIVAL PROCEDURE: Tenders to load crude oil cargo will normally be accepted and berths will be assigned to tankers in order of arrival, provided they have valid nominations for cargo and carry clean ballast, if any, and are in all respects equipped and ready to berth. In the event that berthing is delayed on account of weather, tankers will normally keep their position in line. Tankers required to leave Terminal area on account of weather (port closed) shall maintain contact with the Terminal via Tripoli Radio or VHF so they will be available when the weather moderates. Waha reserves the right to decline to berth a specific tanker if its condition or facilities are unsafe for berthing or loading, even though the Terminal may be open to other tankers. Waha Marine Superintendent's decision shall be final.

As soon as practical after arrival, all tanks will be inspected for evidence of oil in ballast. Similar inspections will continue during discharge of ballast. If evidence of oil appears at any time, the tanker shall be rejected forthwith and shall not again be accepted until it is shown the ballast can be properly discharged.

If during inspection or during progress of loading it is revealed that tanks are not tight or that oil is leaking from the tanker, it shall be rejected from further loading. Tanker shall not be later accepted for loading unless satisfactory evidence of repair is submitted, duly certified by Lloyd's or ABS Surveyors, or other recognised surveyors.

Upon arrival at the Terminal of Es Sider, the Master shall give Notice of Readiness to load by wireless or VHF but not before one or other of the following events shall have transpired:

(a) The Master shall have received the Mooring Master on board; or
(b) The Master shall have dropped anchor in the anchorage.

However, the Notice of Readiness shall not be accepted unless the tanker is in every respect ready to load.

In reporting readiness to load, the Master of any vessel arriving at Es Sider for the first time shall state whether the flanges on the manifold of his vessel are such as to permit hose connections without modification.

A tanker shall have sufficient ballast for safe handling. Careful watch of the weather, frequent interchange of information between the tanker and the Terminal and the knowledge of the behaviour of his tanker may permit the Master to bring his tanker with minimum of ballast and thereby reduce the possibility of violating sea pollution requirements.

HEALTH: Tankers shall fly "Q" on arrival by day and display a red light over a white light at night to indicate quarantine conditions.

VHF: Tankers shall keep continuous watch on VHF Channel 16 when at anchor in the anchorage. Failure to keep watch on Channel 16 may lose them their berthing turn.

TUGS: Not required. Waha maintains launches to assist in berthing tankers. These are under the direct supervision and control of the Mooring Master.

BERTHING: The 3 (7-Buoy) conventional berths are approximately 1 mile from shore and in approximately 65 ft. of water. Central Spar Buoys of these 3 berths are:

Berth No. 1 (Easternmost)
Lat. 30° 38′ 58″ N. Long. 18° 22′ 43″ E.
Berth No. 2 (Middle)
Lat. 30° 39′ 06″ N. Long. 18° 22′ 06″ E.
Berth No. 3 (Westernmost)
Lat. 30° 39′ 35″ N. Long. 18° 21′ 53″ E.

To the West of the 3 conventional berths is a mono-mooring berth. It is about 2 miles from shore in approximately 80 ft. of water.

Berth No. 4
Lat. 30° 40′ 31.5″ N. Long. 18° 21′ 43.7″ E.

To the East of the 3 conventional berths is a second mono-mooring berth. It is about 3.5 miles from shore in approximately 100 ft. of water.

Berth No. 5
Lat. 30° 39′ 55.95″ N. Long. 18° 25′ 19.13″ E.

Three lightbuoys have been placed on the North, East and West Cardinal points of the manoeuvring circle for Berth No. 5. The manoeuvring circle circumscribes an area 4,000 ft. from the berth centre.

Conventional Berths:

The Mooring Master may reject a tanker if he deems that the tanker is not properly equipped; or that the tanker fails to have a full complement of trained personnel capable of carrying out all the berthing procedures and in particular the hose connecting as directed by him; or that the tanker has dirty ballast; or that the tanks are not suitable for carrying crude oil. Tankers having a separate system of ballast tanks shall be permitted to discharge ballast and load oil simultaneously; however, approval shall first be obtained from the Waha Marine Superintendent.

Tankers shall be equipped with an adequate propulsion unit as certified by an appropriate Survey Society. Tankers with inoperative or partially inoperative propulsion units shall be rejected. No repairs shall be made while the tanker is in or near a berth.

Tankers shall have 2 bower anchors and ground tackle in good working condition and in sizes and class to qualify under either Lloyd's or ABS ratings, even though they may have been classified by other Societies. Vessels should be capable of running out a minimum of 165 fathoms (11 shackles) of chain on each anchor in order that they may be berthed at one of the sea loading berths.

Tankers shall have at least one winch, in good working order, on the poop deck capable of heaving on two ropes simultaneously. The winch drums must be of such a size to be able to take at least 5 turns of mooring rope.

Tankers shall have one winch on the after end of the main deck, so sited that ropes led through the fairleads at the after end of the main deck, port and starboard, can be hove on. The winch drum must be of such a size to be able to take 5 turns of mooring rope.

All tankers shall have suitable stoppers for all lines and stoppers for wire ropes. Wire ropes are a part of the permanent berths and all tankers shall pick up the wire ropes unless an exception is approved by the Marine Superintendent. The exception may be based upon tanker having suitable wires with nylon or synthetic rope tails for ease of handling by launch and launch crews. These tails should be of appropriate strength and of a suitable length to enable them to be manhandled on to the mooring buoy hooks. Constant tension winches may not be used except where they can be solidly locked and the constant tension feature not used. The making fast of berth mooring wires on ship's reels will be treated as a last resort to be used only in the absence of sufficient bitts.

Tankers shall have at least 9 good synthetic fibre lines of not less than 9 in. circumference and at least 120 fathoms in length, with an eye spliced in each end. These lines shall be placed out free for running; 3 on the after end of the main deck, and 6 on the poop deck. The 3 lines on the after end of the main deck shall be married together so that if the need arises the double length can be run on either side of the tanker. The Mooring Master may require the use of additional ropes or wires to effect a safer mooring, and these are to be supplied on his advice.

Tankers shall be equipped with blocks, tackle, booms, runners, and sundry equipment to efficiently hoist the submarine hoses (5 tons at conventional berths and 10 tons at monobuoys) from the sea bottom. Other necessary equipment includes wrenches, gaskets, nuts, bolts, strops, drip pans, sawdust, drift pins, etc. The derrick should be rigged with a single wire runner of sufficient strength to be able to lift 10 tons.

After the tanker is securely berthed, the submarine hoses shall be lifted amidships on the port side. The base lift may weigh up to 10 tons. Hoses shall be lifted and connected by the tanker crew. The Mooring Master shall advise the tanker's officer-in-charge concerning lifting techniques; however, the responsibility for all operations shall remain with the officer.

It is believed that the facilities at Es Sider are similar to those of other Mediterranean Terminals, and that, generally speaking, no unusual or unique equipment shall be required by the tankers.

Shore Stops: If it is requested by the Master of the tanker that the cargo flow should be stopped from the shore at a predetermined tonnage, it must be clearly understood that Waha Oil Company of Libya, Inc. will not be held responsible for any error, and that in the case of overloading, the excess cargo cannot be pumped back ashore.

Vessels are encouraged to load and deballast at the same time providing that segregated ballast tanks or double valve separation exists.

Mono Moorings: Nos. 4 and 5 Berths are single point buoy moorings. The body of the buoy is secured in a fixed position by means of 8 moorings, whilst the top of the buoy is in the form of a turn-table, allowing the ship's moorings and hoses to rotate and take up the position the vessel naturally lies due to wind, sea and current conditions.

Vessels are normally moored by 2 bow lines only, these being provided by Waha. A selection of wire strops and shackles will also be placed on board for mooring purposes. The 2 mooring lines are hove in until the length of chafing chain to O.C.I.M.F. standards is brought inboard. According to the mooring arrangements, the Mooring Master will advise on the method of securing the vessel. Ship's wires or ropes may be required to back up mooring equipment supplied by Waha. Smits towing brackets will be utilised when fitted in suitable position and if they are of adequate strength and size. Other O.C.I.M.F. standards chain compressors and fittings are acceptable. However, it should be noted that 2 ropes are provided and therefore 2 chafe chains must be hove inboard and properly secured. Under no circumstances shall the ship be moored with the lead-in ropes.

On advice from Waha that a vessel is to load at the mono moorings, she will have the following ready before the Mooring Master boards:

(a) Port side derrick to be rigged ready to lift various wire strops, shackles, and hose securing equipment. This equipment will be placed on board at the same time as the Mooring Master boards, or as soon as possible thereafter, who will advise on its disposition.
(b) Forward, the vessel should have ready 2 good synthetic fibre mooring lines, at least 9 in. circumference, 2 good 4 in. circumference rope messengers at least 400 ft. long, or two 3 in. wire messengers of the same length, each fitted with a suitable screw shackle. Also a crowbar, spikes and hammers.
(c) No moorings will be required aft.
(d) The vessel shall make a good lee on the port side, taking due care that ladders and accommodation ladders are clear of the tanker's manifold area and overboard discharges.

It is essential on this berth that the hoses be picked up immediately mooring operations are complete. On advice from the Mooring Master, part of the ship's crew must be standing by at the port manifold for this operation.

Hose lifting and connecting operations are basically the same as in conventional berths, except that hose strings are floating and therefore may require bowsing in rough weather.

Vessel's engines must be ready at all times, and under no circumstances is the propeller to be turned ahead without prior consent of the Mooring Master. Failure to comply with this may result in cessation of operations, and possible rejection as being unsuitable for a single point mooring. Any damage caused to the berth or hoses as a result of turning the propeller ahead without consent will be charged against the vessel.

In adverse weather, a continuous lookout will be required on the forecastle head, by responsible persons, to keep watch on the moorings, manifold and hoses.

In adverse weather the Mooring Master may require cargo to be loaded, in the initial stages, into the forward compartments and this should be complied with when requested.

Vessels are encouraged to load and deballast at the same time, where this is possible. In the case of vessels with permanent ballast tanks, this ballast should not be started without first consulting the Mooring Master.

LOADING: Raising, lowering, connecting and disconnecting of submarine hoses, as well as all other labours and duties on shipboard, shall be performed entirely by the ship's crew. Lack of co-operation by the crew in this operation will result in the rejection of the tanker, her return to the anchorage and any consequent loss of loading turn until crew are prepared to perform this work.

Mooring Masters shall report unsatisfactory conditions to the Waha Marine Superintendent, who may reject the tanker until corrections are made. All costs accruing from these conditions shall be for the tanker's account.

Loading Rates:

Conventional Berths No. 1, 2 and 3	40,000 b.p.h.
No. 4 Mono-Mooring	30,000 b.p.h.
No. 5 Mono-Mooring	50,000 b.p.h.

BALLAST: 4 hours deballast time (before commencing loading) is the maximum time allowable in consideration of the open and exposed nature of the berths. Vessels which take longer to deballast put the berth at unacceptable risk if the weather deteriorates. Should a tanker be unable to comply with this stipulation, Waha Marine Superintendent may berth more suitable vessels ahead of her if poor weather conditions dictate. Vessels with an unduly long deballast time may be rejected.

There are no facilities at Es Sider for the discharge of dirty ballast, and vessels arriving with dirty ballast will not be authorised to deballast in the vicinity of the Terminal. Any tanker rejected because of dirty ballast or sea pollution will automatically nullify its Notice of Readiness to load and thereby relinquish any right to priority of loading position.

It is the Master's responsibility to see that no oil of any kind is pumped or spilled overboard from his tanker. This includes oily water from bilges, residuals from previous voyages or any other matter that may result in pollution of the sea. Owners and Masters are invited to examine all laws concerning pollution of the sea, especially in regard to the Mediterranean Sea area. Inspections may be made by the Libyan Ports & Lights Authorities, whose opinion of the cleanliness of the ballast shall be final.

The waters in and adjacent to the Terminal of Es Sider must not be polluted, and only clean oil-free ballast may be discharged anywhere inside of a line 100 miles to seaward and roughly parallel to the Libyan Coastline.

Prior to acceptance all tanks will be inspected for evidence of oil in the ballast and during discharging similar inspections will continue.

Masters are warned that when disposing of dirty ballast outside Libyan waters, all pipe-lines, sea-suctions, strainers and pumps that are later to be used to discharge clean ballast, must be flushed clean so that there will be no chance of even a small amount of pollution when the clean ballast is pumped out.

Any vessel required to return to a position outside the Mediterranean Sea for cleaning tanks or for any similar reason, automatically nullifies any Notice of Readiness already tendered and at the same time loses any priority held for loading. On return from sea, vessel will be entered for loading at the time of the second arrival, when a new Notice of Readiness will be tendered.

Master's attention is directed to Es Sider Notices concerning oil pollution and to the serious consequences of discharging dirty ballast, besides having his tanker rejected.

MEDICAL: Medical assistance shall be on an emergency basis only. The Doctor will only board a vessel if it is physically impossible for the patient to attend the clinic ashore and there is no priority need for the Doctor's services on shore. Normally the Doctor will require the accommodation ladder rigged for boarding.

If it is necessary to land a patient at Es Sider, he must be accompanied by an officer able to speak English or Arabic. Patient and accompanying person must have their Passports and International Certificates of Vaccination and Immunisation, and the Authorities must be advised prior to their leaving the ship.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: Consulates are located in Tripoli, which is approximately 650 km. by road from Es Sider. Some countries having Consulates are: Algeria, Argentina, Belgium, Brazil, Chad, C.I.S., Czechoslovakia, Denmark, Finland, France, Germany, Ghana, Greece, India, Italy, Japan, Jordan (represented by Indian Embassy), Kuwait, Lebanon, Morocco, Nigeria, Nationalist Republic of China, Pakistan, Saudi Arabia, Spain, Sudan, Syria, Sweden, Switzerland, Tunisia, Turkey, Venezuela and Yugoslavia.

REPAIRS: When a tanker is in or near the berth, its engines shall remain ready with full power for immediate use. Engine repairs shall not be performed near any berth.

WATCHMEN: Not less than one capable deck officer and three able seamen shall be available on the deck at all times. No person under the influence of alcohol shall be allowed on deck. The Mooring Master's opinion on the sobriety of an individual shall be final.

CUSTOMS ALLOWANCES: Cigarettes, cigars, matches, tobacco, spirits, wines, beers, perfume, arms, ammunition, saccharine, and certain other items shall be placed under Customs seal from the time of arrival in port until such time as the tanker has left territorial waters.

Each officer and crewman is allowed the following ration for each day the tanker is in port: *(a)* 25 cigarettes per day, or 25 grammes of tobacco or 25 grammes of cigars. *(b)* One litre of beer or 0.5 litre of wine. *(c)* Special provisions are sometimes made for the Master.

REPATRIATION: No facilities exist for crew changes or repatriation.

TIME: GMT plus 2 hours.

SHORE LEAVE: None of the officers and none of the crew of any tanker shall be permitted shore leave at Es Sider.

GARBAGE DISPOSAL: No facilities.

WASTE OIL DISPOSAL: No facilities.

GENERAL: The Terminal of Es Sider operates 24 hours a day, 7 days a week, while weather permits.

Range lights and mooring buoy marker lights will appear and disappear with unscheduled frequency. These lights are for the use of Mooring Masters at the Terminal, and should be disregarded by any tankers using the Terminal.

Waha maintains launches to assist in berthing tankers. These are under the direct supervision and control of the Mooring Master. Any service and facilities provided by Waha, including the services of the Mooring Masters, launches, or berthing equipment, are at the vessel's risk. The furnishing of a Mooring Master, launches, or other services and facilities shall not be construed to be, or give rise to, a personal contract. Waha shall have benefit of all exemptions from the limitations of liabilities to which an owner or a vessel is entitled under the laws of the United States of America.

When a Mooring Master and his assistants, possibly apprentice Mooring Masters, are assigned to a tanker, the tanker shall supply them with accommodation of the same standard and meals in the same manner as comparable personnel of the tanker. No special meals or special foods shall be required unless to comply with Moslem religious teachings. The intent is that the furnishing of meals to Waha personnel be kept to the minimum, compatible with the ordinary working of the Terminal.

No boats may be lowered into the water, except in an emergency.

Adequate deck lighting must be available for night mooring and loading. A good floodlight will be required to illuminate the area around the submarine and cargo hose connections during hosing and loading operations. During the discharge of ballast at night, the sea area around the vessel must be adequately lighted. If vessel is berthed on mono-mooring buoy, in addition to the foregoing, lights MUST be provided on forecastle head and over bow to facilitate supervision of moorings.

Stores of any sort shall not be handled while tanker is under "Notice of Readiness". No stores shall be handled while the tanker is in or near a berth.

Use of anchor marker buoys recommended.

Should any tanker or craft become an obstruction in any part of the Terminal or approaches thereto, or in any area of the submarine pipeline. Waha shall be empowered and shall have the right to take any steps it may deem necessary to remove the obstruction without notice to the Owners. All expenses of such removal shall be borne by the tanker or craft or by those owning it at the time of the accident causing the obstruction, and Waha shall be entitled to reimbursement by them for any such expenses incurred by it.

Power must be available at all times on all deck winches and on anchor windlass while the vessel is in the moorings.

If mooring wire winches are used, wires should be secured so as to enable them to be quickly let go from the vessel without damage.

Only in an emergency shall the tanker manifold valves be closed against crude flow, and then only with the Mooring Master's consent.

Should communications fail, the cessation of loading may be effected by a continuous sounding of the ship's whistle. This procedure will then stop the loading of all tankers in the area.

The bridge and/or control area shall not be locked nor otherwise arranged to prevent immediate entry at all times by the Mooring Master.

In adverse or marginal weather conditions Mooring Master may request that extra personnel be placed on duty on deck for tending moorings or hoses as required. Masters are advised to comply with this request.

The Mooring Master shall witness the plugging of all scuppers. Failure to plug scuppers shall result in the tanker's rejection.

The presence of unauthorised craft alongside a tanker will render it unacceptable. It shall be the duty of the tanker's personnel to clear all such craft away from the tanker.

When tankers are loading or discharging crude oil or ballast, and while tank tops are open or ullage plugs are open, boiler tubes shall not be blown. Every precaution shall be exercised to prevent sparks escaping through the funnel or stack or from the galley stack. The Mooring Master may demand all fires extinguished if he deems it necessary for safety.

Under the interpretation accorded to the Libyan "Boycott of Israel" Law, it is considered to be a violation thereof if a vessel calling at a Libyan terminal has on board any item of Israeli origin, irrespective of the nature thereof, including but not limited to manufactured products, fruit and vegetables, as well as empty crates, cartons, bottles and paper wrappings, regardless of the country where any of the foregoing was obtained. The law is strictly enforced, and the minimum penalty for violation thereof normally includes a fine and confiscation of all such items. Fines can exceed $1,000.

Charts: B.A. 3344 and Italian No. 431.

SHIPMASTER'S REPORT: May 1987.

Prior to arrival *all* storerooms were thoroughly checked to ensure that no produce, tools or equipment indicated that they were of Israeli or South African origin. "Magazines", Time, Newsweek, old newspapers etc., were put out of sight as many of these publications contain political cartoons. Israeli and South African national flags were removed from the flag locker together with their respective name tags. ALL alcohol placed in the bonded store and listed. An *accurate* Stores List of selected items together with a comprehensive *accurate* Crew Declaration List were prepared.

Fifteen minutes after berthing, Agent, Customs, Immigration and Port Captain boarded. Immigration checked Crew List against Passports. Customs checked Bonded Stores List against Bond Locker. Customs checked coffee and sugar against Stores List. No discrepancies were found and all other items were accepted. Port Captain checked vessel's trading certificates and had to be convinced why the vessel could not produce the trading certificates translated into Arabic. This could cause a delay on any subsequent voyage to Libya.

As stated in "Guide to Port Entry", Master has to sign a Declaration of Discharge, which *must* be endorsed by the Customs at the Port of Discharge and *must* be posted back to Libya, a copy *must* remain with the vessel. Failure to comply with the regulation will automatically mean a long delay and possible rejection of the vessel on any subsequent visit to Libya.

As all the necessary papers were in order and no discrepancies found all official were polite and quite happy.

There were no problems with mooring, loading cargo, figures, etc. However, this vessel does not have the required number of mooring ropes to berth as per port requirements. (9 ropes required Aft). See "Plan Section".

AUTHORITY: Waha Oil Co., P.O.Box 395, Tripoli, S.P.L.A.J. *Tel:* 31116/29 (ext. 6-212). *Telex:* 20158 Wahalibya. *Cables:* Wahaoil. *Contact:* Marine Superintendent.

AGENCY: See "General" before first port.

MARSA AL HARIGA: 32.04 N. 24.00 E. (See Plan)

Also see "General" before first port.

LOCATION: Marsa al Hariga Oil Terminal is located on the South side of the harbour of Tobruk, approximately 1 mile Eastward of Marsa al Hariga.

DOCUMENTS:

A. Customs Requirements. On the arrival of a vessel, the Tobruk Customs Authorities will require from the Master of the vessel:

4 copies of a Crew List.
2 copies of a List of Ship's Stores.
2 copies of a Declaration of the Crew's Personal Belongings, including currency, cigarettes, gifts, etc.
4 copies of a Passenger List.
Last Libyan (cargo discharge certificate) to be checked for validity on boarding, if not correct vessel has to wait outside for ship's purposes.

B. Harbour Master's Requirements. On the arrival of a vessel, the Tobruk Harbour Master will require from the Master of the vessel:

1 copy of a Crew List.
1 copy of a Passenger List.
1 copy of the Ship's Manifest.
1 copy of a Port Declaration (form will be made available to each vessel on arrival).

APPROACHES: Vessels bound for the terminal should approach the harbour of Tobruk from the North-East with the lighthouse on Tobruk Point bearing 238° (true). In daylight this lighthouse should be kept in line with the conspicuous German War Memorial on the South side of the harbour.

When about 4 miles from Tobruk Point, course should be altered to 224.5° (true) to bring the leading lights on Marsa Umm esc-Sciausc in line. This course should be maintained until the vessel is close to the outer buoy, where one of the company's Berthing Masters will board.

Deep-draft vessels sailing from the terminal should avoid navigating North-Westward of the leading line from Marsa Umm esc-Sciausc, owing to the presence of shoal water off Tobruk Point.

PILOTAGE: Vessels coming to and departing from the Terminal will be berthed and unberthed by Berthing Masters provided by the company, subject to the understanding that in all circumstances the Master shall remain solely responsible on behalf of his Owners for the safety and proper navigation of his vessel.

Berthing Masters will board at the Outer Buoy.

The Pilot and Loading Master are to be provided with cabins whilst the vessel is alongside.

ANCHORAGES: If a berth is not immediately available on a vessel's arrival off the harbour of Tobruk, the vessel will be advised by the company where she is to anchor.

Anchorage position for tankers waiting to be berthed is 1.5 miles N.E. of the Outer Buoy.

MAX. SIZE: Max. Summer deadweight 150,000 long tons and Max. draft 56 ft. at No. 1 and Max. Summer deadweight 130,000 long tons and Max. draft 52 ft. at No. 2. The berths are located at the end of a T-head jetty which extends some 700 ft. from the shore. There is a minimum depth alongside of 60 ft. and approach to and departure from the berth can be made in not less than this depth of water. Freeboard at any time whilst deballasting must not exceed 55 ft.

HEALTH: The Libyan Authorities will grant clearance by radio of a vessel coming to the terminal. Radio messages requesting clearance should be sent not earlier than 48 hours prior to vessel's arrival off the harbour of Tobruk and should give the details required in the Maritime Declaration of Health which must also be completed.

COURTESY FLAG: On entering the territorial waters of the Libyan Arab Republic which commence 6 miles off the coast of Libya, vessels should if possible, hoist the Libyan flag, and in any event the Libyan flag must be hoisted before entering the harbour of Tobruk. Should a vessel arrive without a Libyan flag on board, one may be obtained from the Company's Berthing Master when he boards at the Outer Buoy.

ARRIVAL MESSAGES: In addition to their arrival messages to Agent, vessels must pass an arrival message to the terminal via the company's radio station giving at least 72 hours notice of ETA and advising their estimates of:

(a) The quantity of cargo (in long tons) to be loaded at the terminal.
(b) The cargo loading rate (in long tons) per hour.
(c) The quantity of ballast (in long tons) to be discharged ashore at the terminal.
(d) The ballast discharge rate (in long tons).

If, subsequent to advice of their ETA there is any material change, a further ETA message must be passed via the company's radio station.

RADIO: Tobruk Radio 5 A1 (MF & HF). Position: 32° 02′ N. 24° 00′ E. Frequency: 420, 500 A1, A2, 0.5 kW. 4241 kHz at 2130 GMT, 8480 kHz at 1730 GMT, 16963 kHz at 0930 and 1330 GMT. All using A1 0.5 kW.
Note: Station owned by Arabian Gulf Oil Company. Company telegraphic address: "Injaz Tobruk". Telex: No.: Agoco Ly 50023. All times given are GMT. Station keeps watch on 500 kHz during 24 hours.

TUGS: For berthing and unberthing at the terminal, vessels will be required to use the 2 diesel tugs which are available at the terminal. Each of these diesel tugs has a bollard pull of approximately 25 tons.

BERTHING: *Jetty:* Vessels will berth on the jetty starboard side alongside, depending on the prevailing weather conditions, though starboard side alongside is preferred. Each berthing head is "T" shaped and is protected by 4 breasting dolphins.

Moorings: Normal requirements are 4 head ropes, 3 breast ropes and 2 springs (springs to be ropes whenever possible).

All moorings, except the backsprings to the outer breasting dolphins at Jetty Berth No. 1 attached to quick release hooks.

Buoy Berth: Removed.

HOSES: New loading arms installed (balanced type) are Woodfield Mark 4, manifold size 16 in. ASA. Loading rate is maximum of 4,000 t.p.h. per hose.

OIL BARRIER: "Gemlen" floating anti-pollution booms on reels at jetty heads. Boat with chemical dispersants standing-by. Anti-pollution barge with floating boom and oil skimmer is available.

BALLAST: Vessels should make every effort to arrive at the terminal with clean ballast and with the minimum quantity for safe handling under prevailing weather conditions.

All ballast must be discharged into shore tanks provided by the company, unless it is clean ballast, carried in tanks which are completely isolated from the vessel's cargo system. However, the discharge of such ballast into harbour waters must not be commenced until the ballast has been inspected by a company official, and he has certified that it is in order to commence discharge.

Ballast can be accepted into the Company's store tanks at rates up to 4,500 t.p.h. from the jetty berths. Ballast is discharged ashore over the jetty by way of a loading boom. Max. quantity 35,000 tons.

LOADING: Cargo loading at each jetty berth is by means of four 16 in. Woodfield Mark 4 loading arms. Cargo loading at the buoy berth is by means of a 34 in. submarine line to which two 12 in. flexible hoses are attached.

This system permits a max. loading rate of approximately 8,000 t.p.h. over each jetty berth. The actual loading rate for a particular vessel will be determined prior to the commencement of loading by agreement between the Master and the Company.

Jetty: Method: gravity loading, max. head 360 ft. rate regulated to requirements. Loading rates: 2 lines each 4,000 t.p.h. Two 8,000 t.p.h. maximum.

FRESH WATER: Not available.

FUEL: Not available.

SAFETY: A copy of the Regulations will be given to Master when Company's Berthing Master boards at outer buoy. Masters should make themselves thoroughly acquainted with these Regulations, strict observance of which is required by the Company.

In the event of any infringement of the Regulations, operations may be stopped and, if so, will not be recommenced until the Company is satisfied that appropriate action has been taken by the Master to comply with all the Regulations. The Company also reserves the right to unberth a vessel in the event of a continued or blatant disregard of any of the Regulations. Any loss or expense to the Company resulting from an infringement of the Regulations and, in particular, in the event of an infringement leading to an interruption of operations and/or unberthing of a vessel, will be for the account of the Owners.

CONSULS: None.

REPAIRS: No shore facilities for carrying out repairs to vessels either at the terminal or at Tobruk.

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wines, beer, perfume, arms, ammunition and saccharine have to be locked up under Customs' seal from time of vessel's arrival in harbour of Tobruk until time of departure.

Whilst in harbour, each member of crew allowed following: 200 cigarettes. All spirits, beer and wines to be placed under seal.

No fixed allowances for cigars and tobacco.

Libyan law prohibits vessels from having on board any goods or containers of Israeli origin. Any vessel having such goods or containers on board on arrival in the harbour of Tobruk will be liable to a heavy fine and confiscation of the goods or containers. The Libyan Authorities may, moreover, refuse to clear the vessel.

REGULATIONS:

1. *Ship's Garbage.* Whilst within limits of harbour of Tobruk the throwing overside of ship's garbage is prohibited.
2. *Ship's Radio.* Once vessel berthed at Terminal the use of her radio will not be permitted.
3. *Ship's Boats.* Use of ship's boats not permitted within limits of harbour of Tobruk.

SHIPMASTER'S REPORT: April 1983.
Anchorage: Anchorage position for tankers is from 1.5 miles – 2 miles N.E. of the Outer Buoy. Holding ground is bad. As soon as wind increases up to Force 7 and swell grows, it is best to heave up the anchor and to proceed to sea and wait, keeping watch on VHF Channel 16.

Many vessels have lost anchors.

Max. Size: Berth No. 1 – Max. draft 56 ft. Berth No. 2 – Max draft 52 ft.

AUTHORITY: General Ports and Lights Administration, P.O.Box 648, Tripoli, Libya.
Operator: Arabian Gulf Oil Co., P.O. Box 44, Tobruk. *Tel:* 87-22044/7. *Telex:* Agoco Ly 50023. *Cables:* Injaz Tobruk. *FAX:* 22044 Tobruk. *Contact:* Marine Department or Terminal Manager.

AGENCY: See "General" before first port

MARSA EL BREGA: 30.25 N. 19.34 E. (See Plan)

Also see "General" before first port.

SIGNALS/FLAGS: The Libyan maritime authorities require all vessels conducting business with Libyan ports, or plying the Libyan territorial waters, to strictly comply with the following standing international maritime practices:

1. To sound whistle signals appropriate to the different vessel manoeuvres, as well as during entering and leaving ports.
2. To fly the flag of the country of registration when approaching port(s) of destination, and during vessel's stay in port.
3. To salute Libyan navy vessels upon approaching such vessels.
4. All ships must fly the Libyan flag when inside territorial limits.
5. Libyan Law does not permit ships using Libyan waters to retain Israeli flags, stores or literature pertaining to Israel on board, even though these may be normally part of the vessel's navigation equipment.

Failure to adhere to the above may result in penalties by the Authorities.

LOCATION: Marsa-el-Brega is located in the South-Eastern part of the Gulf of Sirte in Lat. 30° 25′ 0″ N., Long. 19° 34′ E. It is an open bay contained between Ras Magdar and an unnamed headland some 3 miles to the West.

Vessels calling at Brega should have on board B.A. Charts No. 3350 and 3354, or H.D. Chart No. H203. No charts are available at Brega.

The Brega Sea Buoy is located in Lat. 30° 27.55′ N., Long. 19° 35.1′ E. A white flashing light is exhibited on a orange/white pillar buoy at a height above the water of 6.1 m. The light's characteristic is one flash every ten seconds (Fl. 10 sec.).

Single point mooring Berth No. 5 (SPB 5), is located in position Lat. 30° 26′ 45.26″ N., Long. 19° 34′ 7.4″ E.

Single point mooring Berth No. 6 (SPM 6), is located in position La. 30° 26′ 17.3″ N., Long. 19° 33′ 1.3″ E. The mooring buoys exhibit a white flasing light (characteristic "U").

Bow mooring (out of service) in position Lat. 30° 26′ N., Long. 19° 33.9′ E. with a flash red light (2 ev. 5 sec.) at a height of 28.34 m. above sea.

Radio beacon (Aero) is located in Lat. 30° 25′ N., Long. 19° 34′ 14″ E. Call sign is "MB" and operates continuously on a frequency of 403 kHz.

A single flare is located in Lat. 30° 24′ 31.9″ N., Long. 19° 35′ 49.7″ E. Three other flares are located approximately 2,213.36 m. to the West and Southwest. The flares, when burning, can be seen at extreme distances.

Numerous lit and unlit buoys are located within the restricted area shown on B.A. Chart No. 3350. Vessels are cautioned that these buoys may change position due to weather. Vessels are not permitted to enter restricted area shown, without a Brega pilot on board.

Brega is radar controlled with scanner in position Lat. 30° 25′ 02.5″ N., Long. 19° 34′ 55.6″ E. Height of tower 34.19 m.

Berth No. 2 (Naphtha) consists of 5 mooring buoys in position Lat. 30° 25.30′ N., Long. 19° 35.45′ E.

DOCUMENTS: Customs and Immigration Officials will board the vessel, except in adverse weather. All relevant documents are supplied by the Agent. The Master will sign and stamp the papers. These will then be handed over to the Authorities before clearance for loading is granted.

When ships clear inwards, they should complete the necessary forms for members of the crew, and all goods held (e.g. liquor, cigarettes, cameras, money, etc.) with the crew members' signature and rank. This form is ordinarily supplied in advance, however ships making their first call at Libya will receive advance forms for future calls.

Customs, Immigration and Lights Authorities Forms:

Port Declaration – Form P.L. 7 (1 copy).
(Title in Arabic) Inward Report – Form C.L. 128 (3 copies).
Cargo Manifest Inward – Form C.L. 1 (3 copies).
Report Outwards – Form C.L. 4 (3 copies).
Crew Manifest Inwards – Form C.L. 31 (2 copies).
Export Manifest Form C.L. 155 (6 copies).
Certificate of Discharge (see below).

Ship's Forms:

Crew List (3 copies) (also 1 copy to be handed to Pilot).
Stores List (2 copies).
Clearance from Last Port (1 copy).
Certificate of Discharge (Tankers only) from last Libyan Cargo.

Certificate of Discharge: If vessel has not called at a Libyan port since October 18th, 1973, then a letter is required from the Master, addressed to the Secretariat of Petroleum, stating that he undertakes to mail the Certificate of Discharge, for the present cargo, from the port of discharge and retain one signed stamped copy on board. It is essential that the Certificate of Discharge for any petroleum cargo loaded after that date, be on board the vessel and it must be clearly signed and stamped by the Authorities at the port receiving the last Libyan cargo. Vessels may incur delays or be refused loading permission where this is not complied with.

One copy to Secretariat of Petroleum, P.O.Box 2655 and 5335, Tripoli.

One copy to Marine Superintendent, Sirte Oil Co., Sirte Field, P.O.Box 385, Tripoli.

PILOTAGE: The services of a Pilot/Mooring Master are provided. He will normally board the vessel in the vicinity of the Brega Buoy and will advise the Master on approaches to the berths, mooring and unmooring, connecting and disconnecting cargo hoses, and all other operations within the berthing area. Vessels are cautioned not to enter the restricted area without the services of a Brega Pilot. Pilot ladder must conform to international safety standards.

The Master of the vessel shall notify the Pilot of any special conditions, difficulties or peculiarities, such as defective equipment, lines or gear, which might impose special hazards in connection with handling, mooring or loading the vessel.

The pilot will decline to moor vessels if they are not equipped with satisfactory mooring equipment, lines, gear, etc.

Vessels must be moored to the entire satisfaction of the Pilot, and must be ready at all times, to put out more lines or to adjust the lines as required by any change in the weather, or as requested by the Pilot. Masters are responsible for the frequent monitoring and careful tending of moorings throughout period on the berth.

Masters of vessels are reminded of their obligation to comply with statutory rules, and are requested to comply with the following:

The officer responsible for the embarkation or disembarkation of the Pilot must be a *Watchkeeping Officer*.

The pilot ladder must be properly secured and adequately illuminated.
The ladder must be in good condition.
The length of the ladder should not exceed 30 ft.
For vessels loading Crude/Naphtha, a combination accommodation/pilot ladder should be used.

Spreaders are to be positioned at intervals of not more than 10 ft.

Two manropes in good condition should be ready but not lowered, unless so instructed by the Pilot.

A lifebuoy with a safety line and self-illuminating light must be available at the embarking area.

If, in the opinion of the Pilot, the pilot ladder is not safe, the Pilot may refuse to board the vessel, and thus cause delay to the ship. Such delay would be for ship's account.

Vessels are cautioned not to enter the restricted area without the services of a Brega Pilot.

ANCHORAGE: Suitable anchorages are located 0.5 miles – 2.0 miles Northeast to East of the Brega Buoy in 22 m. – 23 m. depth.

Vessels are not permitted to anchor within 0.5 miles of the channels into the inner harbour, and are to keep clear of the 143° 41′ leads.

RESTRICTIONS: Shahat Shipping Co., Benghazi, advised in January 1984 that only tankers and self-equipped Ro/Ro vessels with forklift and drivers are acceptable at the port, due to non-availability of labour.

No conventional general cargo ships can be discharged until further notice.

In February 1984 Shahat further advised that receivers may discharge cargo by their own labour.

MAX. SIZE: Maximum draft for vessels entering or sailing from the inner harbour is 10.0 m.

Also see "Berthing".

TUGS: Marsa-el-Brega Port maintains tugs and mooring launches to assist vessels to moor and unmoor.

HEALTH: Quarantine signals must be displayed upon entering Brega port limits in accordance with international practice, and shall be continuously displayed until Pratique is granted.

RADIO: *Arrival Advice:* The Owner, Master, Charterer or Agent should cable the following information to Brega Marine, P.O.Box 385, Tripoli, Libya, S.P.L.A.J. (Telex 30120/21/22 SIRTCO LY or 50557 SIRTCO LY) through Tripoli or via Malta, if beyond communication range of Tripoli, 72 hours in advance, and at least 48 hours with subsequent update message 24 hours before arrival.

The cable/telex office is closed between 1900 hrs. and 0700 hrs., allowance for delays due to this, and other causes, should be allowed for.

ALL VESSELS:

Name of vessel and Flag.
Gross and Nett tonnage.
Summer deadweight.
Anticipated draft at loaded condition.
Last port.
Next port.
ETA at Brega (local time).
Agent.
Length of vessel.

TANKERS LOADING CRUDE:

Distance bow to manifold.
Segregated ballast or deballast time required.
Size of manifold (1×16 in. American Standard).
Safe working load of derrick.
Inert Gas System working and tanks inerted.
Vessel fitted with bow chain stopper (AKD).
Certificate of Discharge on board from last Libyan cargo, and if port of discharge same as port cleared for.
Cargo required by vessel.

TANKERS LOADING NAPHTHA:

Segregated ballast or deballast time.
Size of manifold (1×12 in. American Standard).
Minimum of 10×10 in. circumference fibre or synthetic mooring ropes (for use at after end of ship).
Safe working load of port derrick.
Certificate of Discharge on board from last Libyan cargo, and if port of discharge same as port cleared for.
Inert Gas System working and tanks inerted.

CARGO SHIPS:

Amount of cargo on board for discharge.
Receivers of cargo.
Advise number of stevedore gangs required.

Latitude 32° 30′ N.:

As a rule, vessels are no longer required to receive permission prior to crossing Lat. 32° 30′ N. en route to Brega. It is sufficient to contact Maritime Radio Tripoli or Benghazi giving ETA at Lat. 32° 30′ N. and proceed to Brega. Should permission be denied, vessels will be contacted accordingly.

VHF: *Port Control:* Marsa-el-Brega Port Control is equipped with VHF radio.

The following communication procedure should be adhered to:

Vessels approaching Brega should call Brega Port Control on Channel 16, at least 1 hour before arrival.

Prior to Pilot boarding, the vessel will be allocated one of 5 working channels (6, 9, 12, 13, 14). Sirte Co. vessels are equipped to operate on these channels.

Note: Whilst in Libyan Territorial waters, it is prohibited for vessels to use Radio and Wireless Telegraphy. However, VHF communications between vessels and Libyan Ports Authorities are not affected by this prohibition.

BERTHING: *Crude Oil Berths, SPM No. 5 and SPM No. 6:*
Maximum size of vessel: 300,000 d.w.t.
Length and draft unrestricted.
Flowrate: 48,000 bbls./hr.
API approximately 40.5.

Mooring consists of a monobuoy to which are attached 2×15 in. Samson lines. These are shackled to a single 3 in. Chaffing chain, which is attached to a pick-up line.

1. The ship's Panama lead should have minimum inside dimensions of 40 cm. high and 60 cm. wide. In the event that a vessel is not equipped with a suitable Panama lead, alternative fairleads will be examined. Should the alternative fairleads be considered insufficient to accommodate the 3 in. Chaffing chain, the vessel will not be berthed.
   In case of vessels without Chain stoppers (AKD) fitted, strops and shackles will be placed on board. *PLEASE ADVISE.*
2. The vessel is required to have ready a good 3.5 in. – 4 in. messenger line ready, and at least 137.25 m. in length.
3. Port derrick should have a S.W.L. of 10 tons, and be ready on arrival.
4. Vessels berthing at the SPM's must have their anchors secured, due to underwater PLEM and pipelines.
   Floating hose is 24 in. with a 16 in. over-the-rail hose. Ship's manifold should be ready to receive 1×16 in. hose (American Standard).
5. All mooring, unmooring and hose operations are done by the ship's crew as indicated by the Mooring Master.
   Notice of Readiness will be accepted only when the Pilot boards the vessel in the vicinity of Brega Buoy.

Naphtha Berth No. 2:
Maximum size of vessel: 55,000 d.w.t., in good weather.
Maximum length: 244 m.
Maximum draft: 12.8 m.
Maximum flowrate: 21,000 bbls./hr.
API approximately 70.

1. Ships should have ready aft, a minimum of 10×10 in. circumference fibre or synthetic mooring ropes in good condition, each not less than 230 m. (120 fathoms) in length. Mooring wires are not normally acceptable. It is recommended that 4 ropes be ready on the main deck, two on each side.
2. Port derrick to be ready to receive one 12 in. hose.
3. Both anchors to be ready and working.
4. Mooring and hose operations by ship's crew.

Product Dock:
Maximum draft: 7.92 m.
Jetty length: 260 m.
Loading arm 129 m. from corner.

Vessels loading or discharging refined petroleum will be berthed at the product jetty.

Vessels cannot remain alongside the Breakwater except in fine weather.

LNG Jetties A (North) and B (South):
Head, stern and breast lines to dolphins.

Springs are secured to the central pier, and in addition shore springs from the pier are taken on board.

Vessels must be ready to leave at short notice.

LPG Jetty A: Connection on East Breasting Dolphin.
LPG Jetty B: Connection on centre berth position.
Caustic Jetty A: Connection on North Breasting Dolphin.

Cargo Quay – West Side (Sirte Oil Co.):
Maximum size of vessel: 152.5 m.
Maximum draft: 7.92 m.
Ships must have adequate unloading gear.

The following restrictions and conditions shall be observed by Masters, consignees and Agents:

1. The permission of the Operations General Manager must be obtained before a ship can berth to handle cargo that is non-Sirte Oil Co.
2. Unloading must be from ship to truck, and no marshalling arrangements can be made available inside the area.
3. Unloading operations may not be performed, except during daylight hours as determined by the Marine Superintendent.
4. Loading trucks will adhere strictly to Sirte Oil Co. safety rules.
5. Arrangements for the entrance and movements of stevedoring personnel must be coordinated with Sirte Oil Co. Security Division.
6. The stevedores will be held responsible for cleaning up after unloading the vessel, under direction of Sirte Oil Co. Materials Division.
7. Ten (10) days advance notification must be given to the Marine Division.
8. All vessels with or loading Sirte Oil Co. cargo will be given priority, even if this requires interruption of the unloading operations of other cargo vessels.

Ro-Ro facility can be used by suitable vessels when Product Jetty is not occupied.

Height of jetty above sea level approximately 1.5 m.

East Side of Inner Harbour (NAPETCO):
Jetty No. 1: Ammonia and methanol.
Jetty No. 2: Ammonia, methanol, acid and caustic.
Maximum size of vessel: 30,000 d.w.t.
Overall moorings: Jetty No. 1 – 334 m. Jetty No. 2 – 341 m.
Load section: 42 m.
Maximum draft: 10 m.

Urea Berth:
Overall length: 200 m.
Yokohama fenders in centre, 62.5 m. from each end.
Draft restriction: 8.8 m. (29 ft.) even keel.

East Cargo Quay:
Length of Quay: 394 m.
Maximum draft: 9.2 m.
Height of Quay: 2.7 m.
Maximum size of vessel: 15,000 d.w.t.
Suitable Ro-Ro vessels may berth stern on to the quay.

Ships using the Eastern part of the harbour are controlled in the same manner as in the Western part of the harbour, together with any particular rules concerning the individual berths therein, that the National Petrochemical Co. may apply.

TANKERS: *Communications:* During loading offshore communications between ship and shore is via VHF. In the event of a breakdown in communications, the ship should sound the emergency signal, comprising a succession of short blasts on the ship's whistle. All loading will then cease until radio contact with the shore has been re-established.
Safety Rules: Safety rules for tankers are as the "International Safety Guide for Oil Tankers and Terminals." and IMO Recommendations on the Safe Transport, Handling and Storage of Dangerous Substances in Port Areas (Assembly Resolution A.435 (XI).

The Mooring Master is authorised to suspend operations in any cases where dangerous conditions or practices are deemed to exist, and if need be removed from berth.

Vessels at Sea Berths are not to adjust mooring lines before consulting the Pilot/Mooring Master.

Ballast: As soon as practicable after arrival and prior to acceptance, ballast will be inspected for evidence of oil. Samples will be sent ashore for testing. Inspection will continue during discharge of ballast.

If evidence of oil appears, the vessel may be returned to sea, or made to keep the dirty ballast on board.

Any vessel required to return to sea for the purpose of cleaning tanks or for any similar reason, automatically nullifies any Notice of Readiness, and at the same time loses priority held for loading. On return, a new Notice of Readiness must be tendered.

Vessels not having sufficient illumination will not berth if discharge of ballast continues after dark.

Loading Precautions: Masters are responsible to see that no oil is spilled from their ship.

If during inspection while loading, it is revealed that the ship's hull is not oil-tight, the ship will be rejected and refused further loading.

Vessels will be encouraged to discharge ballast and load oil simultaneously, subject to the loading rate.

Vessels Loading Crude and Naphtha: Inert Gas/Closed Ullage Requirements: It is a requirement of the amendment to "International Convention for the Safety of Life at Sea 1974", Regulation 60, that the vessel be fitted with an Inert Gas System. It is also a requirement of the same convention and the "International Safety Guide for Oil Tankers and Terminals" (ISGOTT) that, prior to loading, the cargo tanks must be inerted in accordance with the guidance laid down in Chapter 9 of ISGOTT and the I.M.O. Publication "Inert Gas Systems" 1983 edition.

Unless vessel's cargo tanks have been inerted to the required standards, that is, not more than 8% oxygen content by volume, the terminal operators will not commence loading and any delays arising, until such time tanks are inerted to the required oxygen level, will be to vessel's own account, and Notice of Readiness will not be accepted.

Furthermore, it is also a requirement of Regulation 60 that the vessel is fitted with a Closed Ullaging System. The use of which, during loading, will ensure that the inert gas/hydrocarbon vapour mixture is expelled only through the venting system designed for the purpose, and not through the ullage/sighting ports or any other deck openings.

These requirements are necessary to comply with "SOLAS" requirements, and to protect the terminal facilities and Sirte Oil Co. require vessel to confirm that they will in fact be met by signing and stamping last page of the terminal booklet.

SPM Berths No. 5 and 6, (Crude Cargo): Forecastle Head Watchman: A watchman *must* be stationed on the forecastle-head at all times to report any failure of moorings. He should also report immediately if the vessel tends to "ride-up" to the buoy.

He should be equipped with the appropriate means to communicate with the Officer of the Watch.

INSPECTION/POLLUTION: *Arrival:* As soon as practicable after arrival and prior to acceptance, all of the vessel's tanks will be inspected for evidence of oil in ballast tanks. Inspection will continue during discharge of ballast. If evidence of oil appears at either of these inspections, the ship must return at once to sea and clean tanks, etc., in accordance with the procedures as laid down in the booklet entitled "Clean Seas Guide for Oil Tankers – The Operation of Load on Top" as issued by the International Chamber of Shipping – Oil Companies International Marine Forum.

Any vessel required to return to sea for the purpose of cleaning tanks or for any similar reason automatically nullifies any Notice of Readiness already tendered, and at the same time loses priority held for loading. On return from sea, vessel will be entered for loading at the time of the second arrival when a new Notice of Readiness will be tendered.

In addition to the lights usually displayed, vessels discharging ballast or loading cargo during darkness, will illuminate the area round the ship to the satisfaction of the Mooring Master in order that any oil on the surface of the sea may be readily detected and appropriate action taken. Vessels not having sufficient illumination will not berth if discharge of ballast continues after dark. Vessels having sufficient illumination will take precedence in berthing order. Vessels should provide suitable floodlights for working on deck during night operations, and should designate a responsible person to keep a continuous watch on hoses and moorings at all times during sea berth occupancy.

Loading Precautions: Masters are responsible to see that no oil (crude, bunker, diesel or bilge) is pumped or spilled overboard from their ships. Cargo hose should be inspected to ensure proper connection; drip pans should be in place, especially when disconnecting hose; scuppers should be plugged tight to contain possible spills; loading valves should be checked and tested to ensure proper operation and tight shut off;

unused cargo and bunker connections should be blanked off; stern discharge line, if any, should be closed and blanked off; all sea valves should be closed and lashed shut upon completion of deballasting; the ship should provide sufficient staff (a minimum of one officer and three other crew members are recommended) to ensure proper supervision of loading and topping off operations.

If, during first inspection or during progress of loading, it is revealed that ship's hull is not oil-tight, ship will be rejected and refused further loading. Ship will not later be accepted for loading unless satisfactory evidence, duly certified by Lloyd's or American Bureau of Shipping or other recognised survey agency, of effective repair is submitted.

Contamination of the Sea: In the event any vessel should discharge dirty ballast or spill oil in the vicinity of the Brega Terminal area, Sirte Oil Co. retains the right to take any action that may be necessary to clean up the contaminated area whether the contamination is upon the sea or the shore, or upon any structures or properties located in or upon the sea or upon the shore. In addition, Sirte Oil Co. shall have the right to settle any claims of third parties arising from such contamination. All costs and expenses incurred by Sirte Oil Co. to carry out the cleaning up of such contamination, or the settlement of third party claims, shall be borne by the vessel or by those owning the vessel at the time of the said contamination, and Sirte Oil Co. shall be entitled to reimbursement by said owners for any such cost and expenses.

FRESH WATER: No fresh water is available.

FUEL: No bunkers are available.

REPATRIATION: Crew members cannot pay off or leave the vessel at Marsa el Brega except in cases of emergency. Even in an emergency, it should be noted that Seamen's Books are not valid under the Libyan law. A valid passport is required, and with adequate notice by radio it is possible to obtain an exit visa for a crew member leaving in an emergency.

SAFETY: The vessel's personnel are responsible for the safety of the vessel and must take all necessary precautions, whether or not so advised by the Mooring Master, having in mind the hazards of the operation because of the product being loaded, weather conditions and any other circumstances requiring special care or caution.

While a vessel is moored, all the vessel's personnel and vessel's operations must comply with or be in accordance with the following Safety Rules:

(a) *Smoking is prohibited on the open decks of vessels. Smoking is permitted on board vessels only in enclosed spaces specifically assigned by the Master as Smoking Areas.*
(b) Before any loading commences all scuppers on the loading deck through which oil might escape overside must be tightly plugged and must be so maintained throughout the period the vessel remains within the limits of the harbour.
(c) The Master is responsible to see that oil from the vessel is neither spilled nor pumped into the water. At all times while loading cargo, all openings to the loading deck from crew, engine, galley and other dangerous areas shall be tightly closed.
(d) Boiler tubes are not to be blown. Every precaution must be taken so that sparks do not at any time escape from the funnel or stack.
(e) Ship's wireless is not to be operated while vessel is in the berth.
(f) Two hoses with spray nozzles to be laid out near manifolds and pressure maintained on fire mains at all times. Two suitable portable fire extinguishers (foam or dry powder) should also be available and bags of sand kept near manifold to contain any small oil spillage.
(g) Please note carefully that the Mooring Master is authorised to suspend operations in case any of the foregoing Safety Rules are not observed and in all cases where dangerous conditions or practices are deemed to exist.

Shore Alarm Signals:

Category 2 (Serious Incident): Three 2 second blasts of the District siren.

Category 3 (Major Disaster): A series of three Category 2 alarms.

Ships:

Fire: Six (6) or more short blasts, followed by a long blast repeated until shore contact, and continuous ringing of vessel's fire alarm system.

VHF Radio: *All* vessels to stand by Channel 16.

Fire or Explosion on Board Crude Vessel Berthed Offshore:

A. Responsible officer to man bridge, engines to be put on standby and crew to disconnect hoses as soon as possible.

B. Loading to be stopped on other vessels berthed offshore. Hoses to be disconnected and hung off, engines put on standby and crew standing by to vacate berth if necessary.

C. Vessels at anchor in the vicinity of the Brega Buoy to have engines on standby, with crews ready to heave up and put to sea if need arises.

Fire or Explosion on Board Ships in Inner Harbour:

A. Master to call Port Control on VHF Channel 16 with details.

B. Loading arms or hoses to be disconnected as soon as possible.

C. Loading or discharging to cease immediately on other vessels in harbour and offshore berths. Vessels to standby to vacate berths if necessary.

Fire extinguishers and hoses with nozzles capable of projecting a fine spray (fog) should be rigged in the vicinity of the loading/discharging manifold with fire mains pressurised at all times. (See 13.2.2.3 of I.O.T. & T.S.G., 2nd Edition).

Crude Oil Health Hazards (Hydrogen Sulphide Content)

A sour crude can be defined as one containing Hydrogen Sulphide (H_2S) within the range of 0.05 cu.ft. to 8.8 cu.ft. per 100 gallons or capable of generating atmospheric Hydrogen Sulphide concentrations of 5 to 1,000 p.p.m. Hydrogen Sulphide vapours in air are extremely toxic and the Maximum Allowable Concentrations (MAC) for personnel exposure throughout an eight hour day is 10 p.p.m. The gas is highly odorous and a particular hazard is its special effect of causing paralysis of the olfactory nerve, thus destroying the sense of smell.

Escape of Hydrogen Sulphide vapours from crude oil is relatively facile and due to a heavier than air effect (S.G. 1.19) may justify additional precautions under some atmospheric conditions.

The following medical effects on personnel exposed to Hydrogen Sulphide represent an indication of the degree of vigilance necessary to prevent or minimise exposure:

	Atmospheric Concentration Range	*Personnel Reaction*
(i)	50–100 p.p.m.	Slight irritation after exposure for 1 hour.
(ii)	200–300 p.p.m.	Marked irritation after exposure for 1 hour.
(iii)	500–700 p.p.m.	Loss of consciousness after exposure of 30–60 minutes.
(iv)	700–900 p.p.m.	Rapidly produces unconsciousness and death occurs a few minutes later.

The particular hazards introduced by the carriage of crudes containing Hydrogen Sulphide may be restricted by observing the following practices:

(1) Every opportunity should be taken to utilise closed loading facilities to discharge displaced gas remote from deck areas.
(2) During loading operations, where large volumes of gas are discharged to atmosphere, regular observations should be made of gas concentrations about the decks.
(3) Any persons engaged in sampling, gauging, sighting open cargo tanks or disconnecting cargo hoses, should work windward of the vapour source and should be kept under surveillance from a safe area.
(4) In the event of a person being rendered unconscious by vapours with high Hydrogen Sulphide content, urgent removal to a safe area and application of artificial respiration is of prime importance, followed by the early attention of a qualified medical practitioner.
(5) In respect of loading crude with a high Hydrogen Sulphide content, it is not necessary to take water dips after loading and ullages as indicated by "Whessoe" or other automatic gauges are acceptable on vessels fitted with this type of equipment. Cargo samples taken from the shore meter battery are acceptable.
(6) In respect of transporting crudes with a high Hydrogen Sulphide content, one day prior to arrival at the discharge port, the pressure/vacuum valves should be jacked open to allow gas concentrations to escape to atmosphere at the masthead; then prior to berthing those valves should be reset in the operating position.

The degree of sourness is normally indicated by the Hydrogen Sulphide content in p(arts) p(er) m(illion) *liquid measure.* The Hydrogen Sulphide contents of various types of sour crudes so defined are as follows:

Crude	*Hydrogen Sulphide (p.p.m. Liquid Measure)*
Agha Jari	20
Jambur/Bai Hassan	40
Kirkuk	40–70
Gach Saran	70
Brega	260
Qatar	200–300

The *Atmospheric* Hydrogen Sulphide concentration varies materially with atmospheric conditions. Particular caution should be exercised when petroleum vapours generally tend to concentrate about the decks. H_2S is readily detected with a MSA Toxic Gas Detector.

The precautions referrred to above should be carefully observed at all times.

MEDICAL: There are limited medical and dental facilities at Marsa el Brega. Personnel requiring urgent medical treatment may obtain it, but this will only be undertaken in serious cases. The cost of transport and treatment will be charged to the vessel. A form entitled "Charges for Ship Account" must be completed in quadruplicate and sent ashore with the person requiring treatment. This form can be obtained from the ship's Agent.

Masters of vessels arriving at Marsa el Brega who require medical treatment should give advance notice of their requirements by radio whenever possible.

REPAIRS: No repairs are allowed to ship's engines while vessels are moored in the berths. Ship's engines should be ready for use on short notice in case the vessel has to vacate the berth suddenly because of bad weather. There are no repair facilities for ships available at Brega.

SHORE LEAVE: Ship's personnel are not permitted ashore, nor on the wharves or jetties for any purpose whatsoever.

PORT REGULATIONS:

Cargo Vessels: Also see "Max. Size".

The following restrictions, conditions, rules and priorities shall be observed by Masters, Consignees and Agents of non-Sirte Oil Co. cargo vessels calling at Marsa el Brega and berthing at the Sirte Oil Co. cargo jetty.

1. The permission of the Operations General Manager must be obtained before a non-Sirte Oil Co. cargo vessel can discharge. The Operations General Manager also designates certain priorities which may change from time to time. Agents of cargo ships must keep in touch with Marine Superintendent who will advise them of the priority assigned to their vessel.

2. Maximum vessel draft 26 ft.

3. Maximum length overall 500 ft.

4. No repairs may be carried out to the propulsion machinery during the unloading operation and the ship must remain mobile and be ready to manoeuvre at all times.

5. Vessels must be equipped with their own unloading Gear.

6. Unloading must be from ship to truck and no marshalling arrangements can be made available inside the reserved area. The unloading operations must be completed rapidly.

7. Unloading operations may not be performed except during daylight hours as determined by the Marine Superintendent.

8. Loading trucks will be required to adhere strictly to Sirte Oil Co.'s safety rules, particularly while operating within the limits of the Industrial area.

9. Arrangements for the entrance and movement of the stevedoring personnel must be coordinated with Sirte Oil Co.'s Industrial Security Division. No housing or victualling will be provided for stevedoring personnel. All expenses, costs, remunerations and compensations associated with this activity will be borne directly by the company concerned.

10. The stevedores will be held responsible for cleaning up after completion of unloading.

11. No victual, water supply or bunkering service is available for vessels calling at Brega.

12. Advance notification must be given to Sirte Oil Co. Marine Division at least 10 days prior to arrival of vessel at Marsa el Brega. ETA of vessel to be notified 72 hours prior to arrival and confirmation and reconfirmation 48 hours and 24 hours respectively prior to arrival.

13. A system of priorities for cargo vessels entering Brega is in operation as follows: 1st – Sirte Oil Co. cargo, 2nd – N.O.C., 3rd – other vessels. This system will apply even though this requires interruption of operations of vessels already berthed.

14. Weather and sea conditions, particularly during the period December to April of each year, impose severe restrictions on the cargo pier usage. Among these restrictions are the discontinuation of unloading and the unberthing of the ships as a safeguard against ship and berth damage.

One hour's notice will be given to Masters should it be deemed necessary to vacate the berth due to bad weather.

15. Sirte Oil Co. shall not be held reponsible for any waiting period or delay (demurrage) related to the entry of cargo ships, nor be liable for any costs or compensation in that connection, regardless of the circumstances.

16. Sirte Oil Co. shall not be held liable for any loss, damage or injury that may occur to any property or persons whatever the cause thereof as long as they are related to or resulting from the use of the port. Such loss, damage or injury shall be the liability of the Master, Consignee or Agent irrespective of whether they are real or alleged. The above named shall also undertake to indemnify Sirte Oil Co. for any such losses and damages and to hold Sirte Oil Co. harmless from any liability that may arise as a result thereof.

17. All vessel movements will be subject to the control and direction of Sirte Oil Co. Marine Division Superintendent.

Tankers: Permission for overside painting is to be obtained through the Agent before painting can be started.

No repairs are allowed to ship's engines while vessel is moored in the berths. Ship's engines should be ready for use on short notice, in case the vessel has to vacate the berth suddenly because of bad weather.

Vessels should have sufficient ballast aboard for safe manoeuvring, but should not arrive excessively ballasted. The propeller should be submerged, and vessel trimmed not more than 2.43 m. by the stern.

Vessels not properly ballasted will not be berthed in turn, and will not have their Notice of Readiness accepted.

There are no facilities for the discharge of dirty ballast. *All Ships must arrive with clean Ballast.*

All tank lids must be closed and vented to the atmosphere via the agreed system.

WEATHER: *Meteorologic and Oceanographic Information:*

1. Sea conditions: Mid December to mid April, maximum wave height 25 ft. – 30 ft. Late April to early November wave height can reach 12 ft., particularly during afternoons, when winds can attain a velocity of up to 35 knots.
2. Wind direction and velocity: Late December to end of February wind direction mostly North-Westerly with a velocity of up to 75 knots. March to May wind direction varies with land/sea breeze effect with a velocity up to 15 – 35 knots. June to August mainly Northerly sea breezes. September to early November mainly light winds but with occasional gales and sand occurring. Maximum wind velocity 45 knots.
3. *Vessels should not remain at Anchor in bad weather.*
4. All berths in the inner harbour are adversely affected during periods of bad weather, particularly when the prevailing wind is from the North-West.
5. All vessels in the inner harbour are therefore required to be ready to proceed to sea, as directed by the Marine Superintendent or his representative, when adverse weather prevails or is expected. One hour's notice will be given to Masters, should it be deemed necessary to vacate the berth.
6. Masters of cargo/product vessels are cautioned that seaweed in suspension is present in the inner harbour area, and all precautions should be taken to avoid blockage of main engine intakes.

Weather:

Rain and thunderstorms	September – April
Sand storms	March – June
Fine with mostly little cloud	June – August.

Temperatures: May to October: Maximum temperature 120° F. Normal day temperature 95° F.

November to April: Minimum temperature 35° F. and maximum 85° F.

Humidity: Generally low during periods of maximum temperature.

GENERAL: *Provisions:* There are no fresh or dry provisions available at Marsa el Brega.

Mail: The Ship's Agency will handle all official and crew ship's mail.

Harbour Work: Dredging is in continual progress in the vicinity of the inner harbour. Vessels are cautioned not to enter the restricted area (B.A. Chart 3350) without the services of a Brega Pilot/Mooring Master.

All mooring lines to be fitted with adequate ratguards.

All berths in the inner harbour are adversely affected during periods of bad weather, particularly when the prevailing wind is from the North-West.

All vessels allocated berths in the inner harbour are therefore required to be ready to proceed to sea as directed by the Marine Superintendent or his representative when adverse weather prevails or is expected.

Smoking is strictly prohibited on board all tankers except in locations approved by the Masters of the vessels. No smoking on deck even if gas free.

Full power must be available for all manoeuvring to and from all berths. During deballasting and loading, vessels must maintain engines and propulsive machinery in readiness at all times to leave the berth on short notice.

No repairs are permitted which will delay or interfere with this contingency. Contravention of this ruling constitutes a serious safety hazard and will entail towage from the berth and possible delay to the vessel for which Sirte Oil Co. will accept no responsibility.

It is the responsibility of the vessel, before arriving, to see that ballast water is free of oil and to *discharge ballast water through ballast discharge lines* prior to arrival to ensure their cleanliness.

All tankers for sea berths must have port derrick ready for use.

Masters are warned that no contaminated ballast or bilge water may be discharged within Libyan territorial waters. It is the responsiblity of the vessel before arriving to ensure that ballast water is free of oil, and that all pipe-lines, sea suctions, strainers and pumps have been flushed clean of oil.

SHIPMASTER'S REPORT: August 1984.

Charts: British Admiralty 3354, 3350. French 5792.

Approach: Refinery buildings are radar identifiable at over 20 miles and the fairway buoy (Lat. 30° 27.55′ N., Long. 19° 35.1′ E.) at over 6 miles, also at about this distance it is possible to make out the shape of the harbour breakwaters on radar. The line of soundings is very sharp on the echosounder, and the 50 m. line 7 miles out when coming from the North was raised very easily.

Pilotage: Pilot boarded at the fairway buoy from a large tug (Dutch company contracted to the port). Vessels are not allowed to proceed into the restricted area 0.5 miles South of the fairway buoy without a Pilot. The area inside the restricted zone having several tanker SPM's and other obstructions.

The Pilot was immediately concerned about the vessel's air draft for berthing at the Urea Berth. After berthing I made a rough calculation and would say a vessel with a main deck air draft of over 38 ft./40 ft. would have great difficulty accommodating them. Our main deck air draft at the time was 31 ft. When asked the Pilot stated that the maximum departure draft was 29 ft.

To approach the berth vessels enter with 2 tugs (2,000 h.p.) fast on the starboard shoulder and quarter, berthing being port side alongside. When the breakwater has been rounded vessel is headed East until clear of the Fl. 5 sec. elbow buoy when the swing to starboard with engines and tugs is started (starboard anchor ready in case of emergency). Once vessel is swung until heading about S.W., tugs then push her alongside as near into the corner with the general cargo berth as she she will go, in our case about 8 m. (this is also to facilitate the after elevator being used to work No. 1 Hatch, on this vessel LOA 169.1 m.).

Survey/Loading: Shippers are National Petroleum Co. and all cargo survey work is done by Societe Generale de Surveillances S.A. The surveyor was very helpful. Stowage factor for treated urea is approximately 48/49.5 cu. ft. per ton. The loading rate stated was 400 tonnes p.h. although in actual fact we never achieved an average of more than 300 tonnes p.h. Treated urea is very hydroscopic, with the climatic conditions in Libya, it is impossible to load if the relative humidity is over 75%. This usually involved stopping in the evenings around 1800/1830 hrs. and restarting in the morning 0800/0830 hrs., although on one occasion we did manage to work all night.

The elevator is self-trimming and does a reasonable job, however, with the high stowage factor some hatches were filled but because of the restricted height of the elevator, it proved impossible to get the loading chute high enough to fill the coamings as we would have liked, and thus our intake per hatch was reduced.

Clearance/Customs formalities: Libyan Government have issued a statement that from 7th June, 1984, all incoming ships must have all ship's papers and documents translated into Arabic. This we managed to have done but only because of the length of stay in the previous port. In actual fact the Agent took no notice of these translations, they wanted their own forms filled in by the Master. The Customs Officials were very courteous. No alcohol is allowed, also all cameras had to be locked in the bond as El Brega is a restricted port because of the oil installations, and hence no shore leave. The main transmitter was also sealed.

SHIPMASTER'S REPORT: November 1987.

Vessel: 95,000 d.w.t. tanker.

We were advised by Charterers to inform Germa Shipping, Tripoli of our ETA and other relevant information. They in turn advised us that we should contact Shahat Shipping, Brega, but they were in fact already receiving all ETAs.

We were unable to contact the terminal until some 2 hours off as they were in the process of moving their VHF aerial. When re-sited, communications are likely to be much improved.

No information is passed by the terminal to the pilots until just prior to arrival of the vessel. It is therefore a good idea to send a 24 hour ETA to Sirte Oil Company (Telex No. 30120, 30121, 30122) who will pass messages to the pilots.

Samples were taken of all ballast tanks (even segregated ballast) for analysis ashore. If excess oil is found, vessel will be ordered off the berth for extra cleaning.

Maritime Declaration of Health not required. Pilot grants Pratique on boarding. Pilot also carries out safety and anti-pollution check lists.

Tug does not usually tow astern as an on/off shore breeze keeps the vessel clear of the buoy, however engines are to be kept on 10 minutes notice in order to give stern power.

After berthing, the Pilot gives papers to the Master, 2 of which have to be completed and signed. The remaining papers have to be signed and are taken away by the Agent. The ship's stamp is to be placed on all papers.

Libyan Discharge Certificate: It is essential that the discharge figures inserted at the discharge port are exactly the same as the Bill of Lading figures.

The Crew Declaration has to be transferred to a local form and signed by each crew member. If some of the crew members are too busy to sign this form and in order to avoid delays to the Customs, it is in order for the Master to sign on their behalf.

On departure, call Port Control and give time of departure, course, speed and destination.

A new SBM is being laid in a position 242° True × 1.04 nautical miles from the existing SBM.

AUTHORITY: Brega Marine, Sirte Oil Co., P.O.Box 385, Tripoli, Libya, S.P.L.A.J. *Tel:* 021-602052-56. *Telex:* 30120, 30121, 30122 Sirtco Ly, or 50657 Sirtco Ly. *Contact:* Marine Superintendent – Brega.

AGENCY: Universal Shipping Agency. Telex: 50635.
Shahat Agency. Telex: 50635 Shahat Ly.

Also see "General" before first port.

MISURATA (Qasr Ahmed): 32.22 N. 15.13 E.

(See Plan)

Also see "General" before first port.

GENERAL: The harbour is enclosed by 2 rubble mound breakwaters armoured by tetrapods. The North Breakwater extends 1,400 m. due East from Ras Zarrugh Lighthouse and East Breakwater extends 1,800 m. due North from the shore near the prominent radio station about 2 km. South of the Ras Zarrugh Lighthouse. There are lights on the breakwater roundhead. On the North Breakwater a green flashing light (0.3 secs.) every 3 secs. and on the Eastern Breakwater a red flashing light (0.3 secs.) every 3 secs. The Ras Zarrugh Lighthouse at the foot of the North Breakwater is a square tower with black and white vertical stripes. The structure is 8 m. high and is on the top of a 16 m. hill. The light is flashing white (0.5 secs.) every 5 secs. with a range of 8 miles.

On the South side of harbour there is Steel Mill Harbour which is under construction.

There is a radio mast 7.6 miles W.N.W. of Ras Zarrugh with fixed red flashing lights.

For Harbour Entrance there are guides, 2 fixed red lights and 1 green flashing light, bearing 273° N.W. from breakwater roundheads. The Harbour Entrance Channel is 150 m. wide and 12 m. deep.

Inside the entrance there is a turning circle, diameter 470 m., depth 12 m. and the harbour dredged area 920 m. × 200 m. to a depth of 11 m. leads due South alongside the berth. A 500 m. × 300 m. dredged area to a depth of 8 m. leads to the West alongside the North Breakwater.

Directions: Keep 2–3 miles offshore before turning due West for entrance.

Currents: Predominantly N.W. at mean rate of 0.5 to 0.75 knots but in Winter winds can reverse the flow and induce S.E. set in excess of 1 knot.

DOCUMENTS:

Maritime Declaration of Health (to be completed on arrival).
Crew List.
Passenger List (if any).
Ship's Stock.
Stores List.
Animals Aboard List.
Ship's Log.
Last Port Clearance.
Safety Certificate Certificate.
Construction Certificate.
Safety Equipment Certificate.
Load Line Certificate.
Radio Certificate.
International Oil Pollution Prevention Certificate.

Where possible Cargo Manifests and Stowage Plans should be forwarded by airmail to the local Agent, ahead of the vessel's arrival.

PILOTAGE: Compulsory, Pilot will board about 1 mile outside the port entrance.

ANCHORAGES: Bearing approximately 273° to lighthouse on Ras Zarrugh 13 m. depth 1 mile (2 km.) offshore but holding ground is poor and it is advisable to leave anchorage at signs of onset of bad weather.

RADIO: "Misurata Port Control" should be worked as early as possible.

VHF: A high powered base station operates at the top of a 16 m. hill at the foot of the lighthouse at Ras Zarrugh. A continuous watch is maintained round the clock on Channel 16. All other Authorities such as Harbour Master, Customs, etc., should be contacted through "Radio Misurata Port Control" on Channel 16. Channel 10 can be used inside the harbour.

TUGS: Join the vessel outside the Harbour Entrance. The tugs are m.t. "Sorman", m.t. Kiklah", each 565 b.h.p. and m.t. "Al-Keriat", 2,520 b.h.p.

BERTHING: There are 6 berths, totalling 1,120 m. of concrete quay dredged to 11 m. with timber and rubber fenders and bollards at 15 m. intervals, the quay deck is at an elevation of 2.25 m. The berths include a Ro/Ro facility at Berth No. 1.

CRANES: The following types of shore cranes are available and in the near future, a floating crane of 100 tons will be available. Capacity of cranes are 57, 45, 35 and 25 tons.

STEVEDORES: *Working Hours:* 0630 to 2400 hrs., even on holidays.

MEDICAL: Full hospital facilities are available without prior notice.

TANKERS: Tankers berth at Berth No. 28. Depth alongside 11.0 m.

FRESH WATER: Available alongside and by barge.

FUEL: Available.

CONSULS: Nearest consuls are at Tripoli.

REPAIRS: See "Tripoli".

REPATRIATION: Possible.

AIRPORT: Tripoli Airport situated about 220 km. from Misurata.

TIME: Local time GMT plus 1 hour from 1st day of October until 31st March, and GMT plus 2 hours from 1st day of April to 30th September.

HOLIDAYS: Fridays; 1st day of Lunar calander year; Idd-ul-Ahada, 4 days; Idd-ul-Zoha, 4 days; 2nd March; 8th March; 28th March; 11th June; 23rd July; 1st September; 7th October. Even on holidays cargo work continuously maintained.

POLICE/AMBULANCE/FIRE: Call Port Manager Tel: 21101 & 21094.

SERVICES: All kinds of food and soft drinks are available except alcoholic drinks and pork.

SHORE LEAVE: Allowed after Free Pratique, Customs and Immigration formalities completed.

DEVELOPMENTS: Grain silos are under construction.

Stage II (Berths No. 7 – 18) has already been started for 1 passenger berth, 4 general cargo berths, 4 container berths, 2 Ro/Ro berths and sheds, etc.

SHIPMASTER'S REPORT: December 1977.
Chart: British Admirality Chart No. 3353 "Ras Ashdir to Sirte".

A mole has been constructed from Ras Zorog in an East direction, the length of which is approximately 1,100 m.

A second mole extends from the shore in a Northerly direction, approximately 1,800 m. in length. Entrance to the harbour is between the outer ends of both moles.

Wharves and sheds are being built along three quarters of the length of the Northerly direction mole, and around the South part of the inner harbour perimeter. At the time of the visit by this vessel about 350 m. of quay was completed, with depth alongside of 11 m.

All the construction work appears to be done by Yugoslavian labour. The "Overseer" acted as Pilot and was a very able and pleasant person. All questions regarding cargo and fresh water, provisions, etc., were dealt with by him. He supplied 10 tons of fresh water by road tanker, and organised a visit from a ships' chandler for a small quantity of fresh salad and potatoes.

There are 2 small tugs which were used in berthing under the Pilot's direction. These were very necessary owing to a number of obstacles in the harbour (divers boats, pipes, etc.). The Pilot's knowledge of English was limited and it is most necessary for the ship's Master to judge his intentions carefully.

Without a doubt the Port of Misurata when open for commerce will be a very useful port, although a small port (inside harbour space was roughly estimated to be about 1,500 m. × 700 m.). The Pilot advised that it was expected to be opened about the middle of 1978.

The vessel anchored off the port entrance at 0800 hrs. and Pilot boarded at 1100 hrs., vessel berthed shortly afterwards. Discharge of 208 tons of construction material from No.1 hold commenced at 1330 hrs., and ceased at 2400 hrs. for the day. Work resumed at 0930 hrs. on the following day, and was completed at 1330 hrs. A mobile shore crane was used throughout for discharge into lorries.

All Agency work was attended to by our Tripoli Agent, who arrived onboard at 1700 on day of arrival. As Tripoli was our next port, he was most helpful in advising our berthing prospects at that port, and delivering ship's mail.

The entering and clearing formalities were attended to by 2 Customs Officers. They advised that there was strictly no shore leave for the crew. All accommodation was diligently searched including the Master's for alcohol, and none whatever was allowed to be in crew's possession. However when all was found to be in order, on request a small amount of bond stores was released for Christmas.

The vessel departed at 1600 hrs. for Tripoli where the Agent's estimate of 2 – 3 days waiting (although there were 50 ships at anchor) proved to be correct.

SHIPMASTER'S REPORT: March 1978.

Work is still in progress on the Southern Mole. More warehouses are to be erected there, also a grain silo. On the Western shore of the harbour more berths are to be constructed possibly for containers, but nothing finalised yet.

Misurata is to be principally a Ro/Ro port specialising in transit cargoes. A nearby motorway runs in a Southerly direction for 1,000 miles into Central Africa.

There will be facilities for conventional cargoes. Dredging is in progress in the Western part of the harbour in preparation for the new berths. The area is being marked by red marker buoys. The port is scheduled to open in June/July this year and to date there are no services excepting Customs who attend to all the Entering and Clearing formalities. All pilotage being performed by the Master, the contractors work boats will act as tugs if requested.

Documentation is similar to requirements for other Libyan ports also the same strictness regarding alcohol. All Officers and Ratings were allowed to retain a small quantity of beer, all other alcoholic drinks being placed under Seal.

SHIPMASTER'S REPORT: February 1988.
Chart: B.A. Chart No. 3353.
Documents:

8 copies Crew List.
2 copies Crew Declaration (on Libyan forms).
2 copies Manifest.

1 copy Health Declaration.
2 copies Currency Declaration (on Libyan forms).
All Passports.
1 copy Arms and Ammunition List.
1 copy Drugs List.
2 copies Cargo Manifest.

Cameras placed under seal. No cigarette issue allowed. Bond remains sealed if proceeding to another Libyan port. Definitely no alcohol. Customs would not allow beer issue. Ship's Certificates to be in Arabic. Passports exchanged for Landing Cards at the gate. All stores checked for signs of South African and Israeli produce.

Approaches: The name Qasr Ahmed is not used. All local people use the name Misurata and all Libyan Customs and cargo documents refer to Misurata.

The harbour area and power stations (32° 20′ N., 15° 13.5′ E.) were identified on the radar at 24 miles.

There are two harbours, the older general cargo and tanker port of Misurata and the recently constructed Steel Harbour which is about one mile to the South.

On approach, the power station chimneys and the gantry crane on the new Steel Harbour breakwater and the grain silo at Misurata are visible. At night, the flashing red lights on the power station chimneys and the horizontal red flashing lights between the chimneys are very conspicuous.

There are 2 sets of antenna dishes (32° 21.25′ N., 15° 13.3′ E.) just South of Misurata Harbour which are conspicuous.

Anchorage: Vessels may anchor anywhere off the breakwaters but not within 2 miles of the port. Anchorage exposed to heavy swells.

Channel: The leading line to Misurata Harbour is 270° and is indicated by leading marks/lights (red and white horizontal, inverted triangles and a front light exhibiting flash green every 5 seconds and the rear green light flashing green every 12 seconds). The front daymark is barely visible.

The Fairway Buoy has been removed.

The Pilot advises that the depth at the tanker berth is 38 ft. and eventually all the harbour will be the same depth. The maximum draft permitted at the tanker berth is 36 ft. and this was confirmed by the echo sounder.

2 sets of buoys and a Fairway Buoy in position 32° 30.9′ N., 15° 19.0′ E. mark the channel to the Steel Harbour. The leading light is 263°. There are no leading marks or lights visible. The Channel depth is believed to be 50 ft. and this was confirmed in part by echo soundings. The channel width is approximately 200 m.

Pilotage: The Pilot boards outside Misurata Harbour entrance from a small grey tug. Pilot normally boards between 0800 hrs. and 2000 hrs. Normally there are no movements on Friday.

Tugs: There are 2 tugs available, the larger tug being approximately 2,000 h.p.

VHF: On arrival, vessels should call Misurata Port Control on Channel 16, working Channel 12. On approach all the usual details are required (see "Tripoli – Shipmaster's Report" dated March 1988). Misurata Port Control on Telex No. 90130221 PORTMSLY.

Harbour: The harbour is being extended beyond the existing breakwaters. New berths are under construction to the West of the existing Eastern breakwater berths.

The new oil terminal in position 13° 22.3′ N., 15° 13.2′ E. is capable of taking product tankers up to about 30,000 d.w.t.

All charted buoys inside the harbour have been removed.

The new Steel Harbour appears to be completed and has conveyors which are adjacent to the steel mills and one gantry type grab crane.

Within the Steel Harbour there is a service harbour with control tower.

Tanker Berth: The tanker berth is on the N.W. corner of Misurata Harbour. Vessels berth port side alongside.

The newly constructed concrete berth is a pier with outlying mooring dolphins each end, which are connected to the pier by steel walkways. The mooring points and fendering are very good.

This berth handles product imports for the local area including the steel mills and the power station. The products are LPG for cooking and heating fuel, jet fuel/Avgas, gas oil and fuel oil.

At the present time, there are no bunker or fresh water facilities, however, we understand that IFO and gas oil and fresh water pipelines are to be laid to the pier.

The gangway was easily landed.

Moorings: The moorings consisted of 2 head/stern lines, 1 breast line and 2 springs at each end. The starboard anchor with one shackle in the water was used for approaching the berth and a mooring boat assists with running lines.

Cargo: LPG is handled by a 6 in. Chicksan arm with clamps, the shore required a 6 in. spool. The pipeline is 8 in. diameter and runs a distance of 5.3 km. to 5 spheres with a total capacity of 8,000 cu.m.

The terminal requires cargo at 0°C. Max. pressure 8 kg./sq.m. Maximum pumping rate 145 cu.m./h. The shoreline relief valves are set at 16 kg./sq.m. and the maximum pressure in the shore tanks is 7 kg./sq.m. The average discharge is 68 t.p.h.

There was no surveyor in attendance and no shore calculations made. The Receivers, "Breganaft" checked the ullages.

The pipeline was hot gassed for 45 minutes.

Gas oil and Avgas are handled through 2×10 in. Chicksans and fuel oil is handled through 1×12 in. Chicksan.

Fresh Water: Fresh water is available by barge and should be ordered well in advance. While we were in port the barge was moored astern of us at the Port Authority Jetty. The capacity of the barge is 200 tonnes. It will also take water to vessels at anchor in calm weather.

Customs: Customs authorities make a very thorough search of the vessel.

Shore Leave: Not permitted.

General: Friday is a holiday so there is very little movement on that day.

AUTHORITY: Port of Misurata, P.O.Box 18218, Misurata, Libya. *Tel:* (051) 24457, 29428. *Telex:* 30221 Port Ms Ly. *FAX:* (051) 22492. *Contact:* The General Manager.

RAS LANUF: 30.31 N. 18.35 E. (See Plan)

(A) VEBA OIL OPERATIONS (V.O.O.)
(B) RAS LANUF OIL & GAS PROCESSING CO. INC. (RASCO)

(A) VEBA OIL OPERATIONS (V.O.O.)

Also see "General" before first port.

DOCUMENTS: Customs will require:
4 Crew Lists.
1 Crew Declaration of personal belongings (including cigarettes, etc.)
2 Stores Lists.
1 Passenger List.

Crew Lists and Crew Declaration of personal belongings must be on the approved Libyan Government Documents. Vessels are advised on their initial visit to the port to obtain sufficient forms for future visits. Also required are:
6 Copies of Cargo Manifest for Ras Lanuf Discharge.
1 Copy of Cargo Manifest for transit cargo with a summary.
1 Copy of Passenger Manifest.

A copy of a Certificate of Discharge of the last cargo loaded at a Libyan port is required. Said Certificate to be duly signed and stamped by Customs Authorities at the discharge port. Blank forms will be delivered with the cargo documents.

Clearance from the last port of call will be required by the Government authorities. The police will require 4 copies of a Crew List and a Passenger Manifest if any passengers on board.

PILOTAGE: It is most important that ships establish communications with the terminal not less than 72 hours prior to arrival, giving estimated time of arrival. Further ETA signals should be sent when the vessel is 24 hours, 12 hours and 4 hours distant or any time a change of 1 hour in original ETA occurs. These messages should state specifically whether ETA is given in GMT or local time. The 72 hour signal should include the following: ETA, last port of call, if any sickness on board and if vessel has clean bill of health. Cargo quantity and grades expected to be lifted in net long tons at 60°F. The 12 hour signal should include definite indication as to whether the vessel is ready to load or not and should also include information on the time she will require to discharge ballast after arrival. Precise time of arrival should be given when the ship is 4 hours distant from the terminal.

Vessels to be moored at Ras Lanuf will be boarded by Mooring Master in the close vicinity of the suggested anchorage area mentioned below. The Mooring Master will advise the Ship's Master on approaches to berths, mooring, unmooring, connecting and disconnecting the hoses and in all operations within the mooring area.

NAVIGATION AIDS:

Seabuoy, red with white quick flash is located in approximately Lat. 30° 32.8′ N., Long. 18° 34.9′ E. Vessels in the vicinity should not navigate or anchor inshore of a bearing 120° – 270° running through this Light Vessel position.

A Fairway Channel Entrance Buoy flashing white every 2 secs. is located in a position approximately 30° 30′ 46″ N., 18° 37′ 44″ E.

A Channel Buoy flashing red every 5 secs. is located in a position approximately Lat. 30° 30′ 17″ N., Long. 18° 36′ 16″ E.

North Breakwater Light with occulting light green 2 every 10 secs. is located in a position approximately 30° 30′ 38″ N., 18° 35′ 43″ E.

East Breakwater Light with occulting light 2 red every 10 secs. is located in a position approximately 30° 30′ 29″ N., 18° 35′ 24″ E.

A Rear Range Light with a fixed white light is located in a position approximately Lat. 30° 30′ 56″ N., Long. 18° 34′ 09″ E.

A Front Range Light with a fixed white light is located in a position approximately Lat. 30° 30′ 54″ N., Long. 18° 34′ 17″ E.

An Unlit Spar Target Buoy, colour white is located in a position approximately Lat. 30° 31′ 20″ N., Long. 18° 35′ 21″ E.

An Unlit Spar Target Buoy, colour white is located in a position approximately Lat. 30° 31′ 12″ N., Long. 18° 35′ 35″ E.

The Mooring Area has been swept to a depth of 73 ft. in Berth Nos. 1, 2 and 3, at the SPM to a depth of 96 ft.

There are very few coastal landmarks in this area. The following should prove helpful to visiting mariners:

The Terminal Water Tower with highest elevation of 179 ft. 6 in. above sea level is located in Lat. 30° 30′ 42″ N., Long. 18° 32′ 22″ E. It is coloured white. A white light (characteristics: flash 0.2 secs., eclipse 1.05 secs., flash 0.2 secs., eclipse 3.55 secs.) is mounted on the seaward side of the structure at 163 ft. above sea level. There is also a fixed red warning light on top of the tower.

Large oil storage tanks with highest elevation 376 ft. above sea level are located in approximately Lat. 30° 27′ 24″ N., Long. 18° 29′ 58″ E. They are coloured white.

ANCHORAGE: Suggested anchorage area is within a 3,000 ft. radius of position Lat. 30° 33.5′ N., Long. 18° 36′ E. in approximately 90 ft.

MAX. SIZE: Conventional berths: Up to 56 ft. draft; up to 130,000 d.w.t.
Single Point Mooring: Up to 75 ft. draft, up to 265,000 d.w.t.

HEALTH: By day – fly flag "Q" and by night display red light over white light for Quarantine Service.

Libyan Customs, Federal Police and Immigration Officials will board the vessel as soon as possible after arrival to give inward clearance and "Pratique" services. Libyan Government Regulations are strictly enforced. The vessel should have a clean Bill of Health or equivalent document from the last port of call.

RADIO: Direct communication by radio between ship and shore is by VHF International Maritime Mobile Radio-telephone Service to Ras Lanuf Oil Movements Control Centre. All communication between ship and terminal should be by way of this station. ETA messages to Veba Oil Operations, Tripoli, Libya, via Tripoli Radio (call sign 5AT). Ras Lanuf Oil Movements Control Centre keeps continuous watch on VHF Radio telephone Channel 16 (156.80 mHz), Channel 14 (156.70 mHz) an

Channel 11 (156.55 mHz). Vessels approaching the port should make contact on Channel 16 when shore will request her to switch to Channel 14. This Channel will also be used by terminal Marine Section for internal use and tanker mooring control. Channel 11 is reserved for communications between ships in mooring and Terminal Oil Movements Control Centre and should only be used for general purposes after obtaining clearance from Oil Movements Control on Channel 16. This is a safety measure since oil flow to ships is controlled through Channel 11 and therefore it must be clear at all times in case of need to stop oil flow for any cause. Channel 16 is for calling and safety use only.

TUGS: 2×730 h.p. The company maintains launches (3×360 h.p.) to assist in mooring and unmooring vessels. These are under the direct supervision and control of the Mooring Master.

BERTHING: There are 4 submarine loading pipe-lines which terminate in the following approximate positions which are each marked by an unlit white spar buoy.

Berth No. 1: Lat. 30° 31′ 35″ N., Long. 18° 34′ 37″ E., from which a submarine pipe-line runs to shore on a bearing of approximately 224°. Depth of water at spar buoy 70 ft.

Berth No. 2: Lat. 30° 31′ 55″ N., Long. 18° 33′ 58″ E., from which a submarine pipe-line runs to shore on a bearing approximately 197°. Depth of water at spar buoy 70 ft.

Berth No. 3: Lat. 30° 32′ 18″ N., Long. 18° 33′ 19″ E., from which a submarine pipe-line runs to shore on a bearing of approximately 198°. Depth of water at spar buoy 73 ft.

Berth No. 4: Lat. 30° 31′ 50″ N., Long. 18° 36′ 06″ E. – a Single Point Mooring buoy in 96 ft. of water.

Raising, lowering, connecting and disconnecting of submarine hoses, as well as all other labours and duties on shipboard, will be performed by the ship's crew under direction of the Mooring Master.

LIFTING HOSES: After the vessel is securely moored the submarine hose will be hoisted on the port side. Berths No. 1, 2 and 3 are each equipped with 2×12 in. loading hoses, the weight being approximately 5 long tons. Berth No. 4 (SPM) is equipped with 2×16 in. loading hoses the weight being approximately 5.75 long tons. Therefore, all lifting equipment and tackle should have a safe working load of at least 6 long tons. Hoses are lifted by ship's gear and crew, and all connecting of hoses will be done by them. The lifting derrick, equipment. tackle, etc., should be topped off and ready on arrival.

MEDICAL: No medical services (except in case of emergency and subject to a doctor being available) or other services are to be expected at Ras Lanuf.

BALLAST: Positively no provision is made for dirty ballast. Any ship arriving with dirty ballast will be rejected and all costs accruing therefrom will be to the ship's account. Notice of Readiness shall not be accepted until vessel returns with clean ballast and tanks fit to receive cargo. She will on second arrival tender a new Notice of Readiness to load.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: The only consulates are located in Tripoli which is 670 km. by road from Ras Lanuf.

REPAIRS: When a ship is in the moorings or vicinity, its engines must remain on standby with full power for immediate use. Deck machinery shall be kept in instant readiness. *Positively no repairs of any sort will be permitted in the moorings.*

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wines, beers, perfume, arms, ammunition, saccharine and possibly other items have to be locked up under Customs seal from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed 25 cigarettes per day of stay or 25 grams of tobacco or cigars in lieu. Each man allowed 1 litre of beer or half litre of wine per day. Special allowances are made for Master under special circumstances.

REPATRIATION: Crew members cannot pay off or leave the vessel at Ras Lanuf except in cases of extreme emergency. Even in an emergency it should be noted that Seamen's Books are not valid under the Libyan law. A valid passport is required.

TIME: Libyan local time is GMT plus 2 hours (1st April to 30th September) and GMT plus 1 hour (1st October to 31st March).

SHORE LEAVE: Not allowed.

GENERAL: No stores, foodstuffs or goods whatsoever of Israeli origin may be on board any ship calling at Ras Lanuf.

Penalties: Fine, confiscation of goods and possibly more. The Libyan Government strictly enforces this law.

Whilst arriving fly the Libyan Ensign (plain green).

Due to the existence in these waters of the fish commonly called "Weaver" fish, ship's crew are urged to exercise extreme caution in fishing whilst lying off the port area. There have been several cases of poisoning by these fish, all of which were distressingly painful, caused by contact with the fins.

AUTHORITY: Veba Oil Operations (V.O.O.) – Ras Lanuf (V40), P.O.Box 404, Tripoli, S.P.L.A.J. *Tel:* Tripoli 30081 (ext. 4116). *Telex:* 20260. *Cables:* Pegasus Tripolilibya. *Contact:* Captain B. Michels – Ras Lanuf Marine Office.

AGENCY: See "General" before first port.

(B) RAS LANUF OIL AND GAS PROCESSING CO. INC. (RASCO)

PORT LIMITS: Southward of area bound by Latitude 30° 32.7′ N. and between Longitudes 18° 34′ E. and 18° 39′ E.

DOCUMENTS: 4 copies of Crew List on approved Libyan government document. (Vessels are advised to obtain sufficient forms for future visits during their stay).

1 copy of Personal Effects including cigarettes, etc.
2 Lists of Stores.
1 List of Passengers.
6 copies of Cargo Manifest for cargo to be discharged at Ras Lanuf Harbour.
1 copy of Cargo Manifest for cargo in transit.
1 copy of Certificate of Discharge (of the last cargo) at Libyan port duly signed and stamped by the Customs Authority at the discharge port. Blank forms will be delivered with the cargo documents. If not done on board the Ship's Purser should make request for them to be provided.

Clearance from the last port of call is required by the Government Authority.

4 copies of Crew List and the Passenger Manifest are required by the Police.

PILOTAGE: Ras Lanuf Harbour (RASCO) should be advised by telex (Telex: Ras Lanuf 50618, 50650 – Rasco Ly). Cable: Rasco, Ras Lanuf (Telephone via Tripoli 49994-99: via Benghazi 86744-48) at least 72 hours in advance, the ETA at RASCO Anchorage. It should be constantly updated/confirmed when 24 hours, 12 hours, and 4 hours distant. If more than 1 hour change in ETA occurs, the new ETA must be given. Clear specification should be made if ETA is in GMT or local Libyan time. The information in the ETA cables should be completed as per the terms of the charter party. The 72 hours message must include the ETA, last port of call, if any sickness on board, and if vessel has clean Bill of Health and cargo quantity expected to be lifted in net metric tons at 60°F (15.6°C). The 12 hour message should include definite indication as to the vessel being ready to load or not and should also include information on the time she will require to discharge ballast after arrival. Precise time of arrival should be given when ship is 4 hours distant from the terminal. On arrival at the anchorage, the vessel must contact RASCO Port Control on VHF Channel 16 to register herself.

Also see "Anchorage".

ANCHORAGE: Vessels to be secured alongside will be boarded by the Pilot in the anchorage or in its vicinity. The vessel should not manoeuvre or navigate in the vicinity of any sea buoys but should make directly for the anchorage which is a circle of diameter 1 nautical mile with centre in position Lat. 30° 32′ N., Long. 18° 38.09′ E., in more than 30 m. of water. For shallower draft vessels it is permissible to anchor due Southward as close as possible to this position, in an adequate and safe depth, Northward of the Fairway Buoy (position: Lat. 30° 30.6′ N., Long. 18° 37.7′ E.), leaving seaway free for approaching and manoeuvring. If need be vessels may anchor in safe waters Eastward of this anchoring area. Anchoring Westward of this area is prohibited.

MAX. SIZE:

(a) Tankers 3,000 – 50,000 d.w.t. will be catered for on finger jetties 1A and 1B which have a dredged depth of 14.0 m. Tankers 3,000 – 30,000 d.w.t. will be catered for on Berths 2A and 2B which have a dredged depth of 12.5 m. and Berths 3A, and 3B which have a dredged depth of 11.5 m. The quay wharf has a dredged depth of 11.5 m., on which 3 dry cargo ships of 5,000 – 20,000 d.w.t. can be berthed at one time. The quay wharf is 672 m. in length with a 35 ton multi-purpose crane to be installed and able to run the entire length of quay wall. Caustic soda discharging facilities are also available on the wharf, but the LOA of the vessel is limited as the distance between the ship's manifold and the extreme part of the vessels' stern should not be more than 48 m.

(b) *Max. Size:*

Jetty 1-A, 1-B:	
Max. LOA	250 m.
D.wt.	50,000 tons
Max. Draft	12.5 m.
Jetty 2-A, 2-B:	
Max. LOA	189 m.
D.wt.	30,000 tons
Max. Draft	10.5 m.
Jetty 3-A, 3-B:	
Max. LOA	189 m.
D.wt.	30,000 tons
Max. Draft	9.5 m.
Quay Wharf:	
Max. LOA	177 m.
D.wt.	20,000 tons
Max. Draft	9.5 m.

(c) Hooks have been provided on dolphins which are of 100 tons capacity. All bollards on the quay wharf fitted on the finger jetties are of 100 tons capacity. Other bollards are of 50 tons capacity.

HEALTH: For quarantine services:

(a) By day: Flag "Q" (yellow flag).
(b) By night: Red light over white light.
(c) Libyan Customs and Immigration Officials will board the vessel as soon as possible after arrival to give inward clearance and Pratique services. Libyan government restrictions are strictly enforced. The vessel should have a clean Bill of Health or equivalent document from the last port of call.

RADIO/VHF: Direct communication between ship and shore will be made by VHF. RASCO Communication Centre maintains a continuous VHF watch on VHF channels. On approaching, vessels should make contact on VHF Channel 16 when they will be requested to switch over to another channel. ETA messages can presently be received only on telex (see "Pilotage"). When 4 hours distant arrival messages are to be passed on VHF in addition. VHF Simplex Channels allotted to this harbour are 10 and 12. The Duplex Channel allotted is 22. Vessels must confine themselves to the channel ordered by Port Communications.

RADAR: There is no radar in operation.

TUGS: The harbour will maintain 2 coastal tugs (approx. 2,000 h.p. each) with anti-pollution and fire-fighting capabilities, 2 dual purpose launches and 3 mooring launches, when the harbour is fully operational. Vessels are, however, presently berthed by hiring of tugs.

BERTHING: There are presently 6 finger jetties and a quay wharf (see "Max. Size"). Berthing will be done at the instructions of the Pilot who will board at the anchorage or in the vicinity. Vessels are to have their berthing gear in readiness well before berthing. 2 good lines forward and 2 lines aft will be required for passing to the tugs. Vessels must keep their fire-fighting and emergency system in operational readiness for their own use.

Hoses and Fuel Connections: No dirty ballast facilities at present.
All work on the ship is to be carried out by harbour staff.

BERTHING: Arrangement of Facilities at Quay Wharf and Finger Jetties

Quay (Import)	Methanol	4,000	10:	—	10 in./8 in., 10 in.* ASA 150 lbs.	–/650	—	Crane facility presently not available.

* Other sized spools are provided.
** Jetties assigned for cryogenic products (Ethylene, Propylene, Butadine (C4)) now in operation. Vessels should arrive ready to load – cooled down with cargo vapour in vessels's tanks similar to the cargo to be loaded.

MEDICAL: Medical service can be provided in the event of an emergency. For an emergency having occurred at sea the terminal should be informed by quickest means. The patient should be kept ready for evacuation with his gear, CDC, Passport and one person in attendance.

There are limited hospital and dental facilities available at a distance of about 30 km. from the harbour. During working hours, at a distance of about 3 km. medical facilities are available.

BALLAST: Presently there are no facilities to handle dirty ballast. Any ship arriving with dirty ballast will be rejected and all costs accruing therefrom will be to the ship's account. Notice of Readiness shall not be accepted until vessel returns with clean ballast and tanks fit to receive cargo. She will have to tender a fresh Notice of Readiness to load on the second arrival. Tank cleaning and gas freeing alongside will not be permitted under any circumstances.

DENSITY: 1027.

FRESH WATER: Not available.

FUEL: Not available.

FIRE PRECAUTIONS: Fire precautions are strictly enforced. Any laxity on this account will cause stoppage of operations.

CONSULS: Consulates are located at Tripoli 670 km. away by road from Ras Lanuf.

REPAIRS: When the ship is berthed, its engines must remain on standby with full power for immediate use. No repairs of any kind will be permitted when alongside.

SURVEYORS: No facility for surveying will be provided by the terminal.

GANGWAY/DECK WATCHMAN: Vessels are to employ their own watchman on the gangway.

HATCHES: Where hatches are required to be opened, the crew will be required to open them.

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wines, beers, perfumes, arms, ammunition, saccharine and other items have to be locked up under Custom's seal from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed 25 cigarettes per day of stay or 25 grams of tobacco or cigars in lieu. Liquor is not allowed to be possessed or consumed by any member of the crew.

CARGO GEAR: The vessel's cargo gear is to be ready in all respects. The cargo gear may be augmented from shore. The Notice of Readiness will not be considered valid if cargo gear is not ready for instant use.

REPATRIATION: Crew cannot sign-off except in the event of extreme emergency. Even in an emergency it should be noted that Seaman's Book (CDC) are not a valid document under Libyan law. A valid Passport is needed.

TIME: Libyan time is GMT plus 2 hours (1st April to 30th September) and GMT plus 1 hour (1st October to 31st March).

AIRPORT: Although the nearest airport is about 10 km. from the terminal the flight schedules are irregular, and are operated by private airlines. Regular flights operate from Tripoli 670 km. and Benghazi 375 km. by road.

HOLIDAYS: Notice of Readiness will be accepted and cargo work will be carried out on holidays. Fridays are weekly holidays.

POLICE/AMBULANCE/FIRE: In the event of an emergency, the Duty Loading Supervisor on the berth is to be contacted.
EMERGENCY CO-ORDINATION: Call Duty Loading Supervisor.
TELEPHONES: At present no facility exists for making a local call or international telephone calls from the vessel. Telex facility is available if arranged with the agent.
SERVICES: No special service is available.
BANKS: No banking or exchange facilities are available.
STORING: No storing facilities are available.
SHORE LEAVE: Not allowed.
GARBAGE DISPOSAL: Not available.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: Libyan Dinar 1.0 = U.S.$ 3.60.
GENERAL: (a) No stores, foodstuffs or goods of Israeli or South African origin may be on board any ship calling at Ras Lanuf. Penalties are fines, confiscation of goods and possibly more. The Libyan government strictly enforces this law. (b) On arrival fly Libyan ensign: plain green flag. (c) Once the ship is berthed, there is likely to be no delay in commencement of operations.
DEVELOPMENTS: The port is under development and more information, if needed, is obtainable from the Loading Supervisor on duty.

SHIPMASTER'S REPORT: October 1987 (Updated 1992).
Documents:
5 copies Crew List.
2 copies Crew Declaration.
2 copies Manifest.
1 copy Health Declaration.
1 copy Currency List.
2 copies Arms and Ammunition list.
2 copies Drugs List.

All alcohol is placed in bond and seals are checked during vessels stay. Vessels should not have on board any produce from Israel or South Africa.

This was the vessel's first call and Arabic documentation was not required.

Certificate of Discharge of previous Libyan cargo is required.

The figures for the bond are required in bottles and not litres or weight. For first Libyan call the Master is to make a declaration that the vessel has not called before and that a Negative Certificate of Discharge is held.

Charts: BA. Chart No. 3343 and 3354.

Approaches: Vessels are to approach and report to Libyan coastal station on reaching position Lat. 32° 30′ N., Long. 18° 30′ E.

On approach we used Benghazi Radio (5AB) on M/F-R/T (The ship does not have W/T). Service was clear and prompt.

The first radar target sited was the tanks at Es Sider (Lat. 30° 37′ N., Long. 18° 17′ E.). These tanks were sighted at 80 miles.

The wreck in position (Lat. 30° 49′ N., Long. 18° 05′ E.) was conspicuous at 29 miles.

Anchored vessels at Es Sider and Ras Lanuf also make a good target. Ras Lanuf RASCO Harbour was picked up at 24 miles.

An ETA was sent to RASCO and Benghazi Radio 4 hours before arrival.

Anchorage: The anchorage is that indicated on the BA. Chart No. 3343 (Lat. 30° 32′ N., Long. 18° 38.09′ E.)

If vessels have to wait for departure documents and are required to vacate the berth they anchor 0.5 miles east of the main breakwater.

Pilotage: Pilots for RASCO Harbour are available 24 hours. There are no night restrictions.

The Pilot boards from a tug near the Sea Buoy and on departure the pilot leaves just inside the breakwater heads.

VHF: Channel 10 is used for communicating with the Pilots. RASCO Port Control on Channel 16 after which communications are on either Channel 12 or Channel 22. Port Control normally gives 1 hours notice for raising anchor and berthing.

Tugs: At the present time there are 3 tugs in operation in RASCO Harbour. 1 × 3,000 h.p., 1 × 2,500 h.p. and 1 × 500 h.p.. Ship's lines are used to the large tug. The small tug pushes alongside.

Berthing: Vessels normally berth head out at all berths, port side to. However, if vessels manifold is in an awkward position vessel can berth starboard side to. The depths are as charted on BA. Chart No. 3343. Pilots report the maximum Winter draft at Gas Berths No. 3A and 3B as being 9.5 m. In Summer a slightly increased draft is allowed.

The very large breakwaters afford the vessel good shelter.

Gas carriers berth at the innermost berths - Berth 3A and 3B. Berth 3A handling propylene and butadine (C4) and Berth No. 3B handles ethylene and straight LPG.

Moorings consist of 2 head/stern lines, 1 breast line and 2 springs fore and aft. The finger piers are well fendered. Ship's gangway used. A mooring boat assists with running the ship's lines.

Berths 1A, 1B, 2A and 2B are for products.

Cargo: Vessel loaded propylene at Berth No. 3A. Largest vessel handled to date was 30,000 cu.m., which was a full load of propylene. The average sized vessel handled is 4,000 cu.m.

Export of ethylene and propylene commenced in May 1987 and C4 shortly thereafter. LPG production is to start in the near future. The plant which is immediately behind the general cargo berth produces 1,000 tonnes of ethylene, 500 tonnes of propylene and 300 tonnes of C4 per day.

At Berth No. 3A the propylene Chicksans are 8 in., 300 ASA for liquid and vapour. The maximum pressure on the liquid line is 5 kg./sq.cm. and on the vapour return line 1.2 Kg./sq.cm. Connection is by hydraulic clamps and shore reducers are provided.

Maximum propylene loading rate is 450 tonnes per hour.

The supply line is 3 km. in length and this causes a warm initial "slug". The coldest temperature achieved was −45°C for propylene (Terminal written advice), we got down to −44°C. There is no recirculation line. The pier staff who were mainly Yugoslavians were very co-operative. The SGS/Redwood Surveyor was from Belgium.

There is no nitrogen for purging at the present time as the plant uses the total supply capacity. It is believed that additional nitrogen production is planned.

Fresh Water: Not available.

Agent: We used Universal Tripoli who are the Government Agent. The local representative will have his own telex by November, telex number will be 50608 Uniship. We used the plant telephone to contact the agent, number being 3331/3332.

General: There is a general cargo quay called "Marginal Quay" inside of Berths No. 3A and 3B. The quay is well fendered and has a large flat quayside.

The LPG plant is immediatley behind with tanks to the South and 2 conspicuous flares in positions Lat. 30° 28.35′ N., Long. 18° 34.95′ E. and Lat. 30° 29.40′ N., Long. 18° 34.30′ E.

The breakwater lights are flashing (not occulting).

Further expansion is taking place to the South of the harbour in position Lat. 29° 12′ N., Long. 18° 35.5′ E.

No services are available at RASCO.

No alcohol is allowed in cabins. Everything is to be placed in bond. Customs check the seals at odd times.

We were advised that regular traders are sometimes made a special concession and are allowed beer and wine but only after arrival.

Positively no South African or Israeli produce to be on board. Large fines are imposed for contravention.

Ship's Certificates should be in Arabic for regular traders. However this is not necessary for the first call.

The Discharge Certificate is to be endorsed by the Customs at the port of discharge. Two copies are to be mailed to Libya and one copy is to be retained on board for the vessels next visit to Libya.

Passes are required if crew members wish to travel in the area. These are frequently and carefully checked.

AUTHORITY: Owners of the harbour: The Ras Lanuf Oil & Gas Processing Co. Inc., Ras Lanuf, Libya.

Also see "General" before first port.

PORT LIMITS: The complete water area existing within Tobruk Bay or that water area existing to the West of an imaginary line commencing as from Tobruk Peninsula up to the coast to the South.

It is formed by 3 areas inside the Bay, namely Marsa Tobruk, the proposed naval base and Marsa Al-Hariga Oil Terminal.
ANCHORAGE: See "General" before first port.
MAX. SIZE: Max. draft: 29 ft. Max. length: 400 ft.
RADIO: Tobruk Radio (Station operated by Arab Gulf Oil, Operating times 0900/0930, 1300/1330, 1700/1730, 2100/2130 hrs.) 5AL: 420, 425 and 500, VHF (24 hours) Channels 12, 16 and 19.
BERTHING: Berths in Tobruk Harbour:
Quay No. 3: Length 82 ft., draft 11 ft.
Quay No. 4: Berth 1: Length 560 ft., draft 20 ft.
Berth 2: Length 395 ft., draft 28 ft.
Berth 3: Length 410 ft., draft 30 ft.
STEVEDORES: All stevedoring operations and formalities to be done by Agents. 2 companies to be formed in the near future.
MEDICAL: Available.
TANKERS: Refer to "Marsa Al Hariga".
FRESH WATER: Not available.
FUEL: Not available.
REPAIRS: Not available; see "Tripoli".
REPATRIATION: Available via Benghazi.
DEVELOPMENTS: Port extension project underway.
AUTHORITY: Port Manager and Harbour Master.

AGENCY: See "General" before first port.

TRIPOLI: 32.54 N. 13.13 E.

Also see "General" before first port.

PORT LIMITS: (a) The water area existing inside the actual breakwater and that which may fall within any new breakwaters eventually constructed in accordance with the Port Developments Project.

(b) The outer water area known as the navigational channel commencing as from the harbour entrance along the distinguishing marks of the channel for a distance of about 1 mile.

PILOTAGE: Compulsory Pilot boards at entrance of channel.

ANCHORAGE: See "General" before first port.

RESTRICTIONS: Any containers arriving on Ro/Ro ships should be on trailers.

MAX. SIZE: All types of ships with 28 ft. draft and less are safe in harbour.

RADIO: Tripoli Radio (coast station – 24 hours), 5AT, 476 and 500 kHz, R/T 2182 and 2197, VHF Channels 16 and 6.

Tripoli Port Radio (24 hours), 5AI, 500 kHz, R/T 2182, VHF Channels 8, 12 and 16 and in an emergency Channel 14. Tripoli Port Radio Telex No. 20464.

CRANES: 2 floating cranes, 100 tons and 200 tons capacity. 25 electric cranes 5 tons - 30 tons capacity. 67 cranes of various capacities up to 50 tons.

STEVEDORES: Two companies available. Working hours: 0700-2000.

BERTHING:

	Quay No.	*Length* (ft.)	*Depth* (ft.)
Main Port:	5.5	200	11
	6 East	200	13
	6 West	220	13
	7	400	18
	8	400	22
	9	400	23
	10	450	22/25
	11, 12 & 13	930	22
	Victory	550	22
	F.J. STB.S.	200	10
	F.J. PT.S.	200	9
	Japanese	4,823	19.7
Karamanly:	1 & 2 (oil)	450	27
	3	400	22
	4	400	18
	5	300	15
	F.J. STB.S.	250	14
	F.J. PT.S.	250	16.5

MEDICAL: All facilities available.

FRESH WATER: Available by barge and alongside. Passenger vessels 100 tons maximum and cargo vessels 50 tons maximum.

FUEL: Available through Agent. A notice of 24 hours needed, advisable for Chief Engineer to check what grades are available.

CONSULS: Algeria, 34631; Belgium, 37797; Bulgaria, 35733; China, 32300; C.I.S., 30554; Denmark, 39413; France, 33526 & 33527; Germany, 33827 & 30554; Greece, 36978 and 36689; India, 41835; Iraq, 34235; Italy, 34131; Jordan, 32707; Kuwait, 40282 and 40281; Lebanon, 33733 and 32289; Pakistan, 40072; Malta, 38081 and 38082; Morocco, 34239 and 40188; Netherlands, 41549 and 41550; Poland, 31768; Saudi Arabia, 30486; Spain, 35463 and 33275: Sudan, 39181 and 39182; Sweden, 32343; Switzerland, 32416; Syria, 31783; Tunisia, 31051/2; Turkey, 37728; Venezuela, 36838; Yugoslavia, 34114 and 33392.

DRY DOCK: *Floating Dock:*

Length over platform	136.700 m.
Length over pontoon	121.200 m.
Moulded outer breadth	30.600 m.
Inner clear breadth	23.400 m.
Depth of pontoon at centre line	3.100 m.
Height of keel blocks	1.200 m.
Depth of water above keel blocks	6.400 m.
Lifting capacity	5,000 tons

Spare parts to be supplied by ship's owner. 3 kinds of marine paint are available.

WATCHMEN: Available.

REPATRIATION: Crew changes are possible.

AIRPORT: A number of major air lines operate to and from Tripoli Airport which is about 27 km. from the city.

POLICE/AMBULANCE/FIRE: Main port call; 39111, 35010, 31518. Karamanly Wharf call: 30378, 35010, 31518.

SHORE LEAVE: Allowed after Free Pratique, Customs and Immigration formalities completed.

DEVELOPMENTS: 2.6 km. of new quays under construction with depths of 10.0 m. – 12.0 m. The second phase of new construction will include berths for container vessels and Ro/Ro vessels.

SHIPMASTER'S REPORT: March 1988.

Chart: BA. Chart No. 248.

Documents:

8 copies Crew List.
2 copies Crew Declaration (on Libyan forms).
2 copies Manifest.
1 copy Health Declaration.
2 copies Currency Declaration (on Libyan forms).
All Passports.
1 copy Arms and Ammunition List.
1 copy Drugs List.
2 copies Cargo Manifest.

Cameras are placed under seal. No cigarette issue allowed. Bond remains sealed if proceeding to another Libyan port. Definitely no alcohol, Customs would not allow beer issue. Ship's Certificates to be in Arabic. Passports exchanged for Landing Cards at the gate. All stores checked for signs of South African and Israeli produce.

Approaches: Vessels are to contact Tripoli Radio on 2182 kHz. at least 8 hours before arrival and obtain current navigational warnings. At the same time advise Tripoli Radio of vessel's ETA and inward course and speed.

Tripoli Radio normally uses 2197 kHz. as the main M/F transmitting frequency. Their reply was prompt and English was good.

Tripoli Radio has Telex Nos. 90129515 AT TPLY and 90120300 TAT TPLY.

Tripoli Port should be contacted on VHF Channel 12 as early as possible, giving ETA Tripoli and inward course and speed.

Tripoli Port will require the following information: LOA, Beam, Gross Tonnage, Nett Tonnage, Draft, Cargo Tonnage, Agent, Charterer, Owner, Flag, Number of Crew and Nationality, Last Port of Call and Next Port of Call.

Tripoli Port Control has Telex No. 90120464 TRIPORTHLY.

On approach, Tripoli Port shows up well on radar at 30 miles when there are ships anchored off.

D/F Station "Tarabulus" was not obtainable.

The N.E. Breakwater and Tarabulus High Light Tower were conspicuous but the light was weak.

All Channel Buoys except No. 3 have been withdrawn. Only the beacons are in position.

Pilot: The Pilot may be contacted through Tripoli Port Radion on VHF Channel 16, working on Channels 12 and 8. The Pilot boards from a grey tug near Beacon No. 2. If the weather is poor, Pilot may board inside the breakwaters. The Pilots speak good English and are competent.

When leaving the Port, the Pilot disembarks in the Outer Harbour before reaching the new Breakwater's entrance.

Entry: Maximum draft handled to No. 3 Pier and Karamanli Mole is 29 ft. Tidal range 1 ft. 6 in. Minimum depth found at Karamanli Mole Oil Berth was 32 ft. There are no tanker movements from 30 minutes before sunset until 0730 hrs. the next day.

Generally, cargo vessels are not handled at night, however, movements may be undertaken if absolutely necessary.

In Winter the Port is often closed due to bad weather which causes very heavy N.W. swells across the breakwater entrance near Buoy No. 3.

Anchorage: The anchorage is that indicated on BA. Chart No. 248. Anchored vessels were spread out to the East of the limits on the chart but West of the Channel Leading Line. The anchorage is unprotected from all winds except those off the land. We anchored with Tarabulus Lighthouse bearing 165° × 1.5 miles for a period of 12 hours in a Force 9 wind from the W.N.W. and whilst trying to get underway we parted our cable.

Tugs: Tugs are not used by small vessels. Pilot reports that only 2 tugs are in operation at the present time.

Berth: LPG imports are handled at the outer end of Karamanli Mole. This berth only handles LPG. The old oil product pipelines are no longer in use.

The berth face consists of old sheet piling and is in a poor state of repair, protected by old tractor tyres. Inner Karamanli Mole is generally used by bulk carriers discharging grain, this can restrict the size of ships using the oil berth. Normally LPG is handled by small vessels.

Vessels normally berth port side alongside but can berth starboard side alongside if required and if space permits.

Mooring/Gangway: There are very few bollards on the berth and only breast lines can be run. Insufficient room to run stern lines. Ship's gangway was used and it was easy to land.

Cargo: LPG mix. Normally 75% Butane and 25% Propane, but this depends on the season (cooking fuel, etc.).

Liquid and vapour lines were 3 in. rubber hoses which were connected to 6 in. and 4 in. lines respectively. The distance to the pressure tanks (20 tonnes each) is 4 km. Pressure tanks product is bled off to road tankers and also piped inland. Discharge pressure was 9 kg./sq.cm. and the minimum temperature −2°C. via ship's heater and booster pump.

The line pressure fluctuates when product is bled off to road tankers. The liquid shore line is to be hot gassed/blown clear for 2 hours on completion of liquid discharge.

Vapour is returned to ship, only opened 2 tanks for this operation, which reached 3 kg./sq.cm.

Average rate 40 t.p.h.

No surveyor attended. The receiver "Breganaft", also the shipper, was in attendance at the start and on completion and was of assistance.

Tank Dry Certificate required on completion.

Fresh Water: Fresh water is available by tanker truck of 10 tonnes capacity or by barge of 200 tonnes capacity. 2 self propelled barges were observed in the harbour. Cost of delivery inside the harbour is U.S.$10.0 per tonne.

Agent requires 48 hours' notice for fresh water in order to prepare paperwork.

Fresh water also obtainable at the outer anchorage in calm weather but cost is high.

VHF: Tripoli Radio on VHF Channel 26 but also uses Channel 22 and others as per ALRS. The Ship's Radio Station was sealed by Port Police whilst in Port.

International calls by vessels at anchor to Italy and Greece were handled quickly.

Customs: Officials visited the vessel 17 hours after arrival. As we were under seal on coastwise voyage from Zuetina they only checked seals on the bond. We were given a cigarette issue but no alcohol of any description was issued. All alcohol remains under seal whilst on the coastal trade. All radios and cameras were manifested so were allowed to be kept in cabins.

Agent: Vessel handled by "Universal". Agent attended with Customs 17 hours after arrival and was helpful with regard to ordering stores. If vessel finishes overnight she has to wait for clearance until 1000 hrs. the following day as the Customs House does not open until 0800 hrs.

Stores: Imported stores not available. Fresh produce available but dependent upon the season, prices are high. Basic items are obtainable.

Bunkers: Most grades available by road tanker through "Breganaft".

Forms: Also see "Documents". Crew Manifest and Money List to be on Libyan forms but if first visit to Libya, international forms are acceptable.

All Ship's Certificates to be in Arabic.
Crew Manifest.
8 copies Crew List on IMO Forms acceptable.
2 copies Cash in Master's Safe.
2 copies Ship's Fixture List.
Port Clearance and Customs Clearance from Last Port (very important).

General: Vessels on coastwise trade must keep at least 12 miles offshore.

The local currency is the Libyan Dinar and 1 Dinar = U.S.$3.5 (official).

Mail can be sent out via the Agent.

Repatriation and crew changes are possible but outward tickets must be paid for in Tripoli (not PTA) by remittance of hard currency. There are nearly always vacant seats on all outward flights. All crew joining require a visa.

Shore leave is only allowed during daytime. Passport is handed in at the gate and a local I.D. card is given in exchange.

Friday is the Moslem holiday. March 2nd was a Public Holiday.

AUTHORITY: Port Manager and Harbour Master.

AGENCY: See "General" before first Port.

ZAWIA (Azzawiya): 32.48 N. 12.42 E. **(See Plan)**

Also see "General" before first port.

LOCATION: Zawia Offshore Oil Terminal is situated about 50 km. West of Tripoli.

PORT LIMITS: Seaward limits extend from 32° 50′ 30″ N. to the coastline between 12° 40′ 00″ E. and 12° 44′ 00″ E. (refer Port Plan on B.A. Chart No.3353). Vessels are considered to be "Arrived Ships" and (subject to charter party terms) laytime will commence, when the ship is approximately 2 miles off the S.A.L.M. berths. The port is operated by the National Oil Corporation of the Socialist Peoples Libyan Arab Jamahyria.

DOCUMENTS: Masters are advised to have the following documents prepared before arrival in order to expedite ship's inward clearance:

6 copies Crew List.
2 copies Stores Manifest.
2 copies Personal Declaration (Crew).
Health Documents.
Cargo Documents (Cargo Inwards).
Ship's Papers.
Ship's Certificates.
Discharge Certificate (of last cargo loaded at any Libyan Port - duly authenticated at port of discharge. Loading cannot be undertaken until document presented to shore official via ship's Agent.).

PILOTAGE/APPROACHES: Vessels are advised to anchor Westwards of a position about 1 mile Northwards of Berth No.1 and not closer than 7.5 cables from any berth or to approach any berth closer than 7.5 cables without having received Harbour Master's or Duty Pilot's permission.

S.A.L.M. Berth No.1: 32° 48′ 18″ N., 12° 42′ 00″ E.
C.B.M. Berth No.2: 32° 48′ 06″ N., 12° 42′ 38″ E.
S.A.L.M. Berth No.3: 32° 48′ 12″ N., 12° 41′ 12″ E.
Flare Stack (2 Flares in North/South orientation)
North Flare: 32° 47′ 24″ N., 12° 42′ 00″ E.

Azzawiya Oil Terminal is adjacent to the flares. Tankers are warned that it is unsafe to remain at anchor during adverse weather conditions. The bottom is sand, overlaying bed-rock and the depth of water about 35 m. When unable to remain at anchor vessels are to keep Northwards of Lat. 32° 52′ N.

RESTRICTIONS: Whilst at a berth, tankers must have main engines ready for immediate use at all times. Sudden and often violent changes of weather may occur without prior indication at any time and vessels may be required to curtail cargo operations, disconnect hoses and vacate the berth at very short notice, the Loading Master will advise accordingly.

The Pilot (Loading Master) and when appropriate a Cargo Surveyor will be in attendance prior to berthing and until berth vacated, suitable accommodation, etc., and normal courtesies to be provided. The Pilot may on occasions be detained on board. Pilot, Agent and Port Officials and Service craft are available during daylight hours only. Cargo documentation and outward clearance for vessels loaded will be completed during normal daytime working hours.

Vessels must have sufficient ballast for safe manoeuvring with propeller immersed and trimmed to about 8 ft. by the stern. If in the opinion of Harbour Master/Pilot the ship has insufficient ballast she may not be allowed to berth.

The discharge of dirty ballast is strictly prohibited. There are no facilities for the reception of water ballast or tank washings ashore. In the case of crude oil vessels Crude Oil Washing is not permitted.

VHF: Call sign: "Zawia Port Control".

Zawia Port Control keeps 24 hours watch on Channels 16, working channels 22 and 27. Vessels approaching the anchorage must give the following information when possible:

(a) Ship's name and flag.
(b) Up-dated ETA.
(c) Cargo nomination, grade and quantity.
(d) Vessels discharging to give grade and Bill of Lading figures.
(e) Distance between Ship's rail and manifold, manifold size and derrick SWL.

For cargo operations Ship/Shore communication is maintained by Loading Master via Walkie-Talkie radio or by VHF Channel 12, Call sign "Tank Farm".

Service launches operate on Channel 12, though all are equipped with standard Ship VHF sets.

Link calls may be established via Tripoli Radio.

HEALTH: Local Officials will board vessels to grant Free Pratique. Vessels must report any suspected disease or fever to local Authority prior to being boarded by Agent or Pilot. There are facilities to treat serious injuries or illness. Inoculations and vaccinations cannot be dealt with.

BERTHING: Prior to berthing, vessels should have the port derrick rigged with a SWL of 10 tons if nominated for SBM No.3 (Crude Oil discharge), 7 tons for SBM No.1 (Fuel loading and Crude Oil/Reduced Crude Oil discharge) and 5 tons for CBM No.2 (Vessels handling White Oils, Vacuum Gasoil, Lubricating Oils).

Vessels proceeding to SBM's will have 2 wire rope strops with shackles placed on board to secure chafing chain ends of nylon mooring ropes.

Vessels loading Fuel Oil or discharging Reduced Crude Oil will have a special device placed on board to accommodate 2 hoses connected to one ship's manifold.

Hose handling, connecting and disconnecting to be carried out by ship's crew under the supervision of a Deck Officer to Mooring Master's advice.

Masters are requested to have available adjacent to port side manifold:

2×15 m. lengths of synthetic fibre rope 127 mm. circumference.
1×14 lb. (6 kilo) and 1×7 lb. (3 kilo) hammer.
2×1.5 ton chain blocks and/or suitable rope tackle.
Large Shifting Spanner.
1 Wire strop of 20 mm. – 25 mm. diameter, about 2 m. – 3 m. length.
Rope lashings.

S.A.L.M. Berth No.1: Buoy is moored approximately 1,400 m. offshore with a least depth of 22 m. in a position 32° 48′ 18″ N., 12° 42′ 00″ E. The berth can accommodate vessels of 15,000 d.w.t. to 100,000 d.w.t., max. draft 17.0 m. The vessel is secured at the bow with 2 nylon mooring ropes. Chafing chain ends are secured by shackles and wire strops. The floating hose strings on vessel's portside terminate in 12 in. diameter flanges, A.S.A. 150, fitted with neoprene 'O' ring gaskets. Minimum distance 3.5 m. between manifold and ship's hose rail. Cargo boom 7 tons SWL.

C.B.M. Berth No.2: "See Plan". CBM No.2 is approximately 1,100 m. offshore with an average depth of 21 m. in position 32° 48′ 06″ N., 12° 42′ 38″ E. (approx). The berth can accommodate vessels of 5,000 d.w.t. to 25,000 d.w.t. maximum 175 m. LOA and max. draft 10.0 m. The vessel is berthed heading about 310° (T) with 2 bow anchors and 3 buoys (one stern, one starboard quarter, one port quarter).

One 8 in. diameter hose (one hose each for leaded and unleaded products) terminating in an 8 in. diameter flat face bolted flange. One 10 in. diameter hose (for lubricating oils only) terminating in a 10 in. diameter flat face bolted flange.

For those vessels discharging Lub oils, a spherical device (pig) will be placed on board with air compressor.

Two refinery employees will oversee the discharge operation, control line clearing procedures and will remain on board. Food will be supplied from ashore.

S.A.L.M. Berth No.3: Buoy is moored approximately 1,350 m. offshore with a least depth of 24 m. in position 32° 48′ 06″ N., 12° 42′ 38″ E. (approx). The berth can accommodate vessels of 25,000 d.w.t. to 140,000 d.w.t., max. draft 19.0 m. The vessel is secured at the bow with 2 nylon mooring ropes. Chafing chain ends are secured by suitable shackles and mooring strops (supplied). Two floating hose strings are taken on vessel's port side, terminating in 16 in. diameter flanges A.S.A., fitted with neoprene 'O' rings and 'Camlock' bolts. Cargo boom 10 tons SWL.

No lights have yet been installed to mark CBM No.2.

SALM Berths No.1 and No.3 are each equipped with radar reflectors installed at top buoy and lights mounted on the buoy deck with the following characteristics: Colour White Fl. "U" ev. 12 secs (unreliable).

A light Fl.R.G. ev. 7 secs. is exhibited on Eastern end of small craft harbour breakwater.

Tidal streams are generally weak and ineffectual. Sub-sea and surface currents often run in differing directions. Current strengths of about 2 knots are not uncommon and are largely influenced by the wind.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Libyan Dinar (LD). U.S.$ 1.00 = LD 0.303 (May 1991).

SAFETY: *Fire and Safety:* Fire and Safety Regulations will be *strictly* enforced at all times and regular checks will be made by the responsible Refinery Official. A safety check list is to be completed and signed by the Master, the Chief Officer and Loading Master. Anti-pollution of the sea precautions are to be observed at all times. A pollution control vessel is available for use in the event of accidental spillage.

GENERAL:

No fuel or diesel bunkers available.
No fresh water available.
No provisions or supplies available.
No shore leave or crew changes possible.
No cranes or lighters available.
No repair facilities available.
No lifeboats or other craft to be lowered in to water.
No swimming over the side allowed.

AUTHORITY: Azzawiya Refinery, P.O.Box 15715, Azzawiya. P.O.Box 6451, Tripoli. *Tel:* Tripoli 30423/24/35. *Contact:* Mohamed M.Zerti, Marine Co-ordinator.

AGENCY: See "General" before first port.

ZUARA: 32.55 N. 12.07 E.

Also see "General" before first port.

PORT LIMITS: (a) The water area existing between the actual breakwater and that which may fall within any new breakwater eventually constructed.

(b) The water area known as the navigational channel existing outside the harbour entrance for a distance of about 0.5 miles (1 km.).

APPROACHES: If approaching from the East, vessels are to give the coast a berth of at least 3 nautical miles.

ANCHORAGE: See "General" before first port.

RESTRICTIONS: Port for ships laden with direct delivery cargo only.

MAX. SIZE: Ships up to 13 ft. draft and 65 m. length are safe in the harbour.

RADIO: Tripoli Radio and Port Radio use VHF Channel 16.

BERTHING:

Quay No.	*Length*	*Depth*
Shore quay	2 ships	13 ft.
F.J. Stb.S.	165 ft.	13 ft.
F.J. Pt.S.	165 ft.	13 ft.

STEVEDORES: 2 companies available.

MEDICAL: Available.

REPAIRS: Not available, see "Tripoli".

REPATRIATION: Possible.

AIRPORT: Tripoli Airport situated about 127 km. from Zuara.

POLICE/AMBULANCE/FIRE: Call Port Manager, Tel: 025305.

SHORE LEAVE: Allowed after Free Pratique, Customs and Immigration formalities completed.

DEVELOPMENTS: 18 berths to be constructed in a new master plan.

AUTHORITY: Port Manager and Harbour Master.

AGENCY: See "General" before first port.

ZUEITINA: 30.51 N. 20.00 E. (See Plan)

Also see "General" before first port.

LOCATION: The Terminal Fairway Buoy, moored in position Lat. 30° 55′ 00″ N., Long. 19° 59′ 48″ E., is painted black; it shows at night a white light flashing "Z" every 10 seconds. A prominent landmark is the radio mast (height 451.5 ft. above sea level) in position Lat. 30° 49′ 57.6″ N., Long. 20° 03′ 05.5″ E.; it displays at night 3 red lights in a vertical line – the top light flashing, the 2 lower fixed. The top light is on top of the mast (which is 400 ft. above the base), the middle light is 266 ft. above the base, and the lowest light is 133 ft. above the base. At night flares at the Liquid Petroleum Gas Plant, in position Lat. 30° 54.2′ N., Long. 20° 05.4′ E., can be seen from a considerable distance; by day a column of smoke emanating from this position is also conspicuous. 14 large oil tanks, painted white, near the foot of the Radio mast, are prominent landmarks.

Positions of Moorings:

"Alpatah" berth	Lat. 30° 53′ 30″ N.	Long. 20° 01′ 05″ E.
"Brega" berth	Lat. 30° 52′ 18″ N.	Long. 20° 01′ 24″ E.
"Chahett" berth	Lat. 30° 52′ 08″ N.	Long. 20° 00′ 11″ E.
"Dalila" berth	Lat. 30° 50′ 56″ N.	Long. 20° 00′ 26″ E.
"Echbar" berth	Lat. 30° 50′ 16.4″ N.	Long. 19° 59′ 16.1″ E.

"Alpatah" out of service, marked by navigation buoy.

FLAGS: When arriving at Zueitina by day, ships must display, in addition to their own national ensigns, the Libyan flag and the appropriate quarantine signal. Throughout the ships' stay, during daylight hours, they must display the Libyan flag, their own national ensigns and, when applicable, the International Code signals "B", "H" or "G", and the appropriate quarantine signal.

DOCUMENTS: Soon after vessel's arrival, a Custom's Officer will board, accompanied by a Shahat Agency representative, who will act on behalf of the ship and its Agent, as well as on behalf of the Company, in the execution of essential business. The following documents, signed by the Master and imprinted with the ship's official stamp, are required by the Customs Official for the Customs and Immigration Departments and for the Port and Lights Authority:

2 copies Entering and Leaving Territorial Waters Certificates.
2 copies Report Inwards Certificates.
2 copies Crew Declarations of Dutiable Goods.
2 copies Crew Declaration List.
2 copies Report Outwards Certificates.
3 copies Boycott Certificates.
2 copies Stores Lists.
5 copies Crew Lists.
1 copy Clearance from Last Port of Call.
2 copies Tanker Characteristics Certificates.
1 copy Certificate of Discharge, from the Discharge Port Authorities, of the last cargo loaded in Libya.

With the exception of the Crew Lists and the Stores Lists and the clearance from the Last Port, the above forms will be provided by the Company clerk.

It is important that the Master should be able to produce a properly authenticated certificate of discharge covering the last cargo loaded into the ship in Libya. If for some reason he is not in possession of such a certificate, he must write a letter of explanation which includes the pertinent extracts from the ship's log book, append his own signature to it and stamp it with the ship's official seal, and address it to the Secretariat of Petroleum, Es Zueitina, SPLAJ. If the explanation for failure to produce the certificate is considered satisfactory the ship may be permitted to load. If there appears to be any suspicion that the last port was not as stated, the ship will be turned away.

If the vessel has not previously loaded in Zueitina, the Master is required to confirm this fact in an official letter, stating also the ship's last port of discharge and giving an undertaking that the cargo about to be loaded will not be discharged in any of the countries to which the Arab embargo extends.

The Mooring Master will, after boarding, lose no time in informing Zueitina Marine that he has received one or other of these foregoing documents from the Master, which he will, at the first opportunity, send ashore for delivery to the Secretariat of Petroleum representative. This will ensure that there is no unnecessary delay in the commencement of loading.

On completion of loading, the Shahat Agent will again board the ship with the cargo documents which are to be signed by the Master. The clerk has to deliver to the Master one copy of each document for his own use and one copy for consignee and bring the rest of documents ashore with him.

1. Bill of Lading
2. Cargo Manifest
3. Time Sheet
4. Certificate of Origin
5. Master's Receipt
6. Export Manifest

All of which forms are provided by the Company or by the Agency. He will also take ashore any letters to be posted. On occasions, a Customs Official will visit the ship with the documentation clerk prior to sailing to ensure that the seals which were put on the bonded stores lockers have not been tampered with before the ship has left Libyan waters.

The documentation formalities prior to the ship's departure, are usually completed whilst the ship is unmooring from the berth, or just after it has left the berth, hove to with the Mooring Master still aboard. Sometimes, however (and particularly after the loading of "Agip" cargo), the processing of the papers ashore may take longer than usual, and the ship may have to anchor to await the clerk's eventual arrival, in which case the Mooring Master will direct it to a safe anchorage before disembarking. Zueitina Marine will then inform the Master when the launch bearing the clerk is about to leave the Small Craft Harbour, in order that the anchor may be weighed, and a lee side presented to the launch.

ACCEPTANCE PROCEDURE: *Notice of Readiness, Laytime, etc:*

Vessels Loading Crude Oils: A vessel for which a berth is available on arrival will be boarded by the Mooring Master at the Terminal Fairway Buoy and, providing that the vessel is in all respects ready to commence loading (except for the necessary de-ballasting time), the Notice of Readiness will be accepted at the time of the Mooring Master boarding, subject to the provisos – a, b, c and d, below.

If the vessel is not in all respects ready to proceed to the berth, with main engine and auxiliaries fully manoeuvrable, mooring ropes on deck, anchors, windlasses, winches, etc., in good working order and readiness, it will not be accepted until the Mooring Master is satisfied that all these conditions are met.

A vessel which has been instructed by Zueitina Marine to anchor in the roadstead on arrival should, after doing so, inform Zueitina Marine of the precise anchorage time, which time will, for the purposes of berthing order and the Port Log, be considered as the vessel's arrival time. According to the practice of the port, acceptance of the Notice of Readiness will coincide with this arrival time, providing:–

(a) that it is within the hours of daylight – deemed to be from 0600 hrs. (local time) to 1800 hrs. (local time),
(b) that it is not a Public Holiday, or a Friday (the Libyan Sabbath), unless the vessel is actually handled on that day,
(c) that the port is open, and
(d) that the vessel has been nominated to load.

An exception to clause (a) above, is when conditions allow night berthing, in which case the vessel will be accepted when the Mooring Master boards, or, should the vessel have been at anchor, when the anchor is aweigh, providing that the Mooring Master is then on board.

In the case of a vessel arriving without nomination, the Notice of Readiness will be accepted when notification of her nomination has been received at the Terminal, subject to provisos (a), (b) and (c) above, and instructions from the Company's Operations Department. On occasions when the Company deems it advisable to berth a vessel prior to the date of the nominations, acceptance of the Notice of Readiness will be at the time the Mooring Master boards, providing that the anchor is then aweigh.

In addition to clauses (a), (b) and (c) and (d), above, vessels will not necessarily be accepted when arriving at a time ahead of, or behind, their last scheduled Estimated Time of Arrival, especially if such acceptance would be at the expense of a vessel that has arrived within its nominated period.

Vessels Loading Liquid Petroleum Gas: A Liquid Petroleum Gas Tanker's Notice of Readiness will be accepted on arrival, provided that:

(a) the port is open ("port" meaning, in this case, the LPG berth),
(b) that it is not a Friday (the Moslem Sabbath) or an official holiday, unless the ship is actually handled on that day,
(c) that it is not during the night hours – deemed to be, at the LPG berth, between 1800 hrs. and 0600 hrs. (local time) – unless the ship is actually handled during that period,
(d) that the ship does not arrive on the same day, or clash with the loading of, another LPG tanker chartered under a LINOC contract,
(e) that the ship's tanks are in such a state of readiness, i.e., requiring no cooling, no purging, that loading can be commenced at *full rate* immediately the hoses are connected,
(f) that the arrival time does not differ appreciably, either before or after, from the last signalled ETA sent by the ship and received at the Terminal, and
(g) that the vessel has been nominated to load.

When a Liquid Petroleum Gas tanker does arrive whilst the port is closed, the Notice of Readiness will be accepted at the time of the opening of the port, subject to provisos (b), (c), (d), (e), (f) and (g).

The N.O.R. of an LPG loader arriving on a Friday or on an official holiday, or during the aforesaid night hours, will be accepted at 0600 hrs. (local time) on the first subsequent working day, subject to provisos (a), (d), (e), (f) and (g).

An LPG tanker arriving on the same day as an LPG tanker scheduled to load under a LINOC contract, or whose loading would clash with an LPG tanker scheduled to load under a LINOC contract, will have its N.O.R. accepted on the completion of hose connection, subject to provisos (e) and (f).

PILOTAGE: A Mooring Master will board the vessel in the close vicinity of Terminal Fairway Buoy and advise Master on all manoeuvres relative to berthing, connecting and disconnecting the hoses, and in all operations within the anchorage or berthing area.

Vessels of 40,000 d.w.t. and upwards should have a pilot ladder long enough to reach the Mooring Master's launch rigged just abaft the accommodation ladder, in such a manner that the Mooring Master can transfer to the accommodation ladder when about 10 ft. from sea level. Ladders must be strong, clean, and in good state of repair and conform to international requirements. In cases where the ladder(s) fails to conform with these requirements, the Mooring Master will decline to board until an adequate ladder has been provided. A good lee should be made, to allow the launch to come alongside and the Mooring Master to board safely. (Note: Ships which have been instructed to berth at the S.P.M's, and need to take the Company's gear aboard, should have the ladder(s) rigged on the port side, in order that they may take it aboard from the Mooring Master's launch with the working derrick as soon as the Mooring Master has boarded.)

The Mooring Master may require the vessel to unberth at any time he deems it necessary for the safety of the vessel, or the installations, or both, or because of infringements of the Port Rules by the vessel.

As soon as practicable after boarding, the Mooring Master will inspect the mooring and lifting equipment and the ballast, and not until he has assured himself that the equipment is adequate, and the ballast clean, will the ship be accepted. His opinion of the adequacy of the gear, and of the cleanliness of the ballast, shall be final.

ANCHORAGE: Vessels awaiting the Mooring Master, whether for berthing in the crude oil berths or alongside the LPG berth, should heave to in the close vicinity of the Terminal Fairway Buoy. If they are obliged, or instructed to anchor, they should do so in the recommended anchorage, which is within the radius of a circle centred in position Lat. 30° 55′ N., Long. 20° 01′ E. Under no circumstances should they anchor South of the 30° 54′ 00″ parallel. Whilst at anchor, they should exercise the utmost vigilance, as they are liable to drag anchor in rough weather, and should keep in VHF radio-telephone with the Terminal at all times. If heavy weather necessitates them heaving up anchor and proceeding to sea, Zueitina Marine must be informed accordingly.

HEALTH: Pratique will be granted by the Custom's Official. He will examine the ship's logbook, and will inspect and seal the bonded storerooms.

All ships must display the appropriate quarantine signal until given Pratique.

RADIO: 72 hours prior to arrival at Zueitina, Masters should advise the Company of their vessels' ETA via Tripoli and via Portishead Radio. They should subsequently confirm or amend them when they are 48 hours and again when they are 24 hours distant from the Port.

All messages to Zueitina Terminal should be addressed to the Operations Manager, Zuetina Oil Company, with copies to the Terminal Superintendent.

Messages should include the quantity and grade of cargo to be loaded, the last port of call and destination, Bill of Health status and details of any sickness on board. Estimated times of arrival should be given in GMT. (Libyan Standard Time is GMT plus 2 hours.).

Masters of vessels equipped with VHF radio-telephones should contact Zueitina Marine on Channel 13 or Channel 16 when within range, and give a firm calculated time of arrival at the Zueitina Fairway Buoy. They should also again inform Zueitina Marine Duty Officer of the quantity and grade of cargo required, the last port, estimated deballasting time and the destination. They should confirm that they have in their possession a Certificate of Discharge for the last cargo loaded into their ships in Zueitina or, in cases of ships arriving in Zueitina for the first time, that they have ready for the Secretariat of Petroleum a letter which certifies that the cargo which they are about to load will not be discharged in any country against which the Arab Oil Embargo extends. In vessels paying their first visit to the Terminal, Masters should also inform the Duty Officer of the size and type of the manifold connections (i.e. 12 in. ASA, or 10 in. European, etc), and whether or not they have on board heavy wires and shackles for mooring at the mono-buoys.

(N.B. It is important that all ships arriving at Zueitina are fitted with VHF radio-telephones, capable of operating on the main working Channels. Without VHF communications, Zueitina Marine cannot always know with accuracy a vessel's arrival time, and as a result that vessel might well lose its loading turn and be subjected to an appreciable – and, with VHF, avoidable – delay in consequence.)

An aerial radio beacon is located on the North-Eastern arm of the Small Craft Harbour, in position Lat. 30° 54′ 05″ N., Long. 20° 04′ 12″ E., intended as an aid to navigation for aircraft flying to and from Zueitina airstrip. The beacon transmits continually the call sign ZUE, on 369 kHz: the signal, which is omni-directional, has a range in excess of 100 miles.

TUGS: One tug ("Saladin") of 4,600 h.p., bollard pull 55 tons now available to assist in berthing at CBM and LPG berths.

One to six mooring launches of 370 h.p. available, normally two launches assist berthing at SBM's.

BERTHING: The sea terminal consists of five berths for loading crude oil products, two of which – "Brega" and "Dalila" – are conventional buoy moorings, and the others – "Alpatah" ("Alpatah" buoy at present temporarily removed but position marked by Tower Buoy with same characteristic light) "Chahett" and "Echbar" – are single-point moorings, or mono-buoys. Conventional buoy moorings "Brega" and "Dalila" are approximately 2.5 miles offshore, with an average depth of 70 ft. and 80 ft. respectively. 42 in. (ID) submarine lines connect the berths to the shore installations. To the header at the seaward end of each of these submarine lines are connected two strings of flexible reinforced rubber hoses, laid on the sea bed and buoyed when not in use. The forward of the two strings is made up of (from the header) three 30 ft. lengths of 24 in. i.d. hose, two 30 ft. lengths of 20 in. i.d. hose, and seven 30 ft. lengths of 16 in. i.d. hose. The after string is similar, but with one less length of 16 in. i.d. hose. To the seaward extremity of each hose string is fitted a 16 in. to 12 in. ASA reduction flange. When the ship has berthed, each hose string is towed in to the ship's side below the manifold by the attendant launch, to be hove up by crane or derrick and bolted to the ship's connections, *invariably on the port side.* Where the ship's connections differ from the 12 in. ASA flange on the hose, suitable reduction spools must be fitted. The weight to be lifted on each hose is approximately 7 tons.

Single-point moorings, "Alpatah", "Chahett" and "Echbar" are all approximately 3 miles offshore, in an average depth of 100 ft. of water. The submarine pipe-lines to "Alpatah" and "Chahett" berths are of 48 in. i.d., that to "Echbar" berth, 42 in. i.d. Particulars of the strings of hoses from the header to the ship's manifold are described in detail in the chapter on "Single-point Moorings". As in the conventional buoy berths, *the hoses are always taken up on the port side,* and the connecting flange on the hose is 12 in. ASA pattern. The weight to be lifted is approximately 7 tons, but this is to some extent dependent on the ship's freeboard.

Mooring Equipment: As a guide to Masters who intend to save time and labour, especially in these days of reduced "general purpose" crews, by equipping their ship with the requisite mooring gear, the following standard requirements is suggested:

(a) Two (2) flexible steel slip wires, 1.75 in. dia., 5.5 in. circumference, 130 ft. in length, or longer if the distance from the fairlead to the bitts is such that 130 ft. would be insufficient to make fast safely. Such slip-wires will have an eye spliced in one end only.

(b) Two (2) screw-pin or threaded bolt and nut, bow shackles, bow size 2.5 in., pin diameter 2.75 in., minimum width, jaw to jaw, 4 in.: breaking strain 150 tons.

Vessels fitted with A.K.D. chain stoppers will reduce mooring time.

Single-Point Moorings: The "Mono-buoy" is a large cylindrical buoy (weight 106 tons), divided by steel bulkheads into four water-tight compartments, through the centre of which emerges the loading hose. The perimeter of the buoy, to which the buoy-to-ship moorings are attached, is a turntable which revolves on bogies round the centre – hose-supporting – section, in such a manner that the vessel berthed on the buoy will always lie head to wind. The minimum depth of water within the swinging radius of the largest ship envisaged at the buoy is approximately 95 ft.

To the mono-buoy is attached a 240 ft. length of chain cable, made up of 2.375 in. U3 steel studded links, and supported in polyurathene buoyancy collars, at the seaward end of which is a "chafing chain". This "chafing chain" is 20 ft. long and of similar construction to the main chain, but with three open links at the end: it is detachable for periodic renewal. To the end of the chafing chain is attached the "approach rope" – a 200 ft. length of 10 in. circumference plaited polypropylene which, when not in use, is allowed to float out free from the buoy.

The ship approaches the buoy from downwind, taking care to keep the wind right ahead (adequate ballast should be retained aboard to provide manoeuvrability). When sufficiently close, the crew will lower to the attendant launch the end of a good mooring rope, to the eye of which has been attached a stout nylon lashing, about 2 fathoms long. This mooring rope should be passed out through a central Panama lead, if a suitable one exists (or from a fairlead on the port bow (when the ship is fitted with a bulbous bow) a line put out through a central lead, should be brought back along the forecastle, clear of the bulbous bow, and then be lowered to the water to avoid the possibility of the launch coming into contact with the bulb when coming in to collect the end of the rope. Meanwhile, two heavy 5.5 in. circumference flexible steel slip wires will have been made fast in readiness, preferably on different sets of bits, in such a manner that there is an adequate number of turns around the bitts and that the end of the eye reaches to approximately 10 ft. and 10 ft. 9 in. respectively from the Panama/fairleads. When the chain comes aboard, it is quickly secured to the wires by two 150 tons B.S. shackles, which are bolted through two of the open links in the chafing chain. The strain on the approach rope (which had followed the ship's rope round the drum-end of the windlass) is now released, and the weight allowed to come on to the wires. The approach rope is then "turned-up" as an additional mooring and the ship is now all fast in the berth. Ship's tension wires, or other mooring lines, should also be shackled or lashed to the chain, for added security.

A GOOD A.K.D. STOPPER OR SIMILAR, BUT NOT A TOWING BRACKET SHOULD BE FITTED.

When leaving the berth, the ship's additional moorings are first detached from the chain, any slack which is in the approach rope is taken in and that rope made fast very securely. The slip wires are then slacked off slowly and carefully until the strain comes on to the approach rope (when strong winds have tightened the mooring, it will probably be necessary to put the engine slow ahead before attempting to do this). The shackles can then be taken adrift, freeing the wires, and the approach rope slacked off until the chain reaches the water – care being taken to ensure that it is not allowed to fall across the hoses. The engine is then put astern, and the rope allowed to pay out easily (with half a turn around the bitts to stretch it clear) as the ship leaves the buoy.

(Reminder – unlash the ship's rope from the approach rope before unmooring from the buoy!).

Loading: Rate of loading is between 32,000 b.p.h. and 36,000 b.p.h.

Conventional Buoy Moorings: In berths "Brega" and "Dalila" the ship is berthed with two anchors streamed out ahead and mooring lines to 5 buoys round the stern and quarters. In addition, to all buoys except No. 3 (right astern) there are attached 5.5 in. circumference steel wires, laid on the sea bed, buoyed, when not in use – in all but the most settled weather these are brought into the ship by the mooring launch, hove up and made fast on board. Vessels should have ready a good 3.5 in. rope messenger to take up these wires, and strong chain stoppers, or "carpenter's stoppers", for use when securing them.

Before the ship reaches the berth, there should be three good mooring lines ready on the after end of the main deck, two of which have been securely married in readiness to be sent away first, to warp the ship round. At least seven good ropes should be ready for running out from the poop, with lashings ready in case one rope has to be married to another. Plaited polypropylene ropes, at least 120 fathoms long and of a diameter and strength appropriate to the size of the vessel, are recommended: large manilla ropes, slow and cumbersome to handle, are definitely unsuitable for berthing under these conditions.

Synthetic ropes on automatic winches are favoured in this port, but it is recommended that they be at least 150, and preferably 200 fathoms long. The winches must be capable of being firmly locked when in the moorings – any tension feature is not permissible.

When it has been necessary to slip moorings in order to leave the berth quickly and without the assistance of the mooring launches, the Company will make every effort to recover them and to return them to the vessel as soon as possible. Normally the Company makes no charge for recovering anchors and moorings, but it reserves the right to do so under exceptional circumstances.

In the conventional buoy moorings, in order that ships may be securely moored against beam winds and with sufficient chain leading ahead to ride out heavy swells, it is recommended that they be equipped with ample chain on both bower anchors. Experience gained in sea berths suggests that the chain required on each anchor should be more than the length of the ship. In vessels of 100,000 d.w.t., for which the berths were designed, it is recommended that there should be 14 shackles (1,260 ft.) of chain on each anchor. A minimum acceptable amount of chain is 10 shackles (150 fathoms) for the safety of the ship and the company's installations. Anchor marker buoys should be used.

HOSES: The lifting, lowering, connecting and disconnecting of the cargo hoses will be done by the tanker's personnel in accordance with the advice and directions of the Mooring Master. Ship's derricks and deck winches should be capable of operating with a safe working load of 7.5 tons and preferably 10 tons. Vessels with inadequate hose-lifting equipment will be rejected. All derricks should be fitted with "preventer-guys" in addition to normal guy tackles.

The port derrick must be rigged and ready for use on arrival. In addition ships leaving SPM should have the starboard derrick ready, too, in order to facilitate the discharge of the mooring gear on the lee side.

Sets of bitts, or strong staghorns, for hanging off the hoses, must be provided, suitably located near the manifold.

On the surface, extending from the buoy (to which it is connected by a Chicksan swivel (a universal joint)), is a hose string comprised of 24 (at "Echbar") 26 (at "Alpatah" and "Chahett") 30 ft. lengths of 24 in. i.d. floating hose, culminating in a floating junction box: from the other side of this junction box emerge two strings of four lengths of 16 in. i.d. hose. The end ones – the "over-rail" hoses – are fitted with 16 in. to 12 in. ASA reduction flanges, which, after the hose has been hove aboard, are bolted or clamped to the ship's manifold.

For VLCCs, additional lengths of floating hose are inserted if necessary.

LOADING: *Zueitina Crude Oils and Debutanized Condensate:* The principal cargo loaded at Es Zueitina Terminal is Zueitina Field Blended Crude Oil, pumped in from the Company's wells, 212 km. inland, but in addition certain other grades of crude oil are loaded, namely, Zueitina Medium Crude, Zueitina Premium Crude, and Zueitina Debutanised (Stabilised) Condensate. Also loaded are Liquid Petroleum Gas products, Butane and Propane (LPG) see "LPG Loading Berth", and "Agip" Buattifel Crude Oil, from the wells of Agnezia Generale Italiana Petroli, in concession 100.

Virgin naphtha also exported.

The following pertinent data will, we believe, be of interest to tanker owners and operators, Masters and Mates, and to refinery operatives in the discharging ports:-

Zueitina Field Blend
Average A.P.I. 40.1
Average Specific Gravity 0.8246
Pour point +35
Reid Water Vapour Pressure +5.2 p.s.i. at 100°F
H_2S less than 5 p p m.
Flash Point below 60°F
Average loading temperature on board 108°F
Barrels per long ton at 60°F 7.741

Zueitina Medium Blend
Average A.P.I. 36
Average Specific Gravity 0.8448
Pour point +85
Reid Water Vapour Pressure +5.0 p.s.i. at 100°F
H_2S less than 5 p p m
Flash Point below 60°F
Average loading temperature on board 98°F
Barrels per long ton at 60°F 7.582

Zueitina Premium Crude
Average A.P.I. 43.5
Average Specific Gravity 0.8086
Pour point +30
Reid Water Vapour Pressure +5.6 p.s.i. at 100°F
H_2S less than 5 p p m
Flash Point less than 60°F
Average loading temperature on board 108°F
Barrels per long ton at 60°F 7.922

Zueitina Debutanised (stabilised) Condensate and Debutanised Condensate:
Average A.P.I. 78.0
Average Specific Gravity 0.6706
Pour point −60°F
Reid Water Vapour Pressure 11.0 p.s.i. at 100°F
H_2S less than 1 p p m
Flash Point less than 0°F
Average loading temperature on board 75°F
Barrels per long ton at 60°F 9.555

The grades of cargoes to be loaded will affect the berthing schedule, irrespective of the chronological sequence of vessels' arrival times.

It is recommended that vessels take the maximum flow with due regard to safety, in order to both expedite the turn-round time and to obtain the bottom-weight to counteract the possible effect of local winds which frequently spring up with little warning.

Care must be taken not to overload, as there is no provision whatsoever for cargo once loaded to be pumped back ashore.

Warning is given of the danger of closing hoses against an incoming oil flow. Such a procedure may create excessive pressures which result in damage to loading hoses, sea lines, and other Terminal equipment. Vessels which ignore this warning and do in consequence cause such damage will be held responsible for all costs incurred for the renewal or restoration of the damaged equipment.

The attention of Masters is drawn to Safety Precautions, wherein they are reminded of their responsibilities for ensuring that all persons aboard their ships are cognizant with the hazards involved in the loading operations, and with the need for strict observance at all times of the Fire and Safety Rules. Debutanised Condensate, in particular, is a highly volatile fluid which must be treated with the utmost prudence.

(N.B. particulars of cargoes included in the foregoing are for information only and do not constitute a guarantee of quality.).

Loading – A.G.I.P "Buattifel" Crude: Because of its high wax content – 37% – A.G.I.P. "Buattifel" Crude Oil, (hereafter referred to as "Agip") has to be maintained at a very high temperature throughout its entire transit from the wells to the Terminal system, and thence via the sea lines to the berth and the loading vessel: it will arrive on board at approximately 140°F, and the heating coils in the cargo compartments must be motivated in readiness and be capable of keeping the oil at above this temperature.

Two berths "Brega" and "Chahett", have been modified for the loading of Agip cargoes – ships may be moored in either of these berths but because of the considerable heating problem involved only one of the berths at a time can be used for loading Agip cargo. Through the submarine lines to "Brega" and "Chahett" central "gut" lines have been inserted – at "Chahett" berth where the sea line is 48 in. diameter, the gut line is of 18 in. diameter, and at "Brega" – sea line 42 in. diameter – the diameter of the gut line is 16 in. These two gut lines (which are, of course, tied in ashore with the Terminal tank and metering and pumping complex) terminate 20 ft. from the headers at the seaward ends of the sea lines. The area between the outside of the gut line and the interior wall of the sea line is called the "annulus". To the headers (from which emanate the strings of flexible hoses which are ultimately bolted to the ship's manifold connections) are fitted remote control hydraulic valves, operative from the loading station within the Terminal.

Immediately prior to the berthing of the prospective Agip loading ship, hot Zueitina crude oil is circulated from its storage tank, through the gut line, and back through the annulus, heating the entire system. Once the ship is securely moored, preparations are made to replace the hot "Zueitina" oil with hot Agip oil. (60,000 barrels is the full line content at "Chahett", 33,600 barrels at "Brega"). This process will take about four hours, and ship and shore must work in conjunction to ensure that the deballasting and the recirculation of the line with hot Agip oil are completed at about the same time. This is of vital importance, for once the line system is filled with hot Agip cargo it cannot remain in circulation for more than one hour. If the ship is not then ready to receive it, the Agip oil must be replaced by Zueitina oil, and only after this has been circulated round the line can the line be again replenished with another circulation of Agip oil. This entire process may take about 12 hours – a wastage of time which neither the Terminal nor the ship operators can afford to contemplate with unconcern.

When ship and shore are ready to begin loading, the remote control valves are opened and, at a very slow rate, the cold Zueitina oil which has been in the flexible hoses is loaded – 1,500 barrels at "Chahett", 300 barrels at "Brega".

At this point, the loading officer in the ship will transfer the cargo to other tanks to avoid intermingling of the two types of crude, for now hot Agip is entering the ship's system, from the gut line. Loading continues at a slow rate until the contents of the gut line – 6,000 barrels at "Chahett", 3,600 at "Brega" – have been pumped into the ship, after which the loading of the Agip, at normal rate, is through the annulus only. (The gut line is, at this point, filled with Zueitina oil, which will remain static throughout the loading of the Agip cargo).

With about 2,000 barrels of Agip cargo to go to completion, loading is stopped in order that the ship's loading officer may check his ullages and calculations. When, in "Brega" there are 300 barrels to go, in "Chahett" 1,500 barrels, loading is again stopped briefly: this marks the completion ashore of Agip cargo being pumped into the circuit. Now the Zueitina oil in the gut line is pumped into the flexible hose strings, so that when the required quantity of Agip oil has been loaded into the vessels, the hose strings – from the headers to the terminal flanges, disconnected from the manifold – are filled with Zueitina crude oil, which will not solidify whilst the hoses lie dormant under the sea. Similarly, the Agip crude oil in the annulus of the sea line is pumped back into the tank ashore and replaced throughout the system by Zueitina crude.

The foregoing explanation pertains to vessels loading Agip cargo only, taking the minimum essential Zueitina oil solely as a line flush. If, however, a ship requires a part cargo of Zueitina crude, it will load that after completing the Agip cargo, except for that small quantity used as the line flush at the commencement.

A.G.I.P. "Buattifel" Crude, particulars:-
Average A.P.I. 41.0 at 60°F
Average Specific Gravity 0.806
Wax Content 37%
Pour point +95°
H_2S Nil
Flash Point 68°F (ABEL)
Average Loading Temperature on board 140°F to 150°F
Barrels per Long Ton 7.9 (approximate)
(N.B. The above data is for information only and does not constitute a guarantee of quality).

LPG LOADING BERTH: *Berth, Location and Nature:* The LPG loading berth is S.S.W. of the Small Craft Harbour, inside Tre Scogli Reef. It is designed for vessels of approximately 700 ft. in length, with a cargo capacity of 32,000 cu.m. Max. permissible loaded draft (1977) 28 ft.

The channel through the reef, between Trinity Buoy (painted yellow, quick flash green, Lat. 30° 53′ 30″ N., Long. 20° 02′ 48″ E.) and Wafeya Beacon – Scoglio Sud – (white skeleton tower, group flash, 6 every 10 seconds) runs in a 315° (T) – 135° (T) direction: it is marked by two leading marks, the front one in position Lat. 30° 53′ 16″ N., Long. 20° 03′ 42″ E., and the rear one 750 m. (2,460 ft.), 135° (T), from this position. Both marks are black steel pylons with black and red oblong grid topmarks: the front one shows at night an amber light flashing every 1.5 seconds, whilst the rear one shows an amber occulting light, the period of light being six seconds every ten seconds. A small white spar buoy, showing at night a quick flashing red light, marks the turning position for ships approaching or leaving the berth.

The loading platform is of structural steel, supported on concrete piles, and faced with heavy rubber fenders. Ships are berthed alongside four breasting dolphins (two of which are incorporated into the loading platform), with other mooring dolphins ahead and astern and on the inside bow and inside quarter. Ships approaching the berth swing round on the port anchor and about six shackles of chain – when moored, the chain is hove tight.

Only one loading line is used, with a connecting flange of 6 in. ASA 1,300 lbs. It is hove on board the ship with the ship's derrick or crane, or radial davit. A 12 in. Chicksan available for large vessels. Vapour line to "flare" only provided.

Such is the location of the berth – fully exposed to winds from most directions but sometimes protected partially by the reef from the worst effects of the swell – that on occasions LPG tankers cannot be berthed although the crude oil berths in the harbour are operational. And vice versa. Consequently, with regard to Port Closure Time, the LPG berth is regarded as a separate entity from the main harbour.

Arrival: On first contacting Zueitina Marine by VHF (Channel 13 or 16), the Master of an LPG tanker should, in addition to giving his ETA at the Terminal Light Float, inform Zueitina Marine of his last port, the intended port of discharge after leaving Zueitina, the quantity and grade of cargo required, the temperature at which he wishes the cargo to be loaded, the size of the ship's manifold connections, and whether or not he has aboard a Certificate of Discharge for the cargo loaded in Zueitina.

If the vessel is to berth on arrival, the Mooring Master will board in the close vicinity of the Terminal Fairway Buoy. If the ship is instructed to anchor, the Master should do so in the recommended anchorage.

Pratique, Customs Formalities: If the ship has been obliged to anchor, Pratique and Customs formalities may be dealt with in the anchorage. Alternatively, they may be attended to on board after the ship has berthed.

For information regarding documents required on arrival, Customs and Immigration procedure see "Documents".

Loading: For a ship which needs tank purging and cooling prior to loading, the minimum rate will be approximately 100 b.p.h. Inert gas is not provided at Zueitina Terminal – the vessel must provide inert gas for purging after previous cargoes other than butane or propane. The ship will not be loaded until the air has been purged to a maximum oxygen content of 0.5%. When loading has commenced, the minimum rate permitted by the Libyan Secretariat of Petroleum is 1,500 b.p.h. The maximum rate available is between 6,000 and 7,000 b.p.h. For "topping off", the rate can, within these limits, be adjusted to the requirements of the loading officer. Arrangements can be made in advance for the LPG plant to stop loading when the desired quantity has been metered into the ship, or alternatively, the ship's loading officer can instruct the Terminal to stop loading when he sees that the correct amount has been received aboard.

Loading operations on board are the responsibility of the ship's personnel. The Master's attention is particularly drawn to the Terms of Acceptance as detailed in the "Tanker Loading Advice" letter which he has signed, and to the "Zueitina Marine Terminal, Fire and Safety Rules".

The loading platform – abreast of the ship's manifold and within easy hailing distance – is manned at all times during loading operations, and the ship *must* maintain a continuous verbal contact with the loading operative. In addition, VHF contact between ship and loading installations must be maintained on Channel 12. In the event of any emergency – fire, leakage, parting of moorings, etcetera – the operative on the platform can stop the loading by remote control.

Unberthing in Bad Weather: Should deteriorating weather conditions necessitate the vessel leaving the berth quickly, a Mooring Master will be speedily available at all hours.

Cargo Particulars: The following data will, we believe, be of interest to Masters and Mates and operators of vessels loading LPG products:-

Propane
Average A.P.I. 146
Average Specific Gravity 0.510 60/60°F
Reid Vapour Pressure 175 p.s.i.g.
Free Water Nil
Copper Strip Corrosion 1a
Flash Point less than 0°F
Average Loading Temperature −40°F (−40°C)
Barrels per Metric Ton at 60°F 12.3 (approx).

Butane
Average A.P.I. 114.2
Average Specific Gravity 0.576 60/60°F
Reid Vapour Pressure 48 p.s.i.g
Free Water Nil
Copper Strip Corrosion 1a
Flash Point less than 0°F
Loading Temperature at Ship's Request, within Ranges +18°F (−8°C) to +35°F (+2°C)
Barrels per metric ton at 60°F 10.8 (approx.)
(N.B. The foregoing data is intended for information only, and does not constitute a guarantee of quality.)

Departure: Immediately after completion of loading, the manifold connections are unbolted and the loading arms retracted. Shortly afterwards the Mooring Master will board and, with the assistance of adequate mooring boats, unberth the ship and pilot it through the reef to a safe anchorage in the outer harbour before disembarking.

When the documents pertaining to the ship's loading have been completed ashore, a clerk will take them out to the ship. (On occasions he will be accompanied by a Customs Official, boarding the ship to ensure that the seals which were put on bonded storerooms on arrival have not been tampered with before the ship has left Libyan territorial water.) It is customary for Zueitina Marine to inform the ship's Master when the documents clerk leaves the Small Craft Harbour, so that the anchor may be hove up and a lee side presented to the launch.

After the documentation formalities have been completed on board, the Master is required to pass by VHF to Zueitina Marine the official sailing time of his ship.

MEDICAL: Medical facilities are limited to emergency cases only. Under certain circumstances, however, the Terminal medical practitioner will give advice to Masters by VHF in cases where Crew members appear to be suffering from undiagnosed ailments. If it is essential for a sick person to be landed, the ship's Agent must first obtain the approval of the Government authorities.

The sick person when coming ashore must be accompanied by an officer or other responsible person able to speak English, and both the patient and the person accompanying him must be in possession of passports. (Not seamen's discharge books, which are not recognised in Libya).

BALLAST: Because of the exposed position of the sea berths, it is essential that vessels arrive with sufficient ballast for safe handling, having due regard to existing weather and sea conditions. Experience has shown that a fair estimate of the amount required is one third of the summer deadweight. A tanker found by the Mooring Master to be insufficiently ballasted will be rejected. However, it is imperative for the safety of the ship and of the installation that deballasting should be as speedy as possible, to reduce the period wherein the ship is most vulnerable to any sudden deterioration in the weather. It is, indeed, to the advantage of everyone concerned if the ship is able to commence loading as soon as the hoses are connected, deballasting simultaneous with the loading of the cargo. In cases when it is essential to complete the deballasting before loading can start, and deballasting time in excess of 6 hours will be deducted from the lay time.

As there are at Zueitina no facilities for discharging it ashore, vessels must arrive at the Terminal with clean ballast.

The Mooring Master will inspect ship's ballast on boarding, and he has the power to reject any vessel that he deems would cause pollution in the Terminal waters. A vessel so rejected must proceed to a position over 100 miles from the coast, re-ballast, and return only when the ballast is completely clean. A new notice of readiness must then be tended, and the loading turn will be counted as from this second arrival.

The sea area round the ship shall be adequately lighted, as frequent inspection by the Mooring Master will be made during ballast discharge. Any pollution whatever, including bilge discharge, will be cause for rejection. Similarly, any hull leaks causing pollution during loading will be cause for rejection – a vessel rejected on these grounds will not be re-accepted until satisfactory evidence of repairs has been certified by a qualified surveyor.

On completion of deballasting, all unused cargo connections must be blanked off, sea valves closed and lashed, deck scuppers securely plugged, and drip pans placed below the cargo hose connections. All the requirements listed on the Company's Safety and Fire Precautions Check Form must be seen to be complied with before loading is commenced.

In the event that the Company has to settle any third party claims as a result of damage to property caused by pollution attributable in any way to a vessel, the Company will have the right to reimbursement by those responsible for the vessel for all expenses incurred.

FRESH WATER: No fresh water available.

FUEL: No bunkers available.

CONSULS: None locally. See "Tripoli".

REPAIRS: There are no engineering repair shops.

SURVEYORS: Various companies of cargo inspectors perform duties at Zueitina, but must be arranged prior to vessel's arrival through U.K. or Paris headquarters. No Classification Societies at Zueitina.

CUSTOMS ALLOWANCES: Each member of the crew is allowed 25 cigarettes, or 25 grammes of tobacco (Note: No alcohol), for every day of the ship's stay in port. Other tobacco and cigarettes, wines, beers and spirits, as well as matches, arms and ammunition, and saccharine, will be retained under seal whilst the ship is in Libyan waters.

REPATRIATION: Only in an emergency can any crew member be paid off. Seamen's discharge books are not recognised in Libya. Crew members are advised to have a valid passport in their possession in case of emergency.

SHORE LEAVE: No shore leave is permitted.

WEATHER: Weather conditions in Zueitina are generally clement. The temperature during the Winter seldom falls below 10°C (50°F), and in the Summer, even at midday, is rarely in excess of 35°C (95°F). The prevailing winds are Northwesterly. During the mid-Summer months, the land- and sea-breezes phenomenon is very apparent: a Northwesterly wind springs up at about 1100 hrs. sometimes to reach near-gale force by late afternoon, then gradually dying away during the evening. At about 2300 hrs. the wind begins to blow off the land – again sometimes to a fresh breeze or near-gale – before falling away completely around dawn.

During the Spring and Autumn, and in the early Winter months, there are frequent prolonged periods of calm, tranquil weather. However, in Spring especially, and again in the Autumn, such periods may be interrupted by the onset of the "gibli", an off-shore wind which, like the "khamsin" wind in Egypt, springs up with little warning to reach gale intensity, laden with sand and dust to such an extent that visibility is reduced to a few yards.

In the Winter months, prolonged periods of strong Northwesterly gales, with very heavy seas and high swells, accompanied by frequent rain squalls, are experienced. Even after the strong winds have subsided, long, high swells may continue for several hours to prevent mooring operations. Such Northwesterly gales are usually accompanied by a sharply rising barometer, and follow the passing of a cold front, with winds from the West.

Rainfall is confined to the Winter months only. Fog is rare, though it does occasionally occur in the Spring and Summer around dawn, generally dissipating after two or three hours.

GENERAL: Vessels are advised not to have on board any articles whatsoever of Israeli origin. If anything of such a nature is found it will be confiscated and the ship be liable to a fine and possibly to a delay for further investigation.

Goods – and, in particular, alcohol and tobacco – must not be taken from ship to shore, or from ship to ship.

Being an open roadstead, vessels must keep engines in a state of immediate readiness. No repairs to main engine may be undertaken in berth. Steam or electric power must be available on deck in case adjustments to anchor cables or mooring lines are found necessary. Power must be available on ship's whistles and sirens. Ship's boats must not be lowered into the sea and detached from the falls. Swimming is prohibited. The Mooring Master (and, when applicable, his assistant(s)) assigned to a tanker, will remain on board until after the vessel has loaded, unmoored, has completed documentation formalities and has cleared the Company's installations and is safely heading for she open sea. During the time he is aboard he is to be provided with accommodation suitable for one of Master Mariner status, and with palatable meals.

SHIPMASTER'S REPORT: March 1988.

Chart: B.A. Chart No. 3346.

Documents:

8 copies Crew List.
2 copies Crew Declaration.
2 copies Ship's Manifest.
1 copy Health Declaration.
2 copies Currency List.
All Passports.
1 copy Arms and Ammunition List.
1 copy Drugs List.

No alcohol allowed in cabins, all must be place in bond and manifested. "Magazines" and "calendars" must be placed under seal.

Money in the ship's safe is to be manifested. If vessel staying in Libyan coastal waters the bond remains sealed. Customs may issue a limited amount of beer but for ship use only.

Stores must be checked to make sure that there is no produce from South Africa or Israel.

The Crew Declaration and the Crew Money List must be on Libyan forms, unless first Libyan port of call.

Approach: The harbour area was observed on radar at 24 miles and Zuetina Light was observed at 15 miles. The Light Float light is weak. Zuetina D/F was operational. Taking of soundings on approach can be of assistance.

Bengazi Radio should be contacted on 2182 kHz. when inward bound. The Station was difficult to raise but the operators were polite and spoke good English. They require vessel's destination, ETA, position, course and speed.

Zuetina Terminal Telex No. 90120130 ZUELY.

Anchorage: LPG ships anchor in the anchorage indicated on BA. Chart No. 3346. If the vessel is familiar with the Port she may anchor 0.75 miles N.W. of Scoglio Sud Reef Lighthouse.

Pilot: The Pilot/Mooring Master boards at the anchorage from a mooring launch and on departure leaves at the same position. Zuetina Marine is on VHF Channel 13. Pilots stay on board whilst the vessel is at the Offshore Mooring but does not normally stay on vessels at the LPG Berth unless the weather is poor.

Entry: Between Scoglio Sud Reef Light and Q.Fl.R. Buoy in position 30° 53.55′ N., 20° 03.40′ E. less water reported. Approach and departure to the LPG Berth is made to the South and West of the Q.R. Buoy between the buoy and Trinity Shoal. Minimum depth from the Light Float to the berth was found to be 39 ft.

Tugs: One large tug/mooring vessel of 4,500 h.p. used at the offshore moorings. 3 mooring launches of 350 h.p. used at the LPG berth, these launches also used at the offshore moorings. A total of 4 launches are available and a 5th launch is under repair.

Berth: Vessels berth starboard side to. The berth is very exposed and often closed in Winter.

Berthing and unberthing possible at night time if the weather is calm, however, night berthing and unberthing not carried out if the tanks are full.

The Radar Station at Zuetina is in the same position as Zuetina Light.

The berth flat fender face is 25 m. in length with one breasting dolphin at each end. Small vessels tend to lie on the berth flat face. The berth is aligned 104° – 284°.

There is a Q.Fl.R. Light on the N.W. breasting dolphin.

Vessels leave the berth as soon as hoses are disconnected and complete paperwork at the anchorage.

Moorings: Moorings consist of 2 head/stern lines, 2 breast lines and 2 springs at each end. The head and stern lines are sent to buoys and the breast lines to the mooring dolphins. Springs are sent to bollards on the berth.

The port anchor was let go to approximately 3 shackles when approaching the berth. The mooring launches push the vessel into the berth and hold her there until all fast.

Cargo: The Chicksan arms have been taken down and only rubber hoses are used. Liquid hose is 6 in. 300 ASA. A vapour return line is available but metered and charged. It was not used.

There is a hydraulic crane on the berth for hose handling. A ship's derrick/crane is also required and ship's crew are required to make connection.

If vessel is handling butane and propane, butane is handled first. There is about 4.5 hours' wait between products whilst the line is cleared. Normal minimum rate is about 55 t.p.h. but can go slower for short periods while cooling. The normal maximum for hose loading is 200 t.p.h. Butane chilled to about −5°C. Beware of pressure reduction on loading chilled butane.

No surveyor or terminal representative was in attendance for figures at the start or finish.

There is a terminal representative in a hut on the berth during loading with a walkie-talkie on Channel 12. Channel 12 also connects with the LPG Control Room and can be contacted if there are any queries. The Bill of Lading is on the shore figures and this compares favourably with the ships's figures.

Propane can be loaded first by prior arrangement, however, the Terminal is not keen on doing this as the line is normally left under butane.

Average Specific Gravity of butane 0.567 and propane 0.508.

Facilities: Emergency medical attention is available at the Terminal Clinic. Agent advises that there are a few fresh stores available.

Customs: Beer is sometimes allowed out of bond if the vessel is proceeding outside Libya, but alcohol will not be issued if vessel is on the coastal trade. A cigarette issue is allowed.

If vessel is on the coastal trade, make sure the "Customs Rider" is correct on departure.

Papers: All departure documentation completed at anchorage after loading. The agent attends but no representative of the terminal. Completion of documentation can take up to 3 hours. The Libyan Discharge Certificate is very important and must be properly signed at the port of discharge even if on Libyan coastal trade.

General: The oil company has flights twice a week from Tripoli. Terminal personnel often arrive and leave via Benghazi which is 2 hours by road and take Air Malta flight to Valletta for onward connections.

AUTHORITY: Zueitina Marine Terminal, Zueitina Oil Co., P.O.Box 2134, Tripoli, S.P.L.A.J. *Tel:* Tripoli 38011 (ext. 116-119 Zueitina). *Telex:* 20289, 20130 Zue Ly. *FAX:* 39109. *Contact:* Captain J. Folkestad, Marine Superintendent. M. Oun, Operations Manager.

AGENCY: All ships must have an approved Agent to look after their interests. As from 1st June, 1978, all shipping agencies in the Socialist People's Libyan Arab Jamaharaya have been superseded by one nationalised company, known as The Shahat Shipping Agency.

See "General" before first port.

Cables of estimated time of arrival sent to the Agent should be in addition to, and not in place of, those sent to Zueitina Oil Company, Tripolilibya. Total charges are 750 Libyan dinars for the first 30,000 tons summer deadweight, or part thereof, plus 2 dinars 500 Dirhams for every 100 tons or part thereof in excess of 30,000 tons, plus 2% of the total sum in revenue stamps.

NOTES

Please also advise Shipping Guides Ltd.

Lithuania

KLAIPEDA: 55.43 N. 21.07 E. (See Plan)

GENERAL: A Baltic seaport, Klaipeda is situated in a narrow strait called the Morskoi Canal, which connects the Kursky Gulf with the Baltic Sea.

The Port of Klaipeda comprises the Morskoi (Sea) Canal consisting of 2 harbours: the Zimnyaya and Zavodskaya, the Fishing Port, Ferry Terminal and the Dane River quays situated by the roadway-bridge.

The port is open for navigation all the year round.

During strong winds blowing from directions between the S.W. and N.W., lying in the port is dangerous due to strong waves and surge (called "Tyagun"). In this event vessels must proceed to sea.

APPROACHES: The width of the approaching channel to the port is 100 m. and depth 11.5 m. Depths of the channel at a distance of 400 m. – 600 m. from the entrance to the Sea Canal are subject to changes due to lots of sand and mud brought down from the Kursky Gulf by the Spring floods, in particular. The entrance to the Sea Canal is protected by the Northern and Southern moles.

The length of the fairway of the Morskoi (Sea) Canal from the entrance up to the Secluma-Kyaules-Nugara shoal at the entrance to the Kursky Gulf is 4 miles, width varies from 180 m. to 300 m. and the depths are from 6 m. to 9 m. at the mean water level.

The permissible drafts for vessels navigating along the Morskoi (Sea) Canal are as follows: 10.6 m. to 8.0 m. from the canal entrance up to the Zimnyaya (Winter) harbour, but further up to the Fishing Port situated 1.5 miles and Ferry Terminal situated 2.5 miles to the South of the Dane River estuary – not more than 7.5 m. From the Fishing Port up to the Timber Harbour – not more than 5.0 m.

DEEP SEA PILOTAGE: See "Baltic Deep Sea Pilotage".

PILOTAGE: A Pilot boat usually meets a vessel at Light Buoy No. 1 (Lat. 55° 44′ N., Long. 21° 00′ E.). It carries the Pilot flag by day and lights prescribed for a Pilot boat by night.

Pilot's watch is kept 24 hours a day except in periods of dense fog and strong S.W. – N.W. winds over Force 7 Beaufort Scale.

The Master of a vessel shall order a Pilot via the Inflot Shipping Agency in advance.

The port is equipped with a coastal radar vessels' movement control system.

ANCHORAGE: Anchorage can be obtained in the outer roads at Receiving Light Buoy No. 1 (Lat. 55° 44′ N., Long. 21° 00′ E.).

The outer roads anchorage for foreign vessels is situated at a distance 3.5 miles (N.W.) from Receiving Light Buoy No. 1. Depths from 31 m. – 35 m.

The holding ground is sand and clay. Anchorage in the outer roads is not safe during heavy seas caused by Westerly winds.

RESTRICTIONS: There are no restrictions for the entry to the port.

The width of the approaching channel to the port is 100.0 m. and depth 12.0 m.

MAX. SIZE: Length not greater than 185 m. and breadth unlimited. Max. permissible draft for all vessels entering the port, 10.6 m.; and for tankers loading at installations outside main port area, 10.5 m.

RADIO: Vessels can establish radio contact through the port radio station Klaipeda Radio operating 24 hours per day on the following frequencies:

Call sign	*Frequencies (kHz) or Channel* *Working*	*Frequencies (kHz) or Channel* *Calling*	*Type of transmission*	*Time of work*
UNM-2	500	500	A1	H24
	455	454	A1	H24
	4229	4185.8	A1	HX
	6427	6278.7	A1	HX
	8473	8371.6	A1	HX
	12703	12557.4	A1	HX
Klaipeda Radio	2182	2182	A3	H24
Klaipeda Radio – 1 (ODIN) (CPR)**	16, 3, 26, 27		F3	H24
Klaipeda Radio – 2 (DVA) (Dispatcher of Port)	14		F3	H24
Klaipeda Radio – 15 (Pyatnadtsat) (Oil Harbour)	30		F3	H24
Klaipeda Radio – 5 (Pyat) (Pilot Control)	16, 9		F3	H24
Klaipeda Radio – 17 (Semnadtsat) (Shore Radar Service)		9	F3	H24

**CPR – Central Port Radio station.

Vessel traffic in the roads and harbours is governed by the Shore Signal Station equipped with radar which gives all possible information for ensuring safe pilotage.

TUGS: Ordered by Pilot if necessary. Mooring and unmooring of large sea-going vessels can be effected with tugs' assistance only. Number of tugs to be ordered depends on the weather conditions and can be agreed upon between Master and Pilot. Master should order tugs by radio well in advance. Ship's lines to be used.

BERTHING: No specific requirements. Vessels allocated berth according to kind of cargo to be loaded/discharged and their turn.

The quays of the port with depths alongside of up to 10.6 m. are equipped to handle general, bulk and liquid cargoes. There are enclosed warehouses and concrete floor sheds.

Cranes of up to 40 tons capacity are operated along quayside and by warehouses. There are also other cargo handling facilities including floating cranes up to 50 ton capacity.

STEVEDORES: Report 12 days, 96 hours, 24 hours and then 12 hours prior arrival giving ETA, and 72 hours then 12 hours prior arrival advising perishable goods, characteristics of vessel, gross capacity, number and measurement of hatches, tween-decks, shelter-decks, description and quantity of cargo, stowage plan, heavy lifts, pieces of above 3 tons each especially indicated. Day and night loading/discharging operation, Sundays and holidays included.

MEDICAL: Master to advise by radio prior arrival if medical attendance required on board.

TANKERS: Three berths. Max. draft 10.5 m. Shore facilities for discharge of ballast.

FRESH WATER: Most berths supply by shore installations, otherwise barge.

FUEL: Deliveries only by bunker barge.

CONSULS: None.

REPAIRS: All kinds of repairs for vessels of 10,000 d.w.t. can be effected.

GANGWAY/DECK WATCHMEN: Compulsory for gangway checking. Guard net and life buoy required.

OPENING/CLOSING HATCHES: Normally done by crew.

CUSTOMS ALLOWANCES: Cigarettes and wine/spirits on board limited by personal requirements; take ashore max. 2 packets cigarettes, no wine/spirits.

REPATRIATION: No facilities for crew changes. Arranging any necessary repatriation at Master's request effected by Immigration Authorities.

AIRPORT: At Palanga (25 km. from Klaipeda), served by regular lines.

TIME: GMT plus 2 hours in Winter and GMT plus 3 hours in Summer (1st April – 1st October).

POLICE/AMBULANCE/FIRE: Police, Tel: 02; Ambulance, Tel: 03; Fire, Tel: 9300, 001.

CERTIFICATES: All ship certificates required on every call.

TIDE: There are periodical alterations in the water level, chiefly due to the effects of the wind. In general, strong Westerly, Northerly, N.W. and sometimes S.W. winds raise the water and Southerly and Easterly winds lower it.

The water level usually begins to rise suddenly. It rises very quickly but lasts for a very short period of time. The max. difference between high and low level is usually observed in Autumn and Winter.

Sometimes the changes in the water level can be caused by the considerable variation in atmospheric pressure ("Seish" effect).

TELEPHONES: May be arranged on board.

SHORE LEAVE: Crew members allowed ashore with shore-pass obtainable from Immigration Authorities.

GENERAL: In case of stormy weather or dense fog vessels are lying at Outer Roads until entering permitted by Harbour Master. In such cases vessels lying alongside berth to be shifted to Inner Road.

AUTHORITY: The Port of Klaipeda Authority, Ul. Plachioji 18, 235801 Klaipeda, Lithuania. *Tel:* 1-45-94. *Telex:* 278127. *Contact:* The Harbour Master.

NOTES

Please also advise Shipping Guides Ltd.

Democratic Republic of Madagascar

ANTSIRANANA (Diego Suarez): 12.14 S. 49.26 E.

DOCUMENTS:

Documentation on Arrival:

Customs:
- 2 Crew Lists.
- 2 Personal Effects Lists.
- 2 Stores Lists (Bonded).

Immigration/Police:
- 4 Crew Lists and inspection of vessel and Seamen's Book.

Port Health:
- 1 Vaccination List and inspection of Derat Certificate.

Agents:
- 3 Crew Lists.
- Ship's Register to be lodged ashore.
- Clearance from Last Port.

Documentation on Departure:

An Official from the Port and the Agent visit and will wish to see:

For a Liner:
- Load Line Certificate.
- Safety Equipment Certificate.
- Derat Certificate.

For a Cargo Ship:
- Load Line Certificate.
- Safety Construction Certificate.
- Safety Equipment Certificate.
- Safety Radio Equipment.
- Derat Certificate.
- Ship's Register (held by the Agent).

After checking all these an Outward Clearance Certificate will be presented. One is then free to leave the Port, the Agent having given an undertaking that all Port dues have been paid.

APPROACHES/PILOTAGE: Tides run fast in the Orangea Pass, but seem to follow the pattern as per the Admiralty Pilot. Until experience is gained it should only be taken in the hours of daylight. There are numerous natural transit marks available to the navigator, all very clearly described in the 'Pilot'. For this reason it would be essential to take this in fine visibility. Pilot can be taken at Cape Mine but this can be difficult and dangerous in the S.E. Trade season and ships are advised that they can proceed on into the Bay right up to Port Antsiranana Point.

Harbour is large and commodious but subject to very strong N.E. winds from May to October, width of entrance 300 m. Tidal current in Roads, which may attain 3 knots. HWST 2.36 m., LWST 3.56 m., HWNT 1.63 m., LWNT 0.99 m. Pilotage compulsory for vessels of 150 n.r.t. and more. For obtaining Pilot, ETA must be sent 24 hours in advance including ship's characteristics. Course to steer: From Lat. 12° 13′ 09″ S., Long. 49° 26′ 00″ E. Entrance 275° thence beacons in line heading 230°.

ANCHORAGE: There are many splendid anchorages available in this vast Bay. Vessels can anchor 2 cables off the N.W. corner of the wharf at Antsiranana (Diego Suarez).

RESTRICTIONS: No entry for vessels or crews from: Formosa, South Africa and South Korea.

MAX. SIZE: No restriction except max. draft alongside 11 m.

HEALTH: Yellow fever/cholera certificates required for vessels coming from African/Indian countries. Pratique is automatic for vessels entering after calling at another port in the same country.

RADIO: Radio station is "Diego Radio".

VHF: Harbour Master's Office does not have VHF. Navy have VHF Channel 16.

TUGS: Three small tugs available (belonging to Navy and require 24 hours' notice).

BERTHING: Ocean Vessel Wharf: Length 300 m., max. depth 11 m. HW.

Coaster Quay Wharf: Length 60 m., max. depth 4.20 m.

With Pilot, vessel can come alongside day or night.

CRANES: Two port cranes, only used for small coasters. 1×5 tons and 1×2 tons.

STEVEDORES: Advise before 0700 hrs. in order to commence the same day and before 1700 hrs. in order to commence next day at 0600 hrs. with maximum gangs.

Working Hours: 0700 – 1100 hrs., 1300 – 1700 hrs. Overtime Working: 0600 – 0700 hrs., 1100 – 1300 hrs., 1700 – 0600 hrs. No half shifts.

MEDICAL: Difficult to find medicines. In case of serious illness hospital facilities available.

TANKERS: See "Berthing". Discharging rate 200 cu.m.p.h. with flexible hose. Loading rate 30 – 50 t.p.h., depending on ship.

FRESH WATER: Available.

FUEL: Not available.

CONSULS: French Consul.

REPAIRS: All types of deck and engine repairs can be carried out.

DRYDOCK: *Shipmaster's Report:* 1975.

Length overall	199.05 m.	653.00 ft.
Subdivided into sections	128.96 m. 70.09 m.	424.00 ft. 229.00 ft.
Breadth at Bottom	28.40 m.	93.00 ft.
Breadth at Coping	36.60 m.	120.00 ft.
Depth at sill and blocks at MHWS	10.42 m.	34.40 ft.

Yard Services: Nothing was too much trouble for any of their staff attending this ship. Power was a bit of a problem but they did everything to help. Fire mains, fresh water, cranes were all good. Toilets and shower-rooms were more than adequate especially after we were given our keys and had them cleaned.

Workshops: A modern well equipped yard with every conceivable service from an iron foundry to upholstery shops. A clean, well kept set of shops including the building of small craft. The Engineers of this ship were very favourably impressed with the shops and technical services.

From time to time, the yard meet with certain material supply difficulties to satisfy full needs for ship repairs. It is recommended that Owners interested in docking their vessels at this yard study this matter before contracting.

Firms Address: Societe d'Exploitation pour la Construction et la Raparation Navale, B.P. 135, Antsiranana, Madagascar. Tel: General Manager (Home) 221-70, (Office) 226-84, Central 212-65 and 222-98. Telex: 93 103. Cables: Secren, Diego Suarez.

GANGWAY/DECK WATCHMEN: Trade Union on the spot can supply.

OPENING/CLOSING HATCHES: Usually by ship's crew.

SURVEYORS: There is no Lloyd's Surveyor in the country. Often when required Lloyd's Representative flies up from Durban. Sometimes it is agreed that the resident Bureau Veritas Surveyor will sibsititute. M. Ralibera Henri in Tananarive is the principal B.V. Surveyor in Madagascar. M. Ralibera received agreement from his head office in Paris to act as non-exclusive surveyor of N.K., N.V. and local insurance company.

CUSTOMS ALLOWANCES: (Tobacco/wine, spirits) Quantity permitted to be held out of bond is only for the personal consumation of each crew member.

CARGO GEAR: Load/discharge effected by ship's gear, no heavy lift cranes available.

REPATRIATION: For crew changes Entry-Visa is required and repatriation can be carried out according to Harbour Master's Certificate and Immigration permission.

AIRPORT: AirMad Services are available each day to connect with the international Air France flights to Orly from the local airfield about 8 miles from the town.

TIME: Local time is GMT plus 3 hours.

HOLIDAYS: Sunday, but can be worked on overtime from 0600 hrs. to 1400 hrs.

New Year's Day, Commemoration of 29th March 1947, Easter Sunday and Monday, May 1st, Ascension Day, Whit Monday, Independence Day (June 26th), Assumption BV Mary (August 15th), All Saints' Day (November 1st), Christmas Day, Anniversary of the Democratic Republic of Madagascar (December 30th). No work possible on these holidays. Overtime rates for all other holidays.

TELEPHONES: No telephones placed on board.

SERVICES: Facilities for compass adjusting, radar and radio repair by Secren (see "Drydock").

BANKS:

Bankin'Ny Indostria (BNI), Angle Rue de France et Rue Colbert, B.P. 4., Antsiranana, Madagascar. Tel: 221-46, 221-52.

Banky Fampandrosoana Ny Varotra (BFV), (Banque Nationale Pour Le Commerce), Rue Richelieu, B.P. 18. Tel: 211-89.

Bankin'Ny Tantsaha Mpamokatra (BTM), (Banque Nationale Pour Le Developement Rural), Rue Richelieu, Antsiranana, Madagascar.

STORING: Local stores can be delivered directly on board even during loading/discharging, by the ship chandler. Agent will arrange Customs formalities.

SHORE LEAVE: Crew members are allowed ashore.

IDENTIFICATION CARDS: Seamen's Book is sufficient.

SPECIAL PORT REGULATIONS: See "Restrictions".

REGULATIONS: Any repair work involving even small temporary repairs only with Harbour Master's permission. Using vessel's lifeboat subject to Harbour Master's and Customs permission. Landing of foreign currency is strictly prohibited. Possession of local currency must be justified.

DELAYS: None.

AUTHORITY: Service Provincial de la Marine Marchande, au Port, P.O.Box 109, Antsiranana, Madagascar. *Tel:* 211-33.

AGENT: SCAC Transport International, Box Poste 384, Antsiranana, Madagascar. Tel: Antsiranana 21327 and 21549. Telex: 93102. Cables: Freight Antsiranana.

FORT DAUPHIN: 25.02 S. 47.02 E.

DOCUMENTS:
- Manifest of Cargo for discharge.
- Manifest of Cargo in transit.
- Ship's Stores List.
- List of Passengers Landing.
- Crew List.
- Franchise Certificate (for mail-carrying vessels).

PILOTAGE: The port is an open roadstead and pilotage not required.

ANCHORAGE: In depths of 8 m. Vessels anchoring are charged with port dues.

RESTRICTIONS: Port is normally used by coastal trading vessels. In case of liners handling cargo exceeding 150 tons, special permission required which is obtained by Agent.

HEALTH: Pratique should be requested from the Health Department, Tel: 36.

RADIO: Fort Dauphin Radio, call sign 5RD, between 0400 and 1630 hrs. GMT on following frequencies: 458, 500, 2182 and 2712 kHz.

TUGS: None available.

BERTHING: There are no berths alongside. Vessels work cargo at anchorage.

There is a crane on the dock with a capacity of 3 tons.

STEVEDORES: Arranged by the Fort Dauphin Lighterage Company. Advance notice of ETA required to arrange gangs. Average loading/discharging rate is 10 tons per hold per hour.

MEDICAL: 2 hospitals available in the town.

TANKERS: 1 buoy berth for tankers.

FRESH WATER: No water barge. Only small quantities can be supplied in emergency.
FUEL: Not available.
CONSULS: France.
REPAIRS: Only facilities available for repairing lighters.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Opening and closing hatches carried out by stevedores.
CUSTOMS ALLOWANCES: 1 carton of cigarettes per man. No alcohol.
REPATRIATION: No facilities for effecting crew changes.
AIRPORT: Situated 5 km. from the port, 3 regular flights per week.
TIME: GMT plus 3 hours all year round.
HOLIDAYS: Days on which work is normally carried out with overtime payment: Easter; Ascension Day; Whitsun; Assumption; Christmas.

Official holidays on which work can be arranged by special permission: 1st January; 1st May; 26th June (Independence Day); 30th December; Festival of the Republic.
FIRE/POLICE/AMBULANCE: Police Tel: 49; Fire 19; Ambulance 36.
SHORE LEAVE: Not permitted.
AUTHORITY: Service des Ports' Phares et Balises, Tananarive.

AGENT: SCAC Transport International, BP 425, Tananarive, Madagascar. Tel. 20631. Cables: "Freight Tananarive". Telex 22251. Fax: 233730.

MAHAJUNGA (Majunga): 15.44 S. 46.20 E.

DOCUMENTS:
List of Crew Members.
List of Passengers.
Customs Documents.
Health Documents.
Manifests.
Bills of Lading.
Ship's papers.
Certificates: See "Toamasina".
PILOTAGE: Vessels requiring Pilot must apply by cable to Mahajunga Harbour Master's office at least 24 hours before arrival. Pilot embarks at Narcissus buoy.
ANCHORAGES: Indicated to Ship's Master by cable from Mahajunga Harbour Master's office.
RESTRICTIONS: Ships can enter day and night. Max. draft allowed 10 m.
MAX. SIZE: No restriction except for max. 10 m. draft.
HEALTH: Pratique automatic when vessel comes from a Madagascar port. Pilot is health agent.
RADIO: Radio Mahajunga.
STEVEDORES: Vessel informs Agent by telegraph 24 hours in advance of number of gangs needed.
MEDICAL: Hospital available.
TANKERS: 1 berth, max. draft 10 m.
FRESH WATER: Unlimited drinking water.
CONSULS: French and Greek Consulates.
REPAIRS: Minor repairs only.
CUSTOMS ALLOWANCES: See "Toamasina".
REPATRIATION: All facilities available.
AIRPORT: Served by regular airlines; 7 km. from town.
TIME: GMT plus 3 hours.
HOLIDAYS: Catholic and official holidays. Commercial transactions possible on public holidays.
POLICE/FIRE/AMBULANCE: Police 24–85; Fireman 13; Hospital 29–15.
AUTHORITY: Harbour Master.

AGENT: SCAC Transport International, B.P. 256, Mahajunga. Tel. 22387 and 22008. Telex: 62710. Cables: Freight Mahajunga.

PORT ST.LOUIS: 13.05 S. 48.50 E.

SHIPMASTER'S REPORT: August 1990.

CHARTS: B.A. Chart No. 3873 and French Chart No. 5404.
DOCUMENTS:
Clearance from last Port.
1 Health Declaration.
1 Vaccination List.
7 Crew Lists.
4 Personal Effects Declarations.
2 Stores Lists.
1 Passenger List.
1 Arms and Ammunition List.
1 Narcotics List.
1 Parcel List.
4 Cargo Manifests.
PILOTAGE/APPROACHES: The port is an open roadstead and pilot is not available and also not required.

The approach to the anchorage with radar presents no difficulties. At night time without a radar, however, it is difficult, because of the non-existence of any buoys or lighthouses.
ANCHORAGES: As per Port Control's advice, the vessel anchors in position 13° 04.6′ S., 48° 45.7′ E., about 3.5 miles off the closest shore line, in about 9 m. of water. The holding ground is soft mud and sand, vessel did not drag.
RESTRICTIONS: No information available.
MAX. SIZE: No information available.
HEALTH: Pratique is normally granted after doctor visits the vessel.
RADIO: All local W.T. stations are reported to be inoperative. Cape Town Radio (ZSC) was used to relay ETA messages, which seemed to have arrived in time.
VHF: Channel 16 is used by Port Control and agents.
RADAR: No port radar services available.
TUGS: There are 3 small tugs of about 500 h.p., used for towing the barges to the anchored vessel. One tug is permanently under repair.
BERTHING: No berthing. There are two small tide bound jetties of 100 m. length each, which are used to load and unload the barges.

It is said that there are 12 barges, but 7 barges are in a very bad state of repair. The capacity of each barge is about 100 tons.
CRANES: It is said that there is 1 crane of 20 tons, and 2 cranes of 3.5 tonnes, on the jetties. One crane is under repair.
BULK CARGO FACILITIES: No facilities. Export products are raw sugar and molasses. Sugar is brought to the vessel in bags, hauled aboard with slings and nets, and poured into the holds through openings between hatch covers or pontoons, by cutting the bags.
STEVEDORES: Available in sufficient numbers at all times and on very short notice. Stevedores in port work in two shifts (0600 hrs. – 1800 hrs. and 1800 hrs. – 0600 hrs.).
MEDICAL: It is said that there is a hospital with all facilities.
TANKERS: No information available.
DENSITY: 1025.
FRESH WATER: It is said that fresh water can be supplied by barge. The cost is about U.S.$ 3.00 per ton.
FUEL: No information available.
CONSULS: There are no consuls locally.
REPAIRS: No information available.
DRY DOCKS: None.
SURVEYORS: None available.
GANGWAY/DECK WATCHMEN: Not compulsory, and also not necessary.
HATCHES: Opening and closing of hatches is normally carried out by crew.
CUSTOMS ALLOWANCES: No restrictions, stores are not sealed. 1 Customs Officer stays on board.
CARGO GEAR: Ship's gear is used.
REPATRIATION: There is a small local airport at Sirama, 7 km. away from Port St.Louis, which is connected with daily flights to Antsiranana (Diego Suarez), 134 km. away, and from there via the international airport of the Capital.
AIRPORT: See "Repatriation".
TIME: Local time is GMT plus 3 hours.
HOLIDAYS: See "Antsiranana" (Diego Suarez).
POLICE/AMBULANCE/FIRE: No information available.
EMERGENCY CO-ORDINATING CENTRE: No information available.
TELEPHONE: No information available.
SERVICES: No information available.
BANKS: Banque Tantsaha Mpamokatra BTM at Sirama.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: ID cards are not issued.
REGULATIONS: No particular or unusual regulations.
DELAYS: Delays are normally caused when tugs cannot bring barges, due to the tide bound jetty. Also tugs are not powerful enough. Due to the delays, an average loading rate of about 750 tons per working day (2 gangs) was experienced.
GENERAL: 6 persons are accommodated on board. Since most stevedores are also staying on board, a fire burning portable stove for feeding the stevedores, as well as a portable water tank, is put on board. Tugs and barges are in a poor state. Robberies were not reported.
AUTHORITIES: See "Antsiranana" (Diego Suarez).
AGENT: Local Agent: Direction d'Etablissement at Sirama.

Main Agents: Societe Siramamy Madagascar, Rue de Belgique, Boite Postale 1633, 101 Antananarivo, Madagascar. Tel: 252.35. Telex: 22372. Cables: Sirama Antananarivo.

TOAMASINA (Tamatave): 18.08 S. 49.22 E. (See Plan)

DOCUMENTS:
Merchant Marine Department:
Safety Certificates.
Crew List.
Passengers List.
1 Full Set Cargo Manifest.
Health:
International Maritime Certificate of Health.
List of Passengers Disembarking.
Transit Passengers List if any.
Derat Certificate.
Crew List.
Immigration:
List of Passengers Disembarking (required on arrival and before ship's departure).
Transit Passenger List if any.
4 Copies Crew Lists.
Customs:
Ship's Register.
3 Stores Lists.
3 Crew Effects Lists.
3 Crew Lists.
5 Full Sets Cargo Manifests.
3 Lists Passengers Disembarking and Transitting if any.

Port:

4 Full Sets Cargo Manifests.

4 Dangerous Cargo Lists.

Agents:

2 Full Sets Cargo Manifests.

Certificates: Safety Certificates (3), Derat or Exemption Certificate, Register, Load Line Certificate.

PILOTAGE: Compulsory. Telegraphic address: Porttave Toamasina. Telex: 55619 Port Mg. Ships advise Agents hour of ETA. Pilots informed by Agents. Due to the extension of breakwater, the South Pass is closed to deep-sea ships, except small coastal vessels. For large vessels, the pilot boat waits on the East Pass on line 277° True or range approximately 3.3 miles S.S.E. of Prunes Island Lighthouse.

The pilot boat is fitted with a small portable VHF set (Channels 16, 12, 9 and 6) but its effective range is only about 5 miles.

ANCHORAGES: No special anchorage. If no berth available on ship's arrival, Pilots put ships at best anchorage, according to draft and length of ship, between Reef and shore.

Acts of piracy have taken place at the anchorage.

RESTRICTIONS: Ships enter and sail day and night any time. Max. tide only 3 ft. However, tankers berth in daytime only between 0500 hrs. and 1500 hrs.

MAX.SIZE: For Roads, max. length about 200 m. (concerns only passenger ships). For cargo vessels max. length 180 m.; max. draft 31 ft. 2 in. (9.5 m.).

For tankers, max. LOA 230 m., max. beam 31 m., max. draft 12.20 m. in salt water. Distance from stern to manifold 110 m.

HEALTH: Quarantine message sent to Agents who inform Health Service. "Q" flag must be hoisted during daytime or red over white light at night time if health satisfactory. Master presents Maritime Declaration of Health. Health Officer and Immigration board at Quarantine Anchorage.

RADIO: Toamasina Radio, call sign 5RS.

VHF: Toamasina Radio – Channels 16, 26 and 27.

TUGS: 1 tug of 1,750 h.p. available to assist berthing. One tug 200 h.p. for towing fresh water barge.

BERTHING: 4 berths for deep-sea ships and 2 berths for coastal ships. Ships moored at berth in order of arrival and according length and draft. Mooring has to be very strong, due to swell that may sometimes enter harbour when S.E. trade winds are strong, or if cyclone in vicinity. Swell is so dangerous that ships have to go to anchorage or put to sea until weather improves.

CRANES: Mobile crane of 45 tons available.

STEVEDORES: ETA to Agents must give hatches, tonnages, and all information about cargo.

Working hours: 1st shift 0700 – 1400 hrs., 2nd shift 1400 – 2100 hrs. On Sundays there is one shift 0700 – 1400 hrs. at overtime rates.

MEDICAL: Preferable to inform Agents in advance. All hospital facilities available.

TANKERS: 1 refinery imports crude oil and exports fuel and refined oils. Tankers moored using anchors forward, and moorings aft.

Diameter of lines 12 in. No slop discharge facilities. If tanks are to be washed, slops must be discharged outside harbour.

Shipmaster's Report: A brief description of the berthing manoeuvre is as follows:

About 350 m. from the berth, let go starboard anchor and swing around to starboard with the assistance of a tug, slacking the cable all the time. As vessel completes swing, let go Port anchor, then slack down both anchors. Vessel usually finishes up with about 9 shackles on each anchor. Aft, vessel secures with 4 lines from the starboard quarter to the buoy and 4 lines from the port quarter to the quay. The mooring operation takes about 2.5 hours and unmooring about 1.5 hour.

Facilities:

1. One 12 in. rubber hose, connected always from the starboard side. You can expect 4-5 hours for connecting up the hose and about 2-3 hours for disconnecting.
2. The shore tanks are situated about 5 km. from the vessel, and have a total storage capacity of about 100,000 cu.m. The tanks are located about 4 m. above sea level, the heights of the tanks being approximately 13 m.
3. The main pipe-line is 20 in. diameter by 5 km. long.
4. Maximum back pressure permitted is 6-7 kg. However, in view of the length and size of the line it is very difficult to obtain such a pressure, even with all 3 pumps going all out. Understand from the refinery Superintendent that maximum back pressure so far attained was 4 kg. The back pressures are monitored by gauges fixed on the manifold and on the quay.
5. The maximum draft permitted at the Tanker mooring is 40 ft. Fully laden tankers arriving can berth only in daylight hours. However, 24 hour sailing is possible.
6. The cargo discharging operations are as follows: The main pipe-line is kept constantly filled with bunker fuel and has a capacity of approximately 1,000 cu.m. After connecting up vessels commence discharge of their crude. The bunker fuel in the line is thus pushed back and stored in a separate tank ashore. The vessel then continues to discharge her full cargo. After completing discharge, all tanks are inspected and a dry certificate obtained. The refinery then pushes back the pipe-line crude (1,000 cu.m.) and about 1,200 cu.m. of bunker fuel, which must be stored on the ship in separate tanks. Thereafter, the vessel must discharge all crude, and finally the bunker fuel.

   Thus the pipe-line is constantly kept filled with bunker fuel.

   The drawbacks to the vessel are obvious. 3 individual stripping operations are involved viz. stripping the crude during completion of discharge, stripping of pipe-line crude stored in the ship and stripping of the bunker fuel.

   Note: Capacity of shore pumps (when transferring oil back to ship) is 800 t.p.h.
7. Communications: A telephone is installed aboard for contact between ship and shore. This however, never seems to be at its best when you need it most. Other difficulties are the language barrier (French being spoken). Notwithstanding, the slow rate of discharge obtainable, helps to offset in part the lack of communications.
8. Out-turn quantities: It is understood that these are checked by sounding shore tanks.
9. Bunkers are available on 24 hours notice. Range Redwood 1,000–1,500 seconds.
10. Diesel oil is available, however, as the supply barge has been out of commission for sometime now, supply cannot be depended upon.
11. Fresh Water available.
12. Connection and disconnection of the cargo pipe-line is undertaken by the refinery personnel.

DENSITY: 1023.5.

FRESH WATER: Delivered by water-boats at rate of about 100 t.p.h.

FUEL: Available alongside. Gas oil and diesel oil at 70 t.p.h. Fuel oil at 110 t.p.h.

FIRE PRECAUTIONS: 1 fire-boat stationed near tankers.

CONSULS:

Denmark Tel: 2615
Great Britain Tel: 2680
Netherlands Tel: 2632
Norway Tel: 2549
France Tel: 2721
Sweden Tel: 2136

REPAIRS: Only small repairs possible.

GANGWAY/DECK WATCHMEN: Recommended. Very low cost.

OPENING/CLOSING HATCHES: Booms always operated by crew. If hatches are Macgregor type, by crew; otherwise by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes. Wine/Spirits, 1 opened bottle.

REPATRIATION: Possible, arranged by Agents.

AIRPORT: Served by regular airlines. 1 flight a day by Air Madagascar to Tananarive and 4 to 6 flights a week from Tananarive to Africa and Europe.

TIME: Local time GMT plus 3 hours.

HOLIDAYS: 13 holidays per year. Cargo work cannot be arranged on holidays but can be on about every second Sunday.

TELEPHONES: 2 connections at 2 berths used for passenger ships, but may be requested by other ships.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Only seaman's papers required.

GARBAGE DISPOSAL: The Port Authority provides a collection service on request.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: Apostolat de la Mer, P.O.Box 98, 16 Rue de la Reunion, Toamasina. Tel: 324-11.

CURRENCY: Malagasy Franc (FM). U.S.$ 1.00 = FM 1798.17.

DELAYS: Not fixed. When all berths occupied, ships wait at anchorage.

GENERAL: Small tugs and lighters for ships operating on roads. One port launch for crews of ships at anchor.

DEVELOPMENTS: New quay recently constructed.

AUTHORITY: Societe d'Exploitation du Port de Toamasina, B.P. 492, Republic of Malagasy. *Tel:* 321-55/56, 327-60/68/69/71. *Telex:* 55619 Port Mg and 55623 Port Mg. *FAX:* 33558.

AGENT: SCAC Transport International, Rue du Capitaine-Shoel, BP 411, Toamasina, Madagascar. Tel. 5320-48; 5320-49; 5326-80; 5326-81. Telex: 55610/55611/55628. Fax: 532910. Cables: "Freight Toamasina".

NOTES

Please also advise Shipping Guides Ltd.

Madeira

FUNCHAL: 32.38 N. 16.55 W. (See Plan)

DOCUMENTS:
Maritime Declaration of Health.
5 Crew Lists.
12 Lists of Passengers Finally Landing.
5 Lists of Passengers in Transit.
1 List of Stores and Provisions, including Deck and Engine Stores.
1 List of Contents of Shops on board.
6 Copies of Manifest of Cargo for Discharge.
2 Copies of each B/Lading of Cargo for Discharge.
1 Copy of Manifest of Cargo in Transit.
1 List of Passengers Finally Landing, visaed by Portuguese Consul at original port.

All other entry and clearance documents are arranged by the Agents.

PILOTAGE: Vessels should radio their ETA to Agents who order Pilot. 24 hours' notice requested. Pilot launch flies "H" flag during day. Exhibits bright white light over red at night. To request Pilot on approach by day fly international "G" flag, or give 2 long and 1 short blast on whistle. At night flash 2 long 1 short. For vessels berthing alongside Pilot boards in bay; for vessels anchoring Pilot does not board but pilot launch indicates where vessel should anchor. Pilot boat equipped with VHF, Channel 16 (calling) and Channel 6 (working).

ANCHORAGE: Permitted anchorage within 800 m. – 900 m. East from end of breakwater or 300 m. – 500 m. South of breakwater within a limit of 400 m. from shore.

RESTRICTIONS: None.

MAX. SIZE: No limit to size of vessels which can anchor, but all anchorage positions should be indicated by pilot launch. For vessels berthing alongside quay max. permissible length 990 ft. max. draft 36 ft. Oil carriers discharge at buoys at Praia Formosa 3 miles to West of Funchal. Max. length of oil tankers than can berth at oil discharge buoys 665 ft. max. draft 36 ft.

HEALTH: Free Pratique may be arranged by Master sending wireless message addressed "Port Doctor Funchal" – "Request Free Pratique arriving . . . from . . . sailing to . . . number passengers . . . landing . . . number passengers in transit . . . number of crew . . . all well. Master".

In event suspected disease or fever on board Master should wireless either Port Doctor direct or to ship's Agents, who will inform Port Doctor. The Master will then be instructed what further action he is to take.

When vessel other than of national flag arrives after calling at another port in same country usual procedure applies, i.e. Masters' radio for Free Pratique or Pratique granted by Doctor visiting in bay.

RADIO: Maderia Radio Station, call sign "CUB" 500 kHz. Same station normally used by Agent when communicating with vessel.

TUGS: Two tugs each of 1,000 h.p. – 1,100 h.p. (bollard pull 18 tons) are available.

N.B. Vessels up to 2,000 gross tons are not obliged to use tugs.

Vessels of between 2,000 and 15,000 gross tons are obliged to use 1 tug. Vessels over 15,000 gross tons are obliged to use 2 tugs.

BERTHING:

Quay No. 1	Length 139 m.,	depth 6 m.
	Length 41 m.,	depth 7 m.
	Length 19 m.,	depth 8.5 m.
Quay No. 2	Length 425 m.,	depth 11 m.
Quay No. 3	Length 347 m.,	depth 11 m.

CONTAINER FACILITIES: Container Terminal: Length 260 m. Depth 7.0 m.

Equipment: 1 Crane, 25 tons at 20 m.
1 Crane, 30 tons at 30 m.
1 Mobile Crane, 22 tons at 20 m.
1 "Travelift" of 45 tons capacity.
4 Container Handling Cranes with extendable spreaders for 20 ft., 30 ft. and 40 ft. containers.

STEVEDORES: When ships require labour, Agents must be notified before 1600 hrs. on working days and on Sundays and holidays before 1100 hrs., after these hours labour not available for last minute engagement. On Christmas Eve work stops at noon, even if ships loading or discharging. No labour available Christmas Day, New Year's Day or Easter Sunday.

Grain cargoes can only be worked from 0800 hrs. to 2000 hrs. daily, including Sundays, and a maximum of 4 gangs only can be worked simultaneously.

Bulk cargoes such as potash and fertilisers need to be bagged on board. Receivers supply the bags – and this generally applies to grain. Bulk cement, clinker and granulated plaster is discharged by grabs.

MEDICAL: Advance notice is required by Agents for any medical attention required. Hospital facilities available. No inoculations required.

TANKERS: Diameter of connection of discharge lines 8 in. into pipelines of 12 in. diameter for black fuel and 10 in. diameter for white fuel. 1 anchorage buoy berth with max. draft of 36 ft.

DENSITY: Salt water.

FRESH WATER: Available at all berths. Order through Agent. Approximate delivery rate 60 t.p.h.

FUEL: Fuel oil available from 3,500 seconds Redwood 1 to 200 seconds Redwood 1. Also marine diesel and gas oil. 12 hours' minimum notice required.

FIRE PRECAUTIONS: At discharging buoys usual non-smoking precautions.

REPAIRS: Repair yard available which can carry out most engine repairs on board except removing or replacing main engines. Hull work limited to removing riveting or replacing hull plates above water line, electric and oxy-acetylene welding. Most electrical work can be effected but notice required in regard to materials necessary. Foundry where castings can be made up to one ton weight.

DRY DOCKS: None.

CONSULS:

Austria	21057	Monaco	20041
Belgium	20255	Netherlands	20317

Italy	23890	Venezuela	24050

GANGWAY/DECK WATCHMEN: Gangway watchmen recommended.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCES: Tobacco, Wine and Spirits: Moderate supplies allowed for personal use during ship's stay.

CARGO GEAR: No specific local safety regulations. Vessels discharging must provide strops, slings and nets. Lifts over 5 tons must be effected by ship's gear.

10 mobile cranes are available.
1 crane – 6 tons at 12 m., 3 tons at 24 m.
3 cranes – 5 tons at 20 m.
3 cranes – 3 tons at 12 m.
1 crane – 15 tons at 13 m.
1 crane – 45 tons at 3 m.
1 crane – 20 tons at 3 m.

A floating crane is available which can lift up to 27 tons from the water line up to 8 m. This same crane can lift up to 20 tons from the water line to 12 m.

REPATRIATION: Limited facilities for crew changes. Necessary repatriations can be made.

AIRPORT: At Santa Cruz, 20 km. East of Funchal. Service between Funchal and Lisbon operated by national airline TAP, 19 flights weekly Funchal/Lisbon/Funchal.

TIME: GMT maintained throughout year.

HOLIDAYS: New Year's Day (totally unworkable); Easter Sunday (totally unworkable); Municipal Holiday (local) (workable, 50% overtime); Camoes Day (workable, 50% overtime); Corpus Christi (workable, 50% overtime); Assumption (workable, 50% overtime); Proclamation of the Republic (workable, 50% overtime); All Saints (workable, 50% overtime); Independence of Portugal (workable, 50% overtime); The Immaculate Conception (workable, 50% overtime); Christmas (totally unworkable).

Workers' Day, Portugal Day and Good Friday are also totally unworkable.

Saturday is an ordinary working day. December 24 (workable up to 1500 hrs. only).

POLICE/AMBULANCE/FIRE: Police 22022; Ambulance 22122; Fire 21163.

SHORE LEAVE: All crew visiting shore must be in possession of special Landing Card, plus Identity Cards, Discharge Books or Passports, which must be shown to Immigration Officer at gangway. Crew Landing Cards must be stamped by Immigration Officer before crew can proceed ashore.

IDENTIFICATION CARDS: Required.

GENERAL: There is a marina for 200 craft with depths between 3 m. and 6 m.

AUTHORITY: Capitania do Porto do Funchal, 9000 Funchal, Madeira.

Direccao do Porto do Madeira, Av. Sa Carneiro, 9000 Funchal, Madeira. *Postal Address:* Apartado 246, 9003 Funchal, Madeira. *Tel:* 21041, 25281, 25288. *Telex:* 72290 Dipmad P. *FAX:* 20196, 21042. *Contact:* Menezes Vasconcelos, Port Director.

NOTES

Please also advise Shipping Guides Ltd.

Malaysia

BINTULU, Sarawak: 03.16 N. 112.59 E. (See Plan)

PORT LIMITS: Following the arc of a circle with a radius of 10 nautical miles radiating from Tanjong Kidurong Point in position Lat. 03° 16.1′ N., Long. 113° 03.20′ E.

Fairway Buoy: Lat. 03° 16.35′ N., Long. 112° 59.0′ E.

DOCUMENTS: The required documents are:
4 copies Last Port Clearance/Shipping Arrival Report.
1 original Maritime Declaration of Health.
6 copies Crew List.
4 copies Voyage Memorandum.
6 copies Passenger List.
3 copies Vaccination/Cholera List.
3 copies Personal Declaration.
1 original Bonded Stores List, Ex-Customs.
5 copies Provisions List.
3 copies Engine Stores List.
3 copies Arms and Ammunition List.
3 copies Transit Manifest.

APPROACHES: The approach channel is a dredged channel 5.7 km. long, 240 m. wide with a depth of 15.0 m. at Chart Datum and is provided with leading lights and buoys. All navigational aids are reliable. For prominent points refer to B.A. Chart 2100. Current runs at 2 knots and tidal range is 2.2 m.

PILOTAGE: Pilotage is compulsory and available day and night.

Notification of Arrival: 24 hours notice of ETA required.

LNG/LPG/Ammonia vessels to give 72 hours notice.

Pilot Boarding Ground: Lat. 03° 18.0′ N., Long. 112° 58.5′ E.

VHF: All vessels shall contact Port Control by VHF Channel 12 at least 3 hours before arrival at the Pilot Boarding Ground or as soon as VHF contact can be established.

ANCHORAGE: Depth at anchorages varies from 12.0 m. to 26.0 m.

There are different anchorages within the Bintulu Port water limits:

Areas	*Depths*
(a) General Cargo Anchorage	5.0 m. – 22.0 m.
(b) Waiting Anchorage	24.0 m. – 28.0 m.
(c) Gas Tanker Anchorage	24.0 m. – 26.0 m.
(d) Petroleum Anchorage	21.0 m. – 25.0 m.
(e) Explosives Anchorage	7.0 m. – 21.0 m.

RESTRICTIONS: Depth at General Cargo Wharf is 10.5 m. Depth at Bulk Cargo Wharf is 13.5 m. Depth at LNG Jetty is 15.0 m.

No berthing after sunset at LNG Jetty.

MAX. SIZE: Max. draft for general cargo vessels is 10.0 m.

HEALTH: Maritime Declaration of Health to be completed on arrival in accordance with International Sanitary Convention, 1944.

VHF: Receiving channels used within Bintulu Port are as follows:
Channel 12 – Working channel.
Channel 14 – Port Operations.
Channel 16 – International calling.
Port offers 24 hours service.

Vessels are required to establish contact with Port Authority Control Tower, call sign "Mike Kilo" (MK) on Channel 12 for pilots, etc., at least 3 hours before the expected time of arrival and departure from the port.

TUGS: Use of tugs is compulsory and depends on the size/length of the vessel:

Particulars of 4 Steerable Thruster Tugs:

LOA:	37 m.
Length of Design Waterline:	35.5 m.
Breadth (moulded):	11.0 m.
Depth (moulded):	4.20 m.
Main Engines:	MWM TBD 441 V12 2×1,956 h.p. @ 900 RPM each. Engine couple to Liaaen CP compass thruster type TCN 92/68-230.
Auxilliary Engines:	3×MWM D232V8 85KW/415V/50 HE.
Speed	13.5 knots.
Bollard pull:	42 tonnes.

Particulars of 2 Twin-Screw Tugs:

LOA:	27 m.
Length of Design Waterline:	26.5 m.
Breadth (moulded):	8.00 m.
Main Engines:	2×MWM TBD 440-6. 2×929 HP @ 900 RPM.
Auxilliary Engines:	2×MWM TD 232 V8.
Speed:	11.5 knots.
Bollard pull:	23 tonnes.

BERTHING: 3 berths with a total length 514.5 m. for general cargo.
1 berth of 270 m. for bulk cargoes.
1 Ro/Ro Ramp of 25.5 m.
1 Jetty for LNG vessels only.
1 Jetty for petroleum products.

The wharf apron for the General Cargo Wharf is 24 m. and for the Bulk Cargo Wharf it is 30 m. The depth alongside the General Cargo Wharf is 10.5 m. and alongside the Bulk Cargo Wharf it is 13.5 m.

CRANES: 1 Gottwald mobile crane with 100 tonnes lifting capacity, 1 mobile crane with 30 tonnes lifting capacity at 10 m. radius and 1 mobile crane with 15 tonnes lifting capacity at 7.0 m. radius.

STEVEDORES: Stevedores and cargo handlers are obtainable from the Port Authority Traffic Department.

TANKERS: There is a Petroleum Jetty which could accommodate vessels of 30,000 d.w.t. With the present depth of 9.0 m. it can only accommodate vessel of 10,000 d.w.t. However, the area can be dredged further to accommodate 30,000 d.w.t. vessels.

Also see "Bintulu Terminal".

DENSITY: Average 1009 – 1025.

FRESH WATER: Available at berth. No limitation as to vessel's requirement. Rate approximately 35 – 40 tonnes per hour.

FUEL: High speed diesel available. Price varies from time to time. The supply is by bunker barge and tank trucks at all berths. Other fuel as well as marine lubricants can be obtained through suppliers.

REPAIRS: Deck and engine not attended. Minor repair facilities exist.

SURVEYORS: Kinabalu Adjusters and Surveyors Sdn. Bhd., Mr. Mathews G. Ingan. Tel. 086-34620. Kinabalu Adjusters and Surveyors Sdn Bhd., includes insurance for cargo and cargo claims, etc.

Class survey – available by special arrangement.

GANGWAY/DECK WATCHMEN: Usually ship's crew and ship's gangway.

OPENING/CLOSING HATCHES: Stevedores or ship's crew, whichever to ship's advantage.

CUSTOMS ALLOWANCES:
25 sticks cigarettes per day per man.
1 quart beer/stout/wine per day per man.
One-eighth quart spirit per day per man.
8 sticks cigars per day per man.
1 oz. tobacco per day per man.

CARGO GEAR: Cargo gear is available for loading/discharging, etc., for heavy lifts up to 100 tonnes.

REPATRIATION: Crew changes and repatriation possible.

AIRPORT: Distance 20 km., served by Malaysian Airline System (MAS).

TIME: Local time is GMT plus 8 hours.

HOLIDAYS:
(a) First Day of Chinese New Year.
(b) First Day of Hari Gawai (1st June).
(c) First Day of Hari Raya Puasa.
(d) National Day (31st August).
(e) Christmas (25th December).

POLICE/AMBULANCE/FIRE: Dial 999 and ask for service required.

TELEPHONES: Connecting points available at berth.

BANKS:
1. Bank Bumiputra Malaysia Bhd., Bangunan BDA, Bintulu. Tel: 086-331320.
2. Bank Utama Malaysia Bhd., Jln. Sommerville, Bintulu. Tel: 086-331133.
3. Hock Hua Bank Bhd., 23 Jln. Sommerville, Bintulu. Tel: 086-331433.
4. Malayan Banking Bhd., 24 Jln. Abang Galau, Bintulu. Tel: 086-331635.
5. Standard Chartered, 89 Jln. Keppel, Bintulu. Tel: 086-331272.
6. Malayan United Bank Bhd., 186 Taman Sri Dagang, Bintulu. Tel: 086-332393.

SHIP SUPPLY SERVICE: Pau Chiong Tai is the local ship chandler. Prices are reasonable.

SHORE LEAVE: Shore leave is normally allowed up to 1800 hrs., according to Immigration bye-law.

GARBAGE DISPOSAL: Garbage disposal service is available. Rubbish bins are provided at strategic locations throughout the port. The service is provided free of charge.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Malaysian Ringgit (MYR$). U.S.$ 1.00 = MYR$ 2.70 (29.4.91).

DELAYS: Vessels generally berth on a "first come first served" basis, irrespective of day or night. No delays experienced so far at Bintulu Port.

GENERAL: The port is an "all weather port" and the most modern port in Sarawak. When a vessel is within the port limits, extra precautions must be taken to avoid oil spillages, etc.

When vessel is lying at berth no rubbish should be thrown overboard. The Port Safety Officer will board vessel, under normal circumstances, to inspect the ship prior to loading.

Preventive measures must be taken to avoid the risk of fire whilst at Bintulu Port Authority's wharf.

AUTHORITY: Bintulu Port Authority, P.O. Box 296, 97007 Bintulu, Sarawak, Malaysia. *Tel:* 086-251001/7 (7 lines). *Telex:* Biport Ma 73179. *FAX:* 086-252929. *Contact:* En. Ramli Abu Samah, General Manager.

BINTULU TERMINAL: 03.16 N. 113.04 E. (See Plan)

LOCATION: The single buoy mooring is positioned at Lat. 3° 20′ N., Long. 113° 01′ E. and can accommodate tankers with max. SDWT of 350,000 tonnes.

DOCUMENTS:
Last Port Clearance.
9 Crew Lists
3 Malaysia Crew Lists (Provided on arrival).
2 Copies General Stores Lists.
1 Shipping Arrival Report (Provided on arrival).
1 Application for Clearance (Provided on arrival).
5 Passenger Lists.
3 Narcotics Lists.
3 Arms and Ammunitions Lists.
2 Crew Personal Declaration Lists.
2 Vaccination Lists.
3 Copies Inward Manifest ("Nil" Manifest required).
International Maritime Health Form, provided by Agent.

Note: If vessel from an infected port of which the state of health is suspect, the Medical Officer may board in order to inspect crew and relevant international medical certificates.

PILOTAGE: Bintulu Port Authority Pilot, Loading Master, assistant and surveyors board at pilot boarding and disembarking position Lat. 03° 22.0′ N., Long. 112° 58′ E. Derrick to be rigged on starboard side prior to arrival. The regulation pilot ladder should be rigged well aft on the lee side. Prior to moving to berth mooring equipment is loaded onto vessel's forecastle.

Loading Master and about 4 shore personnel including Agent remain on board during loading operations.

ANCHORAGES: A petroleum anchorage bounded by the following co-ordinates has been established:

Lat. 03° 24.4′ N., Long. 112° 57.3′ E. Thence to position
Lat. 03° 21.3′ N., Long. 112° 59.6′ E. Thence to position
Lat. 03° 22.0′ N., Long. 113° 02.4′ E. Thence to position
Lat. 03° 26.0′ N., Long. 113° 01.2′ E. Thence along the limits of the port to position Lat. 03° 24.4′ N., Long. 112° 57.3′ E.

Use of ship's anchors is strictly prohibited except in extreme emergency. The anchors must never be released or brought anywhere near the entire length of the submarine pipe-line nor closer than 350 m. radius from the SBM. Both anchors should be secured prior to berthing operations.

RESTRICTIONS: Berthing/unberthing is carried out night and day.

MAX. SIZE: The minimum water depth in the manoeuvring area is 62 ft. and the max. permissible draft 52 ft. Max. distance bow to centre manifold 590 ft.

DEPARTURE ROUTE: For deep draft vessels the following departure routes (approaching – opposite course) are recommended:

North-West Route:

From SBM steer 304° to position: Lat. 3° 51′ N., Long. 112° 14′ E.

Along this route 2 navigational light buoys have been laid both South Cardinal:

1. Parsons Shoal (Beting Tugau) position: Lat. 3° 52′ 22″ N., Long. 112° 16′ 06″ E.
2. South Acis Shoal (Beting Likau) position: Lat. 3° 35′ 50″ N., Long. 112° 39′ 36″ E.

North-East Route:

From SBM steer 015° to position: Lat. 3° 35′ 25″ N., Long. 113° 05′ 25″ E., which is marked by East Cardinal light buoy (Beting Nabau).

Onward course 042° to position: Lat. 3° 52′ N., Long. 113° 20′ E.

The N.N.E.'ly tip of the Cochrane Bank is marked by an East Cardinal light buoy (Permating Payong) in position: Lat. 3° 51′ 38″ N., Long. 113° 18′ 06″ E.

A 36 in. gas trunk line has been laid to the North and East of the SBM.

HEALTH: See "Documents".

RADIO: Vessels are required to advise SSB/Respective Agents of their ETAs 72 hours and again 36 hours prior to arrival. Telexes or telegrams should be sent to MA74306 or Saroilco Miri, respectively.

6 hours and again 3 hours prior to arrival, vessels are required to confirm their ETA to Bintulu Terminal on VHF Channel 18.

W/T traffic should be passed through Singapore Radio, Kuching or Miri Radio.

Information Required Prior to Arrival: Standard message to Masters of vessels calling at SBM. Please advise.

AAA ETA and draft at Bintulu SBM.
BBB Customs and Health requirements.
CCC Is vessel equipped with bow chain stopper, Smit Brackets and large central Panama Chock. (This information required from unknown vessels only.)
DDD Are manifold connections as per OCIMF specifications.
EEE Rig starboard derrick to maximum SWL (minimum acceptable 7 tons).
FFF Have 2×16 in. diameter manifold connections ready on starboard side.
GGG Be advised that vessel must maintain full readiness to manoeuvre during stay at SBM.

Berthing Instructions: After ETA advice one of the following messages will be transmitted to the Master.

AAA Based on your ETA . . . present intention is to berth you on arrival.
BBB Pilot will board at the boarding area of 2 miles diameter in the following position: Lat. 03° 22′ N., Long. 112° 58′ E.
CCC Confirm ETA at least 48 hours in advance. When within range you are required to confirm your ETA 3 hours prior to arrival at Bintulu Terminal on VHF Channel 18 or 16.
DDD Please keep us advised of any changes in your ETA. Onus of ETA confirmation rests with vessel.
EEE After having established radio contact on VHF you will receive further instructions.

VHF: Bintulu Port Control operates on VHF Channels 12, 14 and 16 and Bintulu Terminal on Channel 18, ships should inform Bintulu Port Control on Channel 12 and Bintulu Terminal on Channel 18 of their ETA at least 3 hours before arrival at pilot boarding point or as soon as VHF contact can be established. Bintulu Port Authority requires every vessel whilst underway within port limits and in the approaches thereto to maintain continuous watch on Channel 12.

TUGS: Tugs available. The Port Authorities make it compulsory for tankers to use a tug for berthing/unberthing.

BERTHING:

Floating Mooring Rope Assembly: The buoy to tanker mooring comprises 2×12 in. × 150 ft. nylon double braided ropes. At the buoy end, the hawsers are joined to the pad eyes of the Rotating Mooring Arm with heavy duty shackles. Each hawser of the dual floating mooring hawser is fitted with a 3 in. diameter chafing chain.

The pick-up assembly consists of:

(i) 10 in. circumference polypropylene messenger rope with spliced eyes on each side. Length 150 ft.

(ii) 10 in. circumference polypropylene pick-up rope with spliced eyes of 2 ft. on each side. Length 45 ft.

(iii) Pick-up support buoy.

Mooring Craft: A mooring launch will be in attendance. The launch is used to send the messenger end of the mooring ropes to the vessel. On completion of mooring the launch picks up the hoses for connection and remains at the vessel until the completion of loading.

Mooring Procedure: Before the arrival of the tanker, the Berthing Master has to go to the SBM at least 1 hour early to check and make sure that the hoses are not fouled. The mooring craft proceeds to the vessel to disembark the Berthing Master and offload the mooring gear.

During the approach the mooring boat tows the port mooring rope around the buoy so that it is out of the way when the starboard inner one is being worked on. The starboard inner rope is then run out to its full length.

When the end of the messenger is within range the vessel's bow is approximately 115 m. from the SBM i.e. 70 m. to go to the final secured position. The approach speed at this point should not exceed 0.5 knots.

As the vessel slowly closes in on the buoy the messenger pick-up rope and chafing chain are hove on board until the chafing chain is in position in the fairlead (marker buoy just outboard of the fairlead). The special shackle on the nylon snotter is then connected to the triangle plate or alternatively the chain is secured in the bow stopper and the inner mooring is then fast.

While the inner mooring rope is being tended to, the mooring boat clears the (port) outer mooring rope from the buoy. This rope is then hove on board and connected in the same way as the inner one.

The vessel should have 2 mooring ropes ready on the forecastle and mooring is carried out by ship's crew.

Unmooring: Weight on the mooring ropes may be taken off by using ship's engines. The polypropylene pick-up ropes, which remain connected to the triangle plates of the chafing chains, are lead to the winch, and the weight is taken off the bow stopper or nylon snotter as the case may be. The bow stoppers are released or special shackles disconnected, and the moorings and pick-up ropes lowered from the bow into the water.

When both moorings have been let go, the tanker is given sternway until the bow is well clear of the hose strings. The mooring and hose connection equipment is then transferred to the mooring launch.

LOADING:

Cargo Loading Operation: Throughout the vessel's stay at the SBM, the Berthing Master will remain on board to co-ordinate ship/shore operations and one launch will remain at location as a safety precaution.

Hoses: 2×16 in. diameter floating hose strings of 810 ft., in length are connected to the turntable. The strings terminate in a 16 in. diameter rail hose for direct connection to the tankers starboard manifold. The last 3 units of the 16 in. diameter tail hoses are electrically discontinuous, such that stray currents from the crude carriers are not carried on to the buoy.

Connecting Hoses: Hose connection is carried out by ship's crew.

The hoses are lifted and connected one at a time. The forward or 'inner' hose is tended to first. The derrick runner is hooked into an enlarged link in the hose lifting chain and the hose end is then lifted out of the water until sufficient length is available for direct connection to the tanker' manifold. The weight of the hose in this position is transferred to the hose hang-off chain and the hose end is then lowered onto the deck. The blank flange is removed and the hose connected to the vessel's manifold. After connecting, the hoses are supported at the tanker side by flat webbing slings hung from the derrick runner in order to maintain a reasonable radius of bend. They are also suitably lashed to the hose bar of the side rail to reduce movement caused by sea conditions. In seas exceeding 5 ft., the floating hose strings become lively and require attention. Excessive movement of the hoses will result in chafe and strain on the flanges in way of the manifold. This can be reduced to a minimum by a suitable suspension of the hoses from the derrick runner backed up by rope lashings at the side rails or hose bars. Such preventive measures depend largely on the construction and layout of the tanker in the manifold area, also on the distance of the manifold from the vessels' side.

Loading Procedure: Bintulu Crude is loaded at Bintulu Terminal. The quantities loaded are checked by the terminal at frequent intervals and vessels are requested to verify the shore figures.

The terminal is capable of giving maximum loading rates of up to 7,000 cu.m.p.hr. and a maximum back presssure at 120 p.s.i. at the terminal end. The Berthing Master also acts as Loading Master and as the terminal's representative he will attend to all cargo formalities (SSB Forms, Safety Check List, etc.).

Prior to and during loading operations the following procedure will apply:

(a) A joint inspection is carried out by ship and terminal representative to ensure all requirements on the Safety Check List have been complied with.
(b) The methods of communication between ship and shore are clearly established and understood. This includes procedures for normal and emergency stops of cargo loading operations. Test calls are made to ensure the system is operating satisfactory.
(c) Ship and shore to confirm readiness to start cargo loading operations.
(d) Commencement of loading to be at slow rate.
(e) Lines and hoses are checked and faults rectified. Launch to patrol around vessel to check for oil leakages into the sea.
(f) When the ship confirms receipt of cargo, test the emergency trip. After the test is completed start pumping and gradually increase to agreed loading rate.
(g) Lines, hoses and the water around the vessel are again checked.
(h) Ship and shore figures are to be compared every 3 hours and discrepancies investigated.
(i) At least 15 minutes notice should be given to the terminal before each stop or in regard to slowing down the loading rate for "topping off".

Suspension of Loading Operation: If loading operations are suspended for an excessive period (e.g. leakage), hoses should be disconnected, blank flanged and made ready for lowering into the sea.

Disconnecting Hoses: The "after" or outer hose is disconnected first. It must be assured that all the bolts are fitted and properly tightened. The gasket must be in good condition and changed regularly. As soon as the hoses have been disconnected from the tanker's manifold, the blank flanges are fitted and the hose support buoy as well as the free end of the "hose hang-off chain" are shackled to the lug on the spool piece. Each hose is lowered over the side and towed clear from the tanker's side or temporarily secured to the SBM in a bight to prevent possible entanglement with the tanker's propeller.

BALLAST: Vessels must arrive with sufficient ballast for safe manoeuvring into the berth.

There are no facilities for the shore reception of ship's ballast. Vessels are accepted for loading on the express understanding that only clean ballast will be discharged into the sea.

Deballasting prior to the ship being fully secured to the buoy is only allowed after consultation with the Berthing Master.

DENSITY: Varies between 1020 and 1025.

FRESH WATER: Can be supplied by water boat.

FUEL: Not available.

REPAIRS: No facilities available.

TIME: GMT plus 8 hours.

GENERAL:

Weather: All the SBMs concerned are positioned in the open sea. The weather in this region is basically good for tanker operations.

The seasonal weather patterns are broadly divided into 3 and the terminology used is consistant with that of South East Asia. These 3 types are:

(1) S.W. Monsoon (June-October).
(2) N.E. Monsoon (December-March).
(3) Transitions between the Monsoons.

Persistant bad weather occurs during the N.E. Monsoon. High swell conditions can persist for periods of 3 to 4 days and in extreme conditions for up to a week. During the S.W. Monsoon winds are generally light to moderate, but during brief surges (generally lasting less than 36 hours) winds are occasionally strong, and local gale force squalls are experienced. The most favourable time for tanker operations is during the transition periods. Winds are lighter and variable. Seas in this period are rarely more than very slight. The only troublesome periods are the occasional severe squalls that originate from inland, which are associated with cumulonimbus clouds and thunderstorms.

The basic patterns of these squalls are vigorous thunderstorms inland, increasing as the storm approaches. Just before the onset of torrential rain, the wind backs rapidly towards the land and increases violently to the peak gust.

Immobilisation: Immobilisation of engines is not permitted at any time during the vessel's stay at the SBM.

Transmission of Ship's Radio: Use of the ship's radio transmitter is prohibited during the vessel's stay at the SBM.

AGENT: See "Sibu".

DULANG MARINE TERMINAL: 05.48 N. 104.10 E. (See Plan)

LOCATION: The Dulang Marine Terminal is situated off the East coast of peninsular Malaysia in the South China Sea approximately 70 nautical miles (130 km.) N.E. of Kuala Terengganu.

The marine facilities consist of a Floating Storage and Offloading vessel (FSO) permanently moored by a Single Point Turret (SPT) to a Catenary Anchor Leg Mooring (CALM) system.

The FSO with associated production facilities is operated by Petronas Carigali Sdn. Bhd. and is used for shipping Dulang Crude Oil on behalf of both Petronas and Esso Production Malaysia.

Floating Storage and Offloading Vessel: The FSO "Puteri Dulang" is located in position Lat. 5° 48.6′ N., Long. 104° 10.1′ E. in 77 m. of water. It is 242 m. in length and has a storage capacity of 135,000 cu.m.

It is connected to the sea bottom by a 6 chain catenary anchor leg mooring and an integral single point turret, around which it will weather vane and head into the wind/sea.

Stabilised Dulang Crude Oil is piped to the FSO via a 10 in. submarine pipeline, a flexible riser and a fluid swivel.

Offtaking tankers will be moored alongside the FSO's starboard side, assisted by a tug. A rigid inflatable mooring boat handles initial moorings.

Five large pneumatic floating fenders are provided on the FSO's starboard side for protection. The manifold centre line is offset about 25 m. to the stern to provide a better lead for the tanker's headlines.

DOCUMENTS: The following documents are required to be prepared prior to arrival to ensure speedy clearance:

16 copies Crew List.
2 copies Stores List.
2 copies Personnel Effects List.
6 copies Passenger List.
2 copies Cargo Manifest.
4 copies Drugs/Narcotics List.
4 copies Arms/Ammunition List.
2 copies Vaccination List.
4 copies Voyage Memo/Itinery.
2 copies Derat Certificate.
2 copies Vessel's General Information.
Last Port Clearance.
Ship's Certificates for inspection.

PILOTAGE: The pilot will normally board tankers from a tug near position 'G', just outside the restricted area (see "Approaches").

Notice of Readiness: Tankers calling at Dulang Marine Terminal are to be in all respects ready to commence loading, the Notice of Readiness will be acknowledged at the time of pilot boarding.

ACCEPTANCE CRITERIA: Tankers between 40,000 d.w.t. and 85,000 d.w.t. with a length of 242 m. or less and with a maximum full load displacement of 100,000 tons can be safely accommodated alongside the FSO, provided they comply with the following minimum standards:

1. *Moorings:*

Forward:	4 winch mounted ropes.
Maindeck forward:	2 winch mounted ropes.
Maindeck aft:	2 winch mounted ropes.
Aft:	4 winch mounted ropes.

All to lead through closed chocks (fairleads).

Note:

(a) Tankers not equipped with self-stowing winches are not acceptable at the terminal.
(b) Mixed moorings, i.e., synthetic ropes and wire ropes are not acceptable.
(c) Winches and brakes must be in good operating condition.
(d) Mooring lines must be of adequate size and in good condition.
(e) Winch mounted wires must be fitted with synthetic tails in order to provide needed elasticity and to permit cutting in an emergency.

Additionally, closed chocks (fairleads) and bollards are required for making fast FSO provided preventer wires:

Forward:	2 wires.
Maindeck forward:	1 wire.
Maindeck aft:	1 wire.
Aft:	1 wire.

2. *Hose Connection:* Vessel to have 2×12 in. 150 ASA ANSI flanges ready at port side manifold.

Comply with OCIMF standards for oil tanker manifolds and associated equipment.

3. *Ballast:* Vessel to have on arrival, cargo or adequate clean or segregated ballast for safe manoeuvring, that is: propeller covered and no more than 2.0 m. trim by stern and being able to limit freeboard by loading crude and discharging ballast simultaneously.

Note: There are no ballast receiving facilities on the FSO and ballast pumped overboard must be absolutely clean.

4. *Heating Coils:* Vessel to be equipped with cargo tank heating coils able to maintain Dulang Crude at a temperature of at least 50° C. during the voyage or as instructed by Owner, Charterer or Consignee.

APPROACHES: *Restricted Area:* Due to the presence of numerous platforms, submarine obstructions and pipelines, a Restricted Area bounded by the following coordinates has been established:

A.	5° 30′ N.	104° 34′ E.
B.	5° 10′ N.	105° 34′ E.
C.	5° 20′ N.	105° 40′ E.
D.	5° 46′ N.	105° 14′ E.
E.	5° 46′ N.	104° 48′ E.
*F.	5° 56′ N.	104° 04′ E.
*G.	5° 46′ N.	104° 04′ E.

*Note: Positions 'F' and 'G' have not yet been gazetted or included in nautical publications.

Waiting Area: A Waiting Area centred on position Lat. 5° 44′ N., Long. 104° 00′ E. and with a radius of 5 nautical miles has been established.

Navigation: Tankers bound for Dulang Marine Terminal should approach the Waiting Area keeping well clear of the Restricted Area.

Tankers should under no circumstances enter or anchor in or near the Restricted Area.

There are no outlying dangers outside the Restricted Area.

The platforms and FSO are good radar targets, normally detectable on the radar at 20 miles. However, due to the possible presence of drilling tenders and construction work in the area, platforms or the FSO should not be used as navigational aids, except when positively identified and position confirmed by other means.

ANCHORAGE: Depth of water in the Waiting Area ranges between 60 m. and 90 m. The sea bottom consists of fine mud and sand and provides poor anchor holding ground. Anchoring is therefore not recommended in the Waiting Area.

Tankers awaiting berth at Dulang Marine Terminal are advised to drift or slow steam in the Waiting Area or in the area S.W. of the Waiting Area, while keeping in VHF contact with the Terminal.

RESTRICTIONS: Berthing is carried out only during daylight hours whereas unberthing will take place day and night.

MAX. SIZE: Maximum LOA 242 m. Maximum displacement 110,000 tons. Maximum distance bow to centre manifold 121 m.

RADIO/VHF: *Radio Advice:* All radio traffic to be channelled through Singapore Radio and vessels should monitor traffic lists from the same station.

1. Cables for Petronas to be addressed to:
Petron MA 30032 or MA 30696.
International Marketing, KL
with copy to Carigali MA 51487,
Production Operations, Kemasik.
2. Cables for EPMI to be addressed to:
Essosupply MA 30293, KL
with copy to Offprod MA Kemasik.

Arrival Advice: Immediately after having received instructions to proceed to the Dulang Marine Terminal the Master is required to cable Cagali MA 51487 and agent the following:

AAA Vessel name, previous name (if any), call sign and flag.
BBB ETA date and local time (GMT + 8 hours).
CCC Master's name and nationality.
DDD GRT, NRT, SDWT, light and full load displacement tonnage.
EEE Last discharge port and intermediate ports.
FFF Next discharge port and intermediate ports.
GGG Number of crew and nationality.
HHH Number of passengers.
III Grade and quality of cargo on arrival, previous cargo and cargo to be loaded at Dulang Marine Terminal and loading rate per manifold.

JJJ	Whether previous cargo or any cargo on board has high H_2S contents and H_2S concentration in tank vapour spaces.
KKK	Malaysian Light Dues receipt number and date.
LLL	Arms on board.
MMM	Confirmation that vessel is able to load and deballast simultaneously.
NNN	Arrival draft.
OOO	Any leaks which would cause pollution or affect loading.
PPP	Pratique granted: Place/date. If any sickness on board or Clean Bill of Health.
QQQ	Confirm inert gas system operational and cargo tanks inerted on arrival.
RRR	Confirm cargo heating system operational and able to maintain Dulang Crude at 50° C. during loaded voyage.

All vessels loading at Dulang Marine Terminal for the first time to include the following additional information:

SSS	Length overall and bow to centre manifold distance.
TTT	Confirm that 2×12 in. 150 ASA ANSI flanges are available at port manifold and manifold arrangements comply with "OCIMF Standards for Oil Tanker Manifolds and Associated Equipment".
UUU	Confirm that combination of gangway and pilot ladder ready on arrival. Pilot ladder only required if freeboard is less than 15 feet.
VVV	Whether vessel is diesel or steam turbine powered.
XXX	Number and type of moorings on self-stowing winches with indication of port side chock locations in relation to manifold centre line.

ETA to be confirmed 72, 48 and 24 hours prior to arrival or if change is more than one hour within the last 24 hour period.

VHF Communications: Dulang Marine Terminal keeps a 24 hour watch on Channel 16, working channels are 6, 8 and 9.

Communications language of the terminal is English.

Arrival Procedures: Masters should endeavour to establish contact with Dulang Marine Terminal as soon as they are within VHF radio range. Instructions thereafter will be given for further approach and berthing schedule.

BERTHING: *Preparation:* Prior to arrival vessels should prepare the following:

1. Pilot Ladder: A combination pilot ladder with 2 side ropes and ship's accommodation gangway, complying with SOLAS recommendations, should be safely and securely rigged and so arranged that personnel can first use the pilot ladder until part way up the vessel's side and then transfer to the accommodation ladder. Vessels with less than 15 ft. freeboard need only rig the pilot ladder with 2 side ropes. Air operated pilot hoists are not acceptable. A light heaving line and canvas bag should be ready to take on board the pilot's equipment.

During the hours of darkness, it is necessary that the pilot ladder and adjacent deck area is adequately illuminated. Responsible personnel are to be in attendance when the pilot boards and leaves.

2. Mooring Equipment: Winches and mooring lines ready with 2 – 3 portable fenders of rattan on the forecastle and with heaving lines available at each mooring station.

3. Derricks: Derrick to be rigged on port side with SWL of 10 tons.

4. Manifold: The port side manifold ready to connect 2×12 in. 150 ASA ANSI hoses with Camlocks. At least 200 mm. clear space behind the flange is necessary for connecting the Camlock coupling.

Berthing and Mooring: Prior to berthing, the pilot will discuss with the Master, berthing and mooring operations and make certain that the tanker is fully manoeuvrable. He will also inspect the vessel's ballast to ensure that only clean ballast is carried and its disposal overboard will be safely carried out simultaneously with the loading of cargo.

After ensuring that the manoeuvring area is clear of other traffic and that weather and sea conditions are suitable, the pilot will manoeuvre the vessel for the approach to the FSO. The heading of the vessel will normally be such that she will have the wind ahead, but currents may have to be taken into account.

When the tanker is about 0.55 nautical miles from the stern of the FSO, the tug will be made fast on the tanker's starboard shoulder in the push/pull mode using its own ropes.

The tanker will then be positioned, with minimal speed through the water, 50 m. – 80 m. off the FSO and the mooring boat will bring a messenger line to the tanker's bow. The first two ropes will be connected to the messenger line and hove to the FSO's forecastle and made fast while the mooring boat proceeds to the tanker's stern with a messenger line from the FSO's stern to be connected to 2 springs or stern lines from the tanker.

When within heaving line throwing distance, forward springs and the last moorings will be sent across and made fast to the FSO and the tanker will pull itself alongside the FSO.

It is important that 2 – 3 portable fenders of rattan or manila are ready on the forecastle to be used if necessary to prevent direct steel to steel contact, particularly in the area of the tanker's bow flare.

Depending on prevailing and forecast weather conditions the tanker moorings will be augmented with combination wire rope/nylon grommet moorings from the FSO.

As soon as the tanker is safely moored alongside the FSO, a gangway will be put across and Malaysian officials, surveyors and an agent will board the tanker for clearance and tank inspection, etc.

LOADING:

Hose Connection: Hose connection is done by the tanker's crew, supervised by a responsible officer.

2×12 in. (300 mm.) 150 ASA ANSI flanged hoses will be connected to the manifold by spanner Camlocks. The hoses will be brought across by the FSO's hose handling crane but in good weather conditions the tanker's derrick may be used to assist and expedite hose end line up.

Transfer Plan: Prior to commencement of loading, an agreed oil transfer plan must be established and understood by both parties. This will include start-up, maximum bulk and topping-off loading rates and emergency stop procedure.

When the tanker is ready, the responsible officer will advise the terminal control room by VHF to commence the loading. The terminal control room will commence the loading at low rate, adhering to the starting procedures. When it is confirmed that there is no significant rise in pressure on the loading line/s, the crude oil will be loaded at bulk rate previously agreed upon.

The loading operations will be controlled by VHF radio communications between the terminal control room and the tanker control room.

Tankers are required to maintain an efficient deck watch during cargo transfer operations with procedures and communication established which provide for prompt stoppage in case of overflow or other emergency.

Maximum Transfer Rate: FSO maximum pumping rate is 6,000 kl./hr.

Tankers are encouraged to take maximum loading rate, with due regard to safety, to expedite turn-around time. Care should be taken not to overload.

Caution: Warning is given of the danger of closing valves against an incoming oil flow. This will create excessive pressure which may result in damage to the loading hoses and terminal facilities. Tankers will be held liable for damage resulting from failure to observe this precaution.

Dulang Crude: Stabilised Dulang Crude loaded from FSO will have the following approximate characteristics:

Specific gravity	0.842
Temperature	50° C.
BS and W	0.05%
H_2S content	Nil

It is a waxy crude with a pour point of about 40° C. and requires heating.

Charterers or Consignee will give heating and handling instructions.

Electrical Storms: Loading will be suspended during thunderstorms in the immediate vicinity.

BALLAST: Ballast water pumped overboard should not contain oil or mixtures containing oil (a mixture with an oil content of one hundred or more parts in one million parts of the mixture) in accordance with Section 27(1) of the Environmental Quality (Amendment) Act, 1985 with regard to Malaysian waters and Section 20(1) of the Exclusive Zone Act, 1984 with regard to the exclusive economic zone.

The vessel's ballast tanks will be carefully inspected. Vessels with dirty or doubtful ballast water will not be accepted unless analysis of water samples for oil content show otherwise.

POLLUTION: The terminal is located within Malaysia's Exclusive Economic Zone and the Master or Owner of a vessel is subject to prosecution if oil is discharged or escapes into the sea.

Dulang Crude is a high wax content oil which solidifies at sea temperature.

It is therefore imperative that escape of oil, whether from cargo or otherwise is prevented.

Master and Owner will be held liable for all clean-up costs and third party claims.

Oil Spills: Should an overflow or hose leak occur during loading: Immediately advise the FSO to stop loading and retain onboard and clean-up or recover the oil.

TIME: GMT plus 8 hours.

SERVICES: The Dulang Marine Terminal is located offshore and the only means of transport to and from shore is via helicopter to Kerteh or by supply boat to Kemaman supply base. The terminal can therefore not provide logistical support to tankers calling at the terminal. There is:

No shore leave.
No crew changes.
No provisions or stores.
No bunkers or fresh water.
No Consulates/Embassies.
No engine repairs or spare parts.
No dirty ballast/slop disposal.
No doctor or clinic, however in emergencies, exceptions may be permitted for humanitarian reasons.

Only authorised personnel are permitted to board tankers while berthed.

GARBAGE DISPOSAL: Dumping of garbage overboard, of whatever kind, is strictly forbidden.

CHARTS: USNOA 71024, B.A. 2660(a), B.A. 2414, B.A. 3543.

SAFETY: *Ship/Shore Safety Check List:* A Ship/Shore Safety and Pollution Check List is used at the terminal and all operations closely follow recommendations contained in the International Safety Guide for Oil Tankers and Terminals.

Deck Watch and Mooring Management: The terminal is located in the open sea and freeboard difference between FSO and tanker changes continuously. It is therefore important that moorings are adjusted and that an effective deck watch with a responsible officer in charge is kept at all times.

The tanker's engines should be on standby at all times for immediate evacuation of berth in case of an emergency.

VHF radio communication should be maintained at all times. Loading operations will be stopped if contact is lost.

Fire: In the event of fire on board: Immediately stop loading, advise the Terminal Control Room and prepare to disconnect hoses and evacuate the berth. A well equipped tug is standing by and may assist under the FSO Master's guidance. In case of VHF communications failure, sound 10 short blasts on ship's whistle.

WEATHER: *Reference:* China Sea Pilot Volume 1.

Weather: S.W. Monsoon (May to September).

Winds are generally from the South or S.W. during this period and can reach gale force in local squalls.

N.E. Monsoon (November to March):

Intermittent bad weather occurs during this monsoon and high seas and swell conditions can persist for extended periods.

Transition Periods (April and October):

Winds are generally variable during the transition periods, but may freshen in the late afternoon and early evening. Occasionally, local gale force squalls may occur, but these are generally of short duration.

Currents: Ocean currents are variable except in the N.E. monsoon period when a 1.0 knot – 1.5 knot S.W. setting current predominates.

CAUTION: Severe squalls often occur suddenly without warning. It is therefore important when moored that an alert deck watch is kept at all times.

AUTHORITY:
Operator: Petronas Carigali, Peninsular Malaysia Operations, Petronas Office Complex, 24300 Kerteh, Kemamam, Terengganu, Malaysia. *Tel:* 09-540722. *Cables:* Cagali. *Telex:* 51487 MA. *FAX:* 09-540855.

KEMAMAN, Malaya: 04.16 N. 103.29 E. (See Plan)

LOCATION: Kemaman Port is situated on the East coast of peninsular Malaysia in position Lat. 04° 16.6′ N., Long. 103° 28.8′ E.
PORT LIMITS: The seaward limits of Port of Kemaman are contained between Lat. 04° 16′ 24″ N. and Lat. 04° 11′ N., and Long. 103° 34′ E.
DOCUMENTS: Following documents should be kept ready for submission:

Document	*Port*	*Customs*	*Immigration*	*SD Police*	*Harbour Master*	*Port Health*
	Number of Copies					
Declaration of Health	–	–	–	–	–	1
Crew List	1	1	3	1	1	1
Passenger List	1	1	1	1	1	1
Vaccination Certificates	–	–	–	–	–	Orig.
Derat/Derat Exemption Certificates	–	–	–	–	Orig.	Orig.
Transit Order	–	–	–	–	–	Orig.
Crew Identification Documents	–	–	Orig.	R	–	–
Stowaway List	–	1	1	1	1	1
Bonded Stores/Personal Effects	–	1	–	–	–	–
Port Clearance	P.C.	Orig.	–	–	Orig.	–
Import Manifest	2	2	–	–	–	–
Transhipment Cargo Manifest	–	2	–	–	–	–
Arms/Ammo List	–	1	–	1	–	–
Drugs List	–	1	–	1	–	–
Certificate of Registry	–	–	–	–	Orig.	–
Safety Equipment Certificate	–	–	–	–	Orig.	–
Loadline Certificate	–	–	–	–	Orig.	–
Radio Safety Certificate	–	–	–	–	Orig.	–
Ship Construction Certificate	–	–	–	–	Orig.	–
Tonnage Certificate	–	–	–	–	Orig.	–
Ship's Articles	–	–	Orig.	–	Orig.	–

Note: Numerals indicate number of copies.
'Orig.' indicates original
'R' indicates on request
'P.C.' indicates photocopy

Identification documents should be arranged in the same sequence as Crew List.
PILOTAGE: The pilot can be contacted at the port on VHF Channels 16, 12, 11, 9 and 68. The pilot meets in the vessel in the port area. Pilotage is available round the clock. Pilot ladder must be on lee side.

Anchorage position for vessels awaiting a pilot is Lat. 04° 11.5′ N., Long. 103° 31.9′ E.
ANCHORAGES:
Petroleum Anchorage: Lat. 04° 10.4′ N., Long. 103° 30.7′ E., in depths of 20 m.
Deep Water Anchorage: Lat. 04° 12.2′ N., Long. 103° 33.1′ E., in depths of 24 m.
Working Anchorage: Lat. 04° 12.9′ N., Long. 103° 32.2′ E., in depths of 22 m.
Supply Vessel Anchorage: Lat. 04° 14.6′ N., Long. 103° 29.5′ E., in depths of 13 m.

The above anchorages have a bottom of mud and sand with good holding ground providing shelter in the basin.

Also see "Pilotage".
APPROACHES: *Entrance Channel:* The depth in the dredged channel is 15.0 m., length is 3.0 km. and minimum width is 250 m. The channel is marked with lighted Beacons No. 1 – 4 and an onland transit marker.
MAX. SIZE: Vessels having a max. size of 120,000 d.w.t., length of 260 m., beam 35.0 m. and a max. draft of 13.5 m., can berth alongside.
HEALTH: Healthy vessels are brought to berth. Suspect or infected vessels are taken to Quarantine Anchorage to await clearance from Port Health Authorities. Automatic health clearance is not granted.
RADIO: Radio messages are routed through Penang Radio.
VHF: Vessels should contact "Kemaman Port Control" on Channel 16.

Working channels for Kemaman Port Control are Channels 16, 11 and 68.
RADAR: There is no port radar station in Kemaman Port.
TUGS: 2 tugs available. Tugs lines are used.

1 tug (2×600 h.p.) and 1 tug (2×1,600 h.p.).

BERTHING:

Quay Name	*Length (m.)*	*Depth (m.)*	*Cargoes handled*
1-KSB	360	9.0	Supplies for offshore activities.
2-East Wharf	648	14.5	General cargo/bulk cargo.
3-Export Terminal (LPG)	320	14.0	Liquid petroleum gas.

BULK CARGO FACILITIES: Commodities handled are steel billets, hot briquette iron, scrap iron, ilmenite ore and copper slag. Cargoes handled are mainly to cater for the industries near the port.
CRANES: There is one container gantry crane with 38 ton S.W.L. and 2 privately owned cranes to handle bulk cargoes of 37 tons and 25 tons capacity.
STEVEDORES: The port works 24 hours a day, 365 days a year.
MEDICAL: Hospital/doctor are not available at Kemaman Port. General hospital/doctor are available in Kemaman Town, which is about 8 km. from Kemaman Port.
TANKERS: There are no facilities for oil tankers in Kemaman Port. The facilities at the LPG Export Terminal cater for Petronas (National Oil Company) activities.
BALLAST: No slop reception facilities available.
DENSITY: 1023.
FRESH WATER: Fresh water is supplied at 50 metric tons per hour, and is pumped from a reservoir (at KSB) direct to vessel.
FUEL: Available by truck. Advance notice required.
FIRE PRECAUTIONS: Fire fighting tugs are compulsory for LPG vessels only.
CONSULS: The nearest consuls of most countries are located in Kuala Lumpur, the capital of Malaysia, which is about 350 km. from Kemaman Port.
REPAIRS: Minor repairs possible.
DRY DOCKS: The nearest dry dock is 150 km. away in Kuala Terengganu.
SURVEYORS: The Surveyors available nearby are Caleb Brett and Ranaco Marine in Kemaman Port area, and SGS in Kuantan Port area.
GANGWAY/DECK WATCHMEN: The employment of watchmen from shore is not compulsory.
HATCHES: Crew open/close hatches.
CUSTOMS ALLOWANCES: See "Kuantan".
AIRPORT: The nearest airports are Kerteh Airport, 40 km. distant, and Kuantan Airport, 75 km. distant.
TIME: GMT plus 8 hours throughout the year.
HOLIDAYS: Port works 365 days a year.

Overtime payments are payable on public holidays as determined by the Terengganu State Government and Government of Malaysia. Overtime payments are also payable for weekends and after office hours, in which for Kemaman Port the weekends are after 1245 hrs. Thursday, and the whole of Friday, and after office hours are from 1600 hrs. until 0800 hrs.

On public holidays, as listed below, a charge of an additional 50% for pilotage and towage, and additional 25% for mooring is imposed.

Public holidays for Kemaman:
New Year Day – 1st January.
Chinese New Year – varies from year to year.
Aidil Fitri – varies from year to year.
Aidil Adha – varies from year to year.
National Day – 31st August.
Christmas – 25th December.
Deepavali – varies from year to year.
Maal Hijrah – varies from year to year.
Maulidur Rasul (Prophet Muhammad's Birthday).
Sultan Terengganu – 21st March.
Coronation Day.
Sultan Terengganu's Birthday – 29th April.
Labour Day – 1st May.
Wesak Day.
King's Birthday.
Nuzul Quran.

POLICE/AMBULANCE/FIRE: Police 09-592222. Ambulance 09-593333. Fire 09-594444.
TELEPHONES: Telephones cannot be placed on board.
SHORE LEAVE: Shore leave is permitted.
IDENTIFICATION CARDS: Seaman's Book or Passport are sufficient.
GARBAGE DISPOSAL: Garbage disposal is compulsory at the East Wharf only. Drums are provided. Charges are as follows:
Ships under 750 g.r.t.: $10.00 per vessel per day or part thereof.
Ships 750 g.r.t. – 3,000 g.r.t.: $30.00 per vessel per day or part thereof.
Ships over 3,000 g.r.t.: $50.00 per vessel per day or part thereof.
WASTE OIL DISPOSAL: Available on request. Arrangements made with private contractors. Rates negotiable with contractors.
SEAMAN'S CLUBS: None.
CURRENCY: Malaysian Ringgit (MRG). U.S.$ 1.00 = 2.55 MRG. U.K.£ 1.00 = 4.68 MRG (13.6.92). Perwira Habib Bank located in the Kemaman Port area.
GENERAL: *Stores:* Provisions are plentiful.
Tides: Tidal range 3.2 m.
Wind/Sea: Maximum 25 knots during North East Monsoon with choppy sea from November to January.
DEVELOPMENTS: There are plans to develop the port into a distribution centre of bulk cargoes for the ASEAN region.
AUTHORITY: Kemaman Port Authority, East Wharf Building, Teluk Kalong, 24000 Kemaman, Terengganu, Malaysia. *Tel:* 09-531590, 09-531706 (Marine Department). *Telex:* PORTKM MA 51334. *FAX:* 09-531599. *Contact:* See "Kuantan".

KERTEH TERMINAL: 04.34 N. 103.28 E. (See Plan)

PORT LIMITS: The port area is enclosed between Latitudes 4° 30′ N. and 4° 37′ N. and between Longitudes 103° 26.8′ E. and 103° 33′ E.

LOCATION: The Kerteh Port Marine Terminal is situated off the East Coast of Peninsular Malaysia in the South China Sea approximately 13 miles South of Kuala Dungun.

The marine facilities consist of 3 single buoy moorings located in a 20 square mile Restricted Area which extends about 5 miles from the coast.

One CALM operated by Petronas Penapisan (Terengganu) Sdn. Bhd. (PP(T)SB), suitable for vessels ranging from 15,000 d.w.t. – 35,000 d.w.t. or partially loaded vessels ranging from 15,000 d.w.t. – 35,000 d.w.t. or partially loaded vessels up to 85,000 d.w.t. (limited by loaded draft of 11.1 m.) is used for loading refined products from the Petronas Refinery.

Two SALMs, operated by Esso Production Malaysia Inc. (EPMI) are used for loading crude oil from the Terengganu Crude Oil Terminal (TCOT).

DOCUMENTS: Masters are required to prepare documents prior to arrival in port such as:

Last Port Clearance.
Ship's Certificate.
Manifests (List of Cargo onboard).
12 Crew Lists.
2 Stores Lists.
2 Personal Effects Lists.
2 Lists of Narcotics.
1 Vaccination List.
1 List of Arms/Ammunition.

Boarding and Duty Personnel: Tankers will be boarded, normally on arrival, by Mooring Masters, Loading Operators, Customs, Agents, Surveyors and Petronas Representatives. They will usually stay onboard till the vessel's departure and should be provided with meals and suitable accommodation. However, alcoholic beverages should not be offered to shore personnel, nor should vessel's personnel consume alcoholic drink during the vessel's stay at the terminal. A very serious view is taken of the matter which is an important aspect of vessel and terminal safety.

PREPARATIONS: Vessels should prior to arrival prepare:

(a) *Pilot Ladder:* Safely and securely rigged a combination of pilot ladder with 2 side ropes and ship's accommodation gangway, so arranged that personnel can first use the pilot ladder until part way up the vessel's side, and then transfer to the accommodation ladder. Vessels with less than 15 ft. freeboard need only rig the pilot ladder with 2 side ropes. Air operated pilot hoists are not acceptable. A light heaving line should be ready to take the Mooring Masters' and Loading Operators' equipment onboard.

(b) *Derricks:* Derrick to be rigged on port side.

(c) *Bow Arrangements:* Vessels should be prepared to be moored to the SPM's, with pick-up ropes, Smit Brackets, chain stoppers or wire snotters on the bow.

(d) *Reducers:* The port side manifold is to be prepared for either 12 in. (PP(T)SB) or 16 in. (TCOT) hoses.

PILOTAGE: Two Mooring Masters normally board tankers at pilot station from a launch or tug. During the N.E. monsoon period (November-March) vessels may be requested to pick-up personnel at a position off Tanjong Berhala about 20 miles S.E. of the terminal area.

Masters should ensure that the Malaysian Flag together with the appropriate International signals are displayed for a vessel approaching port.

NAVIGATION: *Charts:* U.S. 71024, B.A. 770, B.A. 1374, B.A. 2660 (a), B.A. 2414, B.A. 3543 and Mal 6441 (Kerteh Port approach chart. Published by the Royal Malaysian Navy).

Approaches: Approaching the anchorage area from the N.E. – S.E. quadrant, there are no outlying dangers.

Pulau Tenggol, a steep-to 900 ft. high island, situated 20 miles N.E. of the terminal area, and Bukit Labohan, a 1,200 ft. high hill just South of the terminal, are excellent radar targets, easily identified.

The Kerteh Port Marine Control is equipped with a radar-based vessel tracking and traffic management computer system, and will advise vessels when VHF contact has been established.

CAUTION:

(i) Beware of the presence of fishing craft as normally they do not show any lights at night.

(ii) The refinery flare and gas plant flare are visible at a great distance, but should not be relied upon for position fixing purposes as they may not be burning at all times.

(iii) Vessels should give all structures and working vessels a wide berth and not approach closer than 2 miles.

Restricted Area: The Restricted Area is bounded by imaginary lines connecting the following points:

1. Lat. 4° 34′ N., Long. 103° 28′ E.
2. Lat. 4° 37′ N., Long. 103° 31′ E.
3. Lat. 4° 32′ N., Long. 103° 33′ E.
4. Lat. 4° 33′ N., Long. 103° 28′ E.

Vessels should under no circumstances enter the Restricted Area without the service of the Mooring Master.

NAVIGATION AIDS: In addition to the navigational aids noted on the Navigation Charts, the following Navigational Lights and buoys are placed:

1. Kerteh Port Sea Buoy:

Position	Lat. 4° 32′ N., Long. 103° 34′ E.
Shape	Pillar
Colour	Red and white vertical stripe
Light Characteristic	Fl. (W) every 10 secs.
Visibility	8 nautical miles
Radar Reflector	8 nautical miles

2. Paton Bank Buoy:

Position	Lat. 4° 32′ 41″ N., Long. 103° 31′ 27″ E.
Shape	Can
Colour	Red
Light Characteristic	Fl. (R) 5 secs.
Visibility	8 nautical miles
Radar Reflector	8 nautical miles

3. Tg. Labohan Light:

Position	Lat. 4° 31′ 18″ N., Long. 103° 28′ 18″ E.
Characteristic	Fl. (W) 4 secs.
Visibility	15 nautical miles

4. Danger Line Buoys:

These buoys are 1,000 m. apart and indicate the 15 m. (50 ft.) Admiralty Chart Datum line.

Shape	Pillar
Colour	Yellow
Light Characteristic	N1 – Fl. Y 4 secs. N2 – Gp. Fl. Y (3) – 5 secs. N3 – Gp. Fl. Y (4) – 10 secs.
Visibility	2 nautical miles

Positions as follows:

B-4 Danger Buoy N1	Lat. 4° 33′ 33.7″ N., Long. 103° 28′ 46.7″ E.
B-3 Danger Buoy N2	Lat. 4° 34′ 06.5″ N., Long. 103° 28′ 38.3″ E.
B-2 Danger Buoy N3	Lat. 4° 34′ 35.9″ N., Long. 103° 28′ 29.1″ E.

5. Refinery SBM:

Position	Lat. 4° 34′ 32.2″ N., Long. 103° 29′ 02.1″ E.
Colour	Orange with white superstructure.
Light Characteristic	White, Fl. Letter U (· · –) every 15 secs.
Visibility	2 nautical miles

6. SALM No. 1:

Position	Lat. 4° 34′ 21.9″ N., Long. 103° 30′ 18.1″ E.
Colour	Yellow with black vertical stripes
Light Characteristic	White, Fl. Letter U (· · –) every 7.5 secs.
Visibility	2 nautical miles

7. SALM No. 2:

Position	Lat. 4° 33′ 26.5″ N., Long. 103° 30′ 45.4″ E.
Colour	Yellow with black vertical stripes
Light Characteristic	White, Fl. Letter U (· · –) every 15 secs.
Visibility	2 nautical miles

The above buoys with the exception of the SBM and SALM's are subject to shift position and should not be relied upon for navigational purposes.

When approaching the Terminal, Kerteh Port Marine Control will advise if the above buoys are in position.

ANCHORAGE: The Anchorage area is 4 miles square bounded by Lat. 4° 30.0′ N. and Lat. 4° 32′ N., and Long. 103° 32.0′ E. and Long. 103° 34.0′ E.

Vessels are strictly prohibited to anchor in any position, whether inside or outside the Restricted Area other than in the designated Anchorage Area. Crude and gas pipe-lines and a telephone cable are laid in the vicinity and are not shown on all charts.

During severe weather conditions it is not advisable to anchor as holding ground is poor and vessel should slowly steam 5 to 10 miles off the coast, and remain within VHF radio range.

In the event VHF radio contact cannot be established, Masters are advised not to anchor but keep to seaward of the Anchorage Area and the Restricted Zone. Contact will then be made by the Terminal's Support Craft.

ACCEPTANCE CRITERIA:
PP(T)SB: (Product).

I-*SPM Limitations:*

(i) SPM is designed to handle vessels of 15,000 to 35,000 d.w.t. However, partially loaded vessels up to 85,000 d.w.t. can also be accommodated up to a maximum draft of 11.1 m.

(ii) SPM is equipped with 2 mooring hawsers fitted with 2 in. diameter chafing chains which requires Panama leads with minimum diameter of 16 in. Bollards with snotter wires and bow shackles (See III-(x)) can be used as an alternative to secure the chafing chains.

(iii) Maximum loading rate of 20,000 bbls.p.h.

(iv) Minimum flow rate of 3,100 bbls.p.h. is acceptable for initial loading and topping-off operations. The operation at this flow rate should not exceed 15 minutes.

(v) Maximum loading temperature 75°C.

(vi) Maximum allowable working pressure of hoses 225 p.s.i. (15.8 kg./sq.cm.).

(vii) Weather Limitation: Vessels to stop loading when wind speed reaches 22 knots. When wind speed reaches 36 knots and 10 ft. swell, vessel to disconnect hose and be ready to vacate berth. However, final decision to vacate the berth lies with the Mooring Master at the scene.

II-*Port Limitation Ex-Kerteh Refinery-Safe-Dimensions of Vessel:*

	Vessel Data	
	Min.	*Max.*
Size	15,000 d.w.t.	85,000 d.w.t.
Length	163 m.	265 m.
Width	20 m.	38 m.
Loaded Draft	8.8 m.	11.1 m.

III-*Tanker Requirements:*

(i) The tanker must be able to handle the hose rigging on the port side and must be able to lift and swing safely 5 ton over and above the ship's rail. Hose has to be lifted to a height of 15 ft. – 20 ft. above ship's rail.

(ii) The tanker must have sufficient clear deck area adjacent to the cargo manifold. Distance from manifold to ship's rail should be a minimum of 12 ft. Free area around centreline of manifold must be 36 in. as the end of the rail hose near the loading flange has a 30 in. diameter.

(iii) Tanker must have 12 in., 150 p.s.i. ASA (or ANSI) manifold flange connection on port side to fit on a 12 in. Camlock coupling loading/discharge hose.

(iv) Tanker must have sufficient chain falls and rigging gear to secure the loading hose.

(v) Product tankers must be able to receive water plug of 300 bbls. in a segregated tank or clean slop tank prior to commencement of loading. The water plug to be pumped back on completion of the loading.

(vi) On arrival all tankers must have adequate segregated or clean or permament ballast for safe manoeuvring at all times (i.e. Propeller, must be adequately submerged without excessive trim).

(vii) Refinery cannot receive slop or oily ballast.

(viii) Minimum 10 ton capacity port side derrick required.

(ix) Tanker's crew are responsible for mooring, hose connection and unmooring.

(x) Mooring of product tankers at Kerteh SPM: (PPTSB)

All product carriers proposing to use the SPM facilities at Kerteh or other SPMs, should have available onboard in case of requirement the following:

2×12 m.×54 mm. dia. (for tankers up to 40,000 d.w.t.) or 2×12 m.×64 mm. dia. (for tankers above 40,000 d.w.t.) wire rope bridles (fibre core) with a thimbled eye at one end and a soft eye on the other end.

2×50 ton safe working load bow shackles.

2×100 m.×30 mm. messenger lines.

The Loading Operator, who is responsible for the loading operations, will inspect the ship on arrival to ensure the ship's compliance to Kerteh Terminal's requirements for final acceptance.

Note: There are no ballast receiving facilities and ballast pumped overboard must be absolutely clean.

TCOT: (Crude)

Tankers between 40,000 and 250,000 d.w.t. can be accepted at the TCOT SALMs provided they:

1. Re: Mooring equipment, etc. comply with "Standards for Equipment Employed in the Mooring of Ships at Single Point Moorings", published by OCIMF 1978, particularly Section 6.1 to 6.5. i.e. in brief:

(i) Tankers of under 100,000 d.w.t. to have bow mooring arrangement suitable for connecting a single 54 mm. (2.125 in.) chain.

(ii) Tankers between 100,000 and 150,000 d.w.t. to have bow mooring arrangements for connecting a single 76 mm. (3 in.) chain.

(iii) Tankers over 150,000 d.w.t. to have bow mooring arrangement for connecting 2×76 mm. (3 in.) chains.

(iv) Bow fairleads for 54 mm. chain to measure at least 400 mm. (16 in.) in diameter, and bow fairleads for 76 mm. (3 in.) chain to measure at least 600 mm.×450 mm.

(v) All tankers to have bitts, bollards, bow stoppers of minimum SWL:

Under 100,000 d.w.t.: 1×100 tonnes.
100,000 – 140,000 d.w.t.: 1×200 tonnes.
Over 150,000 d.w.t.: 2×200 tonnes.

with adequate forward winch heaving capacity for heaving up corresponding chain system with buoy.

Note: It is recommended that all tankers calling at this terminal be fitted with approved bow stoppers for safe and efficient mooring and unmooring operations.

(vi) Tankers with one bow stopper to prepare one self-stowing drum and tankers with 2 bow stoppers to prepare 2 self-stowing drums to accommodate 1 or 2 × 150 m. (10 in.circumference) pick-up ropes.

Note: Warping drum not to be used to heave up chain system on board to prevent backlash.

2. Have 1×16 in. standard ANSI-B 16.5, BS 1560 Series 150 or equivalent flange ready at port side manifold, with bitts, straps, tuggers, etc. ready for connecting 1×16 in. over-the-rail hose to the manifold. The connecting 16 in. manifold flange shall be fitted to a spool piece of minimum length 200 mm. to allow sufficient space to connect the camlock coupling of the hose end. Port side manifold arrangement to comply with OCIMF "Standard for Oil Tanker Manifolds and Associated Equipment" – page 17. SWL of port side derrick to comply with ISGOTT (Appendix C.10.2 weight of hose strings) for single buoy moorings i.e.: Minimum SWL 10 tonnes for port side derrick is required.

3. Maximum vessel loaded draft at SALM-1 is 17.4 m. (57 ft.). Maximum vessel loaded draft at SALM-2 is 20.4 m. (67 ft.).

4. Have on arrival adequate clean or segregated ballast for safe manoeuvring and be able to limit freeboard by loading crude and discharge segregated/clean ballast simultaneously.

During the N.E. monsoon season (November-March), vessels must arrive with forward draft not less than 5.50 m., adequate ballast or cargo onboard to have propeller covered and with no more than 6 ft. trim by the stern. Vessels with only CBT system on board must be able to retain ballast or to load and discharge simultaneously without any risk of pollution or cargo contamination.

NOTE: There are no ballast receiving facilities and ballast pumped overboard must be absolutely clean.

HEALTH: Radio Pratique should be requested through a local shipping Agent.

RADIO: All radio traffic to be channelled through Singapore Radio. Vessels to maintain radio watch on the same station.

(a) Cables for Petronas to be addressed to PP(T)SB, Kerteh. Telex: Petref MA 51326 and copy to "International Marketing, Petronas", Kuala Lumpur. Telex: Petron MA 30032 or MA 30696.

(b) Cables for EPMI to be addressed to TCOT, Kerteh. Telex: MA 51384 with copies to Essosupply Kuala Lumpur MA 30621.

Singapore Radio works on the following frequencies:–

Call Sign	*Transmit (kHz)*	*Receives (kHz)*	*Watch (GMT)*	*Remarks*
9VG4	2182	2182	0000–2400	Call, replay and safety
9VG87	4125	4125	0000–2400	
9VG88	6215.5	6215.5	0000–2400	
9VG89	8780	8257	0000–2400	Common calling frequencies
9VG90	13162.9	12392	0000–2400	
9VG91	17294.9	16522	0000–2400	
9VG5	2760	2527	0000–2400	Working frequencies for passing of radio telegrams
9VG60	4369.8	4075.4	0000–2400	
9VG63	8728.2	8204.3	0000–2400	
9VG67	13156.6	12385.8	0000–2400	
9VG52	2780	2685	On demand	Connection to telephone system
9VG61	4376	4081.6	On demand	
9VG62	6509.5	6203.1	On demand	
9VG64	8762.3	8238.1	On demand	
9VG65	8790.2	8266.3	On demand	
9VG66	13147.3	12376.5	On demand	
9VG68	17270.1	16497.2	On demand	
9VG69	17356.9	16584	On demand	
9VG70	22630.1	22934.1	On demand	

Traffic lists will be transmitted on the following listed frequencies, except during transmitter maintenance periods when the list will be broadcast on the two frequencies consecutively.

Transmit (kHz)	*Receives (kHz)*	*Time (GMT)*
2760	2527	0005, 0405, 0805 and 1205
8728.2	8204.3	
2760	2527	1605
4369.8	4075.4	

Approximate geographical location of Singapore Radio Station is Lat. 01° 20′ N., Long. 103° 40′ E.

Notice of Arrival:

Upon departure from last port or immediately after having received instructions to proceed to Kerteh Port Marine Terminal, Master is requested to cable to either EPMI (if scheduled to load crude) or to PP(T)SB (if scheduled to load product) the following:

AAA	Vessel name, previous name (if any), call sign and flag.
BBB	ETA, date and local time (GMT + 8 hours).
CCC	Master's name.
DDD	G.r.t., n.r.t., d.w.t., s.d.w.t. and Light Displacement Tonnages.
EEE	Last discharge port and intermediate ports.
FFF	Next discharge port and intermediate ports.
GGG	Number of crew.
HHH	Number of passengers.
III	Grade and Quantity of cargo on arrival, previous cargo and cargo to be loaded at Kerteh Marine Terminal and loading rate per manifold.
JJJ	Whether previous cargo or any cargo on board has high H_2S contents and H_2S concentration in tank vapour spaces.
KKK	Malaysian light dues receipt number and date.
LLL	Arms on board.
MMM	Deballasting time prior loading if any or whether vessel is able to load and deballast simultaneously.
NNN	Arrival drafts.
OOO	Any leaks which could cause pollution or affect loading.
PPP	Pratique Granted: Place/Date. If any sickness on board or of clean bill of health.
QQQ	Confirm inert gas system operational and whether all cargo tanks in inert atmosphere on arrival.

All vessels loading at Kerteh Port Marine Terminal for the first time are to include the following *additional* information:

RRR	Length overall and bow to centre of manifold distance.
SSS	Size of port manifold flange and confirm that 2×12 in. (150 p.s.i.) ASA flanges are available for product tankers on port side manifold or confirm that 1×16 in. 150 ASA flange is available for crude tankers on port side and able to connect Camlock couplings.
TTT	Confirm that combination of gangway and pilot ladder ready on arrival. Only pilot ladder is required if freeboard is less than 15 ft.
UUU	If loading products, is vessel fitted with 2-valve separation for parcels?
VVV	Is vessel fitted with segregated ballast tanks?
WWW	Is vessel diesel or turbine powered?
YYY	Confirm that vessel can moor to an SPM and indicate what bow connection equipment is available. (See "Berthing").
ZZZ	What is SWL of port side derricks for hose hoisting.

Updated ETA to be reconfirmed 72, 48, 24 and 12 hours prior arrival.

VHF: When within range, vessels should contact Kerteh Port Marine Control initially on Channel 16 for berthing instructions and assignment of working channel. Working Channels are 9, 18, 21, 69 and 73.

The language of the Terminal is *English*.

Arrival Procedures: Masters should endeavour to establish contact with Kerteh Marine Control as soon as they are within VHF radio range.

Instructions thereafter will be given for further approach procedures.

RADAR: Marine control tower has radar.

TUGS: A tug and mooring launch will be in attendance during mooring operation.

SBM: One tug of 2,600 h.p. and 2 launches.

SALMs: Two tugs, 3,500 h.p. and 800 h.p.

Note: Tugs are time chartered to suit size of tankers.

BERTHING: *Petronas Penapisan (Terengganu) Sendirian Berhad (PP(T)SB) SPM:* The Catenary Anchor Leg Mooring (CALM) is located in 60 ft. of water in position Lat. 04° 34.5′ N., Long. 103° 29′ E. It is designated for 85,000 d.w.t. tankers on restricted draft. The SBM is fitted with 2 mooring hawsers and 2 strings of loading hoses, one for loading black oil and one for loading clean products.

CAUTION: The SBM is only a distance of 1 nautical mile from the beach. The bottom shelves from the SPM for a distance of approximately 5 cables (900 m.) to a Danger Line of 3 buoys in 50 ft. A.C.D. of water.

When the SBM is at maximum excursion, i.e. 2 mooring chains tight on the weather side, no vessels, such as tugs or standby boats, can approach this SBM closer than 50 ft. Otherwise, they will foul the anchor chain.

Therefore the terminal insists that vessel engines and crew are at all times on standby whilst moored to this SBM.

TCOT SALMs: SALM 1 is located in 85 ft. of water in position: Lat. 04° 34.4′ N., Long. 103° 30.3′ E. It is designed for fully loaded 140,000 d.w.t. tankers.

SALM 2 is located in 92 ft. of water in position: Lat. 04° 33.5′ N., Long. 103° 30.7′ E. It is designed for fully loaded 250,000 d.w.t. tankers with certain limitations.

Both SALMs are fitted with a single hawser system terminating in a 3 in. chafing chain. Vessels over 150,000 d.w.t. will be moored at SALM 2 and a second hawser, also terminating in a 3 in. (76 mm.) chain, will be fitted.

Berthing and Mooring: Prior to berthing the Mooring Master will discuss with the Master the berthing and mooring operations and ascertain that the vessel is fully manoeuverable. He will also inspect the vessel's ballast to ensure that only clean ballast is carried and its disposal overboard will be safely carried out simultaneously with the loading of cargo.

The second Mooring Master will discuss with the Officer on the bow the mooring operation and will via the Officer supervise the mooring operation performed by the vessel's crew.

After ensuring that the manoeuvring area is clear of other traffic and weather and sea conditions are suitable, the vessel will be manoeuvred for the approach to the mooring buoy. The heading of the vessel will normally be such that she will have the wind ahead but tidal effects may have to be taken into account. A tug of suitable power and a mooring launch will be in attendance. During the final approach, the mooring launch will pick up a messenger line from the vessel's bow and maintain station approximately 300 ft. ahead of the vessel. When the mooring launch reaches the end of the mooring system's pick-up line, the vessel's messenger line will be made fast and the vessel's crew will heave in the slack as the vessel moves closer to the mooring buoy.

When the pick-up line is on board the crew will commence heaving on this line the chafing chain is on board and secured.

The Refinery *SBM is fitted with 2×2 in. diameter chafing chains* which require *Panama Leads with a minimum diameter of 16 in.* It is the vessel's responsibility to ensure that the 2 chafing chains on the Refinery SBM are brought on board in equal lengths in order to share the load equally between the 2 mooring hawsers which are seperate and not mated or secured together in any way.

The crude oil *SALMs are fitted 1×3 in. diameter chafing chain,* which requires a Panama Lead with a minimum diameter of 16 in. Vessels greater than 150,000 d.w.t. will be berthed at SALM No. 2 and two chain mooring systems will be connected.

Chafing chains will be connected to or bow stoppers. An alternative connecting system will be used when vessels are not fitted with the connections mentioned above. Bollard with 6 m. long×64 mm. diameter snotter wire and bow shackles can be used as an alternative to secure the chafing chain.

HOSES: *Connection Hoses:* Once the vessel is moored, the floating hose(s) will be towed alongside and connected to the vessel's port manifold.

Connecting and disconnecting of hose(s) will be the responsibility of the vessel's crew.

While vessels are moored, it is imperative that a careful watch is maintained on the mooring systems and cargo hose.

Main engines should be kept on standby and should be ready for immediate use in the event the vessel starts to ride up on the mooring buoys.

On the Refinery SBM the floating hose strings are 12 in. ASA on the rail and have a total length each of 230 m. Camlock couplings are fitted.

On the crude SALMs 1 floating hose string terminates in 16 in. ASA flange on the rail and is fitted with butterfly valve – lock arrangements with camlock. (Also see "Radio" – SSS).

LOADING: *Loading Rate:* Prior to the commencement of loading operations, an agreed upon oil transfer plan must be established. This will include commencement, maximum and topping off loading rates and emergency stop procedures.

Maximum loading rate at the Refinery SBM will be approximately 20,000 bbls.p.h. through each hose and at the crude SALM, approximately 45,000 bbls.p.h. Vessels take maximum flow, with due regard to safety, in order to expedite turn around time. Care should be taken not to overload. Topping up rate for products is between 2,100 – 3,800 bbls.p.h.

Vessels with or without permanent ballast tanks should retain ballast onboard until the vessel has taken sufficient cargo to be manoeuvrable, after which simultaneous loading and deballasting operations could commence. Such practice improves turnaround time and keeps the windage area down to acceptable levels. Vessels with excessive deballasting time may incur considerable delay in berthing.

Closing Valves Against Oil Flow: Warning is given of the danger of closing valves against an incoming oil stream. This will create excessive pressure which may result in damage to the loading hoses and Terminal facilities. Vessels will be held liable for damages resulting from failure to observe this precaution. Both the Refinery and TCOT will automatically stop pumping when back pressure reaches 220 p.s.i.

Electrical Storms: Loading will be suspended when severe Electrical Storms are in the near vicinity to prevent the possibility of cargo gases igniting.

SAFETY/FIRE/POLLUTION:

General: A Ship/Shore Safety and Pollution Check List is used at the terminal and all operations closely follow recommendations in the International Safety Guide for Oil Tankers and Terminals.

Fire: In the event of fire onboard: Immediately stop loading, advise the Mooring/Loading Master onboard and prepare to disconnect hoses and evacuate the berth. A well-equipped tug is standing by and may assist under the Mooring Master's guidance. In case of VHF communications failure sound 10 short blasts on the ship's whistle.

Pollution: The terminal is located in an extremely pollution sensitive area, a short distance from high amenity beaches with a valuable and vulnerable marine life. It is therefore imperative that all pollution of the sea is avoided. Master will be held liable for all clean-up-costs and third party claims and Owners promptly advised in case of pollution.

Deballasting: Ballast water pumped overboard should not contain oil or mixture containing oil (a mixture with an oil content of 100 parts or more in 1 million parts of the mixture) in accordance with the Section 27(1) of the Environmental Quality (Amendment) Act, 1985 (See "Below") with regard to Malaysian waters and Section 10(1) of the Exclusive Economic Zone Act, 1984 (See "Below") with regard to the exclusive economic zone.

Vessels ballast tanks will be carefully inspected. Vessels with dirty or doubtful ballast water will not be accepted unless analysis of water samples for oil content show otherwise.

Oil Spills: Should an overflow or hose leak occur during loading; immediately advise shore to stop loading and retain oil onboard and clean-up or recover oil.

The stand-by tug is equipped with spill-booms, skimmers and oil spill dispersant spraying booms. However, spraying of chemicals should only be done as a last resort after clearance from the relevant Authorities has been obtained.

Garbage Disposal: Dumping of garbage overboard, of whatever kind, is strictly forbidden.

Appendix:

SECTION 10(1), EXCLUSIVE ECONOMIC ZONE ACT, 1984

If any oil, mixture containing oil or pollutant is discharged or escapes into the exclusive economic zone from any vessel, land-based source, installation, device or aircraft, from or through the atmosphere or by dumping:

(a) the Owner or Master of the vessel, if the discharge or escape is from a vessel;

(b) the Owner or occupier of the place on land, if the discharge or escape is from land;

(c) the Owner or person in charge of the installation or device, if the discharge or escape is from an installation or a device; or

(d) the Owner or Pilot of the aircraft, if the discharge or escape is from an aircraft,

shall each be guilty of an offence and shall be liable to a fine not exceeding 1,000,000 ringgit.

SECTION 27(1), ENVIRONMENTAL QUALITY (AMENDMENT) ACT, 1985

No person shall, unless licensed, discharge or spill any oil or mixture containing oil into Malaysian waters in contravention of the acceptable conditions specified under Section 21.

NOTES: (i) SECTION 21, ENVIRONMENTAL QUALITY ACT, 1974

The Minister, after consultation with the Council, may specify the acceptable conditions for the emission, discharge or deposit of wastes or the emission of noise into any area, segment or element of the environment and may set aside any area, segment or element of the environment within which the emission, discharge or deposit is prohibited or restricted.

(ii) SECTION 2, ENVIRONMENTAL QUALITY ACT, 1974

"Mixture containing oil" means a mixture with such oil content as may be specified by the Minister or, if such oil content is not specified, a mixture with an oil content of one hundred parts or more in one million parts of the mixture.

MEDICAL: No doctor or clinic available, however in emergencies, exceptions may be permitted for humanitarian reasons.

DENSITY: 1025.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: None.

REPAIRS: Not possible.

Note: Vessels are strictly prohibited to carry out hot work or repairs of any kind which could cause fire hazard *or* immobilise engine at the berth or within the port area except at the designated anchorage area, with the approval of Terminal Superintendent or Representative.

SURVEYORS: Trident Malaysia Sdn. Bhd., Straits Trading Building, Lebuh Pasar Besar, Kuala Lumpur. Tel: 03-926410. Telex: MA 39551.

Caleb Brett Malaysia Sdn. Bhd., Room 301, 3rd Floor, Bangunan Yayasan Selangor, Jln. Bukit Bintang, Kuala Lumpur. Telex: MA 30579.

CUSTOMS ALLOWANCES: Usual allowance for ports in Malaysia.

REPATRIATION: Not possible.

TIME: GMT plus 8 hours.

WEATHER: The seasonal weather patterns are broadly divided into three types and the terminology used is consistent with that of S.E. Asia. These three types are:

1. S.W. Monsoon (May to September): Winds are generally from the South or S.W. during this period and can reach gale force in local squalls.

2. N.E. Monsoon (November to March): Intermittent bad weather occurs during this monsoon and high sea and swell conditions can persist for extended periods.

3. Transition Periods (April and October): Winds are generally variable during the monsoon transition periods but may freshen in the late afternoon and early evening with the sea breeze effect. Occasionally, local gale force squalls may occur but these are generally of short duration.

CAUTION: The severe squalls often occur suddenly without warning. It is therefore important whether at anchor or moored that an alert deck watch is kept.

Refer to China Sea Pilot – Volume 1 for further meteorological information.

TIDES AND CURRENTS: *Currents:* The tides off Kerteh vary widely, with periods of only one HW and one LW each lunar day, there are also marked inequalities in times and heights of high and low waters.

The tides at Kerteh are on average 30 minutes earlier than the standard Port of Tanjung Gelang but there are wide variations.

The ocean currents off the Kerteh Coast are the result of the monsoon wind pattern, setting South during the N.E. Monsoon and North during the S.W. Monsoon. The average currents are:

January	1.0 knot	180°
April	0.5 knots	170°
July	1.0 knot	010°
October	0.5 knots	variable

Combination Tide and Current: The strength of the current is dependent on the strength of the monsoon wind and when winds are strong the current can increase to 2 knots or more.

Thus in the N.E. Monsoon the combination of current and flood tide can produce a South running stream of 3 knots or more, and with a very weak North running stream. The same occurs in reverse during the S.W. Monsoon.

CAUTION: When at anchor it should be noted that with the tidal streams and currents in "conjunction" they can exceed 3 knots in strong winds and as the holding ground is not good, it is important that a very careful check is kept on the ship's position at all times.

EMERGENCY CO-ORDINATING CENTRE: Contact Marine Control Tower on VHF Channel 16 or other assigned working Channels, 9, 69 and 73. Tel: 09-871 277 Control Room. Telex: MA 51384.

SHORE LEAVE: No shore leave.

GENERAL: *Language:* The language of the Terminal is English.

Mail: (a) Mail for tankers loading at PPTSB or Petronas cargoes at TCOT should be addressed to the ship's Agent.

(b) Mail for personnel on incoming crude tankers loading an Esso cargo may be sent to EPMI's Kuala Lumpur Office marked for the attention of the "TCOT Marine Superintendent" for transmission to the vessel when it arrives at Kerteh Port Marine Terminal.

Personnel: Only authorised personnel are permitted to board vessels while berthed.

Provisions: Not available.

Ballast: No dirty ballast or slop disposal.

Terminal: The Kerteh Port Marine Terminal is located off-shore and the only means of transportation available to the shore is by marine support craft to Tanjong Berhala Supply Base situated 24 miles to the S.E. As such, the terminal can offer no logistical support to the vessels calling at the Kerteh Port.

AGENT: See "Port Kelang".

KOTA KINABALU (including Sapangar Bay), Sabah: 05.59 N. 116.00 E. **(See Plan)**

PORT LIMITS: Gaya Bay and waters to the S.W. bounded by a line joining Tanjong Aru and the Northern point of Pulau Gaya thence a line to Gaya Head including rivers entering same for a distance of 600 ft. inland from the mouth of the river.

DOCUMENTS:

Documents to be produced on arrival:

Port Clearance from Last port.
6 copies Inward Cargo Manifests.
2 copies Hatch List, *or* 1 copy Stowage Plan.
9 copies Crew Lists.
9 copies Passenger Lists.
2 copies Bonded Stores Lists (incl. Arms and Ammunition Lists).

In addition, the Master has to complete a Shipping Arrival Report Form and a Maritime Declaration of Health Form.

Notes: (a) If vessel arrives from any port outside those declared infected.

(b) These 2 copies (Inward Cargo Manifests) must be certified by the Master as follows: "I hereby certify that to the best of my knowledge and belief this manifest is complete and correct. . . . .Master".

To be supplied to Ship before Departure:

1 set Agents Outward Manifests.
2 copies Passenger Lists for Immigration.*
1 copy Passenger Lists for Customs.*
1 set Manifests for Customs.*

*To be supplied by Agent.

If vessel departs to a port outside Sabah, 2 copies outward crew list are also required for Immigration.

Where possible, cargo manifests and stowage plans should be forwarded in advance to local Agents and Port Authority ahead of vessels.

Certificates: Registry, Load Line, Radio, Safety Equipment and Derat Exemption.

PILOTAGE: Not compulsory. Pilot normally available between 0600 hrs. and 1800 hrs. only. Applications normally made by Shipping Agents with advance notice of 24 hours prior to actual time that Pilot Services are required. Pilot boats are between 30 ft. – 40 ft. length and equipped with VHF/AM sets – 80.4 MHz frequency. Pilot station at Port Office (Marine Department) and location for vessel awaiting Pilot is within port limit. Marine Department Tel. 52213.

ANCHORAGES: (Also see "Health").

Special Anchorages and Prohibited Areas

(1) *Prohibited Anchorage:* No vessels shall anchor as to swing within 3,000 ft. of the F.R.G. Light on the N.N.E. end of the Authority Wharf in approx. position Lat. 05° 59′ 51″ N., Long. 116° 04′ 30″ E. Vessels under 150 ft. in length may anchor within this area, East of a line joining the F.R.G. Light and Gueritz Shoal Light Beacon.

(2) *Prohibited Area:* Except with the previous permission in writing of the Authority, no logs or timber shall be allowed to lie afloat within the area – Eastward of a line drawn in a 172° direction from Grieve Reef Beacon.

(3) *Explosives and Dangerous Goods Anchorage:* Vessels having explosives and Dangerous Goods on board shall anchor within a line drawn from a position in Lat. 06° 01′ 21″ N., Long. 116° 05′ 45″ E. thence in a 360° direction for 6.5 cables thence in a 270° direction for 10 cables thence in a 180° direction for 6.5 cables thence in a 090° direction for 10 cables to the starting point.

(4) *Dangerous Petroleum Anchorage:* A vessel having dangerous petroleum on board shall anchor within a line drawn from a position in Lat. 06° 00′ 42″ N., Long. 116° 05′ 45″ E. thence in a 270° direction for 10 cables thence in a 360° direction for 6.5 cables thence in a 090° direction for 10 cables thence in a 180° direction for 6.5 cables to the starting point.

(5) *Quarantine Anchorage:* A vessel which is required to proceed to a Quarantine Anchorage shall anchor within an area bounded by a radius of 3 cables from a position in Lat. 06° 01′ 34″ N., Long. 116° 03′ 46″ E.

RESTRICTIONS:

1. Entering. Vessels with dangerous cargo such as benzene are not allowed to stay alongside wharf or to berth after 1800 hrs. Vessels arriving from any port within hours of day-light not allowed to berth until they see the signals at the Customs House directing them. This applies equally to vessels arriving on schedule as well as unscheduled vessels and any infringement of these regulations can have very serious consequences.

Master of ship not sailing within 48 hours after port clearance to report to Harbour Master reason for not sailing, and, if so required obtain a fresh port clearance.

2. Shifting. The Authorities must be informed prior to shifting.

3. Immigration. No person may leave ship before clearance has been given by Customs/Immigration Officers.

4. Currency. No restriction on amount of currency which can be brought into this State but max. amount allowed to be taken out is MAL$100. Foreign exchange must be conducted through recognised banks.

MAX. SIZE: Max. size at general cargo berths is 20,000 d.w.t.

HEALTH: (Also see "Regulations"). *(a)* Sabah Government are signatories to WHO convention on Quarantine regulations. Port Health Doctor will not board unless vessel comes from infected port. Instead, Maritime Declaration of Health to be filled out and handed to Boarding Officer of Health Department who will require 1 copy of Crew List and 1 copy of Passenger List. Vessels should cable Agent prior arrival advising last port of call and whether vessel is healthy. Pratique normally cabled to ship but if unreceived, vessel need not proceed to Quarantine anchorage unless coming from infected port.

(b) Vessels arriving from ports outside the State will anchor until boarded by Authorities unless previously instructed by telegram to come alongside.

RADIO: Singapore Radio recommended. (Also see "Health"). Local radio call sign "Control K.K.".

Berthing Application: Application for berthing has to be made 24 hours prior to actual time when berthing is required.

Details and Requirements: Name of vessel, gross and net tonnage, length overall, draft (fore and aft) ETA at berth, ETD from berth, nature and tonnage of cargo to be discharged/loaded, number of gangs required, amount of water, Pilot requirements. Vessels given berth on first come, first served basis.

Tankers: As much notice of arrival as possible is essential.

(a) If first port in Sabah and communication is difficult send message through Singapore Radio.

(b) If to be second or subsequent port in Sabah ensure that Agent/Installation Representative in the previous port gets an accurate ETA before vessel's departure so that this can be passed on by telephone.

VHF: Port Control on VHF Channels 12 and 16 (office hours only).

To reach the Agents directly during office hours contact 9WH26 on VHF Channel 26. The call charges will be reversed by 9WH26 which is an unofficial telecommunications VHF station.

TUGS: Tug 280 h.p. available to assist vessels berthing and unberthing without a Pilot at inner berth. Ship's lines used.

BERTHING:

Berth No.	*Berth Length* (ft.)	*Depth* (m.)	*Capacity* d.w.t.
1	400	9.10	20,000
2	400	9.10	20,000
3	350	9.10	20,000
4	400	7.62	5,000
5	370	5.79	3,000
6	300	5.79	4,000
7	400	7.62	7,000
8	300	6.88	18,000
9	300	6.88	4,000
10	400	7.50	5,000
11	320	5.5 – 6.8	700
12	420	5.5 – 6.8	2,000

Note: The Old Wharf was closed to berthing and operations with effect from 31st December, 1987.

Ro-Ro: Facilities available at the Fast Erect Jetty. Max. size: LOA 180 m., beam 25 m. and max. draft 5.5 m.

CARGO: (Also see "Berthing".)

1. Tally: The Agent can provide tally clerks at ship's expense.
2. Inward cargo: Ship's responsibility ceases as soon as consignees take delivery ex-sling.
3. Transhipment cargo: Transhipment cargo handles via Port Authority Godown.
4. Outward cargo: All cargo is brought to the ship alongside wharf either by tractors and trailers.
5. Special cargo regulations:

(a) Dangerous Cargo: Vessels carrying explosives as cargo: All vessels arriving at, or remaining within the limits of, any port with explosives on board shall fly the gunpowder flag at the foremast.

No vessel having explosives on board shall, without the permission in writing of the Harbour Master, come or remain within 500 yards of the shore or any other vessel:

Provided that such a vessel may, with the written permission of the Harbour Master, come and remain within such limit where:

(i) such explosives are wholly and exclusively of Class V (Fulminate) or Class VI (Ammunition) or both such classes in the second schedule; and

(ii) the total quantity of such explosives does not exceed two thousand pounds; and

(iii) such explosives are carried in a properly constructed magazine duly certified as such by a British Board of Trade Surveyor or by an officer fulfilling similar functions appointed by a Government of any British possession or the vessel has a certificate from one of Her Majesty's Inspectors of Explosives or from an Officer fulfilling similar functions appointed by the Governments of Singapore, the Federation of Malaysia or Hong Kong and approved by the Governor that all the explosives on board such vessel have been properly stored and the Master of such vessel further certifies in writing that no other dangerous cargo is carried by the vessel; or where:

(iv) such explosives are wholly and exclusively explosives of one or any of Class III (Nitro-compound), Class IV (Chlorate mixture) or Class VII (Firework); and

(v) the total quantity of such explosives does not exceed three thousand pounds.

No such explosive shall be landed, shipped or transhipped between sunset and sunrise without the previous permission in writing of the Harbour Master. Any Master of a vessel offending against the provisions of this section shall be liable to a fine of MAL$1,000.

(b) Livestock: Pigs or cattle may not be loaded or discharged on any wharf without permission of the S.P.A.

CARGO HANDLING FACILITIES: *Cargo Handling Equipment:*

Equipment	*Manufacturer*	*No. of Unit*
Forklifts	Mitsubishi FD20	2
	Mitsubishi FD30	12
	Toyota 3FD30	56
	Komatsu FD30-8	8
	Toyota 3FD60	4
	Toyota FD190	2
	Toyota FD250	1
Towing Tractors	Chamberlain	8
	Toyota TD20	25
	Toyota 42-3TD20	6
	Toyota TD35	13
Trailers (5,000 kg.)	Hargill (Volvo)	30
	T.S. Engineering	18
	Besi Asia Engineering	21
Trailers (20,000 kg.)	Hargill Malaysia	6
	Rumpun Hijau	2
	Hargill	8
Trailers (30,000 kg.)	Wagon Engineering	2
Trailers (40,000 kg.)	Hargill	2
Straddle Carriers	Valmet	2

Pallets, Pallet Bridles, Wire Net Slings, Car Slings and Lorry Sling are also available for hire.

Storage Facilities:

Godown 1: 6,693 sq.m.
Godown 2: 8,366 sq.m.
Godown 3: 4,648 sq.m.
Godown 4: 2,789 sq.m.
Godown 5: 2,882 sq.m.

Container Yard (bitumen)	2.5 acres (1.01 hect.)
Container Yard (Concrete)	2.08 acres (0.842 hect.)
Paved Area	4.20 acres (1.70 hect.)
Open Storage Area 1 (between bridges)	6,420 sq.m.
Open Storage Area 2 (opposite canteen)	6,770 sq.m.
Open Storage Area 3 (behind Godown 3)	6,330 sq.m.
Open Storage Area 4 (behind Godown 4)	2,700 sq.m.
Wharf Deck Storage Area (Northern extensions)	2,700 sq.m.
Ideal for sawn timber (7 days' free storage)	16,500 sq.m.

STEVEDORES: Stevedores provided by SPA; labour supplied for working in ships' holds and on ships' winches (if required). For cargo delivered direct ex-wharf consignee provides wharf labour; cargo for Sabah Ports Authority godown labour provided by Sabah Ports Authority.

Arrangement of stevedores should be made with 48 hours' notice to Shipping Agent. Average gang performance is 20 tons per gang hour for conventional traffic (excluding vehicles) and 40 tons per gang hour for pre-palletised cargo (excluding vehicles). Cargo work is carried out in 3×4 hour periods namely:

1st Period	0730 – 1130 hrs.
2nd Period	1300 – 1700 hrs.
3rd Period	1800 – 2200 hrs.

Work outside these hours is by prior application.

MEDICAL: Medical Officer of Health: Medical Services Department, Tel. 54303. Vaccination and inoculation (incl. Yellow Fever) can be arranged via Agent at any time during working days. In case of death on board, Agent and Harbour Master as well as the Police to be informed.

TANKERS: The port operates on a "first come-first served" basis in allocating the jetty but palletised vessels will get priority. Port Rules state that no other vessel allowed alongside when tanker discharging A-class products. As cargo vessels stop discharging at 2200 hrs., tankers are normally allowed to discharge A-class cargo until the following morning at 0600 hrs.

Berth is timber piled with concrete deck jetty, continuous 650 ft. by 40 ft. wide. Maximum displacement allowed – 13,000 tons. Maximum draft allowed – 22 ft.

Vessels berth either port or starboard side alongside according to the weather and tidal conditions prevailing at the time of berthing. Tankers berth on the outer side of the jetty only.

Fresh water available from wharf only. Vessels to provide hoses. Advance notice of requirements advisable. Rate 25 t.p.h.

Shore Line System:

(a) For Mogas, 1,440 ft.×8 in.
(b) For Jet A.1/Kerosene 1,450 ft.×8 in.
(c) For Gas oil/Light Fuel Oil, 1,380 ft.×8 in. hoses used to connect ship and shore.
(d) For Bitumen, 1260 ft.×8 in.

Sapangar Bay Oil Terminal: *Location:* 06° 05′ 10″ N., 116° 07′ 19″ E.

Pilotage: Pilotage at Sapangar Bay Oil Terminal is optional. Vessel's Master is advised to contact the Marine Department at Kota Kinabalu with any enquiries. Pilot boarding and anchorage position is at the Petroleum Anchorage at Lat. 06° 01′ 00″ N., Long. 116° 05′ 15″ E.

Navigational Aids: 5 channel markers with flashing lights are provided at Sapangar Bay. Three of the markers have red flashing lights and two have green flashing lights. The location of all the markers are as follows:

Marker No.	*Location*		*Light*
1	6° 4′ 39.5″ N.	116° 6′ 6″ E.	Red
2	6° 5′ 15″ N.	116° 6′ 46″ E.	Red
3	6° 5′ 30″ N.	116° 7′ 19″ E.	Red
4	6° 5′ 19″ N.	116° 7′ 34″ E.	Green
5	6° 4′ 39″ N.	116° 7′ 5.5″ E.	Green

Jetty Head: The jetty head/main berth is located at Lat. 06° 05′ 10″ N. and Long. 116° 7′ 19″ E.

Restrictions: Berthing and unberthing possible daily between 0600 hrs. and 1800 hrs.

Max. Size: 30,000 d.w.t. Max. draft 36 ft. Max. LOA 815 ft.

Radio/VHF: Radio/VHF facilities not available, terminal uses Kota Kinabalu Marine Tower facilities only.

Tugs: Tugs not available. Shipping Agents are required to contact Marine Department or private company.

Berthing: Length of jetty head 82.32 m. Depth alongside 12.2 m. Tidal rise 2.3 m.

Pipe-lines: There are a total of 8 common users' pipe-lines and 1 single user pipe-line between the jetty head and the individual user's boundaries.

Discharge pipe-line – common users	*Max. discharge rate*
10 in. dia. Gasolene (Premium and Regular)	500 t.p.h. at 150 p.s.i.g.
10 in. dia. Diesel (DE 1)	500 t.p.h. at 150 p.s.i.g.
10 in. dia. Jet A-1 (DPKE)	500 t.p.h. at 150 p.s.i.g.
10 in. dia. Domestic Kerosene (DKE)	500 t.p.h. at 150 p.s.i.g.
10 in. dia. Light Fuel Oil (LFO)	500 t.p.h. at 150 p.s.i.g.
3 in. dia. LPG (V)	500 cu.m.p.h. at 150 p.s.i.g.
6 in. dia. LPG (L)	500 cu.m.p.h. at 150 p.s.i.g.
Discharge pipe-line – Single users	
10 in. dia. Bitumen (B)	500 t.p.h. at 150 p.s.i.g.
Bunkering pipe-line – Common users	
6 in. dia. Diesel (DE 2)	200 t.p.h. at 150 p.s.i.g.

Bitumen and bunkers handled through hoses and all other products by marine loading arms.

Security: The Authority provides its own security personnel.

Fire Fighting Facilities: 2 Tower Fire Monitors are available at the Jetty Head which are capable of delivery of sea water or foam at 1,350 u.s.g.p.m. each. The monitors are hydraulic powered and electrically controlled remotely at the foam making plant about 150 ft. behind the jetty head.

Medical: Medical facilities only available at Menggatal town about 11 km. from Sapangar Bay.

Fresh Water: Fresh water is available at the jetty head at a pumping rate of about 50 tonnes per hour.

Slop Facilities: Not available.

Authority: Sapangar Bay Oil Terminal, Pejabat Pengurus Terminal, P.O.Box No. A/150, Teluk Sapangar, 89357 Inanam. Tel: (088) 411069, 411079, 411090, 411070. Telex: Saport MA80074. Contact: Terminal Manager.

DENSITY: Average 1020.
FRESH WATER: Can be supplied from wharf. Supply rate is 20 tons per hose per hour.
FUEL: Not available.
CONSULS: Denmark, Indonesia, Japan and United Kingdom.
REPAIRS: Some private firms and workshops undertake small engine and deck repairs in Kota Kinabalu.
DRY DOCKS: See "Labuan" and "Sandakan".
GANGWAY/DECK WATCHMEN: Not necessary. Agents may exercise option.
OPENING/CLOSING HATCHES: Normally by stevedores.
CUSTOMS ALLOWANCES: Tobacco, wine and/or spirits: No control, up to discretion of Officer of Customs and Excise.
CARGO GEAR: Ship's gear used, also for containers ex-feeder ships and heavy lifts in major ports.
REPATRIATION: Normally arranged by Agents.
AIRPORT: Some airports in State are between 4 km. to 10 km. from town centre.
TIME: Local time is 8 hours ahead of GMT. No alteration to clocks.
HOLIDAYS: Cargo work can be arranged if necessary during official holidays but not for Hari Raya Puasa, Chinese New Year and Christmas Day. Also see "Sandakan".
POLICE/AMBULANCE/FIRE: Police/Fire, Tel: 088-54111. Hospital, Tel: 088-54911.
SERVICES: Tank cleaning services can be arranged with Agents. Marine Department deals with compass adjustments.
TELEPHONES: Available.
BANKS:

Sabah Bank Berhad, G.P.O. W.D.T.132, Sinsuran Complex, 88999 Kota Kinabalu, Sabah, Malaysia. Tel: 088-218911. Telex: MA 80694. Fax: 088-231184.

Public Bank Berhad, Lot G. 06-G. 12, Karamunsing Complex, 88300 Kota Kinabalu, Sabah, Malaysia. Tel: 088-239611. Telex: MA 30780. Fax: 088-236630.

Hongkong & Shanghai Banking Corp. Ltd., 56, Gaya Street, 88817 Kota Kinabalu, Sabah, Malaysia. Tel: 088-212622. Telex: HBC 80031. Fax: 088-2133041.

SHORE LEAVE: Crew members allowed ashore after inspection by Immigration Officer.
IDENTIFICATION CARDS: Not required.
GARBAGE/WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: Malaysian Ringgit (MYR$). U.S.$ 1.00 = MYR$ 2.48. U.K.£ 1.00 = MYR$ 4.79 (3.7.92).
REGULATIONS: *(a)* Arrival and Departure:

1. The Owner or Agent of every vessel other than a small ship intending to call at a port shall, as soon as possible, and in any case not later than 36 hours prior to the estimated time of arrival of the vessel, give notice in writing to the Authority of such arrival and, if so desired, the requirement for a berth at a wharf.

2. The notice under this regulation shall be in a form prescribed by the Authority and shall contain full particulars regarding the cargo to be discharged and loaded, the embarkation and disembarkation of passengers, heavy lifts, special or perishable cargo, hazardous and dangerous goods (whether to be discharged at the port or not), and any other matters of importance relating to the working or safety of the vessel in the port.

3. The Master of every vessel entering or leaving a port between sunrise and sunset shall cause to be hoisted the national colours and the signal letters, if any, of the vessel. The national colours shall be exhibited from 0800 hrs. to sunset whilst the vessel remains in port.

4. The Master of every vessel arriving from outside the State of Sabah shall exhibit the Immigration and Quarantine signals contained in the First Schedule and shall also at the request of a Customs officer hoist the Customs signals. Such signals shall remain exhibited until the appropriate officer has given permission for them to be lowered.

5. No vessel shall approach within 600 ft. of any other vessel exhibiting the Immigration, Health or Customs signals.

6. No person other than a Pilot may board or disembark from any vessel until the vessel is cleared inwards and the Immigration, Quarantine and Customs signals have been lowered.

7. Every vessel entering a port shall be anchored or efficiently secured to a wharf or buoy before commencing the loading or discharging of cargo and/or the embarkation or disembarkation of passengers.

8. No vessel shall leave any port unless in possession of a valid Port Clearance issued by or on behalf of the Director of Marine.

(b) Special signals.

Significance	*By Day*	*By Night*
Immigration (for ships not carrying passengers)	International Code Signal "2 5"	Two green lights, 6 ft. apart, hoisted vertically where best seen.
Immigration (for ships carrying passengers)	International Code Signal "3 4"	Two green lights, 6 ft. apart, hoisted vertically where best seen.
Quarantine (vessel is Healthy request Pratique)	International Code Signal "Q"	Nil
Quarantine (vessel is suspect)	International Code Signal "Q Q"	A red light over a white light and a separate hoist of red light over a green light and hoisted vertically 6 ft. apart where best seen.
Quarantine (vessel is infected)	International Code Signal "Q L"	
Quarantine (not received Pratique)	Nil	A red light over a white light 6 ft. apart hoisted vertically where best seen.
Request Police Assistance	International Code Signal "S T"	A green over a white light, 6 ft. apart hoisted vertically where best seen.
Request Medical Assistance	International Code Signal "W"	A red light over a green light, 6 ft. apart, hoisted vertically where best seen.

(c) Priority. First come first served.

DELAYS: Due to weather conditions only.
GENERAL: Ship Chandlers: All kinds of stores and provisions available.

Recreation facilities. Two cinemas in town which show English films frequently. Three tennis courts available and football matches may be arranged. Sports Club is next to town Padang, about half a mile from wharf and golf and yacht clubs situated on beach at Tanjong Aru, 4 miles from town.

Surveyor: Harrisons & Crosfield (S) Ltd. are Lloyd's Sub-Agents and can arrange a surveyor provided prior warning is given.

Fumigation: No facilities.

Identification documents should be arranged in the same sequence as Crew List.

APPROACH CHANNEL: A straight 220 m. wide channel aligned on 311°(T) leads from Pilot Boarding Station to Harbour Entrance. Length of this channel is 4.8 km. The dredged length (6.5 cables) is marked by 2 pairs of light buoys. Leading lights mark the centre line of the channel with minimum depth of 13.0 m. During N.E. monsoons underkeel clearance (allowance) of 3.5 m. is required.

The following navigational aids are available within the port approaches:

Designation	*Lat. (N.)*	*Long. (E.)*	*Light Characteristics*
Channel Buoys:			
No. 1	3° 57′ 02″	103° 27′ 57″	Fl. G. 5 secs.
No. 2	3° 56′ 52″	103° 27′ 50″	Fl. R. 5 secs.
No. 3	3° 57′ 26″	103° 27′ 29″	Gp.Fl. (2) G.10 secs.

Tg. Gelang Lt. Ho.	3° 57′ 49″	103° 26′ 19″	Gp.Fl. (3)W. 10 secs.

Tidal streams: – During HW, direction is Southward and during LW, direction is Northward. Tidal range is 3.5 m. at springs.

PILOTAGE: Pilotage is compulsory. Ships should advise their ETA at least 48 hours in advance by telegram or telex Portku Ma 50305, marked for the attention of Marine Manager. ETA Pilot Boarding Station (Tanjung Gelang Lt. Ho 305°×3.9 miles) is to be reported to Port Control by VHF Channels 12 or 16 at least 2 hours in advance.

Pilot boats are painted international orange with white superstructure and the word "Pilot" written in black letters. Ships awaiting Pilot should display international code flag signals and sound or flash "G", if specifically requested by the port. Adequate anchorage is available. Pilot Boarding Station: Lat. 03° 55′ 33″ N., Long. 103° 29′ 30″ E.

Ships are expected to come up to the Pilot Boarding Station for the Pilot, provide a good lee for the pilot boat and rig the pilot ladder, manrope and light (at night) in accordance with IMO requirements (SOLAS 1977) and to be clear of all discharges and outlets and all outboard fittings which might foul the pilot boat.

During very bad sea conditions small vessels may be requested to follow the pilot boat and to pick up the Pilot inside the enclosed harbour.

Arriving/Departing vessels are required to produce Port Clearance to the Pilot for verification.

ANCHORAGES: Reserved anchorages are available for ships carrying general cargo, explosives and petroleum products, suspect or unhealthy ships and men-of-war (B.A. Chart No. 1379). Pilotage is compulsory except for men-of-war. Drafts of up to 11.5 m. can be accommodated safely.

RESTRICTIONS: The port is open 24 hours, but is subject to occasional restrictions due to weather during monsoon months of November – January or other similar constraints. Passage of ships drawing more than 11 m. is subject to tide.

MAX. SIZE: Max. LOA permissible 228 m.

Berth	*LOA* (m.)	*Draft* (m.)	*Displacement* (tons)
Nos. 1 to 4	200	11.2	45,500
Palm Oil Berth (Outer)	180	11.5	54,400
Palm Oil Berth (Inner)	125	8.0	8,000
Mineral Oil Berth	125	8.0	8,000
Ro-Ro ramp (Berth No.4)	150	6.5	Liveload 360 tons
Berth 1A	70	8.0	8,000

HEALTH: Healthy vessels are brought to berth. Suspect or infected vessels are taken to Quarantine Anchorage to await clearance from Port Health Authorities. Automatic health clearance is not granted.

RADIO: All communication must be routed through Penang Radio, which provides telegram, telex and telephone facilities.

VHF: 24 hour watch is maintained on VHF Channel 12 and 16 by the Port Control, additional operational channel is Channel 20.

At least 2 hours before arrival at pilot station, following particulars are to be conveyed by VHF: Name, official number, nationality, g.r.t., n.r.t., LOA, Summer d.w.t., deepest arrival draft and arrival displacement, quantity and commodity of cargo onboard and dangerous cargo, if any. Last port of call, last port clearance number and date, ETA pilot station and special berthing requirements, if any.

Ships sailing are required to confirm their readiness by displaying "Pilot Required" signals and VHF report to Port Control at least 2 hours in advance.

Tugs and pilot boats work on Channel 12 but can switch over to other channels if required.

TUGS: The port operates 2 tugs of 2,800 b.h.p. Ropes are used from the ship or the tug as demanded by situation. Tug operations on VHF Channel 12.

BERTHING: Total quay wall length is 725 m. divided into 4 berths numbered from seaward. Berth Nos. 1, 2 and 3 handle general and bulk cargoes of all types and are provided with transit sheds and apron width of 25 m. Berth No. 4 handles container and Ro-Ro cargoes.

A crane is provided at Berth No. 4 to handle containers, heavy cargoes and bulk cargoes with maximum lift of 40 tons.

EQUIPMENT: The port has adequate numbers of forklifts, tractor heads and trailers for handling general cargo and containers.

4 front loaders/reach stackers with topping-lift to handle 20 ft. and 40 ft. containers; 2 mobile cranes with lifting capacity of 11 tons and 35 tons; 40 forklifts with lifting capacity ranging from 2 tons – 8 tons; 3 tug masters; 4×40 ft. container trailers; 12 prime movers and 27 flatbed trailers of 20 – 40 tonnes capacity are available.

BULK CARGO FACILITIES: Bulk cargoes can be handled for direct delivery at any of the berths using portable hoppers and conveyors.

SPECIALISED CARGO HANDLING FACILITIES: Berth No. 4 (length 225 m.) is designed for container handling and other cargoes requiring open storage with priority berthing for container carriers. A container handling crane has been commissioned. Ro-Ro ramp (stern ramp) is fitted at the end of Berth No. 4.

Ro-Ro cargoes can also be handled by vessels fitted with side ramps.

MEDICAL: Hospital and doctor/dentist are not available at the port. Government clinic and doctor are available in Balok about 5 km. away from Kuantan Port. Government hospital and doctor/dentist are available in Kuantan Town, which is about 25 km. from Kuantan Port. Private dentists and doctors are available at Balok and also in Kuantan Town.

TANKERS: Palm Oil Berth (POB) and Mineral Oil Berth (MOB) handle bulk edible oils (250-300 t.p.h.) and petroleum products (200 t.p.h.) respectively. Loading hose diameters are 10 in. for crude palm oil, 8 in. for refined palm oil and 6 in. for petroleum products.

DENSITY: 1025.

FRESH WATER: Available at all berths at a rate of 25 t.p.h. Water barge supply not available.

FUEL: Vessels up to 177 m. length, subject to max. draft 9.0 m., can bunker at Mineral Oil Berth for diesel. Diesel can also be supplied through road tankers at all general cargo berths. Bunkering facilities for Heavy Fuel Oil are not available to date.

SURVEYORS: Caleb Brett, S.G.S. and Ritchie and Bissett maintain offices in Kuantan. Other surveyors may be contacted in Kuala Lumpur, Port Kelang or Singapore.

HATCHES: Mechanical hatch covers must be operated by ship's crew. Stevedores handle 'lift and place' type covers including beams, if any.

CUSTOMS ALLOWANCES: Cigarettes, tobacco, wine and liquor allowed by Customs per day as follows:

(i) Spirits/Liquor – 0.125 qt. per person per day or;
Wine – 1 qt. per person per day or;
Beer/Stout – 1 qt. per person per day.
(ii) 25 cigarettes per person per day or;
8 cigars per person per day or;
1 oz. tobacco per person per day or;
1 oz. snuff per person per day.

CARGO GEAR: Normal cargo handling gear is provided by stevedores but ships have to provide heavy lift and special cargo gear.

REPATRIATION: Facilities are available.

AIRPORT: Airport handling domestic flights is 41 km. (25 miles) from the port and international connections are available at Subang Airport, Kuala Lumpur and Singapore. It is also possible to drive to Subang Airport (5 hours) and Singapore Airport (7 hours). Taxis and buses operate at frequent intervals.

TIME: GMT plus 8 hours.

HOLIDAYS: Port works 365 days a year.

There is no extra charge for public holidays. The rate imposed is the normal rate as for any other working days.

POLICE/AMBULANCE/FIRE: Fire and ambulance assistance is provided by the Port Fire Department, Tel. (09) 433201 ext. 333, or (09) 433282. Nearest Police Station is at Beserah, Tel. (09) 587222.

TELEPHONES: Public telephone available in Port Area and can be used for international calls.

BANKS: Bank Bumiputra Sdn. Bhd. operates a branch in Kuantan Port providing full banking facilities.

STORING: Ships' stores can be taken over the wharf. Lorries can go alongside except at dolphin berths where they have to park about 100 m. away. Forklifts are available. Shore gangs may be used with prior arrangement.

SHORE LEAVE: Ship's crew are permitted to land and are required to carry their passports.

GARBAGE DISPOSAL: Collection service available. Drums are provided. Request to be made via Agents at the berth meeting. Charges are as follows:

Ships under 750 g.r.t.: $10.00 per vessel per day or part thereof.
Ships 750 g.r.t. – 15,000 g.r.t.: $30.00 per vessel per day or part thereof.
Ships over 15,000 g.r.t.: $50.00 per vessel per day or part thereof.

Collection done in the morning only.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Malaysian Ringgit (MRG). U.S.$ 1.00 = 2.55 MRG. U.K.£ 1.00 = 4.68 MRG (13.6.92).

Bank Bumiputera accepts all major currencies. Bank sited at the port.

REGULATIONS: No special regulations.

DELAYS: Average time from pilot station to berth is 1.5 hours. Minimal delay may be experienced in commencement of cargo loading due to Customs and Immigration formalities, normally 30 minutes.

GENERAL: *Signals:*

Significance	*By Day*	*By Night*
1. Immigration and Customs (for ships not carrying passengers)	International Code Signal "25"	Two all-round green lights, in vertical line, 2 m. apart seen all round the horizon at a distance of at least 3 km.
2. Immigration and Customs (for ships carrying passengers)	International Code Signal "34"	Two all-round green lights, in vertical line, 2 m. apart seen all round the horizon at a distance of at least 3 km.
3. Quarantine (vessel is healthy requests Pratique)	International Code Signal "Q"	Two all-round lights in a vertical line 2 m. apart, the top of which is red and the bottom white, seen all round the horizon at a distance of 3 km.
4. Quarantine (vessel requires health clearance)	International Code Signal "QQ"	Two all-round lights in a vertical line 2 m. apart, the top of which is red and the bottom white, seen all round the horizon at a distance of 3 km.
5. Quarantine (vessel is infected)	International Code Signal "QL"	Two all-round lights in a vertical line 2 m. apart, the top of which is red and the bottom white, seen all round the horizon at a distance of 3 km.
6. Request Police Assistance	CB 3	Two all-round lights in a vertical line 2 m. apart, the top light being red, and the lower light white, seen all round the horizon at a distance of at least 3 km.
7. Port is closed and vessel not allowed to enter the breakwater mouth	Answering Pennant	Two all-round lights in a vertical line 2 m. apart, the top of which is green and the bottom red, seen all round the horizon at a distance of 5 km.

Supplies: Provisions are available in Kuantan Town. General stores can be arranged through Ship Chandlers/Agents. Bonded Stores are not available.

DEVELOPMENTS: Construction of 2 additional berths and one dangerous cargo berth is expected to commence in 1994.

AUTHORITY: Kuantan Port Authority, P.O. Box 161, 25720 Kuantan, Pahang, Malaysia. *Tel:* (09) 433201 (10 lines). *Telex:* Plara Ma 50234. *FAX:* (09) 433866. *Contact:* Dato Tik Mustaffa, General Manager. Abdul Aziz Yaakub, Traffic Manager. Wong Soon Fah, Planning and Marketing Manager and Captain Ibrahim Lambay, Marine Manager (Telex: PORTKU 50350. Fax: (09) 433588).

AGENT: Pesaka Jardine Shipping Agencies East Coast Sdn. Bhd., Lot 4, Tingkat 3, Bangunan Perdagangan, Lembaga Pelabuhan Kuantan, 25720 Kuantan. Tel: (09) 433509. Telex: MA50363. Fax: 60-9-433539. Cables: "Jarship Kuantan".

Associated with Jardine Shipping Agencies.

KUCHING, Sarawak: 01.34 N. 110.21 E. **(See Plan)**

DOCUMENTS:

Port Clearance to be surrendered to Customs when boarding.

Crew Lists and Passenger Lists, 2 copies for Immigration Department, 2 copies for Kuching Port Authority, 3 copies for Customs, 1 copy for Port Health Officer.

List of Ship's Stores (2 copies for Customs).

List of Ammunition (3 copies for Customs).

Health Documents (Vaccination Certificates and Cholera Inoculation Certificates to be examined by Health Inspector).

Manifests (3 sets for Customs, 5 sets for Kuching Port Authority, 1 set for Health Inspector).

Ship Stowage Plan (2 copies for port).

Customs: Permit to go alongside a legal landing place or an ocean-going vessel within the port limits is required by Customs 24 hours prior to berthing.

APPROACHES: The Channel from the pilot station to the Wharf is buoyed and is restricted by the presence of two bars. The outer bar, hard sand bottom, lies about 2 miles East South East of Tg. Po, has a depth of 5.2 m. above Chart Datum and the inner bar which lies approximately one nautical mile East by South of Tg. Muara Tebas, has a depth of 5.1 m. above Chart Datum.

Recent survey indicates that shoaling has occurred in certain parts of the river. Vessels drawing more than 5.0 m. (especially during the N.E. Monsoon, October to March) on account of the swell, are advised to ensure an under-keel clearance of at least 2.0 m. when approaching and crossing the bars.

PILOTAGE: Pilotage services are provided by the Marine Department. Application for pilots could be made by giving at least 24 hours' notice of arrival by telegram to "Shipping Kuching" or telex to MA 70933. Vessels are requested to report to Marine Signal Station/Biawak Signal Station on Channel 20 at least 2 hours before arrival and listen on the above channel for information on pilotage and berthing information.

The pilot station is at one mile North East of Tanjong Po Lighthouse at Latitude 1° 44.2′ N., Longitude 110° 31.8′ E. During the North East Monsoon (October to March) the station is moved to the Embang and Senari Leads 1° 39.3′ N., 110° 31.3′ E (Admiralty Chart 1822).

ANCHORAGES: The existing Explosives Examination Anchorage is shifted temporarily to the bay opposite Tanjong Renard owing to the wreck at Kampong Sijingkat and is bounded by the following co-ordinates:

(i) 1° 36.60′ N. 110° 27.54′ E.
(ii) 1° 36.60′ N. 110° 27.35′ E.
(iii) 1° 35.70′ N. 110° 27.75′ E.
(iv) 1° 35.26′ N. 110° 27.62′ E.
(v) 1° 35.05′ N. 110° 27.62′ E.

Vessels loading logs under pilotage may anchor at the prohibited anchorage which is bounded by the following co-ordinates:

(i) 1° 35.10′ N. 110° 27.22′ E.
(ii) 1° 35.10′ N. 110° 26.55′ E.
(iii) 1° 35.35′ N. 110° 26.55′ E.
(iv) Along the coast of Batu Blat to the explosive and dangerous goods anchorage at Lat. 1° 34.69′ N., 110° 24.63′ E.
(v) Across the River to Tanjong Bako at 1° 34.55′ N., 110° 24.86′ E.
(vi) Along the coast to Tanjong Bako, Tanjong Buaya, Tanjong Sedup and the White Disc Beacon at 1° 34.86′ N., 110° 27.22′ E.

Vessels drawing less than 4.0 m. draft may anchor at Beting Tanju which is bounded by the following co-ordinates:

(i) 1° 35.55′ N. 110° 27.46′ E.
(ii) 1° 35.10′ N. 110° 27.22′ E.
(iii) 1° 35.10′ N. 110° 26.55′ E.
(iv) 1° 35.35′ N. 110° 26.55′ E.

The Explosive and Dangerous Goods Anchorage is 16 miles from the pilot station and is suitable for one vessel of not more than 100 m. in length.

RESTRICTIONS: Tide restriction and max. draft 5.18 m. at high tide. Not advisable to enter port at Tanah Puteh at night.

MAX. SIZE: Max. permissible length overall for vessel entering port at Tanah Puteh is 100 m. and max. draft 5.18 m. Max. overall length for oil carriers proceeding to oil installation at Baiwak Wharf, Pending Point is 110 m., and max. draft 6.4 m. At Pelabuhan Datuk Sim Kheng Hong (Pending), the LOA of ship permissible is 150 m. with a max. draft of 7.62 m.

RADIO: ETA cable to ship's Agent can be sent to Department of Telecommunications, Kuching. Code words, Kuching Radio.

VHF: All ships equipped with the Hague Plan Radio Equipment and within 40 km. to 50 km. of the Kuching Port will be able to establish communications on the following channels:

Channel No. 16 – Safety, calling and distress: A 24 hour listening watch is maintained on this channel by the Syarikat Telekom Malaysia in Kuching. (Call sign: Kuching Exchange).

Channels No. 24 and 26 – Public Correspondence: All ships after having established initial contact with the Syarikat Telekom Malaysia on Channel 16 can communicate with telephone subscribers on this channel.

Channel No. 20 – Port Operations: A 24 hour listening watch is maintained on this channel by the Marine Department, Kuching. (Call sign: Marine Signal). For pilotage, river traffic control and berthing information.

Channel No. 18 – Port Operations: A 24 hour listening watch is maintained on this channel by the Kuching Port Authority (Call sign: Kuching Port Control). For berthing and unberthing, loading and unloading of cargoes.

TUGS: 2 × 1,000 h.p. and 1 × 164 h.p. 3 mooring boats available.

BERTHING: Application for berth must be made by Agents at least 24 hours before berthing.

Tanah Puteh Terminal 244 m. wharf of the deck on piles with shore-bridge type with 13,600 sq.m. of covered storage space and 14,864 sq.m. of open storage space, depth at lowest water 5.18 m.; at *Pending Terminal* 613 m. marginal wharves, depth at lowest water 8.53 m. with 26,800 sq.m. covered storage space and 26,743 sq.m. of open storage. Feeder Container Services are available but ship must provide lift-on/lift-off gear for ship/shore and vice versa operations. Ro/Ro ramp, pontoon (40 m.×25 m.) and berth located at Eastern end of Pending Terminal.

Shore based container handling equipment: 1×42 tonne front loader with telescopic spreader. 2×32 tonne front loaders with 20 ft. and 40 ft. spreaders. 1×41 tonne reach stacker with 2.6 m. working radius, able to stack 4-high. 1× 5-high empty container handling forklift with 20 ft.–40 ft. sidelift adjustable spreader. 6×35 tonne prime movers. 5×25 tonne 20 ft. trailers. 6×35 tonne 40 ft. semi-trailers.

CRANES: *Cargo Handling Equipment:* 15 units towing tractors. 1×8 tonne forklift truck. 5×6 tonne forklift trucks. 57×3 tonne forklift trucks. 7×3 tonnes low-mast LPG forklifts. 4×3 tonnes forklift trucks with paper-roll clamp. 25 units trailers (3 – 20 tonnes). 2×35 tonnes mobile cranes.

STEVEDORES: Normal port operating hours are as follows:

(a) Discharging and loading of cargoes, First shift, weekdays including Saturdays and Sundays 0730 – 1200 hrs.; 1300 – 1530 hrs.; Second Shift, 1530 – 1700 hrs., 1730 – 2300 hrs., Fridays, First Shift, 0730 – 1130 hrs.; 1430 – 1530 hrs.

(b) Delivery of Cargoes/Receiving of export cargoes, Monday to Thursday 0730 – 1200 hrs., 1300 – 1645 hrs., Fridays 0730 – 1130 hrs. – 1430 – 1645 hrs. Saturdays 0730 – 1145 hrs.

Arrangements can be made for delivery of perishable cargo during the weekends and public holidays provided prior approval of the Customs Department is obtained.

Tractor/trailer trains are used for transfer of cargoes within the port area while forklift trucks are used for stacking palletised/unitised cargoes and storage pallets.

Cargo handlers who are stevedores as well as longshoremen working under a fully integrated gang system are employees of the Authority. The Authority receives gang orders daily between 1400 hrs. and 1500 hrs. on normal working days and between 1000 hrs. and 1030 hrs. on the days preceding Sundays and public holidays. Gang orders are placed on a shift basis.

MEDICAL: Necessary for Agents to receive advance notice of required medical attention at least 24 hours before arrival. Hospital facilities available. Crew should possess Cholera inoculation and Vaccination Certificates.

TANKERS: Tankers berth at Biawak Oil Jetty for discharge of their oil. Diameter of pipe-line 6 in. Two tankers can berth at a time and max. draft is 6.4 m.

Berthing carried out near to the time of High Water. Starboard side alongside using port anchor. No berthing during darkness. Unberthing on flood tide. Mooring boat required, supplied by Kuching Port Authority.

Shorelines:

Mogas and Avgas	Single 8 in. discharging line.
Gasoil	Single 8 in. discharging line.
Jet A1	Single 8 in. discharging line.
Bitumen 80/100	Single 8 in. discharging line.
LPG	Single 4 in. discharging line, 3 in. vapour line.
Light F.O.	Single 6 in. discharging line.

DENSITY: 1008.

FRESH WATER: Available and can be supplied to vessel alongside Authority's Wharf by hose about 25 t.p.h.

FUEL: High-speed diesel fuel oil can be supplied to vessel by making arrangement with either Shell or Esso Oil Installation at Biawak.

CONSULS: Indonesia.

REPAIRS: Minor repairs to vessels only.

DRY DOCKS: Not suitable for sea-going vessels. Coastal vessels up to 220 ft. long.

GANGWAY/DECK WATCHMEN: Usually available. Ship should also provide own watchmen.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: Ship should possess all relevant certificates on board in case required for reference.

CUSTOMS ALLOWANCES: Tobacco: 1 oz. tobacco or 25 cigarettes or 8 cigars permitted for each crew member daily. Up to three days ration in port. Wines and/or Spirits, 0.125 qt. bottle of spirits or 0.25 qt. of beer or 1 qt. of wines is permitted for each crew member daily. Up to 3 days' ration in port.

CARGO GEAR: Ship provides own gear especially for handling heavy lifts, vehicles, etc. Rope slings, pallets and safety nets, etc., will be provided by the Authority.

REPATRIATION: Facilities available.

AIRPORT: Airport about 10 km. from port at Tanah Puteh. It is served by MAS which operate daily flights to Kuala Lumpur, Singapore and Kota Kinabalu.

TIME: Local time GMT plus 8 hours.

HOLIDAYS: Port work can be arranged on all official holidays on overtime rates except Chinese New Year Day, Hari Raya Puasa Day, International Labour Day (1st May), Dayak Festival Day (1st June), and Christmas Day, during which the port at Tanah Puteh and Pending will be closed.

POLICE/AMBULANCE/FIRE: For emergency call, Tel: 999 is applicable to all these three services. Individual call: Central Police Station Tel: (082) 22181; General Hospital Tel: (082) 57555; Fire Station Tel: (082) 21033.

SHORE LEAVE: Crew members are allowed ashore provided permission is granted by Immigration Department.

IDENTIFICATION CARDS: Required.

GARBAGE DISPOSAL: Whilst at berth, garbage service can be arranged with the Port Authority.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: There is no Seaman's Club. However, the Port has a Social & Recreational Club whose members are employees of the Port. Games, e.g. football, basketball, volleyball, tennis, badminton, table-tennis, chess, etc. could be arranged with the Club. There is a coin-operated public telephone from which international calls could be made in the Operations Area. Postage and church services are located in the city and are within a radius of 10 km. from the Port. The ship's Agent or Port Authority would be most willing to help with any arrangements.

CURRENCY: Malaysian Ringgit (MYR$). U.S.$ 1.00 = MYR$ 2.77 (7.5.91).

REGULATIONS: Refer to Sarawak Merchant Shipping Ordinance and Kuching Port Authority's Ordinance and Bye-laws.

DELAYS: At present ships can normally secure a berth within 24 hours of arrival if tide is right.

AUTHORITY: Kuching Port Authority, P.O.Box 530, 93710 Kuching, Sarawak, Malaysia. *Tel:* Headquarters and Pending Terminal – 082-482144 (10 lines). Tanah Puteh Terminal 082-333122 (5 lines). *Telex:* 70420 MA Kuport. *FAX:* 082-481696, 334776. *Cables:* Kuport, Kuching. *Contact:* The General Manager.

AGENT: Pesaka Jardine Shipping Agencies Sdn. Bhd., Lot 8235, Section 64, No. 7, 1st Floor, 2 1/2 Miles Jalan Pending, 93450 Kuching, Sarawak, East Malaysia. Tel: (082) 334268, 334287. Telex: MA70207 Jarship. Cables: "Jarship Kuching". Fax: (082) 331471.

Associated with Jardine Shipping Agencies.

KUNAK, Sabah: 04.41 N. 118.15 E. (See Plan)

Sabah Government Requirements

(a) Customs will treat port as sufferance wharf as defined in Section 2 of Customs Ordinance (Cap. 33), with control from Lahad Datu. Agent will be required to make application to Customs for sufferance facilities in respect of each vessel, on appropriate form. Officer-in-Charge of Customs, Lahad Datu will arrange to send a supervising officer with ship; this officer will attend vessel's inward and outward Customs clearance. Transport, food and shelter of Customs Officer are for vessel's account, though it is envisaged that his transport can be concurrent with boarding and departure of the Pilot, i.e. per Marine Department launch.

(b) Immigration requires that vessel shall be cleared inwards and outwards in Lahad Datu. As Marine Department launch will be required to run mooring lines at Kunak, it will not be available to transport Immigration Officer who will *not* accompany vessel. His transport will therefore be a matter for Agent to arrange.

(c) Medical will grant Pratique by radio by Medical Officer, Lahad Datu: whose right to carry out full inspection is not affected thereby. This will only be exercised, it is anticipated, when vessel has called at an infected port within prescribed period. Radio messages should therefore give this information, e.g. "Malay Maru Hongkong Twentieth Tokyo Thirtieth Manila Second All Well Request Pratique Master".

(d) Marine Dept. In the case of a vessel arriving from foreign ports will ultimately place a Pilot on board in Lahad Datu, if requested.

(i) Pilot will receive vessel's arrival report and sight her last port clearance. Pilotage will commence at any such point on route as Master may request, at rates laid down in the Merchant Shipping (Fees) Regulations, 1961. The Pilot launch carrying berthing crew will arrive in advance of vessel at Kunak and assist in making fast.

(ii) As there is no accommodation available at Kunak, the Pilot it is hoped, can be accommodated on board ship during her stay.

(iii) Return to Lahad Datu will follow as in sub-para (i) with the Pilot issuing Port Clearance on completion of Immigration formalities.

(iv) Requests for Pilot should be made *at least* 24 hours in advance to Marine Sandakan via Sandakan Radio, 9WHZ1. Initially this service will be offered from Sandakan, and ships proceeding Kunak from there will retain the Pilot on board. Ships from foreign ports will be served by air; charges to their account. There is now a Pilot based at Tawau, who will berth vessels at Kunak.

For information the port limits of Lahad Datu are "a line drawn from Tanjong Melandong on the South-west point of Darvel Peninsula to the most Westerly point of Sakar Island and thence to the mainland, etc." From this it can be seen that large vessels need not enter the narrow waters of the inner bay.

BERTHING: 1. Wharf consists of:

(a) A raised cement platform 30 ft.×30 ft. on wooden piling.

(b) Three lazy piles with rubber fendering situated 20 ft. from the front edge of the platform and 125 ft. in each direction from the centre of the platform.

(c) Two cement mooring dolphins 20 ft.×20 ft. situated 350 ft. each side of the platform and 50 ft. from the rear edge of the platform.

(d) A metal jetty approach 10 ft. wide×350 ft. long.

(e) A coral bund 24 ft. wide at the base and approximately 16 ft. wide at the top.

(f) Mooring Buoy placed 600 ft. off head of jetty.

2. Depth of water alongside: Minimum depth of water outside the lazy piles is in excess of 35 ft. datum.

3. Bulk oil will be pumped from installation along a metal pipe via coral bund and metal jetty. At a point approximately 15 ft. before cement platform the pipe bifurcates and the two terminals are situated two-thirds the way along each side of platform. To these terminals will be attached a flexible steel hose for connection with ships. Hose will be provided by shippers, and is 400 ft. long if required.

4. Pumping capacity. Maximum overall rate of pumping palm oil will be 100 t.p.h. Palm oil pipe is of 6 in. diameter.

AUTHORITY: See "Kota Kinabalu".

Thomas Soon Min On, Port Manager, Tawau.

LABUAN, Sabah: 05.17 N. 115.15 E. (See Plan)

Island of Labuan is 12 miles long and 7 miles wide lying off N.W. coast of Borneo at entrance at Brunei Bay. It is part of State of Sabah and is only 4.5 miles from mainland and some 77 miles from the State Capital of Kota Kinabalu.

DOCUMENTS:

(a) On arrival, when vessel has arrived from ports outside Sabah, Health Officer, Boarding Officer, Customs and Immigration or their representatives will board vessel. Agent cannot board until ship has been cleared.

(b) Health Officer will require Maritime Declaration of Health duly completed together with 1 copy of Passenger List and 1 copy of Crew List whenever vessel's last port of call has been outside State of Sabah.

(c) Boarding Officer will require 1 copy of Shipping Arrival Report, 1 copy of Passenger List and 1 copy of Crew List. He will also inspect various Certificates such as Load Line, Life Saving Equipment, etc.

(d) Following is summary of documents required:

	Customs	*Immi-gration*	*Boarding Officer*	*Agent*	*M.O.*
Passenger List	2	2	1	1	1
Crew List	2	2	1	1	1
Stores List	2	—	—	1	—
Maritime Declaration of Health	2	—	—	—	1

(e) To be supplied before Departure:

Manifests as necessary.

Master's copies of Bills of Lading.

Port Clearance.

Customs Clearance.

Certificate of *(a)* Buoys and Lights Dues and *(b)* Port and Harbour Dues.

PILOTAGE: Pilot available if adequate notice given but pilotage not compulsory. Vessels normally berth between 0600 hrs. and 1800 hrs., unberthing at any hour, day or night, provided that notice of such movements received between 0800 hrs. and 1600 hrs.

ANCHORAGES: Good anchorage for large vessels in a least depth of 5.75 fathoms South and S.E. of Beacon No. 6.

Quarantine: Vessels arriving from an unhealthy port should proceed to Quarantine Anchorage for Pratique. This anchorage is bounded on North by a line drawn 090° from Harbour Shoal Beacon to Eastern Harbour Limit; South by a line drawn between S.W. point of Papan Island and Enoe Beacon; on West by Eastern Boundary Limit of Explosives Anchorage (as under). If vessels arriving from healthy port and healthy themselves, they need not proceed to Quarantine Anchorage.

Explosives: No vessels having explosives on board may come or remain within 500 yards of shore or of any other vessel; such vessels shall fly Gunpowder Flag at foremast, and should anchor in Explosives Anchorage which is within a line drawn from Enoe Beacon to Harbour Shoal Beacon thence in 090° for 6 cables thence in 180° direction until it joins line between S.W. point of Papan Island and Enoe Beacon.

Dangerous Petroleum: A vessel having dangerous petroleum on board shall anchor within a line drawn from Harbour Shoal Light Beacon in a 360° direction for 2,500 ft., thence in a 090° direction for 3,600 ft., thence in a 180° direction to join Northern Boundary Limit of Explosives Anchorage.

Prohibited Anchorage: No vessel shall anchor within 2,000 ft. from the light of Southernmost dolphin of Liberty Pier.

TUGS: One tug, 750 b.h.p., twin screw, available to assist with berthing and unberthing.

BERTHING: 1. Wharves:

(a) Liberty Wharf: A permanent concrete wharf, measuring 800 ft. with dolphins 100 ft. off each end – least depth of water is 28.5 ft.

(b) Victoria or Small Ships' Wharf (marked on Chart as H. & C.'s Wharf): A wooden structure – length 270 ft. with min. depth of 12 ft. No longer usable except by kumpits. No vehicles allowed on wharf.

(c) New Shell Installation Wharf: Concrete jetty 170 ft. long with 2 dolphins at each end with a total length between of 700 ft., least depth of water 31 ft.

Shore Lines:

1. For Mogas 8 in. × 1,200 ft.
2. For D.P. Kero 8 in. × 1,250 ft.
3. For Gasoil 8 in. × 1,350 ft.
4. For Fuel Oil 8 in. × 1,350 ft.

8 in. hoses used to connect ship and shore.

(d) Brown & Root Jetty: A timber decked jetty with following dimensions:

Length of main jetty – 160 ft., width 40 ft.
Length of causeway – 476 ft., width 22 ft.
Least depth alongside approximate 28 ft.
Max. load (proven) – 800 lb./sq.ft.
Max. single approximate 100 short tons.

2. Buoys: No mooring buoys in Labuan.

3. Monsoons: N.E. monsoon prevails from December to April and S.W. monsoon from middle of May to middle of October. Harbour is well sheltered from both monsoons.

4. Flags and Berthing Signals:

(a) When entering port vessel should fly Signal Letters, Mail Flag if applicable, and "G" flag if requiring Pilot, and also Quarantine Flag.

(b) Berthing Signals: Following berthing signals will be used at Labuan and will be displayed from Flagstaff in Harbour Office in vicinity of Liberty Wharf, Victoria Harbour. A red and white chequered flag and International Code numbered pendant will indicate berth number allocated. Berth numbers have been allocated as follows:

(c) Berth and Pendant No.

1. Esso Wharf.
2. LCT. Landing Ramp.
3. Victoria Wharf (small ships) S.E. Section.
4. Old Liberty Wharf (inner section).
5. Old Liberty Wharf (outer section).
6. New Liberty Wharf (inner section).
7. New Liberty Wharf (outer section).
8. Brown & Root Jetty.
9. Shell Installation Jetty.
10. Anchor.

On receipt of berthing signal, vessel should acknowledge in the usual manner with the answering pendant and proceed to berth.

(d) Tidal Signal: A tidal signal consisting of a cone and ball is hoisted in conjunction with berthing signal showing state of tide at berth indicated. A cone point down signifies flood tide (West-going), a cone point up ebb tide (East-going), a ball slack water.

(e) Facilities: Max. single load without special precautions on Old Liberty Wharf is 25 tons and New Liberty Wharf is 650 lbs./sq.ft. i.e. 180 tons four axle vehicles. Any load over this figure will require to be distributed over two or more panels of 10 ft. by 10 ft. each according to weight. However, special arrangements must be made prior to discharge, and Agent should be consulted in advance.

RESTRICTIONS: Tides. Subject to diurnal inequalities but usually one HW and one LW a day. Average HW is 6.5 ft. and LW 3 ft. above datum of soundings.

Clearance: Port is open from 0600 hrs. to 1800 hrs. although vessels can be cleared later than 1800 hrs. on application provided they are sighted from Papan Lighthouse at 1800 hrs.

HEALTH: See "Regulations" and "Anchorages".

RADIO: Information required before ship's arrival. ETA Labuan, with as much prior notice as possible. Number of gangs required. Quantity of fresh water required. Whether Pilot required for berthing.

Labuan has no radio facilities and messages are received via Kota Kinabalu, Miri, Singapore, etc.

Port VHF Service operates on Channels 16 and 12, between 0530 hrs.and 2400 hrs. Also see "Tankers".

BULK HANDLING FACILITIES: Rancha Rancha Industrial Estate: One jetty for iron ore carriers up to 150,000 d.w.t. nearing completion. Unloading rate 2,000 t.p.h.

CARGO: 1. Inward: Inward cargo is tallied out of ship on to wharf or into lighter. Damaged cargo is surveyed on the spot, otherwise no liability of the vessel is acknowledged. Discharge is carried out after permission has been obtained from Customs after manifest of inward cargo has been deposited. Cargo is delivered to consignees against production of relative Bill of Lading. Ship's responsibility to consignees ceases at ship's side but, in the case of shortlanded cargo, reasonable proof must be given to Customs that the cargo has not been landed. A shortlanded Memo certified by the Chief Officer is usually accepted as proof.

2. Transhipment: After discharge of cargo from the 1st carrier, transhipment cargo is placed under supervision of Customs, unless it is possible to arrange direct transhipment into small coastal vessel. Customs do not accept responsibility for cargo in Customs Bond.

3. Refrigerated: Only small quantities of refrigerator cargo loaded or discharged.

4. Explosives: Explosives must be discharged into lighters under police escort and transported to an approved police store. A licence for their importation must be obtained from the police prior to arrival of cargo, and harbour and police authorities must be informed of arrival of explosives in port either for discharge or as through cargo.

STEVEDORES: Supplied by contractors as arranged by Agent. Working hours 0800 – 1200 hrs., 1300 – 1700 hrs. Working outside these hours on Sundays and Public holidays is overtime.

MEDICAL: Hospitals: Not possible for Government Medical Officer to visit ships but patients can be sent to Cottage Hospital. Four 1st class beds, 10 2nd class beds, 46 3rd class beds. Two private clinics, Dr. Chan Clinic and Dr. Wong Clinic, are located in town.

Dentist: A Government Dental Clinic, located in Cottage Hospital area. In addition, a dentist is available in town.

TANKERS: *Labuan Terminal (Shell):* The SBM is positioned at Lat. 5° 15′ 59″ N., Long. 115° 07′ 08″ E. designed for tankers with max. s.d.w.t. 350,000, but presently fitted for a max. B/CM of 520 ft.

The minimum water depth in the manoeuvring area is 84 ft. and the max. permissible draft 74 ft.

Pipe-lines and Cargo Hoses: A 48 in. submarine/land pipe-line connects the SBM with the storage tanks on shore. Beneath the SBM, the pipe-line terminates in a manifold (PLEM) for connecting the underwater hoses of the buoy. The PLEM is fitted with 2 non-return, non-slam 'Mockveld' valves to eliminate potential leakage and surge pressure being built up from shore to the SBM.

Two underwater hoses, each 120 ft. in length, connect the SBM to the PLEM with a lazy 'S' configuration. Each string consists of 4×30 ft. lengths of hose.

One 20 in. diameter floating hose string of 700 ft. length is connected to the turntable. The string terminates in 1×16 in. and 1×12 in. diameter rail hose for direct connection to the tanker's starboard manifold. The 12 in. hose is connected to the forward and the 16 in. hose to the aft manifold line. The last 3 units of the tail hoses are electrically discontinuous, in order that stray currents from the crude carriers are not carried on to the buoy.

Information Required Prior to Arrival: Standard message to Masters of vessels calling at SBM. Please advise.

AAA	ETA and draft at Labuan SBM.
BBB	Customs and Health requirements.
CCC	Is vessel equipped with bow chain stopper, Smit Brackets and a large central Panama Chock? (This information required from unknown vessels only.)
DDD	Are manifold connections per OCIMF specifications?
EEE	Rig starboard derrick to maximum SWL (minimum acceptable 7 tons).
FFF	Have 16 in. and 1×12 in. manifold connections ready on starboard side.
GGG	Be advised that vessel must maintain full readiness to manoeuvre during stay at SBM.

Berthing Instructions: After ETA advice one of the following messages will be transmitted to the Master.

AAA	Based on your ETA . . . . present intention is to berth you on arrival.
BBB	Pilot will board at the boarding area 2 miles W.S.W. of SBM in the following position: Latitude: 05° 15′ 00″ N. Longitude: 115° 04′ 00″ E.
CCC	Confirm ETA at least 48 hours in advance. When within range you are required to confirm your ETA 3 hours prior to arrival to Labuan Terminal on VHF Channel 16 with Channel 14 as a working channel.
DDD	Please keep us advised of any changes in your ETA. Onus of ETA confirmation rests with vessel.
EEE	After having established radio contact on VHF you will receive further instructions.

Mooring Operation: Vessels are programmed for day and night berthing. Use of the ship's anchors is strictly prohibited except in extreme emergency. The anchors must never be released or brought anywhere near the entire length of the submarine pipe-line nor closer than 350 m. radius from the SBM. Both anchors should be secured prior to berthing operations.

Floating Mooring Rope Assembly: The buoy to tanker mooring comprises 2×12 in. circumference×150 ft. nylon double braided ropes. At the buoy end, the hawsers are joined to the pad eyes of the Rotation Mooring Arm with heavy duty shackles. Each hawser of the dual floating mooring hawser is fitted with a 3 in. diameter chafing chain.

The pick-up assembly consists of:

(i) 10 in. circumference polypropylene messenger rope with spliced eyes on each side. Length 450 ft.

(ii) 10 in. circumference polypropylene pick-up rope with spliced eyes 2 ft. on each side. Length 45 ft.

(iii) Pick-up support buoy.

Mooring Craft: A mooring launch will be in attendance. The launch is used to send the messenger end of the mooring ropes to the vessel. On completion of mooring the launch picks up the hoses for connection and remains at the vessel until the completion of loading.

Pilotage: Pilotage is compulsory within port limits for the size of vessels calling at the SBM. The Pilot will board at the boarding area 2 miles W.S.W. of the SBM for both arriving vessels and the vessels which have be anchored there awaiting berth.

Mooring Procedure: Before the arrival of the tanker, the Berthing Master has to go to the SBM at least one hour early to check and make sure that the hoses and mooring ropes are not fouled. The mooring craft proceeds to the vessel to disembark the Berthing Master and offload the mooring gear.

During the approach the mooring boat tows the port mooring rope around the buoy so that it is out of the way when the starboard inner one is being worked on. The starboard inner rope is then run out to its full length.

When the end of the messenger is within range, the vessel's bow is approximately 115 m. from the SBM, i.e. 70 m. to go to the final secured position. The approach speed at this point should not exceed 0.5 knots.

As the vessel slowly closes in on the buoy the messenger pick-up rope and chafing chain are hove on board until the chafing chain is in position in the fairlead (marker buoy just outboard of the fairlead). The special shackle on the nylon snotter is then connected to the triangle plate or alternatively the chain is secured in the bow stopper and the inner mooring is then fast.

While the inner mooring rope is being tended to, the mooring boat clears the (port) outer mooring rope from the buoy. This rope is then hove on board and connected in the same way as the inner one.

The vessel should have 2 mooring ropes ready on the forecastle and mooring is carried out by ship's crew.

Cargo Loading Operations: Throughout the vessel's stay at the SBM, the Berthing Master will remain on board to co-ordinate ship/shore operations and one launch will remain at location as a safety precaution.

Connecting Hoses: Hose connection is carried out by ship's crew.

The hoses are lifted and connected one at a time. The forward or 'inner' hose is tended to first. The derrick runner is hooked into a enlarged link in the hose lifting chain and the hose end is then lifted out of the water until sufficient length is available for direct connection to the tanker's manifold. The weight of the hose in this position is transferred to the hose hang-off chain and the hose end is then lowered onto the deck. The blank flange is removed and the hose connected to the vessel's manifold. After connecting, the hoses are supported at the tanker's side by flat webbing slings hung from the derrick runner in order to maintain a reasonable radius of bend. They are also suitably lashed to the hose bar of the side rail to reduce movement caused by sea conditions. In seas exceeding 5 ft., the floating hose strings become lively and require attention. Excessive movement of the hoses will result in chafe and strain on the flanges in way of the manifold. This can be reduced to a minimum by a suitable suspension of the hoses from the derrick runner backed up by rope lashings at the side rails or hose bars.

Such preventive measures depend largely on the construction and layout of the tanker in the manifold area, also on the distance of the manifold from the vessel's side.

Loading Procedure: Labuan Crude is loaded at Labuan Terminal. The quantities loaded are checked by the terminal at frequent intervals (3 hours) and vessels are requested to verify the shore figures.

The terminal is capable of giving maximum loading rates of up to 7,000 cu.m.p.hr. and a maximum back pressure of 120 p.s.i. at the terminal end. The Berthing Master also acts as Loading Master and as the Terminal's Representative he will attend to all cargo formalities (SSPC forms, safety check list, etc.).

Prior to and during loading operations the following procedure will apply:

(a) A joint inspection is carried out by ship and Terminal Representative to ensure that all requirements on the Safety Check List have been complied with.
(b) The methods of communication between ship and shore are clearly established and understood. This includes procedures for normal and emergency stops of cargo loading operations. Test calls are made to ensure the system is operating satisfactorily.
(c) Ship and shore to confirm readiness to start cargo loading operations.
(d) Commencement of loading to be at a slow rate.
(e) Lines and hoses are checked and faults rectified, Launch to patrol around the vessel to check for oil leakages into the sea.
(f) When the ship confirms receipt of cargo, test the emergency trip. After the test is completed start pumping and gradually increase to agreed loading rate.
(g) Lines, hoses and the water around the vessels are again checked.
(h) Ship and shore figures are to be compared every 3 hours and discrepancies investigated.
(i) At least 15 minutes' notice should be given to the terminal before each stop or in regard to slowing down the loading rate for "topping off".

Ballast: Vessels must arrive with sufficient ballast for safe manoeuvring into the berth.

There are no facilities for the shore reception of ship's ballast. Vessels are accepted for loading on the express understanding that only clean ballast will be discharged into the sea.

Deballasting prior to the ship being fully secured to the buoy is only allowed after consultation with the Berthing Master.

Suspension of Loading Operations: If loading operations are suspended for an excessive period (e.g. leakage), hoses should be disconnected, blank flanged and made ready for lowering into the sea.

Disconnecting Hoses: The "after" or outer hose is disconnected first. It must be assured that all the bolts are fitted and properly tightened. The gasket must be in good condition and changed regularly. As soon as the hoses have been disconnected from the tanker's manifold, the blank flanges are fitted and the hose support buoy as well as the free end of the "hose hang-off chain" are shackled to the lug on the spool piece. Each hose is lowered over the side and towed clear from the tanker's side or temporarily secured to the SBM in a bight to prevent possible entanglement with the tanker's propeller.

Unmooring: Weight on the mooring ropes may be taken off by using ship's engines. The polypropylene pick-up ropes, which remain connected to the triangle plates of the chafing chains, are lead to the winch, and the weight is taken off the bow stopper or nylon snotter as the case may be. The bow stoppers are released or special shackles disconnected, and the moorings and pick-up ropes lowered from the bow into the water.

When both moorings have been let go, the tanker is given sternway until the bow is well clear of the hose strings. The mooring and hose connection equipment is then transferred to the mooring launch.

Communications: Vessels are required to advise SSPC/Respective Agents of their ETA's 72 hours and again 36 hours prior to arrival. Telexes or telegrams should be sent to MA74306 or Saroilco, Miri, respectively.

6 hours and again 3 hours prior to arrival, vessels are required to confirm their ETA to Labuan Terminal on VHF Channel 14.

Weather: All the SBM's concerned are positioned in the open sea. The weather in the region is basically good for tanker operations.

The seasonal weather patterns are broadly divided into three and the terminology used is consistent with that of S.E. Asia. These three types are:

(1) S.W. Monsoon (June-October)
(2) N.E. Monsoon (December-March)
(3) Transitions between the monsoons.

Persistent bad weather occurs during the N.E. monsoon. High swell conditions can persist for periods of 3 to 4 days and in extreme conditions for up to a week. During the S.W. monsoon winds are generally light to moderate, but during brief surges (generally lasting less than 36 hours) winds are occasionally strong, and local gale force squalls are experienced. The most favourable time for tanker operations is during the transition periods. Winds are lighter and variable. Seas in this period are rarely more than very slight. The only troublesome times of the periods are the occasional severe squalls that originate from inland, which are associated with cumulonimbus clouds and thunderstorms.

The basic patterns of these squalls are vigorous thunderstorms inland, increasing as the storm approaches. Just before the onset of torrential rain, the wind backs rapidly towards the land and increases violently to the peak gust.

Immobilisation: Immobilisation of engines is not permitted at any time during the vessel's stay at the SBM.

Transmission of Ship's Radio: Use of the ship's radio transmitter is prohibited during the vessel's stay at the SBM.

FRESH WATER: Only available in small quantities (usually 30 tons maximum) and at restricted hours.

FUEL: Bulk furnace oil and high speed diesel usually available but 48 hours' notice of requirements must be given.

FIRE PRECAUTIONS: In case of fire, the Harbour Master, OCPD, and Agent should be telephoned immediately. A mobile gas turbine fire pump is available.

CONSULS: None.

REPAIRS: Marine Department operates engineering workshops at Labuan.

DRY DOCKS: Marine Department has 3 Slipways in Labuan which are capable of slipping vessels of 60 tons, 200 tons and 500 tons displacements.

A Government-owned shipyard/dry dock known as Sabah Building, Repairing and Engineering Sdn. Bhd. exists in Labuan to undertake full repairs services has been established for ocean-going vessels.

POLICE/AMBULANCE/FIRE: Medical Officer 224; Asst. Commissioner of Customs 201; OCPD 400; Police Station 297; Hospital 222.

REGULATIONS: *(a)* Arrival and departure:

1. The Owner or Agent of every vessel other than a small ship intending to call at a port shall, as soon as possible, and in any case not later than 36 hours prior to the estimated time of arrival of the vessel, give notice in writing to the Authority of such arrival and, if so desired, the requirement for a berth at a wharf.

2. The notice under this regulation shall be in a form prescribed by the Authority and shall contain full particulars regarding the cargo to be discharged and loaded, the embarkation and disembarkation of passengers, heavy lifts, special or perishable cargo, hazardous and dangerous goods (whether to be discharged at the port or not), and any other matters of importance relating to the working or safety of the vessel in the port.

3. The Master of every vessel entering or leaving a port between sunrise and sunset shall cause to be hoisted the national colours and the signal letters, if any, of the vessel. The national colours shall be exhibited from 0800 hrs. to sunset whilst the vessel remains in port.

4. The Master of every vessel arriving from outside the State of Sabah shall exhibit the Immigration and Quarantine signals contained in the First Schedule and shall also at the request of a Customs Officer hoist the Customs signals. Such signals shall remain exhibited until the appropriate officer has given permission for them to be lowered.

5. No vessel shall approach within 600 ft. of any other vessel exhibiting the Immigration, Health or Customs signals.

6. No person other than a Pilot may board or disembark from any vessel until the vessel is cleared inwards and the Immigration, Quarantine and Customs signals have been lowered.

7. Every vessel entering a port shall be anchored or efficiently secured to a wharf or buoy before commencing the loading or discharging of cargo and/or the embarkation or disembarkation of passengers.

8. No vessels shall leave any port unless in possession of a valid Port Clearance issued by or on behalf of the Director of Marine.

(b) Special signals:

Significance	*By Day*	*By Night*
Immigration (for ships not carrying passengers)	International Code Signal "2 5"	Two green lights, 6 ft. apart, hoisted vertically where best seen.
Immigration (for ships carrying passengers)	International Code Signal "3 4"	Two green lights, 6 ft. apart, hoisted vertically where best seen.
Quarantine (vessel is Healthy request Pratique)	International Code Signal "Q"	Nil
Quarantine (vessel is suspect)	International Code Signal "Q Q"	A red light over a white light and a separate hoist of red light over a green light and hoisted vertically 6 ft. apart where best seen.
Quarantine (vessel is infected)	International code Signal "Q L"	
Quarantine (not received Pratique)	Nil	A red light over a white light 6 ft. apart hoisted vertically where best seen.
Request Police Assistance	International Code Signal "S T"	A green over a white light, 6 ft. apart hoisted vertically where best seen.
Request Medical Assistance	International Code Signal "W"	A red light over a green light, 6 ft. apart, hoisted vertically where best seen.

GENERAL: *Surveyors:* Harrisons & Crosfield are Lloyd's Sub-Agents in Labuan and may appoint a surveyor as necessary.

Ship Chandlers: Fresh fruits, vegetables and fish available and price list can be obtained from ship chandler through Agent. Cold storage with limited supplies.

Recreation Facilities: If owners pay a monthly subscription to the Labuan Recreation Club, ship's crew are automatically members. Football and cricket, etc., can usually be arranged on application to Agent. Two cinemas in town which show American, English, Chinese, Malayan and Indian films.

Good beaches all round island, however, it is strongly recommended that bathers should remain in shallow water. It is not considered safe to bathe from the ship.

Victoria Hotel situated in town. All rooms air-conditioned and have private bathrooms or showers attached. Lodging house accommodation available in town for Chinese Crew members.

A newly constructed 12 storey Labuan Hotel is situated in the town. All rooms air-conditioned with bathroom attached.

A nine-hole golf course situated about 1 mile away from town.

DEVELOPMENTS: See "Bulk Handling Facilities".

AUTHORITY: The Director, Marine Department Office, P.O.Box No. 5, 87008 Federal Territory of Labuan, Malaysia. *Tel:* 087-412208. *FAX:* 087-413515.

AGENT: Pesaka Jardine Shipping Agencies Sdn. Bhd., Lot No. 17, 2nd Floor, Jalan Bunga Dahlia, WDT No. 81, 87009 FT. Labuan. Tel: (087) 413568/9. Telex: MA85065. Cables: "Jarship Labuan". Fax: (087) 413580.

Associated with Jardine Shipping Agencies.

LANGKAWI, Telok Ewa, Malaya: 06.26 N. 99.46 E.

SHIPMASTER'S REPORT: December 1987 (Updated 1990).

Langkawi Port is one of the newest ports on the Malayan Peninsular. The port is designed to handle Bulk (both dry and liquid) petroleum products as well as general cargo. Major exports are clinker and bulk/bagged Cement. The port is approximately 80 nautical miles North of Penang Island, and in position Lat. 06° 25′ 36″ N., Long. 99° 46′ E.

PORT LIMITS: All the waters enclosed within the area bounded by a line drawn from a point at Lat. 06° 30′ N., Long. 99° 52′ E. in a Southeasterly direction to Lat. 06° 25′ N., Long. 99° 58′ E., thence in a Southerly direction to Lat. 06° 08′ N., Long. 99° 58′ E., thence in a Westerly direction to Lat. 06° 08′ N., Long. 99° 37′ E., thence in a Northerly direction to Lat. 06° 27′ N., Long. 99° 37′ E. and thence in a Northeasterly direction back to Lat. 06° 30′ N., Long. 99° 52′ E. and any navigable waters therein.

DOCUMENTS: The following documents, together with ship's documents and certificates and copies of manifest, are to be presented to the Port Officer at time of report.

Crew List.
Vaccination List.
Stores List.
Personal Declaration.
Drug and Narcotic List.
Passenger List.
Last three ports of call.

PILOTAGE: Pilotage is compulsory for all vessels exceeding 30 m. in length entering or leaving the port limits. Pilots are available throughout 24 hours and the boarding point is in position Lat. 06° 27.8′ N., Long. 99° 45.5′ E.

While rounding off Tanjung Chinchin it is preferable to keep North of the fairway during the N.E. monsoon as considerable S./S.W. set is experienced with strong and persistent E./N.E. winds.

ANCHORAGES: Anchorage area is situated East of Pilot boarding station marked on BA. Chart No. 3943.

MAX. SIZE: There is a restriction of 9.0 m. draft at present alongside. Permission to exceed 9.0 m. may be given under exceptional circumstances with a tug on stand-by during manoeuvres.

HEALTH: Health Official boards vessel when alongside. A close check is carried out on Vaccination List.

TUGS: One tug of 1,500 b.h.p. available at present. It is only used during deep draft vessels unberthing. Usually ships berth heading into the wind/tide using the off-shore anchor.

STEVEDORES: Arranged by Kedah Cement. They usually need notice of 7 days, 72 hours, 48 hours and 24 hours.

CRANES: For clinker and bulk cement, Kedah Cement, the operators of the terminal, use one shoot of about 500 t.p.h. capacity and for raw material imports such as Bauxite/Iron ore a grab crane of 11.2 tonnes SWL is in operation at present. For loading bagged cement, ship's own gear is used.

MEDICAL: There is a hospital, for minor surgery only, at Kuah which is 24 km. from the berth. For serious cases, patients to go to the mainland, one hour further by ferry.

DENSITY: 1020/1021.

FRESH WATER: Available at the berth, rate about 100 t.p.h.

REPAIRS: All repairs are carried out on the mainland.

AIRPORT: There are daily flights to Penang and Kuala Lumpur.

TIME: GMT plus 8 hours all year round.

STORING: Fresh provisions can be obtained locally but at least 2 days notice required as some items may have to be brought from the mainland.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: There is no seaman's club operating in the port, nor is there a church. There are duty-free shops in the port, international telephone service can be arranged at the large hotels. Transportation from the port to the town can also be arranged, postage service is available and sight-seeing can also be arranged.

CURRENCY: Malaysian Ringgit (MYR$). U.S.$ 1.00 = MYR$ 2.77 (24.4.91).

DELAYS: None, except rain.

GENERAL: Well organised port with efficient and skilled labour and a very co-operative stevedore. No thefts reported on board. When nearing 9.0 m. draft it is preferable to check depths even though we found 9.6 m. up to chart datum at the general cargo berth.

AUTHORITY: Langkawi Port Office, Teluk Ewa, 07000 Langkawi, Kedah Darulman, Malaysia. *Tel:* 04-788505. *Telex:* MA 39748. *FAX:* 04-788691. *Contact:* Haji Jamaludin Bin Yusuf, Senior Marine Officer.

AGENT: Malaysian Shipping Agencies, Bangunanan PKNK, Padang Lalang, Air Hongat, 07000 Langkawi. Telex No. MA 42096.

LIMBANG, Sarawak: 04.48 N. 115.05 E.

Limbang is the principal town of the Fifth Division and is situated 8 miles above the entrance of the Limbang River. There is an anchorage for ocean-going steamers 5 miles below the Limbang Bar Buoy with a least depth of 26 ft.

Depth on Bar. The least depth reported on the bar is about 2 ft. with a highest rise of 12 ft. The channel is marked by stakes with red/white and black/white top markers and a flashing light buoy Fl.1 sec. at the entrance.

Every vessel arriving in quarantine shall fly or show the appropriate International Quarantine Signal; and no person other than a Pilot, Port Officer, Port Health Officer, Immigration Officer or Officer of Customs shall board the vessel; and no person shall disembark therefrom until the vessel has been cleared by the Port Health Officer.

The Master of every vessel of over 15 tons about to depart from a port for any place outside Sarawak shall cause the "Blue Peter" (International Code Flag "P") to be hoisted, during daylight hours, for at least 12 hours before the vessel is due to sail, or if the vessel is in port for less than 12 hours, for the period of her stay in the port.

(1) The Master or the Agent of every vessel about to depart from a port shall, on demand by the Port Officer, produce for inspection the Port Clearance.

(2) The Port Clearance shall be in the form of an endorsement on the form of clearance prescribed under the Customs Ordinance or in such other form as may be approved by the Director.

A vessel arriving in, leaving from or shifting berth within a port shall hoist her signal letters, if any, whilst under way.

PILOTAGE: Pilot available at Muara Port, Brunei. No pilot available locally.

REPAIRS: Siong Hing Shipyard Company, Limbang, Sarawak.

SURVEYORS: Cargo inspectors available. Local marine surveyor available.

BANKS: Malayan Banking Berhad and Kongming Bank Bhd.

STORING: See "Prelims".

1. By truck.

LUMUT, Malaya: 04.14 N. 100.38 E.

SHIPMASTER'S REPORT:

DOCUMENTS:

Customs:

4 Crew Lists.
2 Report of Arrival – Appendix "A".
1 Passenger List ("Nil" certificate required).
2 Dutiable Stores Statements.
5 Inward Manifests (prepared by Agent).
1 Personal Effects List.
1 List of Cargo in Transit.
1 Lists of Arms and Ammunition ("Nil" Certificate required).
Last Port Clearance.
2 Copies Loading Manifests.
3 Outward Manifests (prepared by Agent).
1 List of Narcotics ("Nil" certificate required).

Immigration:

2 Crew Lists.
1 Passenger List.
All Passports and Seaman's Books.

Boarding Office (Port Authority):

2 Reports of Arrival.
2 Reports of Departure (Forms provided by Agent).
2 Crew Lists.
Register, Load Line, Derat Certificate.
Radio, Safety Equipment and Safety Construction Certificates.

Port Health:

2 Vaccination Lists (Cholera).
2 Health Forms.
Derat Certificate.
All International Health Certificates (Yellow Books).

Traffic Control Officer:

1 Crew List.
1 Passenger List.
1 Arms and Ammunition List. ("Nil" certificate required).
1 Narcotics List.

Clearance of vessel carried out on arrival at Lumut Anchorage or berth before loading or discharging is allowed. Usually Customs', Immigration, Traffic Control Officer, Health will come together on board and Free Pratique issued by Health Officer.

PILOTAGE: Pilot boarding position Lat: 4° 10′ 50″ N., Long. 100° 35′ E., which is 1 mile South of Pangkor Island S.E. Point light. Berthing and unberthing will only be carried out during daylight hours and at slack water or beginning of flood tide. Pilot comes from Penang for berthing and unberthing. Pilot leaves vessel at Hospital Rock on departure. Pilot launch painted blue with white superstructure and named "King Miller". Pilot rates: Launch fee M$400 in and out minimum M$750 – maximum M$2,800, depending on d.w.t. of vessel.

ANCHORAGE: Just inside harbour limits, 7 cables South of S.E. Point Light in about 12 fathoms. Bottom said to be sand and shells and reputed good holding ground.

MAX. SIZE: Max. length on grain berth 575 ft.

Max. draft into port 30 ft. 6 in. salt water on Spring tides. This is due to a bar at the entrance of Dindings River and a rather sharp turn around buoy of 125° to miss rocks marked by unlit buoy. (Lloyd Rocks, B.A. Chart 792 vicinity of River Passage).

HEALTH: See "Documents".

RADIO: *ETAs:* Sent through Penang or Singapore Radio to Flourmill Lumut, Flourmill Kuala Lumpur and ship's Agents. 72, 24 and 12 hours notice required. Agents will keep Flourmill Lumut and Pilots informed. Authorities like 5 days notice of a vessel's impending visit. Telex: MA 44285 Miller.

VHF: There are VHF communications in the port with pilot boat on Channel 12.

Reporting System of Merchant Vessel When Entering and Leaving Port of Lumut

1. Every Master of a merchant vessel when coming to Port of Lumut shall advise the Port Officer of Lumut as follows:
   (i) One hour before the arrival of the vessel to the Pilot Station (i.e. one nautical mile due South East Point Lighthouse) the following particulars:
   The name and the nationality of the vessel and the Master.
   The arrival draft.
   The gross and nett tonnage of the vessel.
   The nature of the cargo.
   The next and last port of call.
   (ii) When arriving at the Pilot Station and when the Pilot is on board.
   (iii) When the vessel is passing abeam of Dinding Buoy.
   (iv) When the vessel is at anchor or berthing at the jetty/wharf.
2. The same procedure is also applied to vessel when leaving the Port of Lumut.
   (i) To advise the Port Officer of the sailing time of the vessel one hour before the departure.
   (ii) When the Pilot is on board.
   (iii) When the vessel is passing abeam of Dinding Buoy.
   (iv) When the Pilot is away and when the vessel is abeam of South East Point Lighthouse.
3. The working hours of Port Office of Lumut are as follows:
   Monday to Friday: 0800 hrs. – 1615 hrs.
   Saturday: 0800 hrs. – 1245 hrs.
   The office is closed on Sunday and Public Holidays.
4. Calling: Marine Department Lumut
   or "Lumut Mardep".
   VHF Channel 16.

TUGS: There are no tugs at Lumut – nearest Penang (small) and Singapore (large).

BERTHING: Port side to at Malayan Flour Mill Private Wharf in position Lat: 4° 16′ N., Long: 100° 39.5′ E., ship's head in. Depth of water at wharf is 32 ft. 6 in. A modern wharf supporting two movable discharging elevators. Conveyor belt runs under wharf.

South side of dock is used by coastal tankers and has 20 ft. of water. Dock is of concrete construction with heavy wood and steel girder fendering which is rubber mounted. End of wharf has a separately fendered concrete construction which is fitted with rubber shock absorber.

STEVEDORES: Mill employs own stevedores and work continues throughout 24 hours. No cargo work on Sundays and Public Holidays unless requested by either party when the overtime charges will be borne by the said party. Discharge rate is about 118 m.t.p.h. with 2 suckers (wheat). Reported to be about 100 m.t.p.h. with corn.

MEDICAL: Doctor in Lumut and Sitiawan (7 miles from Lumut). Local hospital usually has large queue, therefore better to attend private doctor. Private doctor may be called onboard if necessary.

DENSITY: About 1022 at berth. Water is brackish both at anchorage and berth.

FRESH WATER: Available at berth, arranged through Flour Mill at $10.00 (local currency) per ton during working hours. 24 hours' notice required.

FUEL: By arrangement and brought to ship in road tankers. Cargo cannot be discharged while bunkering as the trucks are not able to pass under the grain discharger (Agent informs that one weeks' notice required for bunkers). Fuel and diesel supplies come from Shell installation at Batu Undan about 1.5 miles from mill.

REPAIRS: Minor repairs only at mills workshop, firms can be called in from Kuala Lumpur or Singapore or Ipoh.

SURVEYORS: Trident Malaysia Sdn. Bnd. in Penang.

GANGWAY/DECK WATCHMAN: Private wharf and protected area - no shore watchman required on board - only ship's watchman for ropes and safety. Shore mill patrol is armed with shotgun.

REPATRIATION: Can be arranged but make sure travel documents, i.e. passports are valid and air tickets are ready.

AIRPORT: Nearest local airport is Ipoh and then fly or by road to Kuala Lumpur International Airport. Ipoh is about 1 hour's drive and Kuala Lumpur 4 hours drive.

EMERGENCY CO-ORDINATION CENTRE: Harbour Master, Penang or Port Kelang.

TELEPHONE: On berth and in Flour Mill entrance hall during office hours only.

BANKS: The Chartered Bank, Jalan Lumut, Sitiawan, Perak; Malayan Banking Berhad, Lumut, Perak; Bank Bumiputra Malaysia, Lumut, Perak. Money Changer at Malaysia Raya Restaurant, Lumut.

STORING: See "Prelims".
1. Yes, both.
2. Yes.
3. Yes.
4. Yes.
5. Prior approval must be obtained.
6. No.

SHORE LEAVE: Local leave only, except with special permission and pass. Boats to be laid on by ship for crew shore leave to Lumut and this is about a 20 minute boat ride to shore. Charges – $25 per trip. A boat from the anchorage may be laid on. Also to Sitiawan about 7 miles from Lumut. To Ipoh 52 miles by taxi $6.00 per person one way. Special Immigration pass is required and can be arranged through Agent.

GARBAGE DISPOSAL: Can be arranged, contact Agent for service.

WASTE OIL DISPOSAL: Can be arranged, contact Agent for service.

SEAMAN'S CLUBS: None.

CURRENCY: Malaysian Ringgit (MRG). U.S.$ 1.00 = 2.5 MRG.

GENERAL: The Flourmill is situated on the N.E. side of Lumut about 40 miles by road and 20 minutes by launch from Lumut town. There is a good canteen at the Flourmill which serves Chinese and Muslim foods and soft drinks. Ship's personnel are allowed and welcome to use these facilities.

There are 5 reasonable hotels in Lumut, Dindings Hotel which has only 3 rooms air conditioned, Lumut Villa Inn, Hotel Indah Lumut, Hotel MDM and Lumut Country Resort, a 3 star hotel with 40 air-conditioned rooms. If possible book in advance especially on Saturdays, Sundays and Holidays.

At Pangkor Island there are good hotels; Sea View Hotel, Beach Hut Hotel, Pan-Pacific Resort with 100 air-conditioned rooms and Pangkor Laut Resort, both are of International Standard. At Teluk Batik 10 chalets available, about 5 miles from Lumut town.

Dindings Soya and Multifeeds Sdn. Bhd. is a subsidiary of Flourmills and now in operation, using same facility of Flour Mill Wharf.

Customs: Allowances – 75 cigarettes per man for 3 days and one bottle of spirits for 8 men every 3 days. Customs office is at Lumut. One and sometimes two, Customs men remain on vessel throughout and accommodation is to be provided for them.

Immigration: Immigration clearance required.

Tide: Ebbs for 5.25 hours on berth. Tides times are based on Port Kelang – difference is minus 1 hr. 40 min. Rise and fall about 2 m. – see Admiralty Tide Tables and Admiralty N.P. 214, Malacca Strait and Southern Approaches to Malacca Strait. Atlas of Tides and Tidal Streams.

Provisions/Stores: Bonded items, beer and cigarettes and fresh provisions available but advisable to give 24 hours notice as some of the items come from outside Lumut. Fruit and vegetables are available in season from local supply and are reputed to be reasonably priced. Some fruit and vegetables imported and may be expensive. Chandlers can be arranged by Agent.

Laundry; Arranged by Chandler (see above), takes about three days.

Charts: BA 1009 Perak River & Approaches when approaching from South and BA 792 Dinding River & Approaches with inset covering flour mill wharf.

AUTHORITY: Port Office, Marine Department, 32200 Lumut, Perak. *Tel:* 05-935477. *FAX:* 05-913260. *Contact:* Meor Abd. Manap, Deputy Port Officer.

Operator: Malayan Flour Mills Berhad, Jalan David Sung, Batu Undan, Lumut, Perak, Malaysia. *Telex:* Miller MA 42285. *Cables:* Flourmill Lumut, Perak, Malaysia. *FAX:* 05-912296. *Contact:* Raja Toran Shahriman, Chief Administration Officer.

MALACCA (Tanjong Bruas), Malaya: 02.13 N. 102.09 E. (See Plan)

DOCUMENTS:

1. *Malacca Port Authority*
   (a) Ship's arrival advice 72 hours prior to arrival stating estimated time of arrival and date.
   (b) Ship's Manifest 48 hours prior to arrival with particulars of cargo.
   (c) Berth and stevedore application for ship's working arrangement.
   (d) Dangerous Goods Declaration (if any).
   (e) Passenger List (if any).
2. *Harbour Master's Office*
   (a) "Report of Arrival of Vessel" on prescribed form obtainable from Harbour Master's Office on arrival.
   (b) One copy Passenger List, specifying names and nationalities.
   (c) Port Clearance from last port and copy of Manifest of Cargo to be discharged.
   (d) List of all arms and explosives on board.
   (e) In the case of a British or Malaysian vessel and vessels belonging to a nation not having a Consular Officer at the port produce to Port Officer the Certificate of Registry and ship's Articles.
3. *Immigration Authorities*
   (a) Crew List (3 copies).
   (b) Passenger List (3 copies).
   (c) Produce all Passengers Passports/Visas.
   (d) Produce all Seaman's Cards/Books.
   (e) Fill embarkation/disembarkation card obtainable from Immigration Department on arrival.
4. *Port Health*
   (a) Crew List showing last date of vaccination.
   (b) Passenger List, showing the last date of vaccination.
   (c) Produce all Seamen's and Passengers' vaccination cards.
5. *Customs Department*
   (a) Crew List (2 copies).
   (b) Passenger List (2 copies).
   (c) Personnel Effects List (2 copies).
   (d) Cargo Manifests (4 copies).
   (e) Last Port Clearance.
   (f) Bonded Stores List (2 copies).
   (g) Full and correct statement of dutiable goods carried as ship's stores (2 copies).
   (h) Customs Form CD 15 obtainable from Customs Department on arrival.

APPROACHES: Approachable from all directions as port is located in an open-sea area. Harbour open all year round.

PILOTAGE: Pilotage service is compulsory for vessels entering or leaving port limits and during berthing/unberthing. Vessels to give Malacca Port Authority 12 hours' notice. Vessels from West take Pilot 2.75 miles W.S.W. of Tanjong Kling and vessels from East take Pilot 5 miles S.S.W. of Tanjong Kling. Pilot on VHF Channels 12 and 16.

ANCHORAGES: Located approximately 1 mile – 1.5 miles off the Malacca River mouth with depth of 3 fathoms – 6 fathoms. No specific prohibited anchorage.
TUGS: One 800 b.h.p. twin-screw tug available to assist with berthing and unberthing operation and emergencies.
BERTHING: One 'T' shaped jetty of 170 m. length, capable of accommodating one vessel of 125 m. LOA on the seaward side and one vessel of 65 m. LOA on the inner side at any one time. Least depth alongside is 9.0 m.
Storage Areas: 4 modern covered warehouses with a total storage area of 10,800 sq.m. for dry bulk and break bulk cargo. Two tank farms of 6,543 tonnes storage capacity for liquid bulk cargo.
STEVEDORES: Privatised stevedoring companies working on a two-shift basis with cargo discharging capacity per day of 1,500 tonnes for dry-bulk and 1,000 tonnes for breakbulk.
MEDICAL: Modern Government and private hospitals readily available in the town centre. There are private clinics in the vicinity of the port area.
FRESH WATER: Available from elevated water tank of 50,000 gallons capacity through pipelines.
FUEL: Supply by road tankers with advance notice.
REPAIRS/DRY DOCKS: None.
CUSTOMS ALLOWANCES: Tobacco, cigarettes 25 in number per man per day, or cigars, 8 in number per man per day, or Tobacco, 1 oz. per man per day, or snuff, 1 oz. per man per day.

Wine and/or Spirit: Spirit, 0.125 quart per man per day, or wines, 1 quart per man per day, or beer or stout, 1 quart per man per day.
HOLIDAYS: *Port Closed Days:* Chinese New Year, Hari Raya Puasa (1 Syawal), Deepavali, National Day and Christmas Day.
AIRPORT: Batu Berendam, 15 km. from port, catering mostly for domestic flights.
GARBAGE DISPOSAL: Drums provided alongside the wharf by the Port Authority.
WASTE OIL DISPOSAL: No service available.
SEAMAN'S CLUBS: None.
CURRENCY: Malaysian Ringgit (MYR$). U.S.$ 1.00 = R$ 2.530. U.K.£ 1.00 = R$ 4.680. Japanese Yen 100 = R$ 2.000. German Mark 1.00 = R$ 1.615 (12.6.92).
AUTHORITY: Malacca Port Authority, Tanjung Bruas Port, Tanjung Kling, 76400 Melaka, Malaysia. *Tel:* 06-511766, 511216. *Contact:* Chua Yew Liang, Port Manager.

MIRI, Sarawak (incl. Lutong, Kl. Baram, Kl. Niah & Kl. Suai): 04.26 N. 113.55 E. (See Plan)

Miri Roads is an open roadstead in a shallow bay, bounded at North by Tanjong Baram and at South by Tanjong Lobang.
PORT LIMITS: All navigable waters up to the high water mark and all land from the high water mark to the land boundary within the following limits:
Inner Limit:

Batang Baram within the high water lines, from the line delineating the Coastal High Water Line at the river mouth, upstream to the geographical parallel across the river at Lat. 3° 45′ 00″ N.
Outer Limit:

(i) From a point on the Coastal High Water line on the Sarawak/Brunei International Boundary, Lat. 4° 00′ 18″ N., Long. 114° 36′ 27″ E. (approx.)
(ii) Thence along the Coastal High Water Line in a generally Southwesterly direction to a point on the Miri/Bintulu District Boundary, on the N.E. bank of Sungai Selungun, Lat. 3° 35′ 19″ N., Long. 113° 20′ 18″ E. (approx.)
(iii) Thence along a line drawn in a 324° direction to its intersection with the limit of the Sarawak Territorial Sea, Lat. 4° 48′ 30″ N., Long. 113° 20′ 18″ E. (approx.)
(iv) Thence Northeasterly along the boundary of Sarawak Territorial Sea to its intersection with the International Boundary between Sarawak and Brunei on the Continental Shelf, Lat. 4° 48′ 36″ N., Long. 113° 57′ 12″ E. (approx.)
(v) Thence along the same International Boundary to the initial point defined in Clause (i) above.

DOCUMENTS: (a) Health. Vessels exempted from inspection (see "Health") should deliver to Berthing Master on arrival, a Declaration of Health, Last Port Clearance and 2 Crew and Passenger Lists.

(b) Inward Clearance (also see "Anchorage"). All vessels calling Miri Roads for passengers or cargo must be cleared by Immigration and Customs and, if necessary, by Port Health.

Inward Clearance effected only between 0600 hrs. and 1800 hrs. and following signals must be shown: if passengers carried, flags "3" and "4"; if no passengers carried, flags "2" and "5"; if Free Pratique requested, flag "Q".

Following papers will be required on arrival for inward clearance:
Port Health:
Declaration of Health.
1 Crew List.
1 Passenger List, inward and through.
Customs Boarding Officer:
As above, if not boarded by Health Officer, and 2 Inward Cargo Manifests.

(c) Outward Clearance. All vessels will be issued a Port Clearance by Customs Officer after the application has been verified by Port Officer at their respective office. Papers required are 2 Outward Manifests, 2 Crew Lists and, if any embarked, 2 Outward Passenger Lists.
APPROACHES: The loom of gas flares on Seria Oilfields 30 miles N.E. of Miri are a general guide at night but should not be used as a bearing because flares movable within area of oilfield and liable to be extinguished at any time. Following bearings exist. By night, three lighthouses:

(a) *Tanjong Baram:* Lat. 04° 35′ 47″ N., Long. 113° 58′ 25″ E., white single light 680,000 candle power, visibility 17 miles, elevation 120 ft. in grey steel lattice tower, group flash 3 every 20 secs.
(b) *Lutong:* Lat. 04° 28′ 30″ N., Long. 113° 59′ 46″ E., white single light, 13,500 candle power, visibility 10 miles, elevation 80 ft. in grey steel lattice tower, group flash 2 every 10 secs.
(c) *Tanjong Lobang:* Lat. 04° 21′ 48″ N., Long. 113° 57′ 36″ E., white single light 20,150 candle power, visibility 18 miles, elevation 155 ft. in grey steel lattice tower, 60 ft., flash 1 every 10 secs.

By day, above lighthouses difficult to distinguish and following may be used for day-time bearings:
(a) Lutong radio mast F.R 210 ft., position Lat. 04° 26′ 25″ N., Long. 113° 59′ 54″ E.
(b) Tanjong Lobang radio masts as marked on chart.

PILOTAGE: No official Pilot stationed at Miri but Shell Company provide Berthing Masters to moor vessels at their Lutong Moorings (see "Tankers").
ANCHORAGE: For tankers, please refer to "Tankers". For cargo, passengers or clearance, the outer area within an area to Northward of Lat. 04° 25′ 42″ N., Eastward of Long. 113° 55′ E. and Southward of Lat. 04° 23′ 42″ N. It is recommended that vessels of less than 5 m. draft may anchor close inshore directly opposite Miri River Mouth, but caution must be exercised as sudden squalls and swell up to 1.5 m. can occur, for which allowance should be made. For logs at Kl. Baram it is recommended that vessels anchor close inshore S.W. of Baram River Mouth, but caution must be exercised as sudden squalls and swells up to 2 m. can occur, for which allowance should be made. Extra caution must be exercised not to intrude the prohibited anchorage area at the further end of S.W. of Baram River Mouth and the numerous submarine gas lines around the area. For logs at Kuala Niah and Kuala Suai it is recommended that vessels anchor close inshore directly opposite Niah River Mouth and Suai River Mouth, but caution must be exercised as sudden squalls and swell up to 1 m. can occur, for which allowance should be made.

Cargo usually worked into or from wooden lighters or steel dumb barges ranging from 30 tons – 300 tons capacity. Swell often restricts work to landward side only and swell or wind often make it difficult to work Hatch No. 1 in some vessels. Accommodation ladder should be lowered on landward side to enable shore personnel to board.

Prohibited Anchorage and Berthing Area. From *(a)* Lat. 4° 30′ 54″ N., Long. 113° 56′ 19″ E. in a 090° direction to the shore; and from *(a)* to *(b)* in Lat. 4° 27′ 30″ N., Long. 113° 47′ 01″ E., thence in a 090° direction to the shore.
HEALTH: Every vessel arriving in quarantine shall fly or show the appropriate International Quarantine Signal; and no person other than a Pilot, Port Officer, Port Health Officer, Immigration Officer or Officer of Customs shall board the vessel; and no person shall disembark therefrom until the vessel has been cleared by the Port Health Officer.

Free Pratique granted without health inspection to vessels calling to lift bunkers only at Lutong Moorings, provided ship healthy. Vessels with unclean bill of health or vessels which have not declared themselves healthy in their arrival notice telegram are subject to normal Port Health inspection procedure. Therefore of utmost importance that arrival notice is sent not less than 24 hours before arrival and contains all information requested (see "Radio") in order to prevent unnecessary delay.
RADIO: Miri Radio, call sign 9 WW21, frequency 500 kHz, operates at following hours local time: 0800 – 0830, 0900 – 0930, 1200 – 1230, 1600 – 1630. Present station has a limited range and if difficulty is experienced making contact or contact outside the above hours, vessels should pass messages through other stations, such as Kuching Radio or Singapore Radio, or through other ships in close vicinity of Miri.

Arrival notice must be telegraphed at least 24 hours before arrival and should contain following information:
All vessels
(a) expected time of arrival (local time GMT plus 8 hours);
(b) name of last port of call and next port of call, if not previously advised;
(c) whether or not ship is healthy.
For bunkers
(d) quantity of bunkers required, in long tons at least 48 hours' notice is required;
(e) provisions or medical attention required, if any.
For cargo
(f) tonnage to discharge, if any;
(g) number of gangs required to load;
(h) number of winchmen required to load.
Passengers
(i) number of passengers to disembark.

Also see "Tankers" – Communications.
VHF: Vessels arrived at the anchorages and wishing to contact their local/abroad Agents should contact "Miri Control" by Channel 16 which will be subsequently transferred to either Channel 25 or 27 for through calls. "Miri Control" operates 24 hours daily.
BERTHING: Cargo vessels – see "Anchorage", oil carriers – see "Tankers".
MEDICAL: Treatment of urgent cases available on shore subject weather conditions. Early notice should be telegraphed of medical requirements.

TANKERS: There are 4 Single Buoy Moorings at Miri Terminal which are in the following positions:

SBM No. 1	Lat. 04° 28′ 21.9″ N. Long. 113° 56′ 20.8″ E.	Max. SDWT: 30,000 tonnes Max. draft: 37 ft. Min. water depth in manoeuvring area 40 ft.
SBM No. 2	Lat. 04° 28′ 48.9″ N. Long. 113° 56′ 33.0″ E.	Max. SDWT: 75,000 tonnes Max. draft: 37 ft. Min. water depth in manoeuvring area 40 ft.
SBM No. 4	Lat. 04° 30′ 15.5″ N. Long. 113° 56′ 26.3″ E.	Max. SDWT: 100,000 tonnes Max. draft: 39 ft. Min. water depth in manoeuvring area 42 ft.
SBM No. 5	Lat. 04° 26′ 49″ N. Long. 113° 53′ 48″ E.	Max. SDWT: 150,000 tonnes Max. draft: 56 ft. Max. loading rate: 2,700 cu.m.p.h. Min. water depth in manoeuvring area 66 ft.

The riser platform acts as a distributing point where all the valves to the SBMs are located and is positioned at Lat. 04° 29′ 33″ N., Long. 113° 56′ 37″ E.

Pipe-lines and Cargo Hoses:

SBM No. 1: Operational for the export of refined products only.

The connection between the distribution platform and the SBM consists of 3 × 12 in. and 1 × 6 in. diameter pipe-lines/underbuoy hoses.

2 × 12 in. and 1 × 6 in. diameter hose strings are connected to the turntable and joined together with buoyancy tanks, terminating in 2 × 8 in. and 1 × 6 in. diameter hose strings of 5 lengths each for direct connection to the tanker's starboard manifold. An additional 6 in. diameter self-floating hose string of 17 lengths is connected to the turntable.

The total length of the hose strings is 544 ft. allowing a maximum distance from ship's bow to manifold of 330 ft.

The maximum permissible draft is 37 ft.

SBM No. 2: Operational for the export of crude oil and fuel oil.

The connection between the distribution platform and the SBM consists of 3 × 12 in. and 1 × 6 in. diameter pipe-lines/underbuoy hoses.

2 × 12 in. and 1 × 6 in. diameter hose strings are connected to the turntable and joined together with buoyancy tanks, terminating in 8 lengths of hose for direct connection to the tanker's starboard manifold.

The total length of the hose strings is 634 ft. allowing a maximum distance from ship's bow to manifold of 400 ft.

The maximum permissible draft is 37 ft.

SBM No. 4: Operational for the export of crude oil and fuel oil.

The connection between the distribution platform and SBM consists of 3 × 12 in. and 1 × 6 in. diameter pipe-lines/underbuoy hoses.

2 × 12 in. and 1 × 6 in. diameter hose strings are connected to the turntable and joined together with buoyancy tanks, terminating in 5 lengths of hose for direct connection to the tanker's starboard manifold.

The total length of the hose strings is 648 ft. allowing a maximum distance from ship's bow to manifold of 450 ft.

The maximum permissible draft is 39 ft.

SBM No. 5: Operational for the export of crude oil only. The connection between the distribution platform and SBM consists of 2 × 16 in. and 2 × 16 in. diameter pipe-lines/underbuoy hoses.

2 × 16 in. and 2 × 16 in. diameter hose strings are connected to the turntable and joined together with buoyancy tanks, terminating in 27 lengths of hose for direct connection to the tanker's starboard manifold.

The total length of hose strings is 814 ft. allowing a maximum distance from ship's bow to manifold of 560 ft.

The maximum permissible draft is 56 ft.

Information Required Prior to Arrival: Standard message to Masters of vessels calling at SBM.

Please advise:

AAA	ETA and draft at Miri SBM
BBB	Customs and Health requirements
CCC	Is vessel equipped with bow chain stopper, Smit Brackets and a large central Panama Chock? (this information required from unknown vessels only)
DDD	Are manifold connections as per OCIMF specifications?
EEE	Rig starboard derrick to maximum (minimum acceptable 7 tons)
FFF	Have 2 × 12 in. manifolds ready on starboard side.
GGG	Be advised that vessel must maintain full readiness to manoeuvre during stay at SBM.

Berthing Instructions: After ETA advice one of the following messages will be transmitted to the Master.

AAA	Based on your ETA ....present intention is to berth you on arrival.
BBB	Pilot will board at Pilot anchorage area at the following coordinates: Lat. 04° 25′ N., Long. 113° 54′ E. Lat. 04° 27′ N., Long. 113° 56′ E.
CCC	Confirm ETA at least 48 hours in advance. When within range you are required to confirm your ETA 3 hours prior to arrival to Miri Terminal on VHF Channel 18 with Lutong Radio.
DDD	Please keep us advised of any changes in your ETA. Onus of ETA confirmation rests with vessel.
EEE	After having established radio contact on VHF you will receive further instructions.

Mooring Operation: Vessels are programmed for day and night berthing. Use of ship's anchors is strictly prohibited except in extreme emergency. The anchors must never be released or brought anywhere near the entire length of the submarine pipe-line nor closer than 350 m. radius from the SBM. Both anchors should be secured prior to berthing operations.

Floating Mooring Rope Assembly: The buoy to tanker mooring comprises of 2×15 in. circumference×150 ft. single braided ropes. At the buoy end, the hawsers are joined to the pad eyes of the Rotating Mooring Arm with heavy duty shackles. Each hawser of the dual floating mooring hawser is fitted with 50 ft.×1.5 in. diameter chafing wires.

The pick-up assembly consists of:

(i) 8 in. circumference polypropylene messenger rope with spliced eyes on each side. Length 150 ft.

(ii) 8 in. circumference polypropylene pick-up rope with tail-end spliced directly to chafing wire.

(iii) Pick-up support buoy.

(iv) 50 ft.×1.5 in. diameter chafing wire.

Mooring Craft: A mooring launch will be in attendance. The launch is used to send the messenger end of the mooring ropes to the vessel. On completion of mooring the launch picks up the hoses for connecton and remains at the vessel until the completion of loading.

Pilotage: Pilotage is compulsory within port limits for the size of vessels calling at the SBM. The Pilot will board at the Pilot anchorage area for both arriving vessels and the vessels which have been anchored there awaiting berth.

Mooring Procedure: Before the arrival of the tanker, the Berthing Master has to go to the SBM at least one hour early to check and make sure that the hoses and mooring ropes are not fouled. The mooring craft then proceeds to the vessel to disembark the Berthing Master.

During the vessel's approach the mooring boat tows the port mooring rope around the buoy so that it is out of the way when the starboard inner one is being worked on. The starboard inner rope is then run out to its full length.

When the end of the messenger is within range, the vessel's bow is approximately 115 m. from the SBM, i.e. 70 m. to go to final secured position. The approach speed at this point should not exceed 0.5 knots.

As the vessel slowly closes in on the buoy the messenger, pick-up rope and chafing wire are hove on board until the chafing wire is in position in the fairlead (marker buoy just outboard of fairlead). The chain stopper is secured to the chafing wire, while the eye is put on the ship's bollard to make fast.

While the inner mooring rope is being tended to, the mooring boat clears the (port) outer mooring rope from the buoy. This rope is then hove on board and connected in the same way as the inner one.

The vessel should have 2 mooring ropes ready on the forecastle, and mooring is carried out by ship's crew.

Cargo Loading Operation: Throughout the vessel's stay at the SBM, the Berthing Master will remain on board to co-ordinate ship/shore operations and one launch will remain at location as a safety precaution.

Connecting Hoses: Hose connection is carried out by ship's crew.

The hoses are lifted and connected one at a time. The forward or 'inner' hose is tended to first. The derrick runner is hooked into an enlarged link in the hose lifting chain and the hose end is then lifted out of the water until sufficient length is available for direct connection to the tanker's manifold. The weight of the hose in this position is transferred to the hose hang-off chain and the hose end is then lowered on to the deck. The blank flange is removed and the hose connected to the vessel's manifold. After connecting, the hoses are supported at the tanker side by flat webbing slings hung from the derrick runner in order to maintain a reasonable radius of bend. They are also suitably lashed to the hose bar of the side rail to reduce movement caused by sea conditions. In seas exceeding 5 ft., the floating hose strings become lively and require attention. Excessive movement of the hoses will result in chafing and strain on the flanges in way of the manifold. This can be reduced to a minimum by a suitable suspension of the hoses from the derrick runner backed up by rope lashings at the side rails or hose bars. Such preventive measures depend largely on the construction and layout of the tanker in the manifold area, also on the distance of the manifold from the vessels' side.

Loading Procedure: Miri Light Crude and refinery products are exported from the Miri Terminal. The quantities loaded are checked by the terminal at frequent intervals and vessels are requested to verify the shore figures.

The shore maximum back pressure is 180 p.s.i. The Berthing Master also acts as Loading Master and as the Terminal's Representative. He will attend to all cargo formalities (SSB forms, Safety Check List, etc.).

Prior to and during loading operations the following procedure will apply.

a. A joint inspection is carried out by ship and terminal representative to ensure all requirements on the Safety Check List have been compiled with.

b. The methods of communication between ship and shore is clearly established and understood. This includes procedures for normal and emergency stops of cargo loading operations. Test calls are made to ensure the system is operating satisfactorily.

c. Ship and shore to confirm readiness to start cargo loading operations.

d. Commencement of loading to be at slow rate.

e. Lines and hoses are checked and faults rectified. Launch to patrol around the vessel to check for oil leakages into the sea.

f. When the ship confirms receipt of cargo, test the emergency trip. After the test is completed start pumping and gradually increase to agreed loading rate.

g. Lines, hoses and the water around the vessel are again checked.

h. Ship and shore figures are to be compared every 2 hours and discrepancies investigated.

i. At least 15 minutes' notice should be given to the terminal before each stop or in regard to slowing down the loading rate for "topping off".

Ballast: Vessels must arrive with sufficient ballast for safe manoeuvring into the berth.

There are no facilities for the shore reception of ship's ballast. Vessels are accepted for loading on the express understanding that only clean ballast will be discharged into the sea.

Deballasting prior to the ship being fully secured to the buoy is only allowed after consultation with the Berthing Master.

Suspension of Loading Operation: If loading operations are suspended for an excessive period (e.g. leakage), hoses should be disconnected, blank flanged and made ready for lowering into the sea.

Disconnecting Hoses: The "after" or outer hose is disconnected first. It must be assured that all the bolts are fitted and properly tightened. The gasket must be in good condition and changed regularly. As soon as the hoses have been disconnected from the tanker's manifold, the blank flanges are fitted and the hose support buoy as well as the free end of the "hose hang-off chain" are shackled to the lug on the spool piece. Each hose is lowered over the side and towed clear from the tanker's side or temporarily secured to the SBM in a bight to prevent possible entanglement with the tanker's propeller.

Unmooring: Weight on the mooring ropes may be taken off by using ship's engines. The polypropylene pick-up ropes, which remain connected to the triangle plates of the chafing chains, are lead to the winch, and the weight is taken off the bow stopper or nylon snotter as the case may be. The bow stoppers are released or special shackles disconnected, and the moorings and pick-up ropes lowered from the bow into the water.

When both moorings have been let go, the tanker is given sternway until the bow is well clear of the hose strings.

Communications: Vessels are required to advise Sarawak Shell Berhad/Respective Agents of their ETA's 48 hours and again 24 hours prior to arrival. Telexes or telegrams should be sent to MA74306 or Saroilco Miri, respectively.

6 hours and again 3 hours prior to arrival, vessels are required to confirm their ETA to Miri Lutong Terminal on VHF Channel 18.

During office hours "Shell Marine" can be contacted on Channel 18, but this radio has a limited range.

Weather: The SBMs are positioned in the open sea. The weather in this region is basically good for tanker operations.

The seasonal weather patterns are broadly divided into three and the terminology used is consistent with that of South East Asia. These three types are:

(1) S.W. Monsoon (June–October)
(2) N.E. Monsoon (December–March)
(3) Transitions between the monsoons.

Persistent bad weather occurs during the N.E. monsoon. High swell conditions can persist for periods of 3 to 4 days and in extreme conditions for up to a week. During the S.W. monsoon winds are generally light to moderate, but during brief surges (generally lasting less than 36 hours) winds are occasionally strong, and local gale force squalls are experienced. The most favourable time for tanker operations is during the transition periods. Winds are lighter and variable. Seas in this period are rarely more than very slight. The only troublesome features of the periods are the occasional severe squalls that originate from inland, which are associated with cumulonimbus clouds and thunderstorms.

The basic patterns of these squalls are vigorous thunderstorms inland, increasing as the storm approaches. Just before the onset of torrential rain, the wind backs rapidly towards the land and increases violently to the peak gust.

Immobilisation: Immobilisation of engines is not permitted at any time during the vessel's stay at the SBM.

Transmission of Ship's Radio: Use of the ship's radio transmitter is prohibited during the vessel's stay at the SBM.

FRESH WATER: No fresh or boiler water available.

FUEL: No ex-barge facilities but bunkers obtained from Lutong Terminal.

Sealines Nos. 2 and 4. Available for bunkering dry-cargo vessels. Ship's spring wire will be used to haul ends of mooring wires on board and mooring winches should be double gear and in all respects ready for use. All other gear for mooring and connecting pipes is brought on board with Berthing Master at Pilot Station. Bunkers will be supplied through 8 in. flexible hose brought up on starboard side amidships and appropriate flange on ship's connection should be removed in advance. Berthing Master will remain on board throughout bunkering operation and will leave after vessel has unberthed. Mooring and unmooring operations each require about 1.5 hours and bunkering rate usually 45 t.p.h. – 75 t.p.h.

REPAIRS: Emergency deck and hull repairs can be carried out offshore. Please contact Harbour Master for arrangements if required. Tel: 085-32911 (office hours) or 085-33232 (outside office hours).

CUSTOMS ALLOWANCES: Bonded Store on vessels other than those berthing at Lutong Moorings for bunkers only and exempted from formal clearance, sealed by Customs after allowing a daily ration for duration of stay in port.

One Customs Officer will remain on board all vessels anchored in Miri Roads and accommodation, if necessary, should be arranged for them. The Agents' staff will remain on board throughout all cargo operations and it would be highly appreciated if meals could be supplied to them and to the Customs Officer in view of the long time occupied travelling by launch between ship and shore.

REPATRIATION: Crew changes and repatriation can be carried out at Marine Office, Kubu Road, Miri with little difficulty.

AIRPORT: Distant 10 km., daily, day and night flights.

TIME: GMT plus 8 hours. Permanent.

HOLIDAYS: New Year's Day; Chinese New Year; Good Friday; Labour Day; Wesak Day; Dayak Festival Day (Gawai); Yang Dipertuan Agong's Birthday; Hari Raya Puasa; T.Y.T. Yang Dipertua's Birthday; National Day; Hari Raya Haji; Awal Muharram; Prophet Mohammad's Birthday; Christmas Day.

Chinese New Year; Dayak Festival Day (Gawai); Hari Raya Puasa normally has 2 days holiday.

POLICE/AMBULANCE/FIRE: Tel: 999.

SHORE LEAVE: It is regretted that both passengers and crew must be dissuaded from coming ashore other than for medical attention, owing to weather and tidal restrictions.

IDENTIFICATION CARDS: Seaman's Record Book is sufficient.

LUBRICANTS: Generally, lubricants not available but in emergency certain grades sometimes obtainable in very limited quantities.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Malaysian Ringgit (MYR$). U.S.$ 1.00 = MYR$ 2.74 (16.4.91).

PROVISIONS: Limited fresh provisions and ex-bond stores available for which vessels should give 72 hours notice of requirements so that arrangements can be made to secure the required supplies.

REGULATIONS: The Master of every vessel of over 15 tons about to depart from a port for any place outside Sarawak shall cause the "Blue Peter" (International Code Flag "P") to be hoisted, during daylight hours, for at least 12 hours before the vessel is due to sail, or if the vessel is in port for less than east 12 hours before the vessel is due to sail, or if the vessel is in port for less than 12 hours, for the period of her stay in the port.

(1) The Master or the Agent of every vessel about to depart from a port shall, on demand by the Port Officer, produce for inspection the port clearance.

(2) The Port Clearance shall be in the form of an endorsement on the form of clearance prescribed under the Customs Ordinance or in such other form as may be approved by the Director.

A vessel arriving in, leaving from or shifting berth within a port shall hoist her signal letters, if any, whilst under way.

AUTHORITY: Marine Officer, Marine Department, Kubu Road, Miri, Sarawak, Malaysia. *Tel:* 085-32352; 085-32911, 085-33301. *Cables:* "Shipping Miri".

Miri Port Authority, River Road, P.O.Box 1179, 98008 Miri, Sarawak, Malaysia. *Tel:* 085-38481; 085-38529. *Telex:* 74227 MA Tyseng. *FAX:* 085-417191. *Contact:* The General Manager.

AGENT: See "Kota Kinabalu".

PASIR GUDANG, Malaya: 01.26 N. 103.54 E.

(See Plan)

LOCATION: The port is situated on the Malaysian Coast of the Straits of Johore, 10 nautical miles East of Johore Bahru Town. The approximate position is Lat. 01° 26′ 06″ N., Long. 103° 54′ 25″ E.

DOCUMENTS:

Customs:

2 Personal Effects List,
2 Narcotics Lists,
2 Arms and Ammunition Lists,

2 Stores Lists made out on ships forms only, no special forms issued by the port. Customs Boarding Officer also requires a full and correct statement of all dutiable liquor and tobacco carried as ship's stores, the statement which is to be submitted in duplicate on forms provided by the Boarding Officer is to show in detail the quantities of dutiable goods held:–

(a) in the ship's stores, bars and shops;
(b) in the possession of Officers and Crew.

Immigration: 3 Crew Lists, all Crew Seaman's Books for entry visa stamp.

Port Health: 1 Vaccination List, Maritime Declaration of Health.

Police: 1 Crew List, 2 Narcotics Lists, 2 Arms and Ammunition and Explosives Lists.

APPROACHES: *Fairway:* There is no limitation imposed on size of vessels passing through the fairway except for the draft. The main channel in the East Johore Strait has a depth of water up to approximately 12.5 m. (41 ft.) ACD up to the Port Waterfront and 11.6 m. (38 ft.) ACD for areas beyond up to the Causeway.

PILOTAGE: Pilotage is compulsory for vessels either exceeding 45 m. in length and/or with height structure above 30 m. or without any radio communication on board, entering or leaving the Port Water Limits. Pilotage is provided by the Authority. The pilot boarding point is 2 miles S.W. of Tanjung Stapa Lt. (01° 20.6′ N., 104° 08.2′ E.).

ETA to be sent to Harbour Master 24 hours prior to arrival, and to pilot 3 hours prior to arrival or departure.

ANCHORAGE: Anchorage areas have been designated within the port water limits and as indicated in all navigational charts for the following:

(a) General purposes.
(b) Dangerous goods and explosives.
(c) Quarantine.
(d) Petroleum.
(e) Lay-up.

RESTRICTIONS: A 24 hour pilotage service for all vessels entering or leaving Johore Port is provided. However, the following restrictions are imposed.

1. *Recommended Speed:*

(a) The maximum recommended speed should not exceed 8 knots and when passing Fairy Point, the speed should not exceed 6 knots.

(b) Vessels are required to slow down when passing Johore Port area, Malaysia Shipyard Engineering (MSE) and Sembawang Shipyard areas.

2. *Reporting:*

When entering, transitting or leaving the East Johore Strait, all ships of 2,000 g.r.t. and above or whose masts or superstructures exceed 30 m. above the waterline or where the vessel is under tow and the combined length of the towing vessel and the tow exceed 30 m. are requested to comply to the contents of the Port of Singapore Circular No. 23 of 1981 (see "Traffic Information") in providing the following data:–

(a) Name and Call Sign of vessel;
(b) Type of vessel (stipulate floating crane, oil rig, etc.);
(c) Max. height above waterline in metres:
(d) Destination (Sembawang port, name of shipyard, etc.);
(e) Point of origin (Sembawang port, Johore Port, Johore Shoal Buoy, etc.);
(f) ETA at Johore Shoal Buoy or ETD.

on VHF Channels 11, 21 and 63.

3. *Tugs:*

Tug services are available for towage, berthing and unberthing operations within the port's water limits. This service is provided by the Authority's tugs and supplemented by privately operated tug companies. The tugs are mostly equipped with fire fighting and anti-pollution equipment.

(a) VLCCs or vessels of more than 280 m. in length are to be provided with at least 2 escort tugs when transitting the East Johore Strait.

(b) Vessels of more than 240 m. in length are required to be provided with 1 escort tug when transitting the East Johore Strait.

4. *General:*

(a) When a nuclear powered ship is underway in the East Johore Strait no vessel should be underway forward of her.

(b) Vessels above 180 m. in length will not be programmed to pass any vessel exceeding 280 m. in length transitting the East Johore Strait between Changi and Sembawang Shipyard.

(c) VLCCs or vessels of more than 280 m. in length will be programmed to transit the Fairy Point/Changi area during slack water or stemming the tidal current.

(d) Vessels of more than 240 m. in length will be permitted to transit the East Johore Strait only during daylight hours.

(e) Vessels of between 210 m. and 240 m. in length are permitted to transit East Johore Strait during non-daylight hours provided they have full use of engines and are programmed to transit during slack tide or stemming the tidal current.

(f) Anchoring is prohibited in the main channel. Any unauthorised anchoring must be reported immediately to Johore Port Authority and Sembawang Control.

(g) During the hours of darkness, tows are generally not permitted to transit East Johore Strait.

For the purposes of the above guidelines:–

(a) A VLCC (very large crude carrier) is deemed to be a tanker of 150,000 d.w.t. and above.

(b) Length of vessel refers to her overall length.

(c) Daylight hours means from 0700 hrs. to 1900 hrs.

VHF: Vessels can communicate direct with the pilot control station tower via ship to shore VHF on the following Channels:–

Channel	*Ship Stations*	*Shore Stations*
11	156.550 MHz	156.550 MHz
21	157.050 MHz	161.650 MHz
(Listening only) 63	156.175 MHz	160.775 MHz

VHF network links the tugs, launches and the Authority's personnel working on board vessels at the anchorages.

TUGS: See "Restrictions" and "Facilities".

FACILITIES: *Oil Jetty:* Depth of water 10.2 m. (33 ft.), L-shaped with 2 berths.

Dangerous Cargo Jetty: Depth of water 11.0 m. (36 ft.), length 216 m. (708 ft.).

Ocean Wharves: Depth of water 12.2 m. (41 ft.), length 1,093 m. (3,583 ft.).

Coastal Wharf: Depth of water 5.0 m. (16 ft.), length 107 m. (350 ft.).

Transit Shed: (2) 21,256 sq.m.

Godown: (3) 23,411 sq.m.

Open Storage Yard: 2.05 hectares.

Container Yard: 44,175 sq.m.

Container Freight Station: 7,750 sq.m.

Palm Oil Tank Installation: Present capacity for crude and refined palm oil 121,000 tonnes.

Petroleum and Petroleum Products: Storage capacity 63,000 tonnes.

Grain Silos: 72,000 tonnes.

Fertiliser Storage: 59,000 tonnes.

Clinker and Gypsum: 27,000 tonnes.

Timber Terminal: 4.36 hectares.

Other facilities such as bauxite, ore and woodchip jetties as well as a shipyard (Malaysian Shipyard and Engineering) are available and operated by private companies. The shipyard undertakes repairs and docking to vessels up to 400,000 d.w.t.

Shore Equipment:

	Capacity	*Unit*
Forklift Trucks	8 tonnes	6
	6 tonnes	3
	2 tonnes	22
	2.8 tonnes	10
Towing Tractors	1.3 tonnes	1
	1.8 tonnes	1
	3.5 tonnes	2
Trailers	1.5 tonnes	5
	3.5 tonnes	2
Continuous Unloaders	800 tonnes/hr.	2
Level-Luffing Crane	15/400 tonnes/hr.	1
Multi-purpose Crane	35/400 tonnes/hr.	1
Container Cranes	36 tonnes	2
Straddle Carriers	36 tonnes	2
Transfer Cranes	36 tonnes	2
40 ft. Skeletal Semi-trailers		18
Container Terminal Tractors		10

Floating Equipment:

Tugs	1 – 3,200 b.h.p.
	2 – 1,800 b.h.p.
	1 – 1,240 b.h.p.
	1 – 750 b.h.p.
	2 – 350 b.h.p.
Launches	2 – pilot launches
	4 – security launches
Lighters	8 – 80 tonnes capacity steel barges
	2 – 200 tonnes capacity steel flat-top water barges
Passenger Boats	6

STEVEDORES: Stevedore and shore labour undertaken by the Port Authority and shift times are as follows:–

0700 – 1500 hrs.
1500 – 2300 hrs.
2300 – 0700 hrs.

Stevedores may undertake work of opening/closing of hatches but rigging of gear must be done by the crew.

FRESH WATER: Fresh water connections are on the berth. The rate of supply being 20 t.p.h.

FUEL: All grades of Bunkers are available at short notice.

REPAIRS/DRY DOCKS: Situated in Pasir Gudang Industrial area is Malaysia Shipyard & Engineering Sdn, Bhd. MSE is a fully equipped up-to-date engineering establishment. With facilities for ship repairing, new-building up to 12,000 d.w.t. and general engineering works.

(1) Dry dock, length 395 m., width 80 m., depth 14 m., capable of handling ships of 400,000 d.w.t.

(2) No. 2 dry dock, length 270 m., width 46 m., depth 12.5 m. capable of handling up to 140,000 d.w.t.

(3) Newbuilding dock, length (approx.) 123 m., width 25 m., depth 8.0 m., capacity approx. 12,000 d.w.t.

Berthage: No. 1 quay, 390 m. long × 7 m. draft. 1 × 15 ton luffing crane. No. 2 quay, 268 m. long × 7 m. draft. 1 × 15 ton luffing crane. No. 3 quay, 268 m. long × 7 m. draft. 1 × 15 ton luffing crane.

SURVEYORS: Classification Surveyors are available from Singapore and Kuala Lumpur. Cargo Surveyors are represented locally by Caleb Brett, General Superintendents and Trident Malaysia.

GANGWAY/DECK WATCHMEN: The Port Authority has a Security Division responsible for the general security of the port area. The force consists of a detachment of trained armed guards. Their services are available if requested through the Agents.

CUSTOMS ALLOWANCES: Spirits: 0.125 of a quart per man per day or wine 1 quart per man per day; beer 1 quart per man per day, cigarettes: 25 in number per man per day or cigars 8 in number per man per day or tobacco 1 oz. per man per day.

Customs will issue allowance for total of 3 days, and on request to a Proper Customs Officer the seal may be broken for further issues.

CARGO GEAR: When possible all loading and discharging are carried out with ship's gear. Shore equipment comprises – 1 side loader capacity 52,000 lbs., 5 side loaders of capacity 9,000 lbs., each 2×28 tonne mobile cranes, and 2×10 tonne mobile cranes. For bulk cargoes, grains, fertilisers, sulphurs, etc., shore grabs of 2 tonne capacity connected to ship's gear.

REPATRIATION: Ship's crew with valid or recognised International Passport are permitted to enter and sign-off through Malaysia/ Singapore checkpoint at Causeway, provided they obtain a transit visa from the Malaysia Authorities through the ship's Agents. Ship's crew without International Passport, and only Seamen's Books must join/ leave ships via Kuala Lumpur.

TIME: GMT plus 8 hours.

HOLIDAYS: *Port closed Holidays:* The port is operationally closed during the following festival days:–

1. Hari Raya Puasa (Muslim Aid II Fitri);
2. Chinese New Year;
3. Malaysia National Day;
4. Deepavali;
5. Hari Raya Haji (Muslim Aid II Adha).

TELEPHONES: Telephones may be placed on board at a connection charge of $/M25.00 per day.

SERVICES: *Provisions:* 2 licensed ship chandlers are able to provide and attend to all requirements.

SHORE LEAVE: Shore leave for crew members is permissible. The nearest town is Masai approx. 5 miles from the port. Johore Bahru is approx. 23.5 miles from the port by road. Crew members are allowed to cross the Causeway into Singapore, providing they obtain the necessary permit from the Immigration Authorities through the ship's Agent.

DEVELOPMENTS: Johore Port has plans for the construction of 5 more wharves. The proposed berths are for dry bulk materials, general cargo and containers. The berths will serve the needs of specialised industries such as fertilisers, feedmeal, and grains. The construction of silos, storage area, and other processing plants is to be undertaken by the companies concerned. Completion expected by 1993. The container berths (2) will have a length of 700 m. and depth 15.0 m.

TRAFFIC INFORMATION:

Port of Singapore Authority – Port Circular No. 23, dated 20th March, 1981.

To: Shipping Community

Traffic Information System for Ships Transitting Serangoon Harbour: 1. In exercise of the powers conferred by section 65 of the Port of Singapore Authority Act (Cap 173) 1970, I hereby direct that Masters of vessels entering, transitting or leaving the traffic information area shall, in the case of vessels having a gross registered tonnage of 2,000 and above or whose masts or superstructures exceed 30 m. above the waterline or where the vessel is under tow and the combined length of the towing vessel and the tow exceeds 30 m., comply with the new VHF reporting system which is given in this circular with effect from 1st June, 1981.

2. *Method of Communication:*

2.1 The VHF traffic is conducted on VHF Channel 21 and Masters of vessels are required to listen to this Channel continuously while their vessels are entering, transitting or leaving the traffic information area.

2.2 In the event that Channel 21 is inoperative, Channel 13 will be used. Masters of vessels are required to contact Port Operations on Channel 12 for confirmation of breakdown of Channel 21 prior to using Channel 13 for communication with the PSA Control Station.

3. *Notification:*

3.1 Master of vessels mentioned in paragraph 1 intending to enter or transit the traffic information area shall give at least 24 hours notice to the PSA Control Station. The information required together with this notice are:

(a) Name and Call Sign of Vessel;
(b) Type of vessel (stipulate floating crane, oil rig, etc.);
(c) Max. height above waterline in metres;
(d) Destination (Sembawang Port, name of shipyard, etc.);
(e) Point of Origin (Sembawang Port, Johore Port, JSB, etc.);
(f) ETA at Johore Shoal Buoy or ETD.

3.2 This notification may be given to the PSA Control Station by telephone, VHF, telex, public telegram or W/T.

3.3 Between 2 and 3 hours before arrival at Johore Shoal Buoy (approx. positon Lat. 01° 18′ 53″ N., Long. 104° 05′ 00″ E.) or 3 hours before departure from a berth within East Johore Strait, Masters of vessels mentioned in paragraph 1 shall notify and seek permission from the PSA Control Station on Channel 21. In seeking permission from the Control Station, the following information is required.

(a) Eastbound:
 ETD from berth
 ETA at Perimbi Buoy (approx. position Lat. 01° 25′ 50″ N., Long. 103° 53′ 21″ E.).
 ETA at Malang Papan Beacon (approx. position Lat. 01° 24′ 07″ N., Long. 103° 59′ 27″ E.).
 ETA at Malang Tiga Buoy (approx. position Lat. 01° 23′ 09″ N., Long. 104° 01′ 33″ E.).
(b) Westbound:
 ETA at Johore Shoal Buoy (approx. position Lat. 01° 18′ 53″ N., Long. 104° 05′ 00″ E.).
 ETA at Malang Tiga Buoy.
 ETA at Malang Papan Beacon.
 ETA at Perimbi Buoy (if applicable).

Following approval from the PSA Control Station, Masters of Westbound vessels when passing Johore Shoal Buoy and Angler Buoy (approx. position Lat. 01° 21′ 06″ N., Long. 104° 03′ 07″ E) shall confirm or update their ETAs at Malang Tiga Buoy and Malang Papan Beacon.

3.4 Masters of Eastbound vessels shall confirm or update their vessels' ETAs at Malang Papan Beacon and Malang Tiga Buoy when passing Punggol Beacon (position Lat. 01° 25′ 19″ N., Long. 103° 54′ 48″ E.) and Squance Buoy (approx. position 01° 23′ 43″ N., 103° 58′ 00″ E.).

3.5 Masters of vessels should check their vessels declared ETAs at Malang Tiga Buoy and Malang Papan Beacon when their vessels are between Angler Buoy and Squance Buoy. Should the new ETAs at Malang Tiga Buoy and Malang Papan Beacon differ by 5 minutes or more from the last declared ETAs, they should update their vessels' ETAs with the PSA Control Station.

4. Masters of vessels failing to comply with these directions shall be guilty of an offence punishable under section 66 of the Port of Singapore Authority Act.

Signed: Port Master, Port of Singapore Authority.

SHIPMASTER'S REPORT: February 1979. (Updated 1986).

Port Limits: All the area of water enclosed on the West by a line drawn due South from Tanjung Bin (Lat. 01° 20′ 00″ N., Long. 103° 32′ 48″ E.) on the North by the Southern shores of the State of Johore, on the East by a line drawn 229° from Tanjung Stapa (Lat. 01° 20′ 36″ N., Long. 104° 08′ 12″ E.) and on the South by the limits of territorial waters of Johore, including the Johore River up to the bridge where the Johore Bahru to Kota Tinggi road crosses.

Documents: Agent: Last Port Clearance, Manifest, Bills of Lading, Ships Certificates, Crew Agreement (Articles).

Pilotage: Pilots board off Johore Shoal Buoy, request for Pilot to be made via Agents. Confirmation of Pilot boarding obtained from Johore Port Control, VHF Channels 11, 21 and 63.

Pilot launch is a fast motor cruiser.

Pilotage is compulsory for all vessels over 45 m. in length.

Anchorage: Ships proceeding to call at any of the docks within Johore Port Limits, may be requested to use the anchorage to the East of the pilot boarding point. Vessels may also anchor approx. 0.6 miles E.S.E. off Pasir Gudang wharf, for large vessels there is a mooring buoy to restrict swinging into the channel.

Max. Size: The navigational conditions in the Straits are adequate for vessels of sizes expected to call at Johore Port as determined by depths at Ocean Wharf, Oil Jetty, and Coastal Wharf. No limitations on the size of vessel passing through the fairway except for controlling draft in the East Johore Channel of up to approx. 11.6 m. Large vessels up to 400,000 d.w.t. can navigate the Straits in ballast proceeding to Malaysia Shipyard also situated in Pasir Gudang.

Health: Vessels Agent to give advance notification to the Health Officer, if possible 48 hours prior to ETA of vessel, together with a list of ports visited within the preceding 14 days. Vessels from infected ports, or without valid Derat Exemption Certificates, or with cases of sickness or death on board, must fly the quarantine flag, and proceed to quarantine anchorage until boarded by the Port Health Officer.

Radio: Singapore Radio 9VG is the most reliable, and messages are telexed direct to local Agent in Johore Baru.

VHF: The base station is situated at Pasir Gudang, Channels presently in use are 11, 21 and 63.

Tugs: 2 tugboats of 3,200 h.p., 2 tugboats of 350 h.p. Tugs normally meet vessels off the wharf, or at anchorage when mooring to buoy. Tugs lines used.

Berthing: Oil Jetty: Depth alongside 10.2 m.; "L" shaped jetty, with 2 berths.

Ocean Wharves: Depth alongside 12.5 m.; length of wharf 1,093 m.

Coastal Wharf: Depth alongside 5.0 m.; length of wharf 107 m.

The Ocean berth is designed for general cargo vessels, and bulk carriers, of approx. 20,000 – 60,000 d.w.t.

All cargo work is carried out by ship's gear, shore equipment is available, e.g. mobile cranes, side loaders, vacuvators.

Specialised Cargo Handling Facilities: Oil Jetty capable of handling Palm oil shipment. Liquid chemical installation of 21,500 tonnes capacity. Grain silos, 72,000 tonnes capacity. Fertiliser storage 59,000 tonnes. Timber terminal 4.36 acres.

Medical: Medical service is available from the nearby town of Pasir Gudang, which is only a short distance from the port. There is a General Hospital situated in Johore Baru to attend to serious cases.

Fresh Water: Fresh water is available through hydrants installed at frequent intervals on the wharves and the breasting island of the oil jetty. Fire fighting hydrants are installed throughout the port area, using separate fresh water, and sea water systems. Fresh water may also be supplied to vessels in the anchorage if required by water barge.

Fuel: Bunkers are available by pipe-line installed along the quay, or alternatively by barges. Bunkering is undertaken by Petronas.

Fire Precautions: The Port Authority maintains a fire and rescue service, with trained firemen responsible for fire fighting on board, and on shore. The brigade is equipped with modern fire fighting appliances, and salvage equipment. Tugs are also equipped with fire fighting equipment, and anti-pollution equipment.

Consuls: Nearest Consuls are situated in Singapore, and arrangements can be made to obtain Visa to proceed to Singapore to carry out ships business.

Hatches: Preferably all opening/closing to be carried out by ship's crew, as the stevedoring labour is inexperienced.

Services: The Malaysia Shipyard & Engineering Co. has an agreement with the Port of Singapore Authority for the use of a slop barge which may be sent to the Johore Anchorage to receive slops from tankers which are proceeding to MSE for repairs. Numerous other services, and local representation for engineering and marine equipment available from Singapore.

SHIPMASTER'S REPORT: April 1979. (Updated 1986).

Position: The port is situated at the Southern tip of the Malaysian peninsula on the East of Johore Straits, about 10 miles East of Johore Bahru town. The straits separating Malaysia and Singapore provides good shelter and safe anchorage.

The exact position is Lat: 1° 26′ 06″ N., Long: 103° 54′ 25″ E.

Approaches: Pilot is picked up at Johore Shoal buoy. Pilots can be contacted on VHF Channels 11, 21 and 63. The access route for vessels proceeding to the port branches via the buoy off Johore Shoal, passes through Kuala Johore and the bend off Serangoon North of Pulare Ubin. From Serangoon the route leads straight N.W. of the port. The East Johore channel has a depth of 38 ft.

Berths: There are at present 10 berths in the port.

Boarding Officials: Since this vessel came from Singapore, all clearances were arranged by the Agent there. The Customs boarded to check the seal on the bond. The Immigration, Port Health, etc. also boarded for a cursory check.

Discharging: Discharging was carried out using grabs which were attached to the ship's cranes. There are no facilities ashore for any type of discharging, except a small conveyor which is used for grain only. The grabs had no weight marked on them, hence it was insisted that the grab along with one full lift of cargo be weighed. This was done and the average weight of the grab was found to be 2 tons and the maximum cargo possible that could be lifted was 2.5 tons.

This port apparently handles a lot of fertiliser, but never in large parcels. This parcel of 6,000 tons was the second largest discharged. 4 cranes were used throughout and the discharge rate worked out to nearly 2,000 tons/day. The stevedores were initially warned against mishandling the cranes, and it was found that the operators handled the cranes very slowly and carefully.

Provisions: Available, but slightly more expensive than Singapore. No bonded stores available at this port.

Density: Varied from 1018 to 1021.

Shore Leave: There is no restriction on shore leave. No special permits/passes are issued, but the Agents suggested that persons going ashore should preferably carry their Passports/Discharge Books. The nearest city is Johore Bahru which is 20 miles away. Ample transport is available at moderate rates. About 4 miles away from the port there is also a village called Masai.

Medical: All types of normal medical attention available.

SHIPMASTER'S REPORT: December 1991.

Charts: B.A. Charts No. 2585 and 2586.

Documents:

8 copies Crew List.
2 copies Stores List.
2 copies Crew Personal Effects List.
2 copies Ports of Call List.
1 copy Maritime Declaration of Health.
1 copy Vaccination List.
1 copy Arms and Ammunition List, or "negative" Declaration.

Pilotage: Pilot boards between Angler Buoy and Johor Buoy from an old and slow cutter painted orange. The pilot comes from Pasir Gudang. Berthing and unberthing take place throughout 24 hours. On departure the pilot leaves at Angler Buoy. Time from Johor Buoy to the Vegetable Oil Berths is about 1.5 hours.

Johor Control can be contacted on VHF Channel 11. Pilot requires 6 hours notice of arrival and 3 hours notice of departure.

Approaches: Tanjong Stapa Lighthouse is conspicuous on the S.E. shore of Johor Strait and Changi Airport control tower (Singapore) is conspicuous on the S.W. shore.

Singapore Strait VTS is in operation on VHF Channel 10 up to Johor Buoy.

Anchorages: Anchorages are as indicated on B.A. Chart No. 2569. Most vessels anchor in the "General Purpose" area to the South of the designated area.

The designated areas for different classes of vessels do not appear to be adhered to. The Southern end is very crowded. The holding ground is fair and in December and January there are sudden rain squalls.

VTS: Johor Control is on VHF Channel 11 throughout 24 hours and answers calls quickly. This station accepts orders for pilots.

A Height Declaration (air draft) must be made before entering Johor Strait, when inbound and outbound, due to Changi Airport flight path over the shipping channel. Aircraft movements have priority and ships with air draft over 60.0 m. may have to wait for clearance.

Channel: Johor Channel is very busy with small craft and shipping going to the shipyards. It is also very busy in Pasir Gudang area. The tidal current runs at 1.5 knots. The normal maximum transit draft is 12.5 m.

Tugs: There are 6 tugs available and tugs lines are used. We used 1 tug forward.

Berths: Berthing and unberthing throughout 24 hours.

There are 4 vegetable oil berths on the jetty to the West of the general berths. The outer berths accept vessels up to 35,000 d.w.t. with draft 11.8 m. There is a new extension of jetty to the West.

The old section to the East consists of a berthing platform 70 m. in length with 2 berths (No. 1 Outer and No. 1 Inner). There are 2 breasting dolphins to the East connected by a catwalk. The platform has a roadway to the shore and a pipe gantry with hydraulic cranes serving both berths.

The Western extension has pipes on the jetty deck. The ship's gear is required for handling hoses.

Vessels berth either side alongside, depending on tide.

Fresh water is available at all berths at a good rate. The waterman ashore supplies the hoses.

Landing of the gangway is difficult at the old section as the stern overhangs and a long brow is required. Alternatively the pilot ladder can be used. There are large rubber fenders which keep the vessel 1.5 m. off the face. Moorings were 3 headlines and 1 spring forward and 3 sternlines and 1 spring aft.

Cargo: There are 10 lines to the jetty with flexible hoses. The old section is served by hydraulic cranes but there are no cranes on the new section so ship's gear is required.

Eight grades of vegetable oil are handled through 6 in. connections. The cargo is pumped from tanks about 0.5 miles away and the rate for each line is 220 t.p.h. We used 1 line for PKO and 2 lines for RBD Olein.

There are numerous terminal staff in attendance to adjust the lines.

Short stoppages are required for line clearing.

General: It is about 2 hours by road over the causeway to Singapore city. The nearest large town is Johor Bahru, which is 12 miles to the West.

Developments: There is an extension underway with a new container terminal to the West and the area to the East of the general cargo berths is also being developed.

AUTHORITY: The Chairman, Johore Port Authority, P.O. Box 66, 81707 Pasir Gudang, Johore, Malaysia. *Tel:* 07-512601-8. *Telex:* MA 60717/60192. *FAX:* 07-512609. *Cables:* Johan Pasirgudang. *Contact:* Operations, Tel. 511766.

AGENT: Pesaka Jardine Shipping Agencies Sdn. Bhd., Container Building, P.O.Box 51, 81707 Pasir Gudang, Johore. Tel: (7) 514312/3. Telex: MA65084. Cables: "Jarship Pasir Gudang". Fax: (7) 514314.

Associated with Jardine Shipping Agencies.

PENANG, Malaya: 05.25 N. 100.21 E. (See Plan)

DOCUMENTS:

The Report of Arrival (provided in Marine Shipping Ordinance, 1952).
A copy of Passenger Statistics on prescribed forms.
A List of Crew Members.
A List of Passengers.
Evidence of last Port Clearance.
All Ship's Documents (Safety Equipment, Derat, Radio, Load Line and Register).
Maritime Declaration of Health.
International Health Certificate for passengers and crew.
Vaccination List, for Cholera, for passengers and crew.
Departures: Port Clearance Certificate signed by the Port Health Officer, to be shown to the Port Officer issuing clearance.
Clearance also required from Immigration.

For oil tankers, a copy of Ship's Manifest to be submitted. Ship carrying explosives, Master required to fill prescribed form "D" stating quantity of explosive cargo ship is carrying together with copy of Ship's Manifest.

PILOTAGE: Vessel approaching port has to send telegram to Pilot Office direct (cable address "Pilots Penang") or to ship's Agent stating "ETA North Channel Light Float" or in case of South Channel "ETA Pulau Rimau". Draft of vessel to be given. The Pilot Office could be contacted direct on VHF Channel 12 or through Penang Radio Exchange on VHF Channel 16 to local telephone No. 613313. At least 3 hours' advance notice should be given before arrival at Pilot point.

Pilot boat painted with International red colour hull with white upperworks with "Pilot" written in bold letters on both sides of boat and fitted with VHF which operates on Channel 12.

Pilot is usually taken onboard in vicinity of the North Channel Light Float in position Lat. 5° 35.9′ N., Long. 100° 12.45′ E. for vessels entering the harbour through the North Channel. For entry through the South Channel the Pilot will be taken onboard in vicinity of Rimau Wreck Buoy 1 mile South of Pulau Rimau Lighthouse.

Vessels awaiting Pilot can anchor, in case of North Channel, in the Pilot waiting area within the following co-ordinates:

1.	Lat. 05° 35.8′ N.	Long. 100° 10.9′ E.
2.	Lat. 05° 34.3′ N.	Long. 100° 10.9′ E.
3.	Lat. 05° 32.7′ N.	Long. 100° 13.0′ E.
4.	Lat. 05° 34.2′ N.	Long. 100° 13.0′ E.

An approach channel of 10 nautical miles × 183 m. wide for 1 line of traffic has been dredged at the North Channel. The available depth of water at the channel is periodically declared to port users. Current depth available is – 9.7 m. A.C.D.

Approach through the South Channel is restricted to vessels of 28 m. air draft - due to existence of the Penang Bridge. Current depth 5.8 m. A.C.D. Must comply to Merchant Shipping Ordinance 1952. Under Penang Port (Navigation within the area of the Bridge) Rules 1986.

Pilotage is compulsory for all vessels navigating in pilot district of Penang with the exception of fishing vessels and vessels of 600 g.r.t. and below.

ANCHORAGES: The Man of War, Petroleum, Quarantine, Explosive and local vessel anchorages are marked on Charts of the Penang Harbour (A.C. No. 3732).

There is no specific anchorage area in the harbour for vessels other than mentioned above. These other vessels are normally anchored South of Lat. 5° 26′ N. and North of Lat. 5° 22.80′ N. between the mainland and the island, clear of the berths, fairways and shallow areas.

RESTRICTIONS: No entry restrictions imposed other than those dictated by state of tide and draft of vessel.

Also see "Pilotage".

RADIO: Penang Radio, call sign 9MG. Channel 16 VHF for ship/shore telephone.

VHF: The Penang Port has various working Channels as follows:

Channel 16 – Watching Channel.
Channel 12 – Pilotage.
Channel 20 – Port Operations/ferries.
Channel 13 – Working Channel between tugs/Pilot.

TUGS: May be required to berth vessels at all berths in the port. 3 tugs available, 2,000 b.h.p., 1,320 b.h.p. and 1,200 b.h.p.

BERTHING: Berthing facilities are available at Butterworth Wharves, Vegetable Oil Tanker Pier, Bulk Cargo Terminal, Prai (all of which are located on the Mainland) and Swettenham Pier on the island of Penang.

Conventional Cargo handled at Butterworth Wharves and Swettenham Pier.

Butterworth Wharves: 4 ocean berths with a total quay length of 549 m. Depth alongside 8.9 m. There are 3 transit sheds of 9,589 sq.m. and 5 storage godowns with an area of 19,788 sq.m. An open-sided timber shed of 4,733 sq.m. and an open storage area of 2,000 sq.m. are also available.

Swettenham Pier: 2 berths with a total quay length of 366 m. Depth alongside 10.0 m. There are 2 transit sheds of 4,464 sq.m. and 5 storage godowns of 10,900 sq.m. This terminal which is equipped with a modern passenger terminal also caters for cruise liners from all over the world.

Also see "Equipment".

BULK HANDLING FACILITIES: *Bulk Cargo Terminal:* A bulk cargo terminal has been constructed to service dry and liquid bulk carriers. The terminal comprises 2 berths of 338.2 m. length and an inner berth of 154 m. length. Private pipelines are used for the handling of liquid cargo. Depth alongside is 10.0 m. The berths are linked to the storage area by a 1,219 m. access bridge. An area of 30.6 hectares forms the back-up for the storage sheds, stockpiling and tank farms.

Vegetable Oil Tanker Pier: A dolphin-type berth used exclusively for the Butterworth Vegetable Oil Installations. Pipe-lines connect the tanks to the berth providing speedy and efficient loading and discharge of vegetable oil, particularly palm oil, direct to and from the vessels. Depth alongside is 8.9 m.

Also see "Equipment".

EQUIPMENT:

Butterworth Wharves:	*No. of Units*	*Capacity*
Prime movers	12	12 tons each
Forklifts	46	3 tons each
Trailers	12	12 tons each
Swettenham Pier:		
Crane (hired)	1	1.5 tonnes
Forklifts (Supplied by private companies).		
Container:		
Gantry cranes	4	35 tons each
Transtainers	12	30-35 tons each
Trailers	90	20-40 tons each
Prime movers	28	20-40 tons each
Front-end loaders	5	25-30.5 tons each
Reach stackers	2	35.6 tons each
Forklifts	16	3 tons each (for CFS operation)
Power points for refrigerated containers	122	
Bulk Cargo:		
Bulk Cargo Terminal		
Kangaroo crane	1	12.5 tons
Payloaders	2	5 tons each

For liquid bulk cargo, pipelines connect the berths to the tanks, located outside the Port area.

CONTAINER HANDLING FACILITIES: The Port has 3 container berths with total quay length of 497 m. Berth No. 6 is equipped with a Ro/Ro ramp of 8 m. wide and 28 m. long to service container and Ro/Ro vessels.

An 15.4 hectare marshalling yard with a static storage capacity for 10,245 TEU of containers, 2 freight stations of 11,892 sq.m. and 122 units of power points for refrigerated containers.

Also see "Equipment".

LIGHTERAGE: In the event of a vessel working in the Roads, lighterage is available for the transport of goods to and from the vessel. There are about 105 lighters operated by private companies.

BRIDGE: Channel width 156 m. Overhead clearance 28 m.

STEVEDORES: Stevedores and cargo handlers are obtainable from registered labour contractors. A Port Labour Board exists to register and control the employment of all categories of port labour.

Working Hours:
The Port operates round the clock. The working hours are as follows:
1st shift 0730 – 1530 hrs. (meal break 1130 – 1230 hrs.)
2nd shift 1530 – 2300 hrs. (meal break 1930 – 2030 hrs.)
3rd shift 2330 – 0730 hrs. (meal break 0330 – 0430 hrs.)

MEDICAL: Advance notice is necessary if medical attention is required so that arrangements can be made with Medical Department by Agents.

TANKERS: See "Fuel".

FRESH WATER: Fresh water is available at all times for supply to ships. Delivery can be through hydrants for vessels alongside wharf or by means of water-boats to vessels anchored in the Roads.

FUEL: Bunkering facilities are available from Shell Malaysia Ltd. and Esso Standard (M) Ltd., at their own wharves at Butterworth with a depth of 8.2 m. and from Caltex Ltd. at its wharves at Prai with alongside depth of 10.7 m.

Limited supply can be obtained by vessels anchored in the roads.

CONSULS: Danish Royal Consulate, Consulate of the Republic of France, Consulate of Germany, Honorary British Representative, Consulate of the Republic of Indonesia, Consulate General of Japan, Consulate of the Netherlands, Royal Norwegian Consulate, Swedish Consulate, Thai Royal Consulate General.

REPAIRS/DRY DOCKS: The Port Commission operates the Bagan Dalam Dockyard on the mainland for minor and urgent repairs of vessels up to 700 tons displacement. All floating craft of the Commission are serviced at the Dockyard.

GANGWAY/DECK WATCHMEN: Services of a watchman recommended.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

REPATRIATION: Facilities exist for effecting crew changes and arranging necessary repatriation.

AIRPORT: Distance from port to airport approximately 18.3 km. Served by both international and local airlines.

TIME: 8 hours ahead of GMT. No alteration to clocks during year.

HOLIDAYS: Port works 365 days a year.

POLICE/AMBULANCE/FIRE: Dial 999.

TELEPHONES: Available on request.

BANKS: Algemene Bank, Nederland NV, Bank Hin Lee Bank Bhd., Bank Bumiputra (M) Bhd., Bank Pusat Kerjasama Bhd., Chung Khiaw Bank Ltd., Citibank NA, Development & Commercial Bank (Ltd.) Bhd., Hong Kong & Shanghai Banking Corp., Lee Wah Bank Ltd., Malayan Banking Bhd., MUI Bank, Overseas-Chinese Banking Corp. Ltd., Overseas Union Bank Ltd., Public Bank Bhd., Southern Bank Bhd., Standard Chartered Bank, United Asian Bank Ltd., United Malayan Banking Corp. Bhd.

SERVICES: Some of the minor marine services provided by private firms are draft survey, general conditioning of ships, valuation of ships, accident survey, inspection of refrigeration, radar adjusting service, compass adjusting and tank cleaning.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Needed only when a crew member is discharged after hospitalisation or when he is repatriated.

REGULATIONS: When a vessel calls at port, Customs search party may go on board vessel to search for contraband goods.

DELAYS: Rain is only factor that may delay a ship's discharging or loading operations.

DEVELOPMENTS:
Major Projects: Construction of North Butterworth Container Terminal – operational by 1994.

Scope of Project:
1. Wharf : 350 m.
2. Depth : −12 m. A.C.D.
3. Approach Bridge : 520 m. × 19 m.
4. Land Area : Land Reclamation – 42 hectares.
5. C.F.S. : 1 Godown × 6,000 sq.m.
6. Equipment : 3 gantry cranes,
8 rubber tyred transfer cranes.
A fleet of trailers and prime movers.

Implementation Programme:
Phase 1: (1990 – 1991).
Dredging and Reclamation – 42 hectares of sea-bed.
Phase 2: (1991 – 1993).
Construction of wharf and bridge.
Phase 3: (1992 – 1993).
Construction of port buildings, marshalling yard and utilities.
Phase 4: (1992 – 1993).
Acquisition of container/cargo handling equipment.

SHIPMASTER'S REPORT: January 1992.
Charts: B.A. Charts No. 1366 and 3732.
Documents:
6 copies Crew List.
2 copies Crew Effects Declaration.
2 copies Stores List.
1 copy Ports of Call List.
1 copy Maritime Declaration of Health.
1 copy Vaccination List.
Cargo Manifest ('nil' declaration if not discharging cargo).

Officials: Immigration required that all foreign crew signing-off must have flights booked before being allowed off the ship. Crew members are not allowed to travel overland to Kuala Lumpur Airport. Travel must be from Penang Airport.

Certified officers must have a relief on board before the Shipping Master will allow them to sign-off. Ship's articles must be presented to the Shipping Master.

Customs officials may visit the vessel at any time after arrival.

Pilotage: The pilot boards from a fast cutter with an orange hull at Buoy No. 1. The pilot departs at Buoy No. 4. The pilot station is located at Swettenham Pier and can be contacted on VHF Channel 12 throughout 24 hours.

A pilot is required when anchoring in the roads.

Anchorage: We anchored with Swettenham Pier bearing 348°×1.25 miles to work cargo from barges. Other vessels were working cargo from barges in the same area. Officially it is prohibited to anchor on the ferry route and pilots report that coasters do not obey this rule.

Approaches: Muka Head Light was not operating at the time of our call. The pilot reports that since its conversion to mains electricity power its operation has been unreliable.

North Channel Light Float is a buoy and is a dim light.

Penang Island was observed at 64 miles on the radar.

Channel: The channel is dredged to 9.7 m. MLWS. At present no maintenance dredging is in progress but this is expected to resume when the new container terminal is completed.

Tugs: Three port authority tugs of moderate power available.

Cargo: Latex is loaded from lighters via 1×4 in. hose, using the air pressure method. There are three lighters with 80 tonnes capacity and one lighter of 40 tonnes capacity which shuttle back and forth to the loading facility at Butterworth. There are small barge tugs to tow the lighters.

The total average loading rate was 80 tonnes/hr. The surveyor boarded at the start and completion of operations. No certificates required.

Airport: Penang Airport is at the South end of the Island. There are frequent flights to Kuala Lumpur.

Developments: There is a new container pier under construction. Infilling is being undertaken by the dredger 'Geopotes'. The position of the container terminal is Lat. 05° 24.9′ N., Long. 100° 21.65′ E.

AUTHORITY: The Penang Port Commission, P.O.Box 143, 10710 Penang, Malaysia. *Tel:* 04-612211. *Telex:* Pelpin Ma 40157. *Cables:* "Wharves Penang". *FAX:* 604-613336. *Contact:* General Manager or Chief Marine Officer.

Associated with Jardine Shipping Agencies.

PORT DICKSON, Malaya: 02.31 N. 101.47 E.

DOCUMENTS:
1. *Harbour Master's Office or Marine Department*
  - *(a)* "Report of Arrival of Vessel" on prescribed Form (Marine 28) obtainable from Harbour Master's Office on arrival.
  - *(b)* One copy, Passenger List, specifying names and nationalities and required to report any casualties, accidents, births or deaths that have occurred during the voyage to the passengers, crew, ship or cargo.
  - *(c)* Port Clearance from last port and copy of Manifest of Cargo to be discharged.
  - *(d)* List of all arms and explosives on board.
  - *(e)* In the case of a British or Malaysian vessel and vessels belonging to a nation not having a Consular Officer at the port, produce to Port Officer the Certificate of Registry and ship's Articles.
  - *(f)* All ship's certificates such as Safety Equipment Certificate, Radio Certificate, Load-line Certificate, Safety Construction Certificate, Ship's Registry, Passengers' Certificate, Derat Certificate and all Certificates of Competency of all Officers on board.
  - *(g)* Crew List.

2. *Immigration Authorities*
  - *(a)* Crew List (3 copies).
  - *(b)* Passenger List (3 copies).
  - *(c)* Produce all passengers passports/visas.
  - *(d)* Produce all Seaman's Cards.
  - *(e)* Forms A and B – "Immigrant and Emigrant" obtainable from Immigration Department on arrival.

3. *Port Health*
  - *(a)* Crew List showing last date of vaccination.
  - *(b)* Passenger List showing the last date of vaccination.
  - *(c)* Produce all seamen and passengers' vaccination cards.

4. *Customs Department*
  - *(a)* Crew List (2 copies).
  - *(b)* Passenger List (2 copies).
  - *(c)* Personnel Effects List (2 copies).
  - *(d)* Cargo Manifests (2 copies).
  - *(e)* Last Port Clearance.
  - *(f)* Bonded Stores List (2 copies).
  - *(g)* Full and correct statement of dutiable goods carried as ship's stores (2 copies).
  - *(h)* Customs Form C.D.15 obtainable from Customs Department on arrival.

APPROACHES: Deep water approach channel from N.W., marked by 5 light buoys, presents no difficulties and is clear.

PILOTAGE: The Port Dickson area does not constitute a Compulsory Pilotage District under provisions of Merchant Shipping Ordinance, 1952. Private pilotage services are, however, operated by Shell and Esso for vessels making use of their respective marine installations. Mooring Master boards tankers at Banbeck Shoal Buoy. Pilots on VHF Channel 19.

Ship's Officer's Report: Pilot boards one mile off Fairway Buoy. However, vessels of less than 30,000 d.w.t. holding Admiralty Chart No. 1140 may be requested to proceed inwards, Pilot boarding at No. 1 Buoy. Coasters proceeding to Headlands Jetties may be required to do own pilotage.

ANCHORAGES: *(a)* Good anchorage may be obtained in depths from 15 to 20 fathoms, Westward and South-Westward of Tanjong Kamunin. Small vessels may obtain anchorage in depths from 4 to 5 fathoms North-Eastward of Pulau Arang Arang, but holding ground is poor.

(b) Prohibited Anchorage Area indicated by pecked lines on chart and described under Port (Negeri Sembilan) (Amendment) Rules, 1963. This area contains a tanker SBM, with extensive ground tackle and floating hose attachments, which is connected to the shore by a submarine pipeline. Passage between the buoy and the shore is also prohibited.

RADIO: *Ship's Officer's Report:* Send ETA 96 hours and 24 hours in advance. Two hours before arrival keep listening watch on Channel 16. Shell Oil Terminal on VHF Channel 16 and 19. Cargo operations are carried out on Channel 9.

TUGS: No tug-boats available.

MAX. SIZE: Up to 49 ft. draft at S.B.M. terminal.

BERTHING: Port installations at Port Dickson comprise the following:

A small boat harbour contained in the curve of the stone approach to the Railway Jetty which affords little shelter against Southerly winds dries out at low water.

The Shell Jetty – property of the Shell Refining Co. (Malaysia) Ltd. (Private). Reinforced concrete jetty 700 ft. with "T" head 170 ft.×36 ft.

The Esso Jetty – property of the Esso Standard Malaya Ltd. (Private). Reinforced concrete island jetty 200 ft.×24 ft.

The Railway Jetty – property of the Malayan Railway Administration. Stone pier 600 ft. length terminating in a crosshead 150 ft. long with steel piling and wooden deck.

The Joint Shell/Esso single-buoy Tanker Mooring and Crude Oil Discharging Terminal (see "Tankers").

Stone ramp on foreshore usable by lighters at high water.

MEDICAL: District hospital with 150 beds.

TANKERS: *Cautionary Advice - Operating Conditions - Esso SBM:* Strong local winds, ("Sumatras"), often occur during darkness and without any advance warning. For this reason, it is essential that arrangements be made during the early part of discharge in order that a sufficient number of tanks are ready to receive ballast as soon as required.

In order to safeguard the SBM installation and the ship, no large crude carrier is permitted to fully discharge without having ballasted to at least 15% of her deadweight. For ships completing discharge and sailing during daylight hours, a 20% minimum deadweight is usually acceptable but all cases are treated on an individual basis, season of year, present weather conditions, tidal stream, etc. being considered.

If during discharge of cargo, stoppage of some hours is advised by the installation, then opportunity should be taken, after joint consultation between ship and shore, to ballast to normal sea ballast condition, to avoid a delay after the cargo discharge is finally completed, assuming that the Master wishes to take ballast additional to his permanent ballast prior to sailing.

Upon arrival, ullages and samples are taken by shore representatives. Prior commencing ballasting, tanks are certified dry by a shore representative. Likewise if ballast is taken on board prior to completion of cargo, tanks should be inspected.

Shore will instruct at what stage of the operation the compartments containing the residues and the load on top or parcels should be discharged.

Vessels moored at the SBM must keep engine ready on short notice. Immobilisation of engine is not permitted. Propeller of turbine engine should be turned at minimum revolutions. This point should be discussed and co-ordinated with the Marine Superintendent since higher revolutions may cause vessel to surge forward and damage SBM, hoses and ropes.

On approach of the "Sumatras" engine should be immediately put on standby. The critical moment is when a vessel lying with the tide is caught by the wind and swung around the buoy. During the swinging-process the vessel may gain great momentum and put the hawsers under heavy strain.

The Marine Superintendent does not remain on board the vessel during the discharge, but may be reached at any time via VHF Channel 9.

A launch remains in attendance at the ship for tending hoses, mooring, etc. In addition to the VHF radio operators, 2 workers, per shift, remain on board.

The terminal requires that a seaman from the vessel is stationed on the forecastle to watch moorings at all times and alert the Master whenever vessel's bow tends to touch the SBM and/or at anytime anything is going wrong with mooring arrangements.

General: The Shell/Esso SBM is located West of the town of Port Dickson. It is used for the crude discharge by Exxon controlled tonnage and by Shell for both crude discharge and fuel oil loading. The SBM is operated by Shell. In addition each company also operates a conventional type of wharf for export cargoes.

Communications: Radio traffic to and from vessels to be directed via Penang Radio. Vessels to monitor Penang Radio or Singapore Radio for traffic list.

Vessels should listen on VHF Channel 16 (alternate 9) 2 hours before arrival. Call sign "Shell Port Dickson".

Arrival Advice: Vessels should include in their arrival message, ETA at Fairway Buoy, draft forward and aft, Bill of Lading figures in barrels and Long Tons, number and location of tanks where slops were consolidated prior to loading and amount of water, residues and cargo loaded on top. Also include measurements of bow openings, cargo manifold and lifting capacity of ship's boom, if problem is foreseen. For crude oil washing request "Essoref PortDickson" well in advance for the COW questionnaire to be completed and cabled back to 'Essoref'.

Preparations: Crude vessels bound to SBM should have their accommodation ladder rigged on the starboard side. Port and Starboard derricks rigged. 2 good mooring ropes should be readily available on the forecastle head to be used as messenger lines. "Panama" centre fairlead to be uncovered.

Navigation: On approaching the Fairway Buoy moored in position Lat. 02° 30′ 00″ N., Long. 101° 42′ 48″ E.; the National Electricity Board Power Station chimneys provide a prominent landmark. The refinery flares also provide landmarks which can be easily identified. It should be borne in mind that the 2 gas flares may be extinguished at times.

Position of NEB Power Station: Lat. 02° 31′ 58″ N., Long. 101° 47′ 30″ E. Painted white horizontal bands and red horizontal fixed lights at top and mid height. Height above sea level 307 ft.

Position of Shell flare: Lat. 02° 32′ 02.3″ N., Long. 101° 48′ 45.3″ E.

The Esso flare is about 1 mile East of the Shell flare.

Fishing boats may be encountered in the approaches to the Fairway Buoy and they may present a navigational hazard.

Anchorages: It is sometimes necessary for vessels to anchor to await berth or suitable tides for berthing. Anchoring position for large crude carriers is 1 mile North of Fairway Buoy. If wait at anchorage is expected to be more than 3 days then vessel to anchor about 1.5 miles East of Fairway Buoy in order not to hamper navigation of other vessels in the Fairway Channel. Masters not familiar with this port should not enter the channel without a Pilot and should drop anchor outside at the Fairway Anchorage.

Product vessels routinely trading Port Dickson normally enter the channel and anchor about 0.5 miles N.E. of Buoy No. 2.

Pilots and Tugs: The Shell Refinery Marine Superintendent will board crude vessels for pilotage and mooring at the anchorages or 1 mile off the Fairway Buoy while underway if vessel is to berth on arrival. Anticipated time of boarding, etc. will be advised by Radio W/T or VHF. The Shell Marine Superintendent monitors VHF Channel 16 (alternate 9) on 24 hours basis. No tugs are available.

Esso/Shell SBM: General: The SBM is moored in position Lat. 02° 31′ 19.6″ N., Long. 101° 47′ 03.5″ E. (Pulau Arang Lighthouse bearing 122° 8 cables distance).

The SBM is moored in 16 fathoms of water and the least depth within a radius of 1,000 ft. from the SBM is 53 ft.

Berth Approach: Vessels from the anchorage proceed towards the SBM through the buoyed channel at the time established by the Marine Superintendent. Vessels up to 30,000 d.w.t. berth at any stage of the tide. Vessels in excess of 30,000 d.w.t. generally moor at SBM during ebb tide when N.W. tidal stream is running. There are no night restrictions for berthing.

Mooring: Vessels are moored to the SBM by means of 2×120 ft.×12 in. nylon ropes with a breaking strength of 125 tons each which are connected to 6 in. wire snotters secured on the ship's bollard. Hawser's chafing chains are, if possible, led through the ship's centre line "Panama" type fairlead. Large crude carriers may connect a third nylon preventer rope.

Mooring/unmooring is done by a shore gang, but assistance of the ship's crew will be required to operate all ship's equipment, winches, etc.

Certain mooring equipment, i.e. shackles, wires, snotters, etc. will be brought on board from the pilot mooring launch.

When the vessel is about 600 ft. from the SBM the mooring launch will run out to the vessel's port bow with one 12 in. nylon rope to which is connected a 10 ft. length of 2.25 in. diameter chain and a monkey face. To this monkey face, the launch will have connected a 500 ft. long 10 in. polypropylene pick-up rope. The tanker then lowers a ship's rope as a messenger from the port bow to the launch, which will connect the ship's rope to the polypropylene pick-up. The tanker will then heave up on the messenger and the pick-up until the monkey face is in-board when it will be shackled to the 6 in. wire snotters already fastened around the ship's bollards. When the launch has made fast the port messenger connection to the ship's rope, she will then run out the second ship's rope to the buoy and connect the second 12 in. buoy assembly line. Whether the third 12 in. nylon preventer should then be connected will be advised by the Marine Superintendent.

There is no night restriction for unberthing but awaiting of flood current is strongly recommended.

Cargo Operations: There are 2×16 in. hoses, each string 700 ft. long supported by flotation beads.

Each string terminates at the ship's end with a keystone valve having a flange of 12 in. ASA (150 psi).

Connecting and disconnecting of hoses is done by shore gang with the assistance of ship's crew and under ship's responsibility. A large crude tanker in empty condition is required to have derricks with safe lifting capacity of 10 tons to take the weight of a full hose. Hoses are fastened to the ship's main deck and are supported by means of chains. Connections from the SBM to the 30 in. diameter submarine pipe-line to the shore is by means of 2×16 in. diameter submarine hoses. Hydraulically shore operated valves are fitted at the connecting points on the sea bed.

The line from the shore to the refineries is 31 in. diameter – about 2 miles long to Shell and 3 miles to Esso.

The shore system has proved capable of handling rates of 5,500 cu.m.p.h. but the governing factor at all times is the Ship's Rail Pressure. Ship's Rail Pressure must never exceed 120 p.s.i. (10 kg./sq.cm.).

Due to the SBM being a jointly owned facility, the system will on occasions contain oil owned by the other party, or another grade of crude oil. It is therefore often necessary for line clearing operations to be carried out before bulk discharge commences. Ship's manifold should remain closed when no cargo is being discharged as there may be static head back pressure of some 30 p.s.i. (2 kg./sq.cm.) once the shore lines are opened.

Line clearing involves the pumping of approximately 1,500 tons of cargo to shore tanks. The exact figure will be advised and controlled by shore; ships are, however, required to keep a close check in order that over clearance be avoided or in case radio contact is lost. Esso Refinery representative will board the vessel when berthed and will advise the quantity and procedures to be followed. Once line clearance has been completed and the necessary tanks lined up, readiness to receive cargo will be advised by shore. Discharge should commence using one pump first when oil is being received by shore, the ship will be advised to increase the pumping rate, until 120 p.s.i. at rail is reached.

Due to refinery operating requirements, it will sometimes be necessary to stop pumping during the change over of shore tanks. Shore will give ship at least 20 minutes notice before the ship is required to stop.

Advice to stop pumping will be confirmed 5 minutes before actual stoppage is required. If at that time, or any other time, radio contact is lost the ship should stop pumping until contact is re-established.

Every hour the quantities received ashore are advised by the refinery control. Ships are asked to check that these figures tally with the amount discharged.

The stripping and draining of cargo tanks should be commenced as soon as possible and every endeavour made to keep ahead of discharge, in order that no delay be incurred by draining. It is also essential that sufficient tanks be drained during the early part of the discharge, as it may at any time be necessary to suspend discharge and commence ballasting due to weather deterioration. This applies particularly to vessels without permanent ballast tanks or vessels whose permanent ballast is less then 20% of deadweight. In Port Dickson, experience has shown that a good trim is required for an efficient and quick draining. This is of particular importance for vessels stripping high vapour pressure crudes.

Two battery operated VHF radios on Channel 9, with an operator on a 6 hour shift, will be placed on board for all ship/shore contact throughout a vessel's stay at the SBM. It is suggested these should be sited in the ship's office or in some convenient room near the centre of operations (Cargo Control Room).

Ship/shore radio checks are to be made every hour, or more frequently if reception conditions are poor and if contact is lost cargo operations should cease immediately. Ship's VHF should be ready at all times to be used in case of failure of the portable sets.

Environmental Conditions: Strong local winds, known as "Sumatras" occur during the period May to October. They blow usually from a southwesterly to a Northwesterly direction, are of short duration (1 to 4 hours average) and velocities of between 40 and 50 knots have been experienced. They are usually followed shortly after onset by very heavy rain.

Direction of the tidal current at the SBM is approximately 326°-146° with a maximum rate of 3 knots. The Northwesterly current (ebb) which normally flows for 6 hours starts 3-4 hours after HW and ends about 3-4 hours before HW. Port Dickson tides are semi-diurnal.

Density of water at the SBM varies between 1018-1023.

Safety, Fire and Protection: General: A Safety and Pollution Check List is used at each terminal and international accepted safety and pollution rules are strictly enforced. Discharge should be stopped immediately and the Marine Superintendent advised promptly in case of pollution incident.

Fire Fighting: In the event of fire on board, cargo operations should be stopped immediately, valves closed and terminal's superintendent advised.

No fire fighting facilities are available. The Marine Superintendent will be available to advise Masters and to assist if feasible in moving the vessel to an anchorage clear of the berth.

In case of breakdown of communications via VHF ships should use their whistle (six long blasts).

Security: No security problems have been reported, and shore leave is permitted.

Services: Fresh Water: Fresh water requirements should be cabled to the Agent prior arrival. It is supplied by a 180 ton steel barge.

Bunkers: All grades of bunkers are available alongside at both Esso and Shell Product Piers. No bunker barges are available to supply crude vessels at SBM or at anchor.

Provisions, Laundry, etc.: Fresh and dry provisions are available through a ship chandler. Limited selection of bonded stores also available. 24 hour laundry service available, if arranged prior to arrival. No deck/engine store available.

Tank Cleaning: There are no tank cleaning facilities. Facilities for receipt of dirty ballast are limited to Esso and Shell product piers.

Crew Change and Repatriation: Available through Kuala Lumpur airport.

Esso Product Jetty: Berth is constructed of reinforced concrete. The island jetty is 200 ft.×24 ft. with 4 off-lying mooring buoys inshore for mooring purposes. Accommodation for one vessel on outer face only.

Max. LOA 575 ft.; max. draft 34 ft.; max. size 19,500 d.w.t.

Shore connections:

1×20 in. black oil/ballasting
1×16 in. white oil line
1×10 in. LPG line
1× 4 in. inert gas line

1 crane to handle hose

FRESH WATER: Available at Shell and Railway jetties.

FUEL: Bunker fuel oil available. No diesel.

REPAIRS/DRY DOCKS: None.

CUSTOMS ALLOWANCES: Tobacco, cigarettes 25 in number per man per day, or cigars 8 in number per man per day, or tobacco 1 oz. per man per day, or snuff 1 oz. per man per day. Wine and/or spirits, spirit 0.175 qt. per man per day, or wines 1 qt. per man per day, or beer or stout 1 qt. per man per day.

AIRPORT: No airport locally.

HOLIDAYS: Official holidays in the state as follows: New Year's Day, 1 day; Chinese New Year's Day, 2 days; Muslim New Year's Day, 2 days; Wesak's Day, 1 day; His Majesty's Birthday, 1 day; Prophet Mohammed's Birthday, 1 day; His Excellency Governor's Birthday, 1 day; Malaysia Day, 1 day; Deepavali, 1 day; Hari Raya Huji, 2 days; Christmas Day, 1 day. No cargo is worked on any of the above gazetted public holidays – port closed.

DEVELOPMENTS: Proposal to enlarge facilities and to provide deep-water berths.

AUTHORITY: See "Malacca".

PORT KLANG, Malaya: 03.00 N. 101.24 E. (See Plan)

PORT LIMITS: *Northern Limits:* A line from Beacon B running N.W. towards Pulau Angsa Lighthouse until it intersects Lat. 3° 07′ 24″ N., thence extending due East along this latitude till it meets the mainland; *Southern Limits:* A line from Tanjung Ru running West along Lat. 2° 50′ 21″ N. till it intersects Long. 101° 14′ 00″ E., thence extending due North along this longitude till it meets Pulau Pintu Gedong;

There shall be included within the limits all waters in the Klang Straits, Selat Lumut, Sungai Puluh, Sungai Aur, Sungai Langat and other waterways contained within the Lat. 3° 07′ 24″ N. and 2° 50′ 21″ N., and Westwards towards the coast from Long. 101° 28′ 30″ E. (which passes through Connaught Bridge): including all piers, jetties, landing places, wharves, quays, docks and other similar works whether within or without the line of high-water mark and any position on the shore or bank within 45.72 m. of the high-water mark, subject to any rights of private property therein.

APPROACHES: Ships from and to Penang enter and leave the port by the North Klang Straits, and ships from and to Singapore enter and leave by the South Klang Straits. The entrance channel at the North Klang Straits is dredged to 11.3 m. below datum. A very large deep water anchorage for ships is available at the North Klang Straits. Ships can also navigate in and out of Port Klang through a secondary channel at the South Klang Straits. At all times the channel is dredged to 10.0 m. below datum.

DOCUMENTS: *(a) For Agent.* Vessels required to fill in arrival report which may be obtained from Agent at Singapore or Penang or Boarding Agent on arrival. This should be completed and handed to Boarding Agent together with last Port Clearance and one copy each of Crew List and Passenger Lists for submission to Marine Department.

Vessels should have ready and hand to Boarding Agent on arrival the following:

Arrival Report.
Last Port Clearance.
Two copies of Crew List.
Two copies each of Disembarking and Transit Passenger Lists (if any).
List of Explosives, dangerous cargo on board.

Following documents should also be handed to Boarding Agent on arrival and will be returned to vessel after perusal by Marine Department:

Malaysian Light Dues Receipt (if any).
Ship's Register.
Radio Safety Certificate.
Safety Equipment Certificate.
Load Line Certificate.
Derat Certificate.

Port Health Officer now requires all vessels arriving from foreign ports to submit an "Entry Declaration" on form Health 43, on the International "Maritime Declaration of Health" form or on a similar copy, and this should be handed to Boarding Agent, together with copy of Crew List, in cases where vessels are not in Quarantine, in which case doctor does not attend on board.

Note: Endorsement of Port Clearance must be obtained from Port Office at Marine Office before a fresh Port Clearance can be issued by local Customs Authorities and handed to vessel before sailing.

(b) Immigration

2 copies Crew List.
2 copies Passenger List (Disembarking and Transit).

(c) Customs

2 copies Customs List (CD.15).
1 Crew List.
1 Passenger List.

FLAGS: The Malaysian flag. Flag "Q" meaning Health Clearance required. *Flag 2/5 meaning no passengers on board, or *flag 3/4 meaning passengers on board. Pennant Zero is not required since Boarding Officers do not board the ship on arrival. Flag "H" meaning Pilot on board. (*Applies only to vessels arriving from foreign ports, which includes Singapore.)

Note: Except for vessels under way, no vessel in port may use its siren except in case of an emergency when no other means of communication is available. The Authorities strictly enforce this rule and vessels infringing it become liable to heavy fine.

Shipmaster's Report: June 1983: Flags 2/5 must be flown by day, or green/green lights shown by night until Immigration clearance has been obtained, otherwise the ship is liable to be fined.

PILOTAGE: Available 24 hours a day. Pilotage compulsory.

(a) Application: Piloting carried out by Klang Port Authority. Masters to cable "Pilots Port Klang" giving ETA and point of arrival, i.e. Pintu Gedong or Pulau Angsa and draft at least 4 hours before arrival, as Pilots will not leave shore until confirmation received from vessel or Agent. Both North and South Channels are well marked and Pilots consider it quite safe to arrive and depart at any hour.

Vessels approaching this port normally apply through Agent, giving ETA Pintu Gedong, Pulau Angsa or Deep Water Point, together with draft and port of departure.

(b) VHF: If vessels wish to communicate direct all pilot boats are fitted with VHF for use between pilot office, pilot boats, pilot boat to pilot boat and where necessary to vessels arriving at this port. Operated on Channel 12 of International Maritime VHF radio telephone bands, and of a range of 20–25 miles.

(c) Recognition: Pilot boats painted orange and have white superstructure.

(d) Boarding. Unless advised otherwise Pilots will be ordered to board vessels at Pulau Angsa (North Channel), or Pintu Gedong South of the Seaward Bar Buoy.

Pilot ladders should be of approved Standard pattern internationally used.

(e) Waiting for Pilot: Location for a vessel awaiting Pilot is at Pintu Gedong 5 cables South of Seaward Bar Buoy, at Pulau Angsa 1 mile East of Pulau Angsa Island, and at Deep Water Point where anchorage is available according to number of vessels already anchored.

ANCHORAGES: Per latest Admiralty charts. Vessels may load timber and ore from privately owned junks at Deep Water Point Anchorage. In exceptional cases and with permission of Port Authority it is also possible to work with Authority Lighters at Deep Water Point.

Special Anchorages: The Port Authority provides an explosives anchorage and a LASH anchorage situated North of Tanjong Bakau in the North Klang Straits. The quarantine anchorage is located North-West of the North Port wharves.

RESTRICTIONS: (See "Max. Size"). At Pintu Gedong, the Southern Channel Pilot Station, there is a restriction which vessels will be advised of when giving their ETA.

MAX. SIZE: Maximum length of vessels using South Port is: Dry cargo vessels, 600 ft. LOA and draft of 32 ft.; tankers, up to 560 ft. LOA and draft 32 ft. Tidal conditions govern movements of all vessels over 300 ft. LOA in the South Port but not at the North Port. At the North extension wharves container ships of 950 ft. can be berthed.

HEALTH: Port Health Officer will board vessels arriving from infected ports, or carrying deck passengers at Deep Water Point at any time of day.

All vessels should include in arrival cables confirmation that all well on board and also that all health papers in order. It should be understood that the health papers referred to include Derat, or Derat Exemption Certificate. Also it is necessary to furnish information on the last 5 ports called within 14 days and the expiry date of Derat Certificate.

RADIO: ETA cables normally routed via Singapore or Penang as no radio station in Port Klang. Such messages when received are transmitted by telephone to Agents/and or Pilots at Port Klang.

TUGS: Supplied by Port Authority and normally "stand-by" vessels berthing at wharves as and when required. Tugs towing use ship's lines, tugs pushing use their own lines. 8 tugs available (800 h.p. – 2,700 h.p.) to assist in berthing and unberthing and are equipped with fire-fighting appliances and radio communications system. When vessels berth or unberth at wharf tugs ordered by Agent in consultation with Pilots and once in attendance are charged for whether used or not. Tugs are also used to swing vessels in stream which are stemming ebb tide on departure.

VHF: (See "Pilotage"). Ship to shore telephones available at all berths at North Klang Straits, and VHF sets available for ships in moorings. Klang Exchange keeps a 24-hour watch on Channel 16 and will connect the vessel to any telephone receiver ashore (Channels 24, 26 and 27). For local calls the cost is $1.92 for three minutes (approx.).

BERTHING: There are 2 ports viz: the South Port and the North Port. Vessels berthing in the South Port are governed by tidal conditions which vary considerably. Vessels over 525 ft. LOA are usually berthed port side to on the ebb and then only when tides are favourable. Night berthing at South Port commenced in July 1992, but a Letter of Indemnity is required from shipping agent before vessels are allowed to berth at night.

(a) South Port: 4 ocean wharves of 2,190 ft. in length out of which 3 wharves are with 33 ft. of water alongside, and 1 wharf with 30 ft. of water alongside. 4 coastal shipping wharves of 1,320 ft. length. Of these, 1 wharf with 20 ft. of water alongside and 3 wharves with 18 ft. of water alongside and 2 anchorage. 3 to 4 vessels of not more than 250 ft. in length and with drafts of up to 18 ft. can be accommodated at the North shore anchorage.

Berth Nos. 1 – 4 are for ocean-going vessels while Berth Nos. 5, 6, 7 and 7A are used principally by coastal vessels with a maximum size of about 6,000 deadweight tonnes. The wharf apron is 15.2 m. (50 ft.) wide and carries 3 rail tracks.

(b) North Port Wharves: There are 17 ocean wharves with a total length of 12,120 ft. Of these, 3 are container berths with 44 ft. of water alongside, 1 Ro/Ro berth with a depth of 36 ft., 4 general cargo berths with 30 ft. of water alongside, 7 general cargo berths with 38 ft. of water alongside, 2 dry bulk berths with 36 ft. of water alongside for bulk carriers of 36,000 d.w.t., and 2 dolphins for tankers up to 60,000 displacement tonnes.

There are 8 container cranes on the container wharves.

Depth of water alongside is 44 ft. 68 acres of stacking area, capacity 10,800 TEU's (excluding 182 reefer points). Freight station measures 600 ft.×120 ft.

Container Handling Equipment: 5 container cranes of 35 tons capacity each.

40 straddle carriers of 30 to 35 tons capacity.
36 tractors.
40 × 20 ft. and 31 × 40 ft. trailers.
58 forklifts with capacity 3 tons – 15 tons.

(d) Berth No. 8, is for Ro/Ro as well as container traffic. The Ro/Ro ramp at the Southern end of the berth is 45 m. (147 ft.) long and 8 m. (27 ft.) wide. The maximum gradient is 1:10 at tides between +0.3 m. (1 ft.) and +5 m. (17 ft.). There are 3 forklifts of 22.5 tonnes capacity specially for Ro/Ro operations, as well as 3 tractors and 3 trailers. The berth can cope with ships of up to 40,000 tonnes and is capable of accommodating vessels with 20 m.to 32 m. beams and 1.0 m. to 4.5 m. freeboards.

DENSITY: Varies considerably with state of tide and heavy monsoon rains.

BULK HANDLING FACILITIES:

South Port: The South Port caters mostly to coastal traffic between Peninsular Malaya and Sabah and Sarawak, as well as the major portion of Port Klang's bulk liquid cargo.

North Port: Located in the North Port are the Container Terminal, Breakbulk Terminal, Dry Bulk Terminal and the Liquid Bulk Terminal.

Container Terminal: This is a privatised terminal, managed and operated by the Klang Container Terminal.

Breakbulk Terminal: Berthing facilities (11 berths totalling 2,209 m.).

Liquid Bulk Terminal: Facilities at the terminal include a tank farm for edible oils and two fuel depots.

Storage Capacity:
Fimaly Bulking Services:
  20 edible oil storage tanks.
  37,000 cu.m., on a common user basis.
  13 tanks for chemicals, 9,900 cu.m.
Petronas (National Oil Corporation):
  3 tanks for aircraft fuel, 8,500 tonnes.
  8 tanks for petrol, fuel oil and diesel, 17,900 tonnes.
BP Malaysia:
  11 tanks for petroleum and related products, 35,879 tonnes.
  1 tank for styrene monomer, 700 tonnes.

Dry Bulk Terminal: This terminal is operated and maintained by a private company appointed by the Port Authority. The terminal is a free trade area to enable shippers to import, consolidate and re-export cargo at low cost.

There are 2 berths of length 426 m. with 11.0 m. of water alongside. Facilities include:

2 grab cranes, maximum lifting capacity 12 tonnes. The cranes have interchangeable grabs, one of 10.3 cu.m. and the other 6.9 cu.m. capacity; conveyor belt, 1,200 mm. wide and can convey between 800 – 1,200 tonnes of material per hour.
3 warehouses, 45,000 sq.m.
Maximum vessel's size, 45,000 tonnes displacement.

STEVEDORES: Working hours throughout the port: 1st shift 0800 to 1600 hrs. (meal break 1200 – 1300 hrs.). 2nd shift 1600 to 2300 hrs. (meal break 2000 – 2100 hrs.). 3rd shift 2400 to 0800 hrs. (meal break 0400 – 0500 hrs.).

MEDICAL: A number of private doctors in Port Klang and it is often not necessary to give any advance notice of medical attention being required. In event of vessel requiring urgent medical attention on arrival, advisable for Master to cable Agent in advance. At present 2nd class medical facilities available in Klang and 1st class facilities only available in Kuala Lumpur. As vessels arriving at Port Klang normally do so after calling at Penang or Singapore no inoculation, vaccination or fever certificates are required unless either Singapore or Penang is declared an infected port.

TANKERS: Tankers always berth port side to on ebb and near slack water. Vessels with bulk liquid cargoes to load or discharge will berth at Wharves 1, 2, or 3. When a number of pumping vessels in port, vessels will usually occupy these wharves only for the time it takes to complete pumping and may then have to shift to stream or another wharf. Three of the ocean wharves are provided with facilities for handling liquid cargo. Liquid cargoes now being handled are: latex, palm, coconut oil, petroleum products, alkane, tallow and fuel oil.

Shell Company has a private jetty on which vessels up to 320 ft. in length with drafts not exceeding 20 ft. can be berthed.

Also see "Bulk Handling Facilities".

FRESH WATER: 3 waterboats of total capacity 750 tons, available to supply vessels in South Port and at Deep Water Point with fresh water. As much notice as possible should be given if waterboat required. At North Port (North Klang Straits) water available from wharf. Pumping rate about 20 – 25 t.p.h.

FUEL: Bunkers are available.

FIRE PRECAUTIONS: In respect of tankers loading or discharging inflammable cargo, necessary to have wharf cordoned off and "No Smoking" signs exhibited prominently. Port Fire Brigade required to be on stand-by at wharf whilst operation in progress. Vessel may not disable engines whilst alongside wharf and shall have axes ready in event has to leave wharf urgently and necessary to cut ship's lines. Port Fire Service on duty 24 hours a day throughout year. Service is capable of fighting all types of fire whether on land or on sea. Fire service has following equipment: 3 fire engines, 1 Land Rover fire engine, 2 trailer pumps, 3 fire fighting tugs, 1 elevated tank in South Port (capacity 200,000 gallons), 2 elevated tanks in North Port (capacity 200,000 gallons), 3 vans at the fire brigade station, 4 ambulances, fresh water hydrants at various points in the Ports.

REPAIRS/DRY DOCKS: There are no major ship repair facilities at the port. The Authority operates 3 slipways for its own crafts.

Slipway No. 1 can accommodate vessels up to 27.4 m. long with a 3.10 m. draft and a displacement of 150 tonnes.

Slipway No. 2 designed for flat bottomed vessels, can cater only for craft up to 23.1 m. length, 2.1 m. draft and with a displacement of 100 tonnes.

Slipway No. 3 can accommodate vessels up to 45.7 m. in length, 4.4 m. draft and with a displacement of 450 tonnes.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CUSTOMS/IMMIGRATION: Customs Officer will board vessel soon after arrival to seal the "Bonded stores". For vessels staying in port some time it is usual to issue 3 days supply – a further issue may be made on request after 3 days.

Immigration Officer will clear vessels arriving from foreign ports on a 24 hour basis. No one may board or leave or approach within one cable length of such vessel without special permission until vessel has been cleared by Immigration Officer and Immigration Signal is hauled down. No Immigration formalities required for vessels arriving from or leaving for other West Malaysian ports (Malacca and Penang).

REPATRIATION: Crew changes and repatriation must be arranged by Agent. Harbour Master attends signing-on and signing-off of the crews on ship's articles.

AIRPORT: Subang International Airport approximately 20 miles from port on main trunk route to Malaysian capital of Kuala Lumpur and served by regular domestic flights and international flights.

HOLIDAYS: Port works 365 days a year.

TELEPHONES: At North Port (North Klang Straits) Wharves telephones installed on board if required. At wharves in South Port there is always a telephone within easy reach at Wharf Office.

VHF radio sets available to vessels at anchor or moored to buoys.

IDENTIFICATION CARDS: Advisable that members of crew carry identification cards when leaving ship.

GENERAL: *(a)* Ship-Shore Communication. When vessels are berthed in stream or at Deep Water Point a 24 hour launch service can be supplied. Arranged by Agent in consultation with Master to suit requirements of ship.

Vessels permitted use own boats with proper navigation lights at night.

(b) Seamen's Club. "Mariner's Club" for officers and seamen outside No. 3 Gate of South Port. Club has swimming pool, bar, restaurant and accommodation.

(c) Diving. Diving services available for salvaging lost cargoes, examining underside of ships, etc. Divers capable of deep-sea diving down to 120 ft.

DEVELOPMENTS: North Port: *Second Container Terminal:* Works are underway for the development of a second container terminal in North Port. Under the first phase of the project, 3 general cargo berths will be converted for container operations. The terminal will be operational by mid-1993.

Free Commercial Area: In line with its role as trade facilitator, KPA has already set in motion plans to create a conducive environment, in which port users can carry out their business with minimal red tape.

The whole of the North Port will be converted into a free commercial area (FCA) to reduce Customs formalities to a minimum, so as to encourage transhipment trade and to develop the port into a regional distribution centre.

A FCA authority is being established.

Distribution Park: A distribution park (Distripark) will also be developed within the FCA. This will be jointly developed by KPA and a private company.

Forty hectares have been earmarked for the initial development of the Distripark. Facilities being considered include coldrooms and a multi-storey warehouse.

The Distripark will offer a wide range of services, including cargo consolidation, grading, packaging, trading and other value-added activities.

West Port: A third port called West Port, will be built on Pulau Lumut, an island off South Port. The new port will be the focus of development for Port Klang well into the 21st Century.

Construction of the facilities will be undertaken in three phases.

Phase I: (Construction to begin in 1992 and completed in 1994).
3 general cargo/container berths.
2 liquid bulk berths.
Phase II:
5 general cargo/container berths.
Phase III:
8 general cargo/container berths.
2 dry bulk berths.
5 multi-purpose berths.

All the berths are 200 m. in length and can accommodate vessels of up to 80,000 displacement tonnes.

Construction works on a bridge linking the mainland to Pulau Lumut, and a two-lane carriageway is now underway.

Situated almost next door to the industrial and commercial heartland of Malaysia, and with a promising cargo generation from the proposed development of a huge industrial park on the island, West Port is poised to be a new growth centre of the country.

SHIPMASTER'S REPORT: May 1986.

The following advices were received from our Agents in Port Klang.

Water Supply to Ships: Owing to lack of facilities presently in the port, the Port Authority is unable to supply fresh water to vessels promptly.

Compulsory Pilotage in Port Klang: We would advise you that pilotage is compulsory throughout the pilotage district of Port Klang.

In order to ensure that the Pilot boards your vessel immediately on your arrival at the Pulau Angsa/Pintu Gedong Pilot Station (North/South Entrance Pilot Station), please cable us and "Pilot Portklang" advising your ETA, deepest draft and vessel's Readiness to Load (if berth required for that purpose) as soon as possible.

Panamanian Vessels: We would advise you that quite a number of Panamanian vessels have experienced extreme difficulties in obtaining Sailing Clearances from the Harbour Master, Port Klang, owing to expiry of Crew Rolls and/or absence of Panama Consul's endorsements on signed on/signed off entries in the Crew Rolls.

To avoid encountering this problem at Port Klang, please ensure that your Crew Roll is valid and in order.

For your information, there is no Panama Consulate in Kuala Lumpur. The nearest one in this region is in Singapore where you can have your Crew Roll validated, if necessary.

SHIPMASTER'S REPORT: December 1991.

Charts: B.A. Charts No. 3453, 2152 and 2153.

Documents:
8 copies Crew List.
2 copies Stores List.
2 copies Crew Personal Effects List.
1 copy Ports of Call List.
1 copy Maritime Declaration of Health.
1 copy Vaccination List.

Officials: Immigration boarded on arrival and Customs authorities boarded 5 hours later. The health authorities never visited the vessel.

All ships statutory documents are taken to Harbour Master's office.

Pilotage: South Boarding Station: Pilot boards in the channel near Tengah Buoy and departs off Makong Point.

North Boarding Station: Pilot boards deep-draft vessels off Angsa Lighthouse and other vessels ay Buoy No. 4. Pilot departs off Buoy No. 6.

The pilot boat for the North Port has an orange hull and pilotage to the North Port from the North or South entrances takes about 1 hour. Pilots require 3 hours notice of arrival.

Berthing is carried out throughout 24 hours at the North and South Ports but vessels may be delayed at the South Port if vessel's length over 100 m.

Pilots available throughout 24 hours on VHF Channel 12.

Approaches: When approaching from the South, the leading marks on Makong Point are conspicuous. The channel is 400 m. wide and vessels up to 10.0 m. draft plus tide may use this entrance. There are strong cross currents in the channel.

When approaching from the North, Pulau Angsa Island has a conspicuous lighthouse. Vessels with a draft of 12.0 m. plus tide may use this entrance when proceeding to the North Port. The maximum draft for proceeding to the Power Station Jetty is 13.0 m.

Anchorages: The Southern anchorage is outside the South Fairway Buoy. The Northern anchorage is North of Batu Penyu Beacon.

The North Port anchorage is as indicated on B.A. Chart No. 2152.

Deep Water Point Reserve Anchorage and Deep Water Point South Anchorage accept vessels up to a maximum of 113 m. LOA and 6.5 m. draft. The Deep Water Point Northern Anchorage accepts vessels up to 200 m. LOA and 10.0 m. draft maximum.

All anchorages experience strong currents.

There is a boat service from the inner anchorages to the South Port.

Tugs: The port authority operate 8 tugs (4×2,000 h.p. and 4×1,000 h.p.). Vessels usually use 2 tugs, except at the Power Station Jetty when large bulk carriers use all the tugs. Ship's lines used.

Berthing: There is 24 hour berthing at both ports. At the North Port vessels berth either side alongside, depending on the tide. At the South Port vessels swing off the town and normally berth starboard side alongside, head out.

All berths are well fendered. The tidal range is 3.0 m. The density of the water on a rising tide at Berth No. 22 was 1020.

Vegetable oil and latex are loaded in the North Port at Berths No. 22 and 23. Fuel oil is discharged at Berth No. 23.

Vegetable oils and latex are loaded in the South Port at Berth No. 2.

Berth No. 22 of the North Port has loading platforms of 35 m. in length with breasting dolphins North and South. The depth alongside at low water was found to be 12.0 m. The vessel lies against the dolphins with the loading face set back about 1.5 m. from the fender line. The dolphins and platform are connected by catwalks. Ship's brow gangway used onto the loading platform. A mooring boat was used to send moorings (3 headlines, 1 forward spring, 1 aft spring and 3 sternlines).

Berths in the South Port are generally for break-bulk cargoes and liquids and berths in the North Port are mainly for container and bulk traffic. The pilot reported that the container berths in the North Port (Berths No. 8, 9 and 10) have a depth of 12.0 m. at L.W.

The Power Station Jetty (Lat. 03° 06.5′ N., Long. 101° 18.7′ E.) handles bulk carriers of 240 m. LOA and 13.0 m. draft. Berthing takes place at slack water and vessels berth starboard side alongside.

Cargo: Vessels load latex at Berths No. 22 and 23 of the North Port. A maximum of 2 hoses were used straight into the tank hatches through flow control valves. The average rate per line was 70 t.p.h., which included short stops to clear the lines of blockages.

Shore personnel tend the hoses. Hoses and flow control valves are rigged quickly by the shore personnel. The whole operation is very efficient. On completion of latex loading it takes about 2 hours before shore tank figures are issued, this is due to tank settling, and figures are only approximate. Vegetable oils are also loaded at Berths No. 22 and 23. Loading is through flexible pipes from the shore manifolds.

On completion of loading latex at the North Port we proceeded to Berth No. 2 of the South Port and loaded palm oil at a rate of 240 t.p.h. through a 5 in. line.

There is a tanker lightening area off Angsa Bank light beacon (Lat. 03° 21.5′ N., Long. 101° 00′ E.).

Fresh Water: Fresh water available at all berths from a shore hose and rate was good (no meter).

Holidays: All public holidays (mainly religious) now being observed in the port will cease in 1992 when the port will operate 365 days.

Developments: Berths No. 20 and 21 of the North Port are being converted for container operation and will have a stacking yard and gantry cranes.

There is a bridge under construction from Beacon No. 15 (Lat. 02° 59.25′ N., Long. 101° 23.85′ E.) to Pulau Lumut Island (Lat. 02° 59.35′ N., Long. 101° 24.45′ E.) which will serve the new tanker jetty at Seconda Point and the container terminal (Lat. 03° 57′ N., Long. 101° 18.3′ E.). Completion is expected 1992/93.

ROMPIN (Kuala Rompin) inc. Pahang, Malaya: 02.43 N. 103.30 E.

DOCUMENTS:

- Register.
- Last Port Clearance.
- 7 copies Crew List and 4 for Agent.
- 5 copies Passenger List (if any).
- 5 copies Stowaway List (if any).
- 2 copies Stores List (including firearms and ammunition).
- 2 copies Dutiable Liquor and Tobacco List.
- 2 copies Crews Declaration List (cameras, radios, etc.).
- 1 copy Vaccination List.

Masters of vessels to fly the necessary following flags on arrival as required under Section 448 of the Merchant Shipping Ordinance and Sub-Section (9) of the Federation Port Rules, 1953.

(1) The Federation of Malaysia Flag.
(2) The Pennant "O" Flag (Request Port Officer).
(3) The "Q" Flag (request Port Health Officer).
(4) The Pennant "2"; "5" Flags if no passengers and "3"; "4" Flags if there are passengers on board (Immigration).

PILOTAGE: Compulsory to the loading berths. Extra charge for pilotage outside normal office hours and holidays.

LOADING. *(a)* Ladders. Masters particularly advised to see that a sound and adequate ladder provided at each lighter to allow labourers engaged in loading to pass to and from ship with no undue risk. Regulations are provided in the Merchant Shipping Ordinance, Section 445, Sub-Section (O) which takes care of this requirement and failure to take adequate precaution in seeing regulation is observed may result in serious consequence to those responsible.

Masters requested to ensure that in addition to ladders for labourers, an extra ladder, preferably a clean pilot ladder, be made available at all times for the Agent for boarding. This ladder should be made fast on lee side, just forward of any scuppers in vicinity, and a heaving line from ship's rail made fast to bottom rung. When ladder not in use, bottom of ladder can be pulled up a few feet with heaving line to prevent labourers from using it or damage from lighters.

(b) Winches. All winches must be in single gear at all times.

(c) Derricks. Practice to work 2 sets of derricks to 1 lighter where practicable.

(d) Trimming. No manual trimming undertaken.

(e) Damages. In the event of your vessel sustaining damage by stevedores during loading, you are requested to inform the clerk and foreman on board immediately and as soon as practicable confirm same in writing to the Eastern Stevedoring Co. Ltd., Kuala Rompin, with copies to Hong Kong & Eastern Shipping Co. Ltd., Hong Kong, and Malay States Shipping Ltd., Kuala Rompin. It is important that full details of damage are given, together with measurements whenever possible.

Minor damage has occurred on vessels due to hatch beams not being bolted or lashed. Masters therefore requested ensure all beams adjoining working parts of hatches either bolted or lashed, otherwise stevedores will repudiate liability for any damage incurred.

ANCHORAGE: On arrival, vessels required to anchor about 1 mile outside berthed ships to obtain pratique. An accommodation ladder must be rigged on lee side to allow Port Authorities to board.

READINESS: Notice of Readiness cannot be accepted until vessel is in Free Pratique, Customs Inward Examination completed, and in all respects ready to load.

OPENING/CLOSING HATCHES: Removal and replacement of hatch beams and covers must be done by ship's crew. Ship's Officers should see that any tween-deck beam removed is replaced before ore reaches that height.

CUSTOMS: Customs office hours 0830 to 1630 Monday to Friday, 0830 to 1300 hrs. Saturday.

HOLIDAYS: New Year's Day; Hari Raya Puasa, 2nd day; Chinese New Year, 2nd day; Hari Raya Haji, 2nd day; First Day of Muharram; Vesak Day; Birthday of Sultan of Pahang; Birthday of H.M. The Yang Di-Pertuan Agong; Birthday of Prophet Muhammad; Malaysia Day; Deepavali; Christmas Day.

Note: Where a holiday falls on a Sunday, the following day will be observed as a holiday, and if such latter day is already a holiday, then the day following shall be a public holiday.

SHORE LEAVE: No seaman may proceed more than 3 miles from Kuala Rompin Customs House. The Officer in Charge Customs, as acting Immigration Officer, has authority to limit or prohibit shore leave in all cases.

IDENTIFICATION CARDS: Every member of crew must produce Identity Document or Shore Leave Pass at Customs House when landing and again when returning to vessel.

GENERAL: *(a) Scrap Iron.* Steel mills in Japan complain from time to time of finding pieces of scrap iron in the iron ore cargoes. If this scrap is not found it will cause serious damage to the plant and occasion considerable delay to production: furthermore, should scrap iron enter the machinery there is always the possibility of it endangering life, and several fatal accidents have been attributed to this cause.

The assistance of officers and crew is requested in reporting any scrap iron they see being loaded, advising shippers into which hold it went and number of the lighter it came from to enable us to take appropriate action.

(b) Whistle, Radio. Wireless Transmitters, Whistles and Sirens etc., must not be used by vessels at anchor off Kuala Rompin.

(c) Stores. Bonded stores can be obtained from Kuala Lumpur and Kuantan at prices roughly same as Singapore. Essential, view Customs formalities, that Masters give Malay States Shipping Ltd., Kuala Rompin 6 days prior notice of requirements.

KUNAK
118.15

7

SABAH (Minor Ports):

KUDAT: 06.53 N. 116.51 E. **(See Plan)**
LAHAD DATU: 05.02 N. 118.20 E. **(See Plan)**
SEMPORNA: 04.29 N. 118.37 E. **(See Plan)**

DOCUMENTS: 8 copies all usual documents, i.e. Crew List, Passenger List, Manifest. Others include Store List, Stowage Plan, Sea Worthiness Certificate and Last Port Clearance Certificate. Where possible, Cargo Manifests and Stowage Plans should be forwarded in advance to local Agents and Port Authority ahead of vessels.

Certificates: Registry, Load Line, Radio, Safety Equipment and Derat Exemption.

PILOTAGE: Applications normally made by Shipping Agents with advance notice of 24 hours prior to actual time that Pilot services required. Pilot boats between 30 ft. – 40 ft. length and equipped with VHF/AM Sets – 80.4 MHz frequency. Pilot station at Port Office (Marine Department) and location for vessel awaiting Pilot is within port limit.

ANCHORAGE: All ports within bays and they provide good safe anchorages.

RESTRICTIONS: No restrictions for vessels entering port at night.

MAX. SIZE: There is no limit on cargo vessels worked at anchorage. Also see "Berthing".

HEALTH: To obtain Pratique, arrange with Shipping Agent. Pratique for vessel entering, after calling at another port in same state, is not required. Anchor in quarantine anchorage if vessel is suspect and display following signals: *By Day:* International Code Signal "QQ". *By Night:* A Red light over a White light and a separate hoist of Red light over a Green light. Hoisted vertically 6 ft. apart where best seen.

RADIO: Singapore Radio recommended.

BERTHING: Application for berthing has to be made within 24 hours prior to actual time that berthing is required.

Details and Requirements: Name of vessel, gross and net tonnage, length overall, draft (fore and aft), ETA at berth, ETD from berth, nature and tonnage of cargo to be discharged/loaded. No priority for berthing ships and the turn is, first come first served.

Kudat: L-shaped wharf with 2 berths. Western berth – length 370 ft. min. depth 21 ft. Eastern berth – length 300 ft., min. depth 21 ft.

Lahad Datu: Outer Berth: Length 320 ft. Depth 36 ft. Max. size 25,000 d.w.t.

Inner Berth: Length 240 m. Depth 30 ft. Max. size 2,000 d.w.t.

Semporna: T-shaped wooden wharf with 2 berths. Outer berth, length 150 ft. min. depth 26 ft. Inner berth, length 127 ft., min. depth 20 ft.

The wharf is operated by the State Government.

STEVEDORES: Arrangement of stevedores should be made with 48 hours' notice to Shipping Agent. Average gang performance is 20 ton-per-gang-hour for conventional traffic (excluding vehicles) and 40 ton-per-gang-hour for pre-palletised cargo (excluding vehicles). Cargo work is carried out in 3 × 4-hour periods namely:–

1st Period 0730 hrs. to 1130 hrs.
2nd Period 1300 hrs. to 1700 hrs.
3rd Period 1800 hrs. to 2200 hrs.

MEDICAL: Arranged on arrival by Shipping Agent.

DENSITY: Average density in the ports 1020.

FRESH WATER: Available at General Cargo Wharves at a rate of 20 t.p.h.

CONSULS: Consulates in Kota Kinabalu:–

United Kingdom
Indonesia
Japan
Denmark

REPAIRS: Marine Department operates engineering workshops at Labuan and Sandakan. Some private firms and workshops also undertake small engine and deck repairs in Kota Kinabalu.

DRY DOCKS: Marine Department has 3 slipways in Labuan which are capable of shipping vessels of 60 tons, 200 tons and 500 tons displacements. One in Sandakan for vessel up to 120 tons.

GANGWAY/DECK WATCHMEN: Not necessary. Agents may advise option.

OPENING/CLOSING HATCHES: Normally by stevedores.

CUSTOMS ALLOWANCES: Tobacco, Wine and/or Spirits: No control and up to discretion of Officers of Customs and Excise.

CARGO GEAR: Ship's gear used also for containers ex-feeder ships and heavy lifts in major ports.

REPATRIATION: Normally arranged by Agents.

AIRPORT: Most airports in State between 4 km. to 10 km. from the town.

TIME: Local time is 8 hours ahead of GMT. No alteration to clocks.

HOLIDAYS: Cargo work can be arranged if necessary during official holidays, but not for Hari Raya Puasa, Chinese New Year and Christmas Day. Also see "Sandakan".

POLICE/AMBULANCE/FIRE:

	Fire/Police	*Hospital*
Kudat	333	335
Lahad Datu	81999	81522
Semporna	SPA 599	SPA 522

SERVICES: Tank cleaning services can be arranged with Agents. Marine Department deals with compass adjustments.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not needed.

DELAYS: Due to weather conditions only.

AUTHORITY: Sabah Ports Authority, Jalan Tun Fuad, Tanjung Lipat, Locked Bag No. 2005, 88617 Kota Kinabalu, Sabah, Malaysia. *Tel:* 088-56155/088-52140. *Telex:* Saport MA80074. *FAX:* 088-223036.

Contact: The General Manager.

Lahad Datu: Sabah Ports Authority, P.O.Box No. 143, 91107 Lahad Datu, Malaysia. *Tel:* 81244, 81610, 81213. *Telex:* MA 83207.

Kudat: Office of the Assistant Traffic Superintendent, Kudat Port Area, P.O.Box 228, 89058 Kudat, Malaysia. *Tel:* 088-61261.

Semporna: See "Tawau".

SANDAKAN, Sabah: 05.50 N. 118.07 E. (See Plan)

FLAGS: Signal letters, Mail flag (if any mail on board for discharge); "Q" flag is essential if Sandakan is the first Sabah port at which a vessel calls. If ship carrying passengers it should fly Immigration Signal Nos. 3 and 4; if no passengers Nos. 2 and 5.

PORT LIMITS: The limits of the port of Sandakan shall be Sandakan Bay bounded by a line drawn in a West-South-West direction from the Northern point of Pulau Berhala to the mainland, and by another from the same point on Pulau Berhala to the most Eastern extremity of Tanjong Aru and thence to the opposite bank at the entrance of Trusan Duyong, including all passages and rivers entering the same for a distance of 600 ft. inland from the mouth of the river.

DOCUMENTS: 5 sets of Inward Manifest in the prescribed form to be airmailed to Agent to arrive at least 48 hours before the vessel.

(a) To be Produced on Arrival:

1 Sabah Lights and Harbour Dues form
2 Manifests in the prescribed form
3 Crew Lists
1 Last Port Clearance
3 Stores Lists
3 Passenger Lists
2 Arms Lists
3 Narcotics Lists
2 Parcels Lists

(b) Required by Agent:

2 sets of Inward Manifests for all inward cargo
5 sets of Transhipment Manifests for all cargo to be transhipped at Sandakan.
2 copies of Hatch List.
1 copy of Passenger List.
1 copy of Crew List.
1 copy of List of Arms and Ammunition.
1 copy Narcotics List.
1 copy Stores List.

(c) To be Supplied to Ship before Departure: Manifests, as required by vessels, Master's copy of Bills of Lading, Port Clearance and Customs Clearance, Sabah Lights and Harbour Dues form.

(d) Immigration: Immigration Officer will board vessel on arrival and clear her inward. No restrictions on crew and/or passengers going ashore. Immigration require 2 copies of Crew List and 2 copies of Passenger List. Vessels cleared inward until 1800 hrs. only. If there are special circumstances arrangements can be made to clear vessels inward after this time.

(e) Marine Department: Shipping Arrival Report to be signed by Master of Vessel.

Certificates: Registry, Load Line, Radio, Safety Equipment and Derat Exemption.

PILOTAGE: Pilotage not compulsory but if required the Harbour Master acts as Pilot. Private pilots available by air from Kota Kinabalu. At least 24 hours' notice should be given and position where Pilot is required to embark (i.e. the bar buoy or within harbour limits) should be included in the message.

ANCHORAGES: For loading timber: A black and white conical buoy situated 1.2 miles S.W. from Government Wharf indicates the anchorage. It is important that vessels should anchor as close to this buoy as possible, when anchored further from shore it may take up to an hour longer for launches towing rafts of timber to reach ship and in addition there is less shelter from wind and weather and consequently raftsmen have to cease work earlier.

For discharging: Unless it is intended to come alongside the wharf, vessels discharging should anchor 4 cables due South of wharf. Wharf is 750 ft. long with dolphins placed 100 ft. from each end giving a total length of 950 ft. If discharging into lighters and loading log timber simultaneously vessels should proceed to Timber Anchorage.

RESTRICTIONS: *(a)* Shifting: Vessels may not berth alongside after dark without special permission but they may leave the wharf, having given prior notice.

(b) Special Cargo Regulations: No vessel with dangerous cargo may be alongside after sunset, except at discretion of Harbour Master. No dangerous cargo may be discharged simultaneously with general cargo except with permission of Harbour Master. Livestock: subject to approval of Veterinary Authority. Certain animals, including cattle, are prohibited imports and exports except under licence.

MAX. SIZE: 10,000 d.w.t. Draft restriction is 24 ft. on the Bar plus the height of tide, mean high water being about 6 ft.

HEALTH: (Also see "Radio" and "Regulations"). If Sandakan is first port of entry into Sabah a vessel must proceed to quarantine anchorage until cleared by Health and Immigration Officials.

The Sabah Government are signatories to the WHO convention on quarantine regulations. If vessel comes from outside State of Sabah then Port Health Authority will require to board in quarantine anchorage before vessel can proceed to wharf or timber anchorage. If, however, vessel is not coming from an infected port Pratique may be granted providing vessel cables Agent prior arrival advising last port of call and whether vessel healthy. Pratique normally cabled to ship but if unreceived, vessel must proceed to quarantine anchorage.

Port Health Authority require completed copy of Maritime Declaration of Health, and copies of Crew, Passenger and Narcotics Lists.

RADIO: Singapore Radio recommended.

(Information required before ship's arrival.) ETA, number of passengers, health situation, Manifest, amount of water required. Vessels not allowed to use their radio in port.

VHF: Marine signal station keeps watch on VHF Channel 16, from 0530 to 2000 hrs.

TUGS: A tug of 636 h.p. stationed at Sandakan.

BERTHING: (Also see "Anchorages").

(a) Mooring: The numbers of a vessel which is berthing alongside will be shown from signal station on Eastern end of Customs House. In addition, a cone indicating tidal stream will be hoisted pointed end of cone down indicates flood tide and pointed end up indicates ebb tide. Linesmen are on hand to receive a vessel's lines, a mooring boat will be provided by Marine Department if it is necessary to send lines to dolphins. Old Government Wharf, least depth 19 ft.

(b) Buoys: No mooring buoys.

(c) Lighters: No lighter fleet. The timber companies have their own lighters and scows which can sometimes be hired if not being used by these companies.

Rectangular Island Wharf: The particulars of the berths are as follows:

Berth No.	*Length* (m.)	*Depth* (m.)
1	213	9.45
2	122	6.4 – 9.4
3	76.2	6.1
4	164	7.8 – 9.4

The berths were dredged in 1989.

The berths are constructed to receive containers.

Covered Storage:

(a) One transit shed 90,000 sq.ft. at new port site.

(b) New godown at new port – 52,520 sq.ft.

Equipment: New equipment only listed below:

(a) 9 towing tractors.

(b) 27 forklifts 3-6 tonnes capacity and 1×25 ton and 1×19 ton capacity for container handling.

(c) 14×5 ton trailers and 4×20 ton trailers for container handling.

CARGO: (a) Tally: Tally clerks supplied by Agent if required. Sawn timber tallied on to scows by timber companies' clerks and tallied into ship by ship's tally clerks. Ship responsible for total number of pieces of timber shown on Mate's receipts. Letters of Credit do not allow the clause: "A quantity said to be" to be inserted on the B/Lading. Log timber tallied into ship by checking against specifications supplied by timber companies.

(b) Inward Cargo: Is tallied out of ship on to wharf or into lighter. Local watchmen can be supplied by Agent if necesary but it is generally found to be more satisfactory if these duties are carried out by crew. Damaged cargo is surveyed on the spot, otherwise no liability of vessel is acknowledged. Discharge carried out after permission has been obtained from Customs after manifest of inward cargo has been deposited. Cargo is delivered to consignees against production of relative Bill of Lading. Ship's responsibility to consignees ceases at ship's side but, in the case of short-landed cargo, reasonable proof must be given to Customs that cargo has not been landed. A short-handed Memo certified by Chief Officer is usually accepted as proof.

(c) Heavy Lifts: Usually landed overside on flat-top scows for delivery to private jetties, where they are man-handled to required site. Occasionally consignees provide low-loaders.

(d) Transhipment Cargo: After discharge of cargo from first carrier, transhipment cargo placed under supervision to Ports Authority, unless it is possible to arrange direct transhipment into small coastal vessels.

(e) Outward Cargo: Main export is log timber and is towed out to loading vessels in rafts, each one accompanied by 2 raftsmen. Loading is on a single swinging derrick with gun tackle; the other derrick being used for pulling the logs into position in the holds. Vessels should have, if possible, 2 snatch blocks available at each hatch where log timber is being loaded. Sawn timber loaded in normal manner from scows and lighters. Documents required are shipping order issued by Agent and list of specifications supplied by timber companies. Other exports are rubber, copra, coconuts, palm oil, jungle and sea produce.

(f) Refrigerated cargo: Only small quantities of refrigerated cargo loaded or discharged. No formalities or certificates being required other than compliance with Customs and Agriculture Department Regulations. Inward fridge cargo is confined to foodstuffs, meat, etc., and outward to frozen prawns. 1×65 amp and 3×30 amp reefer points available.

(g) Explosives: Explosives must be discharged into lighters under police escort and transported to an approved police store. A licence for their importation must be obtained from police prior to arrival of cargo, and Harbour and Police authorities must be informed of arrival of explosives in port either for discharge or as through cargo.

(h) Damaged Cargo: Direct delivery/cargo surveyed at shipside. Cargo discharged into godowns surveyed jointly between Port Authority and ship's representative in damaged cargo lockers.

STEVEDORES: Stevedoring in hands of Port Authority who supply gangs as required.

(a) Working hours, 0730 – 1130, 1300 – 1700 and 1800 – 2200. Gangs ordered at least 12 hours before a vessel arrives.

(b) Overtime. When working in stream, overtime usually from 1100 to 1200 and 1800 to 2200 hrs. Application for permission to work overtime must be made to Customs not later than 1500 hrs. on the afternoon that overtime is to be worked or 1100 hrs. on Saturday for weekend overtime.

(c) Working Sundays and holidays. Work is normally carried out Sundays and it is sometimes possible to arrange for work on some public holidays. Application must be made to Customs for permission to work Saturday afternoons, Sundays and public holidays.

See "Holidays".

(d) Rate. Log loading is good, comparing more than favourably with other Borneo ports. Rate of loading about 800 cu. ft. hoppus (20 B/L tons) per gang hour for logs, and 6 B/L tons per gang hour for sawn timber. Discharging general cargo about 20 tons per gang hour. Palletised cargoes about 40 tons per gang hour.

MEDICAL: *(a)* Hospitals: Duchess of Kent Hospital will receive sick seamen or officers. Three classes of wards, also isolation wing. Hospital equipped to carry out normal surgery.

(b) Inoculation: PHO will vaccinate or inoculate crew members at Duchess of Kent Hospital.

(c) Death on Board: PHO and Police to be informed immediately. They will then make an investigation into cause of death. If satisfied that death was due to natural causes, a certificate will be issued, and arrangements may then be made for interning the body. Harbour Master must also be informed in the case of seamen.

TANKERS: Two bulk oil installations at Karimunting (Pavitt Point). Esso, with storage capacity of 2,080 tons and Shell, with storage capacity 15,730 tons.

Shell Jetty extends 550 ft. from shore, is 128 ft. long with mooring dolphins 125 ft. from each end. Min. depth alongside 24 ft.

S.P.A. Oil berth, 1,000 ft. length between dolphins, with central discharging pier (73.2 m.). Least depth alongside 31 ft. This berth also used for loading palm oil in bulk. Max. size 30,000 d.w.t.

FRESH WATER: Can normally be supplied from wharf at rate of 20 t.p.h. Private water boat available on request. Occasionally water is not available and, at such times, Agent warns Principals in advance.

FUEL: Lubricants can be obtained in drums and bulk diesoline available at Shell/Esso jetty. Approval must be obtained first from Customs Department and Ministry of Trade and Industry before loading.

FIRE PRECAUTIONS: No fire-floats and in case of a vessel alongside, fire brigade should be summoned by dialling 999. The OCPD should be informed also.

CONSULS: At Kota Kinabalu.

REPAIRS: Marine Department operates engineering workshops at Sandakan.

DRY DOCKS: One in Sandakan for vessels up to 120 tons.

A Government-owned shipyard/dry dock known as Sabah Building, Repairing and Engineering Sdn. Bhd. exists in Labuan to undertake full repairs services has been established for ocean-going vessels.

WATCHMEN: No regulations regarding use of watchmen, who, however, can be supplied if required. There have been only very isolated reports of pilferage in Sandakan.

OPENING/CLOSING HATCHES: Normally by stevedores.

CUSTOMS ALLOWANCES: Tobacco, wine and/or spirits: No control, up to discretion of Officer of Customs and Excise.

CARGO GEAR: Ship's gear used, also for containers ex-feeder ships and heavy lifts in major ports.

REPATRIATION: Normally arranged by Agents.

AIRPORT: Some airports in State are between 4 km. to 10 km. from town centre.

TIME: Local time is 8 hours ahead of GMT. No alterations to clocks.

HOLIDAYS:

Closure of SPA Ports
During Sabah State Public Holidays – 1990:

All ports under the jurisdiction of the Authority shall be closed completely during the following public holidays:–

(a)	New Year	Monday	1st January
(b)	Chinese New Year	Saturday	27th February
(c)	Good Friday	Friday	13th April
(d)	Hari Raya Puasa * (2 days)	Thursday & Friday	26th & 27th April
(e)	Labour Day	Tuesday	1st May
(f)	Harvest Festival	Wednesday	30th May
(g)	Hari Raya Haji *	Tuesday	3rd July
(h)	Birthday of Sabah Head of State	Sunday	16th September
(i)	Christmas Day	Tuesday	25th December

* Subject to alteration.

The ports will however remain open during other public holidays.

POLICE/AMBULANCE/FIRE: Ambulance: Duchess of Kent Hospital, tel. 2111; Police/Fire: Police Station Emergency, tel. 999.

TELEPHONES: Available.

SERVICES: Tank cleaning services can be arranged with Agents. Marine Department deals with compass adjustments.

IDENTIFICATION CARDS: Not required.

DELAYS: Due to weather conditions only.

REGULATIONS: 1. Arrival and Departure. The Owner or Agent of every vessel other than a small ship intending to call at a port shall, as soon as possible, and in any case not later than 36 hours prior to the estimated time of arrival of the vessel, give notice in writing by filling in Form "A" – "Notice of Arrival" to the Authority of such arrival and, if so desired, the requirement for a berth at a wharf.

2. The notice under this regulation shall be in a form prescribed by the Authority and shall contain full particulars regarding the cargo to be discharged and loaded, the embarkation and disembarkation of passengers, heavy lifts, special or perishable cargo, hazardous and dangerous goods (whether to be discharged at the port or not), and any other matters of importance relating to the working or safety of the vessel in the port.

3. The Master of every vessel entering or leaving a port between sunrise and sunset shall cause to be hoisted the national colours and the signal letters, if any, of the vessel. The national colours shall be exhibited from 0800 hrs. to sunset whilst the vessel remains in port.

4. The Master of every vessel arriving from outside the State of Sabah shall exhibit the Immigration and Quarantine signals contained in the First Schedule and shall also at the request of a customs officer hoist the Customs signals. Such signals shall remain exhibited until the appropriate officer has given permission for them to be lowered.

5. No vessel shall approach within 600 ft. of any other vessel exhibiting the Immigration, Health or Customs signals.

6. No person other than a Pilot may board or disembark from any vessel until the vessel is cleared inwards and the Immigration, Quarantine and Customs signals have been lowered.

7. Every vessel entering a port shall be anchored or efficiently secured to a wharf or buoy before commencing the loading or discharging of cargo and/or the embarkation or disembarkation of passengers.

8. No vessel shall leave any port unless in possession of a valid Port Clearance issued by or on behalf of the Director of Marine.

9. Special signals.

Significance	*By Day*	*By Night*
Immigration (for ships not carrying passengers)	International Code Signal "2 5"	Two green lights, 6 ft. apart, hoisted vertically where best seen.
Immigration (for ships carrying passengers)	International Code Signal "3 4"	Two green lights, 6 ft. apart, hoisted vertically where best seen.
Quarantine (vessel is Healthy request Pratique)	International Code Signal "Q"	Nil
Quarantine (vessel is suspect)	International Code Signal "Q Q"	A red light over a white light and a separate hoist of red light over a green light and hoisted vertically 6 ft. apart where best seen.
Quarantine (vessel is infected)	International Code Signal "Q L"	
Quarantine (not received Pratique)	Nil	A red light over a white light 6 ft. apart hoisted vertically where best seen.
Request Police Assistance	International Code Signal "S T"	A green over a white light, 6 ft. apart hoisted vertically where best seen.
Request Medical Assistance	International Code Signal "W"	A red light over a green light, 6 ft. apart, hoisted vertically where best seen.

GENERAL: *(a) Surveyors:* Harrisons & Crosfield (Sabah), Sdn. Bhd. are Lloyd's Agents, neither Bureau Veritas nor the American Bureau of Shipping are represented.

(b) Fumigation: No facilities.

(c) Ship Chandlers: All kinds of stores and provisions can be supplied at reasonable prices.

(d) Call Signals and Call Flags: (i) Continuous watch kept by signal station during day-light hours. In emergency such as serious injury or fire a ship should hoist appropriate International Code signal and blow whistle or siren to attract attention. Apart from these circumstances and for purposes of navigation vessels are prohibited from using sound signals for any other reason.

(ii) Signals for attracting Public Service Launch: By day: International Code Pendant No. 8. By night: Three red lights vertical. Owing distance of anchorage from jetty these signals often indistinguishable by hire launches unless they are cruising in the harbour. Regular launch services can be arranged if required by Master. No restrictions against a vessel using its own launch or motor lifeboat but it must not land anywhere other than at Customs wharf.

(e) Recreation Facilities: Three cinemas in town which show English-language films. Cricket, football, and hockey matches can be arranged with local teams and several tennis courts available. Only suitable swimming beaches at Berhala Island at mouth of harbour. Yacht Club and Golf Club for members only, but several Shipping Companies pay Corporate Membership fee which enables all officers and first-class passengers to use club. Recreation Club offers facilities for large variety of sports and entertainment; visitors must be accompanied by a member. Churches in town for Anglican, Catholic, Seventh Day Adventist and Lutheran worship.

AUTHORITY: Sabah Ports Authority, Pejabat Pengurus Pelabuhan, Peti Surat 1368, 90008 Sandakan, Sabah, East Malaysia. *Tel:* Sandakan (089) 612411-8 (PABX), 612751 (Direct line). *Telex:* MA 82013. *Cables:* Saports. *FAX:* (089) 612975. *Contact:* Francis Lee Fah Hin, Port Manager.

AGENT: Pesaka Jardine Shipping Agencies Sdn. Bhd., Room 902, 9th. Floor, Wisma Khoo Siak Chiew, Jalan Buli Sim Sim, 90000 Sandakan, Sabah, Malaysia. Tel: (089) 213448/271362. Telex: MA 82887 Jarship. Cable: Jarship Sandakan.

SARAWAK COASTAL PORTS

Coastal anchorages at Sibuti, Niah and Suai, 28, 30 and 47 miles S.W. of Miri respectively are being used increasingly for the export of round logs, good holding ground is to be found approximately 3.5 miles offshore in 30 ft. of water. Caution should be observed in the event of sudden wind squalls from the West.

Vessels destined for coastal ports should report to Miri for Customs and Immigration Clearance.

Every vessel arriving in quarantine shall fly or show the appropriate International Quarantine signal; and no person other than a Pilot, Port Officer, Port Health Officer, Immigration Officer or Officer of Customs shall board the vessel; and no person shall disembark therefrom until the vessel has been cleared by the Port Health Officer.

The Master of every vessel of over 15 tons about to depart from a port for any place outside Sarawak shall cause the "Blue Peter" (International code Flag "P") to be hoisted, during day-light hours, for at least 12 hours before the vessel is due to sail, or if the vessel is in port for less than 12 hours, for the period of her stay in the port.

(1) The Master or the Agent of every vessel about to depart from a port shall, on demand by the Port Officer, produce for inspection the port clearance.

(2) The Port Clearance shall be in the form of an endorsement on the form of clearance prescribed under the Customs Ordinance or in such other form as may be approved by the Director.

A vessel arriving in, leaving from or shifting berth within a port shall hoist her signal letters, if any, whilst under way.

AUTHORITY: Kuching Port Authority, P.O.Box 530, 93710 Kuching, Sarawak. *Tel:* (082) 482144. *Telex:* MA 70420-Kuport. *FAX:* (082) 481696. *Cables:* Kuport Kuching. *Contact:* General Manager.

SEJINGKAT (Sungei Sarawak), Sarawak: 01.35 N. 110.26 E.

Anchorage off Kampong Sejingkat approximately 14 miles from mouth of river and 3 miles below Pending Point. (See "Kuching".)

Main timber loading point for the First Division of Sarawak. Loading used to be seasonal due to log rafts having to be towed from felling areas along coast. Since this is not possible during North-east monsoon season shippers now stockpile during favourable weather and loading continues throughout monsoon period.

Vessels up to 580 ft. length and 25 ft. draft regularly use anchorage. No facilities for obtaining fuel. Fresh water obtainable through Marine Department.

Pilots may be picked up off Tanjong Po in the area marked "Pilots" on Admiralty Chart 1822 or at Sejingkat. In rough weather it may be necessary for a ship to follow or meet the pilot launch at the junction of Embang and Senari leads. Pilots for the Batang Lupar, Triso or Lingga Anchorages are also normally embarked off Tanjong Po by arrangement.

Every vessel arriving in quarantine shall fly or show the appropriate International Quarantine signal; and no person other than a Pilot, Port Officer, Port Health Officer, Immigration Officer or Officer of Customs shall board the vessel; and no person shall disembark therefrom until the vessel has been cleared by the Port Health Officer.

The Master of every vessel of over 15 tons about to depart from a port for any place outside Sarawak shall cause the "Blue Peter" (International Code Flag "P") to be hoisted, during daylight hours, for at least 12 hours before the vessel is due to sail, or if the vessel is in port for less than 12 hours, for the period of her stay in the port.

(1) The Master or the Agent of every vessel about to depart from a port shall, on demand by the Port Officer, produce for inspection the port clearance.

(2) The port clearance shall be in the form of an endorsement on the form of clearance prescribed under the Customs Ordinance or in such other form as may be approved by the Director.

A vessel arriving in, leaving from or shifting berth within a port shall hoist her signal letters, if any, whilst under way.

AUTHORITY: Kuching Port Authority, P.O. Box 530, 93710 Kuching, Sarawak, Malaysia. *Tel:* 082-482144. *Telex:* MA 70420-Kuport. *FAX:* 082-481696, 334776 *Cables:* Kuport Kuching. *Contact:* General Manager.

SIBU, Sarawak (incl. Bintangor, Sarikei and Sungei Merah): 02.24 N. 111.56 E. (See Plan)

Sibu is the capital of the Third Division of Sarawak. There are 2 navigable routes *(a)* via Paloh River and *(b)* via Rajang River and a third entrance from the North i.e. via Igan River, is uncharted. Sibu is 61 miles from the sea via Paloh, and 70 miles via Rajang.

APPROACHES:

(a) Paloh Channel: The bar was resurveyed in 1975 and shoaling was reported in 1981 to depths of 2.7 m. below chart datum at the middle of the Fairway and Inner Buoys. Masters of ships are advised to consult their tide tables before entering. The buoys are fitted with radar reflectors and the Fairway Buoy is visible for a distance of 10 miles. A conspicuous wreck in position Lat. 2° 28′ N., Long. 111° 14.6′ E. has 2 posts above chart datum, serves as a good approach to the Kuala Paloh entrance, and Tanjong Sedi which is on the North bank of the river is marked by a light beacon.

Vessels using this entrance are restricted to a maximum length of 130 m. and drafts of 5.5 m. during the S.W. Monsoon and 4.5 m. during the N.E. Monsoon. During the N.E. Monsoon periods, vessels of 5.5 m. have entered the Paloh Channel but entrance depends on the state of the sea.

When crossing the Kuala Paloh Channel, strong currents and swell (especially during the N.E. Monsoon period) are liable to be encountered thus necessitating caution.

An Inner Bar with at least depth of 3.7 m. exists where the Paloh joins the Seredang at Tanjong Gelang. This crossing is marked by unlit transits and is sheltered.

(b) Rajang Entrances: Vessels intending to use the Rajang River to Sibu are restricted to 60 m. in length and 4 m. in draft as after Tg. Manis deepwater anchorage, the river is winding, narrow and shallow. The depth of the bar is 5.8 m. below chart datum. 2 wrecks in position Lat. 2° 07.6′ N., Long. 111° 7.25′ E. and another in position Lat. 2° 8.7′ N., Long. 111° 14.2′ E. are marked by starboard hand buoys. There is a bar situated about 3 miles below Sarikei with at least depth of 3.9 m. below chart datum.

From Sarikei to Bintangor the river is winding with some shallow patches. Lebaan Corner which is 15 miles below Sibu has a charted depth of 2.2 m.

There is an obstruction off Tanjong Ensurai approximately 6.25 miles upriver from Lebaan with a depth of 4.6 m. Caution should also be exercised when rounding Tanjong Binjei due to 3 shoals across the river, one of which has at least depth of 3 m.

Vessels using this route to Sibu are advised to navigate with caution as tugs towing barges and logs of 100 m. or more are often encountered.

DOCUMENTS: Port Clearance to be surrendered to Customs when boarding.

Crew Lists and Passenger Lists, 2 copies for Immigration Department, 2 copies for Rajang Port Authority, 2 copies for Customs, 1 copy for Port Health Officer and 1 copy for Port Officer.

List of ship's stores (2 copies for Customs).

List of ammunition (2 copies for Customs).

Health Documents (Vaccination certificates and Cholera Inoculation Certificates to be examined by Health Inspector).

PILOTAGE: Pilots are provided by the Marine Department for Sibu and Sarikei for the Paloh and Rajang entrances respectively. Movements of vessels are restricted to daylight hours only. The Pilots use 5 m. fibreglass speedboats which are fitted with VHF.

(a) Kuala Paloh. The Pilots embarked off Tanjong Sedi, at position Lat. 2° 25.5′ N., Long. 111° 18′ E. and application for Pilots should be made giving at least 24 hours notice of arrival to "Shipping" Sibu.

(b) Pilots for Sarikei, Bintangor and Sibu via this river normally embarked in buoyed channel West of Jerijeh Lighthouse but it may be necessary for a ship to follow the pilot speedboat to sheltered waters inside turning buoy. Application for Pilots should be made giving at least 24 hours notice of arrival to "Shipping" Sarikei.

ANCHORAGES: *(a)* Sibu Anchorage. Some foreign-going vessels load, with Customs permission, at the mid-stream anchorage.

(b) Restricted Anchorages.

(i) The Anchorage defined by a line running 045° 2.6 cables from position: Lat. 02° 16.89′ N., Long. 111° 49.28′ E. on Pulau Kerto, thence 135° 8 cables to position; Lat. 02° 16.5′ N., Long. 111° 50.4′ E. thence 225° 1.9 cables to shore on Pulau Kerto. For loading and discharging dangerous goods other than petroleum.

(ii) The berth alongside the Sungei Merah Wharf in position approximately 2 miles downstream from the junction of the Rajang/Igan River on the true right bank. For loading and discharging petroleum.

MAX. SIZE: Largest vessel to berth Sibu was 7,372 gross tons and overall length 137 m.

Deepest drafted vessel to berth Sibu was 7.1 m.

Also see "Approaches".

HEALTH: Every vessel arriving in quarantine shall fly or show the appropriate International Quarantine signal; and no person other than a Pilot, Port Officer, Port Health Officer, Immigration Officer or Officer of Customs shall board the vessel; and no person shall disembark therefrom until the vessel has been cleared by the Port Health Officer.

BERTHING:

(a) Principal wharves at Sibu.

1. Rajang Port Authority Wharf 450 m. long with minimum depth of 6.1 m.
2. Sungei Merah Oil Wharf is a 48.8 m. concrete wharf with at least depth of 4.9 m.

(b) Sarikei Wharf.

Rajang Port Authority Wharf 60.4 m. with at least depth of 7.6 m.

(c) Bintagor Wharf.

Rajang Port Authority Wharf 48.8 m. with at least depth of 4.6 m.

STEVEDORES: The Rajang Port Authority provide all labour necessary for loading and discharging at Sibu, Sarikei and Bintangor.

REPAIRS: Sibu is one of the major shipbuilding and repair ports in Sarawak and there are 8 shipyards with slipways of which one of them can accommodate vessels up to 2,000 gross tons.

GARBAGE DISPOSAL: All domestic disposals from vessels, if deposited and properly packed within the port are collected by the Sibu Municipal Council at the rate paid by the Port Authority.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: No seaman's clubs are available, but Sibu town centre provides all the usual facilities.

CURRENCY: Malaysian Ringgit (MYR$). U.S.$ 1.00 = MYR$ 2.6230 (12.2.92).

REGULATIONS: The Merchant Shipping (Ports and Rivers) Regulations, 1961:–

8. The Master of every vessel of over 15 tons about to depart from a port for any place outside Sarawak shall cause the "Blue Peter" (International Code Flag "P") to be hoisted, during day-light hours, for at least 12 hours before the vessel is due to sail, or if the vessel is in port for less than 12 hours, for the period of her stay in the port.

9. (i) The Master or the Agent of every vessel about to depart from a port shall, on demand by the Port Officer, produce for inspection the Port Clearance.

(ii) The Port Clearance shall be in the form as prescribed under the Customs Ordinance or in such other form as may be approved by the Director.

10. A vessel arriving in, leaving from or shifting berth within a port shall hoist her signal letters, if any, whilst under way.

50. No oil, oily bilge water or substance containing oil of any description shall be discharged or allowed to escape from any vessel or allowed to run off any wharf, into any river or port.

GENERAL: Small quantities of diesel oil bunkers available, also provisions and fresh water. Principal exports rubber, pepper, timber and sago.

AUTHORITY: Rajang Port Authority, 96000 Sibu, Sarawak, Malaysia. *Tel:* (084) 319004-9. *Telex:* LPR MA 72121. *FAX:* (084) 318754. *Cables:* Raport Sibu. *Contact:* Mohidin Hj. Seman, General Manager.

Marine Department, Sibu, Sarawak. *Tel:* 332754, 332752. *Cables:* "Shipping" Sibu.

AGENT: Pesaka Jardine Shipping Agencies Sdn. Bhd., Room 505, 5th. Floor, Grand Merdin Building, 131 Jalan Kampong Nyabor, 96000 Sibu, Sarawak, East Malaysia. Tel: (084) 332673/332668. Telex: MA72194. Fax: (084) 318689. Cables: "Jarship Sibu".

Associated with Jardine Shipping Agencies.

SIPITANG, Sabah: 05.03 N. 115.31 E.

SHIPMASTER'S REPORT: February 1987.

LOCATION: A new jetty called the "SFI Jetty" has been built for vessels up to about 15,000 tons deadweight at Sipitang in Brunei Bay. Approximate position of jetty is Lat. 05° 02.7′ N., Long. 115° 30.65′ E.

DOCUMENTS: Before proceeding to Sipitang we called at Labuan Quarantine Anchorage to meet Authorities (Customs, Quarantine and Immigration Officers) after which vessel proceeded to Sipitang Anchorage. A pilot was not supplied for above manoeuvring.

APPROACHES: The light which should be in position Lat. 05° 03.65′ N., Long. 115° 30.1′ E. was not in position.

ANCHORAGE: When anchoring at Sipitang, vessels should not proceed nearer than 2.5 miles to 3.0 miles off the jetty as there are fishing stakes in the vicinity and 2 obstructions located at Lat. 05° 02.4′ N., Long. 115° 29.35′ E. and Lat. 05° 03.3′ N., Long. 115° 29.4′ E.

RESTRICTIONS: Great care should be taken when crossing Brunei Bay at night as there are many unlit laid-up tankers and small fishing boats in the area.

TUGS: One tug available.

BERTHING: When going alongside the tug makes fast aft. The starboard anchor was dropped to stop the bow and vessel berthed port side alongside.

Vessel Particulars:

Length	172.0 m.	
Breadth	25.9 m.	
G.R.T.	16,703	
Arrival Draft	Forward	28 ft. 00 in.
	Aft	31 ft. 00 in.

Cargo Discharged: Wood Pulp from West Coast U.S.A./Canada.

GENERAL: There are no banks or chandlers at Sipitang.

We obtained fresh fish and vegetables at the local market and rice, flour, sugar, eggs, cooking oil, etc., at a local store called Rocky Liam.

TANJONG MANIS, Sarawak: 02.09 N. 111.21 E.

APPROACHES: Rajang River entrance has at least depth of 5.8 m. below chart datum. The entrance is well lit by two lighthouses and one light beacon and the bar is marked by two light buoys.

There is a wreck situated at Lat. 2° 7.6′ N., Long. 111° 7.25′ E. which is approximately 8 cables S.E.×E. of the inner Fairway Buoy marked by a starboard hand buoy and about 7 miles further inwards South-West of Kampong Rajang another wreck at Lat. 2° 8.7′ N., Long. 111° 14.12′ E. which is also marked by a starboard hand buoy.

PILOTAGE: Pilots embarked, weather permitting in the buoyed channel West of Jerijeh Lighthouse but occasionally the Pilot will request ships to proceed into sheltered waters as they use 5 m. fibre-glass speedboats, fitted with VHF.

Application for Pilot should be made giving 24 hours notice of arrival to "Shipping Sarikei" and Masters can call "Rajang Pilot" before arrival.

ANCHORAGE: *Tanjong Manis Anchorage:* This is a deepwater anchorage 20 miles from the Fairway Buoy, used by vessels loading timber. The anchorage can accommodate approximately 3 vessels of 183 m. and 12 vessels of 120 m. – 150 m. in length.

Restricted Anchorage: Abeam of Loba Selemit on the North bank of the Rajang river in position Lat. 2° 08′ N., Long. 111° 16′ 35″ E. is restricted to loading and discharging any dangerous goods.

MAX. SIZE: The maximum length of a vessel permitted is 183 m. and max. draft 8.4 m.

AUTHORITY: Rajang Port Authority, 96000 Sibu, Sarawak, Malaysia. *Tel:* (084) 319004-9 (6 lines). *Telex:* LPR MA 72121. *FAX:* (084) 318754. *Cables:* Raport Sibu. *Contact:* Mr. Mohidin Hj. Seman, General Manager.

Marine Department, Sibu, Sarawak. *Tel:* 332754/332752. *Cables:* "Shipping" Sibu.

TAWAU, Sabah: 04.14 N. 117.52 E. (See Plan)

PORT LIMITS: The Port of Tawau shall comprise the waters of Cowie Bay and Wallace Bay and rivers entering same contained within the following limits:

A line from Lat. 4° 13.3′ N., Long. 118° 00.0′ E. to the National boundary mark on the Eastern shore of Sebatik Island, thence to the National boundary mark on the Western shore of the said island, thence in a 270°(T) direction to the shores at Burs Point, thence in a 311°(T) direction to Lat. 4° 20.0′ N., Long. 117° 25.9′ E. thence in a 070°(T) direction to Lat. 4° 25.0′ N., Long. 117° 40.0′ E., thence in a 120°(T) direction to the point of commencement.

DOCUMENTS:

(a) To be Produced on Arrival:

Customs

2 Manifests in prescribed form.
2 Crew Lists.
1 Last Customs Clearance.
2 Stores Lists.
2 Passenger Lists.
2 Arms Lists.
2 copies Through Cargo Manifest.
2 copies Crew Personal Effects List.
2 copies Parcels List.
2 copies Narcotic & Dangerous Drugs List.
2 copies Customs Clearance (Last Port).
1 copy Ship's Arrival Report.
2 copies General Information or Vessel's Particulars.

Marine

1 Marine Dept. Boarding Report, required to be completed.
1 Last Port Clearance.
1 Crew List.
1 Passenger List.

Agent

4 (2 for SPA) Manifests in the prescribed form.
1 Crew List.
1 Passenger List.

Immigration

2 Crew Lists.
2 Passenger Lists.

Travel Control Office

2 each, Crew Lists and Passenger Lists.

(b) To be Supplied to Ship before Departure:

Manifests, as required by vessel.
1 Port Clearance and 1 Customs Clearance.
3 copies of Passenger List.

(c) To be supplied by ship prior to arrival:

Where possible, cargo manifests and stowage plans should be forwarded in advance to local Agents and Port Authority ahead of vessels.

Certificates: Registry, Load Line, Radio, Safety Equipment and Derat Exemption.

PILOTAGE: Not compulsory. A Pilot is available from 0600 to 1800 hrs. for berthing vessels given reasonable notice (48 hours). Marine Department Tel: 73510.

Applications normally made by Shipping Agents with advance notice of 24 hours prior to actual time that Pilot Services are required. Pilot boats are between 30 ft. – 40 ft. length and equipped with VHF/AM sets – 80.4 Mc/s. frequency. Pilot station at Port Office (Marine Department) and location for vessel awaiting Pilot is within Port Limits.

ANCHORAGES: Good anchorage in 8 fathoms 1,000 yd. to 1,300 yd. W.N.W. of wharf; and 350 yd. South there is an anchorage in 8.5 fathoms.

Petroleum Anchorage: An area bounded by parallels of Lat. 04° 15′ N. and Lat. 04° 16′ N. and meridians of Long. 117° 51′ E. and Long. 117° 52′ E. This area is to be marked "Petroleum Anchorage".

Explosives Anchorage: An area bounded by parallels of Lat. 04° 12′ N. and Lat. 04° 13′ N. and meridians of Long. 117° 52′ E. and Long. 117° 53′ E. This area is to be marked "Explosives Anchorage".

Quarantine Anchorage: An area bounded by parallels of Lat. 04° 12.5′ N. and Lat. 04° 13.5′ N. and meridians of Long. 117° 54′ E. and Long. 117° 55′ E. This area is to be marked "Quarantine Anchorage".

RESTRICTIONS: *(a)* Communication ship/shore when lying on Roads: Regular launch services difficult to arrange if required by Master. No recognised signals for summoning a launch, as distance between small boat jetty and anchorage is too great for flag signals to be recognised. No restrictions against a vessel using its own launch or motor life-boat apart from fact that it must not land anywhere other than at Ports Authority Wharf.

(b) Explosives: No vessel carrying explosives shall come within 500 yards of shore or any other vessel except with written permission of Port Manager which will be given provided that:

(i) quantity does not exceed 2,000 lb. of explosives of Class V and VI and are carried in a certified magazine, and there is no other dangerous cargo on board as certified in writing by the Master.
(ii) quantity does not exceed 3,000 lb. and are exclusively of one of the following classes III, IV or VII.

Danger flag must be flown by day and a red light by night.

HEALTH: *(a)* Quarantine: The Sabah Government are signatories to WHO convention on Quarantine regulations. Port Health Doctor will not board, unless vessel comes from an infected port. Instead Maritime Declaration of Health is to be filled out and handed to Boarding Officer of Marine Department, who will require one copy of Crew List and one copy of Passenger List. Vessels should cable Agent prior arrival advising last port of call and whether vessel healthy.

(b) Immigration: Immigration officer will board vessel on arrival and clear her inwards. No restrictions on crew and/or passengers going ashore. Immigration will require 2 copies of Crew List and 2 copies of Passenger List. Vessels are cleared inward until 1800 hours only. If there are special circumstances arrangements can be made to clear vessels inward after this time.

RADIO: Singapore Radio recommended.

Application for berthing has to be made 24 hours prior to actual time when berthing is required.

Details and requirements:

Name of vessel, gross and nett tonnage, length overall, draft (fore and aft) ETA at berth, ETD from berth, nature and tonnage of cargo to be discharged/loaded, number of gangs required, quantity of fresh water required. Vessels given berth on first come, first served basis.

VHF: A Maritime VHF radio telephone service now operates in the Port of Tawau on Hague Plan Channels 16 and 12.

Continuous listening watch is kept on Channel 16 and the station is operative between the hours of 0600 and 2000 daily.

Vessels are requested to make use of the above facility for notifying ETA, pilotage requirements, etc. Berth availability will be notified on vessel's call.

TUGS: No tugs available.

BERTHING: *(a)* Wharf Light at Tawau in position on N.W. end of Old Wharf, Lat. 04° 14′ 32″ N., Long. 117° 52′ 56″ E.

(b) Tides/Linesmen. The numbers of a vessel which is berthing alongside will be flown from signal station. In addition a cone, indicating tidal stream will be hoisted, pointed end of cone down indicates flood tide and pointed end up indicates ebb tide. Linesmen are on hand to receive a vessel's lines; a motor boat can be hired to assist in berthing if prior advice is given.

(c) Old Wharf. Berths No. 1 and 2: Consists of a 220 ft. long approach causeway extending from a reclamation area and a 650 ft. long wharf, 40 ft. wide with a dolphin in line +100 ft. off each end.

New Wharf. Berths No. 3, 4, 5 and 6: Located 400 ft. North West of Old Wharf. 3 berths on the outer side (No. 3, 4 and 5) with a total length 1,000 ft. 1 berth on inner side (No. 6) with a length of 500 ft.

Berth No.	*Depth* (m.)
1	6.09
2	6.09
3	6.5
4	7.5
5	9.14
6	5.0

(d) Monsoon. During strong wind from S.E. and S.W. ships are liable to range alongside wharf, and during S.W. monsoon sea breeze may make it difficult for ships to leave wharf in the afternoon.

(e) Buoys: No mooring buoys in Tawau.

(f) Lighters: No lighters available except a few wooden and steel lighters owned by Bombay Burmah Trading Corpn. Ltd. and Borneo Abaca Limited. Hire of these lighters can be arranged when they are not being used by owners, which is seldom.

Also see "Developments".

CARGO HANDLING FACILITIES: 41 Fork-lift trucks 3-6 tonnes capacity; 19 Towing tractors; 51 Trailers 5-7 tonnes.

Container Facilities: 2 forklifts, 25 tonne and 19 tonne. 6 Trailers, 20 tonnes. 3 towing tractors.

CARGO: *(a)* Special Cargo Regulations: No vessel with dangerous cargo may be alongside after sunset except at discretion of Port Manager. No dangerous cargo may be discharged simultaneously with general cargo except with permission of Port Manager.

Heavy lifts usually handled at new wharf only. Customs bonded store is available with about 4,000 sq. ft. of space including Customs Liquor and tobacco store. There are no private bonded warehouses to date. There are no facilities for handling or storing bulk cargoes in any quantity.

Livestock: Subject to approval of Veterinary Authority, certain animals including cattle are prohibited imports and exports except under licence.

(b) Damage. Ship's survey should be carried out on all cargo discharged in a damaged condition and Chief Officer should note extent of damage, and sign, certifying same. Cargo coming alongside in a damaged condition should be noted and M/R claused accordingly. Chief Officers are reminded that it is most unwise to load any copra which is rain or salt water damaged.

(c) Tally: Tally clerks can be supplied by Agent if required, on receiving advance notice.

(d) Inward. Inward cargo is tallied out of ship onto wharf or into lighter. Damaged cargo surveyed on the spot, otherwise no liability of the vessel is acknowledged. Discharge carried out after permission has been obtained from Customs after manifest of inward cargo has been deposited. Cargo delivered to consignees against production of relative Bill of Lading. Ship's responsibility to consignees ceases at ship's side, but, in the case of short-landed cargo, reasonable proof must be given to Customs that cargo has not been landed. A short-landed Memo certified by Chief Officer is usually accepted as proof.

(e) Transhipment. After discharge of cargo from first carrier, transhipment cargo is placed under the supervision of the Customs, unless it is possible to arrange direct transhipment into small coastal vessel.

(f) Outward. When vessels berth alongside, packages are brought by motor transport and lighters; when in roads, by lighters.

(g) Refrigerator. Only small quantities of refrigerated cargo loaded or discharged. No formalities or certificates being required other than compliance with normal Customs Regulations. Inward refrigerated cargo is confined to foodstuffs, meat, etc., and outward to frozen fish.

(h) Explosives. Explosives must be discharged into lighters or immediately on arrival onto wharf under police escort and transported to an approved police store. A licence for their importation must be obtained from police prior arrival of cargo, and Harbour and Police authorities must be informed of arrival of explosives in port either for discharge, or as through cargo.

STEVEDORES: *(a)* Stevedoring in the hands of Sabah Ports Authority who will supply gangs as required.

(b) Working hours 0730 – 1130 hrs., 1300 – 1700 hrs., 1800 – 2200 hrs.

(c) Overtime: Overtime working hours are from 1800 to 2200 hrs. Application must be made to Customs 1 day in advance; double rate charged.

(d) Sundays and holidays: Work normally carried out on Sundays and holidays (See "Sandakan"). Application must be made to Customs for permission to work Saturday afternoons, Sundays and public holidays.

(e) Handling Rate: (Net).

Conventional Vessel : 25 t.p.h./gang
Palletised Vessel : 50 t.p.h./gang
Container Vessel : 150 t.p.h./gang

MEDICAL: *(a)* Hospitals. Government General Hospital is only hospital in town, and will receive any sick seamen or officers. 3 classes of wards, but first class ward can only accommodate 2 persons. Hospital is equipped to carry out normal surgery.

(b) Inoculation. Port Health Officer will vaccinate or inoculate Crew members at General hospital.

(c) Port Health Officer. General Hospital, General Office 73533, 72191. Medical Officer-in-Charge 71206. M.O.'s Residence 72239.

TANKERS: Shell Jetty: Least depth 14 ft.

S.P.A. Oil Jetty: Length 76.3 m. Depth alongside 9.75 m. The jetty is about 2.4 km. from the general cargo berths.

Also see "Shipmaster's Report".

DENSITY: 1020 (approx.).

FRESH WATER: Can only be supplied at wharf. 24 hours' notice should be given of a vessel's water requirements. Usual rate of supply is about 15 t.p.h. A water barge is available but no guarantee of availability.

FUEL: Not available except diesoline in drums.

FIRE PRECAUTIONS: No fire floats and in the case of a vessel alongside catching fire, the fire brigade should be summoned by dialling 2999. The OCPD should also be informed.

CONSULS: At Kota Kinabalu.

REPAIRS: No facilities.

GANGWAY/DECK WATCHMEN: Not necessary. Agents may exercise option.

OPENING/CLOSING HATCHES: Normally by Stevedores.

CUSTOMS ALLOWANCES: Tobacco, wine and/or spirits: No control, up to discretion of Officer of Customs and Excise.

CARGO GEAR: Ships gear used, also for containers ex-feeder ships and heavy lifts in major ports.

REPATRIATION: Normally arranged by Agents.

AIRPORT: Some airports in State are between 4 km. to 10 km. from town centre.

TIME: Local time is 8 hours ahead of GMT. No alteration to clocks.

HOLIDAYS: See "Sandakan".

POLICE/AMBULANCE/FIRE: *(a)* Police/Fire, Tel. 089-73111; Ambulance/Hospital, Tel. 089-73533.

(b) Accidents: Hoist a two-flag signal and give a blast of the whistle to call attention of signal station. Police and the hospital should be informed immediately of any untoward incident.

TELEPHONES: Available.

SERVICES: Tank cleaning services can be arranged with Agents. Marine Department deals with compass adjustments.

IDENTIFICATION CARDS: Not required.

REGULATIONS: *(a)* Arrival and Departure. The Owner or Agent of every vessel other than a small ship intending to call at a port shall, as soon as possible, and in any case not later than 36 hours prior to the estimated time of arrival of the vessel, give notice in writing to the Authority of such arrival and, if so desired, the requirement for a berth at a wharf.

2. The notice under this regulation shall be in a form prescribed by the Authority and shall contain full particulars regarding the cargo to be discharged and loaded, the embarkation and disembarkation of passengers, heavy lifts, special or perishable cargo, hazardous and dangerous goods (whether to be discharged at the port or not), and any other matters of importance relating to the working or safety of the vessel in the port.

3. The Master of every vessel entering or leaving a port between sunrise and sunset shall cause to be hoisted the national colours and the signal letters, if any, of the vessel. The national colours shall be exhibited from 0800 hrs. to sunset whilst the vessel remains in port.

4. The Master of every vessel arriving from outside the State of Sabah shall exhibit the Immigration and Quarantine signals contained in the First Schedule and shall also at the request of a Customs Officer hoist the Customs signals. Such signals shall remain exhibited until the appropriate officer has given permission for them to be lowered.

5. No vessel shall approach within 600 ft. of any other vessel exhibiting the Immigration, Health or Customs signals.

6. No person other than a Pilot may board or disembark from any vessel until the vessel is cleared inwards and the Immigration, Quarantine and Customs signals have been lowered.

7. Every vessel entering a port shall be anchored or efficiently secured to a wharf or buoy before commencing the loading or discharging of cargo and/or the embarkation or disembarkation of passengers.

8. No vessel shall leave any port unless in possession of a valid Port Clearance issued by or on behalf of the Director of Marine.

(b) Special signals:

Significance	*By Day*	*By Night*
Immigration (for ships not carrying passengers)	International code Signal "2 5"	Two green lights, 6 ft. apart hoisted vertically where best seen.
Immigration (for ships carrying passengers)	International Code Signal "3 4"	Two green lights, 6 ft. apart hoisted vertically where best seen.
Quarantine (vessel is Healthy request Pratique)	International Code Signal "Q"	Nil
Quarantine (vessel is suspect)	International Code Signal "Q Q"	A red light over a white light and a separate hoist of red light over a green light and hoisted vertically 6 ft. apart where best seen.
Quarantine (vessel is infected)	International Code Signal "Q L"	
Quarantine (not received Pratique)	Nil	A red light over a white light 6 ft. apart hoisted vertically where best seen.
Request Police Assistance	International Code Signal "S T"	A green light over a white light, 6 ft. apart hoisted verticaliy where best seen.
Request Medical Assistance	International Code Signal "W"	A red light over a green light, 6 ft. apart, hoisted vertically where best seen.

DELAYS: Due to weather conditions only.

GENERAL: *(a) Surveyors:* Harrisons & Crosfield (Sabah) Ltd., as Lloyd's sub-Agents, may appoint a Surveyor if a survey is requested.

(b) Fumigation: No facilities.

(c) Ship Chandlers: Fresh vegetables obtainable in limited quantities early every morning from vegetable market.

(d) Priority: Vessels are berthed on a "First come first served" basis. Vessels with 75% inward palletised cargo get priority.

(e) Watchmen: These can be supplied if required.

SHIPMASTER'S REPORT: 1976.
Government Oil Wharf:
Position: Lat. 04° 15.5′ N., Long. 117° 50′ E. 2 miles N.W. of Main Cargo Pier.

Least depth in channel from sea to berth — 30 ft. Vessels to be ballasted to 1/3rd deadweight. Density, 1025. Vessel docks daylight only, undocks anytime at any stage of tide. Anchorage 0.5 mile S.W. of jetty. 5 lengths of ship's hose required. Manifold, 10 in. Length of shoreline 3,000 ft. All products handled. Shore booster pump cannot be used. No steam.

Pilot boards at Quarantine Anchorage. 48 hours notice required. No tugs available. Accommodation ladder required for Quarantine but not at berth.

Fresh water available ex-barge. Other services available: Fresh provisions, repairs, Machine Shop, Airport, Lloyd's Surveyor, Telex, Doctor, Hospital, Laundry, Groceries and Meats. No slop tanks.

AUTHORITY: Sabah Ports Authority, Peti Surat 335, 91007 Tawau, Sabah, Malaysia. *Tel:* (089) 773700, 772852. *Telex:* MA 83127. *FAX:* (089) 761808. *Contact:* Thomas Soon Min On, Port Manager.

NOTES

Republic of Maldives

MALE: 04.10 N. 73.31 E.

RADIO: ETA to be sent to Maldives Ports Authority 24 hours prior to arrival.

Coastal Radio, Department of Posts and Telecommunication
Call sign: 802
Tel. No.: 325557
Telex: 66069 MALRAD

VHF: Channel 12 used to contact Maldives Ports Authority.
CRANES: Coles and Mitsubishi cranes are used, all are shore cranes with a maximum capacity of 25 tons. All vessels anchored at outer harbour should use their own gear.

At present there are 11 lighters available from 75 tons – 150 tons.
STEVEDORES: Ships arriving at Male Commercial Harbour have an average ship turnaround of 3.9 days. Total port hours amount to 45 hours. Gang start work at 0730 hrs. and stop work at 2230 hrs. 15 lighters are available to work on ships, including forklifts that could work in hatches.
MEDICAL: No advance notice required, except in case of serious illness which is to be included in arrival cable.
FRESH WATER: Fresh water is scarce and no longer available in sufficient quantity and quality to supply ships. Ship's Masters are strongly advised to take on more than adequate quantities before sailing into Maldives. Water rationing, on the inbound voyage and during stay until departure, is strongly recommended. Bottled mineral water is available at about U.S.$ 1.25 per 1.5 litres.
FUEL: Fuel should be ordered through the Agent, delivery could be undertaken by the Maldives Ports Authority.
CONSULS:
Bangladesh
Germany
India
Pakistan
Sri Lanka
U.S.A.
HATCHES: Opening and closing of hatches will be undertaken by ship's crew.
AIRPORT: Distance to airport 0.75 km., served by many international airlines.
POLICE/AMBULANCE/FIRE: Police 111; Ambulance 102; Fire 101.
EMERGENCY CO-ORDINATION CENTRE: Male Coastal Radio, Department of Posts & Telecommunication.

VHF	Channel 16
R/T	821 kHz 1221 kHz
W/T	8363.6 kHz
R/T Distress & normal calling	2182 kHz Simplex
Distress & Supplementary calling	6215.5 kHz, 4125 kHz
Range	3,000 km.

BANKS: State Bank of India, Habib Bank Ltd., Bank of Ceylon, Bank of Maldives.
GARBAGE DISPOSAL: Not available.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: Maldivian Rufiyaa (MLD.RF.). U.S.$ 1.00 = MLD.RF. 9.90 (27.4.91).

SHIPMASTER'S REPORT: May 1982 (Updated 1986).
Approaches: Except in very heavy rain during the S.W. monsoon, the visibility is good and landfall can be made easily. The T.V. Tower, South of Male in position: Lat. 04° 10.2′ N., Long. 73° 30.9′ E. is visible at a distance of 30 miles. The dome of the Islamic Centre in position: Lat. 04° 10.7′ N., Long. 73° 30.85′ E. and the minaret of Grand Mosque (Islamic Centre) in position: Lat. 04° 10.69′ N., Long. 73° 30.83′ E. are also visible for approaching vessels.

Recommended entrance to Male is via East Male Passage. As many small fishing, passenger/pleasure vessels are crossing the passage, approaching vessels should be very careful and proceed at slow speed if necessary. Beacons mentioned below are still non-existent, therefore night approach should be avoided.

As there are a number of fishing vessels and other small vessels anchored at Male anchorage, Masters of vessels anchoring should give special care while approaching the anchorage.

The Northern route via Kaduoigiri Passage as described in the Sailing Directions was taken. Apart from a very strong Westerly set near the reef N.W. of Kaduoigiri Island no particulars were observed.

Beacons in the following positions non-existent:
A. Lat. 04° 11.75′ N., Long. 73° 31.05′ E. (West of Dunidu Island).
B. Lat. 04° 12.37′ N., Long. 73° 30.43′ E.
(Reef between Dunidu & Ferdo).
C. Lat. 04° 13.45′ N., Long. 73° 31.54′ E. (Vehamanafushi).

Mooring Buoy (private) in position: 04° 11.45′ N., 73° 30.97′ E. non-existent.
Navigation Warning: Unmanned/unlighted fishing vessel (approximately 60 tons gross) anchored in position: 04° 11.2′ N., 73° 30.55′ E.
Documents: Papers Required: Security: 1 Crew List (search party, search all cabins for weapons/pornographic material).

Doctor: Port Health Form (Male Issue), Vaccination List (Cholera Vaccinations).

Immigration: 2 Crew Lists (all passports checked).

Customs: Last Port Clearance, 1 Crew List, Cargo Manifests, Store List from Head of Catering. Customs will also check whether the vessel is carrying valid Safety Certificates on board, i.e. Safety Construction Certificate, Safety Equipment Certificate, Loadline and Safety Radio Telephony Certificate. Importing of alcohol without prior permission is prohibited. Whatever is on board may be sealed in the ship's bond. Import of Narcotic Drugs is totally prohibited into the Republic of Maldives. Whatever found on board will be confiscated, penalties levied and the Owner/Master and crew will be prosecuted. Customs also gave the ship a "Notice to Ships Calling at the Port of Male". See "Notice".

Agents: 1 Crew List. All passports taken ashore to be returned upon departure with Customs Clearance.
Cargo Handling: (Chief Officer's Report):

Arrived 20th May, 1982. Sailed 24th May, 1982. Port hours: 94 hours 11 minutes.

Three gangs are available in Male to work on board ships, of which 2 were supplied on 20th, 21st and 22nd May. One gang on 23rd May.

The gangs arrived diligently between 0750 hrs. and 0800 hrs. in the morning and worked till about 2220 hrs. except on the Thursday, when they worked till 1730 hrs. and on the 21st when work was interrupted from 1000 hrs. till 1415 hrs. being a Muslim religious festival.

No forklift trucks are available for work on board ships in Male and cargo stacked on pallets had to be dragged from the sides of the holds under the hook. This was the cause of damaged bags of flour and cartons of provisions.

There are 6 lighters available. Empty lighters were regularly supplied, except after rainy periods, when discharging of lighters alongside the wharf is interrupted.

Shore tally staff seemed to be very dedicated in their duties and were accompanied by a Customs Officer/Clerk.

Nett tonnages per hour:
Hatch No. 1: 12.1 t.p.h. (182 tons discharged).
Hatch No. 2: 12.2 t.p.h. (216 tons discharged).
Hatch No. 6: 16.8 t.p.h. (411 tons discharged).

A boat schedule was arranged upon arrival but a regular boat service was never carried out. The Agency appeared not to be in possession of any documentation (manifests, stowage plans, etc.) of the cargo to be discharged.
Developments: 1986: A new quay to bring lighters alongside, with Customs House and warehouses is under construction at N.W. end of Male, to be completed in 1986. On completion of the project the cargo handling will increase.

NOTICE: Issued by Maldive Customs.
Notice to Ships Calling at the Port of Male

1. All ships are required to submit a Port Clearance, Cargo Manifest, Passenger and Crew List and where available any other relevant documents.
2. Departure time should be notified and a Port Clearance obtained.
3. All visitors, officers and crew and passengers of ships are requested to use the Customs Jetty when arriving or leaving Male.
4. All articles are subject to inspection by the Customs.
5. All ships anchored at Male Harbour should exhibit on board the under mentioned lights between sunset and sunrise.
   a. White anchor light of all round visibility.
   b. White stern light with 135° illuminated sector.
   c. Mast light with all round visibility.

The Law On Prohibited Imports into Maldives

1. *Prohibited Items of Import Except for the Use of the State:*
   a. Any type of gun powder.
   b. Weapons of war.
   c. Opium, ganja, cocaine and any other item which could be used as an intoxicant.

Articles carried by foreign distinguished personnel signifying their ranks, titles or honours and articles carried in connection with such ranks, titles or honours by those who accompany such distinguished guests shall be exception to this Article.

2. *Prohibited Items of Import Without a Permit from the Ministry of Home Affairs Except for the Use of the State:*
   a. All forms of poisons and sulphuric acid.
   b. Nitrates.
   c. Dangerous animals.
3. *Totally Prohibited Items of Imports Into Maldives:*
   a. Pornographic literature and posters.
4. *Prohibited Items of Import Without a Permit from the Ministry of External Affairs Except for the Use of the State:*
   a. Alcoholic drinks.
   b. Dogs.
   c. Pigs or pork.
   d. Statues (used for worship).

In addition to items stipulated in this Bill, the Principal Collector of Customs shall withhold such items, the import of which is in his opinion shall be prohibited and bring the matter to the notice of the Department of Finance. The final settlement will be in accordance with the decision of that Department.

AUTHORITY: Maldives Port Authority, Marine Drive, Male 20-02, Republic of Maldives. *Tel:* 2413. *Cables:* Mintrans, Maldives. *Contact:* Ahmed Shareef, Director of Marine Affairs.

Maldives Ports Authority, Male, Republic of Maldives. *Tel:* 325681, 325240, 325237. *Contact:* Mohamed Zaki, Deputy Director.

Malta

MARSAXLOKK: 35.49 N. 14.33 E. (See Plan)

SHIPMASTER'S REPORT: October 1991.

DOCUMENTS:
3 copies Crew List.
1 copy Crew Declaration (personal effects).
1 copy Stores List.
The agent will supply the following forms:
1 copy Customs Declaration.
1 copy Malta – Pratique Deposition.
1 copy Fourth Schedule (Regulation 10).
The Cargo Gear Book is inspected by officials.

PILOTAGE: Pilotage is compulsory. Pilot comes from Valletta. The pilot will board close to the breakwater from a small, blue coloured launch. Vessels coming from the N.E. can also take the pilot near the Fairway Buoy at Valletta.

ANCHORAGE: Except during strong S.E'ly or S'ly winds, Marsaxlokk affords a safe anchorage with good holding ground. Anchorage position is about 2 nautical miles S.E. of the entrance. Smaller vessels usually anchor close to the East shore.

APPROACHES: Marsaxlokk is easy to enter. The port is approached between Delimara Point and Benghisa Point. The entrance is 8 cables wide and has a depth of 20 m. – 27 m. in the mid channel (which is not marked).

British Admiralty Chart No. 36 was used.

RADIO/VHF: ETA messages to be sent to agent as soon as possible, at least 24 hours prior to arrival, or 48 hours, if vessel carries dangerous goods.

Signal Station should be contacted on VHF (Channels 16 and 12), 2 hours in advance and again when 5 nautical miles off the breakwater. The calls will be answered by "Valletta Port Control", who normally advise the vessel to wait 2 nautical miles off the breakwater until the pilot gives information by walkie-talkie.

BERTHING:

Quay	*Length* (m.)	*Dredged Depth* (m.)
Terminal 1 – South	200	8.00
Terminal 1 – West	168	9.75
Terminal 1 – North	640	13.75
Terminal 2 – West	460	16.50
Terminal 2 – North	500	17.00
Terminal 2 – East	435	12.75
Oil Terminal	640	17.00

A container terminal with 100,000 sq.m. storage area follows a breakwater of 1,000 m. in length. The breakwater has facilities for bulk carriers up to 80,000 d.w.t.

Freeport Terminal: The main quay has a length of 548 m., dredged to 13.75 m., and is in process of expansion to about 640 m. length.

The Freeport is a customs free area.

Equipment:
1 RMG Peiner (13 across – 1 over 4 high stacking).
2 Paceco Transtainers (6 across – 1 over 3 high stacking).
3 Kalmar 42 ton FLTs.
1 Kalmar 36 ton FLT (Ro/Ro).
2 Kalmar 16 ton FLTs.
2 Bendini FLTs.
4 Terberg tractors (4 wheel drive) (Ro/Ro).
8 Terberg tractors (2 wheel drive).
4 Lansing 5 ton G.P. FLTs.
4 Lansing 2 ton FLTs (full free lift).
14 Skeletal trailers.
6 Low loader 50 ton trailers (Ro/Ro).
2 40 ft. side lift spreaders.
2 20 ft. side lift spreaders.
4 Goosenecks.
1 Demag quay crane.
1 Paceco quay crane.
3 Post – Panamax quay cranes.
2 Rubber tyred gantry cranes.

MEDICAL: Treatment available at local hospital.

REPAIRS: See "Valletta".

HOLIDAYS: See "Valletta".

REGULATIONS: The Port Authority is very strict about air and sea pollution.

DEVELOPMENTS: At the Marsaxlokk Freeport Terminal, it is expected that infrastructure works on the first phase of the oil terminal and the warehouses will be completed by the end of 1992. Works will continue on the Terminal I Container Yard extension, quay walls and dredging for the new berths of Terminal II.

AUTHORITY: See "Valletta".

Operator: Malta Freeport Corporation, Freeport Centre, Port of Marsaxlokk, Kalafrana, Malta. *Tel:* 684812/3. *FAX:* 684814.

VALLETTA: 35.54 N. 14.31 E. (See Plan)

DOCUMENTS: On arrival the Master has to fill the Pratique Deposition, the Stores List, the Crew Declaration, and the Crew List (two copies). The forms for the Pratique Deposition and for the Store List are supplied by the Customs Boarding Officer.

Arrival Notice: In accordance with the Port's Regulations Master or Agent of a vessel should give the ETA to the Ports Directorate on a form prescribed by the regulations as early as possible prior to arrival and 48 hours in the case of vessels carrying petroleum or other hazardous cargoes.

Certificates: Ship's Register; Load Line Certificate; Derat Certificate; Factory Act Book.

PILOTAGE: Pilotage is compulsory for vessels above 500 g.r.t. Pilots for Valletta and Marsaxlokk board vessels at Fairway Buoy, weather permitting. Pilots available round the clock all the year round. In bad weather Pilots board vessels inside entrance, subject to size of vessels, Master's knowledge of the port and Master's willingness to bring vessel up to Bighi Bay.

Vessels are expected to communicate their ETA at the boarding station at least 2 hours before arrival, and to re-confirm their ETA when they are 5 miles off the Fairway Buoy. The pilot boat is called when vessels are 2 miles off the Fairway Buoy.

The pilot boat, which has a black hull and white superstructure, is equipped with VHF Channels 12, 14 and 16.

ANCHORAGES: Anchorage in territorial waters and in other harbours is prohibited unless expressly authorised by the Ports Directorate.

RESTRICTIONS: Maximum depth at entrance is 16 m. Nature of bottom in entrance channel, rock and mud. Harbour channels – mud.

Harbour entrance and approaches affected by current. With North-Westerly winds there is a set of up to 0.5 knots from N.W. to N.E.

Port is subject to closure in gregale (N.E. gale) conditions – Winter months occasionally, not more than 4 times a year.

MAX. SIZE: Discharging Berths:

Deep Water Quay – 500 m. long, depth 10 m. The quay handles conventional cargo and is furnished with 3 sheds, totalling about 8,500 sq.m.

Berths No. 1, 2 and 3 have maximum depth alongside of 9.75 m. Maximum displacement tonnage of 15,000 tons.

Berth No. 4 has the same depth of water and can take maximum displacement of 25,000 tons.

Crucifix Wharf: 264 m. long, depth 10 m.

Flagstone Wharf: 217 m. long, depth 13.7 m. Can handle bulk coal carriers and tankers.

Magazine Wharf: Combined with Laboratory Wharf has total length of 440 m. Depth 12.2 m. – 15.0 m. The Kordin Grain Terminal is equipped to handle bulk grain carriers up to 70,000 d.w.t. Capacity of silos 86,000 tons. Maximum discharge rate 1,100 t.p.h. Maximum loading rate 1,250 t.p.h.

Laboratory Wharf has a length of 220 m. with a depth of 12 m. Two other small berths adjacent to the main wharf are used for Ro/Ro and direct deliveries.

Fuel Wharf has a length of 145 m. with a depth of 9.0 m. and handles direct deliveries.

Gun Wharf has a length of 90 m. with a depth of 7.5 m. and is used for ferry services.

There are other berths at Coal Wharf (length 275 m., depth 7.0 m.) for direct deliveries and at Vittoriosa.

Anchorage areas within Valletta Port are at Bighi Bay and Fish Market.

HEALTH: Port Medical Officer grants Pratique after boarding vessels on arrival. Accelerated Pratique may be granted through Agent provided crew are all in good health and ship has not called at any infected port during previous 15 days and is coming from a European port.

RADIO: Call sign 9HD. Radio telephone working frequency 2625 kHz. Listening watch 2182 kHz.

RADAR/VHF: The Palace Tower Signal Station may be contacted on VHF Channels 11, 12, 14 and 16 on call sign "Valletta Port Control".

Also see "Pilotage".

TUGS: Tug Malta Limited, which operates a fleet of 6 tugs, provides all tug assistance in the harbours and territorial limits of Malta on a 24 hour basis, 7 days a week. Lines are given at the discretion of the ship's Master under the advice of a Pilot.

BERTHING: Berthing conference held at the Ports Directorate daily at 1100 hrs. between Monday and Saturday when berths are allocated for expected ships. No specific requirements necessary. Once berth has been allocated by Ports Directorate vessels can berth at any time at the allocated berth (container and Ro/Ro berths are available).

Also see "Plan".

EQUIPMENT:
(a) One mobile crane maximum lifting capacity 250 tons.
(b) 2 mobile cranes with maximum lifting capacity of 75 tons.
(c) 6 electrical trucks.
(d) 2 diesel operated forklift trucks.
(e) 26 medium sized trailers.
(f) 10 cab tractors.
(g) Various other smaller forklift trucks and cranes.

STEVEDORES: Ship Agents of liner vessels normally act as stevedores. Port workers for stevedoring are ordered by Shipping Agents and labour is allocated from a pool operated by the Manager of port workers.

Working Hours: 0800 – 1200 hrs., 1300 – 1700 hrs. Vessels may work till 2100 – 2200 hrs. to complete. Nightwork: 1900 – 0400 hrs. (mainly containers).

Work may be arranged on Saturdays, Sundays and Holidays at special rates.

MEDICAL: Notice must be given to Agents as early as possible. Hospital facilities available. Crew must be in possession of inoculation/vaccination certificates.

TANKERS: Vessels for Valletta Port must be gas-free, except for the tank cleaning berth. Vessels carrying dangerous petroleum may enter Marsaxlokk Harbour to discharge or load petroleum products (See "Marsaxlokk").

FRESH WATER: Limited amount ex-barge subject to permission from Water Authority. Notice, as long as possible required.

FUEL: Sea Malta Co. Ltd. Grades handled include gas oil, fuel oil, thin fuel oil 30 cST up to 380 cST.

Bunkering may be carried out by barge or at Flagstone Wharf. Bunkers may also be supplied at any of the 5 anchorage areas available off the coast of Malta.

FIRE PRECAUTIONS: Precautions as laid down in Ports Regulations for cargo ships and as in Petroleum Ships Regulations for tankers. Civil tugs partly equipped with fire fighting equipment.

CONSULS:

REPAIRS: Malta Dry Docks has the capability to carry out normal and specialised engine, hull and machinery repairs such as:

Engine, (diesel, steam, turbine)
Auxiliaries (turbine and diesel)
Turbine re-blading
Propeller servicing, repairs including re-tipping (tips cast in yard) and balancing
Dynamic balancing of rotors
Boiler and heat exchanger chemical cleaning
Rudder and tailshaft alignment and repairs
Gritblasting (internal/external) to all standards
Hull cleaning by high pressure water jet
Refrigeration system repairs
Replacement of lignum vitae stern tube bearings
Installation of Deutsche Werft Simplex stern tube sealings
Internal/external cathodic protection
Combustion control system repairs
Re-tubing of boilers, brickwork and lagging
Renewal of heating coils, cargo and stripping lines
Hull repairs (welded and rivetted)
Jumboizing.

Travelling Repair Parties:

Malta Dry Docks Travelling Repair Parties are available to carry out repairs at sea both as an emergency repair, or as a means of reducing lay-up time during normal voyage repairs or classification surveys.

It is possible to shorten the time of refits by employing a travelling repair party to commence work before entering or complete after leaving the Dry Docks, non-critical items being completed on passage.

Malta allows the maximum use to be made of Travelling Repair Parties, situated as it is in the centre of the Mediterranean, midway between Gibraltar and Port Said. It is ideally placed on the shipping lanes between the East and West and connected by daily air services to Europe and North Africa.

Malta Dry Docks Travelling Repair Parties are equipped to carry out the following work:

1. Repairs to main and auxiliary boilers, including re-tubing, renewal of brickwork and insulation and fitting of new furnaces in Scotch type boilers.
2. Overhauling and repairing deck and engine room auxiliary steam and diesel plant, cargo systems and valves.
3. Repairs or replacement of cargo tank heating and stripping line systems, in cast iron, steel or aluminium/brass.
4. "Metalock" cold repairs to castings by trained specialists.
5. Gas or electric welding to Classification Society requirements for steelwork repairs and reinforcements.
6. Repair or renewal of electrical wires and cables.
7. Overhaul or installation of any electrical machinery.
8. Repair or installation of all navigational aids, i.e., radar, radio, auto-pilots, gyros by qualified personnel.

Any enquiry will receive immediate attention by radio, telex or telephone.

SURVEYORS: Lloyd's Register of Shipping; The London Salvage Association; American Bureau; U.S. Salvage Association; Det Norske Veritas; Registro Navale Italiano; Bureau Veritas; Germanischer Lloyd; Panama Bureau of Shipping; Nippon Kaiji Kyokai.

DRY DOCKS: Malta Dry Docks.

Docking Facilities:

Dock Number	*Length* (m.)	*Inside Beam* (m.)	*Depth* (m.)	*Cranes Capacity* (tons)	*Other Facilities**
1	153.92	21.64	5.57	1×50 1×5	A–S–FW–SW

*A – Compressed Air FW – Fresh Water O – Oxygen
S – Steam SW – Salt Water P – Propane

Capacity of No. 6 Dock 300,000 d.w.t.

GANGWAY/DECK WATCHMEN: Gangway recommended. Deck compulsory.

OPENING/CLOSING HATCHES: By ship's crew or shore labour.

CUSTOMS ALLOWANCES: 200 cigarettes for each crew member, plus one bottle spirits (officers only).

CARGO GEAR: Certificates of cargo handling gear have to be valid before cargo work can commence. Factory Act Book to be endorsed quadrienially and annually.

REPATRIATION: Facilities exist for crew changes and repatriation by air.

AIRPORT: Luqa Airport is 4 miles from port, served by Air Malta and other airlines. Daily flights to London and Rome. Also other flights to other countries.

TIME: GMT plus 1 hour in Winter. Summer time kept from last Sunday in March until last Sunday in September.

HOLIDAYS: New Year (1st January – no work); St. Paul's Shipwreck (10th February); St. Joseph's Day (19th March); Freedom Day (31st March); Good Friday (no work performed at all on this holiday and in the afternoon of Tuesday Carnival); St. Joseph the Worker (1st May); Sette Giugno (7th June); St. Peter and St. Paul (29th June); Assumption of B.V. Mary (15th August); Independence Day (21st September); Immaculate Conception (8th December); 13th December (Republic Day); Christmas Day (25th December); (no work performed at all).

POLICE/AMBULANCE/FIRE: Police 191; Ambulance 196; Shore Fire Brigade 199.

TELEPHONES: Can be arranged at the Dry Dock Berths, and on buoys.

SERVICES: Tank cleaning and underwater hull cleaning undertaken by Malta Dry Docks.

Ricasoli Tanker Cleaning Installation:

The tanker cleaning installation at Ricasoli accepts cleaning for dry docking, repairs and survey for upgrading tankers.

The jetty area consists of a 100 m. jetty, situated immediately inside the Grand Harbour, and capable of berthing tankers up to 100,000 d.w.t. at a maximum draft of 8.5 m. in 10 m. of water.

Tankers are assured of immediate attention on arrival from a trained crew of tank-cleaning personnel. Work is continuous 24 hours per day from the time of arrival of the vessel, together with a 24-hour security watch.

1. Washing: The installation supplies hot wash water at a temperature of 60°C and a pressure of 14 kg./sq.cm. to operate 4 washing machines simultaneously, with a delivery rate of 30 – 34 t.p.h. The discharge of slops and/or ballast is at a maximum of 1,200 t.p.h. Chemical cleaning is also undertaken and Malta Dry Docks holds stocks of well-known chemicals.
2. Gas-freeing: The installation operates 3 compressors and 6 Meco ventilators, together with trunking, are available for gas-freeing.
3. Steam Supply: This is available at the jetty when required. All associated tank-cleaning equipment is available for ship's use.

Full fire-fighting facilities are available at the jetty.

The installation also makes distilled water for sale to ships and a separate line is available at the jetty for the discharge of this product.

The reception and treatment area incorporates reception tanks, treatment tanks and an observation tank with separating baffles and oil sump. In addition there is an oil storage tank and a distilled water storage tank.

The boiler house accommodates 3 Scotch boilers with all associated auxiliary equipment. The steam supply is extensively used in the plant area for heating and treatment purposes. An evaporator-distiller is incorporated in the Boiler House for the production of distilled water.

The whole area has been designed to be perfectly safe and is to the standards laid down by the Institute of Petroleum Safety Codes for Installations storing Class A Petroleum. Strict safety regulations are applicable to the whole plant and the tank-cleaning crew has been thoroughly trained in these matters.

Mediterranean Oilfield Services Co. Ltd.:

Address: Manoel Island, Malta. Tel: 336408, 336409, 339656, 331411, 338195. Telex: MW1273, MW1485. Cables: Medserv, Malta.

24 hour service, 7 days a week.

Devoted solely to the oil industry. 800 ft. deep water quay frontage. 1,722 sq.ft. bonded warehouse. 40,000 sq.ft. covered storage. 20 acres open storage. Office space. Catering services.

One operation for loading mud, cement, water, pipes, fuel and other supplies. Labour contractors.

BANKS: Bank of Valletta, Central Bank of Malta, Lombard Bank (Malta) Ltd., Mid-Med Bank Ltd., Melita Bank International Ltd.

IDENTIFICATION CARDS: A personal identification card not required. Passports or seamen's books will suffice.

GARBAGE DISPOSAL: Garbage collection services are provided by private companies 24 hours per day.

WASTE OIL DISPOSAL: Tank cleaning is carried out at the Ricasoli Tank Cleaning Installation which is capable of berthing tankers up to 100,000 d.w.t. Tel: 828089.

SEAMAN'S CLUBS/SERVICES: None.

CURRENCY: One Maltese Pound = U.S.$ 3.1525 (13.2.92).

GENERAL: Important that tankers are gas-free before entering, and that vessels do not carry explosives.

DEVELOPMENTS: Fuel Wharf is being extended to provide better berthing facilities for container vessels and to double the existing operating space at the Laboratory Wharf Container Handling Terminal from about 9,000 sq.m. to about 20,000 sq.m..

To establish Malta as a hub for Cruise Liners, Crucifix Wharf is being extended by 245 m. to provide an additional cruise liner berth. The historic Pinto Stores, with an area of 2,700 sq.m. are being converted into a modern cruise passenger terminal.

Also see "Marsaxlokk".

AUTHORITY: Ports Directorate, Malta Maritime Authority, Marina Pinto, Valletta VLT 01, Malta. *Tel:* 222203/4/5. *Telex:* 1110 Ports MT. *FAX:* 222208. *Contact:* The Executive Director (Ports).

AGENT: Kirton & Co. Ltd., 18/19 Floor 3, Europa Centre, Floriana, Malta. Cable address: "Kirton Malta". Tel: 234360. After hours 674650, 319861, 820599. Telex: MW 1241. Sole and exclusive Agents for Lambert Brothers Ship Agencies Ltd.

Marshall Islands

MAJURO: 07.07 N. 171.10 E.

SHIPMASTER'S REPORT: December 1990.

The vessel departed Guam on December 12th 1990, bound for Majuro. Typhoon Russ hampered the vessel's progress and we did not arrive until 0800 hrs. on December 19th. Contact with the agent was not confirmed throughout the voyage. Although the agent's answerback was received and messages were transmitted, they did not illicit replies. Shell Singapore assisted by contacting the agent and confirmed the receipt of vessel's ETA's. Direct contact was made by VHF on Channel 16.

Marshall Atoll was detected on the radar at a range of 20 miles. A pilot boarded one mile from the entrance to the lagoon. The channel is marked by 6 pillar beacons, at the time of our visit the first beacon on the port side was missing. Coral heads were visible on the starboard side, the reefs on the port side were not. On both sides, the dangers extend beyond the marker beacons, therefore the vessel had to be lined up with the channel well before entering it. A strong N.W.'ly set was experienced off the entrance, which tended towards the coral heads. Once inside the lagoon the passage to the berth was virtually unobstructed. Distance from pilot to berth was 14 nautical miles.

The berth is owned by the Marshall Island Armed Forces and operated by the Marshall Islands Power Company. It is a continuous concrete wharf, with horizontal wooden fenders and vertical rubber fenders along its length. The depth of water was reported to be 43 ft. alongside, and the wharf was reported to be 320 ft. long. Prevailing winds are from the South and the jetty has been constructed on a line 084°/264°.

The wharf is used for general cargo imports, in addition to the importing of gasoil for the power plant. No other vessel is, however, allowed alongside when a tanker is using the wharf. The gasoil is received via a flexible hose to a caged manifold connected to the storage tanks. Size of reducer required is 8 in. The hose was positioned using a fork lift truck and the ship's crane.

There are no tugs and no evidence of repair facilities. No dirty ballast or slop facilities are provided. Mobil have a tank farm terminal and seem to be the main supplier of Mogas to the Island's garages. The Power Company sell some of the imported gasoil for bunkers to fishing vessels and local boat owners. There is a jet runway and seaplane service. Most flights are by the runway, the seaplane being little used. It was reported that there are frequent flights.

The vessel was boarded by Customs, Immigration and Health Officials on arrival at the berth.

The following documents were required:

5 copies Crew List.
1 copy Passenger List.
1 copy Vaccination List.
1 copy Previous Ports List (last four ports).
1 copy Crew Declaration.
1 copy Stores List.
1 copy Declaration of Health.
Clearance from last port.

There were no problems with the formalities and the ship's clearance was arranged in advance. The port has just established a double clearance procedure were the vessel must have both port and customs clearance before departure. Although the clearance was arranged in advance there was a delay whilst the agent brought the documents to the ship.

The Marshall Islands are part of a group known as Micronesia, however they use U.S. dollars as the standard currency. There was little commercial activity in the port and on the Atoll. Robert Reimers Enterprises run the main hotel, bank, supermarket and most commercial activities on the Island.

SHIPMASTER'S REPORT: June 1992.

Although classed as a U.S. Trust Territory, the Marshall Islands are, in fact, independant and have their own flag.

Papers required for Port Officials are:

4 copies Crew List (Not U.S.).
Customs Declaration Form.
Stores List.
Derat/Exemption Certificate.

Considerable difficulty experienced in contacting Agents, Robert Reimers Enterprises, by telex. Although the List of Agents showed the Telex No: 7300930, vessel could only make contact using 7650930 and 7657300930, both giving "answerback" as "Comwriter Senior". After arrival, the Agent confirmed that the "answerback' was the Agency, but stated that only one message was received from the ship, this being the 24 hours ETA. Our telex machine confirmed receipt of all messages sent to Agent's number with "answerback", both before and after transmission. Having had no reply to questions raised in the first telex sent, a satellite telephone call was initiated and a successful connection made to Agents.

As Robert Reimers have several operations in Majuro, one has to request the shipping agency when telephone contact is made. Dialling the number direct gave a "no service" tone, and we evertually succeeded using the Australian Satcom. Operator. The telephone code used was 692 for Marshall Is., then 9 for Majuro, then the number. The first number in the List of Agents (3250) gave "no service", but the second number (3470) was successful.

Pilotage is daylight only and pilot boards at Calalin Channel. The pilot inwards was the Harbour Master and the Berthing Pilot. He also unberthed the ship and took us out through the channel.

In addition to information already supplied, the following is worth noting. There can be strong cross currents running across the channel from East to West, and it is recommended to ask the pilot to board outside the channel. Pilot boards using a small private motor boat. The current British Admiralty Chart is out of date, as the Calalin Channel Beacons are in different positions and the berth/cargo wharf is not shown. Most of the port hand beacons in the channel are missing, having been damaged in a previous typhoon. When going through the channel inbound, only Beacons No. 1, 3 and 5 are to starboard and No. 6 to port. Once inside, there are no major problems. The beacons shown on the chart are in position Lat. 07° 05.2′ N., Long. 171° 21.9′ E.

Vessel anchored overnight 2 miles WxN of the berth in 25 fathoms with a slightly sandy bottom. The berthing went smoothly, but without tugs, and the line boats were small motor boats, the same as the pilot used. Vessel berthed starboard side to and the bow overhung the end of the solid wharf by about 10.0 m. The port anchor was dropped approaching the berth and springs were run first. Anchor chain was slacked out as vessel moved in towards the berth, and then held on to bring the bow out and the stern in. Vessel ended up with 7 shackles out. Owing to the overhang, there was nowhere to lead proper headlines, except to the fishing wharf further up, and that would have required permission from the owners of the wharf and taken considerable time. As it was, the moorings were sent as breast lines and springs from the forecastle and headlines from the maindeck. The vessel was safely moored 2-2-2 in that manner.

Vessel discharged one grade, gas oil, through an 8 in. connection. Shore line was 16 in. to tanks close by. Overall discharge rate achieved was about 1,050 cu.m./hr.

Unmooring was conducted by letting go all moorings except one forward spring, with the anchor in gear. The vessel then steamed slowly forward against the spring, bowsing in the bow until the stern was well clear of the dock. The spring was then let go and with engine on dead slow astern, the anchor chain was then heaved in to pull the bow out and astern. In moving astern, the bow swung slowly to starboard with little or no weight on the chain. Once the anchor was aweigh and clear, the turn to starboard was continued, with the vessel still moving astern.

A point to watch here, is that there is a mooring buoy some 250 m. – 300 m. off the berth. This buoy, which is not on the chart, is used for unmooring in strong N.E. winds, when a mooring line is secured to it to heave the stern off the berth.

The turn to starboard was completed with engine changed to turning ahead and vessel proceeded seawards.

NOTES

Martinique

FORT DE FRANCE: 14.36 N. 61.04 W. (See Plan)

PORT LIMITS: The seaward limit of the port is the broken line joining the following points: Extremity of Pointe des Negres, South of Fort Saint Louis, Red Buoy No. 3, Black/Yellow Buoy S., Green Buoy No. 6L and Pointe Desgras.

DOCUMENTS:

Maritime Declaration of Health.
4 Crew Lists.
2 Provisions Lists.
2 Lists of Passengers in Transit.
5 Lists of Passengers Disembarking.
2 Lists of Crew Personal Effects.
2 Vessel's Particulars Declarations.
2 Cargo Manifests.

Tankers Only: Certificate of Insurance against Oil Pollution.

PILOTAGE: Call Pilot by International Code flag "G" or by sounding "G" on whistle. Pilot launches are painted black. The Pilot joins vessel on arrival at Pointe des Negres. If Pilot not available, vessel must anchor in the Baie des Flamands, East of Point des Negres to await Pilot.

ANCHORAGES: In Baie des Flamands in front of the town. Depths of 10 m. – 14 m.

MAX. SIZE: Length: 180 m. for vessels with one right hand propeller and without bow-thruster. 250 m. if vessel has two propellers and bow-thruster. See also "Tankers".

HEALTH: Request Free Pratique by radio or can be obtained on arrival when Master completes Health Declaration and presents Health Certificates.

RADIO: Fort de France Radio, call sign FFP. ETA message to Agent required 24 hours before arrival on working days or 48 hours on holidays. Message to include number of crew on board, flag, ship's name, tonnage, length, beam, max. draft on arrival, date and time of arrival.

VHF: Port Authority on Channel 16. Pilot on Channel 13.

RADAR: None.

TUGS: None available or required.

SERVICES: No tank cleaning equipment, tank-washing, or compass adjusting.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Seaman's Book.

DEVELOPMENTS: A third container gantry of 45 tons is to be installed. Cruise ship terminal at Baie de Flamands will be available in 1992.

SHIPMASTER'S REPORT: December 1988.

Belle Fontaine: (See "Plans").

Vessel: LOA 150 m. Beam 21.0 m. Summer draft 9.05 m. 10,330 g.r.t. 5,584 n.r.t. 3 hatches.

After completion of cargo operations at Fort de France, the pilot boarded and vessel sailed for Belle Fontaine.

The Master takes command from Fort de France pilot station to about 1.5 miles before the berth at Belle Fontaine, when the pilot again assists. The regular pilot boat follows with additional crew from Fort de France and assists in taking the ropes to the dolphins and the jetty. Usually, and preferably, the pilot berths the vessel port side alongside against a slight current. The berthing is also done, preferably, in the early morning, due to absence of wind. The starboard anchor is dropped to 2 shackles on deck when the vessel is about 4 to 3 cables from the berth and is slacked away as required. The anchor is not of use for berthing but is for assisting unberthing. Under normal conditions the vessel makes fast with 2 long headlines and 2 stern lines to the dolphins and 2 springs each, forward and aft.

The berth is built of concrete on a solid foundation, the sea bottom is rock covered with boulders. The berth is very well fendered with 8 large tube-type rubber fenders of about 1.20 m. diameter and 1.50 m. length. Both corners of the berth are additionally protected with 4 smaller tube-type fenders on each side.

The berth is fitted with 2 modern loading arms for receiving fuel for the power station, to which the berth belongs. The berth is also used to receive equipment and spares for the power station, as well as shipping used parts. We loaded 150 tons of general, consisting mainly of oversized and heavy material, also some 40 ft. containers of up to 30 tons each. The space on the berth is limited and if the vessel has to work on a second hatch it has to shift. There is sufficient room to manoeuvre with 40 ft. trailers. The stevedores come from Fort de France.

If vessels are berthing at Belle Fontaine and come directly from overseas, the customs broker takes all documents to Fort de France to obtain Clearance. Usually the authorities do not come on board.

The pilot has to be ordered from Fort de France, and will await the vessel 1 mile Northwest of the berth. All regulations valid for Fort de France are valid for this berth. The official name of the berth is: Fort de France, berth Belle Fontaine.

If repairs or stores are requested it has to be organised through Fort de France companies. In an emergency small amounts of fresh water can be taken by a 1 in. pipeline.

The position of the berth taken by bearings and from official sources (B.A. Chart No. 371) differs slightly from the position taken from the satellite. The latitude shows no difference but the longitude obtained by satellite is 61° 10.47′ W., whereas the position on the chart shows 61° 08.7′ W.

600 m. inshore of the berth is a new power station with 2 conspicuous chimneys. They are illuminated at night by white lights and make a good landmark by day and night. The chimneys are in line 055°.

Mauritania

NOUADHIBOU: (Port Etienne): (See Plan)

POINT CENTRAL: 20.49 N. 17.03 W.

DOCUMENTS:

3 Crew Lists.
2 Stores Lists.
2 Crew Declaration Lists.
2 Passenger Lists (even if "NIL").
2 Ports of Call Lists of the last 30 days.
1 Health Declaration.
1 Vaccination List.

Maritime Gendarmerie: Officers of the Maritime Gendarmerie of Nouadhibou may come on board. They mainly control if the Mauritanian flag (must be flown day and night) is hoisted and check very closely the concordance between the Ship's Articles, the Seaman's Books and the Crew List.

If any difference is found between these three documents a fine may be given to the ship.

Immigration/Police: Crew members are not allowed to go ashore without a safe conduct given by the police. The list of the men asking to go ashore has to be given to Agent on arrival.

Money: On principle, foreign money is not allowed in Mauritania, but Agent may change money into local currency.

No Mauritanian money (Ouguiya) may be kept on board and if the crew have not spent their local money they have to give it back to the Agency (10 Ouguiya about 1 French Franc).

PILOTAGE: Compulsory for vessels calling at Point Central.

An outer pilot station is situated in the vicinity of No. 2 Buoy, bearing 037° distance 4.4 miles from Fairway Buoy No. 0 (Lat. 20° 40′ N., Long. 17° 04′ 30″ W.). Also see "Shipmaster's Report (1977)".

The inner pilot station is 1 mile from the Mineral Wharf bearing East.

ANCHORAGES: Ships waiting can anchor N.E. of No. 2 Buoy, distance 1 mile in 20 m. of water, good holding ground. Another anchorage on the roadstead, the wharf bearing N.W./N.N.W. distance 1 mile can be used by ships prior to berthing.

RESTRICTIONS: Minimum depth of water below chart datum is 17 m. in the buoyed channels and swinging area. Outer channel width is 400 m. but it varies from 250 m. to 400 m. for the inner channel; the radius of the swinging circle being 500 m.

MAX. SIZE: Not to exceed 310 m. in length and 47 m. in breadth, the extreme reach of the shiploader arm being 28.5 m. from ship's side. At the limit an extreme breadth of 48 m. could be accepted after advice from the DCFP. If possible drawing should be sent prior to acceptance for vessels of more than 100,000 d.w.t.

The recommended draft for large vessels in ballast, or partially loaded is 12 m. on arrival. Smaller ships should have on board a quantity of ballast equal to half their cargo capacity.

Maximum freeboard under shiploader arm is 14 m. With hatch covers opening crosswise (abreast) the maximum freeboard must be understood as the height from sea level to the upper part of hatch covers.

On departure a draft of 16.15 m. is usually admitted.

Essential: All vessels greater than 100,000 d.w.t., which have never visited the port before must have prior approval of the DCFP.

HEALTH: Free Pratique is usually granted after vessel has berthed. Yellow fever vaccination certificates required.

TUGS: None available.

BERTHING:

Mineral Wharf: The ore loading terminal of "Societe Nationale Industrielle & Miniere de Mauritanie" (SNIM) is located at mid distance between Cap Blanc and Nouadhibou, geographical position: Lat. 20° 49′ N., Long. 17° 02′ W. It consists of a platform, 20 m. wide oriented North and South, resting on 8 dolphins, 13 m. in diameter each and 32 m. distant one from the other. The platform supports a conveyor belt and one single shiploader. The maximum travel of the shiploader from one end of the rails (railway) to the other is 165 m.; the virtual loading capacity would be 5,000 t.p.h. while the actual output varies from 2,000 to 4,000 t.p.h. according to ship's size and on condition there is only one quality and grade of ore to load.

To maintain a depth below LLWT (lowest low water astronomical tides) of 16 m. at the berth, ships are laid against 2 big outrigger pontoons leaning on the dolphins and protected on the ship's side by heavy but efficient rubber rollers acting as shock-absorbers.

Ships are generally made fast port side to the quay, coming alongside with the help of the anchors which should be kept at the ready.

Shipmaster's Report: March 1983.

Heavy lifts up to 24 tonnes were discharged alongside the berth with vessel's gear.

MEDICAL: There are hospital and medical facilities at the port.

TANKERS: Oil Wharf: It consists of a light platform placed on top of 3 dolphins of the same diameter as above but 64 m. apart, adjoining the mineral wharf to the Southward. A wooden decking supports the oil pipes which are connected abreast of dolphin No. 10 to the tanker lying port side to the quay, the stern is made fast to a mooring buoy.

DENSITY: Point Central 1026–1027.

FRESH WATER: *Shipmaster's Report:* March 1983. Fresh water available in limited quantities (approx. 100 tonnes) at a cost of U.S.$1.50 per tonne.

FUEL: Not available at the moment. An oil refinery has been built which will eventually supply fuel.

GANGWAY/DECK WATCHMEN: Recommended as stowaways try to board at night.

SURVEYORS: Bureau Veritas, Lloyd's, Salvage Association.

CUSTOMS: Regulations are very strict, and a careful declaration of all bonded stores must be made before berthing. Ships have been fined for quantities in excess or missing even when small.

GENERAL: (a) Radiotelegrams stating the date and ETA at pilot station and addressed to SNIM Nouadhibou should be transmitted 72 hrs. and 24 hours beforehand via Nouadhibou coast radio station (5 TA) working hours 0800 – 1800 or Dakar (6 VA), hours: Continuous.

Shipmaster's Report: 1977. Telegrams to Agents through Dakar Radio 6 VA only.

(b) It is of interest to Pilots when coming on board, to know whether the ship is powered by a steam-turbine or diesel engine whether the propeller is left or righthand and if it is a variable pitch propeller, how she behaves when the engine is running astern.

DEVELOPMENTS: Extensions to the Mineral Port are being studied.

SHIPMASTER'S REPORT: 1975. Vessel 169,000 d.w.t.

Iron Ore Marine Loading Terminal:—

Approach to Cap Blanc and Baie du Levrier: Approach was from the Southward. From Dakar the course was laid to cross the 100 fathom line at 20° 04′ N., 17° 41′ W., this being a precipitous shelf, when crossed with D.F. bearings from the Radio Beacon at Port Etienne gave a reasonable fix. Vessel then steamed across the main flow of North/South traffic at quite a broad angle heading for the landfall buoy 6 miles West by South of Cap Blanc. A dense concentration of fishing vessels extending Westwards from Banc Vilmorin offered little hindrance to our landfall. The light of Cap Blanc lighthouse was visually observed in the pre-dawn darkness at 26 miles and radar contact of Cap Blanc was established at 23 miles. The landfall buoy fitted with a radar reflector, gave radar contact at 15 miles.

Pilotage: A Pilot boards in the vicinity of No. 2 Fairway Buoy from a black-hulled, white superstructure, 40 ft. high-speed motor launch with "Pilote" written on the side. VHF contact is made on Channel 16, working frequency Channel 14. Call "Nouadhibou Pilot". The Pilot, a Frenchman, had a good understanding of English and proved to be very competent. The transit inwards and through the Passe du Levrier was at half speed but the last mile towards the berth only an occasional Dead Slow ahead movement was made to maintain steerage way.

Tide/Currents: Berthing for large vessels is on the ebb tide with a Southerly set of about 1 knot. South of the headland the set is to the Eastwards again about 1 knot i.e. directly across the channel. Unberthing is made on the flood tide setting Northerly along the jetty again about 1 knot. Rise and fall is in the region of 1.6 m.

Wind: Ranges from North by West to North by East (May). During darkness it abated to about Force 3 but from early morning through to sunset gusted up to Force 6 causing a short steep sea to run. The Pilot stated that in August and September Easterly winds often occurred hence the placing of 2 mooring buoys about 1 cable off the berth to assist vessels warping clear when leaving.

Tugs: None available.

Quay: Stout cylindrical rubber fenders are chained to the sides of 2 floating pontoons laying to the quay face. An adequate number of bollards are placed along the length of the quay. 3 dolphins, connected by a catwalk, extend the Southern length of the quayside for ship mooring purposes.

Moorings: When approaching and lying off the jetty 2 motorised mooring boats will run ashore 1 synthetic fibre rope (no wire ropes at this stage) from forward and 1 similar rope from the Poop. Vessel is then to warp alongside with these 2 lines aided by helm and small engine movements. Once alongside a spring from the after extremity of the Poop is to be sent away and a forward spring. Vessel secured to the berth with 1 headline to a mooring buoy North of the jetty, 3 forward breast lines, 1 forward spring, 2 stern lines, 2 after breast lines 1 spring from the Poop, and 1 spring from the normal position on the after deck.

Gangway: The accommodation ladder could not be used because of the space between the pontoons lying between ship's side and the quay. A pilot ladder was the means of access to the after pontoon from which access could be obtained to the quay.

Depths alongside: At the first low water soundings were taken around the ship and when reduced to chart datum — obtained from a monthly tide table loaned by the Pilot – a least depth of 16.2 m. was found on the inboard side with depths generally about 18/19 m. elsewhere.

Draft: Maximum permitted for berthing 12 m. Maximum permitted draft for sailing is 16.16 m. (53 ft.) at any state of the tide.

Airdraft: Maximum 14.5 m. In our case several thousand tonnes of hold ballast had to be taken once secure alongside, this delayed loading for 5 hours.

Shiploader: This is a single conveyor belt fed gantry having a range of travel of 165 m. along the quay but the loading arm has no facility to slew horizontally. It can only be luffed in the vertical plane. The maximum outreach was stated to be 23 m. which combined with the airdraft limitation of 14.5 m. made it extremely difficult to plumb the centre of the holds. For the majority of our loading period the ship had a port list (this was exaggerated by the free surface effect of the 4 ballasted holds). To keep the loading arm from fouling the ship's structure and assisting the arm to plumb centre all the port side side-rolling hatch lids were only partially opened.

Shifting: This had to be done on 2 occasions but was successfully achieved by hauling on the 2 spring wires aft and 1 headline to warp a distance of 6 m. forward and heaving on the forward spring and stern lines to warp 26 m. aft. The shifting was necessitated by the fact that the distance centre to centre of our extreme loading hatches was 191 m.

Agency: This was conducted by SNIM, Societe Nationale Industrielle & Miniers, their telegraphic address is "Snimport – Nouadhibou".

Documents: Required are:

4 Crew Lists.
2 Stores Lists.
2 Crew Declaration Manifests.
2 Vaccination Lists.
3 Passenger Lists.
3 Ports of Call of the Last Month Lists.
2 Ballast Manifests.

The latter 3 lists can be made on 1 sheet of paper (in triplicate). No Maritime Health Declaration was asked for. All these documents were passed to the Agent, no Customs, Port Health, Immigration or Police visited the ship. Although some crew members were without Yellow Fever vaccination certificates this posed no problem with the Agent, he declared no vaccinations can be done here. Nor can the Derat Exemption Certificate be renewed.

Port Restrictions: The Agent warned that crew members could not use pounds sterling, U.S. dollars, Dutch guilders or other foreign currency ashore for fear of confiscation by the "authorities". The local currency is the Ouguiya, 100 of which are on par with £1 (approx.).

Port Capacity: The Pilot stated previous largest ships had been:

(i) *"Atland"* OBO Swedish 84,229 g.r.t.
(ii)*"Thor"* Bulk German 79,270 g.r.t.
(iii) *"Lilyprima"* OBO Italian 72,68 g.r.t.

However, our claim to be the largest vessel to call being 169,080 d.w.t. is unsubstantiated. The Agent claims a shipment of 139,000 metric tonnes is the largest cargo exported from the port.

Loading Rate: The installation foreman claimed a rate of 4,000 t.p.h. Our rate, allowing for the frequent short stoppages, was 2,813 t.p.h.

Ore: The grade "Siliceous Iron Ore Fines XBF" was extremely dusty. About 10 grades of ore are available from 3 different mines.

Water Density: From our observations at low water 1024 ozs./cu. ft. and at high water 1025 ozs./cu. ft.

Cargo Figures: All tonnages quoted this port are metric tonnes. Ship's figure was about 1,300 tonnes less than the shore quantity, however, the ship's figure was accepted and the foreman stated the shore installations were usually 1% high of the ship figure. Ship was loaded to the maximum draft of 53 ft. but a great deal of difficulty was experienced reading the draft due to the seaway.

Unberthing: This was carried out on the flood tide. Single up to the 2 spring wires aft, using small astern movements and helm movements which aided by the anchor will cant the head from the quay. When the anchor is aweigh, slip the springs and steam ahead of the jetty then using full ahead power and starboard rudder followed by full astern power the vessel is swung well within the turning area to head seawards.

Depths in Channel: Except for the area of the channel abreast Cap Blanc lighthouse where less than 1 m. beneath the keel the remaining parts of the channel showed 3 m. – 4 m. underkeel clearance.

Conclusion: It would appear impractical to enter ships of a larger physical size than ourselves at this port because of airdraft/outreach limitations, draft restriction and manoeuvrability problems. Although we were fortunate in having a trouble–free berthing and unberthing procedure serious problems could be foreseen if a vessel had a main engine failure or a sudden deterioration of the weather occurred during these manoeuvres.

SHIPMASTER'S REPORT: 1977. The landfall buoy 6 miles West- by-South from Cape Blanco does not exist. Buoy No. 0 approx. position 20° 40′ N., 17° 04.7′ W. has been removed.

SHIPMASTER'S REPORT: June 1978. The following is a brief account of the port which is in addition to the information supplied in the "Guide", which may be read as being correct. The port, formerly Port Etienne, is in Mauritania, I found travellers are afforded every courtesy. There are two flights per week from Paris via Air Africa who are very good. The flights arriving here on Tuesday and Thursday. The plane returning from Dakar Wednesday and Friday. Spare parts can be landed here and taken out to the ship with minimum of Customs formalities though it would prove to be an expensive exercise. It must also be pointed out that it is not always possible for the plane to land here due to high cross winds and resultant sand storms at the runway, in which case the plane then proceeds to Dakar direct.

Custom Authorities are most interested in the amount of foreign currency brought in as there is a strict levy on this, care must be exercised in this respect. They are also most interested in the stores on board the ship and these must be strictly accounted for precisely.

The town itself of which I did not visit is a separate community from the mining town itself. The mining town itself is self-sufficient and both French and Mauritanians live here. There is a hotel, which is practical and clean with reasonable food. There is also a club with tennis courts, a post office, power station and cinema and a hospital where major surgery can be carried out. There is also an oil refinery which is uncompleted. Refined products are imported via a modern berth. Bunkers and fresh water are available here but in limited quantities and I would imagine costly.

There are no tugs. According to the Agent wireless telegraphy may be used alongside the berth although there is a Telex ashore. I found the Agent to be most helpful.

I was assured that seamen joining or leaving here do not require a visa only a passport and discharge book are required, which I personally was never asked to produce.

The iron ore mine is approximately 650 miles from the loading berth, all the ore coming by rail and attacks are frequent by bandits and guerillas. This can cause lengthy delays to the ship as very little ore is stockpiled.

Loading is carried out by one loading arm which pours approximately 4,000 tonnes per hour. Weights loaded can be measured ashore and have proved to be quite accurate, however it is normally the practice to accept the ship's figures.

SHIPMASTER'S REPORT: September 1986.

Vessel: Ore carrier – 117,600 d.w.t.

Telegrams: Telegrams to our Agents (SNIM) were sent through St. Lys Radio in France, and were received without delay at the Agency.

Water: Requirement should be stated in the 72 hour notice of ETA cable.

Navigation: 2 Pilots working this port now.

Still no tugs available.

All buoys in the Approach Channel are unlit.

Buoys No. 1 and 3, (B.A. Chart No. 1699, 1983 edition), are missing.

Cape Blanc Lighthouse unreliable as extinguished at times.

Stowaways: The possibility of stowaways still exists. Local guards have been placed on the quay to stop unauthorised people from getting aboard, but it is recommended to have ship's crew as watchmen as well.

SHIPMASTER'S REPORT: August 1987.

Vessel: 24,750 d.w.t. 170 m. length.

Location of Oil Terminal: 20° 49.8′ N., 17° 01.75′ W.

Documents:

6 copies Crew List.
3 copies Crew Personal Effects List.
2 copies Stores List.
1 copy Health Declaration.

Ship's documents not required. Vaccinations not possible. It is not possible to renew the Derat Certificate.

Pilotage: Not compulsory. Pilot may be contacted on VHF Channel 16.

Anchorage: Location clearly shown on chart.

Approaches: Vessels should only approach the Pilot station and fairway buoy in daylight hours.

The buoys are in the positions shown on the chart but are incorrectly numbered and are not lit at night. The lighthouse at Cape Blanco was not working. However, the African Pilot Volume No. 1 and the chart provided sufficient information for safe approach.

Approaching without an efficient radar is not safe as the visibility is normally very poor and many fishing vessels may be in the area.

The Channel from the Pilot Station to the oil pier is dredged to 15.5 m.

Restrictions: Berthing and unberthing during daylight hours only.

Max. Size: Max. draft 15.0 m.

Tugs: Vessel berthed without tugs as none available.

Berthing: Dolphin type berth with 7 Chicksan arms connected direct to the shore.

Dirty ballast can be discharged ashore.

Fresh Water: Not available.

Fuel: Not available.

Delays: Strong winds may delay tankers berthing.

SHIPMASTER'S REPORT: September 1987.

Documents:

4 copies Crew List.
3 copies Stores List.
3 copies Crew Declaration.
3 copies Passenger List.
2 copies Ammunition List.
2 copies Stowaway List.
3 copies Ports of Call List for the last 30 days.
2 copies Health Declaration.
3 copies Vaccination List.
2 copies Currency Declaration List.

The above documents, especially Crew Personal Effects List, Bonded Stores and Steward's Stores and Provisions List should be correctly declared, otherwise vessel will be fined by the Customs and other authorities.

Pilotage: Pilotage is compulsory for vessels calling at Nouadhibou. Vessel should anchor one mile South East of Buoy No. 2 if she has to wait for berth. Constant communication with the Pilot is necessary in order to determine time for berthing. Agent could not be contacted by VHF.

Approaches: If approaching Nouadhibou during the night a vessel must be very careful as there are scattered fishing vessels in the vicinity. The fishing vessels of various nationalities are found up to 30 miles from the shore and their nets are obstructions to navigation. Navigational aids in this port are very poor, Cape Blanco lighthouse and the (7) channel buoys are not lit. Buoy "A"or the Sea Buoy has moved 1.5 cables N.W. of the charted position, the others are in their charted position. The top mark of Buoy No. 2 is broken and was difficult to identify at a distance greater than 3 miles. All the buoys in the channel are unlit. Master was informed by the Pilot that there would be no movements during the night and pilotage service will be rendered only during day time. It is recommended by the Pilot that vessels arrive at Nouadhibou during daylight.

Restrictions: Depth of water in the buoyed channel is 16.0 m.. This was monitored by our fathometer during the passage. On the Oil Berth the Pilot usually docks the vessel on slack tide, and normally port side to, using the starboard anchor with two shackles in the water. Services of the Pilot are good and satisfactory.

Communications: When the vessel is at anchor and waiting for berth communication with the agent and the terminal is difficult. If you call them on the VHF they never answer, the language barrier is the problem. The service of the Agent was poor, he did not meet the vessel even when it was berthed. At The time of our departure we waited over an hour for our Departure Clearance.

Health: Free Pratique is usually granted when the vessel is on the berth. Cholera and Yellow Fever Vaccination Certificates are required.

Tugs: Not available. Vessels with bow thrusters have no problems.

Tanker Berth: The tanker berth is constructed of light materials and cement, the floor of the platform is wood, the length of the berth is about 165 m. It has 6 loading arms of 8 in. diameter. The fenders on the pier are hard rubber supported with springs. Two mooring boats will assist with the mooring lines of the vessel being berthed. A five man mooring gang will receive the lines. Slops or dirty ballast can be received ashore at the refinery facilities. Only the Loading Master could speak a little English, so language is the main problem with the operations.

Fresh Water: Not available.

Customs: Only 2 Customs Officers boarded the vessel,they scrutinize every paper or document presented to them, especially Bonded Stores List, Steward's Stores List, and Personal Effects Lists. If a mistake is found they will start to talk about fines to the vessel. It is therefore advisable to itemise the Declaration of the Bonded Store, Steward's Stores and Provision, and Crew Personal Effects Lists in order to avoid fine or any other problems. During our stay in port the Customs Officers boarded three times.

Gangway: The vessel has to provide her own gangway as there is no shore or terminal gangway provided. Ship's personnel should keep a constant watch on the gangway during the change of tide as the current is very strong and the range of tide is about 5 ft.

SHIPMASTER'S REPORT: June/August 1989.

Vessel's ETA to be sent through Dakar Radio. Contact with Dakar Radio was extremely difficult.

Land was picked up 18.8 miles away. An almost Easterly approach was made. Navigational aids are poor.

Cap Blanc Lighthouse (5fl. 5s. 23M) is inoperative. Most of the channel buoys are unlit without top marks and rusty.

Contacting Nouadhibou Pilots on VHF is difficult. We were asked to anchor off Buoy No. 2 and we did so in position Lat. 20° 44.7′ N., Long. 17° 00.8′ W. After a day, we were taken to the inner anchorage, with Point Central bearing 347° × 1.7 miles, and awaited berthing on completion of vessel loading alongside Point Central. After spending 2 days at the inner anchorage, we were taken alongside.

Vessels should have *sufficient quantity of fresh water* as a long wait can be expected. The ship prior to us was at the anchorage for 15 days.
Berthing: Berthing is carried out during daylight, during ebb tide and is port side alongside.

There is one African Pilot and one Asian Pilot. The latter, who is the Chief Pilot, boarded our vessel. He was not very sure of himself and gave unnecessary helm and engine orders.

No tugs are available.

A mooring boat takes 2 head lines (nylon) forward and a breast line/spring aft. These are placed on bitts and vessel has to heave alongside. The starboard anchor is also used.

Final moorings: Forward: 4 head lines, 2 breast lines and 2 springs.
Aft: 2 stern lines, 2 breast lines and 2 springs.

On berthing, the Customs Officer boarded the vessel. He did not seal the bonded store and was not particularly interested in looking at any papers. The Agent boarded the vessel the next day, possibly because a curfew was imposed from 2000 hrs. to 0800 hrs. Loading commenced 20 hours after berthing.

The loader is 25 years old and is in poor condition. The loader can take an air draft of 14.5 m. and remains high above the hold. As the cargo is very dusty, it flies all over the place. By the time we left, the decks were concealed with this cargo.

Machinery breakdowns are very frequent and of long duration. It took us almost 3.5 days to load 75,000 tonnes. The ship's figures are always accepted. There is no cargo survey, but at the discharge port a cargo surveyor on behalf of the shipper boarded the vessel.

A sharp watch for stowaways was always maintained.

Fresh water (hard) is available alongside in small quantities (50/60 tonnes).

A pilot ladder is used to get on the wharf. A terminal bus is available every hour to go to the nearby town of Nouadhibou, which is free of charge. Taxis charge 200 Ouguiya. (U.S.$1.00 = 70 Ougiya). Only change money in the bank. Never have any transactions with the terminal people as this is viewed very seriously by the Authorities.

Further observations made during vessel's visit to Point Central (Mineral Berth) in August 1989:

Contact with Nouadhibou Pilot was extremely difficult as the VHF set in the Pilot's office is also shared with the Agent (SNIM). The radio is only switched on when the Pilot is in the office or wants to make contact with a ship.

Visibility is reduced to less than 2 miles most of the time due to the haze caused by the particles of the light ore being carried all over, by breeze, when loading is in progress.

We remained at anchorage for 11 days and alongside the berth for 4 days.

Although the loading rate of the ore is about 3,500 metric tonnes per hour, the machinery breakdowns delayed the loading.
Shore Leave: It is advisable to get the local currency as cash advance from the Agent, it can then be returned if unused. In order to change foreign currencies at the local banks, the Customs' approval must be given.

Shopkeepers and cabs quote high rates to foreigners, so bargaining is necessary.

Knowledge of French is quite useful.

SHIPMASTER'S REPORT: July 1990.
Documents:
2 Crew Lists.
2 Vaccination Lists.
2 Personal Effects Declarations.
2 Currency Declarations.
2 Ship's Stores Lists.
2 Provisions Lists.
2 Bonded Stores Lists.
2 Arms and Ammunition Lists.
2 Narcotics Lists.
2 Cargo Manifests.
2 Passenger Lists.
1 Health Declaration.
Approaches: A large number of fishing vessels were encountered off Cabo Corveiro and Cabo Dubouchage, but they generally kept clear. The coastline is easily identifiable on radar.
Buoyage/Nav. Aids: B.A. Chart No. 1699.

No. 0 Buoy was missing. No. 2 Buoy was out of position. It was seen in approximate position 20° 42.75′ N., 17° 01.93′ W. The topmark was broken and missing. No. 1 Buoy was out of position, approximately 0.2 nautical miles S.E. of charted position. No. 3 Buoy was about 0.1 nautical miles off charted position. No. 4 Buoy was found in charted position. No. 8 Buoy was missing.

None of the lights for the buoys were working.

Cap Blanc Lighthouse light was not working.

Anchorage: About 1.5 nautical miles N.E. of charted position of No. 2 Buoy, around position marked on B.A. Chart No. 1699. Holding ground is good.
Winds: At anchorage and alongside berth, mainly Northerly winds Force 4/5 were experienced, tending to increase during late evening.
Pilotage: Compulsory. Pilot boards and disembarks between No. 1 and No. 2 Buoys. Pilot boat has a black hull and white superstructure, and has "PILOTE" written on the hull. Only 2 pilots are employed in the port.
Health: Free Pratique is granted on berthing. Quarantine officials did not board the vessel.
Customs: Bond locker was not sealed. Customs officer carried out a check of the bond locker and provisions stores.
Radio: All messages to agents had to be sent via St.Lys Radio (FFL), as Nouadhibou Radio could not be contacted at all. Agents advised that Dakar Radio was not reliable, and vessel to use only St.Lys Radio.
VHF: Pilots available on VHF only when working on ships, in daylight hours. Port Control answers only during early hours of the morning (0700 hrs. – 0900 hrs. approx.). Message can be left with pilots, requesting agents to call back on VHF.
Tugs: No tugs available.
Berthing: Vessels usually berth on ebb tide and sail on flood tide. Although the pilots do carry out these operations at other times, to avoid loader being idle. Usually pilotage is not done after nightfall. In case a vessel has to be berthed at night, the loaded vessel is removed from the berth, and anchored just off the berth, in inner anchorage.

Generally vessels are berthed port side alongside.

Starboard anchor is dropped, about one shackle in water, to assist in hauling off.
Mooring: Two mooring boats in attendance for berthing. Two head lines are sent first, followed by 2 back springs from aft. Total lines used were 4 head lines, 2 breast lines and 2 springs from forward; 2 stern lines, 2 breast lines and 2 springs from aft.
Restrictions: Maximum draft allowed for berthing is 12.0 m. Maximum sailing draft allowed is 16.15 m. Maximum air draft permissible for loader to top of hatch coaming is 14.0 m., although we found about 1.0 m. clearance at an air draft of 14.1 m.
Stevedores: Stevedores work around the clock.
Density: 1025 – 1026.
Fresh Water: Usually no fresh water available. We received a small quantity by fire tender. Fire tender capacity was 6 tonnes, and the water was very expensive.
Fuel: Usually none available. Agents advised that 50 tonnes – 60 tonnes of gas oil can be supplied by trucks in an emergency.
Watchmen: Compulsory. No stowaway problems due to presence of watchmen, according to agents.
Telephone/Fax: Telephone lines were not clear. Fax available, but messages were received garbled by Hong Kong office.
Surveyors: No surveyors available for cargo quantity surveys. Ship's figures accepted for Bill of Lading.

AUTHORITY: Societe Nationale Industrielle et Miniere (SNIM), B.P. 42, Nouadhibou, Mauritania. *Tel:* 100, 114. *Telex:* 459 Snim Ndb, Snim 426 MTN. *FAX:* 45396/49027/49013. *Contact:* Mohamed Salem Ould Cheikh, Chief of Port Department.

NOUADHIBOU HARBOUR: 20.54 N. 17.03 W.

LOCATION: Position of Trading Port 20° 53′ 48″ N., 17° 03′ 10″ W.
DOCUMENTS:
3 Crew Lists.
2 Stores Lists.
2 List of Personal Effects.
2 Lists of Ports of Call.
Cargo Manifest, even if nil.
Manifest of Passengers Disembarking or in Transit, even if nil.
1 List of Foreign Currency held by ship and crew.
PILOTAGE: Not compulsory but recommended, effected by SNIM/Cominor. Pilotage not available at night.
RESTRICTIONS: Depth of buoyed Channel 24 ft. Anchorage strictly prohibited in the Channel.
RADIO: Nouadhibou Radio – Call sign 5TA. Hours 0800 – 1800 daily.

It is recommended that vessels advise their Agent of ETA 72 hours prior to arrival.
VHF: Request Pilot through Port Captain on VHF Channel 16.
TUGS: One tug, 150 h.p.
BERTHING: Pier of 125 m. length connected to shore by a 150 m. long bridge.

Outside general berth for ships with a 24 ft. draft and a 160 m. max. length. According to certain vessel's accommodations, the extreme hatches cannot be discharged through quayside.

Inside berth for ships with a 15 ft. max. draft and a 80 m. max. length.

The maximum payload authorised on the bridge connecting the pier to the warehouses and the storage areas being limited to 10 tons, all heavy lifts over 10 tons are to be compulsorily discharged on lighters.
Lighterage Piers: Southern Quay = length 80 m; depth 10 ft.
Western Quay = 180 m.; depth 10 ft.

The Southern Quay is connected to SNIM/Cominor railroad network, allowing the loading of heavy lifts on railcars.

2 covered sheds: total 3,500 sq.m.

1 area with macadamised roads offering 30,000 sq.m. of storage connected to SNIM/Cominor railroad system.
Lighterage: Compulsory for any ship whose characteristics do not allow a safe berth. Compulsory for any loading or unloading of heavy lift over 10 tons.

Not compulsory in case berths are occupied and if manpower and equipment are still available.

CARGO HANDLING EQUIPMENT: 1 lighter × 150 tons, 2 flat top lighters × 200 tons.
14 cranes × 4 tonnes.
2 cranes × 15 tonnes.
4 stacker trucks × 3 tonnes.
1 stacker truck × 8 tonnes.
16 trailers.
6 tractors.
1 rail mounted crane × 70 tonnes (SNIM Property).
1 mobile crane × 50 tonnes, available on request for heavy lifts.
2 cranes on rails for containers.

STEVEDORES:
Working Hours. Normal hours: from 0800 to 1200 and 1400 to 1800 from Saturday to Wednesday.
Overtime: Saturday to Wednesday: 1200 – 1400 hrs. 1800 – 2000 hrs. Thursday: 0800 – 2000 hrs. Fridays and holidays: 0800 – 2000 hrs.

Nightwork possible after 2000 hrs. in order to finish.

During the time of Ramadan work finishes at 1800 hrs.

There is no work on the following holidays: New Year's Day (Jan. 1); Tabaski (El Aid) (variable date); Day of Reunification, (Feb. 26); El Mouloud (variable date); Labour Day (May 1); Africa Liberation Day (May 25); Korite (El Fatar) (variable date); Independence Day (Nov. 28); Christmas (Dec. 25); 1st Moharam (variable date).

The holidays corresponding to the Islamic Religious holidays are calculated from Arabic calendar.

FRESH WATER: Available in small quantities.
FUEL: Available in small quantities.
SURVEYORS: Bureau Veritas, Lloyd's and Salvage Association.
CARGO GEAR: Ship's gear used.
GENERAL: *Winds:* Mainly N./N.E. in the morning, N./N.W. in the evening. Wind force: variable from August to January, rather strong from February to July. Tidal current running North during Flood, and South during Ebb (1.5 to 2.5 knots).
Swell: 0.80 m. max. Strong surge alongside all berths.
Rise and Fall: HW 2.35 m. LW 0.35 m. difference = 2 m.
AUTHORITY: Port Autonome de Nouadhibou, B.P. 236, Nouadhibou. *Tel:* 21-34, 22-35, 22-76. *Telex:* 441 Mtn.

NOUAKCHOTT: 18.02 N. 16.02 W. (See Plan)

NOTE: All information below, except the Shipmaster's Reports dated October 1987 and March 1988, is for the old port.
LOCATION: Nouakchott Wharf (old port) is situated in position Lat. 18° 02′ 08″ N., Long. 16° 01′ 43″ W., being about 7 km. S.S.W. of Nouakchott.

Vessels anchor off the port and movement of cargo is undertaken by barges and lighters.

WIND: The direction of the wind varies from N.N.W. to N.E. The predominant winds affecting navigation are from the N.N.W.

The rapid onset of bad weather should be noted. When conditions are bad vessels should weigh anchor and proceed seaward as the coast offers no natural shelter.

CURRENTS: There is an almost permanent North-South current running at about 0.5 knots; it reverses South-North on a few days during the year.
SWELL: 2 kinds of swell have been observed: Local swell due to the coastal winds, varying from North to N.W. in dry weather, and turning between N.W. and S.W. during the wet season.
ANCHORING ROADS CONDITIONS: The periods during which climatic conditions are liable to upset work are as follows: Strong swell, January/March; rain, July/August/September.

This virtually allows the port to be used during 200 days in the year.

WORKING CONDITIONS: Vessels must locate themselves as closely as possible, where they can anchor without risk, to the wharf, within the limits of their drafts (generally between 0.5 and 0.25 miles), in line. At the lighterage quay there is a depth of water of 7 m. – 8.5 m. It is preferable for a ring of lines to be placed in advance around the sides of the vessel to which barges may tie up.

Experience shows that the tonnage unloaded currently by the wharf is 400 to 500 t.p.d. where goods in sacks are concerned. It is possible to work 2 vessels at once, but each will only work half of this tonnage.

Work is currently carried out on board by private companies, and on land, in the launches and lighters by the Wharf Organisation personnel.

As far as wharf personnel are concerned, during working days, the normal working hours are from 0800 to 1600 hrs.

Overtime day hours are from 1600 to 1900 hrs.

Night time working is considered to apply between the hours of 1900 and 0600 hrs. (currently impossible).

It should be noted that there is an overtime hour at the beginning and end of work, which is the time required to launch or bring barges on to the landing-stage.

RECOMMENDATIONS TO MASTERS OF VESSELS: Vessels must be at all times capable of gaining the open sea rapidly, since bad weather comes up very quickly, and the coast affords no natural protection.
WHARF: The working platform is 86 m.×21 m. and lies in a N.W.-S.E. direction; it is connected to the shore by a gangway 246.5 m. length and 7 m. wide.

The wharf is designed to take a load of 2 lorries of 25 tons (2 axles of 10 tons and 1 axle of 5 tons) or an overload of 1 ton/sq.m.

The Wharf Manager's office together with Police, Customs and radio office are located on the shore.

FLOATING EQUIPMENT: 1 launch of 50 h.p., 2 launches of 100 h.p., 10 steel barges, internal dimensions 10 m.×3 m.×1.25 m. with capacity for 20 tons cargo. 1 steel barge, internal dimensions 13 m.×4 m.×1.35 m. with capacity for 30 tons cargo.
WHARF EQUIPMENT: 3 cranes with capacities of 20 tons, 8 tons and 5 tons respectively.
LAND EQUIPMENT: Goods are transported from the wharf to the storage area by 18 trailers each with a capacity of 8 tons. The port is also equipped with 2 tractors of 80 h.p. and 5 fork-lift trucks with capacity of 3.5 tons.
TANKERS: Dakar oil companies are presently building a hydrocarbon oil depot about 400 m. North of the wharf.

The depot will be fed from tankers by means of 2 sea-lines of 900 m. length.

GARBAGE DISPOSAL: Not available.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: Mauritanian Ouguiya (OM). U.S.$ 1.00 = 80 OM (27.4.91).

SHIPMASTER'S REPORT: August 1978 (Old Port).
The following is to be read in conjunction with the information above.
Currents: Reversal of current is unpredictable and may last for several days on each occasion.
Anchoring Roads Conditions: While in the main the holding ground is good, there appears to be patches of hard sand where the anchor cannot take hold.
Working Conditions: It is practical to work 4 vessels at once plus one of up to 5,000 d.w.t. at the new extension to the pier.

Present (August 1978) hours for ships at anchor are 0800 to 1600 hrs. (Ramadan) but Sunday overtime can be worked if vessel gives authority. It seems that this is very expensive as so many are involved.

At the pier extension work has been observed from 0800 to 2400 hrs. and a mobile crane is available there to assist ship's gear.

Wharf Equipment: There are 7 cranes with various capacities, two being used for lifting out barges for repairs and to house the tug launches at night. The mobile crane is backed up by some 8 small fixed jib carriers.
Tankers: The sea berth North of the pier is in operation.
Documentation: See "Nouadhibou".
Customs Control: The officer will not board until the Agent has entered the vessel with the necessary documents, hence there will always be a time interval between arrival and being boarded for inspection. So financial loss must be expected accordingly.
General Observations: Due to the lack of any VHF or similar communication system, it is difficult to assess the true performance of this port. It is most uncomfortable for any vessel of more than 7,500 d.w.t. unless the barges are prepared to come out to 7 or more cables from the pier. In the recommended anchorage the effect of swell and surf is such that the vessel frequently swings through a wide arc and the chances of breaking out the anchor are very real. The erratic current direction may also swing the ship towards the pier hence the above opinion. Other vessels may also anchor so as to swing across one's own cable and anchor.

SHIPMASTER'S REPORT: October 1979 (Old Port).
Anchorage: Vessel anchored in position Lat. 18° 02.2′ N., Long. 16° 02.7′ W. (with the lighthouse tower on the jetty bearing 101° distance 3.3 cables).
General: City of Nouakchott (the capital) is in position Lat. 18° 05′ N., Long. 15° 58′ W. The port jetty is in position Lat. 18° 02.1′ N., Long. 16° 01.55′ W. being about 7 km. S.S.W. of the city. The official languages are Arabic and French. There are asphalt roads, one which leads to Dakar. There is an airport (close South of the city) with connections to Dakar and Casablanca. Scheduled flights being published in the daily newspapers.
Time: GMT.
Authorities: No authorities come on board on arrival, however, after a few days an agent's clerk comes on board and takes all port forms and documents ashore. No store rooms are sealed but stores list is to be filled in properly.
Documents: Two copies of each of the following are required:
(a) Crew List.
(b) Health Declaration.
(c) Vaccination List.
(d) List of Ports of Call.
(e) List of Arms and Ammunition.
(f) Ship's Register and Tonnage Certificate.
(g) Ship's Stores List.
(h) Crew's Personal Effects Declaration.
(i) Notice of Readiness/Manifest & Stowage Plans.

With regard to Notice of Readiness it is advisable to send cable via Dakar Radio. It is also advisable to ask the clerk for his identification card and ask him to sign a receipt for the above.

Shore Leave: Passports are needed for going ashore, only method of going ashore is by ship's own lifeboat or during working hours by the motor launches used for transporting barges.
Consuls: Germany F.R., China and U.K.
Medical: All services can be arranged by Agent.
Stores: Limited amounts of vegetables, cereals, coffee (instant) and milk (condensed) can be arranged by agent (all items are imported). There is no ship chandler.
Repairs: No facilities.
Fresh Water: There is no possibility of supplying fresh water to vessels, therefore rationing of water is recommended on arrival due to the fact that turn of 30 – 40 days is normal for general cargo, bulk cargoes and bagged cargoes. Priority being given to vessels with cement cargo as construction of a new port is taking place 1.5 miles to the South. At most times there are 15 – 20 vessels at the anchorage.
Repatriation: Can be arranged by Agent via Dakar.
Weather: See "African Pilot", Volume 1 and supplements. During the time the vessel was at the port (mid-September to mid-October) there was hardly any rain. Temperatures ranged from 20°C to 42°C depending on the direction of the wind. The barometric pressure was 1008 mb. (min.) to 1012 mb. (max.). Winds normally from the North to N.W., being

influenced by anticyclones in the Dakar and Casablanca areas. Occasionally winds were from the West, S.W., South, S.E. and East. The wind was from Force 3-5/6 for short periods which quickly caused deep swell and surf.

Easterly winds caused sand storms and visibility becomes poor.

The swell is reported to reach high levels in the first and last quarter of the year and vessels are advised to leave the anchorage when the rapid increase in wind appears. These winds come from two directions, namely, Northerly and Northwesterly.

Approaching/Pilotage: No Pilot available. Charts B.A. 3247 and B.A. 2078 Plan (1976/correction 1978). Vessels should approach the coast heading 090° from the 20 fathom line 9 miles to the West of the charted lighthouse (Chart B.A. 3247). The jetty is a good radar target at 37 – 40 miles and the radio beacon at Nouakchott "KC" on 297 kHz in position Lat. 18° 04.3′ N., Long. 15° 58′ W., is an excellent aid. The depths on this track are between 20 fathoms and a minimum of 30 ft., close to the shore line (0.25 miles offshore). There are no dangers or difficulties encountered approaching.

Navigational Aids: B.A. Chart 2078 Plan (1976/correction 1978) most charted buoys are not in correct position. The unlit wreck buoy in position Lat. 18° 01′ 32.2″ N., Long. 16° 02′ 48.8″ W., marks a wreck to the S.E., the wreck is not visible and the position is doubtful. For further information see the plan of the port made by the ship's officers.

Anchoring/Berthing: Anchorage is recommended in the area to the North of the green wreck buoy and between 0.25 and 0.5 nautical miles from the shore. A close anchorage is required during discharge to avoid long distances for the lighters and tugs. The jetty berth (N.W. end) could be used by vessels during calm weather and low swell. The berth is 52 m. in length and the jetty which runs in a N.W./S.E. direction is 86 m. long with a width of 21.17 m. If berthed alongside, good fenders must be available at all times and crew must stand by the mooring ropes.

Remarks: Receivers sometimes require a vessel to berth at the jetty but care should be taken, as if vessel causes any damage during the difficult approach or by swell, the authorities may sue the Master/Owners with high penalties and detain the vessel until payment is made. There has been an instance where a Master has been placed under "hotel arrest" and all papers and documents for the vessel kept ashore, resulting in a delay to the vessel of 40 days.

Stevedoring/Port Equipment: The stevedore company is So Ge Co Nouakchott, Societe Generale de Consignation.

The jetty wharf is connected to the shore by a 246.5 m. long bridge with two lanes each of 7 m. width. There is an old pipe-line in the centre of the bridge between the two lanes. The bridge runs in a 104° direction to the shore. At the Southern side of the jetty-platform there are 7 cranes (one damaged) with lifting capacities of 12.5 to 25 tonnes.

There are 5 motor launches (50 – 100 h.p.) for towing lighters to and from the vessels. There are also 10 steel barges (lighters) with a capacity from 20 – 70 tonnes. At night the launches are lifted onto the jetty and the lighters are either moored alongside the jetty or at buoys.

In addition to the 7 cranes there are available on the jetty and wharf area 10 mobile cranes and 5 forklift trucks (3.5 tonnes) and 2 tractors for transporting goods on trailers (total 18), capacity of the trailers being from 8 – 20 tonnes.

Cargo is discharged into the barges and transported to the shore. Net slings mostly being used for bagged cargo and general cargo. There are stacking areas of 70,000 sq.m. and 45,000 sq.m. near the wharf. So Ge Co have 2 cold rooms (6 m. × 3 m.). There are 4 sheds, storage area 2,000 – 4,000 sq.m. capacity.

Signals: When loaded barges alongside the vessel are to be collected by the launches, vessel is to sound 2 long blasts on the ship's whistle.

Average discharge rate: Bulk cargo 7.5 tonnes per gang hour and bagged cargoes 15 tonnes per gang hour, however, this is dependent upon barges and launches. The average tonnage discharged per day/gang is for general cargo 15 – 35 tonnes and bagged cargoes 35 –86 tonnes.

Working hours: Monday to Friday 0800 – 1600 hrs. Saturday 0800 – 1200 hrs. Sundays and local holidays are on overtime.

Note: It is compulsory that 1 hour prior to and 1 hour after working hours is counted as overtime for shore gear preparation.

Agency: Care should be taken when appointing Agents as agency fees, handling fees and port expenses can vary enormously.

SHIPMASTER'S REPORT: October 1987 (New Port).

Port: Port de L'Amitie.

Location: 3 miles South of Nouakchott Wharf.

Pilotage: Pilot (Chinese) boards between the first buoy and the wharf.

Anchorage: Vessel anchored 1.5 miles West of berth in a depth of 12.5 m.

Restrictions: No berthing on Friday.

Max. Size: Depth alongside 10.0 m. Vessel entered and sailed with a draft of 8.6 m. To the West of the port entrance there is a depth of 11.0 m.

Radio: ETA messages sent via St. Lys. It is not possible to telephone Nouakchott direct or through Nouadhibou Radio.

VHF: The Port Captain (Chinese) located at Nouakchott Wharf, 3 miles to the North, is on Channel 16 from 0800 hrs. – 1400 hrs. (except Friday). They will advise pilot and tugs of vessel's ETA.

The Agent (Compagnie Mauritanienne de Navigation) is on Channel 16 from 0730 hrs. – 1530 hrs. (except Friday).

Pilot and tugs on VHF when working.

Tugs: 2 tugs available.

Berthing: The approach jetty runs East–West and is 700 m. in length. The wharf at the western end is 585 m. long and 100 m. wide and lies in a NE'ly–SW'ly direction (060° – 240° T). The depth alongside is 10.0 m. The jetty head (length 100 m.) is protected from swell from the West.

Two buoys mark the land-side of the port limits. The wharf has an open storage shed of 50 m. length.

Stevedores: Fairly good at handling containers.

As there is a heavy swell it is preferable to use steel wire slings. Ship's derricks used as no shore facilities. Containers loaded direct on to lorries at Nouakchott Wharf (6 km.), by forklift trucks and transported to the berth.

Stevedores work from 0800 hrs. to 1700 hrs. with the possibility of overtime. No work on Friday.

Documents: Usual Declarations required plus a Foreign Currency Declaration. The Agent takes all documents ashore.

Customs: Customs make an inspection but do not seal any of the stores.

Port Captain: The Chinese Port Captain checks all Safety Certificates.

General: The port presents difficulties when there are strong trade winds as the vessel is poorly protected.

Because of the swell, the sea can come over the open storage area. Mooring should be frequently checked.

SHIPMASTER'S REPORT: March 1988 (New Port).

Please Note: The following Report translated from French.

Approaches: Coming from the North, landfall at 18° 02.5′ N., 16° 28′ W., then steer 100° to come to the South of the new port.

At 20 miles from the coast weak echoes from the town and a few buildings close to the pylon in position 18° 08.5′ N., 16° 00.5′ W. observed on the radar.

At 15 miles echoes from the new port and the old wharf appear. The coast only appears at 9 miles on the radar as the coast is dunes and swamps.

In the event of electricity power failure in the town, only the light at the end of the new port operates. This light was observed at 5 miles. This small lighthouse is a white pylon of concrete, about 10 m. high, and with a white light on top (2 secs. on, 3 secs. off).

The new port is 2.6 miles to the South of the old wharf (see "Plan" – "radar picture at 6 miles"). On land to the N.E. of the access to the port is a modern lighthouse with white and black stripes (see "Plan"). The light is Iso. white (5 secs. on, 5 secs. off). Height 37.1 m., range 16 miles (information obtained from authorities).

It is possible to distinguish an approach alignment (085°) formed by two iron pylons on top of which is a white and red diamond formation, and carrying lights (see "Plan" — "radar picture at 1.5 miles"). On this alignment and at 1.8 miles from the jetty, was a landing buoy (disappeared). The alignment brings the vessel close to the jetty.

Pilotage/Tugs: Pilot and Port Captaincy contacted on Channel 16. If entering, the Pilot requests vessels to anchor between 0.5 – 1 miles from the jetty(s). It is preferable to remain to the S.W. of the jetty at 0.8 miles. Depth of water from 9.0 m. – 10.0 m., and this for short duration of anchoring. The Pilot comes onboard when anchoring, and comes with a tug. The tug ties up near to the pilot ladder.

Do not lower the anchor until the pilot is on board (fairly long operation).

The port has 2 tugs of 980 h.p. (theoretical power), but they barely make 500 h.p. A single tug operates, and has a mixed Chinese-Mauritanian crew. There is one Chinese pilot and 2 Mauritanian trainee pilots.

NOTE: In the event of anchoring for a long time, remain in depths of 12 m. – 15 m., towards the old landfall buoy, at the North axis of the channel. No entry or sailing at night.

Port: A long arm of 750 m. is aligned East-West, followed by a 580 m. mole with 3 berths. This mole is equipped with red coloured cranes, of 10 tons lifting power. The mole runs at 240°. An 80 m. long breakwater orientated at 190° and formed by concrete blocks extends from this mole. Near to the end of this breakwater is the little white lighthouse (2 secs., 3 secs).

On land near to the access to the arm are 4 large light green sheds and a container park.

Two yellow-black and yellow-black-yellow buoys indicate the sand bank in the port. The marks are respectively N. and W. The indicator of the North buoy is partly broken away. Buoys are not lit.

Fairly strong undertow is experienced in the port, and vessel rolls almost continuously whilst at the quay. There are good fenders along the quay.

SHIPMASTER'S REPORT: August 1989 (New Port).

The new port, named "Port of Friendship", has been in operation since November 1987. The centre of the jetty is located in position Lat. 17° 59.35′ N., Long. 16° 02.1′ W., 15 km. S.S.W. from the capital city Nouakchott. The jetty is 585 m. in length and is 45 m. wide and lies in a 240°/060° direction and is connected to the shore by a 750 m. × 13 m. long bridge which lies in a 270°/090° direction.

There are 3 berths on the jetty:
No. 1: 149 m. Min. depth 9.8 m.
No. 2: 168 m. Min. depth 10.0 m.
No. 3: 190 m. Min. depth 10.3 m.

The port is designed to import and export 500,000 tons per year.

The jetty is equipped with 2 gantry cranes of 10 tons' capacity each, but handling of cargo is normally by ship's gear.

There is a breakwater from the N.W. corner of the jetty, extending about 200 m. in direction 200° (See "Plan"). A light beacon has been established at its S.W. extremity.

Two yellow buoys mark the East and South extremity.

One mooring buoy lies between the Naval Berth and extreme East buoy.

There is a pair of leading lights with diamond top marks in line 080°.

Several buildings, warehouses and 42,682 sq.m. of open storage area are located about 1 km. East of the jetty wharf.

The Port Office lies close South of the port gate.

The Pilot Station is on the N.E. corner of the jetty, near Berth No. 1. Two tugboats of 900 b.h.p. each berth alongside Berth No. 1.

A naval berth is under construction on the South side of the middle of the jetty bridge.

The main lighthouse, a white round tower with black bands, about 35 m. high, lies 200 m. N.N.E. of the extreme East of the bridge (approximate position Lat. 17° 59.5′ N., Long. 16° 01.5′ W.).

Anchoring is recommended in the area 1 mile West of the breakwater in approximate position Lat. 17° 59.3′ N., Long. 16° 03.2′ W. with depth 12 m., a sandy bottom and good holding ground. The current runs at less than 0.5 knots, ship's heading is nearly always against the wind. There are no dangers or difficulties encountered when approaching the anchorage. Occasionally, there are one or two vessels waiting to berth.

Normally, one tug assists vessel to berth or unberth, but in daytime only and in good weather. During bad weather with wind from S.E. – S.W. at Force 6 or more, the vessel may have to stay on the berth, even if cargo work has been completed.

The predominant swell is Northwesterly. It always affects the berths and causes vessels to range continuously. It is therefore important that double springs are used fore and aft and that spare lines are ready when bad weather is forecast. The records show that in the Winter of 1987, a vessel broke 21 ropes during strong Northwesterly winds, after which she left the berth to anchorage for safety.

Easterly winds cause sand storms and visibility becomes poor, sometimes as low as 20 m.

Handling rate: Average discharge rate for bagged sugar, wheat or cement is 20 – 25 tons per gang/hour, tea in cases 10 – 15 tons per gang hour and other general cargo averages 10 – 20 tons per gang/hour, however this is dependent upon the trucks and gangs.

Cargo is discharged from the ship and reloaded into the trucks at the same time, thence directly to the city. These trucks have a capacity of between 10 tons – 30 tons.

Net slings are mainly used for bagged cargo and general cargo.

Work is in 2 shifts per day: Day shift from 0800 hrs. – 1800 hrs., with 1500 hrs. – 1800 hrs. on overtime. Night shifting is 1800 hrs – 0530 hrs., all on overtime which is arranged and approved by the ship.

Friday is a holiday, but work is possible at overtime rates if vessel gives approval. Saturday and Sunday are normal working days.

Documents: See "Nouadhibou".

Customs control: For Chinese vessels the Port Officers do not board on arrival. They may board later to see the vessel but do not seal the bond. The Agent boards the ship to bring back the necessary documents after berthing. For other foreign vessels they will board ship after berthing and seal the bonded store as usual. They may take away some ship's certificates for checking and return them to the ship before sailing.

There is no stealing among the stevedores, even when discharging general cargo and there are no shore watchman here.

VHF: Port Control on Channel 16, working 24 hours a day. Pilot Station on Channel 6, working when berthing and unberthing only.

Berthing sometimes delayed when not ready in time.

There are 2 Chinese Pilots and 3 local apprentices.

Supplies: No ship chandler available. Limited provisions can be supplied through Agent. Fresh water can be supplied by water tank through Agent. Each tank has 13 tons capacity, average rate 10 t.p.h. (daytime only). Good quality but expensive, U.S.$12.00 per ton.

Repatriation: Can be arranged by Agent. Regular airlines to Dakar and Casablanca.

Medical: Can be arranged by Agent.

Shore Leave: Permitted. Passport or Seaman's Book required.

Fishing: Plentiful fish in the port and anchorage. Fishing is allowed on board only.

AUTHORITY: Monsieur le Directeur du Port de Nouakchott, Ministere de l'Equipement, Nouakchott, Mauritania.

Societe Nationale Industrielle et Miniere, P.O.Box 1260, Nouakchott. *Tel:* 522-74, 523-29. *Telex:* 551 Snim Nkc.

AGENT: Societe Mauritanienne de Peche et de Navigation (S.M.P.N.), Route de l'Aeroport, B.P. 40254, Nouakchott, Mauritania. Tel: 253638, 253703. Telex: 5847 MTN SMPN. Fax: 253787.

NOTES

Mauritius

PORT LOUIS: 20.09 S. 57.30 E. (See Plan)

PORT LIMITS: The commercial area of the port is the area inside the port bounded by the Entrance Buoys and the shore line of the Inner Harbour. Vessels at the Outside Anchorage lie within the limits of the port defined by an imaginary line joining Pointe Aux Sables and Pointe Aux Piments. In this area commercial activities are restricted to bunkering, ship repair and the landing of passengers or personnel.

PILOTAGE: Compulsory for vessels over 100 n.r.t. Vessels are piloted inwards and outwards at any time of the day or night if circumstances permit. Inward bound vessels are met about 1 mile seaward of the Entrance Buoys though they may, in some circumstances have to be boarded at a greater distance offshore.

Once the Pilot boards the maximum distance to any berth is 1.5 miles. Both anchors should be ready for use and ships' lines prepared for making fast tugs before entering the channels.

Anchors are often used to assist in turning vessels.

ANCHORAGES: Open roadstead with anchorages for vessels of any draft. Admiralty Chart No. 713 refers.

RESTRICTIONS: Vessels carrying highly inflammable products are only berthed during daylight hours.

MAX. SIZE: Harbour Entrance depths from 12.8 m. to 36.3 m. Channel dredged to 12.1 m. Also see "Berthing".

HEALTH: *Shipmaster's Report:* June 1989.

The following message was received from Mauritius with regard to Free Pratique by Radio.

1. We are pleased to announce that from 5th June 1989 the Ministry of Health has kindly accepted to grant Free Pratique by Radio. This is as a result of repeated requests from Association of Shipping Agents over the past years.
2. Applications should be submitted to Port Health Inspector 48 hours prior to arrival of vessel by Agent.

Following Data Required:

I Name of ship.
II Expected time and date of arrival.
III First port of loading, i.e. port of departure.
IV Last port of call.
V Has any case of contagious disease, or of sickness suspected to be of a contagious nature, occurred on board during the last 15 days?
Indicate the number of cases of contagious disease(s) occurring during the last 15 days.
VI Has any case of death from sickness due to contagious disease(s) or otherwise occurred on board during the voyage?
Indicate the number of deaths from sickness due to contagious disease(s) or otherwise occurring on board during the voyage.
VII Does the ship have a ship's surgeon on board?
VIII Number of crew (including Master) and number of passengers.
IX Indicate the number of crew members or passengers disembarking.
X Does the ship have in its possession a Derat Certificate or a Derat Exemption Certificate, also mention the date of expiry.

RADIO: The Port Master requires to be notified of the date of the vessel's arrival, the length and draft and purpose of call, by radio as soon as it is possible for Master to communicate with Harbour either:

1. By CW transmission through the Government Radio Station (3 BA) at Vacoas on 500 kHz.
2. By R/T transmission through Port Louis Harbour Radio Station (3 BB 3) on 2182 kHz.

VHF: Port Louis Harbour Radio Station is equipped with VHF and maintains 24 hour watch on Channel 16.

TUGS: 2×830 h.p. diesel-engine tugs, *Betty* and *Winnie*. These tugs are available for deep-sea towage and salvage and are fitted with fire-fighting equipment, R/T and VHF. 3 smaller tugs of 320 h.p. are also available for harbour work and fitted with VHF.

A new Voith Schneider tug of 2,670 h.p., *Sir Seewoosagur*, is available for deepsea towage and salvage and is fitted with fire fighting equipment, SSB and VHF. It is available for harbour work.

BERTHING:

Quay No.1: Length 122 m., maximum draft 11 m. at any state of tide, vessels up to 183 m. overall length can be accommodated. This berth is designed mainly for discharging petroleum products (Esso, Shell and Caltex), ammonia, bulk fertiliser and coal. General cargo vessels and passenger ships are occasionally berthed at the Quay.

This is a common user berth on the port side of the Entrance Channel. This berth handles the largest vessels in port but due to the low power of the tugs the maximum displacement is limited to 33,000 tons.

Ships approaching the berth from seaward in daytime are swung to port with the aid of tugs and berth starboard side to the quay. At night the berthing is always port side-to, however, night berthing is rare. The ship will be turned in daytime when leaving the port.

As winds are often fresh, and passing traffic can cause surging, moorings should be carefully tended.

The quay is of concrete construction. It is well fendered, but there is little or no resilience in the fendering rubber rollers so heavy landing must be avoided.

Quays No. 2-3: Marginal quays having a total length of 366 m.; maximum draft 11.0 m.; vessels up to 195 m. overall length can be accommodated. Berth No. 2 will continue to be used for general cargo operations whereas Berth No. 3 will be restricted as far as possible to container operations.

Quay No. 4: (Container Terminal): Length 183 m., maximum draft 11.0 m. This berth is for container operations. A Container Park of 6 hectares is available for storage of containers. Vessels up to 220 m. overall length can be accommodated.

Equipment:
3 × 35 tons Hyster (4 high).
3 × 35 tons Lancer Boss (4 high).
3 × 35 tons Lancer Boss (3 high).
3 × 32 tons Hyster (3 high).
2 × 26 tons Hyster (2 high).
1 × 18 tons Hyster.
2 × 10 tons Hyster. } Empty
2 × 7 tons Hyster. } Containers.
1 Ferranti 2K90 – 40 Tons.

Vessels must use their own gear to discharge/load containers. The movement from the hook to the Container Park and vice versa is carried out by tractor/trailer system.

Quay D: This is a common user berth near the inner end of the harbour on the port hand when entering. Length 149 m., maximum draft 9.4 m. can take a vessel up to 183 m. overall length. This berth is used for discharging of petroleum products and loading of bulk molasses, edible oil and bulk wheat.

Passenger vessels are also berthed alongside the quay.

Vessels follow the Entrance Channel leading to a position off the berth where they are swung with the aid of tugs to berth port or starboard side to quay depending on wind conditions.

Wire moorings will be accepted, but for the ease of handling, fibre/synthetic tails are preferred.

Cautionary Advice:

(a) The quay is of concrete construction protected with modern rubber fendering. The fendering is not resilient and heavy landings must be avoided.
(b) The berth is little affected by passing traffic but fresh offshore winds may be experienced, especially during the afternoon.
(c) Although 2 policemen are usually stationed on the quay when tankers are discharging, there is no real control over access. Ships should appoint their own gangway guard to prevent unauthorised boarding.

Quay C: Length 121 m., maximum draft 5 m. Berth can take a vessel of up to 92 m. length berthed port side to. This berth is used mainly for the inter-island trade and discharge of cattle.

Sugar Terminal: A Bulk Sugar Terminal constructed on the South side of the harbour came into operation in 1980. Sugar is now loaded in bulk at a maximum rate of 1,400 t.p.h. Vessels up to 198 m. overall length can be accommodated at the terminal. Maximum draft for vessels loading sugar is 11 m. Two sheds capable of storing 175,000 tons of sugar each have been constructed. The Bulk Sugar Terminal is operated by the Mauritius Sugar Corporation.

Facilities are also available on this quay for fuel oil discharge, which is connected by pipe-line to storage tanks for the power station.

Ships approaching the berth from seaward are swung to starboard with the aid of tugs and berth head out alongside in the normal manner.

Winds are often fresh and passing traffic can cause surging so moorings and anchors if used should be carefully tended.

Bulk Cement Berth: A bulk cement discharge point lies between Quay Nos. 1 and 2. Cement vessels up to 135 m. are regularly accommodated at this berth. Vessels up to 183 m. may be occasionally accommodated subject to adjacent berths being vacant.

Buoy Berths: 1 berth – LOA 195 m., draft 11.0 m.
1 berth – LOA 150 m., draft 11.0 m.

Vessels are berthed/unberthed at any state of tide. Tidal range is about 0.8 m. maximum.

Fishing Quay: Length 162 m., maximum draft 5.0 m. Berth can take vessels of up to 70 m. length. New Fish Quay – Length 185 m., draft 5.5 m. Vessels of up to 90 m. length can be accommodated.

SPECIALISED CARGO HANDLING FACILITIES: LPG carriers berthed at Quay D. The Port offers full containerisation facilities. Quays No. 3 and 4 are specially designed to receive container vessels. Cement discharging facilities also available. Rate of discharge 500 t.p.h.

Pumping and conveyor facilities exist at Quay D for discharge of bulk wheat, discharge rate 200 t.p.h.

STEVEDORES: Undertaken by the Cargo Handling Corporation Ltd. (CHC Ltd.).

Working hours: Monday to Fridays from 0700 to 1500 hrs., Saturdays from 0700 to 1300 hrs. Sundays and public holidays from 0700 – 1100 hrs. Overtime work is carried out during weekdays as well as on Sundays and Public Holidays if necessary. However, a double-shift system has been introduced at Berth No. 4 with the following working hours:

Mondays to	1st shift – 0700 hrs. to 1500 hrs.
Fridays:	2nd shift – 1500 hrs. to 2300 hrs.
Saturdays:	No shift – 0700 hrs. to 1800 hrs.
Sundays:	No shift – 0700 hrs. to 1100 hrs.

Operates extended hours if and when required up to 2100 hrs.

TANKERS: There are no deballasting or slop facilities.

Bulk Sugar Terminal: Fuel oil is discharged through a single 8 in. hose with ASA bolted flange which forms the link between ship's manifold and the jetty. Ships' derrick should be plumbed mid-manifold for lifting the hose. Weight approximately 2 tons. Bunkers are supplied through the same line.

Quay D: 2×12 in. pipe-lines run under the quay, one for fuel oil which goes to Shell Depot only, and one for all other products. One or two 16 in. hoses can be used to link each line to the ships' manifold (ASA bolted flange).

There is also an LPG line to the Shell Depot, Shell, Elf Antagaz and Esso from near the end of the quay, but this is only used for very small ships. LPG vessels carry up to 1,300 tons.

Quay No. 1: Cargo transfer facilities are not permanently installed on the jetty. 8 in. hoses are carried to the quay when required and connected to the single pipe-line which is buried in the quay. No water flush of the line is required between the products. Max. rate for gas oil is 700 t.p.h. Max. rail pressure 100 p.s.i. Max. rate for Mogas 600 t.p.h. at the same pressure as gasoil.

Also see "Berthing".

MEDICAL: Arrangements for medical attendance should be made through ship's Agent. Private clinics available.

FRESH WATER: Fresh water supplied by barges at any berth between 0700 hrs. and 1600 hrs. Arrangements can be made for supply before 0700 hrs. and after 1600 hrs. on payment of overtime. The loading rate is about 25 – 30 t.p.h. 4 barges of 50, 75, 85 and 110 tons respectively are available.

FUEL: Gas oil, marine diesel and furnace oil obtainable. (Arrangements must be made in advance between Owners and Shell or Caltex). The pumping capacity of the installations at Port Louis for furnace oil is between 150 t.p.h. and 200 t.p.h., and for marine diesel oil and gas oil 50 t.p.h. Marine diesel oil and furnace oil (35 secs. to 1,000 secs.) is supplied at Quay D. Gasoil – Quays C, D, 2, 3, 4 and Trou Fanfaron Fishing Port. Marine diesel – Quays 2,3,4 and D. Furnace oil – Quays 2,3,4 and D.

A 400 ton bunkering barge is available to supply vessels in harbour and outside anchorage.

REPAIRS: Almost any type of repair can be undertaken in Port Louis.

DRY DOCK: Stevenson Dry Dock. Largest vessel that can be docked: 100 m. × 15 m., with a max. draft of 9.0 m.; vessels of up to 109 m. × 15.3 m. can also be docked, but at least 15 days' notice should be given.

CONSULS: *Consulates:* Australian, Austrian, Belgian, Canadian, Danish, Dutch, Finnish, German, Norwegian, Portuguese, Spanish and Swedish.

Embassies: Egyptian, French, Malagasy, Pakistan, Peoples' Republic of China, C.I.S. and U.S.A.

High Commissions: British and Indian.

TIME: Local time GMT plus 4 hours.

HOLIDAYS: Public Holidays for 1992:

New Year	Wednesday	1st January
New Year	Thursday	2nd January
Thaipoosam Cavadee	Monday	20th January
Chinese Spring Festival	Tuesday	4th February
Maha Shivaratree	Monday	2nd March
Independence Day	Thursday	12th March
Ougadi	Saturday	4th April
Id-El-Fitr	Sunday	5th April or
	Monday	6th April
Labour Day	Friday	1st May
Ganesh Chaturthi	Tuesday	1st September
Divali	Sunday	25th October
All Saints Day	Sunday	1st November
Christmas	Friday	25th December

POLICE/FIRE: Police Tel: 999. Fire Tel: 240-3741.

GARBAGE DISPOSAL: Collection service is available. Drums or skips are not provided on board or alongside. Tel: Port Louis Harbour Sanitary Services 2126710.

Charges: Garbage up to 6 cu.m. on normal days: Rs2,000, on Sundays: Rs4,000.

Collection time: Normally between 0700 hrs. and 1100 hrs.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: Merchant Navy Mariners Club, Joseph Riviere Street, Port Louis. Tel: 2422617. Facilities available: Postage facilities, all currencies exchanged, football matches arranged, paperback books exchanged, Honorary Chaplain appointed by Flying Angels Mission to Seamen available at the Club, a fully stocked bar with bar snacks available from 0900 hrs. to 2300 hrs. everyday. Attractive outdoor lounges with badminton, table tennis, darts and usual club games available.

CURRENCY: Mauritian Rupee (M.Rs.). U.S.$ 1.00 = M.Rs.16.20 (10.5.91).

DEVELOPMENTS:

(1) Rice Handling Complex.
(2) Strengthening of Quays 3 and 4 to enable installation of 2 quay cranes together with relocations of Shed 3.
(3) Extension of Quays A and D to accommodate vessels up to 40,000 d.w.t.
(4) Construction of liquid cargo bulk berth at Mer Rouge.
(5) Construction of a 3,000 sq.m. building (6 floors) for the Marine Department.

SHIPMASTER'S REPORT: June 1982. (Updated 1990).

Off Limits Call for Stores, Mail and Crew Changes:

Documents: (All local forms – IMO standard documents in use (FAL conv. 1965)).

1 Parcels List, 1 Shipmaster's Report Inwards, 1 Ship's Record, 1 P.F. 102 – Certificate Finder Act No. 20 of 1973 for Immigration, 1 Maritime Declaration of Health, 1 Crew Declaration, 4 Crew Lists.

Anchorage: Possible but not necessary for the 2 hour stop.

Max. Size: No limit.

Health: Vessel is boarded by 2 Quarantine Officials who grant Free Pratique.

Radio: An amended ETA had not been received 6.5 hours after transmission.

VHF: Port Louis Harbour Radio very helpful and will pass messages. We were not able to contact them until about 30 miles to the West.

General: Vessel is also boarded by, 1 Customs Official, 1 Immigration Official and the Agent. After entry formalities are completed the ship-chandler boards together with any new crew. Despite cabled request our stores were not pre-slung and had to use ship's net slings. Require derrick amidships for stores and good lee, usually port side. Stores' boat is separate from Officials' boat.

SHIPMASTER'S REPORT: July 1982 (Updated 1990).

Port Limits: The commercial area of the port is the area inside the port bounded by the Entrance Buoys and the shore line of the Inner Harbour. Vessels at the outside anchorage also lie within the limits of the port defined by a line joining Pte. Aux Sables and Pte. Aux Piments. In this area commercial activities are restricted to bunkering, ship repair and the landing of passengers and personnel.

Documents: Immigration: 2 Crew Lists, 2 Passenger Lists, 1 Certificate under Act No. 20 of 1973 (Form PF102).

Health: 1 Declaration of Health, 1 Vaccination List.

Customs: 1 Customs Form (Form F24), 1 Parcel List (Form F17), 1 Ship's Report – Inward, 1 Narcotics List, 1 Arms and Ammunition List.

Agent: 2 Crew Lists, 2 Passenger Lists, 1 Ship's Record – Port of Port Louis.

Note: Declare ship's cameras, VHF's, TV's, etc. in bonded section of F17. If space allocated on F17 for crew "other items" is insufficient, use of a supplementary list is acceptable.

Clearance: Health, Customs and Immigration board on entrance. Clearance may be obtained at the Outer Anchorage but is subject to availability of personnel and may be limited to the purposes of anchoring listed in "Port Limits" above.

Approaches: Approach directions are well covered in the Sailing Directions and Chart No. 61592. The Citadel is easily recognised from considerable distance during the day. Closer in, the middle and upper ranges are visible, but the separation is not sufficient for good accuracy. The lower range is an orange daymark, located on the red roof of the Port Office, both faded to a rust colour. It is very difficult to locate and can be confused with the daymark on the light located on "B" Berth. The Northern red can buoy is large and makes a good radar target. The Southern BW is of skeleton construction and is subsequently harder to pick up visually or with radar. There is a tidal current that sets across the channel and at right angles to it.

Pilotage: Compulsory for vessels over 100 g.r.t. Vessels are piloted inwards and outwards at any time of day or night if circumstances permit. Inward bound vessels are met about 1 mile seaward of the Entrance Buoys. The pilot boat is a white launch with a deck height of approximately 4 ft. There are only 4 Pilots, so movements may be delayed by congestion and night entrance curtailed.

Anchorage: Open roadstead with anchorages for vessels of any draft. Consult Chart No. 61592.

Radio: Government Radio Station 3BA at Vacoas is on 500 kHz. and also has high frequency Channels. Port Louis Harbour Radio Station has 2182 kHz. and VHF Channel 16. They do not have regular traffic lists but are easily reached, particularly around weather reporting times.

The Port Master requires to be notified of the date of vessel's arrival, length, draft and purpose of call, by radio, as soon as practical with the above stations.

Tugs: 2 tugs of 830 h.p. and 3 smaller units of 320 h.p. for inner harbour work, and one new multi-purpose high powered tug of 2,670 h.p.

Berthing: There are numerous speciality docks and berths for smaller vessels. The main deep-draft berth has 2 sheds for unitised and general cargo with one open container section. This new dock has excellent fenders but the older docks have virtually nothing. Bagged goods are generally worked into lighters at mooring buoys.

When berthing to buoys, the vessel is berthed head-out on 2 anchors with additional headlines to a buoy. The stern is secured to the buoy by 4 ship's lines and a heavy shore wire. A messenger is necessary for taking the wire, and lashing straps to tie the eyes to the mooring rings must be supplied by the ship. The wire is taken through the centre stern chock, and one set of bitts must be kept free for it. Chafing gear on stern lines is advisable. Vessels berthed at the container berth may be required to send 4 lines to a buoy about 100 ft. off the corner of the dock.

Medical: Medical and dental facilities are available with arrangements to be made through the Agent. Repatriation can be arranged. Radio Pratique is not available. Cholera and yellow fever vaccinations are required for arrivals from infected areas.

Consuls: The U.S. Embassy is located about 200 yards outside the main harbour gates and is easily recognised. The office is on the 4th floor of Rogers House. Working hours are 0900 – 1200, Monday – Friday.

Watchmen: 3 shifts: 0700 – 1500 hrs., 1500 – 2000 hrs. and 2000 – 0700 hrs. Number is at discretion of ship, but heavy pressure is applied to the Chief Officer to employ extra, claiming these are "normal" or "routine". If cargo is *free out,* watchmen are hired and paid by receivers, with vessel only providing meals. Quality is poor to fair. If vessel is at Outer Anchorage, no watchmen are available. There have been frequent incidents of thefts by bum-boats, so an adequate crew watch is recommended.

Customs Allowance: On arrival, officers and crew may have in their possession, an 8 day allowance of tobacco products and 4 day allowance of spirits per daily schedule of: Master: 1 oz. tobacco, 0.25 pint of spirits, 1 quart of wine, 1 quart of beer: Other Officers: 0.75 oz. tobacco, spirits same; Crew: 0.5 oz. tobacco, spirits same. (200 cigarettes for the 8 days is accepted as within amounts listed). 2 Customs Officers will be assigned to vessel, usually just during working hours, with vessel expected to provide a suitable room and meals.

Supplies: General supplies are available through Agents and private ship chandlers, though prices can be expected to be high for consumable stores and equipment. Repairs can be performed, but the shipyard dry dock is too small for larger vessels. Foodstuffs are not recommended. Fresh water is about $2/ton via barge. Fuel is expensive, about $45/bbl. for Bunker C. Numerous ship chandlers will solicit the vessel, many falsely claiming to be sent or approved by the agency.

Time: GMT plus 4 hours.

Holidays: There are 13 official holidays, and numerous others are observed in various degrees due to the mixed Chinese, French and Indian heritages.

SHIPMASTER'S REPORT: October 1983 (Updated 1990).

Off Limits Call for Mail, Stores and Crew changes:

Documents: Documents required may be:

1 Shipmaster's Report Inwards – for Customs.
1 Parcels List Customs F.17.
1 Customs F.16 – Crew Declaration although they *may* accept ship's own form.

2 copies Master's Report for Mercantile Marine Office, also an addendum in duplicate, and these forms are taken ashore by the Agent.
1 P.F. 102 – Certificate Finder Act No. 20 of 1973 for Immigration.
3 Crew Lists on arrival.
2 Crew Lists on departure – to show newly joined personnel.

Immigration require international embarkation and disembarkation cards for all joining and departing personnel.

Port Health require Marine Declaration of Health.

All these papers are required, even though the vessel is only there between 1 and 2 hours.

Ship's Spares: Any package for the vessel arriving from abroad should preferably be at the airport at least 2 days prior to the vessel's arrival as it takes time to clear such packages through Customs.

General: The Mauritius Sailors Home Society will exchange paperbacks – arranged through Agents.

AUTHORITY: Mauritius Marine Authority, P.O.Box 379, Port Louis, Mauritius. *Tel:* 240-0415. *Telex:* 4238 Mauport IW. *FAX:* 240-0856. *Contact:* Director General.

NOTES

Please also advise Shipping Guides Ltd.

Mexico

GENERAL:

DOCUMENTS: New Customs House Regulations are in effect, which stipulate that the following cargo and ship's documents must be submitted in a new Mexican format:

1. Crew List. *
2. Passenger List. *
3. Stores List.
4. Crew's Personal Effects Declaration.
5. Cargo Manifest. *

* Must also be visaed by the Mexican Consulate or Embassy.

Failure to comply with this new regulation can result in fines of up to U.S.$ 350.00 per document.

ACAPULCO: 16.50 N. 99.54 W.

DOCUMENTS:

Health Clearance from previous port.
Health Pratique.
4 Stores Lists.
4 Lists of Crew's Personal Effects.
12 Crew Lists.*
2 Passenger Lists.*
12 Manifests of cargo for the port.*
*One copy to be visaed by Mexican Consul.

PILOTAGE: Pilot is ordered by Agent on the basis of Master's ETA, which should be given accurately at least 24 hours before arrival. Pilot boards at the port limits, approx. 1 mile from the entrance. Pilot station on VHF Channel 16 when vessel expected.

ANCHORAGES: Vessels may anchor in the middle of the bay as indicated by the Pilot. Depths up to 150 ft.

RESTRICTIONS: The Bay of Acapulco is a natural harbour surrounded by mountains, approx. 4 miles across at its widest part and 2.5 miles across at its narrowest. There are 2 entrances, 1 called Boca Grande and the other called Boca Chica.

Boca Grande is between Punta Siclata on Isla de la Roqueta and Punta Bruja. The channel is 3,000 m. wide with a depth of 31 fathoms in mid-channel.

Boca Chica Channel, between Isla de la Roqueta and the Peninsula of Las Playas is 300 m. wide with a depth of 14 fathoms in mid-channel.

MAX. SIZE: For berthing alongside max. draft 28 ft. 6 in.

HEALTH: When vessel arrives at the port the following Authorities will board: Port Health Authority, Customs and Immigration, accompanied by the ship's Agent.

RADIO: Coastal station of Acapulco receiving on 8374 kHz in daytime and on 4180 kHz at night. Transmitting on 8514 kHz in daytime and 4250 kHz at night. Radiotelephone receiving and transmitting on 2715 kHz during the day and on 2182 kHz from 2000 – 0600 hrs. local time.

VHF: Service available from 0630 hrs. to 2300 hrs.

TUGS: *Shipmaster's Report:* December 1984.

There are no tugs at Acapulco. Berthing and unberthing are unproblematic because of the use of anchor and aft buoy line and furthermore the help of mostly weak prevailing winds which blow parallel to the pier.

BERTHING:

	Length (m.)	*Depth* (m.)
Fiscal Quay	198	8.0
Coastal Quay	150	4.0
Passenger Quay	206	10.0
Fishing Quay	173	4.0
Yacht Quay	340	3.0

MEDICAL: Agent should be advised by radio in advance if any medical assistance required. Hospital facilities available.

TANKERS: Tanker moorings operated by Petroleos Mexicanos situated on the Eastern side of the bay. It is strictly prohibited to discharge oily residues in the bay or within 40 miles of the port.

FRESH WATER: Can be supplied from the quays using ship's hoses, rate about 15 t.p.h.

FUEL: Available.

CONSULS:

Denmark	Tel: 2.11.11	Norway	Tel: 2.19.56
France	Tel: 2.43.83	United Kingdom	Tel: 2.29.21
Italy	Tel: 2.25.10		

REPAIRS: Minor engine repairs can be effected. No dry docks, only a slipway for vessels up to 100 tons.

Vessels may carry out own repairs only after permission obtained.

OPENING/CLOSING HATCHES: Performed by stevedores.

CUSTOMS ALLOWANCES: Crew members are only allowed to retain cigarettes, tobacco and liquor sufficient for their own consumption while vessel is in port.

REPATRIATION: Can be arranged.

AIRPORT: International Airport situated 22 km. from the port, daily flights to all parts of the world.

TIME: GMT minus 6 hours all through the year.

HOLIDAYS: The following holidays can only be worked in case of emergency: 1st January; 5th February; 21st March; 1st May; 5th May; 16th September; 12th October; 25th December; and in addition 23rd May, Anniversary of the Stevedores' Union.

POLICE/FIRE/AMBULANCE: Police Tel: 2.00.40; Fire Tel: 2.00.42; Ambulance (Red Cross) Tel: 2.02.41 and/or 2.00.88.

TELEPHONES: Cannot be connected on board the ship but Master may make calls from the quay.

SHORE LEAVE: Allowed. Crew List to be left with gate.

IDENTIFICATION CARDS: Not required.

AUTHORITY: Delegacion Coordinadora, Costera Miguel Aleman No. 320, 4th Floor, Office No. 2, Fiscal Quay Warehouse No. 2. *Tel:* 2-54-95.

Empresa de Servicios Portuarios, Costera Miguel Aleman, Free Zone Area. *Tel:* 3-56-58 and 3-56-59.

Comision Nacional Coordinadora de Puertos, Cuernavaca No. 5. Mexico, II D.F. *Tel:* 553 87 11.

CAYO ARCAS: 20.11 N. 91.59 W. (See Plan)

SHIPMASTER'S REPORT: January 1982.

DOCUMENTS: *Agents, Customs and Immigration:* The Charterer's Agent dealing with the paperwork when loading at Cayo Arcas are Benjamin Negroe Pawling, Consignatario de Buques, Calle 31 No. 1, Ciudad del Carmen, Campeche, Mexico. They only deal with the entry and clearance of the ship and preparation of the cargo papers. They also prepare and obtain a visaed Crew List irrespective of the fact that one might have been prepared and visaed at the previous discharge port.

The Customs and Immigration come by helicopter to the storage tanker and clear the ship when alongside. However, they will also clear the ship in the anchorage coming out on one of the tugs.

Papers Required: 6 Visaed Crew Lists (or plain Crew Lists with a letter from the Agent at the previous port stating that there was no Consul available).

2 Visaed Manifests for cargo on board.
2 Vaccination Lists.
4 Crew Declarations of Personal Effects.
2 Copies of Stores Lists.

During the 3 loadings at Cayo Arcas and the time spent at anchor off Coatzacoalcos no mention was ever made to the Work Permits which it was understood had to be obtained when working on the Pemex Charter. Perhaps these will be issued when the vessel loads at a port on the coast.

ANCHORAGES: 4 to 8 miles to the East of the flare in 25 fathoms, bottom sand, mud and shell. Good holding ground using 9 shackles of cable.

RESTRICTIONS: See "Loading".

RADIO: Radio communication via XFF2 . . . . Pemex Pajaritos, traffic list even hour GMT plus 30 minutes . . . . sometimes 5 to 10 minutes delay. No charges are made for any cables to Pemex.

Transmits:	Receives:
4346	4191
6442.5	6286.5
8690 (8690.5 Off Tune)	8382
12790 (12790.5 Off Tune)	12573
17075.5	16764

Always on 8 MHz, transmits on 12 MHz, receives 16 MHz.

During the course of the voyage, in addition to the arrival and departure cables, Pemex require the vessel's noon position each day, the ETA at the next port and any requirements such as bunkers and water. No acknowledgement is ever received and very few cables are sent to the ship by Pemex. Telex orders and instructions are routed via the Agent in the discharging port.

On approaching Cayo Arcas and the storage tanker, due to language problems (the Pemex operatives only speaking Spanish) all VHF calls are made through the English speaking officers on the tugs 'Eliska Theriot' and 'Martha Theriot' whose calling and working frequency is Channel 9. One of these English speaking officers also accompanies the Mexican Pilot-Berthing Loading Master and Pemex Representative to act as an interpreter when required and also when communication problems arise during cargo operations.

When at anchor off Cayo Arcas, information is usually obtainable via the 'Theriot' tugs.

BERTHING: Vessel moors port side to, alongside the storage tanker. This requires 8 parts of rope both forward and aft, 6 ship's lines and 2 from the storage tanker. All wires have to be fitted with rope pennants. Great care must be taken when going alongside to ensure that the ship's lines do not foul underneath the Yokohama fenders. Two tugs are in attendance, one forward and one aft using the tugs' lines. These are very heavy and require a messenger to heave them on board.

LOADING: Three lines are connected; these being 16 in. flexible rubber hoses with 12 in. reducers to the ship's manifold. They are connected by Pemex personnel but it is essential to have ship's staff operating the winch and the derrick gear. The API of the Maya Crude Oil is about 22.6 and the average loading temperature about 108°F. The maximum loading rate is 30,000 bbls./hr., however if the ship is receiving direct from the field, the rate drops to 15,000 bbls./hr.

It is advisable to leave the loading plan flexible as Pemex are likely to cease loading without prior warning and sail the vessel with deadfreight. The reasons for this can be due to the onset of bad weather or to ensure the ship leaves the storage tanker in sufficient time to enable the next ship to berth before dark. Unberthing is possible during the hours of darkness but the Pilots do not berth ships alongside the storage tanker between the hours of sunset and sunrise. The terminal requires 2 hours' notice prior to completion of loading and 10 minutes to stop operations. Communications between the ship and storage tanker is by a manifold watchman with a radio. These persons have a casual approach to their responsibilities and must be watched closely to make sure they are at the manifold when required.

Charles Martin (Surveyors) attend the vessel before and after cargo operations and insist on a visual inspection and manual dipping of the tanks. But they do not require water dips of the ship's tanks, a percentage allowance being noted on the Bills of Lading for these impurities.

Hydrogen Sulphide Content of Mexican Crude Oils: The H_2S content of the Maya Crude Oil is extremely high and all necessary safety precautions must be followed and adhered to.

FRESH WATER/FUEL: Fresh water, fuel oil and diesel oil are all available and are delivered to the ship by small coastal tanker or oil-rig supply tenders. They have to be ordered via Pemex preferably on the departure cable after leaving the discharge port. Whilst Pemex prefer to deliver bunkers when the ship is at the loading port, these commodities can be obtained in Curacao where Pemex have rented bunker storage facilities. Ships can avail themselves of this service when bunkers were not delivered in Mexico due to bad weather or some other cause.

DEVELOPMENTS: At the moment the only buoy in operation is No. 1 to which the storage tanker is moored. 'Boya Fija No. 3' and 'Boya No. 2' are in position as is the base for the hotel block 'HB CA1' and the degassing plant 'PBE-CA1'. It is understood the present completion date for these new installations is late March 1982 and production commencing some time after.

SHIPMASTER'S REPORT: May 1982.

DOCUMENTS:
Last Port Clearance.
5 Copies Crew List.
2 Copies Stores List.

PILOTAGE: Compulsory. Pemex Pilot boards 2 miles East of the berth.

ANCHORAGES: Depth 45 m. – 50 m. Bottom is sand.

RESTRICTIONS: Berthing daylight hours only. Unberthing at anytime.

MAX. SIZE: 350,000 d.w.t.

HEALTH: Pratique available day and night.

RADIO: Lantana Radio (WOE).

VHF: Terminal on Channel 11 only.

TUGS: 2 × 8,500 h.p. Both tugs required for docking and undocking.

BERTHING: Vessel berthed at No. 1 berth. Max. size permissible 110,000 d.w.t. Depth of water 42 m. Bottom is sand. Hoses connected on port side. No. 1 berth is alongside the storage tanker. However, after June 1st, 1982 the vessel will berth direct to the SBM.

Loading is through 3×12 in. hoses. Cargo is Maya Crude (API 22) which comes directly from oil production wells, through a gas separator. H_2S content is very high and dangerous.

The storage vessel is equipped with Yokohama fenders and also passes over 3 ropes forward and 1 rope aft.

Berth No. 2 (SBM): Max. size 250,000 d.w.t., hoses connected on port side.

Berth No. 3 (SBM): Max. size 350,000 d.w.t., hoses connected on port side.

No facilities for dirty ballast.

MEDICAL: Services available.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: Not possible.

SHIPMASTER'S REPORT: May 1984.

LOCATION: Lat. 20° 12.5′ N., Long. 91° 57.5′ W.

The port of Cayo Arcas Terminal is an open sea terminal located in the Campeche Bank, some 85 miles almost West of Campeche and 90 miles North of Puerto del Carmen. The Middle Cay is the biggest with a lighthouse (round concrete tower) elevation 75 ft., Fl. (2) 14 s. 14 M.

The terminal is formed by:

1. One platform gas stabiliser (called "Cabezal de Valvulas" on Chart 28260) located in position 20° 09.6′ N., 91° 57.8′ W., with a gas burning flare (conspicuous) visible at 30 miles equipped with Racon "C" (– · – ·).
2. One old gas burning structure located 1 mile S.W. of the above platform.
3. SBM No. 1 in position 20° 10.0′ N., 91° 59.0′ W.
4. SBM No. 2 in position 20° 08.8′ N., 91° 59.0′ W.
5. One fixed structure in 20° 11.4′ N., 91° 59.5′ W. to which is permanently moored the storage tanker "Venture Europe", capacity over 2 million barrels.

The platform and both storage tankers are very good radar targets at 24 miles.

DOCUMENTS: 6 Crew Lists visaed by the Mexican Consul of the last foreign port or 6 Crew Lists and a statement from the Agent at the last foreign port that no Consul in the area. 3 Ship's Stores Declarations and 4 Crew Declarations.

CLEARANCE/OUTWARD DOCUMENTS: The Agent will prepare on board after loading, all required documents already signed and stamped by the due Authority. The Agent will also prepare the Bill of Lading and Cargo Manifest with the quantities given by cargo and Pemex Inspectors.

PILOTAGE: Compulsory for berthing/unberthing. Pilot boards 2 miles S.W. of the platform and he remains on board during all operations. Accommodation and meals must be provided.

ANCHORAGES: Outside Prohibited Zone about 8 miles East of the platform or 4.5 miles S.S.E. of the platform in approximately 50 m. of water. Good holding with 9 shackles in winds up to 35 knots.

REPATRIATION: Embarking crew have to get permission from Immigration at Ciudad del Carmen before joining the vessel.

Disembarking crew cannot disembark, even if the Agent makes a request, until Immigration has cleared the vessel.

COMMUNICATIONS: ETA for Cayos Arcas Terminal: Send ETA to Pemex (Petroleos Mexicanos) Pajaritos via Pajaritos Radio Station, XFF2, working frequencies:

Transmits	*Receives*
4346	4191
6442	6286.5
8690	8382
12790	12573
17075	16764

Of the above frequencies only checked on 8 MHz.

Traffic list on even hours plus 30 minutes although some 5 to 10 minutes delay can be expected. Only listening to this station when South of Florida.

ETA to Pemex Pajaritos can also be sent via Lantana Radio Station, WOE when far from Cayo Arcas.

When close to Cayos Arcas communication with Port Control (stationed aboard "Venture Europe") via VHF on Channel 9.

ETA to Agent can first be sent via telex to Tampa Office relay Ciudad del Carmen and then by cable via Veracruz Radio Station, XFU.

BERTHING: When mooring at any of the SBMs have ready the port crane or boom to pick up gear. In the forecastle 1 mooring rope (not wire) with a tail of 3 fathoms length and 2.5 in. circumference to lash the shore rope. One gang of 10 men board the vessel with the Pilot to assist in mooring/unmooring and connection/disconnection of hoses. These 10 men remain on board throughout during vessel's stay and accommodation and meals must be provided.

2 Cargo Inspectors and 1 Pemex Inspector, and sometimes the Agent board the vessel with the Pilot. Accommodation and meals must be provided.

When mooring alongside the storage tankers, only 3 or 4 people remain aboard.

Mooring to Storage Tankers: Both storage tankers have Yokohama fenders on starboard side. Mooring port side alongside using 3 head ropes, 2 breast and 2 spring ropes fore and aft plus 2 breast ropes from the storage tanker forward. 2×12 in. hoses used.

Mooring to SBM Nos. 1 and 2: One tug is used (tug's wire) on starboard bow to assist in the mooring. One shore polypropylene rope 9 in. circumference to which a chain is attached must be heaved on deck. Minimum opening of the bracket or stopper 15 in. × 7 in., otherwise 2 shackles with a thick wire must be attached to the chain and passed around the bitt. 2×16 in. hoses used.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: Not possible.

GENERAL:

Authorities: By helicopter from Ciudad del Carmen to "Venture Europe" and then by tug. Accommodation ladder requested.

Agent: Consignaciones de Buques, Canega Inc., with offices in Tampa, Florida. Telex: 803757 Canega B and Ciudad del Carmen, Campeche. Cable Address: Negroe, Ciudad del Carmen.

Charts: U.S.N.O. 28031, 28260.

SHIPMASTER'S REPORT: March 1987 (Updated Sept. 1987).

VESSEL: 117,000 d.w.t.

DOCUMENTS:
5 Crew Lists.
3 Ship's Stores Lists (including Bond).
3 Personal Manifests.
Last Port Clearance.
Ship's Register.

Personnel: 1 Agent, 1 Immigration Officer, 3 Cargo Surveyors, 1 Loading Master and 10 Mooring/Pipe-line personnel join with Pilot. 1 Pilot, 1 Loading Master, 3 Cargo Surveyors and 1 Agent remain on board and require meals. Accommodation required only if night loading.

Departure Documentation: This takes up to 4 hours but the vessel must be ready to leave the mooring on completion of ullaging and sampling, drifting clear of the area whilst the cargo calculations are completed.

September 1987: Documentation took about 3 hours, but the vessel can start to unberth 2 hours after disconnecting.

PILOTAGE: Pilot boards from a supply boat about 2.5 miles S.W. of the platform.

APPROACHES: Normal direction of approach to berths is from the S.W. When proceeding to an SBM, the supply vessel lands all pipe-line equipment on board (port side), approximate weight 500 kgs.

Navigational lights marked on chart are extinguished. Flare marked on chart is also extinguished.

Racon on the oil platform S.S.E. of island showed well at 16 miles.

Approaching from the West, there were no problems when keeping well to the South of the 'Area to be avoided'.

September 1987: There is a radar watch on the platform, using a Norcontrol System. All headings and distances to reach the anchorage are given through "Marine Control". Anchorage this time 4 miles to the East of platform. Depth 47 m., mud bottom.

Chart: B.A. 2626.

TUGS: 5 tugs of varying sizes, 2 supply vessels also used as tugs and several work boats. All equipped with VHF.

BERTHS: There are 3 loading berths.

(a) Storage vessel "Texaco Veraguas" moored to SPM – Maya Crude.
(b) SBM No. 1 – Maya Crude.
(c) SBM No. 2 – Maya Crude.

Storage vessel ((a) above) has fenders in place on the starboard side and loading vessels berth port side to, using 1 tug on the starboard bow and 1 tug on the starboard quarter.

Moorings depend on the size of the vessel.
Maximum size vessel: 100,000 d.w.t.
Hoses: 2×12 in.
Loading rate: 5,800 t.p.h.

September 1987: Berth used this time: VLCC "Texaco Veraguas", port side to, 4 floating fenders and 1 bow/quarter fender. Connections 2×12 in., only used VLCC's boom.

Loading vessels berth bow on to SBM ((b) and (c) above) using 1 tug on the starboard bow. Vessel picks up 1×80 mm. diameter messenger which is attached to a mooring chain for use with a Smit Bracket/AKD stopper.

Maximum size vessel: 216,000 d.w.t.
Hoses: 2×16 in. on port side.
Loading rate: 3,300 t.p.h. direct from the oil well.
Loading temperature: Up to 45°C.

Berthing is done in daylight hours only, unberthing day or night.

Tugs/supply vessels use their own lines when making fast for mooring.

In calm weather 1 tug makes fast aft to hold vessel off the SBM.

The 10 man mooring/pipe-line squad stand-by forward and by the manifold whilst the vessel is at the SBM.

Ship's personnel are required only to work the winches when mooring/unmooring, connecting and disconnecting the hoses.

RADIO: All ETA messages sent to ship's Agents.

Prior to arrival call 'Marine Control' on VHF Channel 16. Working Channels are 9 and 11, they were clearly heard at 20 miles. Vessel was instructed to anchor 5 miles East of platform, this was between the 'Area to be avoided' and the marked anchorage in approximately 42 m., mud bottom.

Information required by VHF: Nationality, draft, quantity of ballast and de-ballasting time.

After anchoring call 'Marine Control' with arrival time, anchoring time, quantity of bunkers and fresh water on arrival.

CARGO: *Caution.* Maya Crude has an extremely high Hydrogen Sulphide content.

MEDICAL: A doctor is available on the platform but facilities are limited.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: No facilities available.

GANGWAY: Accommodation ladder is required on the port side at SBM.

CUSTOMS: Customs allowance seems to be a 'reasonable amount'. There was no query over 200 cigarettes and 1 bottle of spirits per person.

The bond is not sealed but the Immigration Officer checked two or three items against the Ship's Stores List.

REPATRIATION: Personnel are taken by helicopter from Cayo Arcas to Ciudad del Carmen, 90 miles to the South, and then by plane to Mexico City where there is an International Airport. There is no limit on the number of personnel travelling.

TIME: GMT minus 6 hours all year round.

SHORE LEAVE: Not permitted.

GENERAL *Stores:* None available, but fresh prawns can be obtained from supply vessels/tugs.

Mail: Takes approximately 15 days to U.K./Europe but a courier service via the Agents is available taking only 5 days.

COATZACOALCOS: 18.08 N. 94.25 W. **(See Plan)**

PORT LIMITS: From the centre of the channel at the bar with a radius of 0.5 miles to seaward.

DOCUMENTS:

Customs:

Cargo Manifest, original and 4 copies visaed by Mexican Consul at place of origin. If no cargo carried for this port a certificate and 2 copies stating the fact.
Stores List, original and 1 copy.
Personal Effects List, original and 1 copy if vessel is arriving from another Mexican port. Customs release from that port must be produced.

Port Captain:

Clearance from Last Port.
2 copies Crew List.
3 copies Manifest of cargo for this port.

Immigration:

Crew List, original and 1 copy, bearing consular visa.
Passenger List, original and copy, visaed by consul.
All Crew Passports or I.D. Cards.

Health:

2 copies Crew List.
2 copies Passenger List.
Crew Vaccination Certificates.
Derat Certificate.
When vessels are anchored beyond the breakwater authorities board from the pilot launch.

The following must be made available for inspection.

Registration Certificate of Vessel.
Certificate of Inspection of Deck Machinery.
Certificate of Inspection of Machinery.
Freeboard Certificate.
Tonnage Certificate.
Radio Certificate.
Radio-telephony Certificate.
Emergency Procedure in the Case of Abandoning Ship.
Emergency Procedure in the Event of Fire.
Vessel Insurance Policy.
Copy of the Charter Party (where applicable).

PILOTAGE: Compulsory. Pilot meets vessel off the jetties at Coatzacoalcos Estuary. Master should give Agent information not less than 24 hours prior arrival stating vessel's name, flag, and ETA as well as draft.

Pilot boat black hull, white housing and red deck. 2 launches, *Alcion* and *Vencedora.* The sound signal for calling the Pilot is 2 long blasts and 1 short blast. The light signal is a blue Bengal light.

There is a new cutter *Siriux.* The pilots' office has a VHF radio station, listening out on Channel 16.

ANCHORAGES: Ample anchorage grounds available outside the Bar of the Coatzacoalcos River.

Two anchorage areas have been established and are bounded by lines joining the following positions:

West Area:	A.	Lat. 18° 12′ 30″ N.,	Long. 94° 26′ 57″ W.
	B.	Lat. 18° 12′ 30″ N.,	Long. 94° 25′ 54″ W.
	C.	Lat. 18° 10′ 54″ N.,	Long. 94° 26′ 57″ W.
	D.	Lat. 18° 10′ 54″ N.,	Long. 94° 25′ 15″ W.
East Area:	A.	Lat. 18° 12′ 32″ N.,	Long. 94° 25′ 22″ W.
	B.	Lat. 18° 12′ 32″ N.,	Long. 94° 23′ 46″ W.
	C.	Lat. 18° 10′ 54″ N.,	Long. 94° 24′ 51″ W.
	D.	Lat. 18° 10′ 54″ N.,	Long. 94° 23′ 22″ W.

Anchorage exposed during Northerly winds when it is advisable to weigh anchor and proceed to sea.

RESTRICTIONS: Access Channel: 5,200 m. in length, depth 12.0 m.
Secondary Channel: 2,200 m. length, depth 14.0 m.

MAX. SIZE: Max. draft crossing the bar is 39 ft. The Pajaritos Channel to the bar reaches 42 ft. (will shortly be 45 ft.)

Free Zone: Max. length during the day 200 m., at night 125 m. Max. draft. 31 ft.

Pajaritos: Max. length 225 m. Max. draft 39 ft.

Report: 1985. Pilot office announced that they will not manoeuvre vessels with a draft of more than 38 ft. 00 in. (forward) and 38 ft. 06 in. (aft).

HEALTH: Pratique never given by radio. Vessels granted Free Pratique when berthed alongside if no contagious illnesses aboard.

RADIO/VHF: Telegraphic transmitter type TH 600-M with an open sea range of 500 miles radius, frequencies of 512, 500, 432, and 419.5 kHz. Telephonic transmitter type TSB-500-Be with approx. range of 500 km., frequencies of 2182, 2270, 2542 and 2665 kHz. RDF transmitter type TT-1017-B with approx. range of 300 miles, frequency 312 kHz. Transmitter/Receiver for radiotelephony VHF type VFD-50PT/PR, with approx. range of 50 miles, frequencies in Simplex operation: Channel 12-156.6 MHz and Channel 16 International call-up 156.8 MHz. Duplex operation: Channel 26: Transmission 161.9 MHz, reception 157.30 MHz. Channel 27: Transmission 161.95 MHz and receiving channel 157.35 MHz. At the moment, there is a point to point link-up with national and coastal telegraphs, as well as teleprinters for national and international service No. 078-835 (the latter is said already to be installed and will shortly be operating normally).

Tankers: In addition local requirements are that ETA messages should be sent to Pajaritos PEMEX Terminal, Call Sign XFF2 as soon as possible after departure from the previous port and updated at least 72, 48 and 24 hours prior arrival, using following frequencies: 4191 kHz, 6286.5 kHz, 8382 kHz, 12573 kHz, 16764 kHz, 22253 kHz or 25094 kHz.

TUGS: The Free Zone has the "Servicios Portuarios del Istmo de Tehuantepec S.A de C.V.", who own the tugs *Quetzalcoatl* 2,400 h.p., *Olmeca* 1,600 h.p. and *P.L.M.8* with 600 h.p. for operations in the Free Zone and the Pajaritos Terminal, the first being able to undertake salvaging work due to extensive range of action.

A tug is obligatory for mooring, unmooring or changing position in the port. 1 tug for vessels of 2,500 g.r.t. and 2 tugs for vessels larger than 4,000 g.r.t. The signal for calling up tugs is 2 long and 2 short blasts on the vessel's siren. The signal for the tug to withdraw is 1 short, 1 long and 3 short. The tug will repeat the signal to indicate that it has been heard. Tugs are fitted with VHF radio listening out on Channel 16 and during working, on the channel which the tug captain is ordered to use.

BERTHING: *Free Zone:* This has a quay length of 1,900 m. (1, 2, 3, 4, 5, 6, 7, 8) with varying depths of water from 29 ft. to 31 ft. All necessary services for vessels are available. During the day, vessels up to 200 m. overall length can manoeuvre, and at night only vessels up to a max. length of 125 m.

Restrictions: Night service is suspended during times of strong currents in the Coatzacoalcos river.

Pajaritos Terminal: In this terminal PEMEX has 3 quays operating and 1 being constructed, those operating being PX1E and PX1W with operational depth of 33 ft. and 30,000 tons gross with lengths of 200 m. PX2E and PX2W with operational depths on the Eastern side of 33 ft. and with 37 ft. on the Western side, admits vessels of 225 m. overall length and 35,000 g.r.t. The Provisional Quay admits vessels with 37 ft. draft and 35,000 g.r.t. At this terminal, Pemex exports crude oils, fuel oils, and at the PX1E quay, ethylene is loaded specifically. In the Western part of the lagoon, there is a manoeuvring basin with a radius of 300 m.

F.F.M. Quay: In the Eastern part of the Lagoon of Pajaritos, the Empresa Fertilizantes Fosfatados Mexicanos S.A. have their plants and a quay of 425 m., running E. — W., this quay being used for discharge of phosphoric rock in 4 mobile hoppers. Also, liquid sulphur is discharged, phosphoric acid is loaded, as are sulphuric acid and superphosphates. It has an operational draft of 33 ft., and takes vessels of 35,000 g.r.t.

CRANES: 300 ton crane for handling containers.

STEVEDORES: No ETA advice necessary. Free Port: Straight working hours: from 0800 to 1200 hrs. and from 1400 to 1800 hrs. Overtime 100% overcharged according Tariffs. Latest times to order gangs: 0730, 1330 and 1730 hrs. Straight time above hours Monday through Saturday. Sunday and holidays allowed to work except "Legal Holidays". Loading and discharging rates: 25 tons gang/hour using ship's derricks. No shore cranes available. Loading sulphur by conveyor belts at 500 t.p.h., working around the clock.

Private FFM Berth: Loading or discharging operations performed by their own personnel working 24 hours per day. Rate of loading by conveyor belt: 500 t.p.h. Rate of discharging 1,100 tons per day with ship's gear.

MEDICAL: Hospital facilities available. Inform Agent in advance if treatment required.

TANKERS: Tankers regularly moor in the Pajaritos Roads. There are 4 large quays for mooring 7 vessels up to 233 m., with max. depth at the quay of 33 ft.

The Provisional Quay has 2 lines of operation of 24 in. with 3×8 in. for crude oil.

Bunkers and Lubricants: Not available.

Fresh Water: Available at jetties but should *not* be used for drinking water.

Stores and Laundry Facilities: Available, but no bonded stores.

Limited dirty ballast facilities available. Vessels should arrive with clean ballast. Failing to do so can result in excessive delays.

All tanks lids must be closed when entering or leaving the port.

It is strictly prohibited to emit excessive amounts of smoke from the funnel.

Shore leave is normally permitted by the local Immigration Authorities, however the shore passes are only valid inside the city limit. Severe penalties will be imposed for crew members found outside City Limits. Pajaritos crude oil contains hydrogen sulphide – H_2S.

During rainy season (May/June and November/December) currents of up to 6 knots can be experienced in the river.

Also see "Shipmaster's Reports", "Berthing" and "Rabon Grande".

DENSITY: Average 1012.

FRESH WATER: Available at berths in Free Port area, delivered by 1.5 in. hose. Loading rate about 8 t.p.h.

FUEL: Fuel can be supplied at Coatzacoalcos port by tank-trucks when vessels need small quantities. Petroleos Mexicanos (PEMEX) has, at Nanchital, a loading terminal which is about 3 miles up-river from Coatzacoalcos (max. draft 27 ft. 6 in.) where Bunker C fuel available.

Diesel oil only available at Minatitlan, about 17.5 miles up-river from Coatzacoalcos (max. draft 21 ft.). If vessel bunkers at Nanchital or Minatitlan there will be at least 1 day delay and heavy extra expenses.

Gas freeing equipment for Gas tanker at Nanchital.

CONSULS: Norway and Netherlands.

REPAIRS: Minor repairs may be effected. Electronic repairs possible.

DRY DOCK: No dry dock available.

CUSTOMS ALLOWANCES: No restriction for free use on board.

AIRPORT: At Minatitlan, about 40 minutes car drive away. 2 regular flights to Mexico City.

TIME: GMT minus 6 hours.

HOLIDAYS: No work performed on following legal holidays: January 1st; March 21st; May 1st; May 5th; September 16th; October 12th; November 20th; December 25th; and December 1st every six years when Federal Government changes President.

POLICE/AMBULANCE/HOSPITAL: Police Tel: 2 01 22, Red Cross Tel: 2 02 85; Hospital Tel: 2 00 30.

TELEPHONES: No facilities for placing telephones on ships.

SHORE LEAVE: Possible. Crew must have I.D. cards or passports. Passengers must have passports.

DEVELOPMENTS: The entrance channel up to Pajaritos roads has been dredged up to 42 ft. The quays in the Free Zone have been completely reinforced, vessels up to 31 ft. draft being able to come alongside. The warehouses for general cargo at quays 2 and 3 have been completed, with a covered area of 4,000 m. and normal loading capacity of 10,000 cu. m. There are sufficient open areas for positioning heavy loads or machinery. Apart from the lighthouse on the Gavilan Hill, in the Allende area (left bank), the port has light towers indicating the main entrance channel, another 2 to indicate the channel leading to Pajaritos roads. All 4 have flashing lights. The branch leading onwards to the Free Zone is indicated by a small tower with flashing white light. The lights of the promontories of the 2 headlands;— the East light is green, and the West light is red. The channel is marked with black coloured buoys with odd numbers, on the port side entering, and red with even numbers on the starboard side. Both sets of lights are of the flashing type. When continuing upstream towards Nanchital or Minatitlan, the bridge has to be passed under. Its characteristics are: Length 1,375 m. vertical clearance with the bridge up 35 m., with the bridge down 8.84 m. Horizontal clearance which can be used: 60 m. To have the bridge raised, vessels must give 3 long and 2 short blasts on the siren.

SHIPMASTER'S REPORT: October 1985 – LPG Carrier 35,800 cu.m.
Approaches: Present charts are not appropriately scaled, coming off Bay of Campeche chart to Chart 373 which is only a port plan, and does not extend out to the SBMs. This was partly overcome by a 'home-made' extension to Chart 373, which of course lacked soundings, but was only slightly in error by using the given Latitudes and Longitudes for marking the SBMs. The 4 fathoms rock indicated in sailing directions is said to be much closer to shore (by local knowledge) and is not close West of the new anchorage area for gas carriers. We anchored 4 miles due North of breakwaters in 28 m. of water, and soundings in the approach appeared uniform. This was just at the North limit of the dirty water from the river outflow, so vessels with a long waiting time needing to make fresh water would need to be about 6 miles off. Current was running to the East, fairly strong inside 5 miles off, at least 3 knots at times (despite freshening winds in squalls from the North, the vessel secured at No. 1 SBM was seen to be on a constant Westerly heading – a tug secured to the stern appears to be standard practice at the SBM, so it is possible the current changes at certain times). Radar targets were visible from 20 miles off, and the breakwaters were discernable on radar from 10 miles off, thus a good fix is obtainable well in the offing.
Anchorage: There were many ships at the anchorage, most of whom had taken up a position between 3 miles and 6 miles off in the N.E./N.W. vector. Holding appears to be good in this area.
Inward Transit: Pilot calls on VHF and asks vessel to meet him at the boarding ground. Pilot will accept hoist or combination ladder. Vessel is about 1 mile from breakwaters by the time Pilot reaches the bridge, so only a little time for discussion of berthing plan. Full ahead is needed to overcome outflow between breakwaters, where rate can reach 8 knots, (4.5 knots on this occasion). Good steering is essential at all points and ability to 'feel' sheer developing, but Pilots are steady and well experienced and know exactly when bow and then stern will be affected when crossing from river into Pajaritos Channel. Tugs meet vessel just after this crossing point and tie-up shoulder and quarter. Speed is reduced in the Cut to enter the basin at about 3 knots. As can be seen from chart, very little lining-up is needed for Pier 3. The same Pilot berths the vessel. This is a straight forward manoeuvre, springs first to final position, then tugs push vessel to maintain position.
Moorings: The dolphins are well placed/spaced and have good swivel slip-hooks, however there are no capstans available. The mooring gang appeared to be about 30 persons, and they eventually carried the aft back spring along the catwalk to the corner of the main platform. The mooring boat towed the messengers for the remainder of the after wires across the dolphins, while forward we used a running messenger and pulled the wires out to the hook.
Gangway: There are no shore gangways. Landing area for ships is very limited. Situation was made as safe as possible throughout, but far from comfortable.
Terminal: Pajaritos Terminal is situated within Laguna de Pajaritos which is entered via a cut-off channel from Rio Coatzacoalcos about 1.25 miles inside the breakwaters. The plan is to dredge it out to a uniform depth and face all four sides of the laguna, and build further finger piers. At present only the Western half (approx.) is in use.
Depths: It was reported that there is now a uniform depth of 42 ft. within the Western side of the laguna to a line joining the root of Jetty No. 9 with the E.N.E end of the fertiliser jetty, and outwards in the channel and river and on the leading lines outwards to the pilot boarding position, thence to seaward there are no lesser depths. This sets the controlling maximum draft for all tankers and gas carriers at 39 ft.
Berths: There are currently 10 berths in use for tankers, these being 1W, 1E, 3W, 3E, 4W, 4E, 5, 6, 7W and 7E. No. 2 has been destroyed and not yet re-built. No. 8 has not yet been built. No 9 has been built and all fendering is in position, but no pipe-lines yet connected, it is currently in use as a lay-by berth. All berths have modern hydraulic type fendering, adequate mooring sliphooks (but no capstans), and Chicksans of varying number and dimensions. Nos. 1, 3 and 4 are for products, with No. 3 currently temporary fitted up for LPG via hose. Nos. 5 and 6 have larger Chicksans for black products and crude blends etc., while No. 7 is currently for virgin crudes.

Berth Nos. 5 and 6 are at the Southern end of a continuous concrete jetty which extends the whole length of the Western side of the laguna from abreast the lower leading light to the S.W. corner, and the Northern part of this jetty is used for materials/pipes/service craft, etc. (The recessed berth shown on Admiralty Chart 373 is not now correct).

Vessels berth head-in, that is heading South on all berths with the exception of Nos. 7 and 9 where it is head North (thus nomination for 3E means starboard side to).
Tugs: There are 4 tugs currently on charter to Pemex, and it is normal to take 2 tugs in and out. Tugs are strapped up alongside 'American style' and are well fendered. 3 tugs were seen handling a 70,000 ton loaded tanker with comfort.
Pilots: Pilots come under the Harbour Master of Coatzacoalcos, but all movements to and from the Oil jetties are under the control of the Pemex Port Captain, who allocates berths. Night movement of LPG carriers is not permitted.
Customs/Immigration: Vessels are boarded on arrival alongside, Pratique being granted before any operations may commence. Pajaritos Oil Terminal is *not* part of the free port area. Vessels without Visaed Clearance/Crew Lists should produce a copy of diversionary telex. Shore leave without a pass system is normal, and boats are arranged by Agents from the stern dolphin of each pier to the town ferry landing.
Fuel: There is one header on each jetty for Fuel and Gas oil. However delays or shifting ships are possible if other vessels loading these grades.
LPG cooldown: This is possible using slow loading method, not known whether there is a by-pass system at the pumphouse to control rate, there is no by-pass system on the jetty headers.
LPG Loading: Temporarily at Jetty No. 3 only, using 150 mm. flexible hose from base of jetty abaft the chicksans. No vapour return. Loading rate 450 cu.m/hr.
Standard Time: Nautical Almanac states Vera Cruz Province keeps a Summer Time. This is not so. Time here all year is 6 hours behind GMT.

SHIPMASTER'S REPORT: November 1985.

This report from sister ship confirms and updates report above dated October 1985.

Vessel was directed to proceed to Pajaritos to load a cargo of Butane and LPG Mix. The vessel arrived at Pajaritos anchorage and in keeping with the received instructions anchored well off the port to await orders. The anchorage chosen was in a position with Pajaritos breakwaters bearing 171°×13.6 miles, in 36 m. of water. 6 shackles were used and even though the wind freshened considerably during the time at anchor, no dragging occurred. That the wind did indeed freshen is made apparent by the fact that the port was closed for 3 days. When the port reopened, we were instructed by local Agents to proceed to the pilot station to take on a Pilot for berthing. This was duly done.
Approaches: As in the case of our sister ship a "home-made extension" was made for Chart No. 373, which chart is totally inadequate for approach to the port. I can confirm that a strong East-going current was encountered inside 5 miles off on the approach to the Pilot, but radar targets are good, especially the breakwaters which show up well. On this vessel's approach the port had, as noted, been closed, with a consequent build-up in ships awaiting Pilots.
Inward Approach: Once Pilot was safely on board vessel proceeded inwards. The approaches through breakwaters and into outer harbour are clearly marked with leading line beacons. Vessel had to enter between breakwaters at full ahead due to the strong outfall, estimated on this visit at about 5 knots. The Pilots however, are capable and very experienced, and inward passage to berth was similar to that of our sister ship. We entered the Laguna at about 3 knots, slowly reducing

speed and with tugs in attendance forward and aft, on shoulder and quarter. The tugs are of ample power and well handled.

Vessel moved straight onto berth, in this case Berth No. 3 E, with no difficulties whatsoever being encountered. Berth was starboard side to and vessel moved into position immediately. Problems now arose however, due to the inability of shore mooring gang to handle the heavy mooring wires of the vessel's mooring complement. On this occasion no mooring boat was available and shore gang amounted to about 10 men, split fore and aft. As a result vessel resorted to running messengers to heave the wires ashore and onto the sliphooks. The jetty appears to be well constructed but alas no capstans are fitted to heave moorings to shore.

Gangway: Still no shore gangway available at this berth so ship's gangway used to the small area available, in a not wholly satisfactory position.

Cargo: Shore require vessel to present 1×10 in. (150 ASA) connection. No vapour return to shore available. 1×6 in. flexible cargo hose available, therefore only one grade at a time can be worked. For grade changes shore drain flexible hose to the sea via a small drain line on jetty, then disconnect shore end of hose and move on the jetty to the new grade shore manifold. This involves several men plus the use of ship's crane and takes from 2 hours – 4 hours.

There is no recirculation system on the shore line system, so when initially loading any grade the temperature can be anything up to 20° above normal loading temperature, resulting in a very high boil off. This can cause problems if trying to cool down a tank to load LPG Mix at −34°C, when tank had previously held Butane at −2°C. An estimated line clearance of 80-100 tonnes is received on board before liquid temperatures drop to normal, and certainly ships maximum reliquifying capacity is required during the initial loading phase, even at very low rates.

Once the bulk loading stage is reached, an average of 240 tonnes/p.h. was achieved on both Butane and LPG Mix parcels. The rate is controlled by shore pump house, working on shore line back pressure.

The vessel is required to fill in a shore document every 6 hours, giving amount of cargo received, rate, quantity remaining to load and estimated time of completion.

Loading can, and was, stopped if a Pemex priority ship berths on the adjacent jetty (No. 3W), as shore can only load one ship, one grade at a time. Shore will also stop loading when other ship connecting loading line. This vessel suffered stoppages amounting to 44 hours due to this reason, plus a change of grade to LPG Mix during the loading of the Butane parcel.

On this occasion the cargo surveyors employed by Charterers were Redwood, employing local staff. They had a reasonable command of English. These surveyors make the initial and final calculations and the Bills of Lading are based on these figures. No shore metering or tank gauging is possible as the two shore tanks are being filled continuously as the ship loads. Surveyors require 4-5 hours to calculate figures for arrival/departure.

As shore tanks are in use at all times, no shore tank densities are available. Redwood surveyors and Pemex chemists take samples from ships tanks loaded or loading at 50% to determine density of cargo loaded and for cargo analysis.

The surveyors are available throughout the loading on VHF Channel 16 and proved very helpful when communications with shore installation became difficult.

On completion, Redwood supply vessel with copies of ullage reports, density sheets and analysis reports.

On this occasion densities as follows:

LPG Mix: 0.5365 at 60°F in vacuum, loaded at −34°C

Butane: 0.576 at 60°F in vacuum, loaded at −6°C.

Communications: Initial contact with Agent is made via telex. However, whilst the Agent can receive telex messages, they are unable to send via telex to ships at sea. As an alternative, they send messages via Mobile Radio or Alabama Radio, call sign WLO, which station vessels should monitor until within VHF range of Pajaritos Agent. As Tomas Ruiz are also Pemex Agents ETA's etc., can also be sent to them. Agency monitors VHF Channel 16 and works on Channel 72.

There is no Health Clearance via radio for Pajaritos. Port officials board at berth, but no difficulties experienced.

Length/Draft: Informed by Agent that the following ship lengths/safe drafts apply:

Ship length	*Minimum safe draft*	
	Forward	Aft
150 m. – 175 m.	12 ft.	22 ft.
175 m. – 200 m.	14 ft.	24 ft.
200 m. – 225 m.	16 ft.	26 ft.
225 m. – 250 m.	18 ft.	28 ft.

250 m. is the maximum length that can be handled.

Radio – Loading: Communications during cargo operations caused some problems and a Letter of Protest on this subject was issued to the shore installation. All stops/starts information etc. is given to ship and ship to shore via VHF radio on Channel 16 and working Channels 9 or 11, call sign Pemex Operations. Their operators have a reasonable command of English, but can be very hard to raise at times. Also vessel was supposedly able to communicate with loading supervisor and pump house directly on Channel 9, but this proved impossible as no English was spoken or understood by these operatives, hence the Letter of Protest. After this was sent to shore Pemex operations communicated directly with the ship instead of the loading supervisor and standards were markedly improved. Even so, on 2 occasions vessel observed that loading had been suspended without any information being given to ship.

For the completion of each grade an English speaking supervisor boarded vessel to assist should any language problems arise. However, when "stop loading" was given, the pump house reaction was immediate. Paperwork for cargo, safety etc., as per normal.

Once the language problems and frequent changes to loading programme were overcome, the loading operation ran very smoothly.

A further Letter of Protest was also issued due to the shore stopping loading before the requested quantity was received on board, there being no way they would restart loading to complete.

Outward Transit: No difficulties experienced leaving jetty. Vessel moved off stern first, assisted by a tug fore and aft, then swung in the laguna. The unberthing Pilot however took some time to become accustomed to the rapid swinging of the vessel. This was especially evident in the passage through the Outer Harbour and breakwaters, being accentuated by again a strong outfall of approximately 4 knots – 5 knots. After clearing entrance vessel was swung to the West to clear passage for incoming vessels and Pilot departed when West of breakwaters.

Points of Interest: At the time of our visit to Pajaritos there was an abnormal amount of plant and vegetable material both floating and in suspension in the water, from the Outer Harbour to the berths. This material resulted in frequent cleaning of sea intake filters, some of them on a daily basis. It is not known if this condition applies on a year round basis, but certainly it was a problem in November.

SHIPMASTER'S REPORT: Pajaritos. October 1987.

Pilotage: Pilot boards from a small open, orange painted launch that is of the same design as local fishing boats.

Restrictions: Agent advised that there is no berthing or unberthing between 1800 hrs. and 0600 hrs.

Shore Leave: There is a frequent ferry service from the oil terminal to the town which takes 30 minutes and is free.

Draft: The following letter was received from the terminal:

Quote:

Master .... Date ....

In Port .... Pier Number ....

The Harbour Master has instructed us that the following minimum draft will be required for manoeuvring into and out of this port (including Pajaritos Lagoon):

Vessel's Length (m.)	*Minimum Draft* Fwd (ft.)	Aft (ft.)
50 – 100	4	14
100 – 125	8	18
125 – 150	10	20
150 – 175	12	22
175 – 200	14	24
200 – 225	16	26
225 – 250	18	28

Please comply with the above instructions, in any other condition Pilots will not manoeuvre your ship.

On behalf of Petroleos Mexicanos

....

Unquote.

SHIPMASTER'S REPORT: August 1990.

Berth: Pajaritos.

Charts: B.A. Charts No. 373 and 1225.

Approach: Do not confuse point in position 18° 20′ N., 94° 31′ W. for Pta. San Juan.

Breakwaters at Coatzacoalcos show up well on radar.

Anchorage: About 2.5 miles N.W. of breakwaters. Very exposed in Northerly winds. In strong winds, vessels invariably drag anchors. A short steep swell can develop. Wind force increase can be sudden and dramatic. Designated anchorage areas not enforced, probably due to light traffic.

Pilots: Both port closed from 1700 hrs. to 0600 hrs. Ships observed shifting inside Pajaritos Basin up to sunset.

Pilot boards in good weather, 2 miles North of breakwater from orange steel hulled cutter (fairly slow), and leaves outside breakwater. In poor weather, pilot often boards and leaves just inside breakwater. Gangway/ladder combination compulsory for boarding in ballast condition. Pilots fairly competent.

VHF: Pilots: Channels 16 and 10, difficult to make contact at night. 'Pemex': Channels 16, 17 and 9 (0900 hrs. – 0000 hrs.). Agent (Ruiz): Channels 16 and 72.

Channel: Official entry draft for tankers/gas carriers in ballast is minimum 14 ft. forward and 24 ft. aft, but is not enforced.

Full speed is used passing through the breakwater heads, due to the swell and strong West to East cross current.

Beware of small fishing boats around the entrance. Leading lights, which operate 24 hours, are very conspicuous. Once inside the breakwaters, speed is reduced, but beware of the Rio Coatzacoalcos outgoing current, which in autumn can be up to 7 knots. Due to the river current, which causes erosion, the buoyage is not to be relied upon, buoys also drift off station, due to weed and logs striking them. In summer and autumn, a lot of weed is encountered in channel and Pajaritos Basin, engine intakes should be monitored.

Pilots report many ships 'blacking out' in channel. Channel to Pajaritos about 100 m. wide and dredged to 45 ft. Dredging constantly in progress by large dredger (Hang Jun 6002), which has very conspicuous spoil boom on top.

The minimum depth found was 14.3 m., just seaward of the breakwater heads, generally greater than 15.0 m.

Tugs: 7 tugs, which also serve Coatzacoalcos, are available. 5 'Pemex' tugs (4×2,000 h.p. tractor tugs, 1×4,500 h.p. supply type tug) and 2 British 'Cory' tugs on hire to 'Pemex' ('Yewgarth' and 'Strongbow', both 4,200 h.p.). Tugs lines used throughout. Tugs berth near 'Pemex' Control Tower.

Rescue/fire fighting ship 'Pemex 652' also on stand-by near Control Tower. Believe built for SBM moorings and offshore oil fields.

Berths: Pajaritos Basin consists of 4 piers (No. 1 – No. 4) with 8 berths, and depths of about 40 ft. for handling LPG, Ammonia and certain products. Berth No. 1 handles Ethylene and VCM.

Two berths (No. 5 and No. 6) handle crude and products, and have a depth of 45 ft., size up to approx. 100,000 d.w.t.

Berth No. 7 handles crude only, depth 45 ft.

Berth No. 8, marked on B.A. Chart No. 373 never constructed.

Berth No. 9 built to handle crude, but only used as a lay-by berth.

One fertiliser berth of 40 ft. depth. One fertiliser pier (2 berths), East and West 39 ft. depth with loading gantries.

Pier No. 2 is being reconstructed, due to heavy damage as a result of LPG ship fire.

Coatzacoalcos is for general cargo, except a chemical tanker berth with tankage positioned at the South end near the Naval Base. Berth position 18° 07.55′ N., 94° 25.05′ W.

Moorings: Always head in at all berths. Vessels generally moor with 3-2-2 at each end.

Difficulty experienced handling mooring wires. After back spring gets caught up on fenders, especially at Berths No. 3 and No. 4. We had to obtain diver to free wire. Mooring gang both ends.

Gangway: Difficult to land. At Berth No. 1, we used conventional gangway with plank from bottom platform to mooring dolphin. At Berth No. 3, B.O.T. type gangway from manifold to Chicksan platform.

Cargo: Ammonia through Anaconda hoses at Berths No. 1 – No. 4 (8 in. 150 ASA). VRL available at Berth No. 3 East and West. No VRL at Berth No. 1. Ammonia cold −32°C.

Rate generally 800 t.p.h., but possible up to 1,200 t.p.h. with 3 shore pumps. Little control on rate apart from stopping and starting pumps. Chicksans for LPG, reported to be 10 in. ASA 150. Ammonia 'First Foots' stop 2 hours – 2.5 hours.

Fresh Water: Available at all berths. Apply through agent. Reported to be of poor quality.

Agent: Tomas Ruiz most generally used, and from reports the most attentive. We found them to be helpful and obtainable on VHF. Arranged diver within one hour. Tomas Ruiz S.A., Tel: 921 2 01 17, 921 2 01 30, 921 2 95 42. Telex: 78820. Fax: 921 2 65 78.

General: In Winter months, port often closed for days, due to strong Northerly winds.

Diesel fuel available at all berths, except No. 7 and No. 9, and fertiliser berths.

Fuel oil only by barge. Order fuel several days in advance.

Boat service can be arranged at about U.S.$ 3.00 per person from piers to Coatzacoalcos.

Most services can be obtained.

A number of chandlers board on arrival. Fresh salad and vegetables reported to be good.

No security at piers, boats come and go at will. Security/stowaway search advisable on departure.

Nearest airport at Minatitlan, about 20 km. away, local service to Mexico City.

Formalities: All officials board with agent on arrival. No particular difficulties. Sometimes passports are checked, and if no U.S. visa, passport will be held for duration of ship's stay.

Shore leave possible, no passes required.

Negative Visaed Crew List now required.

Clearance last port.

1 Maritime Health Declaration.

4 Stores Lists – U.S. forms acceptable.

4 Bond Lists – U.S. forms acceptable.

6 Crew Lists.

2 Vaccination Lists.

Ship's Register and Derat Certificate sighted.

Customs Officer and officials do not remain onboard. Bond not sealed.

On departure, Immigration and agent board with pilot, and issue vessel with final Clearance.

SHIPMASTER'S REPORT: May 1992.

Vessel: 5,000 d.w.t. chemical tanker, calling at Coatzacoalcos to discharge chemicals.

We came from a Northerly direction (Houston), and on the radar at 24 miles range, the coast near Coatzacoalcos is well recognisable, especially Punta Zapotitlan, which is approximately 30 miles N.W. of the port.

Contact was established on VHF Channels 16 and 10 with Marine Control Coatzacoalcos, who keeps the pilot informed of vessel's progress towards the pilot station.

We experienced an Easterly set when approaching the coast, but this may vary with prevailing winds.

The pilot boarded 1.5 miles from the breakwater, from a launch with a red hull. Pilot's launch not able to do more than vessel's dead slow speed, which is 3 knots.

A tide rip between the outflowing water of the Rio Coatzacoalcos, and the sea was encountered just before entering the breakwaters.

Continuous dredging operations are carried out in the roads and the port, by a dredger with a conspicuous sludge boom.

Pilots speak reasonable English. We berthed starboard side to on Berth No. 5, one of the (former) general cargo berths.

As vessel has a bow thruster, no tugs were used for berthing or unberthing.

When sailing, vessel swung easily off the berth with bow thruster, engine and rudder. Also the outgoing current in the river assisted in this manoeuvre. Larger vessels however would require 2 tugs for swinging. Also during increased wind, the use of one tug might be advisable for smaller vessels.

Tugs are available at Coatzacoalcos.

We had to discharge two parcels of chemicals. Two 6 in. hoses were provided from shore for simultaneous discharge of both parcels.

The hoses were connected to pipeline connections in a well in the quay. Underground pipelines run from there to the tank farm of Cia. Mexicana de Terminales S.A. (Mexterminals), about 1 km. away.

Attention has to be paid to nearby open air sulphur storage, as well as frequent cement handling on the quays.

With prevailing winds, dust of either commodities might be blown across the vessel, which could result in deposits or dust in cargo tanks being ventilated after tank cleaning or prior to loading.

Vessel was boarded by the Agent and Officials immediately after berthing. The party was made up of 4 Officials (Customs, Port Health, Immigration and Sanitary Inspection). They requested the following:

1 copy Maritime Declaration of Health.
1 copy Vaccination List.
4 copies Personal Effects List.
5 copies Stores List.
8 copies Crew List.
1 copy "Nil" Passenger List.
Clearance from Last Port.

All crew members, except the European Senior Officers, had to present themselves to Immigration, and all Passports were inspected.

Customs sighted three crew members cabins.

The Sanitary Inspector inspected vessel's provision store rooms.

On departure, the Agent and Immigration Officer boarded, and the crew were again summoned for outward inspection. All Passports again sighted.

Papers received on departure:

1 copy Sailing Permission from Harbour Master.
1 copy Sailing Permission from Immigration.
3 copies Visaed Outward Crew List.
1 copy Outward Customs Clearance.

Fresh water can be ordered, and will be delivered by truck (capacity 16 tons), which is filled from a filling stand behind the sheds. Filling and discharging time is about 45 minutes each.

Some fresh provisions were taken at Coatzacoalcos, which were of good quality.

The quay walls on all (former) general cargo berths are heavily fendered by cylindrical rubber fenders, which are placed with their axis at a 90° angle with the quay wall. Vessel's mooring lines, especially springs, easily get caught under them.

On arrival and departure, our Agent requested the time or passage of breakwaters to be passed on to him via VHF Channels 16/67. Outward, he also required the bunkers and fresh water on departure, in the same way. Also "Coatzacoalcos Marine Control" requests to be informed about bunkers and fresh water on departure, as well as port of destination and ETA; to be passed on by VHF Channel 10, when outside of the breakwaters.

Outward Pilot left inside of the breakwaters by red-hulled outboard motor launch, which was able to match up to vessel's half speed ahead (about 10 knots).

AUTHORITY: Delegacion Coordinadora, Edificio Zona Franca, Antiguo Puertos Libres. *Tel:* 2-19-46 and 2-10-00.

Empresa de Servicios Portuarios, Edificio Zona Franca. *Tel:* 2-30-89 and 2-03-46.

Comision Nacional Coordinadora de Puertos, Cuernavaca No. 5, Mexico, 11 D.F. *Tel:* 553 8711.

DOS BOCAS: 18.37 N. 93.10 W.

LOCATION: SBM No. 1, Lat. 18° 37′ 33″ N., Long. 93° 09′ 37″ W.
SBM No. 2, Lat. 18° 37′ 36″ N., Long. 93° 11′ 00″ W.

PILOTAGE: Compulsory. Pilot boards 2 miles N.W. or North of the SBMs. Accommodation ladder to be rigged 15 ft. above the water.

ANCHORAGES: North of SBMs in 20 fathoms.

The anchors should be secured with stoppers during loading and whilst manoeuvring.

MAX. SIZE: 250,000 d.w.t. Max. LOA 345 m.

VHF: Pemex on Channels 9 and 16.

TUGS: 1 tug available to make fast aft in an emergency. Tug keeps watch 24 hours on VHF Channels 16 or 9.

Mooring boats are only available for assisting with mooring, connecting, disconnecting the hoses and unmooring, no boat service available.

BERTHING: The terminal of Dos Bocas, Tabasco, Mexico, is equipped with 2 SBMs capable of loading vessels from 150,000 – 250,000 d.w.t.

The maximum LOA permitted is 345 m. (1,131 ft.) The maximum distance from bow to the ship's manifold is 183 m. (600 ft.) and the minimum distance is 149 m. (490 ft.).

SBM No. 1: Ships must have at the manifold 3 cargo connections each of 16 in. diameter (150 lbs.) with 1.4375 in. flange thickness (ANSI specifications) and should be able to receive Camlock connections.

SBM No. 2: Ships must have at the manifold 3 cargo connections each of 16 in. diameter (150 lbs.) with 1.4375 in. flange thickness (ANSI specifications) and should be able to receive Camlock connections.

The distance between centres of cargo connections must be at least 2,500 mm., and from cargo line to fuel line must be 2,000 mm. the min. distance from cargo manifold to the ship's side should be 4,600 mm.

The height from the centre of the cargo line to drip tray must be 900 mm., and to the deck 2,100 mm. maximum.

The height from deck to manifold will not be less than the height from deck to hose rail.

The cargo lines at the manifold must have one pressure gauge and drain valve.

The drip tray must be fitted with rounded edges to protect the hoses and must have Irving screen or similar.

The minimum S.W.L. of the booms should be 15 tons. The distance from deck to the top of the boom, not be less than 10 m. (33 ft.) in the working position.

The runner wire must have appropriate cargo hook.

Before vessel moors to the SBM, the boom has to be ready to work on the port side to lift the mooring equipment. The hoses will be connected on the same side.

The vessel must have 2 Panama Leads forward with a minimum clearance of 600 mm. by 450 mm. with a distance between centres of 2.0 m. – 3.0 m. The vessel should preferably have AKD chain stoppers.

The minimum distance, from the Panama Lead to the forward bitts should be not less than 2.7 m. (9 ft.) and not more than 8 m. (25 ft.).

The vessel has to supply a winch operator when vessel is mooring or connecting the hoses. In the event of mooring line damage the vessel has to provide lines as necessary.

Vessel will supply one messenger rope.

The terminal requests that vessel arrives with clean or segregated ballast.

Cargo and deballasting operations, must be planned in such a way that the vessel will be as close as possible to a safe draft for manoeuvring of the buoys in case of an emergency.

Vessels are requested to arrive with a trim not greater than 10 ft. by the stern.

The Loading Master and assistants have a portable walkie-talkie (VHF), to communicate with shore, however the vessels VHF set must also be available.

One of the riggers will be required to watch the deck from the wheelhouse for early warning of leaking or spillage and maintain communications with the shore terminal.

In the event of bad weather conditions, the Pilot may take the decision to stop the loading operations and take the vessel off the SBM. However, the Ship Master's responsibility will not cease.

Pilots, Loading Master and Mooring Personnel: When vessel moors, the Pilot, Pemex Loading Master and 10 riggers will board the vessel.

The vessel has to provide meals and cabins of officers standard for the Pilot and Pemex Loading Master. The riggers will have meals of crew standard. All will remain on board the vessel during all the loading operations.

The Loading Master is a Pemex representative and coordinates operations between shore and vessel and he has control of the operations. He will deliver to the Master or Chief Officer the cargo orders, the General Safety Regulations and the notice to avoid pressure surges. When Owners or Charterers and Pemex instructions disagree, agreement must be made prior to mooring.

On completion of loading operations the vessel will be disconnected from the buoy. Cargo calculations and clearance will be carried out whilst drifting or at anchor.

Tanks: 10 tanks for crude oil, each 500,000 barrels capacity.

DEVELOPMENTS: Project included supply port to service drilling rigs, petroleum port with 3 piers which will be able to load 12 vessels up to 60,000 d.w.t. simultaneously with liquid gas and petroleum products, 3 piers for loading crude carriers up to 100,000 d.w.t. and a container terminal.

SHIPMASTER'S REPORT: December 1984.

Shore Location: Lat. 18° 26.5′ N., Long. 93° 11′ W.

Sea Terminal: There are 2 SBMs 11 miles to the North.

SBM 1: 2 lines on port side of the ship, diameter 16 in.
SBM 2: 3 lines on port side, 16 in. diameter.

Documents: Customs Officer comes onboard with the Agent before mooring. Documents required:

Last Port Clearance.
6 Crew Lists with vaccination dates.
2 Passenger Lists.
2 Arms Lists.
3 Stores Lists.
3 Crew Personnel Effects Declarations.

Anchorage: See British Admiralty Chart No. 2626. Located between 5 miles and 10 miles to the North of the SBM. As it is not very good holding ground, pilots usually recommend a position to the N.W. 4 miles or 5 miles from the SBM, as less threatening in case of ship dragging (in Winter there may be Northerly gales).

Pilotage/Berthing: Before arrival call on VHF Channel 16 or 9 for Pemex Operations. Pilot boards at 1.5 miles West or N.W. of SBM with a tug bringing out mooring equipment and shore crew. The tug assists with mooring, then goes aft and passes a line to the poop. No berthing at night time.

Crude oil: Same as Rabon Grande. Loading rate 15,000 – 45,000 bbls.p.h.

Persons on board: During vessel's stay:

1 Pilot.
1 Loading Master.
1-2 Pemex representatives.
1 Inspector (Redwood, etc.).

9 or 10 crew required for mooring, connecting and loading watches (One man permanently on the forecastle deck and one on the bridge).

Repatriation: Crew changes may be arranged.

Shore Leave: It is not possible to have regular connection with the shore.

Ship Chandler: Available via pilot boat, but food very expensive.

SHIPMASTER'S REPORT: September 1985.

Location: The Pemex Oil Terminal at Dos Bocas consists of two SPMs.

Anchorage: Anchorage for vessels awaiting berth is centred on position Lat. 18° 45.25′ N., Long. 93° 10.5′ W., 7 miles North of the SPMs.

Documents:

5 copies Crew List.
Last Port Clearance.
2 copies Stores List.
2 copies Personal Effects Declaration.
1 copy Vaccination List.

Health: Radio Pratique is obtainable by forwarding the following information to the Agent at least 24 hours prior to arrival.

(a) Vessel's name and nationality.
(b) Master's name.
(c) Total number of crew onboard.
(d) Last port.
(e) Port and date of issue of Derat Certificate.
(f) ETA local time (GMT – 6 hours).

Radio: Vessel is required to send its ETA and cargo requirements to the Agent and Petroleos Mexicanos at least 72 hours in advance and thereafter the ETA is to be updated 48 hours and 24 hours in advance of arrival.

Loading: The standard hose connections are 16 in. SPM No. 1 has 2 hoses and SPM No. 2 has 3 hoses. The average loading rate is 40,000 bbls.p.h. There are no facilities for receiving dirty ballast ashore and vessels must arrive with clean ballast.

Completion of documents: On completion of loading a further delay of about 2 hours is expected before cargo papers are finalised. The vessel may either anchor or drift in the vicinity until these documents are completed.

Accommodation: The Mooring Master, Loading Master, two Cargo Surveyors and 10 crew for handling hoses. They expect accommodation and meals to be provided.

SHIPMASTER'S REPORT: July 1987.

Anchorage Area: 1. 18° 42′ 30″ N. 93° 08′ 00″ W.
2. 18° 47′ 30″ N. 93° 08′ 00″ W.
3. 18° 47′ 30″ N. 93° 13′ 15″ W.
4. 18° 42′ 30″ N. 93° 13′ 15″ W.

Location of Buoys:

Buoy No. 1: Lat. 18° 37′ 35.2″ N., Long. 93° 09′ 57.29″ W.
Buoy No. 2: Lat. 18° 37′ 35.5″ N., Long. 93° 10′ 59.84″ W.

Arrival Draft: Vessel size 135,900 d.w.t. Initially required 20 ft. forward and 34 ft. aft. This was later changed to 18 ft. forward and 30 ft. aft and was finally changed to 16 ft. forward and 30 ft. aft.

Radio: Vessel used radio stations WLO and WDP. ETA advices to be sent to the Agent and PEMEX, 72 hours, 48 hours and 24 hours prior to arrival. Any changes in ETA should be notified to Agent and PEMEX immediately. PEMEX (Exports) Telex No. 1773171/1773671, PEMEX (Maritime Transportation) Telex No. 1773986.

Pre-Arrival Information: The following must be advised with the vessel's ETA:

1. Name of Master.
2. Number of crew and nationality.
3. Gross and nett tonnage.
4. Arrival draft, fore and aft.
5. Approximate departure draft, fore and aft.
6. Type and amount of ballast on board and time required for deballasting.
7. Derat or Exemption Certificate, together with date and port of issue.
8. To whom Notice of Readiness to be tendered (for Agent).
9. Type of cargo and amount required.
10. Last port of call.
11. Discharge port for present voyage.

All of the above information is required in order that vessel may obtain berthing date and export licence from PEMEX.

VHF: Initial communications with PEMEX prior to arrival was made on VHF Channel 16. When at the terminal, communications are made on Channel 9 (calling) and Channel 8 (working Channel).

Berthing: Mooring of the vessel is supervised by a Government pilot and a shore gang of 8 persons. The shore gang connect and disconnect hoses and are assisted by the ship's crew. Whilst the vessel is loading the personnel maintain a watch on the forecastle, manifold and bridge.

Accommodation is required for one pilot, one PEMEX representative, one inspector and 8 crew. Mooring is carried out with the assistance of one tug which remains with the vessel at all times while cargo operations are under way. One rope is required aft for the tug.

Cargo Information: Grades available: Isthmus Crude and Maya Crude. Vessel loaded Isthmus Crude API 34.4, temperature on board 32.5° C. and Maya Crude API 22.0, temperature on board 44° C.

3×16 in. hoses were connected and the loading rate was 50,000-55,000 barrels per hour.

The Bill of Lading figures were established on board when the vessel was clear of the SBM. The ship's ullages were used to obtain the figures. Taking of ullages and paperwork takes approximately 5 hours and is prepared jointly by PEMEX inspectors, independent inspectors and ship's personnel.

General: Documents required on arrival are those required at other Mexican ports. If vessel has no Mexican forms on board they will be filled in by Agent from the ship's documents.

Repairs: Immobilisation of the engine not permitted while vessel is at the SBM.

Stores: A small amount of stores are available.

ENSENADA: 31.51 N. 116.38 W.

RESTRICTIONS: *Access Channel:* Length 1,000 m. Depth 10.0 m.
VHF: Port Authority on VHF Channel 16.
BERTHING:

	Length (m.)	*Depth* (m.)
Coastal vessel quay	483.0	4.0 – 9.5
Deep sea quay	725.0	10.5

Storage: Warehouses 15,024 sq.m. Open areas 40,000 sq.m. Covered areas 30,789 sq.m.

BULK HANDLING FACILITIES: Conveyor belt for handling limestone. Suction units for handling bulk cargoes at high capacity. Mechanical means for discharging tuna and anchovies.

MEDICAL: Hospital services available.
FRESH WATER: Available.
FUEL: Available.
REPAIRS: Mechanical, electrical and electronic repairs possible.
DRY DOCK: Floating dock for vessels up to 1,400 tons displacement.
AIRPORT: International airport at Tijuana.
DEVELOPMENTS: Breakwater under construction.
AUTHORITY: Delegacion Coordinadora, Boulevard Teniente Azueta No. 101. *Tel:* 8.35.80 and 8.13.20.

Empresa de Servicios Portuarios, Teniente Azueta No. 224. *Tel:* 8.23.68 and 8.28.60.

Comision Nacional Coordinadora de Puertos, Cuernavaca No. 5,

GUAYMAS: 27.54 N. 110.52 W. (See Plan)

DOCUMENTS:
- 5 Crew Lists.
- 6 Passenger Lists.
- 5 Stowaway Lists.
- 1 Personal Effects Lists.
- 2 Stores Lists.
- 2 Provisions Lists.
- 2 Arms and Ammunition Lists (1 copy visaed).
- 4 Cargo in Transit Lists.
- Ship's Official Documents.
- Ballast Certificate.
- Clearance from last port.
- International Health Declaration.
- Derat Certificate.
- Manifest of Cargo for Discharge, visaed by Mexican Consul (original and 5 copies).

PILOTAGE: Compulsory. Pilot available throughout 24 hours. Pilot meets vessel at Fairway Buoy.
ANCHORAGES: Good anchorage in the vicinity of the Fairway Buoy. Depth 14.5 m. Bottom mud.
RESTRICTIONS: *Entry Channel:* Length 3,500 m., width 120 m., depth 11.5 m.
HEALTH: Free Pratique available by radio on arrival.
RADIO: Guaymas Coast Radio, "XFY". Receives on 425, 454, 468 and 480 kHz. Transmits on 429 and 489 kHz.
VHF: Pilot and Port Authority on VHF, but communications not reliable.
TUGS: 1×2,250 h.p. and 1×2,400 h.p.
BERTHING:

	Length (m.)	Depth (m.)
East Quay	577	10.5
South Quay	352	11.0

Storage: Warehouses 4,800 sq.m., open areas 141,000 sq.m., covered areas 6,772 sq.m.
BULK HANDLING FACILITIES: The port has a specialised installation for the handling of dry bulk cargo, provided and operated by Almacenes Nacionales de Deposito S.A.

Characteristics: Warehousing capacity 68,000 tonnes. 36 silos arranged in 2 batteries. Conveyor belts permitting simultaneous filling of 4 holds of the vessel, with an absolute maximum rate of loading of 900 tonnes/p.h. Truck tipper. Hydraulic ramp for discharging road transport.
CARGO HANDLING FACILITIES: Loading and discharge of vessels is at the following rates:

General cargo – 25 tons/hr./hook.
Palletised cargo – 40 tons/hr./hook.
Dry bulk cargo – 80 tons/hr./hook (average).
Bales of cotton – average handling rate 100 bales/hr./hook.
Railroad and road transport up to alongside ship.

Vehicle ferries of Caminos y Puentes Federales de Ingresos, connect this port with La Paz and Santa Rosalia.

The port has equipment for handling all types of goods.

The Free Zone permits a more rapid transit of goods through the port, and a very great saving in Customs procedures.

Fumigation is provided for cargo, vessels, road and rail transport vehicles.

Lighting for night work permits work throughout 24 hours.
STEVEDORES: Working hours: 0800 – 0700 hrs.
MEDICAL: Doctors and hospital available.
TANKERS: Pemex Jetty – depth 10.0 m.
FRESH WATER: Available.
FUEL: Available.
REPAIRS: Mechanical, electrical and electronic repairs possible.
DRY DOCK: Slipway for vessels of less than 800 tons displacement (1,250 d.w.t.). Also see "General".
AIRPORT: International Airport in Guaymas, 10 km. from town.
GENERAL: *Shipyards:* This is an important industry in the port with five shipyards handling the construction of fishing vessels for tuna, sardines and shrimps, with technology of international prestige. There is a slipway for repair of vessels drawing up to 15 ft., with a 135 m. long underwater ramp.

The Rodolfo Sanchez Taboada industrial zone managed by the National Fund for Port Development was created to activate industrial development in the port, and started with promoting industries allied to fishing, there being currently two fishmeal processing plants, a fishing vessel shipyard, and it is planned to install 25 more industries and a shipyard for construction of deep draft vessels covering an area of 173 ha. This complex has asphalted roads, electricity and drinking water supplies.

LAZARO CARDENAS: 17.55 N. 102.10 W. (See Plan)

PORT LIMITS: Area within limits of anchoring described below. For "Arrived Ship", pilotage limits 1 mile to seaward from breakwaters.
DOCUMENTS:
- 7 Crew Lists.
- 2 Vaccination Lists.
- 1 Sanitary Health Declaration.
- 3 Stores Lists.
- 2 Personal Effects Lists.
- Clearance From Last Port.
- Voyage Memorandum, showing also Ship's Registry.
- Derat Certificate and Cargo Gear Certificate regarding cargo.
- 5 Cargo Manifests.
- 5 Bills of Lading.

PILOTAGE: 24 hours advance notice through coastal station, addressed to "Puerto" Lazaro Cardenas, Mich. A VHF watch on Channel 16 is maintained Monday to Friday, 0800 to 1900 hrs. and at any time previously requested by ship's Agent. VHF range 45 miles. Pilot will board normally either at Sea Buoy (17° 53.1′ N., 102° 09.6′ W.) or at the anchorage, and at Master's request further out if required. In the event of heavy sea, vessel will be instructed accordingly via VHF.
ANCHORAGES: One mile West of Sea Buoy. Very good holding ground, care should be taken not to anchor on, or near leading line (304°) due to a submarine canyon with over 100 fathoms depths at 1 mile off the breakwater.
RESTRICTIONS: Vessels up to 200 m. LOA and up to 35 ft. salt water draft may enter or leave the port 24 hours a day, larger vessels or those with deeper draft only with daylight. Vessels with over 42 ft. salt water draft must wait for tide.
Access Channel: Length 1,400 m., depth 14.5 m.
Secondary Channel: Length 500 m., depth 14 m.
Turning Basin: 600 m. diameter and 14 m. depth.
HEALTH: Pratique can be granted by VHF radio. Automatic Pratique is granted when coming from another Mexican port.
RADIO: Radio Maritima Manzanillo "XFM" and Radio Maritima Mazatlan "XMA" are recommended coastal stations through which to route ETAs. Initial contact on 2182 kHz.
VHF: At port, 25 watt 45 mile range. Channels 6, 16, 26, 11, 12, 13 and 69. Initial contact to be made on Channel 16, manoeuvring on Channel 6, port operations on Channels 11, 12 and 13.
RADAR: No radar service available.
TUGS: 1 tug stationed permanently at port 1,900 h.p. twin-screw. Tug's lines used, no charge for lines. Vessels over 50,000 tons displacement should apply to Manzanillo for another tug through Agent.
BERTHING:

	Length (m.)	Depth (m.)
Metal and Mineral Quay	650	14
Container Quay	284	12
General Cargo Quay	504	9.7 – 9.4

Shore cranes and sometimes ship's gear used for steel products. Significant cargoes are steel structure, coke-breeze, pig iron and finished steel products, also grain and sugar.
CRANES: Two container cranes 40 tons lifting capacity are available. Clearance from boom to MLLW 31.2 m. Also 3×75 ton movable cranes (self-powered) can work anywhere on quay, 4 additional mobile cranes of 20 ton capacity are available.
BULK CARGO FACILITIES: There is a shore crane clam-bucket type 250 t.p.h. capacity capable of loading and unloading. Clearance from boom to MLLW 35 m. Conveyor belt system in operation.
SPECIALISED CARGO HANDLING FACILITIES: Berth No. 1 can handle containers and heavy lifts up to 40 tons. Berth No. 2 can handle bulk and ores.
BRIDGES: No bridges.
STEVEDORES: Agents will arrange for stevedores with Lazaro Cardenas Port Services Co.
MEDICAL: Advance notice required by Agents when medical assistance required, emergencies can be routed via VHF at pilot station (Channel 16). 2 hospitals and 2 clinics with a total of 40 beds available plus a new hospital with 50 bed capacity will accept seamen. Yellow fever and cholera vaccination desirable.
TANKERS: Mineral Wharf has 10 in. diameter lines to discharge fuel oil.
DENSITY: Highly variable, can range from 1024 in dry season to 1012 in rainy season.
FRESH WATER: Available. 3 in. pipe on Mineral Wharf (American standard thread), but is recommended to boil it for drinking purposes.
FUEL: No fuel available for vessels, only diesel of specific gravity 0.85 available in trucks.
FIRE PRECAUTIONS: Tankers should fit a good ground connection to quay and have 2 lines hanging fore and aft ready for emergency towing.
CONSULS: No consuls available at present.

REPAIRS: Small and medium size repairs can be done at the workshop of the steel works if previous advice sent to Agent and Port Services Company.
DRY DOCKS: No dry docks available.
SURVEYORS: Two independent surveyors available for draft surveys, on/off hire and damage, can be contacted through Agents.
GANGWAY/DECK WATCHMEN: Not necessary or recommended.
HATCHES: Normally done by crew members, or by stevedores at ship's request.
CUSTOMS ALLOWANCES: There are no regulations. It is according to the Master's judgement for his needs for the stay in the port.
CARGO GEAR: Normally done with ship's gear but shore cranes are available upon request. Heavy lift cranes up to 40 tons.
REPATRIATION: All facilities for crew changes.
AIRPORT: Zihuatanejo Airport, nearest 135 km. 5 daily flights to Mexico City with connections to all parts of the world.
TIME: GMT minus 6 hours.
HOLIDAYS: 1st January, 1st February, 5th February, 21st March, 1st May, 16th September, 20th November, 25th December, 1st December every 6 years when there is change of President
POLICE/AMBULANCE/FIRE: Police Tel: 2-0154. Ambulance Tel: 2-05-75. Fire Tel: 2-03-33 ext. 1020 and 1000
TELEPHONE: No shore connection available.
SERVICES: Only ship chandler and laundry.
SHORE LEAVE: Crew members allowed shore leave without any special permit.
IDENTIFICATION CARDS: Seaman's Book is sufficient.
REGULATIONS: No special regulations.
DELAYS: No delays expected.
GENERAL: Salinity in basin and docks always changing and subject to tides and river flow, recommend taking at least 5 samples from keel to surface to get an adequate average of salinity.
DEVELOPMENTS: Fertimex Berth: Phosphate rock, length 509 m., depth from 12 m. to 14 m. 1 screw unloader with capacity of 600 t.p.h. for rock and sulphur and 500 t.p.h. for salt. The facilities were damaged by an earthquake in September 1985 and repairs underway.

Grain Berth: 250 m., depth from 12 m. to 15 m.; "L" shaped berth, outside 250 m., inside 210 m. with depth 11 m. Silo with capacity 80,000 tons nearing completion. Capacity of unloader 600 t.p.h.
AUTHORITY: Oficina de Operacion y Desarrollo Portuario. Unidad Administrativa S.C.T. *Tel:* 2-01-97, 2-17-79 and 2-01-24.

Port Services Company: Empresa de Servicios Portuarios, Rio Tepalcatepel No. 29, Lazaro Cardenas, Mich. Mexico. *Tel:* (Operations) 2-00-37, (Administration/Management) 2-17-22, 2-17-23, 2-20-64 and 2-20-65. *Telex:* 01772873 Cplcme.

Comision Nacional Coordinadora de Puertos, Cuernavaca No. 5, Mexico 11, D.F. *Tel:* 553-87-11.

MANZANILLO: 19.03 N. 104.20 W. (See Plan)

DOCUMENTS:
14 Crew Lists.
20 Passenger Lists.
Derat Certificate.
Vaccination Certificate for each crew member.
Cargo Manifest and one copy to be visaed.
8 additional copies of Cargo Manifest, unvisaed.
10 Bills of Lading, one copy to be attached to each cargo manifest.

PILOTAGE: Pilot station on VHF Channel 16, only keeps watch when vessel expected. Pilots are ordered by Agents basis Master's ETA.

Pilot boat is black with white wheel-house on which is painted letter "H". International Code signals used. Pilot normally boards vessel about 1 or 2 miles from breakwater but if requested in advance the pilot boat will come out to 5 or 6 miles. Pilot cannot board in rough weather. Vessels waiting for Pilot may anchor about 2 – 3 miles N.W. of breakwater in depths of 12-15 fathoms.
ANCHORAGES: Vessels may anchor in the whole North part of the Bay where depths are 12-15 fathoms at a distance of 1 – 2 miles from the coast.
RESTRICTIONS: Vessels may enter at any time day or night.
Access Channel: Length 450 m. Depth 12.0 m.
MAX. SIZE: No limitation for anchoring in the bay. For mooring alongside, max. length 200 m., max. draft 32 ft.

Also see "Tankers".
HEALTH: Port Health Officer and Immigration Officers board vessel at anchorage. Passengers and crew may be required for inspection.
RADIO: Coastal station Manzanillo Radio, call sign XFM, operating 0600 – 1800 hrs. local time.
VHF: See "Pilotage".
TUGS: 1 tug available, compulsory to use tug when mooring alongside. Tug will join vessel as ordered by the Pilot.
BERTHING: Old Port:

Name	*Length* (m.)	*Depth* (ft.)
Muelle Fiscal Quay		
East Side	230	36 (Outer end)
		16 (Inner end)
West Side	220	36 (Outer end)
		20 (Inner end)
Coastal Quay	305	13 – 20
Naval Quay	165	13 – 37

New Port:

1,092 m. of New Quays with depths 32 ft. – 36 ft. completed.

820 ft. of new quay with depth alongside 46 ft. 2 Panamax Portico cranes available in 1992, capacity 40 units per hour.

Depth in channel and South End of Basin is 36 ft.
STEVEDORES: Advise Agent in advance number of gangs required. Discharge rate approximately 20 t.p.h. – 25 t.p.h. per gang.
MEDICAL: Agent should be advised in advance if medical attendance required on board. Hospital facilities available.
TANKERS: 2 berths available, max. length 650 ft. No restriction on beam. Max. draft: N.E. side 31 ft. (Forward) and 38 ft. (Aft). S.E. side 33 ft. (Forward) and 38 ft. (Aft).
New Pemex Jetty: Located on the inner side of the west breakwater. "T" shaped berth with length of Approx. 110 m. on outer side. Depth alongside 52 ft. (inner) and 64 ft. (seaward end). 8 cargo arms available.
FRESH WATER: Should be ordered in advance. Rate of 10 t.p.h. Vessels must furnish own hose for pumping, 2 in. coupling. No barges available for delivery at anchorage.
FUEL: Should be ordered in advance. All grades available. May be expensive due Customs fees.
CONSULS: Nearest are at Colima and Guadalajara.
REPAIRS: Only repairs to auxiliary machinery can be effected with permission. At Guadalajara hull repairs may be effected provided dry dock not required.
GANGWAY/DECK WATCHMEN: No shore service available.
OPENING/CLOSING HATCHES: Normally performed by crew members.
CUSTOMS ALLOWANCES: Each crew member may retain 1 carton of cigarettes, and 1 bottle wine/spirits for his own use. No alcohol may be taken ashore.
REPATRIATION: Can be arranged.
AIRPORT: Local airport only for internal traffic.
TIME: GMT minus 6 hours all the year round.
HOLIDAYS: The following holidays can only be worked in case of emergency: 1st January; 5th February; 21st March; 1st May; 5th May; 16th September; 12th October; 25th December; and in addition 23rd May, Anniversary of the Stevedores' Union.
POLICE/FIRE/AMBULANCE: Police Tel: 4; Fire Tel: 23; Ambulance Tel: 96.
TELEPHONES: Cannot be connected on board ships.
SHORE LEAVE: Permitted, except for crews of Russian, Cuban and Communist Chinese vessels.

Crew members left behind by vessel must be covered by 10,000 Pesos bond to guarantee repatriation expenses.
IDENTIFICATION CARDS: Not required. A Crew List should be left at the gate for checking crew.
DEVELOPMENTS: Improvements are in progress to accommodate vessels up to 30,000 tons with a draft of 40 ft.
Shipmaster's Report: December 1984. A new port is under construction in Laguna de San Pedrito close East of the Old Port. There are already piers to accommodate 4 medium size vessels, and cement poles are being rammed all around the Lagoon, also dredgers are dredging the Lagoon to an expected depth of about 14 m.
AUTHORITY: Delegacion Coordinadora, Teniente Azueta – S/No., Port Operation Buidling. *Tel:* 2-07-89 and 2-00-04.

Empresa de Servicios Portuarios, Fraccionamiento Plaza Azul, Lote 9. *Tel:* 2-12-54 and 2-13-72.

Comision Nacional Coordinadora de Puertos, Cuernavaca No. 5, Mexico, II D.F. *Tel:* 553 87 11.

MAZATLAN: 23.11 N. 106.26 W.

DOCUMENTS:
Port Clearance from previous port.
4 Stores Lists.
12 Crew Lists.
2 Passenger Lists or "Nil" Passenger List.

(All to be stamped by Mexican Consul or a representative of a friendly country).

On arrival the following officials board:
Port Health Authority.
Customs.
Agricultural Department Authority for checking ship's provisions, mainly vegetables.
Doctor for checking 'meat' in the fridge room.
Immigration.
Ship's Agent.
Port Authority representative.

The (provisions) meat room is sealed after inspection by the doctor; every morning the seal is broken and resealed after the day's provisions are taken out.
APPROACHES: The approach is clear with no obstructions except Piedra Negra Rock which is just 7 ft. above the water. Vessel should head for Creston Island Light, keeping at least 2 cables clear of Piedra Negra Rock.
PILOTAGE: Pilots can be contacted on VHF Channel 16. Pilots board in position Lat. 23° 10′ 24″ N., Long. 106° 26′ 24″ W. with Creston Island Light bearing 116° (T) × 0.4 miles.
ANCHORAGES: *Shipmaster's Report:* Anchorage is not in the position marked on the British Admiralty Chart. I was told about this by the Pilot when he boarded. The anchorage is now shifted and a vessel should anchor East of a line drawn North/South through the Eastern tip of Island Chivas, East and clear of Piedra Negra Rock but outside the 10 fathom line. The holding ground is not good. Creston Island Light is a very powerful light, but its characteristic is now Fl. white every 8 sec. and not as marked on the chart.

RESTRICTIONS: *Access Channel:* Length 1,500 m. Depth 10 m. *Secondary Channel to Fishing Port:* Length 1,400 m. Depth 7 m.
RADIO: Mazatlan has a coastal radio station but only works on medium frequency.
VHF: See "Pilotage."
TUGS: Only 1 tug is available, if a second tug is required it has to be called from another port.
BERTHING:

	Length (m.)	Depth (m.)
Main Quays	981	10.0
Ro/Ro Berths	2 berths	10.0

STEVEDORES: Gangs work from Mondays to Saturdays from 0800 to 1700 hrs. Any work after 1700 hrs. till 0700 hrs. next day and from 1700 hrs. on Saturday till 0700 hrs. Monday is overtime. Cotton bales are loaded at the rate of 85 to 90 bales per hour per gang. The bales stow at 29/30 cu.ft. per bale.
MEDICAL: Assistance available.
TANKERS: Max. draft 29 ft. and LOA 590 ft., however tankers of 629 ft. LOA have discharged.
FUEL: Can be supplied, but has to be arranged in advance through PEMEX (Petroleos Mexicanos) office in New York. Diesel oil is normally supplied by trucks.
FRESH WATER: Can be obtained at any time and is supplied by hoses (ship's hoses) from the quay at about 9 Pesos per ton.
REPAIRS: Workshop for mechanical repairs. Electrical and electronic repairs possible.
DRY DOCK: Shipyard and slipway for small vessels.
REPATRIATION: Can be arranged via Mazatlan Airport or Mexico City.
TIME: GMT minus 7 hours throughout the year.
AIRPORT: International Airport.
STORES: Provisions are available, however it is difficult to get a variety and frozen vegetables are not available.
IDENTIFICATION CARDS: Not required, crew can go ashore, there are no restrictions, but all Passports and Seamen's Books are kept in the custody of the Master.

SHIPMASTER'S REPORT: December 1978.
Pilotage: Pilot compulsory. Pilot boards 1.5 cables off the South breakwater. ETAs and amendments to be sent as soon as possible after leaving previous port.
Restrictions: Vessels can enter and leave day and night. However, they can only sail on the flood tide. Tidal range approximately 3 ft.
Tugs: Tugs available but power not known.
VHF: Pilot, Port Authority and Agent on Channel 16.
Services Available: Fresh water (must be boiled for drinking). Fresh provisions. Airport (3 miles from city). Salvage Surveyor. Laundry service. Bunker fuel oil. Doctor and Hospital. Groceries and meats.
Density: 1020.
Charts: U.S. Chart 21301. B.A. Chart 3060.
Ship Anchored: 4 cables S.W. of Cerro del Creston Light in dense morning fog, depth 13 fathoms.
Pilot Boat: Low power, black hull with white superstructure, only came out to ship when the fog cleared. Requested first a gangway to board but afterwards changed his mind for a pilot ladder in view of a slight swell. Pilot boat also handled the ship's mooring lines at the berth.
Breakwater: Quite narrow to pass through.
Buoys: Mostly all covered in guano.
Berth No.3: As there was a bulk carrier on the next berth the ship had to overhang the berth by approximately 12 m. However there were bollards on shore away from the quay to provide suitable leads for stern lines. The quay was low, lying approximately 3 m. above the water with 1 m. maximum rise and fall of tide.
Note: Admiralty Tide Tables do not give any data for this port other than its range. U.S. tide tables give all required information.
Depth of Water: Average depth after sounding round hull was approximately 9.5 m., shallowest depth 8.5 m.
Officials: There is a Customs and Police gate on the quay.
Cargo Work: The ship loaded from refrigerated road trucks. The labour set their own derricks and took out the beams and plugs. However, it was over two hours before the first sling came onboard. Meal breaks were long necessitating the covering of open decks with plastic sheets to keep the cold air in. The cargo was not stowed very well, most of it was very crooked with large gaps between the deckhead and cargo. Gross hourly cargo rate is approximately 8 t.p.h.
Pilfering: There did not appear to be much pilfering. Keeping the offshore doors and the store rooms locked is a good precaution.
Early Morning Fog: On two mornings we had fog, clearing between 1030 and 1200 hrs.
Fresh Water: Available alongside the berth, appears to have no meter on it and we had to use our own hose and coupling. However pipe was left connected and we could top up whenever required.
Painting: No objection was made to painting the ship's side from a painting punt.
Lifeboat: Starboard lifeboat was used for a trip to the beach, boat however should not be landed because of the heavy swell.

SHIPMASTER'S REPORT: August 1979.
Navigation: Best chart is American. U.S. Chart No. 21301.
Anchorage: Recommended position with Cerro del Creston Lighthouse bearing 310° distant 2 miles in approximately 10 fathoms.
Approach: Straightforward but note that the small island off harbour entrance (Piedra Island) is often unlit.
Communications: Mazatlan Radio (XFL) has a range of 2,000 miles.
VHF: Pilots have Channel 16, also tugboats.
Pilots: Compulsory, board at anchorage or about 1 mile from breakwater entrance. Use a variety of craft. Board via pilot ladder.

No large ship movements permitted at night or during strong tidal streams.

Ro-Ro ferries, which also take Pilots in and out, have priority at all times.
Tugs: 1 only, low powered.
Draft: Presently restricted to 30 ft. salt water.
Cargo Facilities: Discharged 18,100 tons bulk soya bean in 10 working days. Discharge rate very dependent on transport and truck (rail) availability. 24 hour working with 6 gangs into hoppers. All grain type cargoes from South America must be fumigated if loaded onto road trucks, this takes approximately 2 days. Ship's gear usually used for cargo operations.
Authorities: Require the following in addition to ship's certificates:

12 Crew Lists
12 Passenger Lists
2 Crew Effects Lists
Crew Passports
6 Stores Lists.

The meat store of the vessel may be sealed if the Government Inspector considers that the meat is from an unsuitable country.
Repair Facilities: Minimal, mostly involved with the upkeep and repair of very large fishing fleet.
Surveyors: Nil – Nearest ABS Surveyor is in Mexico City 350 miles away, but will attend at two days' notice.
Medical: Good local facilities with English speaking staff.
Provisions: Excellent fruit, fish and vegetables. Meat of poor quality and expensive.
Hatches: Mechanical hatches operated by crew. Essential to have adequate crew available at night in rainy season (August to October) while working cargo at night.
Watchmen: Not required or compulsory. Little thieving experienced.
Laundry: Excellent quality and price.
Cash: Both Mexican pesos and U.S. Dollars available.
Time: GMT minus 7 hours.
Repatriation: Several flights daily from local airport direct to Southern and Western U.S.A. airports. This avoids having the Agents post a 'bond' if travelling via Mexico City.
Agents: Most have telex, either via Mexico City or direct international. Telephoning overseas reasonably efficient. Mail services 7 days to Europe.
Fresh Water: Available at piers – should be chlorinated prior to use.
Bunkers: Only diesel oil available – sole supplier Government owned 'Petromex'.
Shore Labour: Not available as heavy port congestion at present.
General: Mazatlan is one of the largest ports in Mexico, 6 berths and is also a large resort with excellent hotels and large numbers of tourists. It is also the largest fishing port on the West coast of Mexico.

Port delays – Bulk carriers 4 days.
– General cargo ships 2 days.

(As at mid August) – this could change for the worse once the rainy season starts.

AUTHORITY: Delegacion Coordinadora, Av. Miguel Aleman 120-Oriente, Desp. 2. *Tel:* 1-69-45.

Empresa de Servicios Portuarios, Av. Emilio Barragan y Vicente Guerrero, Recinto Portuario. *Tel:* 2-02-78 and 2-38-11.

Comision Nacional Coordinadora de Puertos, Cuenavaca No. 5. Mexico, 11 D.F. *Tel:* 553 87 11.

MINATITLAN: 17.54 N. 94.35 W.

DOCUMENTS: See "Coatzacoalcos".
PILOTAGE: See "Coatzacoalcos – Pilotage". Port about 17.5 miles up-river from Coatzacoalcos. Vessels are piloted either up-river or down-river to and from Minatitlan.
ANCHORAGES: Only at Coatzacoalcos. At Minatitlan, river is narrow and anchorage not permitted.
RESTRICTIONS: Vessels may enter harbour only in daylight. Latest time for entry and sailing to and from Minatitlan is 1500 hours.

Access Channel: Width 70 m. Depth 7 m.
Manoeuvring Basin: 850 m. × 190 m. Depth 7 m. – 11 m.

MAX. SIZE: Max. LOA at Pemex berths: 475 ft. Max. LOA at Fiscal berth: 440 ft. No breadth restrictions at both. Max. draft permitted: 21 ft. in fresh water.
HEALTH: Pratique never given by radio. Vessels granted Pratique at anchor at Coatzacoalcos. Vessels must prepare accommodation ladder, to be boarded by port authorities.
TUGS: 1 tug required to accompany vessels past the Coatzacoalcos Bridge. Tugs rejoin vessels in the river on arrival at berth. Tug's lines used. For vessels over 2,000 g.r.t. 1 tug required; over 3,000 g.r.t. 2 tugs required.
BERTHING: Normally vessels dock starboard side to. Petroleos Mexicanos (Pemex) has 8 berths for tankers, where they can load crude, fuel oil, gasoline, benzene, xylene, metaparaxylene, toluene and other petroleum derivates. Fiscal berth has a length of 73 m. depth alongside of 7.5 m. Actually only used to discharge harmless bulk fertilisers. Discharge performed by elevator at a rate of 800 tons per 24 hours, also by ship's gear using buckets at a rate of 200 tons per day per hatch.
BRIDGES: See "Coatzacoalcos – Developments".
STEVEDORES: No ETA advice necessary. Agent of Receivers of cargo order gangs to discharge. Straight working hours from 0700 to 1500 Mondays through Saturdays. Latest time to order gangs 0645 and 1445 hrs.
MEDICAL: Hospital facilities available.

TANKERS: No ballast to be discharged in the river. All ballast to be discharged to shore tanks through 2×6 in. pipe-lines.

PEMEX No. 1 Marginal Berth:
Location 78 m. downstream from the South Face of the Lazaro Cardenas Refinery.
Arrangement: Marginal.
Length: 34 m.
Width: 12.4 m.
Useful Berthing Length: 34 m.
Height Above Average Low Tide: 3.43 m.
Depth: 3.5 m. at Average Low Tide.

PEMEX No. 2 Marginal Berth:
Location: Immediately after Berth No. 1.
Arrangement: Marginal.
Length: 103 m.
Width: 9 m.
Useful Berthing Length: 103 m.
Height Above Average Low Tide: 3.43 m.
Depth: 3.5 m. at Average Low Tide.

PEMEX Quay No. 3:
Location: 507 m. downstream from the South Face.
Arrangement: T Shaped.
Length: 12.5 m.
Width: 4.6 m.
Useful Berthing Length: 12.5 m.
Height Above Average Low Tide: 3.6 m.
Depth: 8.5 m. at Average Low Tide.
Services: Drinking water, 13 product loading and discharge lines.

PEMEX Quay No. 4:
Location: 667 m. from the South Face.
Arrangement: Pier.
Length: 17.9 m.
Width: 14.8 m.
Useful Berthing Length: 37.8 m. with the aid of 2 Dukes of Alba.
Height Above Average Low Tide: 4 m.
Depth: 9.4 m. at Average Low Tide.

PEMEX Quay No. 5:
Location: 824 m. downstream from the South Face.
Arrangement: Pier.
Length: 21.5 m.
Width: 15.6 m.
Useful Berthing Length: 31.6 m. with the aid of 2 Dukes of Alba.
Height Above Average Low Tide: 3.7 m.
Depth: 3.6 m. at Average Low Tide.

PEMEX Quay No. 8:
Location: 1,063 m. downstream from the South Face.
Arrangement: Marginal.
Length: 91.7 m.
Width: 6.1 m.
Useful Berthing Length: 91.7 m.
Height Above Average Low Tide: 3.9 m.
Depth: 1.5 m. at Average Low Tide.

PEMEX Quay No. 9:
Location: 1,178 m. downstream from the South Face.
Arrangement: Marginal.
Length: 240 m.
Width: 29.1 m.
Height Above Average Low Tide: 3.73 m.
Depth: 3.1 m. at Average Low Tide.
Services: Track for mobile crane, bitts, lighting and water (fresh), gas feed points.

Tanks: Tanks which PEMEX has within the General Lazaro Cardenas Refinery.

No. of Tanks	*Content*	*Capacity Millions of Litres*
10	Wax Crude	108.3
1	Non-wax Crude	5.3
10	Petrol	93.2
11	Diesel	94.7
7	Primary Paraffin	32.3
7	Turbosine	12.8
9	Fuel Oil	90.2
5	FR-3 Asphalt	20.3
11	Hexane Aromatics	8.8
2	Heptane Aromatics	0.9
1	Betolime	0.7
20	E. Benzine	13.1
7	Toluene	8.3
9	Xylene	6.8
2	Aromine	1.5
4	F.C.C. Catalytic	19.4
2	Heavy Aromatic	2.3
1	Reformed Naphtha	6.5
2	Formed Wood Spirit	11.6
1	Poli Gasoline	1.7
1	Refined	7.3
1	Primary G.	7.3
4	Absorption Liquid	7.6
3	Recuperated Oil	21.8
8	Neutral Lubricants	5.2
17	Finished Lubricants and those in preparation	2.2
9	Finished Lubricants and those in preparation.	1.5
11	Balance Tanks	81.0

DENSITY: Averages 1006.

FRESH WATER: Available at all berths, but is not recommended.

FUEL: Marine diesel oil and Bunker "C" obtainable at Pemex berths. Bunker "C" also obtainable by barge, and diesel oil only by tank truck.

REPAIRS: No dry docks available, but small repairs can be done in shore repair shops.

CUSTOMS ALLOWANCES: No restrictions. Free use on board. 2 Customs guards remain on vessel while alongside.

AIRPORT: About 15 minutes' car drive away. Regular flights to Mexico City.

TIME: GMT minus 6 hours.

TELEPHONES: No facilities for placing telephones on ships.

DEVELOPMENTS: Constant programmes for more berths, sheds, dredging and equipment are under way, but rather slow.

AUTHORITY: Comision Nacional Coordinadora de Puertos, Cuernavaca No. 5, Mexico, 11 D.F. *Tel:* 553 87 11.

MORRO REDONDO, Cedros Island: 28.03 N. 115.11 W. (See Plan)

LOCATION: Morro Redondo: Bulk Salt Terminal Lat. 28° 10′ N., Long. 115° 11′ W.

DOCUMENTS:

3 Crew Lists in Spanish, visaed by Mexican Consulate in previous port.
12 Ordinary Crew Lists.
3 Stores and Provisions Lists.
3 Lists of Crew Effects.
1 List of Crew Vaccinations.
Clearance from Last Port.
Certificate of Registry.

The Authorities such as Port Health, Customs and Immigration together with the Agent will board after the vessel has berthed. Only in exceptional circumstances will the Authorities board at anchor or off the berth.

PILOTAGE: Pilotage available day and night. Pilot arranged by Agent on the basis of ship's ETA. Pilot boards when ship is within 1 to 3 miles of the berth, from a small MFV type pilot launch, painted black with white cabin and red deck. No radio.

ANCHORAGES: Good holding ground is found 1 – 3 miles North of the berth in 20 to 35 fathoms with the ship loading tower in line with the Morro Redondo Lighthouse.

RESTRICTIONS: None. Vessels enter and clear 24 hours a day on a first come first served basis. Height of chute above MLLW is 48 ft.

MAX. SIZE: Minimum depth alongside 17 m. Largest ship to date 160,000 d.w.t.

HEALTH: Pratique granted by Port Health Doctor who boards on arrival. Requires Crew Vaccination Certificates and Master's Declaration of Health.

RADIO: Vessels can transmit and receive through KFS San Francisco Radio or KOK Los Angeles Radio.

VHF: Loading installation calls VHF Channel 16 when ship is expected and gives any information at this time. VHF is normally manned on Channel 12 so further communication is available.

RADAR: None.

TUGS: 5 tugs are available ranging from 2,500 h.p. to 3,200 h.p. each. 2 tugs are normally used for berthing, 1 tug for unberthing. Tugs' lines at no extra charge.

BERTHING: 1 berth only, 710 ft. in length consisting of steel dolphins and wood facings, also large mooring buoys, 1 ahead and 1 astern, each about 600 ft. distance from berth. 2 mooring ropes must be bent together to reach buoys.

The large stockpile of salt at the root of the pier is conspicuous.

CRANES: None.

BULK CARGO FACILITIES: Port is solely for the purpose of loading solar salt in bulk. Loader is belt and spout type and is fixed in position. Vessel must be shifted from hatch to hatch by ship's crew.

STEVEDORES: No special requirements. Average loading rate 2,000 t.p.h.

MEDICAL: No advance notice required, doctor will attend on board at dock. Limited hospital facilities available.

DENSITY: 1026.

FRESH WATER: Not available.

FUEL: Not available.

FIRE PRECAUTIONS: No smoking allowed on dock.

CONSULS: None.

REPAIRS: No repairs possible.

GANGWAY/DECK WATCHMEN: Shore gangway only, electrically operated and tended by stevedores. Deck watchmen required.

HATCHES: Opened and closed by ship's crew.

CARGO GEAR: One fixed loader only, controlled by stevedores.

REPATRIATION: Possible, with advance notice to Agent.

AIRPORT: Close to berth. Average 3 flights per week to mainland.

TIME: Standard time GMT minus 8 hours. Daylight saving time GMT minus 7 hours from last Sunday in April to last Sunday in October.

HOLIDAYS: Cargo is worked every day of the week including Sundays and holidays (except Labour Day – 1st May).

TELEPHONES: No telephone contact with mainland.

TELEGRAPH: Government public telegraph services available in village about 11 km. from port.

SHORE LEAVE: Allowed. No special shore passes required.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.
CURRENCY: Mexican Pesos (MEP). U.S.$ 1.00 = 2,989 MEP (15.4.91).
AUTHORITY: Exportadora de Sal, S.A. de C.V., 7120 Via de la Amistad, Otay Mesa, CA. 92073, U.S.A. Postal Address: P.O. Box 439054, San Ysido. CA. 92143-9054, U.S.A. *Tel:* (685) 70505. *Telex:* 52562 ESGNME *Cables:* Essas San Diego. *FAX:* (685) 70477.

NANCHITAL: 18.00 N. 94.27 W.

DOCUMENTS: See "Coatzacoalcos".
PILOTAGE: See "Coatzacoalcos Pilotage". Port about 3 miles up-river from Coatzacoalcos.
ANCHORAGE: See "Coatzacoalcos Anchorage".
RESTRICTIONS: Vessels may enter Coatzacoalcos only with daylight. Navigation from Coatzacoalcos to Nanchital remains closed from 1630 hrs. to 0700 hrs.
HEALTH: See "Coatzacoalcos".
TUGS: When vessels proceed to Nanchital, 1 tug accompanies vessel to pass the Coatzacoalcos bridge, according to Port Regulations. Tugs again join vessels when arriving at Nanchital berths. Tug's lines used. For vessels over 4,000 g.r.t. 2 tugs used.
MAX. SIZE: Max. LOA 580 ft. No breadth restrictions. Max. draft permitted 27 ft. 06 in.
BERTHING: Normally vessels dock port side alongside. When current and circumstances permit vessel is turned around and docked starboard side to. There are 2 docks at Nanchital, called Old Pier and New Pier. Both to load crude oil, No. 6 fuel oil by pipe-line of 6 in. and up to 10 in. Mooring, unmooring, connecting and disconnecting hoses performed by Pemex own labourers.

Old Pemex Quay:
Location: Right bank of Rio Coatzacoalcos 10.5 km. from the mouth of the port.
Built: 1950.
Arrangement: T-shaped.
Length: 88.3 m.
Width: 12.4 m.
Useful Berthing Length: 95 m. including Dukes of Alba.
Height Above Average Low Tide: 1.8 m.
Useful Depth: 8 m. at average low tide.
Services: Fresh water, lighting, bollards, fuel supply points.

New Pemex Quay:
Location: Facing the Pemex installations at Nanchital.
Built: 1969.
Arrangement: T-shaped.
Length of Platform: 32.4 m.
Width of Platform: 13 m.
Useful Berthing Length: 86.7 m. using 2 Dukes of Alba.
Height Above Average Low Tide: 2.71 m.
Depth: 9 m. at average low tide.
Services: Fresh water, lighting, fuel supply points, loading hoses.

Marginal Quay:
Location: On right bank of Rio Coatzacoalcos 11 km. upstream from port entrance.
Built: 1959.
Arrangement: Marginal.
Length: 239 m.
Width: 30 m.
Useful Berthing Length: 239 m.
Height Above Average Low Tide: 2.05 m.
Depth: 8 m. at average low tide.
Use: By Pemex.

Tanks: Used by Pemex:
3 for crude oil (8.2 million litres).
1 for fuel oil (15.2 million litres).
Located within inhabited area:
2 for diesel (1.59 and 8.7 million litres).
1 for fresh water (10.3 million litres).

MEDICAL: Hospital facilities available only at Coatzacoalcos.
TANKERS: See "Berthing".
BALLAST: Special regulation for tankers that no ballast water to be discharged in the river. Deballasting performed by 2 pipe-lines of 6 in. diameter to shore tanks.
DENSITY: Average 1006.
FRESH WATER: Available at both berths but is not recommended for drinking.
FUEL: Available only at the Pemex Oil Terminal at any time.
CONSULS: None.
REPAIRS/DRY DOCKS: No dry docks available, but small repairs can be done in shore repair shops.
CUSTOMS ALLOWANCES: No restrictions. Free use on board. 2 Customs guards stay on board. Vessel to provide them boarding and lodging.
AIRPORT: At Minatitlan, about 1 hour car drive away. 2 regular flights to Mexico City.
TIME: GMT minus 6 hours.
TELEPHONES: No facilities for placing telephones on ships.
DEVELOPMENTS: Constant programmes for more berths, sheds, dredging and equipment are under way, but rather slow.
AUTHORITY: Comision Nacional Coordinadora de Puertos, Cuernavaca No. 5, Mexico, 11 D.F. *Tel:* 553 87 11.

PROGRESO: 21.17 N. 89.39 W. (See Plan)

PORT LIMITS: For port fees and freight contracts, port limits are considered as a zone within the area bounded by the meridian crossing Chicxulub port in the East, the meridian crossing Chelem port to the West, and the meridian passing through the Entrance Buoy (cylindrical beacon, painted with red and white stripes) situated in Latitude 21° 21′ 03″ N., Longitude 89° 41′ 09″ W.
DOCUMENTS:
7 copies of Crew List, visaed by Mexican Consulate.
6 copies of Ship's Stores List.
6 copies of Personal Effects Declaration.
6 copies of Bills of Lading.
Clearance from last Port.
Derat Certificate.
Tonnage Certificate.
Safety Certificates.
Loading Plan.
Stability Calculations.

PILOTAGE: Compulsory. The Pilot boards at the Entrance Buoy, his launch is identified by the international signal code day or night. Approximate arrival time must be notified by the consignee at least 24 hours before arrival, and confirmed 2 hours prior to arrival. Pilots monitor VHF Channel 16, and Telephone No. (993)-5-00-09, during office hours (0800 hrs. – 1800 hrs.)
ANCHORAGES: 1.5 miles N.W. of the Entrance Buoy in 30 ft. depth for vessels with over 20 ft. draft, and 2.5 miles N.W. of Pier No. 2, for vessels of 16 ft. draft or less, in 21 ft. depth.
RESTRICTIONS: There are no night time restrictions, except for vessels of over 16 ft. draft at Piers No. 1 and No. 2, and over 23 ft. draft at Piers No. 3 and No. 4.
MAX. SIZE: No restrictions, except for vessels over 23 ft. draft.
HEALTH: A representative of the Health Department checks the vessel on arrival.
RADIO: Progreso Coastal Radio Station (XFN) listens from 0600 hrs. to 1900 hrs. local time on 2182 kHz, Channel 16 VHF and 500 kHz. Arrival advice may be sent through the station 24 hours beforehand.
TUGS: Compulsory for vessels over 500 g.r.t. The port has 4 tugs, 2×800 h.p., 1×1,350 h.p. and 1×2,350 h.p.
BERTHING: The facilities are located 2 km. offshore in position 21° 18.25′ N., 89° 40.3′ W., and 6.5 km. offshore in position 21° 20.75′ N., 89° 40.7′ W.

Pier	*No.*	*Length* (m.)	*Official Draft* (ft.)	*Use*
Fiscal	1	204	16	Grain
Fiscal	2	204	16	General cargo
Fiscal	3	240	23	General cargo
Fiscal	4	140	23	Containers
Fiscal	5	140	23	Transshipping
Mooring Berth	1	170	16	Gasoline
Mooring Berth	2	170	18	Diesel (Pemex)

CARGO HANDLING EQUIPMENT:

	Capacity
2 Cranes	18 tons.
1 Crane	120 tons.
11 Forklift trucks for stacking and unstacking	8,000 lbs.
5 Forklift trucks for stacking and unstacking	4,000 lbs.
11 Suction devices	50 tons/hour.
14 Suction devices	70 tons/hour.
6 Truck tractors	50 tons.
8 Flats for containers	40 tons.
1 Elevator	346 cu.m./hr.
3 Chutes	20 tons.
1 Forklift for container handling	80,000 lbs.
2 Forklift trucks	15,000 lbs.
3 Conveyors for grain	250 t.p.h.
2 Buses	40 Passengers.
2 Carts	80,000 lbs.
2 Forklift tractors	1 ton.
3 Forklift trucks	6,000 lbs.
3 Suction devices	120 t.p.h.

STEVEDORES: Service to be requested 24 hours in advance through consignee.
MEDICAL: Medical attention available at the port. There are hospitals in the city of Merida, 32 km. away.
TANKERS: There are 2 moorings or buoys, for unloading products with 8 in. and 12 in. lines.
DENSITY: 1015.
FRESH WATER: Safe drinking water available on piers through 2.5 in. pipes, or by tank trucks.
FUEL: Diesel can be supplied by truck, as well as grease and lube oil in drums. They should be requested 24 hours in advance by the consignee. Heavy fuel cannot be supplied.
WATCHMEN: These services are usually undertaken by vessel's personnel.
OPENING/CLOSING HATCHES: Usually performed by vessel's crew.
CERTIFICATES: See "Documents".
CUSTOMS ALLOWANCES: A carton of cigarettes and 2 bottles of whisky per week.
IDENTIFICATION CARDS: Not required.
CONSULS: Located at Merida, 30 minutes by road.

Cuba	Tel: 91-99-21.26.77
Germany	21.21.77
France	21.60.13
Lebanon	21.77.76
Switzerland	91-99-21.75.00
U.K.	21.67.99
U.S.A.	21.60.30

REPAIRS: Specialised shops can undertake repairs.
SURVEYORS: Lloyd's Register Agent: Manuel Mier y Teran. Tel: 91-993-5-00-29, 5-00-42 and 5-01-36. Fax: 50966. Telex: 753834 Reimme.
DRY DOCKS: Three docks (Astimex, Zena and Bonanza).
REPATRIATION: Possible.
AIRPORT: 37 km. from port, about 30 minutes driving time. Daily flights to Houston, Miami and New Orleans, also flights to Central America, Cuba, Jamaica, Germany, and connections via Can-Cun and Mexico City.
TIME: Central Standard Time (local time) GMT minus 6 hours.
POLICE/AMBULANCE/FIRE: Port Police, Tel: 5-00-48 and 5-00-90.

Ambulance, Tel: 5-04-94 (Navy Hospital).

Firemen and Municipal Police, Tel: 5-00-26.

EMERGENCY CO-ORDINATION CENTRE: Ninth Naval Zone (Yukalpeten Port) monitors VHF Channel 70, 2182 kHz and 500 kHz. Tel: 5-02-85.
SERVICES: Repairs to radar, Loran, echo sounders, gyros (any electronic device), inspections and underwater repairs.
HOLIDAYS: January 1st, February 5th, March 21st, May 1st and 5th, June 1st, September 16th, November 1st and 2nd, December 1st (every 6 years), December 25th. It is possible to hire labour at 100% increase on these days.
SHORE LEAVE: No restrictions.
GARBAGE DISPOSAL: A garbage collection service is available. Waste bags and collector are provided. Tel: (91-993) 5-10-90, 5-27-10, 5-26-09. Collection time: 0800 hrs. to 1800 hrs., Monday to Saturday. Cost: About $ 8.19 (depending on currency rates) per drum or equivalent up to 200 kg.
WASTE OIL DISPOSAL: Available on all wharves. If incineration is required by any Health Authority, this will cost about $ 0.22 (depending on currency rates) per kg.
DEVELOPMENTS: The remote terminal is planned to be extended 4.5 km. Northwards with an area of 7,000 sq.m. and a 1,000 m. of lineal wharf.

During 1992, a wharf for handling grain will be constructed. It will be 269 m. Southwards of the remote terminal, consisting of a platform with a 200 m. length marginal wall, and a surface area of 753 sq.m.

A wharf of 140 m. for 2 vessels of 15,000 tons capacity, will start from the viaduct, having a width of 12 m.

AUTHORITY: Direccion General de Puertos Y Marina Mercante, P.O.Box 21, Calle 78 No. 146, 97320 Progreso, Yuc., Mexico. *Tel:* 5-00-90 and 5-12-55. Residence 40-39. *FAX:* 5-26-29. *Contact:* Captain Gilberto Andrade Castro, Captain of the Port.

PUERTO MADERO: 14.44 N. 92.25 W. (See Plan)

PORT LIMITS: A vessel is considered an "arrived ship" when it is alongside the berth.
DOCUMENTS:

10 Crew Lists (Spanish language), 3 stamped.
10 Passenger Lists (Spanish language) 3 stamped.
10 Stores Lists (Spanish language).
10 Cargo Manifest (Spanish language), 3 stamped.
3 Arrival Reports.
10 Bills of Lading.
3 Crew Customs Manifests.
1 W.H.O. Form.

All papers must be correct, Immigration Officer checks Crew List against all Passports/Seaman's Books.

Vessels are boarded on arrival by 7 officials.

PILOTAGE: Compulsory. Pilot will board vessel 1 mile S.E. of Fairway Buoy, depth approximately 8 fathoms.

Vessel must send ETA 24 hours in advance of arrival. Ship's Agent to request services of Port Pilot in advance. Pilot will reply by giving instructions to be followed on arrival.

ANCHORAGES: Call the Pilot on VHF Channel 16 and agree on the position of anchorage and the side where the gangway will be positioned.

As a secondary area, vessels may anchor about 2 miles to the S.W. of the Port Entrance in 10 fathoms of water.

The bottom is muddy at the anchorage and throughout the port.

RESTRICTIONS:
Channel between Breakwaters: Length 1,167 m. Width 80 m. Depth 9.7 m.
Manoeuvring Basin: Length 450 m. Width 80 m. Depth 9.5 m.
Channel to Main Dock: Length 350 m. Width 80 m. Depth 9.15 m.
Access Channel to Fish Dock and Navy Dock: Length 650 m. Width 60 m. Depth 7.0 m.
MAX. SIZE: Max. LOA 165 m. Max. beam 25 m. Max. draft 8 m.

Measurements are in accordance with the manoeuvring area and the depth of water throughout the port.

Tankers are not received in the port as there are no discharge lines, and the manoeuvring area does not permit it.

HEALTH: Request Free Pratique 48 hours and 24 hours in advance of arrival via Salina Cruz.

Report any suspicious illness to Agent prior to arrival in order that vessel may be directed to Quarantine Anchorage.

Health Officials require:
Health Declaration.
Derat or Exemption Certificate.
Crew Vaccination Certificates.
Crew List.

RADIO: Via Manzanillo or Salina Cruz, ETA 48 hours and 24 hours prior to arrival.

All vessels approaching the port to berth, and when effecting manoeuvres within the area of the port or when leaving the port, must effect all communications by VHF Channel 16.

Additional communication or for safety provided by the Naval (Coast Guard) on 500 kHz. International Call Sign for Aid to Fishing Vessels 2182 kHz on R/T or Channel 16 VHF.

VHF: Salina Cruz and Puerto Madero on VHF Channel 16.
RADAR: There is a radar system but it is only used by the Naval "Coast Guard", and no contact with this system is possible, although all vessels approaching this port are detected by this radar.
TUGS: There is a service tug (750 h.p.) which comes alongside the vessel at the port entrance, working with vessel until she is berthed alongside a quay. The services of the tug are compulsory for all shipping.
BERTHING: There are 2 reaches, an expansion basin, a turning basin and a general cargo berth 150 m. length, the depth is 9.2 m. at LW (salt water).

Vessels usually moor port side alongside and drop the starboard anchor with 3 or 4 shackles. The cargo handling is by means of ship's own gear and there are four conveyor belts for the handling of boxed bananas.

CRANES: The port has no cranes, discharge and loading has to be with the ship's derricks.
BULK CARGO FACILITIES: In the port is a single general cargo berth. Bulk cargo is handled directly from the hold to the lorry or railway trucks using hoppers and scoops and loaded into the hold and raised by the ship's derrick.

At present the port handles bananas and coffee outwards and bulk fertilisers (and in sacks) inwards. Also bagged cement and heavy machinery for hydro-electric stations.

SPECIALISED CARGO HANDLING FACILITIES: There is no equipment for handling container vessels.
BRIDGES: The entry of vessels is free, there being no bridges over the channel.
STEVEDORES: Masters of vessels must request the requisite number of gangs 24 hours in advance via the ship's Agent.

General cargo – 18 to 20 tonnes/p.h./hook.

Bananas – 3,000 cases per hour by the side-port system.

MEDICAL: 24 hours notice for requesting medical assistance.

A sick person can be hospitalised if the Master so requests by radio.

International Health requires certificates of vaccination and where necessary personnel can be vaccinated if required.

TANKERS: No facilities.
DENSITY: Average 1025.
FRESH WATER: The port quay has drinking water hydrants controlled by the Superintendency of Port Operations.
FUEL: It is possible to provide bunkers in small quantities via pipes, average supply 15,000 litres.

In cases of emergency, bunkers can be requested by radio from the ship's Agent.

FIRE PRECAUTIONS: Those normal for a cargo vessel.
CONSULS: There are no Consulates in the port. There is one in the town of Tapachula, Chiapas, 28 km. from the port.
Consul of Guatemala: 2a Calle Oriente No. 33, 30700 Tapachula, Chiapas. Tel: 6-12-52.
REPAIRS: It is possible to have repairs made to engines of small vessels in the town of Tapachula.
DRY DOCKS: None.
SURVEYORS: None.
GANGWAY/DECK WATCHMEN: It is necessary to post a watchman of the Immigration Service on the gangway when the vessel is berthed in the port.
HATCHES: Opening and closing of hatches by the crew or stevedores.
CUSTOMS ALLOWANCES: 200 cigarettes or 50 cigars or their equivalent; 1 litre of spirits.
CARGO GEAR: Loading/discharging is carried out by means of the ship's derricks.
REPATRIATION: Possible.
AIRPORT: 12 km. from the port is the new International Airport of Tapachula.
Regular Flights – Aeromexico:

Mexico/Tuxtla Gtz./Tapach LA: Arrival at Tapachula at 1155 hrs. departure at 1255 hrs.

Mexico/Oaxaca/Tapachula: Arrival at Tapachula at 0855 hrs., departure at 0920 hrs.

Aviacion de Chiapas: Tapachula/Tuxtla Gutierrez: Arrival 0800 hrs. leave 0830 hrs. Arrive 1300 hrs. leave 1330 hrs.

In Tuxtla Gutierrez there is a connection with the whole state of Chiapas and part of the state of Tabasco.

Executive Air Services: To any part of the country and Central America.
TIME: Local time is GMT minus 6 hours throughout the year.
HOLIDAYS: 1st January, 5th February, 21st March, 1st May, 16th September, 20th November, 25th December, 1st December every 6 years when the Executive Power is transferred.

Loading and discharge services can be provided on these days, but it is considered as overtime.

POLICE/AMBULANCE/FIRE: Police Headquarters Tel: 6-10-93, Tapachula, Chiapas.

Mexican Red Cross Tel: 6-19-49, Tapachula, Chiapas.

Fire Brigade Tel: 5-20-65, Tapachula, Chiapas.

EMERGENCY CO-ORDINATION CENTRE: Headquarters of the 22nd Military Naval Area on 500 kHz. Also see "Radio".
TELEPHONES: There is no telephone service available in the port.
SERVICES: No tank cleaning or dirty ballast facilities.
BANKS: Bancomer, S.N.C., Central Poniente y 4a Avenida Norte, 30700 – Tapachula, Chiapas. Tel: 6-12-20. Telex: Bcchme – 77715, Bcchme – 77716.

Banamex, S.N.C., 4a Avenida Norte y 1a Calle Poniente, 30700 – Tapachula, Chiapas. Tel: 6-29-24. Telex: Bntpme – 77714.

Banca Serfin, S.N.C., 6a Avenida Norte No. 8, 30700 – Tapachula, Chiapas. Tel: 6-1/-70. Telex: Serfme – 77735.

Multibanco Comermex, S.N.C., 6a Avenida Norte y 5a Calle Poniente, 30700 – Tapachula, Chiapas. Tel: 6-15-22.

Banco de Credito Rural del Istmo, S.N.C., 6a Avenida Norte y 1a Calle Poniente, 30700 – Tapachula, Chiapas. Tel: 6-14-20.

Banco Mexicano Somex, S.N.C., Central Poniente y 2a Avenida Norte, 30700 – Tapachula, Chiapas. Tel: 6-27-60. Telex: Bmsome – 77731.

Banco Nacional Pesquero y Portuario, S.N.C., Central Oriente No. 42, 30700 – Tapachula, Chiapas. Tel: 5-03-52.

Banobras, S.N.C., 6a Avenida Norte No. 4, 30700 – Tapachula, Chiapas. Tel: 5-15-58.

Banco Internacional, S.N.C., 1A Poniente y 2a Avenida Norte, 30700 – Tapachula, Chiapas. Tel: 6-28-00. Telex: Bichme – 77733.

Banpais, S.N.C., 4a Avenida Norte y 1a Calle Poniente, 30700 – Tapachula, Chiapas. Tel: 5-00-31.

Banco del Atlantico, S.N.C., Central Norte No. 18, 30700 – Tapachula, Chiapas. Tel: 5-12-90.

SHORE LEAVE: Possible.

IDENTIFICATION CARDS: A Seaman's Book is sufficient for going as far as the town of Tapachula, Chiapas.

DELAYS: There are no delays, on arrival a Pilot proceeds to bring the vessel into port, and the work gangs are already on the quay, commencing work as soon as the vessel is secured.

GENERAL: The port is relatively new, it lacks port infrastructure for loading/discharge of goods. But in order to handle any type of cargo, equipment can be brought from the nearest port if the ship's Agent requests it 48 hours in advance and at the same time presents the list of cargo so as to ascertain the type of equipment required. With regard to the labour force, the gangs can alternate to provide 24 hour working.

DEVELOPMENTS: It is planned to extend the breakwaters.

AUTHORITY: *Port Captaincy:* Captain Guadalupe Javier Rivera Barrera, Operations Office, 30830 Puerto Madero, Chiapas, Mexico.

Apartado Postal No. 117, 30700 Tapachula, Chiapas, Mexico.

Superintendency of Port Operations: Jose Luis Velasco Carrillo, Operations Office, 30830 Puerto Madero, Chiapas, Mexico.

Apartado Postal No. 214, 30700 Tapachula, Chiapas, Mexico.

National Port Co-ordination Commission: Cuernavaca No. 5, Colonia Condesa, Delegacion Cuauhtemoc, 06140 Mexico, D.F.

Co-ordination Delegation for Puerto Madero: Jaime Vidal Hernandez Lopez, 3a Calle Poniente No. 2-302.

Apartado Postal No. 436, 30700 Tapachula, Chiapas, Mexico. *Tel:* (91-962) 634-46.

AGENT: Jose Antonio Tellez, P.O.Box 198, Tapachula, Chiapas (Province), Mexico. Tel. Office 612-40, Home 622-54.

Fruit Agent: Jose Leyba, P.O. Box 311, Tapachula, Chiapas (Province), Mexico. Tel: 615-31.

RABON GRANDE: 18.14 N. 94.23 W.

SHIPMASTER'S REPORT: September & October 1982.

LOCATION:

SBM No. 1 Lat. 18° 13′ 34″ N., Long. 94° 23′ 07″ W. Light "S".
SBM No. 2 Lat. 18° 13′ 34″ N., Long. 94° 20′ 29″ W. Light "O".

PILOTAGE: Pilot boards in a position midway between the two buoys. Tug rendezvous in same position with mooring equipment which is loaded on the port side.

ANCHORAGES: Anchorage position as advised by the Pilot is to the N.W. of a line joining the 2 SBMs and about 2 miles distant. A point of note is that there were at least 20 vessels anchored to the North and West of the port entrance, mostly oil tankers awaiting berth in the inner harbour. A U.S. Government chart covers the port area and SBM berths but was not available through the local Agency.

While the vessel was lying off in the rendezvous position waiting for Pilot and mooring equipment a very strong set to the S.E. was experienced, the wind being Northerly, Force 6 throughout the afternoon. Also during the vessel's stay it was noted that the wind increased to Force 5 – 6 every afternoon and gusting to Force 6 – 7 during the night time squalls.

Shipmaster's Report: January, 1982. Not same vessel.

Anchorage 2 to 8 miles Northwards from the breakwater. Poor holding ground anywhere in the area due to the river discharge giving a muddy ooze bottom. Even with over 9 shackles out in 18 fathoms of water, ships drag anchor when subject to the gales which blow from the Northern quadrants.

The onset of these gales are sudden and fierce, blowing towards the shore. Apart from the very accurate weather reports advising that a front is approaching, it was noted that an appreciable rise in barometric pressure preceeded the gale. The normal practice in the event of a gale being forecast was to have the engines on 10 minutes' notice and if the vessel began to drag, the anchor was weighed and the vessel cruised off the area until the storm abated.

RESTRICTIONS: Mooring to SBM in daylight hours only but unmooring allowed at anytime. Both operations depending on prevailing weather conditions.

Recommended arrival drafts are as follows:

Length O.A. (m.)	*Draft Forward* (ft.)	*Draft Aft* (ft.)
175 – 200	14	24
200 – 225	16	26
225 – 250	18	28
over 300	20	32

RADIO: Communication between ship and shore is by vessel's VHF set and constantly monitored by shore personnel.

Radio Pratique is obtainable by forwarding the following information to the Agent at least 24 hours before arrival:

(a) Vessel's name and Nationality
(b) Master's name
(c) Total crew on board
(d) Last port.
(e) Derat Certificate – Port and date of issue
(f) ETA local time (GMT minus 6 hours.)

It is also advisable to establish as soon as possible which grade the installation require to load first.

Communications with the Agency was by Telex via Portishead and/or Mobile, Ala., the latter preferred by the Agency until within range of the local station.

Pajaritos Radio Station: Call sign XFF2: Station operated by Pemex.

Traffic lists are broadcast on the even hour plus 30 minutes. Weather forecast at 0830, 1430, 2030 hrs. local time. Local time is GMT minus 6 hours.

Ship (Tx.) kHz	*Shore (Tx.)* kHz	*Times*
4191.0	3700.0	Night only
6286.5	6442.5	Day and night
12573.0	12790.0	Day and night
8382.0	8690.0	Day and night
16764.0	17075.0	

It is advisable to pass cargo information, grades, quantities and order of loading through this station as sometimes the Agencies fail to pass on information received from vessels to Pemex, the operating oil company.

On this visit (October 1982) all radio traffic was passed through Mobile Radio Station Alabama, and was received within a reasonable time at Coatzacoalcos.

BERTHING/LOADING: The 2 SBMs are fitted with 2×16 in. hoses with connection to port side of vessel.

Two grades are available, Isthmus Crude and Maya Crude and the line clearing amount is 34,000 barrels.

Loading rates vary from 17,000 to 35,000 U.S. bbls./p.h. depending on stocks and number of vessels loading. During heavy squalls and/or electrical storms loading is suspended. While secured to the buoy engines required on immediate/minimum notice.

During loading operations and while secured to the buoy the Pilot, Loading Master, 2 Petroleum Inspectors and 8 Hose Crew remain on board and have to be fed and housed. The Hose Crew change every morning and the Loading Master every third day or thereabouts.

October 1982: Once again loading on the SBM. 2 grades of oil, Maya and Isthmus Crude oils. The rate of loading varied from 12,000 to 25,000 bbls./p.h.

SHIPMASTER'S REPORT: July 1984.

Vessel (140,000 d.w.t.) anchored 320° (T) 2.1 nautical miles from No. 2 SBM which flashes 'U' every 15 seconds. Bottom was glutenous mud. Accommodation required for 1 Pilot, 1 Loading Master, 2 Cargo Surveyors and 8 hosemen. The 8 hosemen work in shifts so only require 4 beds.

Agent receives all Immigration, Customs and Health Papers. Documents required were 4 Crew Lists (1 visaed), Personnal Effects Lists and Stores Lists.

Launch service to shore available at times agreed with Agent.

In the event of squalls/thunderstorms tug will tow from the stern.

Stores are available and from the quality of items seen ashore – mangoes, avocadoes and fresh fish appear to be of good quality.

SHIPMASTER'S REPORT: September 1985.

DOCUMENTS:

5 copies Crew List.
2 copies Stores List.
2 copies Personal Effects List.
1 copy Vaccination List.

FRESH WATER: Fresh water can be arranged through Pemex or vessel's agent.

ROSARITO: 32.20 N. 117.05 W. (See Plan)

SHIPMASTER'S REPORT: 1975.

GENERAL: There is no port or approaches chart for Rosarito.

There are 3 sea berths only, 2 using anchors and stern buoys, and 1 single point mooring platform due to come into service in 1976. There is a continuous Westerly swell (July) and the berth is very exposed.

Discharging a full cargo, it is advisable to commence ballasting as soon as possible to maintain a reasonable draft. There is no objection to this by the receivers.

DOCUMENTS: As for other Mexican ports re visaed Crew Lists, etc. Suppliers in Curacao supplied all cargo documents with correct number of copies.

APPROACHES: Straight forward, with a shelving bottom and ample depth of water up to the berths. Anchorage was found about 1.2 miles off the South buoy berth in 14 fathoms with good holding. Approach in poor visibility, common at this time of year, presented little difficulty once a position of berths is ascertained. Coronado Islands are good radar targets for position fixing.

PILOTAGE: Pilot boards about 1 mile West of the berths from a black pilot launch equipped with VHF Channel 9. He speaks good English. The Boarding Officer boards with the Pilot. He speaks no English. The Pilot and Boarding Officer remain on board throughout cargo operations, also pilot/mooring launch is at hand at all times. All cargo operation liaison with the shore is by VHF operated by the Boarding Officer, who also does all Customs, Immigration work, etc., with the Pilot as interpreter.

RADIO: Communications to Agents in Ensenada through Manzanillo Radio XFM and then Ensenada Radio XFE on HF.

Petroleos Mexicanos (PEMEX), the Charterers, have their own station at Rosarito which supplies berthing instructions, etc. Station XIB83 working on 8690 kHz and 500 kHz. They also keep a listening watch on VHF Channel 9.

OPERATIONS: Local flag tonnage gets preference for the berths. This should have little effect with the single point mooring coming into operation shortly, giving 2 product berths.

The pipe-line is handled by ship's staff. All ullaging etc. done by ship's staff. A comparison between ship's figures, B/Ladings and shore figure is made on completion of discharge, before clearance is issued by the Boarding Officer.

No difficulty was encountered in maintaining the requested back pressure of 6 kg. at the manifold using 1/2 pumps. Liaison with the shore is excellent, by Boarding Officer on VHF with hourly checks.

SUPPLIES: No bunkers or fresh water. Provisions can be obtained in small quantities but are difficult to get on board and expensive. Medical assistance can be obtained ashore, but again with the difficulty in getting ashore it would be only in a serious case.

AGENT: Only communication was on the second day by VHF but did not attend on board ship. This may be explained by the fact that due to the heavy swell it is difficult and sometimes dangerous to clear the breakwater by boat. This is endorsed wholeheartedly by Officers joining the vessel. However they were well attended by the Agent ashore. It is recommended that this port is not used for reliefs unless absolutely necessary. There was no shore leave allowed by me due to this.

SALINA CRUZ: 16.10 N. 95.12 W. (See Plan)

RESTRICTIONS: *Access Channel:* Length 760 m., depth 9.7 m.

BERTHING: 3 General cargo berths with total length 1,595 ft. and depth 31 ft.

1 container berth with length 820 ft. and depth 39.4 ft. One Panamax Portico crane available.

MEDICAL: Hospital available.

TANKERS: Tankers of 250,000 d.w.t. berth at the Offshore Terminal.

Sea buoy: Lat. 16° 05′ N., Long. 95° 11′ W. Make the arrival to this location about 5 miles S.S.E. of breakwaters.

Charts: For approach H.O. No. 21441; for arrival and entry H.O. No. 21442; regular traders should have Mexican Chart SM No. 667 on board.

General: Salina Cruz is located on the West coast of Mexico, at the head of Gulf of Tehuantepec.

Note: North winds blow strongly from the Isthmus into the Salina Cruz coastal lowland, particularly during the winter. However, these Northern gales are not forecasted. The hurricane season is from June to October, the most common hurricane path is Westward, parallel to the coast, offshore.

South winds can be very strong in May and June, ships may have to leave the anchorage and the loading buoys.

The currents are unpredictable, in the Gulf of Tehuantepec and close inshore the set is either East or West.

Tanker Terminals: There are 2 tanker loading/discharging berths in the Inner Harbour, at Shed No. 4 and No. 5. There are 3 single point mooring buoys Southwestward of Salina Cruz: SPM No. 1 and No. 2 are used to load product tankers for domestic distribution up the coast. SPM No. 3 is used to export crude oils.

Communications: Standard communications procedures, through the local coast station at Salina Cruz.

Voice communications are via the Petroleos Mexicanos Marine Operations Office – Pemex Operations VHF, calling on Channel 16 or 9, the office is manned throughout 24 hours.

Caution: Internal communications within Mexico are occasionally delayed, therefore, ETA notices and other messages must be sent at the earliest possible time.

Pilotage: The Pilot boards from Pemex workboat either at the anchorage, or 1 mile South of the breakwaters, or 1 to 2 miles to the S.E. of the SPM location.

Anchorage: Tankers should anchor East of the entrance range line 346°, not closer than 0.5 miles. The holding ground is only fair. Anchorage is prohibited in the pipeline area within 0.75 miles of the SPMs and North to the coastline.

Tugs: 2 harbour tugs of about 2,400 h.p. each are kept at this port by Pemex. The tugs are used regularly to assist tankers berthing at Nos. 4 or 5 and at the SPMs. 2 workboats are available and are normally used when berthing at the SPMs. Tugs and launches are equipped with VHF.

Entering and Berthing: The short West Breakwater by the Outer Harbour Entrance was lengthened about 0.3 miles to the South; 2 new breakwaters, 0.4 to 0.2 miles long were built off the beach about 0.8 and 1.1 miles West of the Outer Harbour Entrance. Work in progress is not shown on available nautical charts.

Tankers berthing at the Inner Harbour Berth No. 4 (No. 5 used mainly by smaller ships) proceed on the leading range 346° with a tug aft. The tug should have a rope through the centerline fairlead proceed at minimum steering speed and drag the port anchor on a short scope of chain. As soon as the stern clears the entrance, the ship is turned to the E.N.E. with the assistance of the tugs, and the engine run astern to stop the ship. When the ship is stopped in the basin, she is then backed to her berth with the tugs working alongside, her bow close to the tip of the West pier. Tankers are normally moored with 5 ropes forward and 5 ropes aft. The dock fendering is of old tyres so it is imperative to berth the ship very softly.

Note: The opening between the East and West pier is 50 m., the stone and concrete tips of these piers are fendered with rotating tyre-like rubber fenders; however, precise positioning and control of the vessel, turning and stopping quickly once inside the basin is most important.

The basin is silted up along the North Quay face, sufficient depth for a tanker drawing 30 ft. may extend only 250 m. N.E. of the entrance. The basin is dredged to maintain depth and turning basin size, it is necessary to obtain up-to-date information from the Pilot, also to plan and agree on the manoeuvre, before entering.

Work in progress: (a) wharf building on the East side of other basin and on the N.E. corner of the Outer Harbour, (b) dredging at different locations, (c) construction of a new LPG berth in the N.W. side of the Outer Harbour. The Master should verify with the Pilot that works in progress do not interfere with ship's operations.

Restrictions: Entering and sailing during daylight hours only.

Hoses/Cargo: Normally gasolines, DO, FO, are loaded on tankers, through 8 in. hoses, for distribution along the coast. Isthmus crude can be loaded at No. 4 and 5 for export. Products and chemicals are occasionally received.

Note: Ships sailing from Berth No. 5 are frequently turned on the tip of the pier. This operation is undesirable; moreover it is not necessary as tugs are being used. The Master should discuss the unberthing/turning operation with the Pilot, making sure the ship will not be damaged.

Berthing at the SPMs: The 2 smaller SPMs No. 1 and No. 2 have been in use several years. Tankers in coastwise traffic only are berthed during daylight hours with the assistance of Pilot and one or two tugs and workboat. Cargo is normally gasoline, diesel oil and fuel oil.

The larger SPM No. 3 became operational in 1982, to load crude oils for export on large ships (from 100,000 to 250,00 d.w.t.) Tankers pull up 2 floating nylon hawsers (18 in. diameter and 50 m. long) with chafing chain. The use of mooring brackets is preferred, however, the ship's officer must supervise the seamen sent by Pemex to ensure the proper lead of messenger ropes and the proper use of brackets.

Note: The responsibility, for satisfactory moorings and proper use of the mooring brackets, rests completely with the ship's Master. Pemex provides a group of seamen, usually lead by a bosun and/or a young tanker's officer, to help and assist the tanker's crew in mooring, to handle equipment straps and shackles which may be shore supplied for mooring, and for the hose connections.

Combination accommodation ladder/pilot ladder should always be rigged ready when operating at the SPMs.

Hoses and Cargo: 3 floating hoses respectively of 910, 945, 980 ft. total length, carry flashing red marker lights. The connections are standard 16 in. quick coupling with valve. There is one crude oil pipeline 48 in. and 1×30 in. pipeline, length 15,000 ft. to the beach. Either crude, Isthmus or Maya, is loaded and the rate is from 40,000 bbls./hr. – 60,000 bbls./hr. Pemex expects that all large tankers shall be gas inerted and are able to load/deballast simultaneously.

Note: The 3 SPMs are fitted with flashing light and diaphone, however, reliance should not be placed on these navigation aids; this is valid for the other navaids as well, which do on occasion fail without being reported.

It is recommended to obtain from the local radio station the status of navaids, and also check the status with Pemex Operations on VHF.

SPM 1 – Flashing white, diaphone, letter R, 16° 8.5′ N., 95° 12.9 W.
SPM 2 – Flashing white, diaphone, letter M, 16° 8.5′ N., 95° 13.7 W.
SPM 3 – Flashing white, diaphone, letter U, 16° 6.9′ N., 95° 13.3 W.

The approach to Salina Cruz should not be attempted during periods of heavy rain. The breakwaters, the port area and the hills behind the port give a good radar picture at greater than 10 miles distance.

Ballast: The SPM 30 in. pipeline is designated for ballast, however, it may well be used for cargo instead. Tankers should always arrive with clean ballast only. Tankers in ballast must adhere to usual requirements; i.e., draft and trim satisfactory for safe manoeuvring, taking into consideration the ever present strong wind.

Pollution Control: The Mexican rules against pollution are strictly enforced, however, very little equipment is available locally for prevention and clean-up. No oil dispersant in stock, nor are the tugs or workboats equipped for spraying. The Master must obtain, from the Agent and the Pemex representative a copy of local regulations relating to pollution prevention, and advice as to how to handle and report pollution.

Firefighting: The town fire brigade and the Navy are able to fight fires on ships berthed in the Inner Harbour. Ships at the SPM have to rely on their equipment only, with possible minor assistance from the tugs.

Services: Bunkers available at the Inner Harbour Berths, also at SPM Nos. 1 and 2. Fresh water is piped to Berth Nos. 4 and 5, but it is recommended that drinking water be taken only in emergency. Shore leave. Crew changes, delivery of spare parts, should not be scheduled at Salina Cruz. Small amounts of provisions and stores can be obtained. Minor repairs can be arranged with workshops. Surveyor, Divers, Mexican nautical publications must be requested before arrival.

FRESH WATER: Available.

FUEL: Available.

REPAIRS: Workshops for mechanical, electronic and electrical repairs.

DRY DOCKS: Drydock for vessels up to 21,000 tons displacement (25 ft. draft) and syncro-lift for vessels up to 8,000 tons displacement. Slipway for small craft.

DEVELOPMENTS: Breakwater under construction.

SHIPMASTER'S REPORT: May 1982.
Berth: New container terminal in Outer Harbour. Length 240 m., depth alongside by sounding 8.8 m. – 12.0 m.
Pilotage: Pilot boards 1 mile South of harbour entrance.
Wharf: Concrete structure on concrete piles, protected by rubber fenders.
Chart: B.A. Chart No. 659.
Tugs: 2 tugs available.
Berthing: To prevent damage to vessel and gantry crane it should be ascertained that the gantry crane has been moved to the North end of the wharf before berthing.

SHIPMASTER'S REPORT: October 1983.
Documents:
Last Port Clearance.
12 Crew Lists.
3 Vaccination Lists.
6 Ship's Stores Lists.
6 Crew Manifest Declarations.
The local Authorities will board vessel on arrival.
Approaches: The Lighthouse of Salina Cruz and the Pemex tanks are easily seen when Bahia de Bamba is abeam to port at a distance of 7 miles.
Pilotage: Pilot will board vessel at position Lat. 16° 08.15′ N., Long. 95° 11.4′ W., if berthing on arrival.
Anchorages: A good holding anchorage at position: 1 mile E.N.E. of Buoy No. 3.
Radio: All telegrams via Mazatlan Radio/XFM or MW Salina Cruz/XFQ.
VHF: VHF Channel 9 is for Pilots/Pemex Operations. VHF Channel 13 is working channel and Channel 16 is for the Agent.
Tugs: Two tugs are used for mooring. One of 4,500 h.p. and the second of 2,600 h.p.

On completion of mooring, the second tug will make fast astern in order to hold vessel away from SBM at all times. It is wise to have engines stand-by on 10 minutes' notice in case of sudden Southern winds and to prevent any damage to the SBM.
Berthing: There are 3 SBMs (Monobuoys). No. 1 has 12 fathoms, No. 2 has 15 fathoms and No. 3 has 20 fathoms depth.
Loading: Two lines of 16 in. each which are connected with the main line of 36 in. to the shore.

Though "Pemex" (suppliers) tanks are placed high above sea level in the mountains, Pemex use 6 loading pumps with a rate of about 12,000 bbls./hr. each.

Cargo is Mexican Blend Crude Oil. API 33.5, temperature 90°F (approx.).
Ballast: There are no facilities for discharging dirty ballast to shore tanks or pits. Vessels must arrive with clean ballast.
Medical: Local Hospital and a Navy Doctor from Pemex available.
Density: 1025.
Fresh Water: Available by barge.
Fuel: Can be obtained via Pemex.
Consuls: None.
Repairs: Available for vessels up to 13,000 gross tons.
Surveyors: Lloyd's Surveyor can be reached via the local Agency.
Repatriation: Repatriation can be arranged. One must take the bus to the "Capital" of the State (2 hours' ride). Thence to Mexico City by plane.
Time: GMT minus 6 hours (Standard Time).
Shore Leave: Pemex has a launch which will serve the vessel at certain hours. Agent to be notified of vessel's requirements. No shore-pass requested.
Developments: Port of Salina Cruz is now under construction. Calculated to be completed in three years' time.
General: N.N.E. winds are standard at Salina Cruz, rising up to 40 knots in Summer. Other seasons up to Force 5-6 (Beaufort).

Fresh provisions available at a very fair price.

The language is Castellanos (Spanish). Only "Pemex" representatives speak reasonable English.

REPORT: April 1985.
Tankers: 3 SBMs located in position Lat. 16° 06′ 54.5″ N., Long. 95° 13′ 15.7″ W. about 5 km. S.W. of Salina Cruz Inner Harbour Entrance. Max. depth at single point type mooring is 98 ft. Max. allowed d.w.t. 250,000. Maximum/minimum LOA allowed 338 m. – 320 m. No shore ballast facilities so vessel must have clean/segregated ballast. Manifold to be fitted with 16 in. (150 p.s.i.) reducers. Port side derrick/boom to have 15 tons capacity. Bow fairlead to have minimum diameter of 18 in. distance bow fairlead to forward bollard to be between 2.7 m. – 8.0 m. Average pumping rate 60,000 – 70,000 bbls./p.h.
Note: Buoy Nos. 1 and 2 are for handling domestic traffic (gasoline, diesel oil, heavy oil, etc.) up to 60,000 d.w.t.

AUTHORITY: Delegacion Coordinadora, Av. Tampico No. 39-B Altos. *Tel:* 4-04-36, 4-04-46.

Empresa de Servicios Portuarios, Recinto Portuario. *Tel:* 4-01-01 and 4-00-44.

Comision Nacional Coordinadora de Puertos, Cuernavaca No. 5, Mexico, 11 D.F. *Tel:* 553-87-11.

SAN CARLOS: 24.47 N. 112.08 W. (See Plan)

PORT LIMITS: The limit of the port is up to parallel 24° 39′ 41.5″ N. which passes through the position of the East Buoy of the channel entrance on Mexican Chart F.H.614.
DOCUMENTS:
Port Captaincy:
Clearance from Last Port.
Crew List.
List of Passengers.
Voyage memorandum including dates and ports visited during the previous 3 months.
Port Operations:
Stowage Plan.
Certificate of cargo handling equipment on board.
List of peculiarities of the vessel.
Health:
List of Vaccination Certificates of the crew.
List of Vaccination Certificates of passengers for the port.
Derat or Exemption Certificate.
Immigration:
Visaed Crew List.
List of Passengers for the port, also visaed.
Maritime Customs: Vessels without cargo, and arriving from abroad:
Declaration of arrival in Ballast.
Vessels coming from abroad with cargo for the port:
General Manifest for the port.
List of Passengers for the port.
List of Explosives, Corrosives, Flammables for the port, visaed.
Vessels coming from a Mexican port to load:
Customs Clearance.
Vessels coming from a Mexican port to unload:
Customs Clearance.
Cargo Manifest, visaed.
List of Passengers for the port.
List of Explosives, Corrosives, Flammables for the port.
Inspection of Animal Health:
List of Meats (tinned or fresh or refrigerated or in deep freeze).
Vessels bringing animals to the port:
Veterinary Health Certificate.
Transport Permit.
List of Meats (See above).
Inspection of Vegetable Health:
When products are not brought for discharge:
Derat Certificate or Exemption.
When products brought for discharge:
Derat Certificate or Exemption.
Vegetable Health Certificate.
Importation Permit from the Secretariat of Agriculture and Cattle Breeding of Mexico.
PILOTAGE: The Port Captaincy has VHF Channel 16 for receiving ETAs. The Pilot comes on board vessels by motor launch from San Carlos within Magdalena Bay.

There is a Landfall Buoy in position Lat. 24° 38.6′ N., Long. 112° 05.4′ W., one mile from the entrance to the buoyed channel.
ANCHORAGES: Any location between meridians 112° 05.0′ W. and 112° 03′ W. and parallels 24° 38.5′ N. and 24° 37.5′ N. Depths approximately 105 ft., sandy bottom.
RESTRICTIONS: With 26 ft. draft, vessels may navigate the Channel between Buoys "9" and "10" to "11" and "12". With a tidal rise of 4 ft., vessels enter and leave with a draft of 30 ft. at high tide.
MAX. SIZE: LOA 600 ft., beam 100 ft. and draft 30 ft.
HEALTH: When coming from abroad, hoist the yellow flag. Inspection is effected when the vessel is berthed or at the Inner Anchorage. If the vessel is coming from another Mexican port, the Health Authority's visit is not necessary.
RADIO: La Paz Coastal Radio: Call sign "XFK".
VHF: Port Captaincy on VHF Channel 16, operates between 0800 hrs. and 1800 hrs.
RADAR: This service does not exist.
TUGS: None available.
BERTHING: The "L" shaped quay is made of concrete and has 102 m. of berthing length. There are two "Dukes of Alba" making up a length with the quay for berthing of 204 m. Also there are 2 mooring buoys, one at each end of the berth. The minimum depth at LW is 37 ft. in the berthing area. Loading and discharging is effected using the vessel's own gear. It is possible to work in 2 or 4 gangs, according to the type of vessel and cargo.
CRANES: None.
BULK CARGO FACILITIES: On the quay there are installations of "CONASUPO" with a tower for shipment of grain, located in the angle of the "L". The grain generally shipped is wheat at the rate of 200 t.p.h. The height of the end of the grain output tube above sea level at full tide is 12 m.
SPECIALISED CARGO HANDLING FACILITIES: Vessels berth at the same quay as above with ammonia, unloading by means of installations located in the angle of the "L". These installations are owned by Fertimex.
BRIDGES: None.
STEVEDORES: Vessel's Agent submits a request 24 hours in advance for stevedoring services through the delegate of Puertos Mexicanos. Four products are mainly handled in the port: Cotton at a rate of 90 bales per gang/hr. Bulk wheat at a rate of 200 t.p.h.; bagged at the rate of 25 t.p.h.; Fertilisers in bags at a rate of 25 t.p.h.; and fish (tuna) at an average of 25 t.p.h. Since the mechanical equipment on shore is sufficient for 2 gangs in the case of cotton, stevedores are requested for this number of gangs. As far as wheat is concerned, the loading rate drops to 80 t.p.h. when the warehouse has little wheat in it.

Stevedores work from 0800 hrs. to 0200 hrs. of the following day i.e. they work 18 hours in 24 hours.

MEDICAL: There is a civil hospital in Ciudad Constitucion 45 minutes away from San Carlos. There is a telephone service available for calling ambulances. There are 6 doctors in the port.
TANKERS: There is a concrete quay with length 280 m. and depth 35 ft., owned by the Federal Commission of Electricity.
DENSITY: 1023.
FRESH WATER: This is supplied when the vessel is berthed. There are various 2 in. hydrants. The rate of supply is 10 t.p.h., and the approximate cost is 13,000 Mexican Pesos per ton.
FUEL: Moderate quantities of diesel oil can be supplied, and it is brought by road tanker from La Paz, the vehicles themselves pumping supplies to the vessel.
CONSULS: There are no consuls in the port.
REPAIRS: There are workshops at Ciudad Constitucion 45 minutes away by road.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: This service does not exist.
HATCHES: Hatches are opened and closed by the stevedores.
SURVEYORS: None.
CUSTOMS ALLOWANCES: Tobacco, wine and spirits are placed under seal.
CARGO GEAR: For loading and discharge, ships' gear is used. There are no cranes in the port.
REPATRIATION: There are Immigration Authorities in the port. There are 3 hotels in the city and several in Ciudad Constitucion and in La Paz. La Paz, is the capital of the State of Southern Lower California, and is approx. 3 hours away by road.
AIRPORT: None in the port. Airport at La Paz where there is an international airport called General Marquez de Leon.
TIME: GMT minus 7 hours. There are no seasonal time changes.
HOLIDAYS: 1st January, 5th February, 21st March, 1st May, 16th September, 20th November, 25th December, and 1st December (every 6 years). These dates are all obligatory.
POLICE/AMBULANCE/FIRE: In the port there are Municipal and Prison Police (Tel: 25) and ambulance. Fire fighting services come from Ciudad Constitucion.
TELEPHONES: No service for installing phones on board vessels, but in the port there is a telephone service for communications with any part of the world.
SERVICES: None available.
SHORE LEAVE: No restrictions.
IDENTIFICATION: Seaman's Book is sufficient.
REGULATIONS: No naked lights when there is cotton in the port or ammonia is being discharged.
DELAYS: As there is only one berth, there are times when the berth is occupied, but this does not occur often. Berthing is done in shifts.
GENERAL: *Post Office:* There is a Post Office in San Carlos.
Telegraph Office: There is a telegraph office but the service is not for maritime traffic. For such purpose, vessels must send their ETA via La Paz Coastal Radio Station.
DEVELOPMENTS: At the moment, there is no programme.

SHIPMASTER'S REPORT: 1976.
Documents:
Visaed Crew List by Mexican Consul and 9 copies.
Visaed Cargo Manifest from each loading port and 4 copies.
Derat Exemption Certificate.
Passport or Seamen's Book for all on board.
Clearance from last port of call.
Approaches: A very strong current was experienced running from S.E.-N.W. when entering Bahia Magdalena at Pta. Redondo. Caution should be exercised making this approach, because currents can be strong and unpredictable in this area.
Pilotage: Compulsory. Pilot boards at Lat. 24° 39′ N., Long. 112° 05′ W. from small boat with outboard engine.
Anchorage is also good in this position should it be necessary to await Pilot or berth. The 2 buoys marking the entrance make good radar targets and are distinctive.
Restrictions: Channel must be navigated at suitable time of tide giving careful consideration to vessel's draft, in order to clear numerous shallow patches. Max. draft to date of vessel navigating channel was 30 ft. 4 in. on top of high water.
Radio: La Paz Radio (XFK) 500 kHz and 441 kHz. Working hours appear to be uncertain, but there is a working arrangement with Agent to transmit messages free of charge.
Charts: Chart used to navigate channel was Mexican No. FH. 614. Masters are strongly advised to obtain this chart.
Berthing: One pier 420 ft. long.
Fresh Water: Available at pier at 10 t.p.h.
Communications: Very poor. No telex, no telephone and no cable service. Telephone available at Villa Constitucion 57 km. away by paved highway. Plans are in force to introduce a telephone service in the fairly near future.
Consul: If consular advice is required it is best to contact the British Embassy in Mexico City. Tel: 5 11 48 80.
Laundry Service: None.
Ship Chandler: None. A pick-up wagon can be supplied by Agent to obtain essential stores from supermarket at Villa Constitucion.

AUTHORITY: Capitania de Puerto de San Carlos, Apartado Postal No. 5, Puerto San Carlos, B.C.S., Mexico. *Contact:* Captain Felix Armas Ortiz, Port Captain.

SAN JUAN DE LA COSTA: 24.24 N. 110.40 W.
(See Plan)

SHIPMASTER'S REPORT: April 1985.

LOCATION: 4.1 miles South of Pta. Coyote in position: Lat. 24° 23.5′ N., Long. 110° 40.4′ W.
PILOTAGE: Compulsory. Pilot boards 1 mile to 2 miles East of berth.
ANCHORAGE: Vessels have to wait at anchor if wind exceeds Force 2 on the Beaufort Scale. Berthing only carried out in calm weather.
TUGS: Not available.
BERTHING: Open berth exposed to Easterly winds. Depth alongside 32 ft. Vessels berth port side alongside only.
There are 2 mooring buoys located about 140 m. from each end of the berth to the seaward side, used to make fast 2 slack ropes (1 forward and 1 aft) in order to assist vessel to sail, sailing mostly without Pilot.
Approach to berth is free of dangers.
On average 3 vessels a month load at the berth.
LOADING: Fixed loading installation (conveyor belt) with loading capability of about 600 – 700 t.p.h. Cargo loaded was rocky phosphate in bulk.
Vessel has to shift for loading each hold. During shifting special care should be taken as shifting is considered extremely dangerous, especially for loading extreme holds on account of short length of berth (for vessels above 180 m. in length) in combination with the prevailing winds.
FRESH WATER: Not available.
REPATRIATION: Can be arranged from the nearest port (La Paz).
GENERAL: *Provisions:* Fresh provisions not available.

TAMPICO (Including Altamira): 22.16 N. 97.47 W.
(See Plan)

PORT LIMITS: Vessels in Mexican ports are considered to be arrived vessels as soon as permission to moor has been granted by the Port Authorities.
DOCUMENTS:
7 simple copies of Crew List.
5 simple copies of Cargo Manifest.
1 Visaed Passenger List or visaed Statement to the effect of no passengers, and 5 simple copies.
7 copies of Stores List.
7 copies of Personal Effects List.
Derat Exemption Certificate.
Passports or Seaman's Books of all crew.
Clearance from Last Port of Call.
3 copies of lists of packages containing explosives, flammable or corrosive materials.
PILOTAGE: Pilot ordered by Agent who requires 24 hours' notice of vessel's arrival. Pilots board vessels 2 miles off the breakwater. Vessels may anchor about 2 miles off the breakwater waiting for Pilot. Pilots on VHF Channel 16.
ANCHORAGES: About 2 miles East of breakwater in 40-60 fathoms of water.
RESTRICTIONS: There are no restrictions for movements at night. The drafts of the vessels will be governed by the mooring zones in which they are working.
The depths at these berths are as follows:

*Free Zone Quay	30 ft.
Minera Autlan Quay	32 ft.
Petroleos Mexicanos Quay	32 ft.
Mexican Gypsum Quay	28 ft.
Metals and Minerals Quay	30 ft.
Anahuac Cement Quay	28 ft.

The navigation channel to the Mexican Petroleum Maritime Terminal has a depth of 38 ft. and that to the Free Zone 33 ft.
*This depth is subject to constant dredger maintenance, the draft being reported weekly to the Ship Agents.
MAX. SIZE: The max. length is 656 ft. There are no restrictions for beam. The drafts will be those admissible in the corresponding berth used.
HEALTH: No Radio Pratique. Pratique granted after docking and presentation of documents to Port Authorities. In case of disease or fever on board, Master to give notice to Agent before arrival.
RADIO/VHF: Tampico has a coastal station with frequency 2182 kHz., as have the Port Captain, the Pilots' Office and Puertos Mexicanos Office. All have the same frequency and VHF Channel 16.
TUGS: 3 tugs are available, intended solely for port manoeuvres, comprising "SPTA-1" 4,352 h.p.; "SPTA-2" 3,200 h.p. and "SPTA-3" 4,352 h.p. Also Petroleos Mexicanos have tugs whose power varies between 4,200 h.p. and 5,600 h.p.
BERTHING:
1 berth at the Minera Autlan Quay where manganese is moved by moving belt at the rate of 1,200 t.p.h.
5 berths at the Pemex Quay, where oil and its derivates are moved at the rate of 600-800 t.p.h., by means of 4 in., 6 in., 8 in. and 10 in. pipes. Petroquimicos also have a quay.
1 berth at the Mexican Gypsum Quay where calcium sulphate is moved by moving belt at the rate of 500 t.p.h.
2 berths at the Metals and Minerals Quay, where bulk minerals are moved by 4 moving belts at the rate of 125 t.p.h. per belt.
2 berths at the Anahuac Cement Quay, where bulk cement is moved by means of 10 in. pipes at one berth and by 2×16 in. ducts at another berth at a rate of 250 t.p.h. per pipe.
9 berths at the Tampico Free Zone, where general cargo is moved at the rate of 20 t.p.h. per gang.

Berth	Length	Berth	Length
1	215 m.	5	145 m.
2	145 m.	6	145 m.
3	145 m.	7	180 m.
4	145 m.	8	185 m.
		9	185 m.

Depth alongside 10.5 m. Official fresh water draft 9.14 m.

All quays have lighting for night operation and telephone facilities.

Altamira: Approximate position: Lat. 22° 29′ 32″ N., Long. 97° 51′ 45″ W. It has 3 berths with a total length of 750 m. (Tepeal – 2 berths, Negromex – 1 berth and Tom – 1 berth, all for tankers) and depth up to 13 m. The navigation channel has a depth of 12.0 m. The port also has areas for storage and facilities for containers and Roll-on/Roll-off.

Pilot compulsory. Pilot boards 2 miles off the entrance.

Fresh water and fuel available from Tampico.

A dock side container crane of 30.5 tons is in operation and 6 yard cranes are available, other miscellaneous equipment is available.

CRANES: Heavy lift crane, capacity 150 tons.

STEVEDORES: No ETA advice necessary if Stowage Plans received in advance by Agent, otherwise ETA advice for gangs appreciated 48 hours prior to arrival. Stevedores' general cargo discharging and loading rate about 20 t.p.h. per gang. Mineral loading at Metals Pier about 125 t.p.h. per belt (2 conveyor belts available to service both berths).

MEDICAL: Hospital facilities available. No advance notice required.

TANKERS: See "Berthing". Dirty ballast is received ashore.

DENSITY: Average 1006.

FRESH WATER: Available on written request from ship's Agent. Drinking water delivered by pump at the rate of 12 cu.m. per hour.

FUEL: The port has a barge with a capacity of 22,000 bbls. which is able to service vessels while they are loading and unloading cargo. Another fuel terminal is presently under construction and will be in operation in 1991. The Terminal Maritime Madero is available in the Petroleos Mexicanos Quay.

CONSULS: Brazil, Denmark, Finland, Germany, Honduras, Italy, Lebanon, Norway, Spain, Sweden, U.K. and U.S.A.

REPAIRS: Hull repairs can be effected, as can work on steering system, machinery, marine auxiliaries and other equipment of less importance.

There are specialist workshops attached to the dock.

DRY DOCKS: Length 250 m., depth 9.5 m., width 37 m. Max. size 55,000 d.w.t. Only for tankers owned by Pemex.

GANGWAY/DECK WATCHMEN: No watchmen necessary. Customs guard keeps watch at gangway while vessel alongside.

CUSTOMS ALLOWANCES: No allowances to be taken ashore, but reasonable amounts of tobacco and spirits are allowed to be taken out of bond, but to be kept on board for use of crew and passengers only.

REPATRIATION: In the port there is an office of the Administrative Secretariat, where the repatriation of any crew member can be negotiated. This negotiation will be for the account of the ship's Agent, who is required to deposit a bond of Mexican $23,000 per person in case of certain nationalities.

AIRPORT: At a distance of 10 km. from the port. There are regular flights to Monterrey and Mexico City with connections in any direction.

TIME: GMT minus 6 hours.

HOLIDAYS: January 1st; February 5th; March 21st; May 1st; September 16th; November 20th; December 25th; December 1st (every 6 years).

FIRE/AMBULANCE/POLICE: Fire Department Tel. 2-12-22; Red Cross Tel. 2-13-33; Police Tel. 2-11-57 and 12-10-32.

DEVELOPMENTS: Constant programming for more space at wharves, sheds, warehouses, continuous dredging and increasing capacity of operational equipment.

SHIPMASTER'S REPORT: September 1980.

Pilotage & Radio: 2182 kHz does not appear to be in use but 500 kHz and VHF are the popular mode, most Agencies having the latter.

Restrictions:

Minera Autlan Quay for manganese loading: 33 ft.

Muelles des Minerals (Metals & Minerals Quay): 30 ft.

Max. Size: All vessels in river berths moored starboard side to, head up, and if at Muelles des Minerals and over 500 ft. length, the vessel will have to drop down river stern first before turning aided by tugs.

Berthing: Muelles des Minerals: This open apron berth adjacent to the railway sidings at Colonia del Golfo is situated before the sharp bend leading to the main wharfage at Tampico and the bulk cement wharf by the entrance to the Canal Cortadura.

The method of loading is to wheel portable belts adjacent to the hatch in conjunction with another belt lifted aboard and a chute that is suspended from the vessel's gear and braced for direction by guys.

The mineral is dumped into the hopper at the lower end by bulldozer and it will depend upon the situation of the pile as to the speed that can be obtained. Thus if the cargo is in railway gondolas it will be grabbed out by rail cranes into trucks for transport to the apron where a pile is created for the bulldozers, a method which has several areas of slow working or waiting time.

Ideally the cargo has been stockpiled on the rear side of the quay from which it can be lifted directly by the bulldozers for dropping into the belt hoppers. It is this system that can achieve a good rate.

Fresh Water: Observed delivered by road tanker.

AUTHORITY: Puertos Mexicanos Delegacion Tampico-Altamira, Edificio Puertos Mexicanos, 1er. Piso Recinto Fiscal Autorizado, C.P. 89000, Tampico, Tam., Mexico. *Tel:* 12-45-50, 12-45-61, 12-78-71. *FAX:* 12-57-44. *Telex:* 14887 Cpdtme.

Puertos Mexicanos, Av. Municipio Libre No. 377, Col. Santa Cruz Atoyac, C.P. 03310 Mexico, D.F. *Tel:* 688-22-66, 688-77-56. *FAX:* 688-38-95.

TOPOLOBAMPO (Punta Mapam): 25.36 N. 109.03 W. (See Plan)

SHIPMASTER'S REPORT: January 1986 (Updated 1988).

PORT LIMITS: Precise limits could not be established, however any reasonable distance from the Fairway Buoy is acceptable. See anchorage positions below.

DOCUMENTS:

3 copies Crew Lists.
3 copies Crew Personal Declaration.
3 copies Bonded/Slop Chest Stores List.
3 copies Steward's Stores List.
3 copies Vaccination List.

Manifests not always necessary for Pemex purposes.

Bills of Lading, necessary, these included with Clearance from last port and from loading port. Clearance very important.

Ship's certificates, not asked for, except ship must have licence to trade coastwise, issued by the Mexican Authorities.

PILOTAGE: Compulsory. Daylight only. Pilot on VHF Channel 16. Pilot boat is a small yellow dinghy with an outboard motor. In rough weather Pilot boards from tug 'Pemex 45' or 'Lobo'.

Pilot boards in vicinity of Fairway Buoy.

ANCHORAGE: Not defined, but in vicinity of Fairway Buoy. A good anchorage has been found in position 25° 29.3′ N., 109° 10.8′ W. in 17.6 m. of water, with the Fairway Buoy bearing 032° by 0.87 miles. On another occasion vessel anchored in position 25° 28.99′ N., 109° 12.05′ W., with Fairway Buoy bearing 057° by 1.75 miles. Positions by Satellite Navigator.

RESTRICTIONS: See "Max. Size".

MAX. SIZE: Maximum draft for crossing the bar is 31 ft. (SW).

In March 1988 the main channel entrance will be in operation with a new configuration (width 200 m. and depth 31 ft.) with no restrictions for entry. The new channel will be aligned 051° (T) with leading line towers on the shore. The front tower on Baviri Hill is 35 m. high and the rear tower on Panal Hill is 74 m. high. Both towers are white skeleton towers.

There is a new Sea Buoy located in position Lat. 25° 31.2′ N., Long. 109° 12′ W. The channel is marked with lighted buoys.

RADIO: In our case Charterer's private radio station was used. For commercial purposes Guaymas Radio is probably best.

VHF: Pilot on VHF Channel 16.

TUGS: 2 tugs available, 2,500 – 2,800 h.p.

BERTHING: One berth of length 790 ft. and 39.4 ft. depth, for handling containers (15 units per hour).

One berth of length 328 ft. and 32.8 ft. depth, for general cargo.

TANKERS: Pemex Berth at Punta Mapam:

The berth is located 0.5 miles East of the derelict Pemex Berth in Topolobampo. The jetty is approximately 250 m. in length and aligned 087° – 267° with a depth of 14.0 m. on the South side.

Berthing at the Pemex Jetty:

North Berth: Port side to, head out to sea. Starboard anchor is let go off the berth.

South Berth: Port side to, Head in.

Unberthing from Pemex Jetty:

North Berth: Starboard anchor used to assist moving vessel off berth. HW not necessary but consider depths over the bar.

South Berth: Best just before HW when flood used to advantage to help move vessel off berth.

Currents at the Berth: Tidal stream currents set heavily across the berth so that on the flood, a vessel on the North Berth is pushed towards the berth and a vessel on the South Berth is pushed off the berth. When the tide is ebbing a vessel on the North Berth is pushed off and a vessel on the South Berth is pushed on to the berth.

Cargo Handling: Chicksan type cargo arms with 10 in. diameter for diesel oil and gasoline, sizes for other grades not checked but thought to be the same. In the case of our vessel (LOA 170 m.) the diesel arm was aligned with the manifold, but the gasoline arm was too far off forward of the manifold on the South Berth (and too far aft on the North Berth) and therefore a length of flexible 8 in. hose was used between the manifold and the cargo arm. Shore tanks were said to be 2 km. away and 42 m. above sea level.

FRESH WATER: Available, using international shore connection and ship's hoses from fire tower on jetty. Sailing directions recommend boiling before use.

SURVEYOR: Can be arranged through Lloyd's in Mexico City.

CUSTOMS ALLOWANCES: Usual allowances for Mexico.

REPATRIATION: Possible via Los Mochis, 12 miles inland.

AIRPORT: At Los Mochis, 12 miles away. Los Mochis can be reached by bus or taxi.

TIME: GMT minus 7 hours throughout the year.

SHORE LEAVE: No restrictions, identification cards not necessary.

DELAYS: Departure from tanker berth dependant upon state of tide and in daylight only. Other berths unknown.

SHIP'S OFFICERS REPORT: Small scale B.A. Chart No. 2323 used for approach. Large scale B.A. chart for Topolobampo not available, therefore Mexican Chart S.M. 337 used.

When approaching from the vicinity of Cabo Corrientes, the best course has been found to be 327° to approximate position 25° 18.3′ N., 109° 18.0′ W. when Farallon de San Ignacio will be dead ahead by 10 miles. Course is then altered to 030° for 13 miles for the Fairway Buoy. On this course the Fairway Buoy should be in line with an identifiable hill (see "Plan"). The Fairway Buoy has been fixed using Satellite Navigator derived positions at anchor and visual bearings together with radar ranges and found to be in 25° 29.93′ N., 109° 10.44′ W.

In rough or rainy weather the buoy may be difficult to see. With radar the channel buoys present slightly better echoes and may be recognised by comparison with the channel shape from the chart.

GENERAL: *Agent:* Agencia de Buques Zamorano, Domicilio Conocido, Topolobampo, Sinaloa. Tel: 2-00-11.
Storing: Limited facilities.

AUTHORITY: Capitania de Puerto, Apartado Postal No. 10, 81370 Topolobampo, Ahome, Sinaloa, Mexico. *Tel:* 91-686, 2-01-28. *Contact:* Captain Ricardo Flores Bravo, Port Captain.

TUXPAN: 20.57 N. 97.24 W. (See Plan)

SHIPMASTER'S REPORT: January 1982.

LOCATION: Tuxpan is situated on the North bank of the Rio Tuxpan. On the opposite side (the South bank) is situated part of Tuxpan called Santiago de la Pena.

The entrance of the Rio Tuxpan is situated at Lat. 20° 58.2′ N., Long. 97° 18.1′ W. Breakwaters on both sides of the river mouth. Approximately 100 m. and 120 m. seaward of the mole heads is a bar with quick changing depth over it. The bottom of the bar is sand, covered with a thin layer of mud. After a strong North wind the depth on the bar is one foot less than the day before. The permissible entering draft is 18 ft. – 20 ft. at HW and calm sea with nearly no swell. Occasionally vessels with 21 ft. draft can enter. Normally there is a low swell from the East all the year. After a strong North wind (Norte) you can expect a Northerly swell of 2 ft. – 4 ft. for 1 to 2 days. A dredger is working in the river entrance most of the time.

PORT LIMITS: One mile off all port installations and structures, including SBM and breakwaters.

DOCUMENTS:

1 original and 4 copies B/L's of all Tuxpan cargo.
12 Cargo Manifests.
1 Health Declaration.
8 Crew Lists.
8 Passenger Lists (even when none/nil – lists).
4 Stores Lists.
2 Personal Effects Lists.
(No special forms required/IMO-Forms are sufficient).

Documents which have to be shown to Port Authorities:
Tonnage Certificate.
Ship's Register.
Derat Certificate.
Seaman's Books or Passports.

PILOTAGE: Pilotage is compulsory. Pilot boards vessel approximately 2 miles to 2.5 miles East of entrance. Pilot boat: A white 20 ft. boat with white cabin and blue/white deck.

Equipped with VHF Channel 16. Pilot Office open from sunrise to sunset and listening on VHF Channel 16. Call: "Tuxpan Pilot".

The Pilot has to be ordered by Agent 24 hours in advance.

ANCHORAGES: East of breakwaters from 2 miles – 4 miles on a breadth of 1 mile North and 1 mile South of this line.

Caution: Many submerged gas and oil-pipes in the vicinity of entrance to Rio Tuxpan.

Best anchorage: North mole head bearing 270° (T) and 2.8 miles off. Ground: Muddy sand, good holding.

RESTRICTIONS: Entering port and river only in daytime. Departing vessels have to pass the bar at river entrance before sunset.

MAX. SIZE: Length of ships handled is 190 m., always in accordance with the draft.

HEALTH: There is a hospital at Tuxpan. Surgeons and Dentists are available. No vaccinations can be done.

Meat and vegetable rooms are sealed and opened once a day to take provisions. Garbage has to be kept on board in watertight and covered containers.

RADIO: No radio station at Tuxpan. Closest Tampico or Vera Cruz. Good communication between Tuxpan and these radio stations.

There is no repair of radars, VHF or other electric and electronic equipment possible. If required, technicians and spare parts have to be ordered from Tampico.

VHF:

Port Authorities	Channel 16
Pilot	Channel 16
Pemex	Channel 16
Tecomar (Agency)	Channel 68

RIVER: Ground: Mud. Density of water: Approximately 1005.

The current in the river is nearly always outwards and is from 0.5 knots in the dry season up to 6.5 knots in rainy season.

At Tuxpan there is a stationary bridge, which can only be passed by very small ships.

TUGS: 2 privately owned tugs are available. One of 500 h.p. and one of 600 h.p. Tugs to be ordered by Agent in advance. The tugs are very helpful when turning in the river.

BERTHING: (Places for dry cargoes):

	Length (m.)	Depth Alongside (ft.)
Muelle Fiscal		
(Extension under construction)	152	23
Grain Dock	70	22
Ro/Ro Berth	—	18
Berth for the Dredger (North bank)	60	18
Berth for Fishing Boats	80	15

CARGO HANDLING FACILITIES: No shore cranes, no forklifts, 2 small mobile cranes of unknown capacity; 2 special mobile cranes on container yard (these 2 cranes cannot be rented).

Four mobile grain elevators.

Several oil companies have own small berthing places and handle their cargoes themselves.

STEVEDORES: Agent has to order gangs from Port Operations 24 hours in advance. Approximately 120 men available.

Working Hours: 0800 – 1600 hrs. = 1st shift
1600 – 2400 hrs. = 2nd shift
0000 – 0800 hrs. = 3rd shift

Saturday and Sunday also, but all at overtime rates.

TANKERS: Tankers up to 6,000 tons gross can be taken inside the river to the oil companies' small jetties.

Offshore there are 2 SBMs in position:
No. 2 = Lat. 21° 02.58′ N., Long. 97° 17.43′ W. and
No. 1 = 135° – 1.9 miles from No. 2 SBM.

Tankers with 55 ft. draft acceptable. These SBMs are mainly used by Pemex. 2 additional buoys are to be installed.

FRESH WATER: No potable water available. Small quantities of wash-water can be delivered by trucks.

FUEL: Small quantities of clean diesel oil can be delivered by trucks. No marine diesel oil or heavy fuel oil available.

DRY DOCKS: None.

SHIPYARD: For fishing boats, some slipways available.

REPAIRS: Minor repairs can be done by the fishing boat shipyards.

REPATRIATION: Repatriation is possible via Tajin Airport to Mexico City. Tajin Airport is approximately 30 miles from Tuxpan and can be reached by a good road.

At Tuxpan on the left (North) riverbank is a small Airport (Fausto Vega Santander) only for VFR flights. Runway 1,600 m. No commercial flights.

HOLIDAYS: 1st January, 1st May, 5th May, 16th September, 25th December.

TIME: GMT minus 6 hours throughout the year.

TELEPHONE: No telephone connections at the piers.

Useful telephone numbers: Police, 40252; Port Captain, 40020; Pilot Office, 40043; Custom's Office, 40055.

Office Hours: Monday – Friday 0800 – 1500 hrs.

Some offices are also open on Saturday from 0800 – 1300 hrs.

SHORE LEAVE: Allowed without restrictions. No special identification cards required.

PROVISIONS: No ship chandlers at Tuxpan. Small quantities of vegetables and fish can be bought at the local market. For this Agent obtains a permission from Customs Office.

If necessary ship's stores can be ordered within 24 hours from Tampico.

SHIPMASTER'S REPORT: July 1990.

Intensive dredging is under way. The offshore bar near the entrance can now be passed, on leading lights line 238° with 26 ft. 06 in. at all tides (dredged to 9.5 m.).

Pilotage available day and night.

The breakwaters are being lengthened.

3 miles up-river on the South bank of Rio Tuxpan, a well operated Container Terminal can accommodate 2 vessels at a time, each 160 m. in length. Berthing is port side to, or after turning (which is advisable) starboard side to head seawards.

In good weather conditions, no use of anchor required.

One tug and one mooring boat available. Sufficient fenders are in place.

Container handling: With ship's gear only for ship-to-shore, then handled with special hydraulic mobile lifters (40 ft./20 ft. containers) on to trucks, or direct to stacking area.

Stevedores available 24 hours.

VERA CRUZ: 19.12 N. 96.08 W. (See Plan)

PORT LIMITS: Area bounded by the reef lighthouses outside the breakwater.

DOCUMENTS: See "Coatzacoalcos".

PILOTAGE: Compulsory, advise Agent 24 hours before arrival giving name, flag, ETA and draft.

The Port Captain is to be given a minimum of 2 hours' notice by the Agent. This to be done between 0800 – 1800 hrs. (Pilot office hours). Orders for Pilots between 1800 – 0800 hrs. to be made between 0800 – 1800 hrs.

The Pilot normally boards 3 miles N.E. of harbour entrance, but if his services are requested outside such limits the Pilot will proceed to the location, i.e. the anchorage.

The pilot launch leaves from a "T" shaped pier when expected vessel is sighted. The launch has a black hull with white superstructure and false funnel painted black.

ANCHORAGES: In good weather, vessels may anchor in the outer area off the port, in the case of bad weather, to the South of the Isle of Sacrifices (Isla de Sacrificios). If the vessel prefers to anchor within the port limits, it must request the services of the Pilot and on anchoring for its own account within this sector must pay the fees due to the pilotage service.

RESTRICTIONS: In normal weather conditions there are no restrictions on entry and departure, the sole consideration being the draft of the vessel, since if this exceeds 29 ft. the time of the tide must be taken into consideration, and also after a strong North wind, a vessel drawing more than 24 ft. must wait for the tide. Depth in access channel 10 m. – 12 m.

MAX. SIZE: Length 200 m., at Berth Nos. 4 and 6 or the oil terminal.

HEALTH: The International Health Office gives a 24-hour service for the arrival and departure of vessels. To obtain Free Pratique on arrival of vessels there is a medical inspection, with submission of the Maritime Health Declaration, signed by the Master, and examination of documents of Derat Certificate, certificates of vaccination of the crew and passengers; cholera, yellow fever, (dependent upon the location from which the ship has come); examination of crew members or passengers who might be declared as suffering from contagious illnesses. With these formalities fulfilled, Free Pratique is granted. Free Pratique can be granted by radio, provided it is considered that the vessel's arrival will not give rise to the introduction or propagation of illnesses covered by the regulations, and that also the following requirements are fulfilled:

1. Exercise of greater epidemiological vigilance in respect of illnesses covered by International Health Regulations.

2. The Master's radiogram must be presented to the International Health Delegation 8 hours in advance and must invariably fulfil all the stipulations as set out in the attached form.

3. Without prejudice to the foregoing, the Health Doctor or whomsoever he may designate, and where it is considered appropriate, shall go on board for the purpose of receiving the Maritime Health Declaration so that enquiries and verifications as may be considered necessary may be carried out.

Once the vessel has called at a national port, in subsequent national ports the requirements for obtaining Free Pratique will not be required, provided there does not exist on board any alteration in the health conditions as established in the Maritime Health Declaration.

Medical service to crew members and passengers on board foreign flag vessels is provided by doctors and private hospital institutions, through the intermediary of the consignee ship's Agent.

For possible handling of disease covered by the Health Regulations (cholera, yellow fever, bubonic plague), there are isolation wards in the Official Hospitals "Aquiles Serdan" and "Regional de Veracruz".

The Office of International Health has immunisation services required for the diseases covered by the Regulation, which are certified on special international forms, with any cost, to crew members and passengers.

RADIO: Radio station Vera Cruz Radio, call sign XFU. Transmits on 420 and 451 kHz and listens on 425, 454, 463 and 480 kHz. Also VHF Channels 12, 16, 26 and 27.

VHF: Pilot on Channels 16, 12 and 20 throughout 24 hours.

TUGS: 4 tugs available, 3×1,300 h.p. and 1×2,250 h.p.; tugs' lines used at no extra charge. Tugs join vessels inside breakwater.

BERTHING:

Berth	*Capacity*	*Length (m.)*	*Depth (m.)*
No. 1	2 vessels	384.50	10
No. 2	2 vessels	431.00	9 – 10
No. 4	5 vessels	795.20	9 – 10
No. 6	5 vessels	725.00	9 – 11
No. 7	5 vessels	548.00	6 – 8
Marginal (Minerals)	–	407	10
Grain Quay	1 vessel	250.00	9 to 10
Container Quay	1 vessel	170.00	10
Pemex	2 vessels	958.00	10

BULK HANDLING FACILITIES: Handling of grain at a mechanised plant, with storage capacity of 25,000 tons and an average discharge rate of 250 t.p.h. and loading rate of 400 t.p.h.

Handling of bulk sugar by mechanised installations, with storage capacity of 40,000 tons and an average loading rate of 800 t.p.h.

Handling of aluminium, coal brickettes, cement, latex, crystallised honey, chemical products, vegetable oils and crude oil.

STEVEDORES: *Handling rates:* General cargo, 12 tons/per hook hour. Bulk cargo, 30 tons/per hook hour.

MEDICAL: Doctors, dentists and hospital facilities available (see "Health").

TANKERS: Petroleos Mexicanos berth located in Northern part of port. Max. draft 28 ft. Berthing for 2 vessels of 170 m. LOA. Berth provides 5×8 in. lines for discharge of refined product and 2×12 in. lines for fuel oil.

DENSITY: 1025.

FRESH WATER/FUEL: Available.

REPAIRS: Hull and machinery repairs can be effected by "Astilleros de Veracruz" (Vera Cruz Shipyard Company).

DRY DOCKS: "Astilleros de Veracruz S.A." has 4 docks, 3 floating and 2 dry docks. The largest of them is Floating Dock No. 4 with the following characteristics:

Length on stocks	169.210 m.
Internal useful beam	30.400 m.
Height of keel stocks	1.400 m.
Max. draft on keel stocks	8.200 m.
Lifting capacity	30,000 d.w.t.

Dock No. 2: With capacity for vessels up to 10,000 tons

Useful length	154.000 m.
Useful beam	19.400 m.
Draft	5.180 m.

Served by a 45 ton capacity crane

Floating Dock No. 3: With 3,000 ton capacity lifting capacity

Useful length	25.900 m.
Useful beam	13.550 m.
Draft	5.800 m.

Served by 2 cranes of 10 ton capacity each.

Dry Dock No. 1

Length	45.720 m.
Useful beam	7.920 m.
Draft	2.130 m.

New Floating Dock: Length 220 m., width 32.6 m. Capacity 28,000 tonnes.

SURVEYORS: Lloyd's, Norske Veritas and Germanischer Lloyd.

GANGWAY/DECK WATCHMEN: Available if required.

OPENING/CLOSING HATCHES: Mechanical hatches usually opened by crew, otherwise by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits per man and will attend as necessary for further issues.

CARGO GEAR: Piers 1 and 2, 4×20 tons, 6×10 ton, 3×5 ton and 10×4 ton mobile cranes. Various cranes at piers 4 and 6. 2 floating cranes available max. lift 46 tons.

REPATRIATION: Possible, arranged by Agent.

AIRPORT: 8 km. from Vera Cruz, flights daily to Mexico City.

TIME: GMT minus 6 hours all year round.

HOLIDAYS: During the year the following holidays are observed: 1st January, 5th February, 21st March, 1st May, 5th May, 16th September, 12th October, 20th November and 25th December.

POLICE/FIRE/AMBULANCE: Police – 2.28.23, Fire Brigade – 2.25.00, Red Cross – 2.01.40.

TELEPHONES: Available on most piers but not on vessels.

SERVICES: Provisions, laundries, and dunnage available. Garbage must be removed every 48 hours.

SHORE LEAVE: Possible.

GENERAL:

Government Secretariat – Local Administration Office

In accordance with the stipulations of Article 75 of the General Local Administration Law, vigilance of foreign crew members in vessels of any nationality tied up in national ports, together with visits or stays by the said crew members will be subject to the following requirements:

I. Heads of Local Government will designate accordingly personnel who will carry out vigilance of the vessel, in accordance with the provisions of Section II of Article 29.

II. Crew members may visit ports during the stay of the vessel, provided they deposit at the Local Administration Office their identity documents which for such purpose may be issued to them and their passports and other documents, all of which will be returned to them on re-embarkation.

III. Shipping companies, their Agents or consignee firms, for all legal purposes shall be responsible for the complete embarkation of crew members and for the costs involved in repatriating any who may remain behind after the vessel sails. When a crew member wishes to stay in the country, he must obtain documentation in compliance with one of the categories as set out in the appropriate Law and Regulations.

DEVELOPMENTS: A new petroleum quay is to be constructed to take 2 tankers of 40,000 tons.

A transtainer, portainer crane and other equipment will be acquired in the near future.

SHIPMASTER'S REPORT:

Documents:

1 Visaed and 9 Plain Spanish Crew Lists.
1 Visaed and 5 Plain Passenger Lists.
1 Visaed and 2 Plain Spanish Stores Lists.
2 Crew Customs Declarations.
5 Cargo Manifests.
1 Arrival form.

The Customs require a complete list of all shop goods priced in U.S. Dollars, failure to produce this will cause confiscation and $10,000 fine. The Customs thoroughly check bond and beer locker and seal same. All storerooms are also checked.

The Agricultural Inspector insists that all dry stores are fumigated and kept under seal for 24 hours. All refrigerated stores – except U.S.A. meat is sealed up.

Pilotage: Pilot boards 1 mile W.N.W. of Angeguda de Adentro Light beacon from black boat flying pilot flag.

Tugs: 2 tugs available for berthing.

Restrictions: Port open day and night. Prevailing Northerly winds are sometimes too strong to allow ship's movement in harbour.

Health: Health authorities board after berthing.

Radio: ETA to be sent 48 hours in advance via XFB Cuidad de Carmen. Agent orders Pilot.

Fuel: Bunker C and Diesel are available. A mixing machine is being installed to supply intermediate. Bunkers are supplied from most quays and are expensive for foreign ships.

Consul: There is a British Consul.

Repairs: There are 3 drydocks and all repairs can be done.

Airport: The airport is 6 km. from Vera Cruz with twice daily flights to Mexico City.

SHIPMASTER'S REPORT: October 1991.
Chart: B.A. Chart No. 374.
Pilotage: Pilot available throughout 24 hours for berthing and unberthing but port is often closed when Northerly winds reach 11 m./sec. (Force 6).

Pilot should be ordered through the agent with a minimum of 2 hours notice. For night time movements (between 1800 hrs. and 0600 hrs.) orders should be placed before 1800 hrs.

The pilot boards from a slow black hulled launch with white and orange upper works.

The pilot works on VHF Channel 13 only and it is difficult to contact them unless a vessel is expected. The pilot office is not manned overnight or on Sundays.

If the vessel has arrived from sea the pilot boards off Arrecife Blanquilla in position Lat. 19° 13′ N., Long. 96° 05.3′ W. If the vessel is coming from the anchorage the pilot will board in position Lat. 19° 11.6′ N., Long. 96° 04.2′ W.

Approaches: Sacrificios Lt. (LL4278) is a powerful light and is visible at 25 miles. The Racon on the lighthouse was operating and the light shows up well against the backdrop of the city lights.

Arrecife Santiaquillo Lt. (LL4318) was visible at 20 miles but Racon was not operating.

The lights on the various reefs surrounding Vera Cruz Harbour were all operating and were conspicuous.

Vera Cruz Harbour and the city show up well on the radar at 48 miles.

The powerful and conspicuous red light on top of a radio mast near Pta. Mocambo shows up well against the city lights. The light is located in position Lat. 19° 08.5′ N., Long. 96° 06.5′ W.

Anchorage: We anchored with Isla Sacrificios Lighthouse bearing 270° × 3.5 miles, but this was not a very good anchorage as it was windy and there was a swell running. If possible vessels should anchor closer to the shore. A local vessel anchored with Isla Sacrificios bearing 270° × 1.5 miles.

Pilot advised that vessels should anchor under the lee of Isla Verde (320° × 1.5 miles) when Northerly winds are blowing.

Anchoring between the reefs is not advisable.

When awaiting tugs we anchored for a short time with Arrecife Blanquilla South Lighthouse bearing 360° × 0.17 miles (position Lat. 19° 12.7′ N., Long. 96° 05.8′ W.).

Radio: Ships are advised to monitor Vera Cruz Radio (XFU) on WT/HF before arriving and MF/VHF whilst at anchor. The agent usually uses the radio station to send berthing instructions to vessels.

Tugs: At present there are 2 tugs (2,000 h.p.) available and both are generally used. Tug's lines are used.

The pilot advised that an additional tug of 3,500 h.p. will be available in December 1991.

Pemex have their own tugs for vessels berthing at their piers.
Port: Vera Cruz is the largest port in Mexico and Mexico's second city.

The Pemex berth near the N.E. Breakwater is in continuous use.

The shipyard appears to be in a state of disrepair and the floating dock is no longer in use and will be scrapped, according to the pilot.

There are 2 floating docks capable of handling ships up to 30,000 d.w.t. (Eastern dock) and 10,000 d.w.t. (Western dock).

The coastline adjacent to the dockyard has been infilled and developed.

We found the depths by echo sounder and hand lead to be slightly greater than those charted.

Depths:

Pemex	31 ft. 06 in.
Fluids	31 ft. 00 in.
Others	29 ft. 00 in. to 30 ft. 00 in.

A minimum depth of 10.0 m. was found from the breakwater entrance to the Fluids berth.
Berthing: Fluids Berth (see "Plan") is located at the Eastern end of the container quay. The minimum depth of 28 ft. 02 in. was found approximately 100 m. N.W. along the quay. In general the depth alongside was 31 ft. 02 in. The tidal range is between 1.0 ft. and 1.5 ft.

The quay is of concrete construction and has good rubber fenders.

Vessels discharging liquids (vegetable oils, tallow, molasses and latex) generally have their sterns over hanging by at least 20 m., so all stern lines are springs.

Vessels normally berth starboard side alongside, head in.

The tanks for the various commodities are adjacent to the facility.

It was just possible to land the ship's aft accommodation ladder on to the corner of the quay.

There are 2 large container cranes at the N.W. end of the quay.
Cargo: Vegetable oils are pumped through 1 × 6 in. flexi-hose to adjacent shore tanks at a rate of approximately 250 tonnes/hr. and a maximum back pressure of 5 kgs. Airblow is required on completion.

There is a watchman in a hut on the quay. The surveyors, Caleb Brett, took great care with sampling and gauging and Tank Dry Certificate on completion.

Vegetable oils are also handled at the aluminium berth on the N.W. corner of the harbour, into rail tank cars with discharge rate reported to be very slow.
Density: 1024.
Fresh Water: Available by barge but very expensive.
Telephones: There is a telephone in the receiver's office behind the shore tanks.
General: There are many hotels in the town. Frequent flights available to Mexico City.

A stowaway search is well advised before departure, after which gangway should be watched closely, as numerous "visitors" find their way on board.

Officials: Many officials boarded the vessel. We had Mexican Visaed Crew Lists and Crew Manifests with which they found fault, so extra "presents" were required. Immigration officials were very formal and required all passports on arrival. On departure all Philippino crew members were lined up with their passports for checking off.
Regulations:

1. Bonded stores are sealed by Customs inspector. Heavy fine for breaking seal. Contact agent if an issue is required.
2. Crew are not allowed to sell cigarettes, liquor or souvenirs. If upon inspection, Crew Personal Effects List is different from that declared heavy fines will be imposed.
3. A Port Health garbage boat will visit the vessel every 48 hours.
4. Rat guards are to be placed on lines as soon as vessel is secure.
5. No ballast or waste of any kind is to be pumped overboard.
6. No "visitors" of any kind allowed onboard without passes.
7. Vessels are not obliged to supply food or accommodation to ANY personnel (authorities, gangway watchmen, cargo watchmen, stevedores, etc.). Custom's guards onboard receive cash compensation in lieu of food and accommodation.

Weather: Between November and April strong Northerly winds are prevalent and are accompanied by heavy swell. At this time the port may be closed for a few days and vessels may find it difficult to anchor.

AUTHORITY: Delagacion Coordinadora, Edificio Oficinas Ligadas al Puerto, Plaza de la Republica No. 210, 5th floor. *Tel:* 2-13-19 and 2-30-40.

Federated States of Micronesia

TOMIL HARBOUR, Yap: 09.31 N. 138.10 E. **(See Plan)**

PORT LIMITS: Vessel is considered an "Arrived Ship" when abeam of Buoy No. 1. Laytime commences at this time.

DOCUMENTS: All necessary documents required by the Clearance Department shall be prepared before arrival. (e.g. Crew Lists, Passenger Lists, Customs, Health Documents, Manifests, Bills of Lading, Ship's Papers, Ship's Certificates, etc.)

PILOTAGE: All pilotage services must be requested by the Master or his Agent on their behalf 24 hours prior to vessel's arrival.

ETA messages for Pilotage are best routed through Port Control.

VHF: Channel 16. Tel: (691) 350-2229.

Fax: (691) 350-2267. Radio: 7876.5 kHz SSB.

ANCHORAGES: Inside Tomil Harbour, depth is 84 ft. MLW. Distance from dock, 3,000 ft.

RESTRICTIONS: Channel marked by lights and leading lights. Vessels can enter and leave, day and night, with approval of the Port Manager.

MAX. SIZE: The length of the channel is 9,600 ft., breadth is 300 ft. Max. size for any vessel entering the port and for tankers is 6,000 g.r.t. Depth in the channel 78 ft.

HEALTH: Master of vessel or designated Agent should advise Port Authority 24 hours in advance of her arrival of any communicable diseases, sickness or injury found among its crew even if the vessel's last port of call was in the Federated States of Micronesia.

RADIO: Vessel should route her ETA via Yap Port Radio.

See "Pilotage".

VHF: Port Control Radio – Channels 16 and 22A.

RADAR: No port radar.

TUGS: None.

BERTHING: Dock is 451 ft. long, depth is 78 ft. MLW, max. size permissible at LW (salt water) is 6,000 gross tons.

Also see "Developments".

CRANES: None. Discharge is by ship's gear.

BRIDGES: None.

STEVEDORES: ETA advices required 24 hours before arrival in order to arrange Terminal personnel.

Terminal Operator: Waab Trans Co. Inc., P.O.Box 177, Yap, Western Caroline Islands 96943. Tel: 2301/2302.

MEDICAL: Advise Agent prior to arrival if medical assistance required.

TANKERS: Load/discharge lines are 6 in. diameter.

DENSITY: Average 95% salt water, 5% fresh water.

FRESH WATER: Available on pier apron using fire hose connected to fire hydrant for drawing fresh water.

FUEL: Advance notice required through Agencies' Offices in order to arrange fueling with Mobil Oil Inc. Plant. Fuel line available at the dock.

CONSULS: No consuls available.

REPAIRS: Radio repairs only.

DRY DOCKS: Not available.

SURVEYORS: None.

HATCHES: Normally opened/closed by combination of crew and stevedores.

CUSTOMS ALLOWANCES: Each crew member is permitted to hold out of bond a maximum of 2 bottles of wine, 2 cartons of cigarettes, 12 cans of beer, etc.

CARGO GEAR: Discharge is by ship's own gear. Other relevant gear such as forklifts and trucks provided by the Terminal Operator (see "Stevedores").

REPATRIATION: Effecting of crew changes will be arranged by the proper Agency Office.

AIRPORT: Distance from Sea Port to Airport is 2.5 miles, served by regular airline with 3 flights per week on Wednesday, Friday and Sunday.

TIME: GMT plus 10 hours. No alterations made throughout year.

HOLIDAYS: Cargo work can be arranged on holidays, except Christmas Day.

POLICE/AMBULANCE/FIRE: Police, Tel: 350-3333; Ambulance, Tel: 3446; Fire Department, Tel: 350-3333.

TELEPHONES: Placement available only for Yap State owned vessels. Connection charge U.S.$ 25.00. Telephone available at the dock terminal for other vessels.

SERVICES: Tank cleaning equipment, discharge of slops, compass adjustment, etc., are not available in this port.

BANKS: Bank of Federated States of Micronesia and Bank of Hawaii.

STORING: See "Prelims".

(1) No.
(2) No barges for storing.
(3) —
(4) No.
(5) None.
(6) Yes.

SHORE LEAVE: Crew members are allowed ashore if no communicable disease found onboard.

IDENTIFICATION CARDS: Seamen's Book is sufficient.

GARBAGE DISPOSAL: Drums provided by requests on telephone (691) 350-2403 at the rate of $2.00 per drum.

WASTE OIL DISPOSAL: Service not available.

SEAMAN'S CLUBS: None.

CURRENCY: U.S. Dollar is the local currency.

DELAYS: Usually depends on the quantity of cargo, especially bulk cargo.

DEVELOPMENTS: The dock is being extended by 380 ft., completion expected in December 1992.

AUTHORITY: State Transportation Office, P.O.Box 290, Colonia, Yap State, Federated States of Micronesia 96943. *Tel:* (691) 350-2403. *Cables:* Sto Yap. *FAX:* (691) 350-2267. *Contact:* Captain Serphen H.Single, Harbour Master.

Monaco

MONACO: 43.44 N. 07.26 E. (See Plan)

PORT LIMITS: The seaward boundaries of the port commence by the 2 breakwaters at the Eastern entrance.

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists – 3 Landing Passenger Lists.
2 Stores Lists.
1 Manifest (cargo).
1 Bill of Health.
Ship's Register.

PILOTAGE: ETA via Monaco Radio – Channels 16, 12, within range. Pilot boat is a small white boat with a black "Pilote" painted on the side of the cabin. Pilot boards vessels 0.3 miles East of the harbour entrance.

Pilotage available: 1st May – 30th September (0800 hrs. – 2300 hrs.).
1st October – 30th April (0800 hrs. – 2000 hrs.).

Pilotage compulsory for all vessels over 30 m. LOA.

ANCHORAGE: One half mile East of the Southern breakwater lighthouse. Depth at the anchorage 68 m.

MAX. SIZE: Max. length 130 m. Stern to the pier on the West side or alongside the North quay, only from October to March and with 8 days' notice. Max. draft allowed: West Pier 8 m; North Quay, 7 m.

HEALTH: Health Declaration must be handed to the Customs. If coming from neighbouring countries (France, Italy, Spain) not requested.

RADIO: Monaco Radio (Tel. 93.30.13.13). VHF Channel 16. Port Operations Channel 12. Public telephone calls Channels 20, 22, 28 and 86.

RADAR: No port radar service.

TUGS: Pilot boats (2×158 h.p.) available without notice. 1 tug boat 200 h.p. with notice and 1 tug boat 450 h.p. available with notice.

BERTHING: All 3 quays plus inner sides of the breakwaters and Western "T" pier are available for mooring yachts stern to. The port may be congested during the Summer season. The possibility remains of anchoring off the dock.

CRANES: 1×10 tonne mobile crane.

MEDICAL: There is a state hospital fully equipped for surgery, etc.

FRESH WATER: Can be supplied at all berths alongside the quay. If vessel on Roads, water may be provided by barge up to 500 tons per day, with one week notice. Tel. Cannes 93.39.36.12.

FUEL: There is a fuel berth in S.W. area of port for ships up to 80 ft. LOA. Bunkers are available on the quay by truck but no heavy fuel available.

CONSULS: Most countries are represented in Monaco.

CUSTOMS ALLOWANCES: Same as in French ports.

REPAIRS: Only for yachts.

DRY DOCKS: 1 slipway × 100 tons, 1 slipway × 40 tons, 1 crane × 10 tons.

REPATRIATION: Good railway connections.

AIRPORT: Nice – Cote d'Azur. Distance 25 km.

TIME: GMT plus 1 hour. May to September GMT plus 2 hours.

HOLIDAYS: New Year; National Holiday, (Jan. 27th); Easter Monday, (May 1st); All Saints' Day; His Serene Highness' birthday, Nov. 19th. Harbour services work on Sundays and Holidays.

POLICE/FIRE/AMBULANCE: Maritime Police, Quai Antonie 1st Tel. 93.30.22.39; Ambulance/Police Secours Tel. 17; Fire brigade Tel. 18.

TELEPHONE: Available at all berths.

SERVICES: Engine repairs. Electronics. Maintenance for yachts. 220 volts available at all berths. TV aerial sockets at all berths free of charge.

SHORE LEAVE: Crew members allowed ashore.

REGULATIONS: *Recommendations to Ship-Owners, Masters and Crew Members:*

Ship-owners, Masters and Crew members are strongly requested not to dispose of hydrocarbon, household refuse and other rubbish into the Monaco harbour (i.e. cartons and mainly plastic containers).

Used motor oils and other petroleum residues must be transferred into tanks exclusively provided for this purpose at the beginning of the North and South jetties and on the landing stages facing the Rainier III swimming pool.

These tanks are signposted with panels bearing the words "Huiles Usees" (used oil) in red letters on a white background.

Household refuse and other rubbish is to be put into garbage containers located around the harbour throughout the year. Furthermore, during the Summer, special individual bags are made available free of charge to all in-coming vessels.

Those responsible for ships equipped with used water tanks or bilges are requested to empty these containers off the coasts of the Principality at a minimal distance of 6 miles.

Those whose ships are not equipped with these used water tanks are requested not to dispose of their used water during their stay in the Monaco harbour, and to use the sanitary installations and facilities made available to them within the harbour.

Offenders infringing the above provisions will be penalised in accordance with the stipulations of Law No. 954, dated April 19th, 1974, dealing with the fight against water and air pollution.

AUTHORITY: Directeur du Port et du Service de la Marine, B.P.468, 98012 Monaco Cedex. *Tel:* 93.30.76.87 or 93.30.19.21. *Telex:* 489035 MC. *Contact:* Captain Philippe Haquette, Harbour Master.

Morocco

AGADIR: 30.25 N. 09.38 W. (See Plan)

DOCUMENTS:

Health Declaration.
4 Cargo Manifests.
6 Stores Lists.
6 Crew Lists.
6 Passenger Lists.

PILOTAGE: Compulsory. Pilot boards at port entrance. International code signals used. Pilot on VHF Channel 16, day and night.

ANCHORAGE: Good anchorage in open roadstead.

MAX. SIZE: Up to 29 ft. draft. Max. LOA 160 m., however vessel with LOA 190 m. has been accepted.

HEALTH: Pratique given immediately after berthing when port doctor boards.

RADIO: Agadir Radio operates 24 hours a day.

TUGS: 3 tugs available, 1×350 h.p., 1×1,275 h.p., 1×1,500 h.p.

BERTHING:

No. of Berths	*Length (m.)*	*Depth (m.)*	*Remarks*
4	150	9.0	—
1	110	7.0	Ro/Ro.
3	100	6.0	Oil tankers and butane carriers.
1	—	6.0	Used by Moroccan tankers only.
1	120	5.0	Equipped with fish pumps.

CRANES: One Titan crane of 40 tons capacity.

STEVEDORES:

Working Hours: 0700 – 1200 hrs., 1400 – 1800 hrs. , 2000 – 0600 hrs. (With 24 hours' notice of ETA).

New times to be introduced but date not fixed: 0700 – 1500 hrs. and 1500 – 2300 hrs.

MEDICAL: Doctor and hospital facilities available.

FRESH WATER: Available from pipe-line at berths.

FUEL: Fuel and gas oil available from pipe-lines at berths.

CONSULS:

	Tel.		*Tel.*
Belgium	217 00	Norway	238 40
France	228 29	Spain	221 26
Italy	226 66	U.K.	209 05 (Casablanca)

REPAIRS: Small machinery (up to 500 h.p.) and electronic repairs can be effected.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Performed by stevedores.

CUSTOMS ALLOWANCES: Crew allowed normal daily consumption of tobacco, wine and spirits.

POLICE/FIRE/AMBULANCE:

	Tel.		*Tel.*
Police	19	Hospital	224 77
Fire/Ambulance	15	Port Police	223 49

TIME: GMT. No changes.

HOLIDAYS: Fete du Trone, (Throne holiday); 3rd March; Fete du Travail (Labour Day); 1st May; Al Massira Al Khadra, 6th November; Fete de l'Independance (Independence Day) 18th November; Aid Ei-Fitr, (1st and 2nd Chaoual); 1st January; Aid Adha (10 et 11 Hija); Le Premier Moharrem (The first Moharrem) and Aid Maouloud Annabaoui (12 et 13 Rebia I).

Note: Chaoual, Hija and Rebia are months in the Muslim calendar.

The following days are movable feasts governed by the Arabian Calendar – 1/2 Choual, 10/11 Diahijja, 1 Moharram, 1/13 Rabia I.

Work may be arranged on all holidays.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Required.

DEVELOPMENTS: New port of Anza under construction in position Lat. 30° 26′ N., Long. 09° 35′ W. Facilities will include 3,500 m. of quays, a Ro/Ro terminal and ship repair facilities. Depths alongside 10.5 m. – 15.0 m.

SHIPMASTER'S REPORT: November 1979.

Documents:

3 Copies Crew's Personal Effects.
6 Crew Lists.
3 Stores Lists.
3 Vaccination Lists.

Anchorage: Vessel anchored 0.5 miles South of breakwater.

Pilotage: Compulsory. Pilot boards 0.5 miles S.W. of the outer buoy. 1 hour's notice required.

Restrictions: Vessel can enter and sail during hours of darkness and at any stage of the tide.

Max. Size: Max. LOA 600 ft. (approx.) and max. draft. 26 ft. (approx.). Size of vessel limited by the swinging room.

Radio: Agadir Radio.

VHF: Pilot and Port Authority on Channel 16.

Tugs: Two available.

Berthing: Vessel berthed at No. 8 berth on the South mole which is about 7 cables from the harbour entrance. Max. LOA approximately 600 ft. and max. draft approximately 26 ft. Least depth of water in channel from sea to berth is approximately 30 ft. The bottom at the berth is sand and mud and the density is 1025.

There are no special bulk handling facilities. There are 10 cranes with safe working load of 10 tonnes. Ro/Ro facilities available, no floating cranes. There is ample equipment for handling palletised cargoes also storage space for palletised and break bulk cargoes. Containers are handled by ship's gear and storage space for containers is limited.

Facilities: The following are available: Fresh water (poor quality), fresh provisions, small repairs, there is a small machine shop, airport, Lloyd's Surveyor and laundry service.

AUTHORITY: Ministry of Equipment, Agadir Port Directorate, Agadir, Morocco. *Contact:* M. Abdelali, Port Director.

CASABLANCA: 33.36 N. 07.37 W. (See Plan)

PORT LIMITS: Vessels considered as "arrived" when passing Buoy CA 5 in position Lat. 33° 37′ 05″ N., Long. 7° 35′ 02″ W.

DOCUMENTS:

Certificate of Registration.
Cargo Manifests.
Stores List.
Crew Lists.
Passenger Lists.
Customs Declaration.
Bill of Health.
Ship's Entry Declaration.
International Tonnage Certificate.

All Stores Lists must be completed prior to arrival. If any errors found, vessel is heavily fined.

PILOTAGE: Compulsory for all merchant vessels of 100 tons and over, in the area between the meridians 7° 37′ 10″ W. (the foot of Jetee Moulay Youssef) and 7° 33′ 50″ W. (Table d'Oukacha) and South of the parallel 33° 37′ 4″ N. Pilotage is available day and night. The Pilot meets vessel at the CA5 buoy.

A red flag displayed at the signal station by day indicates that the Pilot cannot come out, on account of the sea, but vessels may enter the port at their own risk, and the Pilot will await them under the shelter of Jetee Moulay Youssef. Should bad weather prevent the Pilot from coming out, a vessel should not attempt to enter the harbour at night. The Master may contact the Pilot station for port radar service by VHF Channel 12.

ANCHORAGES: The anchorage outside Casablanca Harbour is partially protected from winds between South and West but a Westerly swell finds its way into the bay. With a heavy Westerly or Northwesterly swell the anchorage becomes dangerous.

The holding ground in most places outside the harbour is poor, but a berth with good holding ground may be obtained in a depth of 13 fathoms North of Jetee Moulay Youssef. There are numerous anchorage berths in the harbour, some at mooring buoys, in depths up to 12.8 m. (42 ft.).

MAX. SIZE: Max. length permissible, about 884 ft.; max. breadth permissible, about 105 ft.; max. draft permissible, about 32 ft.; but normally 30 ft. for berthing alongside. Tankers: Up to 37 ft. draft.

Report: A vessel's agent has reported that for tankers discharging crude oil at the Crude Oil Berth the Max. draft is 35 ft. and Max. LOA 250 m.

HEALTH: Masters must fill in the Declaration of Health and display the "Q" flag, to obtain Pratique. In the event of any suspected disease or fever on board, Masters have to warn their Agent before the ship's arrival.

TUGS: There are 9 tugs of 800 – 1,500 h.p. 3 of them are sea-going tugs fitted with modern salvage apparatus. Normally tugs join the vessel at port entrance. To call them, 4 long blasts and 1 short for 1 tug, 4 long blasts and 2 short for 2 tugs, etc. Ship's lines are mostly used.

BERTHING: To arrange berth, ETA message should be given 24 hours before the ship's arrival.

Mooring: When making fast to the jetty by the stern, the anchor should be let go at a sufficient distance from the jetty to allow for a good scope of hawsers.

Vessels are recommended to secure with special 10 in. coir hawser tailed with wire. It is recommended to moor head to the swell, but in bad weather a vessel should be ready to leave at short notice.

Pier/Jetty	*Berth No.*	*Total Length (m.)*	*Depth (m.)*	*Use*
Moulay Youssef Jetty	P3	120	10.00	Crude oil, Petroleum Products.
	F	300	10.00	Dangerous products, lights and beacons.
Tarik Pier	T2	140	6.00	Heavy loads.
	10 – 13	390	8.20	Containers.
	A1,A2,A3.	140	8.20	Car–Ferry and Ro-Ro.
Commercial Pier	20 to 24	572	9.10	Cereals, General Cargo.
	T3 – T4	250	9.70	General Cargo, Sugar, Cereals, Passengers.
	30 – 33	480	9.70	Passengers, General, Bagged goods, Containers.
	34 – 36	400	9.70	
	R2 – R3	200	7.50	Fertlisers, Mineral Sand, Iron, General Cargo.
Citrus Products Berth	40 – 44	568	8.50	General Cargo, Fruit, including citrus products.
	T5 – T6	220	9.10	Citrus products.
	50 – 55	703	9.10	Citrus products, General Cargo, Sugar in bulk.
	R4 – R5	200	7.50	Iron - Scrap.
Phosphate Jetty	60 – 63	540	9.00-12.00	Iron, Ore, Coal, Phosphates
	64 – 66	510	9.00-12.00	Ore, Coal, Phosphates
	T7	125	9.00-12.00	Phosphates

CARGO HANDLING EQUIPMENT:

Dock Cranes:	62×5 – 10 tons 3×12 – 15 tons 2×25 tons
Mobile Cranes:	17×6 tons 1×36 tons 1×72 tons
Mounted Cranes:	3×6 tons 5×10 tons
Gantry Cranes:	1×19 tons 1×12.5 tons
Floating Crane:	1×50 tons, with 120 tons load capacity.
Forklifts:	241×1 – 32 tons
Grabs	32×2 – 5 tons 13×6 tons
Straddle Carriers:	12×30 tons

RADIO: The name of radio station for ETA cables to Agents, receivers, etc., is Casablanca Radio.

VHF:
Pilot: Channels 12 and 26.
Port: Channels 16, 12 and 14.
Harbour Manager: Channel 12.
Tugs: Channels 12 and 16.

SPECIALISED CARGO HANDLING FACILITIES:
Container Terminal: The container terminal was built in 1972 and is situated on the Tarik Pier in the West side of the port.
Total area: 18 hectares divided into 8 zones.
Total quay length 790 m.
5 berths are reserved for the container traffic.
Depth 7.0 m. – 9.0 m.

Storage capacity: The storage area covers 85,000 sq.m. This allows a minimum storage capacity of 5,000 T.E.U.'s at two high.
Equipment:
2 mobile cranes on rails of 25 tons each.
2 rubber tyred travelling cranes of 36 tons each, and 1 mobile crane of 100 tons.
12 straddle carriers.
4 fork-lift trucks.
20 trailers.
7 tractors.

Grain Terminal: The Grain Terminal is located on the West side of the Commerical Pier. The terminal has a quay length of 250 m. and a depth of 9.5 m.
Capacity:
2 vertical silos of 30,000 tons storage capacity.
1 flat storage of 10,000 tons capacity.
Equipment:
3 gantries of 200 t.p.h. capacity each, reserved for import cargo.
2 gantries of 200 t.p.h. capacity each, reserved for export cargo.

Ro-Ro Terminal: The Ro-Ro facilities are located in the area of Berth A1 and A3 with 140 m. quay and depth 8.0 m.
2 Floating pontoons of 100 tons capacity.
2 Floating pontoons for Ro-Ro cargo with a maximum load of 35 tonnes.
1 freight station covering 6,000 sq.m.
Stuffing and unstuffing sheds and a parking area for TIR trailers.

Cold Storage: Two refrigerated warehouses on the Citrus Pier of 8,500 sq.m.
First warehouse is reserved for fruits, vegetables and any perishable produce, area 3,000 sq.m.
Second warehouse is intended for citrus and early vegetables, area 5,500 sq.m.

BULK HANDLING FACILITIES: *Phosphate Terminal:* 4 berths (64-65-66 and T7) located at the transversal jetty with a quay length of over 630 m.
Handling equipment:
2 conveyors of 2,500 t.p.h. for discharging railway wagons.
2 conveyors of 1,250 t.p.h. connecting the stockpile to the quays.
4 conveyors of 1,250 t.p.h. for loading purposes.
2 gantry cranes of 650 t.p.h. at Berth T7.
The storage capacity is 420,000 tons.

Iron Ore and Coal Terminal: 4 berths (60 to 63) with a quay length of 540 m.
Handling equipment:
1 gantry 12.5 tons.
1 new gantry of 600 t.p.h.
Storage area of 20,000 sq.m.

STEVEDORES: There are 13 stevedoring companies. Normal working days are in two shifts (from 0700 to 1500 hrs. and 1500 to 2300 hrs.). Ship's Agents arrange gangs in connection with stevedores. Two daily orders (at 1100 hrs. and 1600 hrs.) are made to fix the number of gangs.

MEDICAL: It is necessary for Agent to receive advance notice of required medical attention. Hospital facilities available.

TANKERS: There are 4 tanker berths, *(a)* Berth P3 for Import and Export of white products, max. permitted draft 37 ft. and 60,000 d.w.t. *(b)* Three berths for Import and Export of black products. These berths (No. 60, 61 and 62) are situated inside the harbour, vessel's draft should not exceed 30 ft. Security tug necessary when handling certain petroleum products.
Report: December 1982: Vessel with LOA 237 m. (77,000 d.w.t.) berthed at No. P 3 and parted 11 mooring lines. For this reason owners believe the berth is unsafe for a vessel of this size with a swell running.

FRESH WATER: Numerous feeders along berths. Also delivery by barges is possible.

FUEL: All grades available. Ex-wharf or by barge.

FIRE PRECAUTIONS: Two firemen remain on board tankers while vessel berthed alongside. One fireman is required for other vessels carrying dangerous cargo.

CONSULS: The following countries are represented by consuls in Casablanca:
Algeria
Argentina
Austria
Belgium
Brazil
Denmark
Finland
France
Germany
Greece
Haiti
Italy
Netherlands
Norway
Panama
Poland
Portugal
Spain
Sweden
U.K.
U.S.A.
Yugoslavia

REPAIRS: Only small repairs and dry docking works are carried out.

DRY DOCKS: One large dry dock, 152 m. long and 22 m. wide (lifting power 10,000 tons). Three slips for ships up to 700 tons.

GANGWAY/DECK WATCHMEN: It is necessary to have watchmen on board. They are hired by the ship's Agent.

OPENING/CLOSING HATCHES: This work is normally carried out by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes are permitted for each crew member to be held out of bond.

REPATRIATION: Facilities exist for effecting crew change and arranging any necessary repatriation.

AIRPORT: Distance from airport, 25 miles. International connections.

TIME: GMT. No changes.

POLICE/AMBULANCE/FIRE: Police, 2210-74 or 19; Ambulance, 15; Fire, 15.

TELEPHONES: Only arrangements for placing telephones on board passenger ships are possible.

SHORE LEAVE: Crew members are allowed ashore.

IDENTIFICATION CARDS: Needed.

DEVELOPMENTS: A new container terminal is to be built to the East of the phosphate jetty.

AUTHORITY: Direction d' Exploitation du Port de Casablanca (D.E.P.C.) 2 Bd. des Almohades, Casablanca, Morocco. *Tel:* 031.61.11, 031.89.51. *Telex:* 220.62, 226.90. *FAX:* 031.57.21. *Contact:* M. Bellouchi, Director.

EL JADiDA (Mazagan): 33.15 N. 08.31 W. (See Plan)

DOCUMENTS: As for "Casablanca".

PILOTAGE: Arranged by Agent, basis vessel's ETA given in advance. Pilot boards about 2 miles from the port entrance.

ANCHORAGES: About half a mile from head of North jetty in depths of 13 m. to 14 m. Hard rock bottom covered in sand. Holding ground is fair only.

RESTRICTIONS: The port comprises an entrance channel 50 m. wide and an outer harbour area 7 hectares, partially dredged to 3 m. depth to make a waiting basin. In the Southern part of the outer harbour is a quay, called the barge quay, 120 m. long, dredged to 6 m. depth.

MAX. SIZE: No limitations for vessels anchoring. For entering harbour, max. length 80 m., draft 5 m., entering at high water.

RADIO: No local radio station. Use Casablanca Radio for messages to Agent.

TUGS: Available. Normally join vessel 2 miles from port entrance.

CRANES: 2 electric cranes and 2 diesel cranes available.

MEDICAL: Hospital facilities available. Vaccinations can be arranged.

FRESH WATER: Available at the quay.

FUEL: Can be supplied subject to 24 hours' notice.

CONSULS: The only consular representatives are those of France and Portugal.

REPAIRS: Small repairs can be done on board, or parts sent to Casablanca. One small dry dock reserved for Port Authority vessels and fishing boats.

WATCHMEN: Recommended to employ watchmen.

OPENING/CLOSING HATCHES: Work performed by ship's crew.

REPATRIATION: Can be arranged via Casablanca.

AIRPORT: Nearest commercial airport is at Casablanca.

TIME: GMT. No changes.

HOLIDAYS: Sundays and holidays, except for National holidays, can be worked on payment of overtime.

POLICE/AMBULANCE/FIRE: Police, Tel: 19; Ambulance, Tel: 15; Fire, Tel: 15.

TELEPHONES: Cannot be connected to vessel, but telephone situated on the quay.

AUTHORITY: Arrondissement de L'Equipment et de la Promotion Nationale.

JORF LASFAR: 33.08 N. 08.38 W. (See Plan)

PILOTAGE: Pilot station at Jorf Lasfar Port. Pilotage compulsory at all times except for vessels under 100 g.r.t. Pilots are available day and night. There is no special arrangements. Pilot works under orders from the Port Authority. Tel: (03) 34-50-13. VHF: Channels 12 and 16.

APPROACHES: Safe depths in approaches. The 50 m. line is situated 3 nautical miles from breakwater and the depth in the entrance is 20.0 m.

ANCHORAGES: Safe anchorage 1.0 nautical miles North of jetty head. Max. permissible draft varies from 14.00 m. to 16.00 m.

RESTRICTIONS: There are no restrictions relating to movements. All ships can enter and leave port day and night, except ships carrying dangerous cargo.

RADIO/VHF: Jorf Lasfar Port Control is under the control of the Port Authority. VHF Channels are 12, 14 and 16.
Vessels are to send ETA 24 hours prior to arrival, directly to Harbour Master at Port Office. Telex: 78996M. Tel: (03) 34-54-20.

TUGS: Four tugs are always available at Jorf Lasfar, ready for manoeuvering at any time (24 hours).
"Aziz" 3,000 h.p. (Voigt Schneider),
"Said" 2,800 h.p.,
"Amir" 1,800 h.p.,
"Merzouk" 1,600 h.p.
The tug companies are SCRA (Societe Cherifienne de Remorqueurs). Tel: (02) 31-77-59. Contact Mr. Lachheb Aziz.
Offshore Maroc. Tel: (02) 27-21-77. Contact Mr. Rami Larbi.

BERTHING:

Berth No.	Depth (m.)	Length (m.)	LOA permissible (m.)
1	15.60	300	300
2	12.50	180	225
3	12.50	180	225
4	12.00	180	225
5	11.50	180	225
6	11.50	45	225
7	11.50	45	225
8	15.60	60	250
9	12.70	60	235
Q.C (10)	9.00	200	200
Q.T (13)	5.25	120	120
Ro/Ro	6.75	150	190
Q.S (11)	4.00	215	215

Berth No. 1: Berth for loading of phosphate and fertiliser. Two or three vessels, depending on length, can berth at this terminal.

Two chutes of 3,000 t.p.h. loaded directly from conveyor, which runs to stockpile 2 km. away.

Berth No. 2: Reserved for handling fertiliser in bags. In the future the berth will be extended by 300 m. Southward.

Berth No. 3: Reserved for handling coal. In the future the berth will be extended by 300 m. Southward.

Berth No. 4: This quay is reserved for discharging sulphur by 2 grabs, maximum rate 750 t.p.h. There is a conveyor running to stockpile of 4,000,000 tons.

Berth No. 5: See Berth No. 4.

Berth No. 6: Used for loading phosphoric acid and discharging ammoniac by 3 pipelines (1 for ammoniac and 2 for phosphoric acid). Loading capacity 1,800 t.p.h.

Berth No. 7: Used for loading phosphoric acid. Joined by 3 pipelines to the factory. Loading capacity 1,800 t.p.h.

Berth No. 8: Special berth for tankers but not presently equipped. At present, berth is used for the transhipment of grain from the mother ship to daughter. This operation started in 1986 and is only permitted in Summer time.

Berth No. 9: Used for discharging butane by pipeline to Somepi, whose tanks are situated about 6 km. from the berth.

Q.S. – Service Quay: This quay is reserved for tugs, pilot boats and dredgers.

Q.C. – Berth No. 10: Used for handling general cargo. There is one Ro/Ro berth with length 150 m. and depth 6.75 m.

Q.T. – Berth No. 13: Used for discharging (cement). Reserved for national lines traffic from Agadir to Jorf Lasfar, equipped with pipeline to the cement-silo of Simasfi. Stockyard capacity 250,000 tonnes.

CARGO HANDLING EQUIPMENT:

9 mobile cranes, capacity 6 tons at 25 m.
10 mobile cranes, capacity 4 tons.
2 chutes for discharging grain, rate 200 t.p.h.
11 tractors.
100 trailers.
2 travelling cranes for sulphur, 1,500 t.p.h.
2 travelling cranes for phosphate 3,000 t.p.h.
6 pipelines for phosphoric acid, 1,800 t.p.h.
1 pipeline for discharging butane, 100 t.p.h.
2 bagging machines for fertiliser.

STEVEDORES: There are 2 stevedoring companies.

ODEP is permitted to handle general cargo, grain, coal and butane.

OCP is the operator for the terminals reserved for handling phosphate, sulphur, ammoniac, phosphoric acid and fertiliser.

Working Hours: Monday to Saturday 0700 hrs. – 1500 hrs. and 1500 hrs. – 2300 hrs. (2 shifts per day).

During Ramadan, there are special shifts from 0500 hrs. – 1200 hrs. and 1200 hrs. – 1800 hrs.

On Sundays and holidays, 2 shifts are available from 0700 hrs. – 1500 hrs. and 1500 hrs. – 2300 hrs. at overtime rates, or compulsory overtime, depending on port situation.

For bulk handling by OCP (Office Cherifien du Phosphate), 3 shifts work per day all the week including Sundays and general holidays.

MEDICAL: There are 4 private clinics and 3 hospitals for the general public at El Jadida, about 20 km. from Jorf Lasfar.

FRESH WATER: Available in all the quays. Cost: U.S.$ 1.5/ton.

FUEL: Fuel and gas oil available with 48 hours notice to Mory-Shell, Total or Mobil.

REPAIRS: No facilities available at the port.

If repairs are required, companies from Casablanca or Safi undertake the work. They will require 24 hours notice from the ship's Agent.

Two small docks are envisaged for repairing vessels up to 75 m. LOA.

SURVEYORS: Available through the Port Office or Pilot Station. All pilots are surveyors.

AIRPORT: Mohamed V Airport at Casablanca, distance 120 km.

POLICE/AMBULANCE/FIRE: Police, Tel: 34-54-71. If ambulance or fire service are required, call Port Control on VHF or Tel: (03) 34-54-20.

TELEPHONES: Public telephone box available near Port Office.

GARBAGE DISPOSAL: The garbage collection service is compulsory. Drums are provided on board and received alongside. Collection time is 1000 hrs. daily. Contact Port Office, Tel: (03) 34-54-20.

WASTE OIL DISPOSAL: Not available as yet.

SEAMAN'S CLUBS: None.

CURRENCY: Moroccan Dirhams (DHS). U.S.$ 1.00 = 8.61 DHS (22.4.91).

GENERAL: *Provisions:* Fresh provisions are available.

Weather: Winds: S.W. and N.W. (Winter) November to March, but it is rare for work to be suspended.

Tide: Rise and fall of tide in the harbour 2.15 m. – 3.80 m.

SHIPMASTER'S REPORT: May 1984.

Location: The Port of Jorf Lasfar is situated approximately 62 nautical miles by sea, and 120 km. by a good tar sealed surfaced road from the town of Casablanca, in Morocco. The natural deep water bay along the coast has afforded the development of an industrial complex, designed for the export of phosphates and minerals, also phosphoric acid and sulphuric acid.

The principal breakwater, (Outer Breakwater) extends in a direction N.W. from the shore, 1.75 miles S.S.E. of Cap Blanc du Nord, on which is erected a "Yellow" square tower 31 m. in height with a black top, the position of which is Lat. 33° 09.8′ N., Long. 08° 37.6′ W. The light exhibited from tower is occulting white and red 6 secs., eclipse 1.5 secs. White visibility 9 miles 018° – 190° (172°), red visibility 6 miles, 190° – 018° (188°). The breakwater then turns S.W. and S.S.W. for a total length of 3,100 m. The Contre Digue or Lee Breakwater extends 1,250 m. N.W. from the shore 1 mile S.S.W. of the root of the Outer Breakwater.

Light structures stand each side of the entrance, on the Outer Breakwater about 500 m. N.N.E. of its head, and on the head of the Lee Breakwater (Contre Digue).

Approaching: Noon, day before arrival: Position Lat. 33° 00′ N., Long. 12° 59′ W. Course 088°(T) allowed 2° set Gyro course 086°.

Day of Arrival: 0139 hrs. Sat. Nav. fix Lat. 33° 04′ N., Long. 09° 39′ W., disallowed set.

Radar observation of the coastline was made when 43 miles off (radar JMA 159B/3 cm.) but no positive fix. Vessel running in on Sat. Nav. D/R position.

0443 hrs. Radar fix obtained of Cap Blanc du Nord, 25 miles.

As vessel had no port information or charts ETA given as 0700 hrs. (Sunrise 0612 hrs. GMT).

Called Casablanca Port Control on Channel 16 from 0530 hrs. Reception was poor and distorted.

Called Jorf Lasfar Pilot on Channel 12 . . . No reply.

About 7 miles off, the Principal Breakwater was clearly outlined on radar screen, and observed 1 small coaster at anchor off the port.

Weather was cloudy, visibility clear, a light Easterly wind was blowing, slight sea with low, heavy, Westerly swell.

When about 4 miles off, contact was made with the Pilot. Due to the berthing of the coaster, we were delayed, and vessel was turned around on reciprocal course. At 0745 hrs. turned vessel around and made approach to embark Pilot, on his advice.

Embarking of Pilot: Under normal circumstances a pilot launch is available. Unfortunately for us, the launch was under repair and Pilot came out to embark on a rather large tug. Not a very suitable proposition at the best of times.

No positive position for Pilot Boarding has yet been established and no Sea Buoy to indicate any approach.

Ladder was rigged on starboard side. The tug had great difficulty to manoeuvre to come alongside, but after several attempts and much helm and engine movements, further hampered by the heavy swell running for both vessel and tug, the Pilot (French) boarded without any incident.

I am of the opinion, that the Pilot should board approximately 1.0 to 1.5 miles off the Principal Breakwater Head, by pilot launch, with vessel's speed about 5 knots, to afford a good lee and counteract the swell. The tugs should be secured before the ship enters the port as there is about a 90° to 120° port turn to line up with the entrance, with very little room for error. Both anchors to be ready for letting go. Once the turn into the entrance is made, the way must be taken off the vessel quickly and stopped, to effect a port swing again of 90° to back into the berth, for starboard side alongside berthing at Quay No. 2 where vessel berthed.

The 2 tugs attending, "El Hafid" and "Casablanca", 2,000 h.p. and 1,600 h.p. respectively, were adequate under the prevailing conditions. Both tugs used ship's lines. Vessel was secured with 5 head and 5 stern lines also 2 springs forward and aft.

Whilst alongside with a heavy swell outside the harbour area, surge was experienced alongside. Rope springs are suggested for use, or wire springs with rope tails.

The foregoing was a deeply laden vessel, length 224.5 m., draft 38 ft. (salt water) even keel.

Port Limits: The seaward boundaries of the port have not yet been defined. There are no designated anchorages off the port for vessels carrying the various categories of cargo.

There is no designated Pilot Boarding Ground.

There is no Sea Buoy, or Channel Marker Buoys to indicate a safe Fairway.

Charterer's particular requirements to vessel's Agents to be sent through Casablanca Radio, CNP (8 MHz).

We were able to contact Casablanca Radio, 5 days prior to arrival (1,600 miles).

Preliminary "Notice of Readiness" was tendered to Agents and receivers of cargo by radio on arrival (0700 hrs.).

I prepared 5 copies of my own "Notice of Readiness" which was handed to the Agent on berthing. He signed in acknowledgement, for transmission to the receivers.

"Notice of Readiness" was accepted at 0830 hrs., which was office opening hours on our arrival day.

Documents:

Crew List, 6 copies.
Passenger List, 6 copies.
Customs Crew Personal Effects Declaration, 1 copy and 1 copy for Agent.
Ship's Stores List, 1 copy and 1 copy for Agent.
Ship's Manifests. If on board for delivery to Agent.
Bills of Lading. If on board for delivery to Agent.
Ship's Particulars, 1 copy for Agent's use.

Ship's Certificates: To produce Ship's Register, Safety Equipment, Ship Construction, Safety Radio, Tonnage Certificate, Derat Exemption.

Pilotage: Give ETA to Agent at Casablanca. He arranges Pilot and tugs. Pilot comes by road from Casablanca.

Apparently 1 tug is always stationed at Jorf Lasfar port, but is not manned. A second tug comes from Casablanca. (Ordered by Agent, who arranges time). Two tugs seemed adequate for this vessel under the prevailing conditions. Advise Agent accordingly if you require more. Pilots consider 2 tugs are adequate.

Minimum 24 hours' notice is required for Pilot and tugs.

Pilot Launch: Approximately 7 m. in length, black hull, white topsides, with the word "Pilote" painted in white bold lettering on each side. (Also see "Approaching".)

Anchorages: See "Port Limits".

Pilots recommended 2 miles off breakwater, keep entrance to harbour clear. Holding ground good. Obstructions not charted.

Keep well clear of Cap Blanc du Nord. I have seen heavy breakers 0.5 miles to 0.75 miles off this point in strong Westerly winds and heavy swell/sea.

Depth lines showing a 1 m. difference in soundings have been charted on locally produced chart.

Tugs: Tugs do not have their own lines, ship's lines are used.

Also see "Approaching" and "Pilotage".

Restrictions: Movements, entry and departure are restricted to daylight hours only. From observations (personal) tidal range at spring tides is approximately 8 ft. No tidal predictions are as yet available.

We entered with a draft of 38 ft. (11.58 m.) salt water even keel. No adverse effect, or ground effect noticeable. Be careful of lift and fall in heavy swell, and rolling which will increase draft. As previously stated, apart from the light on Cap Blanc du Nord, no other lights are as yet available as an aid to navigation.

Depths: Entrance Channel 17 m. No. 1 Berth 13.5 m. (phosphate).

Max. Size: Nothing yet stipulated by Port Authority.

Our vessel: Overall length 224.50 m. Moulded breadth 32.20 m. Max. Summer draft 12.956 m. Max. d.w.t. (Summer) 64,931. G.r.t. 35,417, N.r.t. 21,296. Panamax bulk carrier.

Also see "Restrictions" and "Cargo Gear".

Health: Pratique free from one Moroccan port to next Moroccan port.

Master to send cable 24 hours prior to arrival to Agent. Cable to include following information: Number of crew (including Master) on board, certify vessel free of infectious disease, all crew healthy, and in possession of valid health and travel documents (passports) and last port or ports of call (21 days prior) arrival, and request Agent to supply for Radio Pratique and Immigration Clearance.

Prepare Health Declaration Papers if on board, otherwise Agent will prepare on arrival at berth, for signature.

Vaccination Lists, 2 copies.

VHF: Use Casablanca. Call CNP2. Frequency Channels 16, 12 and 14.

When you know from the Agent that the Pilot will board on arrival at Jorf Lasfar, then call "Jorf Lasfar Pilot" on Channel 12.

Also see "Approaching".

Radar: Not available.

Radio: "Casablanca Radio". Call sign CNP on 8 MHz.

We made contact 5 days (approximately 1,600 miles from Casablanca) prior to arrival.

Berthing:

Berth No.	Depth Alongside (m.)	Length of Wharf (m.)	Width of Wharf (m.)	Surface Area (sq.m.)
1	15.60	300	82.28	24,684
2 – 3	12.50	180	75.00	13,500
4 – 5	12.80 – 11.50	180	30.00	5,400
6 – 7	11.50	45	30.00	1,350
8 (Oil Berth)	15.60	45	15.00	675
9 (Oil Berth)	12.70	45	15.00	675
Q.C./10	5.25 – 6.75 – 9.00	360	20.00	7,200
Q.S.	3.50 – 4.00 – 5.00	215	20.00	4,200

Note: The above information has been obtained from the Port and Harbour Authority. The maximum permissible draft for our vessel at Berth No. 10 was declared as 26 ft. This information was given by the Pilot who shifted the vessel from Berth No. 2 to Berth No. 10 and agreed to by the Port and Harbour Authority. I requested this in writing before shifting the vessel.

From the above legend for the Quai de Commerce (Berth No. 10) the shallowest part is at the Eastern end near the Ro/Ro adjustable run-off. Berth No. 10 Surface unsealed, and consists of loose metal/ sand/ stones, many potholes, dry grass, and totally unsuitable for discharge of grain.

Note of Protest and Indemnification of Liability served on the receivers by the vessel's command through the Agents. Receivers accepted it without question.

I am led to understand that the port is to be divided into 2 sections.

Berth Nos. 1 to 7 will be privately operated, and the remainder of the port will be operated by the government.

On some plans, a grain silo is shown on the Southern side of "Quai de Commerce", adjacent to the Ro/Ro terminal. This I believe will now not be developed, and Jorf Lasfar will not be used as a grain port. At times vessels use Jorf Lasfar to lighten ship to 30 ft. and then proceed to Casablanca for further discharge.

Berth use (on completion of port):

No. 1	Phosphates	Nos. 8 & 9	Petroleum
No. 1 Bis	Coal	Nos. 10 & 10 Bis	General
No. 2	Phosphates	No. 11	Service
No. 2 Bis	Coal	No. 12	Fish
No. 3	Phosphates	No. 3	Ro/Ro
No. 3 Bis	Minerals	No. 14	Cereals
Nos. 4 & 5	Sulphur	No. 15	Containers
Nos. 6 & 7	Acid		

Cranes: There are no permanent cranes to speak of at any of the berths.

6 mobile cranes were made available for the discharge of our vessel. Type: Gottwald/Dusseldorf, luffing and slewing, diesel/motors. Capacity: 6 tons × 8 m., 6 tons × 25 m.

Outreach: With base spreaders out, and tyres afloat, and in position the cranes could not plumb further than the centreline of the ship. (Beam 32.2 m. max., fenders alongside wharf).

No heavy lift cranes ashore or afloat available.

While in port 3 vessels were seen discharging heavy lifts for the industrial complex with their own gear.

One vessel discharged machinery and general cargo with ship's cranes.

Note: 1. Gearless ships would be serviced by the above mentioned mobile shore cranes.

2. Vessels with their own gear would have no difficulty to discharge cargoes such as grain/ores/coal/fertilisers/sulphurs/copra, etc.

Specialised Cargo Handling Facilities: A container terminal is envisaged but at time of writing is non-existent, (wharf or cranes).

Berth is available for Ro/Ro vessels with adjustable ramp, (power facilities and terminal non-existent).

Berth for tankers (Berths No. 8 and 9), available but as yet no pipe-lines to storage tanks, behind the ridge of hills in the background of the port, have been laid on.

Berths available for liquid chemicals, (see plan), but no pipe-lines or facilities as yet available.

No facilities for LPG/LNG.

Bulk Cargo Facilities: Refer to legend of berths, cranes, and additional notes.

Bridges: None.

Stevedores: Agent will organise gangs with receivers.

Port Working Hours: Monday to Saturday inclusive 0700 – 2300 hrs. over 2 consecutive shifts 0700 – 1500 hrs. and 1500 – 2300 hrs. Overtime, Sundays and holidays when available and/or compulsory. A third shift overtime also possible when ordered by receivers and agreed by Port Authority (2300 – 0700 hrs.).

There appeared to be no "meal breaks" or "smokos".

There is a language barrier unless you speak French and/or Arabic.

Medical: See "Documents".

There is a private clinic, and 3 hospitals for the general public, available at a town called El Jadida, about 25 km. from Jorf Lasfar.

Notify Agents who will make the necessary arrangements. Preferably 24 hours' notice is required due to the fact that there is no communication available from the ship or wharves (telephone). There is a telephone available at the Port Authority Office some 1.5 miles distant from the wharf area, but the office is not open day and night, also the Agent lives at Casablanca some 120 km. distant. My crew were cautioned to exercise care in their work habits to avoid accidents. Shore labourers will request first aid from the ship for minor cuts and bruises.

Dental treatment is also available at El Jadida.

It is advisable to have Cholera/Yellow Fever inoculations. Some charterers include this as a must in their charter parties. There is a Port Health Officer stationed at El Jadida, who clears the vessel on arrival.

Tankers: Two berths. No pipe-lines laid at present.

Density: During vessel's stay, when cargo discharged, calculations and final draft survey by ship was necessary. The average salinity (density) corrected for temperature was 1027.5/1028. Temperature varies between 16°C – 25°C.

Fresh Water: No fresh water available at Jorf Lasfar, nor are there any facilities yet laid on the wharf for this purpose.

Vessel maintained consumption, average 12 tons per day (which included domestic, culinary, toilet flushing purposes and laundry) from the water made by evaporator at sea on passage and prior to arrival.

Agents advise me that in very urgent circumstances, fresh water is available by tug, approximately 40 tons maximum, from Casablanca, but very expensive. (Not less than U.S.$2,500 per 40 ton delivery.)

Fuel: Not available.

Fire Precautions: Normal ship safety fire precautions. No equipment available from wharf. Nearest available fire brigade is from El Jadida.

Consuls: None available at Jorf Lasfar, or El Jadida, nearest is Casablanca. British Consul will act for certain Marine matters for British registered vessels.

I was able to have an extension to the vessel's "Safety Equipment Certificate" done in 30 minutes.

Take your passport to the British Embassy to gain entry. This will be checked after you have filled in a small form to indicate the purpose of your call.

Repairs: There are no facilities available for ship repairs, deck or engine.

The nearest repair yards and facilities are available at Casablanca. From the port plan, it would appear that there is to be 2 small docks or slipways, with workshop attached.

Dry Docks: None.

Surveyors: 1. Cargo Surveyors/Inspectors not available at Jorf Lasfar.

2. Ship's Surveyors (Lloyds/ABS/BV) not available at Jorf Lasfar.

Agents will arrange for Surveyors from Casablanca to attend. I was able to get the Lloyd's Surveyor at Casablanca to extend vessel's "Safety Construction Certificate". It took 7 days.

Gangway/Deck Watchmen: Compulsory. Two per vessel, one for ship and one on the wharf. It was noticed that they do a 24 hour shift. It is not essential to victual them, but as there is food available, it would seem the best idea to feed them and get good co-operation and service. The watchmen are ex-seamen and understand English. Agent will sign the victualling voucher.

Hatches: Opening and closing by ship's crew.

Customs Allowances: 200 cigarettes and 750 ml spirits per man/per week. They will open the bond stores for further issue weekly. Cost of obtaining Customs Officials per week 600 Dirhams which is about U.S.$75.

Beer is not sealed.

If vessel's stay is to be an extended one, obtain permission and take out the required amount for the stay, on *arrival.* This will save you the charge each time the bond store is opened. The Agent only advised me of this after the first request for additional allowance.

Customs Officials will examine personnel and their baggage on leaving ship and returning from shore.

Cargo Gear: Discharge was effected by shore gear, as our vessel is a gearless vessel.

Grabs were used, of which there were 8. They leak like sieves. ("Note of Protest" for loss of weight/quantity was served on receivers). The grabs are not the automatic open release type. They were landed on the hopper steel framework to effect release. The crane hooks were not moused, thus several times the grab wires came unsecured.

6 hoppers, the sides were not high enough, hence constant spillage.

A corkscrew type shaft, with an 8 in. tubular outer casing powered with a small electric motor at its head, driven by portable mobile electric generator, is used as a mini-elevator to load the grain which is dumped on the wharf into trucks and transported to the various consignees is one of the methods employed.

Cargo is also bagged from this stockpile on the wharf and carried and stacked on flat top trucks (240 bags per truck average) for delivery to consignees.

Canvas tarpaulins are used to cover the grain, in the event of rain.

We experienced 2 heavy downpours lasting about 3 to 5 hours, when pools and deep puddles of water developed (Berth No. 10), and 2 to 3 light rain periods lasting about 1 hour.

Include in your protest on arrival "Ship not responsible for damage due to discharge in wet or inclement weather, or for contamination and deterioration". This will be accepted by the receivers without question.

Direct loading from grab to hopper to trucks is also carried on. There is no weighbridge for weight checking.

Also see "Port Nador" – "Report, January 1984".

Repatriation: Crew members are able to join vessels or be repatriated.

Visas are required for certain citizens, whose country of domicile do not have diplomatic reciprocal consulates. Therefore please check before effecting any crew replacement.

On arriving at "Mohammed V" Airport at Casablanca, Immigration Authorities will endorse your passport with an entry permit. Cable or advise Agent the flight number and request Agent to assist in Immigration entry facilities.

You will have a baggage check at the airport.

When cleared you have to proceed to El Jadida where the Immigration will again endorse your passport. You will possibly have another baggage check at Customs in El Jadida and then proceed to Jorf Lasfar. This is because Jorf Lasfar is outside the jurisdiction of Casablanca.

Airport: "Mohammed V" Airport is situated approximately 35 km. from Casablanca, allow 45 minutes driving time from the heart of the city. The airport is serviced by a great many airlines, to name but a few, Royale Air Maroc, Iberia, Air France, Sabena, K.L.M., Swiss Air, Aeroflot, Lufthansa, British Airways, Iraqi Airways, Kuwait Airways, Libyan Arab Airlines.

Internal domestic flights are available to Agadir (on the coast), Marakesh and Ouarzazate (inland), Rabat the capital city of Morocco and Tangier.

There is no airport at Jorf Lasfar.

Time: GMT. No changes.

Holidays: There are 5 official governmental holidays.

There are 3 religious holidays (movable dates).

New Year's Day (English calendar).

On the above days "No Work is performed". This is questionable as we did work and sail on May 1st (Labour Day), which is one of the supposedly official holidays.

Police/Ambulance/Fire: As yet there are no facilities available at the wharf in Jorf Lasfar. There are facilities at El Jadida 25 km. away.

No assistance will be afforded the Master if he wishes security escort or Immigration facility for discharging crew members who are being dismissed for offences aboard ship, and have to be lodged in hotels prior to repatriation. They will only assist if there has been criminal assault on board.

Emergency Co-Ordination Centre: None available at Jorf Lasfar. The Agent is your co-ordinator.

Telephones: None at all available on ship, or wharf, at time of visit.

Also see "Medical".

Overseas calls are possible from the Post Office at El Jadida or some of the 4 or 5 star hotels at Casablanca. There are no direct dialling facilities. Connections are made through Paris.

I had difficulty contacting my Owners at Singapore, so had to use the telex from the hotel and request them to call me, which did not take long.

Services: None available at Jorf Lasfar. Casablanca is the nearest town to offer facilities for radio and radar repairs, through the Agents.

Banks: None available at Jorf Lasfar. "Banque Credite Maroc" operates in El Jadida. Casablanca is the nearest city to offer any facilities for transactions.

Storing: Vessels can be stored by truck.

No barges available. No launches available, only the pilot launch. In due course when the port becomes fully operational storing from barge on the offside will be possible with ship's gear.

No regulations in force regarding storing at present.

Trucks can proceed alongside ship at the berths.

Fork lift trucks (2 available – 3 ton) belonging to the port. 1 front end loader rubber tyre was available.

Customs Regulations: Ship's machinery, spare parts, deck stores, goods shipped from overseas, are subject to Customs clearance.

VERY IMPORTANT: Declarations/invoices *must* be in the French language, proper, clear and precise nomenclature for *every item,* with the cost per individual item.

e.g. It took 9 days to clear a container (LCL) containing equipment for the installation of "Halon 1301" after the container was landed at Casablanca to be delivered to ship's side.

Shore Leave: Shore leave is permitted for ship's Officers and crew. Passes are issued by the Immigration Authorities, after the vessel has berthed.

You must be in possession of your Pass when ashore.

If intending to stay at an hotel in El Jadida or Casablanca take your passport to check in at the hotel, as without it, you might not gain entry. Your passport will be held at the reception desk until account settled prior to checking out.

There is no way to obtain a taxi *from* the port.

Cargo transport trucks, initially offered crew transportation to El Jadida or Casablanca. Transport is available (taxis) from Casablanca or El Jadida, to the ship. Cost varies (day or night). Normal fare: El Jadida to ship 50 Dirhams (U.S.$6). Casablanca to ship 350 Dirhams (U.S.$42). Small mini-taxis are available for short distance transport in Casablanca. They do not have meters, 10 Dirhams seem to be the normal fare, for reasonably short distances.

"Siesta Time" is from 1330 to 1500 hrs. Business Houses (offices) close from 1300 to 1430 hrs. Working hours from 0830 to 1300 hrs. and 1430 to 1830 hrs.

Hotels: Casablanca: Several from 3 star to 5 star and prices range from 135 – 300 Dirhams for a single. Hyatt, 500 – 600 Dirhams. Consult tourist guide for information.

El Jadida: 2 hotels, the "Salam" and "Dounia", on the beach front. The former is more modern.

Sunbathing and swimming permitted in and around the hotel swimming pools. Tennis courts, volley ball, archery, horse riding, indoor dance and disco.

Identity Cards: See "Shore Leave".

Regulations: No regulations as yet promulgated by the Port Authority. A Harbour Master was appointed 1 week before we sailed.

As mentioned earlier Pilots are ordered by the Agent and come from Casablanca. The Harbour Master will not be doing pilotage.

Delays: We had none, having berthed on arrival. However, I would expect some delay if the wharf area has not been cleared from the previous vessel's cargo.

Weather: April: During the vessel's stay in port, strong winds Beaufort Force 7 were logged, coming from a West to W.N.W. direction. Winds backed to South and East, Beaufort Force 5. Heavy rain showers accompanied the winds. Temperatures ranged from 15°C at night to a maximum of 25° – 27°C during the day. Heavy dew after sunset.

Agent: The Charterers and Owners both used the services of the same Agency.

Lasry Maroc, 30 Avenue de l'Armee Royale, Casablanca. Telex: 21949, 21092. Tel: 31.38.75, 31.19.54. Cables: Jolasry.

The above Agent has an office equipped with telex and telephone facilities at El Jadida.

Lasry Maroc, 2 Rue William Redman, El Jadida. Telex: Jolasry 78990 M. Tel: 3276, 3370. Cables: Jolasry, El Jadida.

Note: 1. The telex number at Casablanca we used was Sagnav 24646 M.

2. The telephone numbers at Casablanca shown above are those printed on Agent's visiting cards.

SHIPMASTER'S REPORT: April 1988.

We were contacted by the pilot from the pilot station at El Jadida. Pilot boarded the vessel one mile off breakwater. Due to heavy swell, a good lee has to be provided for the pilot vessel. Breakwater lights were found to be working, but the light (Occ.W.R.10, 6M.) was not functioning. 2 – 3 tugs are available for assistance. There are 2 mobile cranes fitted with grabs at Berth No. 4. Each grab discharges about 8,000 tonnes per day. Heavy surging of the vessel takes place alongside and continuous attendance to moorings and gangway is required. Gangway has to be rested on uneven surface of the wharf. Fresh water is available alongside at a cost of U.S.$1.00 per ton. Nearest place for provisions, medical assistance, etc., is El Jadida, which is about 25 minutes drive by taxi and costs U.S.$30.00.

AUTHORITY: Capitainerie du Port de Jorf Lasfar, c/o Direction Provinciale des Travaux Publics, El Jadida, Morocco. *Tel:* 03-34-54-20. *Telex:* 78982. *Contact:* Captain Med Rabaz, Harbour Master. Mr.Rochi, Port Director (ODEP). Mr.Trami Med, Port Director (T.P.). Farid Warrak, Governor of El Jadida.

KENITRA: 34.17 N. 06.30 W.

Situated on the left bank of the Oued Sebou, 17 km. from the Atlantic.

PILOTAGE: Pilotage is compulsory for entering and leaving port. Vessels must wait outside the port entrance for the tide. It is possible to enter from 2 hours before until 1 hour after HW during the night, and from 3 hours before until 2 hours after HW during the day. The Pilot boards vessels at river mouth. The Pilot will be on station 2 hours before HW.

On arrival at the Roads or after 0830 hrs., call the Pilotage Department and advise arrival time at the Roads and draft. Pilotage Department on VHF Channel 16 and 2182.

RESTRICTIONS: From the mouth of the river up to the port is a dredged channel. Depths are 4.20 m. during neap tides and 5.40 m. during spring tides. Height of tide during neap tide is 2.60 m. Height of tide during spring tide is 3.80 m. The constant is 1.60 m.

During the Winter it is recommended to stay outside the port in strong squalls. Ships are advised by Kenitra Port Radio of the possibilities for entering port.

Between November and April there is a total of 6 or 7 individual days when the port is closed to navigation, due to weather conditions.

Vessels are berthed and unberthed in daytime only at present time.

RADIO: Messages to ship's Agent should be sent through Casablanca Radio. In the ETA message to Agent, also advise vessel's draft. There is a radio station at Kenitra for port use only. Watch-keeping hours are only during HW, on 2182 kHz.

TUGS: Two tugs of 250 h.p. and one of 130 h.p.

BERTHING: The outer port used only by trawlers, and a mooring quay of 360 m. length belonging to the Royal Moroccan Navy. The length of main quay is 870 m. and includes 10 berths. In addition to the above there is a jetty for wine vessels, and a jetty for oil tankers.

FRESH WATER: Supplied alongside the quays.

FUEL: There are supplies of diesel oil, gas oil and petrol in the port. These products supplied by tanker lorry along the quay.

CONSULS: The Consular representatives at Kenitra are those of Belgium, France and Portugal.

REPAIRS: There are workshops for small running repairs in the port. There is a slipway for ships up to 400 tons.

AIRPORT: The nearest commercial airport is that of Rabat-Sale and there is a small airfield at Kenitra.

TIME: GMT. No changes.

AUTHORITY: Port of Kenitra, B.P.23, Kenitra, Morocco. *Telex:* 91952. *Contact:* O. Ajebli, Port Director.

LAAYOUNE (El Aaiun): 27.04 N. 13.28 W.

LOCATION: Lighthouse at phosphate terminal in Lat. 27° 03′ 55″ N., Long. 13° 27′ 45″ W.

DOCUMENTS: See "Casablanca".

APPROACHES: There is a light located at the end of the bulk phosphate terminal in position Lat. 27° 03′ 09″ N., Long. 13° 27′ 07″ W. at the top of mineral silos, at a height of 180 ft. 1 flash every 5 seconds, range 10 miles.

There is also a fixed green light located at the Northern part of the terminal, range 10 miles, and a fixed red light at the Southern part of the terminal, range 10 miles.

The phosphate terminal installations give a good radar target at a distance of 25 miles. Vessels approaching from the North should keep 10 miles off the coast until the pier is bearing 090° and then steer towards the pier.

At night the installation lights are always visible and with a clear atmosphere can be seen from 25 miles off the coast.

PILOTAGE: Compulsory. Pilot boards about 0.50 miles off the pier head.

ANCHORAGES: Good anchorages can be found in 10 fathoms of water. When waiting for the Pilot it is recommended to anchor 0.50 miles Westward of the pier. No shelter in strong winds. Service of powerful auxiliary boats is available when lying at anchor.

MAX. SIZE: Depth 17.0 m. at LWL at the phosphate terminal berth.

General cargo is handled at a berth 2 miles North of the Phosphate Pier. The berth is managed by "Odep Laayoune".

HEALTH: Valid Yellow Fever and Cholera Certificates are required. Otherwise, usual clearance.

RADIO: There is no coast radio station in Laayoune. VHF radio communication is being placed at the phosphate terminal to work on Channel 12.

Ships calling at the terminal are required to send ETA cables or telegraph 72, 48 and 24 hours prior arrival to "Phosboucraa Laayoune".

TUGS: 2 tugs, each 960 h.p., are available to assist vessels.

BERTHING: Laayoune Mineral Terminal located approx. 6.5 miles South of Laayoune City.

The terminal head is in a North-South direction. Vessels are moored alongside dolphins that cover the two loading stations for 40,000 and 20,000 d.w.t. ships. The loading pier has a height above water of 50 ft. and the dolphins approx. 20 ft.

Facilities consist of modern equipment available for handling phosphate in bulk at a loading rate of 4,000 t.p.h. in two of the stations, and 2,000 t.p.h. at the third. The phosphate is loaded by means of movable loading machines with telescopic spouts to permit perfect trimming.

No gangway to be rigged at this terminal. Communication from ship-to-shore is by means of elevator from the loading machines.

REPAIRS: No repairs can be effected at this port.

AIRPORT: Laayoune (30 km. from harbour).

TIME: GMT. No changes.

FUEL: No bunkers available.

PROVISIONS: Provisions may be obtained.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: No seaman's clubs, but two first class hotels with usual facilities.

CURRENCY: Moroccan Dirham (DHS). U.S.$ 1.00 = 8.87 DHS (30.4.91).

SHIPMASTER'S REPORT: November 1990.

Phosboucraa Ocean Terminal for Phosphate Loading: Chart: B.A. No. 863.

On a recent call to the above phosphate loading facility, the following observations were made:

The pier is about half a mile long, running North to South, with 3 berths, N.W., S.W., S.E. The N.W. Berth has been seriously damaged in a storm from the Southwest. The berth is closed and will not be repaired.

The Southernmost dolphin is isolated because the catwalk has fallen into the sea. Thus both the North and South light beacons are extinguished.

The vessel anchored 1.5 miles S.W. of the pier, and waited 24 hours for the swell to reduce to an acceptable level. The vessel was then placed at the S.W. Berth, using the port anchor with 7 shackles on deck, and picking up a heavy buoyant sea-line on the port side aft. The Pilot asked for 4 head lines to the Northerly dolphin, and three to the dolphin aft, no back springs required. The largest vessel to berth was 233 m. long, with a beam of 33 m., i.e. about 70,000 d.w.t.

The position of final mooring was with the vessel some 6 ft. to 15 ft. clear of the four steel breasting dolphins. Of these only the third from North had wooden cladding on it, the others were bare steel. The bearing area is pivoted and bears against a small section of rubber buffer. These dolphins are the last ditch defence of the concrete pilings on which the quay stands.

The berth has 2 telescopic extending booms, pivoted from the inboard end. The forward end is carried on a carriage around an arc, giving a wide range of movement. The booms are currently capable of 1,200 tons per hour. However, the vessel was not positioned correctly, and Holds No. 1 and 4 could not be properly centralised.

The Loading Foreman took station in the centre window of the wheelhouse, with walkie-talkie communications to the boom drivers and the shore plant. There were 3 foremen initially, and the Loading Foreman asked for a cabin for their use. They were given use of the Pilot Cabin as they were working nearby in the wheelhouse. They were fed on board.

Access was by means of a "two man cage" lowered from the loading boom onto the deck. Thus for a shift change, the 'new' foreman lowered the cage for the 'old' foreman and hoisted him up. Then the 'old' foreman lowered the cage for the 'new' foreman onto the deck, before stowing it at the boom position. Thus little chance of casual boarders visiting the ship. The pier has a permanent garrison of troops bivouaced on it. No shore leave is normally allowed, in special circumstances, visas have to be obtained from the local military commander.

The inspection party comprised Charterer's Agent, Owner's protecting Agents and 5 officials (Customs, Health, etc.). 7 Crew Lists were required, otherwise as per Casablanca. On departure, there were 3 officials for the papers. No Port Clearance is issued, but an Export Manifest is issued. The American Immigration Crew Lists were sent to the Embassy in Casablanca for processing.

The prevailing current sets across the wharf by 20° – 30°, which puts a heavy strain on the sea-line. The rapid changes of trim, and equally rapid changes in direction and height of swell can 'upset' the balance of the moorings in only a few minutes.

The vessel was moving in a constant "cork screwing motion" throughout the time on the berth, rising and falling 3 ft. – 8 ft. against the loading boom, and rolling 5° – 10°.

Several times the ship set down onto the 4th dolphin from North, and rubbed steel to steel. Damage was suffered when the dolphin got under the main deck multi-roller fairlead, breaking the welding and buckling the brackets.

While trying to heave in the sea-line, yet one more time, the deck eyebolt pulled out when holding 2 stoppers. One seaman was caught across the hand by the sea-line as it jumped, he subsequently fainted from shock. Possibly 30 ft. of sea-line was hove in during the loading. *This was in good weather with winds of Force 3 or less from the N.W.*

Ship's engines must be at short notice to leave the berth, if the wind or the swell become dangerous. The berth is very dangerous with wind and swell from the S.W. There are two dangerous wrecks reported to lie 2 miles West and Northwest of the main pier.

The vessel was unable to obtain a British, Spanish, French or American chart of the port of Laayoune in Spain or Casablanca.

A request was sent by radio for a 'Draft Survey' to be conducted on Owner's Account. The advice was that no such independant service was available, and the cargo was sold on 'sellers measurement'.

At the draft check it was found that the shore scale had apparently underread by nearly 1,000 tons or 2%. A run of 800 tons was asked for, but in fact the ship may have received 1,060 tonnes. This effectively removed any safety factor for the restricted draft at the discharge berth. Density was found to be 1028 – 1029.

The Loading Foreman, Chief Officer and Duty Officer made independant readings of draft at 6 points, with wave heights of 4 ft. across the figures as the ship continued to corkscrew actively.

The Bill of Lading was made out for the cargo tonnage shown by the draft check, with 'Quantity and Quality unknown', as endorsement.

Disbursement Account and Demurrage Statement was endorsed "Subject to Owner's Approval".

On sailing it was intended to take up the slack of anchor chain, put the sea-line on the bitts, and then single up to one line each end. Unfortunately the forward dolphin let all lines go at once.

The ship was hove forward and outward by the windlass, and holding onto the sea-line. However, the sea-line became so tight that it was dangerous to approach, and a "Dead Slow Astern" was needed to take the weight off it. It is a remarkably long line. Altogether the sailing was a tense period. A tug stood by on arrival and on sailing.

Fuel and water are not available. Any provisions or spare gear would need to be delivered by boat on the offside, due to the movement of the ship.

It was 60 hours from "finish with engines" until "stand-by main engines", with some 5 hours for electrical power failure (when the ship could not have sailed with booms extended over the ship), for 47,000 tons.

The concrete piers are showing signs of wear and stress from the heavy battering from the S.W. gales each Winter. I understand that in the future a new port will be built, and this terminal abandoned. The conventional wisdom is that in Summer months it is not an unreasonable berth, but in Winter there is much waiting for sea and swell to subside.

AUTHORITY: Phosboucraa – Laayoune, B.P. 76, Laayoune, Morocco. *Tel:* 9-36-28, 9-36-29, 9-36-30. *Telex:* Phostel 26614, Fosayoun 26769. *Contact:* Port Manager.

MOHAMMEDIA: 33.45 N. 07.22 W. (See Plan)

DOCUMENTS:
Bill of Health.
Derat Certificate.
8 Crew Lists.
3 Passenger Lists.
3 Provisions Lists.
Ship's Certificates.
Personal Effects Lists.
Cargo Documents.
Dangerous Cargo List.
Clearance from Last Port.

PILOTAGE: Compulsory for vessels entering or leaving the harbour or shifting berth. Pilot may be contacted on VHF Channels 16 and 11. Pilot Station. Tel: (03) 32-47-91.

ANCHORAGES: For vessels entering the basin, 3 good anchorages in depths of 11 to 6.5 fathoms about one mile N.E. of the entrance.

RESTRICTIONS: Vessels with a draft over 15 ft. wishing to berth in the basin are obliged to wait for tide. No berthing at night time. Vessels may leave day and night, except gas tankers. All movements in the basin to be effected when conditions are favourable.

MAX. SIZE: *Basin:* Max. LOA 120 m. Max. draft 6.7 m. (22 ft.).

New Terminal: Berth A: Tankers up to 100,000 d.w.t. Max. draft 16.0 m.
Berth B: Tankers up to 150,000 d.w.t. Max. draft 17.0 m.

Sealine: Mooring buoy removed. Berths not in use.
Berth No. 1: Tankers up to 100,000 d.w.t.
Berth No. 2: Tankers up to 120,000 d.w.t.

HEALTH: Port Sanitary Control Officer boards immediately after arrival for Pratique delivery. In the event of any suspected disease or fever on board, it is necessary to advise by radio to Agent 24 hours before arrival. Pratique is automatic after calling at another port of Morocco.

RADIO: Casablanca Radio Station.

TUGS: 3×2,600 h.p. and 1×700 h.p. available day and night. Additional tugs, if necessary, can be ordered from Casablanca which is 16 miles away.

BERTHING: Vessels up to 120 m. in length and drawing up to 6.7 m. (22 ft.) at Spring tides and 5.4 m. (18 ft.) at Neaps.

Quay No. 1 has a length of 70 m. with a depth of 7.0 m. (23 ft.).

Quay No. 2 has a length of 170 m. with a depth of 6.20 m. Max. LOA 120 m. Max. draft 6.0 m.

Quay No. 6 has a length of 60 m. with a depth of 6.10 m. Max. LOA 90 m. and max. draft 6.0 m.

MEDICAL: There is the hospital and clinic in Mohammedia. Vaccinations can be arranged.

TANKERS: New terminal in position Lat. 33° 43′ 45″ N., Long. 07° 23′ 24″ E. for crude oil, LPG and naphtha.

Diameter to swinging area 1,000 m. Vessels may be berthed in day time only but can sail at night. Mooring is effected with 20 nylon ropes (8 head/stern lines, 4 breast lines and 8 spring lines). Wires may also be used but must have nylon tails, length of each wire to be 200 m.

Connections: Berth A: Length of berth 260 m. Minimum LOA 180 m. Three discharging arms of 12 in. diameter (maximum pressure 15 Bar), one loading arm of 8 in. diameter and one deballasting arm of 8 in. diameter.

Berth B: Length of berth 260 m. Minimum LOA 190 m. Maximum LOA 290 m. Three discharging arms of 16 in. diameter for crude oil and 2 discharging arms of 12 in. diameter for LPG.

Also see "Shipmaster's Report" and "Chief Officer's Report".

DENSITY: 1025.

FRESH WATER: Water can be supplied at any time in the basin and at the new oil terminal.

FUEL: Available from Casablanca at 48 hours' notice.

FIRE PRECAUTIONS: All tankers are confined by gates and watched over by special firemen.

CONSULS: There is no consul in Mohammedia. All are in Casablanca.

GANGWAY/DECK WATCHMEN: Watchmen are recommended.

OPENING/CLOSING HATCHES: This work is normally carried out by crew. When carried out by stevedores the cost is charged.

AIRPORT: The nearest airport for international flights is Mohamed V (Casablanca).

TIME: GMT. No changes.

HOLIDAYS: 1st January; 1st May; 3rd March; 23rd May; 9th July; 14th August; 6th and 18th November; and any other religious holidays which are not at regular dates.

POLICE/AMBULANCE/FIRE: Police, 44.66; Ambulance/Fire, 15.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Passport and Police Permit required for leaving the harbour.

GARBAGE DISPOSAL: Available.

WASTE OIL DISPOSAL: Available. Contact Port Authority. Tank capacity: 3×5,000 cu.m. – 15,000 cu.m.

SEAMAN'S CLUBS: None.

CURRENCY: U.S.$ 1.00 = 8.90 Dirhams.

CHIEF OFFICER'S REPORT: (L.P.G.) May 1987.

Charts: BA. Charts No. 3257 and 806.

Anchorage: The anchorage used was that indicated on BA. Chart No. 806. This anchorage being 1 mile off the outer leading lights and in 10 fathoms of water. There are unlit mooring buoys off the outer mole.

Pilotage: The Pilot boards from a black hulled launch off the inner harbour. Communications with the Pilot are on VHF Channel 11.

Berthing: Vessel berthed at the first berth inside the harbour on the starboard side. One tug is used to push the bow around to enable vessel to berth port side to with the bow out. The pilot boat runs the head lines to buoys. Vessel secures with 2 lines and 2 springs. The maximum draft at the berth is 20 ft. and the clearance is about 2 ft.

Berthing and unberthing is carried out at high water and in daylight hours only.

Ship's gangway used.

Cargo: A small arm 4 in., 300 ASA, is connected and disconnected by shore personnel.

Ethylene discharge at the berth (temperature −102.5°C). 3 pumps used with air back pressure of 3 Bar. Average rate of discharge 170 tonnes per hour.

Difficulties can be found when starting due to auto valve in shore line which closes in when the shore tank pressure is high. Pumps then trip out on low amps.

Ideally, vessel should start with 1 pump for 30 minutes so that shore can ascertain pressures.

Shore tank capacity 3,000 tonnes. The dewpoint was checked but no samples were taken.

There are 2 reliquefaction plants at the terminal.

Customs: The bond is sealed.

General: It is about 15 minutes walk to the town. There are a few small shops outside the gate which sell fresh vegetables and fruit, etc.

The fresh water supply on the quay is metered.

SHIPMASTER'S REPORT: (L.P.G.) April 1988.

Chart: B.A. Chart No. 860 and 861.

Port: Mohammedia. In some publications the port is known as Port Fedala.

Pilotage: The pilot boards from a black hulled launch off the inner harbour (Jetty Nord).

Pilot can be contacted on VHF Channel 11.

Anchorage: The anchorage is that indicated on B.A. Chart No. 861. Vessel anchored one mile NW of Point Sidi in a depth of 19.0 m. This anchorage was exposed.

The inner anchorage is about 0.5 miles N.E. of Jetty Nord but is very restricted.

Tugs: 3 tugs available. 1×3,000 h.p., 1×2,500 h.p. and 1 small pusher tug of 500 h.p.

Berthing: Vessel berthed at Berth No. 6 to discharge ethylene. Maximum draft over the bar is 6.6 m. at HW. Berth No. 6 accepts vessels up to 90.0 m. length. Depth at the berth is 7.0 m. at LW.

One tug used for berthing, ship's line. The tug pulls the vessel's bow round to starboard off the berth and vessel berths port side to, head out. The pilot boat runs the headlines to the buoy. Moorings forward consisted of 2 headlines and 3 springs. Similar moorings required aft.

Berthing is carried out during daylight hours only and at or near to high water, depending on draft. Berthing is carried out with a wind force up to Force 5.

Departure depends on draft but usually 3 hours either side of high water.

Ship's gangway used.

Berth No. 1, which is just West of Berth No. 6, handles vessels up to 125.0 m. LOA with a maximum draft inward of 6.6 m. The depth alongside the berth is 8.0 m. at low water. Berth No. 1 is used for chemical handling.

Cargo: Ethylene is discharged through 1×4 in. 300 ASA arm. Shore personnel connect and disconnect arm. The best discharge temperature is –102.5° C. The pumping rate varies with the temperature and ranges from 170 t.p.h. to 60 t.p.h. if the discharge temperature is high. The auto valve ashore closes if the temperature rises. The ethylene storage tank is a short distance from the berth and holds 2,800 tonnes. The tank is cooled to –103° C by vapour boil – off pumped by two Sulzer compressors to VCM production tank some distance away.

The discharge pressure again varies as temperature, but at full rate, back pressure was about 3 Bar.

When discharging, it is advisable to use one pump for about 30 minutes so that the shore can ascertain pressures. Trouble can be found when starting, due to the auto valve in the shore line, which closes when shore tank pressure is high, pumps then trip out at low amps.

About 1,500 tonnes of ethylene is imported each month.

Customs: The bond is sealed.

Shore Leave: Shore passes are issued, these are to be returned prior to departure. There is a guard on the gate.

General: It is about 15 minutes walk to the town.

The exchange rate for the Pound Sterling on our visit was 14 Dirhams to the Pound Sterling.

There are a few shops outside the gate which sell fresh vegetables, fruit, etc.

Fresh water available on the quay and is metered.

All services are available from Casablanca which is about 15 miles to the South.

Doctor available locally.

Developments: There is a new jetty for tankers inside the new outer breakwater. There are 2 berths for handling of LPG, chemicals, Naphtha and crude oil through Chicksan arms. Vessels berth head out.

SHIPMASTER'S REPORT: December 1988 (Updated 1992).

The following is an update of the Shipmaster's Report, dated April 1988.

Tugs: An additional tug of 2,500 h.p. is available.

Large tankers berthing at the Outer Harbour may require the assistance of an additional tug from Casablanca.

Berthing: Additional spring lines required if there is a large swell.

Daylight berthing only for LPG carriers. Product carriers berth between 0500 hrs. and 2000 hrs. Time depends on draft, but usually at or near HW.

Vessels at Berth No. 6 can sail at any time, depending on draft, but generally 3 hours either side of HW.

Pilot often unavailable between 2200 hrs. and 0600 hrs. (in December 1988 we sailed at 0100 hrs.).

Berth No. 1 used for chemicals and refined products.

Berth No. 2, inside of Berth No. 1, is used for refined products and loading salt. Depth about 7.0 m.

Cargo: Chicksan cooled with ship's condensate.

Watchman: Onboard throughout vessel's stay.

Officials: No Clearance at anchorage. In rare cases, crew changes are permitted at the anchorage.
Time: Summertime, GMT plus 1 hour, from June to September.
Airport: About 30 minutes by motorway to airport which is S.E. of Casablanca. West Europeans need "Negative Visas".

SHIPMASTER'S REPORT: October 1989 (Updated 1992).
Documents Required:
5 copies Crew List.
2 copies Stores List.
2 copies Crew Declaration List.
Cargo Manifest and Cargo Documents.
Pilotage: Pilotage is compulsory for tankers entering or leaving. Pilot boards about 2 miles N.W. of the breakwater in a pilot boat with "Pilote" written on the sides. Pilots keep watch on VHF Channel 11.
Anchorage: It is advisable to drift West or Northwest of the breakwater while vessel is awaiting berthing instructions as the holding ground is poor. Many ships have lost both anchors as the anchorage area is exposed to weather.
Restrictions: Berthing of tankers is carried out in daylight hours only. Vessels can sail anytime.

Vessels do not berth when the swell height is more than 3.0 m.
Tugs: Normally, 5 tugs are employed for berthing. The 3 small tugs belong to the Harbour Authorities (ODEP) and 2 tugs (one each tied up forward and aft with tug's line) of 2,500 b.h.p. each belonging to "Offshore Maroc". Tugs join vessel Eastward of the breakwater. Sufficent Notice of Arrival must be given to the Agent as these 2 tugs come from Casablanca.

During the months of December, January and February, a considerable amount of surging of the vessel is experienced while alongside due to an enormous amount of swell that builds up inside the breakwater. During this period, it may be necessary to employ at least 2 tugs to keep vessel alongside, otherwise the mooring ropes part.
Breakwater: The breakwater extends about 2,800 m. into the sea. (See "Plan").
Berthing: At present, 2 jetties are in operation:

Jetty "A": For tankers from 15,000 d.w.t. to 100,000 d.w.t.
Max. length of tanker 260 m. (Minimum 180 m.).
Max. draft 16 m.
3 × 12 in. Chicksans for discharging oil products.
1 × 8 in. Chicksan for loading naphtha.
1 × 8 in. Chicksan for receiving dirty ballast.

Jetty "B": For tankers from 25,000 d.w.t. to 150,000 d.w.t.
Max. length of tanker 290 m. (Minimum 190 m.).
Max. draft 17 m.
3 × 16 in. Chicksans for discharging crude oil.
2 × 10 in. Chicksans for discharging oil products.

There are plans to build 3 more jetties with a total wharfage of 470 m.

The ship's head is 044° when secured to the jetty.

The dirty ballast receiving facility can receive 15,000 cu.m. of dirty ballast.

There are 10 dolphins for securing vessel at each berth and vessel is moored with 4 head lines and 4 stern lines, 2 breast lines and 4 back springs forward and aft.
Fresh Water: Connection available on the jetties and there is no restriction on the amount of water that can be taken.
Gangway/Deck Watchmen: 3 deck watchmen belonging to a private company are necessary.
Identification Cards: I.D. cards are issued by the Immigration Authorities and are required for seamen going ashore. It is advisable to send the Crew List in advance to the Agent.
Shore Leave: Crew members wishing to go ashore have to walk about 2.5 km. to the main gate. There is no transport provided by the terminal up to the main gate. From the main gate, taxis and buses are available to go either to Mohammedia town or to Casablanca.

AUTHORITY: Office d'Exploitation des Ports, Direction d'Exploitation du Port de Mohammedia, B.P. 98, Mohammedia, Morocco. *Tel:* 32.47.92, 32.40.76, 32.40.77, 32.40.78. *Telex:* 22969 M. *FAX:* 32.40.75.
Contact: Commandant de Port.

PORT NADOR (Beni Enzar): 35.17 N. 02.56 W.

SHIPMASTER'S REPORT: November 1979.

DOCUMENTS:
6 Crew Lists.
3 Stores Lists.
Vaccination List.
PILOTAGE: Compulsory. Pilot boards off the breakwater and requires 1 hour's notice.
ANCHORAGE: About 0.5 miles N.E. of the breakwater.
RESTRICTIONS: Vessel is able to enter and leave at any stage of the tide, day or night.
MAX. SIZE: LOA 500 ft. (approx.). Max. draft 8.5 m. (approx.). Size of vessel limited by swinging room. Underkeel clearance of 1.5 m. required.
RADIO: Nador Radio.
VHF: Port Authority and Pilot on Channel 16.
TUGS: One tug of 600 h.p. An additional tug of 1,500 h.p. may be available.
BERTHING: *Berth No. 1:* The berth is close to the entrance and the max. size permissible is approximately 400 ft. LOA and approximately 8.5 m. draft. The least depth in the channel from sea to the berth is 13 m. The nature of the bottom at the berth is sand and mud and the density is 1025.

Cargo Facilities: There is 1 ore loader for small vessels. There are 4 mobile cranes with safe working load of 6 tonnes. No Ro/Ro facilities. There is ample mechanised equipment for handling palletised cargoes. There is storage space for break-bulk cargoes and storage for palletised cargoes, however, there is little covered space. There is no equipment for handling containers and there is no storage space for containers as there is no hard ground.
FACILITIES: The following are available: fresh water, fresh provisions, small repairs, small machine shop, airport (at Oudja 140 km.), Lloyd's Surveyor, Salvage Surveyor, laundry service, doctor and hospital, groceries and meats.
CONSULS: Spanish Consul located in the port. British and French Consuls at Oudja.
TIME: GMT. No changes.
GENERAL: Port Nador is situated next to Melilla, and the same entrance between the breakwaters is used for entering, although both ports are run entirely separately, Melilla being Spanish and Port Nador being Moroccan. The Moroccans are sure that Melilla will soon be theirs, then it will become one large port.

The port under construction is to have 14 berths, at the moment there are only 2 berths working, both of which are only partially completed. The only shed constructed is used for palletising and storing fruit.

Maximum intended draft when all is completed will be 13 m.
DEVELOPMENTS: Port construction is taking place at the present time and eventually 14 berths will be available and when this is completed Melilla and Port Nador are expected to become one port. There will be 1 oil/mineral berth with depth of 12.5 m., 2 berths with 8.5 m., 1 berth with 6.5 m. and 1 berth with 5 m. in the initial stages.

REPORT: Dated September 1980.

This port is still under construction but for the last 2 years has been open for trade of iron ore, lead and citrus fruit (seasonal). There are 3 piers now in use as follows:

Mole No. 1 (S.W. side) for the shipping of iron ore.
Mole No. 2 (N.E. side) for lead and general cargo.
Mole No. 2 (S.W. side) for citrus fruit.

The N.E. side of Mole No. 1 will also be for minerals but is still under construction.

REPORT: January 1984.
Ships have discharged on voyage charter at Nador on two occasions with similar experiences in the discharge of grain. Ships berthed at an open quay and the cargo was 'dumped' by portable cranes of light construction which are fitted with anemometers, in an area too far from the side of the ship to allow the use of ship's cranes. When the wind reaches Force 4 it is considered too dangerous to continue discharge and work ceases.

Charterers claim that work is stopped by the Port Authorities and that such time lost does not count as laytime, claiming it is a non weather working day.

This method of discharge is used because of a shortage of lorries, which, if they were available, could be loaded using ship's gear alongside the ship during such stoppages for wind.

Whilst no delays have been experienced at the port of Jorf Lasfar, the Master informed us that the same method of discharge was used at that port.

Owners should endeavour to protect themselves when fixing business which is likely to include discharge at this port as the wind seems to reach Force 4 on many days and a lot of time is lost resulting in costly delays.

SHIPMASTER'S REPORT: December 1989.

On arrival at Port Nador all Passports for non-Moroccan crew were taken ashore by a representative from the Immigration Authorities. A non-Moroccan crew member wanted to go across the border to Melilla (the Spanish part of the harbour) and therefore wanted his Passport back, he was told by the Agent that the Passports would not be released until time of departure, in exchange for the shore passes issued on arrival.

When the Master spoke to the Agent to try to find out what the problem was, he was told that if we wanted to go to Melilla, we should have informed the Agent/Authorities on arrival, in order to have our Passports processed.

No laundry service available in the Port of Nador.

AUTHORITY: R.A.P.C.

SAFI: 32.19 N. 09.12 W.

DOCUMENTS: Clearance procedure is very simple. 3 Crew Lists, 1 Personal Effects Lists, 3 Passenger Lists and 1 Stores Lists only are required. Other documents are presented on berthing.
PILOTAGE: Arranged by vessel's Agent, to whom a correct ETA should be given. There is VHF radio contact with the pilot station and Harbour Master's Office. The pilot boat is located inside the harbour and the Pilot boards in position Lat. 32° 19' N., Long. 9° 16.1' W. Pilot ladder only is required.
ANCHORAGE: Recommended anchorage is S.W. of harbour entrance. Safe holding ground for 25,000 d.w.t. vessels. Vessels should keep port entrance clear.
MAX. SIZE: Vessels with a draft of more than 28 ft. and up to a max. of 30 ft. enter and sail at high water.
Also see "Shipmaster's Report".

HEALTH: Health Officer boards shortly after berthing but Agent must be advised before arrival if suspected disease or fever on board. Health clearance in one Moroccan port holds good for the next.
RADIO: Casablanca Radio for normal traffic or Safi Radio for local R/T traffic. Harbour Radio VHF Channel 16.
TUGS: Tugs stand by vessel inside breakwater and, usually, ship's lines are used.
BERTHING: Vessels berth in order of arrival. Port used for export of manganese and barytes. No night entry after 1900 hrs.
STEVEDORES: Gangs are arranged by vessel's Agent. Night work is possible from 1800 to 2200 hrs. and, very exceptionally, until 2400 hrs.
MEDICAL: Advance notice of required medical attendance is advisable but not essential. Modern hospital and clinic are available. Vaccination is only necessary when vessels have called at cholera and yellow fever ports.
TANKERS: Only small tankers used in this port. White products and gas oil imported; no export. Ammonia tanker berth max. draft HW 30 ft.
DENSITY: Density varies between 1024 and 1026.
FRESH WATER: Availability not limited; by hoses from quay.
FUEL: Limited supplies gas oil; diesel available but must be stemmed. Fuel oil and large quantities diesel, gas oil can be delivered by tanking lorry from Casablanca.
CONSULS:

Denmark	Tel: 30.39	France	Tel: 27.97
El Salvador	Tel: 28.76	Portugal	Tel: 23.58
Finland	Tel: 31.40	Sweden	Tel: 29.06

REPAIRS: Major repairs not possible; small workshops only for repairing fishing boats.
GANGWAY/DECK WATCHMEN: Watchmen necessary. One watchman day and night.
OPENING/CLOSING HATCHES: Normally done by crew but can be arranged by stevedores with advance notice.
CUSTOMS ALLOWANCES: 200 cigarettes, and one open bottle of spirit allowed each man. Bond is sealed and heavy fines are imposed by Customs for smuggling.
REPATRIATION: Repatriation by air or sea through Casablanca, 150 miles away.
AIRPORT: Nearest at Casablanca, served by principal European airlines.
TIME: GMT. No changes.
HOLIDAYS: On the following holidays no work is possible: 1st January (New Year's Day); 3rd March (Coronation Day); 1st May (Labour Day); 18th November (Independence Day). Other Moslem and Christian holidays are subject to last minute decisions as far as tariff is concerned, but work can be arranged.
TELEPHONES: No telephones can be placed on board. Public telephone available on the quay during working hours only.
SHORE LEAVE: Police permits are required by crew and are delivered by Immigration Authorities.
IDENTIFICATION CARDS: These are needed.
GENERAL: Masters are strongly advised to take local currency from their Agent. Landing of foreign currency encourages black market transactions and incurs confiscation and heavy fines as well as delays by the Customs Authorities.

SHIPMASTER'S REPORT: January 1983.
Max. Size: Maximum draft on entry was said to be 35 ft. (10.67 m.) on HW.

At Phosphate Wharf vessels loading to more than 8.8 m. must – due to berth/draft restrictions – work for completion on HW. Max. LW draft at inner end was given as 9.3 m. minus 0.5 m. for surge effect.

Air draft problems affect large vessels in ballast and it is advisable to keep tank ballast in until alongside.

Conveyor outreach limits can cause problems for wide beam twin hatch vessels.
Berthing: Restriction on night entry on longer vessels applicable. (This vessel sailed at 2300 hrs. on HW with a draft of 10.54 m. Pilot transferred to another large deep draft vessel which was to move into our berth after we cleared).
Stevedores: At Phosphate Wharf, 24 hour working to suit tides, via 2 conveyors each of capacity 750 t.p.h., weights found to be accurate.
General: Small amounts of foreign currency may be taken/used ashore; occasionally gate officials enter amount on back of landing permit.

Phosphate company generally require all final ships' paperwork to be signed in their office ashore.

AUTHORITY: Capitainerie de Port.

TANGIER: 35.47 N. 05.48 W. (See Plan)

PORT LIMITS: To the South by the coast and port installations and to the North by a line joining Pointe de Malabata and the Mouth of L'Oued el Youd.
DOCUMENTS: Required on arrival:
Health Declaration.
2 Crew Lists.
7 Cargo Manifests.
5 Lists of Passengers Disembarking.
4 Lists of Passengers in Transit.
Required on departure:
5 Cargo Manifests.
5 Manifests of Passengers Embarking.

PILOTAGE: Pilotage is compulsory for ships of more than 50 g.r.t. for entering, leaving and shifting in harbour. Departure possible throughout 24 hours, entry up to the last departure. Pilot on VHF Channel 16 throughout 24 hours. Vessels should advise arrival 6 hours and 1 hour in advance.

Pilot boards 0.5 miles North of head of breakwater.
ANCHORAGES: There are good anchorages to the East and Southeast of the breakwater head in depths of 10 m.–16 m.
RESTRICTIONS: The harbour area between the breakwater and the extremity of the main pier has a minimum depth of 9 m.
Wreck Buoy: It is very important that vessels keep the wreck buoy (35° 47.27′ N., 05° 47.05′ W.) on their port side when entering the port.
HEALTH: Apart from the international laws which must be obeyed, vessels coming from an infected area must send in advance (12 hours) a telegram to "Saniport Tangiers" describing the state of the vessel and persons on board.

Vessels having a sick person on board to be landed at the port must send a telegram as soon as possible to "Saniport Tangiers" with all details concerning the case to be brought ashore and await the corresponding reply.

Hospitalisation will be in a State hospital, or, if needs be, in a clinic. No disembarkation of a sick person may take place without the presence or ruling of the health authorities of the port.

Vaccinations necessary in case of need are carried out on the spot, and in accordance with the requirements of the OMS.

Evacuation of sick persons is effected by ambulance, either municipal or private, after having advised the Port Health authorities.
RADIO: Tangiers Radio listens on 2182 kHz and VHF Channel 16. Weather forecast at 0915 hrs. and 1630 hrs. GMT on 1911 kHz.
TUGS: The port owns 1 tug of 1,500 h.p. and 1 tug of 2,500 h.p. equipped with fire-fighting equipment.
BERTHING:

Wind: (October – May) W. and S.W., (May – October) E.N.E. (sometimes Force 8).
Swell: From the N.W. in Winter which creates fairly rough seas in the port.
Currents: Insignificant.
DEVELOPMENTS: 5 cranes on rails will be installed on the new mole in the near future. 7 mobile cranes will also be available.
AUTHORITY: Direction d'Exploitation du Port de Tanger, B.P.305, Tangier, Morocco. *Tel:* 360-40/45. *Telex:* 336-90. *Contact:* Port Director.

TAN-TAN: 28.29 N. 11.01 W.

The following is a translation of French Notices to Mariners.

The new fishing port of Tan-Tan is situated close to and to the S.W. of Cape Nachtigal. The main breakwater is 1,698 m. long, running N.E. for about 900 m. and then to the East towards the coast. The counter-dyke (230 m.) is perpendicular to the main breakwater at about 100 m. from its end. In the extension of the counter-dyke, and starting from the coast, the cross dyke is 548 m. long.

The port entrance faces S.W., the passage is about 100 m. wide between the ends of the counter-dyke and the cross dyke.

The port has 2 berths with 6 m. and 4 m. depth, one berth on the cross dyke and the other on the main breakwater. It also has a slipway 100 m. long and 50 m. wide.

Inside the port care must be taken when the winds are from West to North which produce a fairly strong undertow.

In October 1979 there were no lights or buoys. Arrival by day is recommended. A characteristic gap in the cliff and buildings to the N.E. of the port, together with a mountainous summit to the South will be seen. To the North of the main breakwater, the sea breaks over a barrier reef. Near the port the current runs Southwards.

Anchoring is possible in 12 m. – 13 m. of water, with sandy bottom and very firm, 1.2 miles to the W.S.W. of the end of the main breakwater. A shallow of 6.4 m. is located 0.5 miles to the West of the end of this breakwater.

VILLA CISNEROS (Dakhla): 23.42 N. 15.55 W.

DOCUMENTS: *Foreign Vessels*

Crew List.
Health Pratique.
Passenger List.
Cargo Manifest.
Safety Equipment Certificate.
Radio Safety Certificate.
Seaworthiness Certificate.

PILOTAGE: Pilot is necessary to cross the bar and for river navigation. Pilot joins at anchorage. Pilotage compulsory for all vessels over 50 g.r.t. Contact Pilot by radio-telephone, via Port of Villa Cisneros Radio operating on 2182 and 2626 kHz from 0800 to 1300 hrs. and from 1500 to 2000 hrs. GMT.

ANCHORAGES: In depths of more than 10 m. about 0.6 miles East of the breakwater head. This situation is well protected from swell from the S.W. but open to winds from the N.E. which are frequently strong creating difficult conditions for very small vessels. There are no mooring buoys.

Vessels loading transhipment cargo anchor in position with Punta Galera Light bearing 030°T, 1.2 miles off. The prevailing winds blow mostly from the North up to Force 3 with a long low swell mostly from a Northwesterly direction.

MAX. SIZE: Length 100 m., beam 12 m., draft 5 m.

HEALTH: Masters are required to complete a health certificate for the Port Captaincy declaring that the vessel has not called at any infected ports.

TUGS: None available, only one small launch which may assist.

BERTHING: Breakwater of 750 m. length extends towards the S.E., berths alongside the last 200 m., 1 concrete pier for small vessels, 3 small jetties enclosing 2 docks, can be used by vessels of medium size.

STEVEDORES: Employed by Port Authority and engaged by ship's Agent.

MEDICAL: Hospital available for any kind of medical attention; doctors and ambulance service available.

TANKERS: Moor at Jetty No. 2. Pipe-lines 4 in. diameter.

FRESH WATER: On the quays are 3 hydrants, capacity 3 t.p.h. and 4 of 2 t.p.h.

FUEL: Atlas Company can supply fuel subject to advance notice.

CONSULS: No local representation.

REPAIRS: Only facilities for very minor repairs.

OPENING/CLOSING HATCHES: Opened and closed by crew.

CUSTOMS ALLOWANCES: Crew are allowed to take only sufficient tobacco ashore for their own consumption. It is not permitted to take alcohol ashore.

REPATRIATION: Can be arranged provided that documentation is in order.

AIRPORT: Situated 1 km. from the port. 5 flights per week.

TIME: GMT is used all year round.

HOLIDAYS: Mohammedan Holidays: Aid el Queber (2 days); Aid el Mulud (1 day); Aid el Seguer (2 days).

POLICE/FIRE/AMBULANCE: Police Station situated 100 m. from the quays. Fire, Tel: 18. Ambulance, Tel: 17.

SHORE LEAVE: Allowed without restriction.

IDENTIFICATION CARDS: Seamen going ashore must take an identity card or a shore pass, issued by the Master.

NOTES

Please also advise Shipping Guides Ltd.

Mozambique

BEIRA: 19.46 S. 34.50 E. (See Plan)

PORT LIMITS: Vessels are considered to be "arrived ships" when they enter the pilotage area, i.e. when they enter within a radius of 5 miles from the pilot boat. The custom of the port is that vessels are in "Free Pratique" only when they have entered port and have been cleared by the Immigration Authorities. Immigration will only clear vessels in port.

DOCUMENTS:

Customs Clearance from last port.
Health Certificate.
8 Crew Lists.
8 Lists Passengers in Transit.
8 Lists Passengers Disembarking.
2 Stores Lists.
2 Lists Deck Stores.
2 Lists Cargo in Transit (main items of cargo only).
8 copies of Manifest of Beira Cargo.

Shipmaster's Report: March 1981.

Customs Clearance from Last Port.
Declaration of Health (Form Modelo No. 101-s.s.).
2 Sets Vaccination Lists.
7 Crew Lists.
7 Passenger Lists (with Passport Nos.)
2 Stores Lists (Lista De Mantimentos).
2 Crew Declarations (Company Form).
3 In-Transit Cargo Lists (Tonnage and Main Items) Company Form/Letter.
3 Hazardous Cargo Manifests.
Register of Entrance (Form DSM-079) (To Pilot).

Note: Shore passes issued at gate in exchange for Seaman's ID Card/Book. Radio Pratique not available.

PILOTAGE: Compulsory for all ships other than naval vessels. Ship's name, ETA and draft should be radioed via Beira Radio, call sign CRS, 24 hours in advance to Port Captain Beira and owner's Agent.

The pilot boat – black hull, grey upperworks, black funnel with white "P" – is stationed Lat. 19° 52′ 47″ S., Long. 34° 57′ 21″ E. Pilot boat call sign CRL H – W/T: listens on 500 kHz, replies on 480 kHz, – R/T: listens on 2,182 kHz, replies on 2,341 kHz. – VHF: Channels 16, 12 and 10 (plus most intership channels).

Unless instructed to the contrary by the pilot boat, vessels with a draft under 25 ft. anchor by "P" Buoy, 19° 52′ 47.3″ S., 34° 57′ 21.1″ E., and vessels with draft over 25 ft. anchor between "P" and "A" Buoys, 19° 56′ 20.1″ S., 35° 02′ 44″ E.

In bad weather pilot boat may leave above position and enter port. In such cases vessels should anchor as indicated above, weather permitting.

ANCHORAGES: At Bar, "P" and "A" Buoys as indicated above. There is anchorage for 4 – 6 ships, depending on size, in inner harbour off Cabedelo sand-pit.

RESTRICTIONS: Ships with draft 16 ft. and under can enter at any time. Ships with draft over 16 ft. generally enter 2 hours either side of high water.

MAX. SIZE: Max. permissible length about 800 ft. Max. permissible drafts between 33 ft. – 36 ft. at springs, about 27 ft. – 29 ft. at neap tides.

HEALTH: Vessel to radio "Sanidade Maritima", Beira, their ETA and "All Well". If "All Well", Health Certificate given by Pilot.

RADIO: Vessels to route messages through Beira Radio – call sign CRS. Agents radio ships through same station. Naval Radio Station – call sign CRX 3 available for distress signals.

VHF: Beira Pilots and Beira Port Control on VHF throughout 24 hours.

TUGS: Join incoming vessels at inner anchorage, about 1 mile distant from quays. Ship's lines used. 4 tugs available, up to 3,200 h.p.

BERTHING: No night berthing done unless with prior consent of Chief Pilot, otherwise no specific requirements.

Pungue Wharf:

Berth No.	*Depth* (ft.)	*Length of Berth* (ft.)	*Cranes* (Electric)
1	27	580	2× 6 tons 4× 3 tons
2	27	530	2× 6 tons 4× 3 tons
3	27	530	3× 6 tons 3× 3 tons
4	30	525	2× 6 tons 3× 3 tons
5	30	530	2×3.5 tons 1× 5 tons 1× 3 tons
6	30	540	1× 10 tons 5× 5 tons
7	31	540	1× 10 tons 5× 5 tons
8	31	630	Conveyor Belt
9	31	540	1× 10 tons 5× 5 tons
10	31.5	550	1× 20 tons 5× 5 tons

Note: Wharf No. 1 is generally used by trawlers, No. 2 by trawlers and coasters, No. 3 by vessels loading cement, Nos. 4, 5, 6, 7, 9 and 10 for general cargo. Ro/Ro facilities available.

Range of Tides: 15 ft. – 21 ft. Maximum depth of water should only be taken as an approximate guide as actual depths are dependent on the port dredging programme. Maximum permissible draft for turning ships round at or off the wharves is 30 ft.

CARGO HANDLING FACILITIES: There is a mechanical appliance at No. 8 Berth Pungue Wharf, used for coal. This appliance is new and has never been used but it has been designed to achieve 700 t.p.h. It is also equipped with 1 spout.

Container Cranes: 3×40 tons capacity.

Mobile Cranes: 25 cranes with capacity 1-10 tons.

Electric Cranes: See "Berthing" – Pungue Wharf.

Molasses: Storage tanks, capacity 18,000 tons. Served via No. 8 Berth.

Vegetable Oils and Tallow: 5 tanks with total capacity 1,800 tons.

STEVEDORES: Ordered by Agent. Vessels should advise Agent their ETA at least 12 hours in advance (weekdays), 24 hours in advance (week-ends).

Port Cargo Working Hours: (3 shifts throughout all days): 0700 – 1300 hrs., 1300 – 1900 hrs., 1900 – 0200 hrs.

From 1300 hrs. Saturday until 0200 hrs. Monday – all overtime.

MEDICAL: No advance notice required for medical attention, unless urgent assistance necessary. Hospital facilities available. Crew members and passengers should be in possession of valid cholera and yellow fever certificates on international forms. Vaccination/fever inoculations and certificates may be obtained ashore if required.

TANKERS: Discharge lines white and black oils, 2×10 in. lines feeding into 12 and 14 in. lines leading to storage tanks. Also a 22 in. discharge line for crude oil. No slop discharge facilities. 2 tanker berths, max. permitted drafts about 31 ft.

DENSITY: In harbour area allow 3 to 4 in.

FRESH WATER: Available at all Pungue Wharf berths, pumping rate about 50 t.p.h.

FUEL: Fuel oil 1,000 Secs R. viscosity, marine diesel 43.1 Secs R., diesel 34.1 Secs R. 3 – 4 days' advance notice required. Bunkers delivered when alongside, no bunkering barge available.

CONSULS: Netherlands, Portugal, C.I.S.

REPAIRS: Most types of deck and engine repairs are possible, but major repair jobs are not undertaken.

DRY DOCKS: 1 dry dock 115 m.×17 m.×8.5 m., suitable for ships up to 5,000 tons, LOA 377 ft. and max. beam 55 ft.

GANGWAY/DECK WATCHMEN: Compulsory to employ watchmen to prevent pilferage.

OPENING/CLOSING HATCHES: Can be done by either crew or stevedores. Often done by crew.

CERTIFICATES: Tonnage Certificate to be produced to Pilot, as certain port dues are based on vessel's registered tonnage.

CUSTOMS ALLOWANCES: There is no restriction on crew member holding in his cabin any amount of tobacco/wine, spirits.

CARGO GEAR: All gear supplied by stevedores except rope slings, rain tents, and spreaders for heavy lifts.

REPATRIATION: Facilities exist and a valid passport is necessary as Immigration Authorities do not recognise a Seamen's Book as a valid travel document.

AIRPORT: Beira Airport situated 7 miles from port and is served only by domestic airline which maintains 2 flights per day to Maputo from where international connections available and 1 weekly flight to Harare (Zimbabwe).

TIME: Local time 2 hours ahead of GMT. No alterations made to clocks during year.

HOLIDAYS: January 1st (New Year's Day); February 3rd (Hero's Day); April 7th (Woman's Day); May 1st (Labour Day); June 25th (Independence Day) and September 25th (Army Day).

POLICE/AMBULANCE/FIRE: Port Police (Tel. 22920); Ambulance (Tel. 22442); Fire (Tel. 22222).

TELEPHONES: No telephones placed on vessels.

SERVICES: Services normally available for tank cleaning, compass adjusting, minor repairs to radar and radio.

SHORE LEAVE: Crew members and officers are allowed ashore, and shore passes are issued against Seaman's Book or Passport.

IDENTIFICATION CARDS: Required. Passport if possible, otherwise Seamen's Book.

DELAYS: Generally no delays, but sometimes 24 – 48 hours' delay following rain or bunching of arrivals.

GENERAL: Beira port works 20 hours per day, 7 days a week (except 1st January) and overtime working is compulsory.

DEVELOPMENTS: A long term master plan is to be undertaken.

The plan includes a new oil terminal for tankers up to 50,000 d.w.t., new coal terminal for vessels up to 125,000 d.w.t., new bulk terminal for sugar and cereals and a container/multi-purpose terminal (length 650 m., by converting Berths No. 2 – 5). The access channel will also be deepened in order to accommodate larger vessels.

AUTHORITY: Direccao do Porto da Beira.

AGENT: King and Sons (Beira) Lta., P.O.Box 1485, Beira, Mozambique. Tel: (27) 258-3-25111. Telex: 7393. Cables: Baronet, Beira.

1 Stores List.
6 Passenger Lists.
1 Crew Declarations.
1 List Ports of Call.
In Transit and Hazardous Cargo List is required.

Notes: Immigration requires all-hands muster with I.D. Card/Book on entering and sailing.

Immigration Clearance: Inwards: 0600 – 1800 hrs. only inside harbour proper. Outwards: 0600 – 2400 hrs. except in special circumstances.

N.B. Vessels at the pilot station cannot obtain Pratique because this includes Immigration Clearance and can therefore be considered as not having arrived or not being in all respects ready to load.

PILOTAGE: Compulsory. Available during daylight hours only.

Pilot granted only if 16 hours' notice of ETA given.

On arrival vessels can contact Pilot on VHF Channel 16 (working on Channel 14).

The pilot ladder is used together with the accommodation ladder in order that the Pilot has a climb of 9 ft. on the pilot ladder.

Pilot Boarding Position: Pilot boards at Buoy No. 4 (South).

ANCHORAGES: Inside harbour: One each for vessels drawing 33 ft., 31 ft., 27 ft. and 26 ft. respectively. Six for vessels between 17 ft. and 19 ft. Vessels delayed in berthing are brought in from pilot station at port's convenience.

RESTRICTIONS: Berthing and Unberthing only during daylight hours.

MAX. SIZE: Maximum draft is 7.5 m. plus height of tide (Max. 3.8 m. HWST) = 11.3 m. Also see "Berthing".

The controlling factor is the depth in Polona Channel, which in August 1988 was 35 ft.

HEALTH: Pratique granted by Pilot unless disease prevalent on board when Masters should telegraph "Saude" Maputo.

RADIO: Advice of arrival 16 hours before to the Harbour Master or Chief Pilot and Port Health should be sent through the station C9C (Naval), operating 24 hours on 500 kHz, replying on 487 kHz, also 2000 to 0500 hrs. GMT on 8356 kHz to 8376 kHz (replying 8642 kHz) and 0800 to 2000 GMT on 12534 kHz and 12564 kHz (replying 12990 kHz). All other non-official messages through station CRL, operating 0200 – 1800 GMT on 8 MHz at even hours, 0400 to 1800 GMT on 4 MHz at even hours plus 30 minutes (answering on 4259 kHz). Continues watch 0200 – 0400 GMT on 4 MHz. Radio telephone through CRL on 2132 kHz at even hours plus 45 minutes 0600 – 1700 GMT answering on 4415 kHz.

VHF: Pilot boat and Port Radio operate on Channel 16 (calling) and Channels 12 and 14 (working) from 0530 to 1830 hours.

TUGS: 2 tugs available, 3,200 h.p. and 2,300 h.p.

BERTHING: *Main Wharf:* All facilities owned and operated by Caminhos de Ferro de Mocambique (CFM), including stevedoring.

Dimensions: Wharf is in an uninterrupted line running roughly N.E./S.W., accommodating 12 – 15 vessels. Length: 3,275 m. Depth 9.0 m.

Grain: For loading or discharging bulk grain there are 2 Buhler machines at a berth with 33 ft. depth of water LWOST. About 120 t.p.h. A recent vessel averaged 2,900 tons per day. Bagging plants handle 1,000 bags per hour.

Bulk Loading Terminal: Length 210 m., depth 10.0 m. (max. sailing draft 11.3 m. (HWST) and 10.0 m. (HWNT). Terminal equipped with 2 shiploaders, 2 discharge/reclaimers, 2 wagon tipplers and conveyor system.

Coal: The best loading rate, in theory, is about 12,000 tons per day, however, in practice, allowing for shunting trucks, warping ship, etc., average rate is about 4,000 – 4,500 tons per day. In mid-1988 a vessel achieved 18,000 tons in 24 hours.

The length of the chute is 181 m. and it operates between angles of 46° and 58° to the perpendicular. At 46° the tip of the chute is 4.80 m. above wharf level and 9.50 m. from the wharf edge. At 58° the tip of the chute is 7.60 m. above wharf level and 11.80 m. from the wharf edge. At lowest spring tide the water at the coaling berth is 5.90 m. below wharf level and at highest spring tide 2.15 m., the difference between max. extremities being 3.75 m.

Sugar Terminal: Terminal equipped with 2 shiploaders and conveyor system from storage sheds. Sugar discharged from railway wagons by overhead cranes and grabs into hoppers which feed conveyors to storage sheds. The daily intake capability of installation is 2,000 tonnes and it has storage facilities in three sheds with a capacity of 40,000 tonnes each. Daily discharge rate 10,000 tons. Length of berth 200 m. Depth alongside 9.7 m.

Also see "Shipmaster's Report" – July 1988.

Steel Terminal: Adjacent to the Container Terminal. Length 200 m., depth 9.7 m. Terminal equipped with 4×20 tonnes electric quayside cranes and 20 tonnes capacity forklift trucks. Storage area for approximately 20,000 tonnes.

Container Terminal: Length 300 m., depth 9.7 m. Terminal equipped with 2×35 tonnes ship to shore gantry cranes for 20 ft. – 40 ft. containers, 1×35 tonnes and 8×20 tonnes forklift trucks, 10 MAFI/tugs and trailers and 3×40 ton heads/trailers. Storage capacity of terminal approximately 1,300 teu's.

LPG Carriers: Berth at Matola Ore Berth.

Timber: Vessels berth at Matola, Post No. 1 (P.I.). Max. draft 32 ft. Max. LOA, 600 ft. Vessels over 550 ft. LOA and draft over 25 ft. berth and sail during daylight hours only.

STORAGE CAPACITIES:

Ore and Coal Dumps: Gorjao Wharf.

	Tons
Coal	200,000
Ores	20,000
Copper	40,000
Vermiculite	4,000
Steel, Beams and Billets	100,000
Vanadium	7,000
Containers	1,000 TEU

Oil: Storage capacity 200,000 tons.

Molasses: 4 tanks, capacities 6,000, 9,000, 11,000 and 7,000 tons.

Fruit: 7,500 tons (1.133 cu.m./ton) in 100 chambers.

Fish: 200 tons.

Ore: Via Ro-Con unit attached to container cranes, rate 5,000 tons per day.

Sugar: See "Berthing".

CRANES: *Electric Cranes:* 75 units with capacity 3 tons to 60 tons.

Mobile Cranes: 15 units with capacity 3 tons to 20 tons.

Heavy lift crane with capacity of between 60 tons – 80 tons.

STEVEDORES: *Working Hours Monday through Sunday:*

0700 – 1100   1300 – 1700
1900 – 2300   0000 – 0600

All above periods are considered normal time.

MEDICAL: No advance notice required for medical attention, unless urgent assistance necessary. Hospital facilities available. Crew members and passengers should be in possession of valid yellow fever certificates (cholera certificate too if cholera area) on international forms. Vaccination/fever inoculations and certificates may be obtained ashore if required. Men for sick parade must first go through the port doctor whose hours are week-days 0800 – 1130 hrs. and 1400 – 1730 hrs.; Saturdays 1000 – 1130 hrs., but always available on an emergency call.

TANKERS: Matola Mineral Wharf, 35 ft. LWOST, max. length of vessel 200 m.

Tanker Terminal: "T" jetty, 60 m. in length with mooring dolphins. Depth alongside 10.0 m. Pipeline from jetty to oil storage farm.

DENSITY: Average 1022.

FRESH WATER: Available at all berths, not available ex-barge.

FUEL: Vessels can be supplied from pipe-lines whilst working at all berths, including the Matola Appliance and Tanker jetty, but excluding the new wharf extension, where pipes have been laid but the system is not yet ready for delivering bunkers. The rate of delivery varies between 300 t.p.h. and 500 t.p.h. depending on the type of vessel taking bunkers. At present, supplies of gas oil and marine diesel oil are not in very plentiful supply, recommended to stem as far in advance as possible.

REPAIRS: No dry dock except for small coasters. Facilities for most normal work, except underwater riveting, cutting and welding, and shaft balancing.

WATCHMEN: Strongly recommend employing services of a local watchman, who will also control visitors and labour passes.

OPENING/CLOSING HATCHES: Can be done by either crew or stevedores. Often done by crew.

CERTIFICATES: Tonnage Certificate to be produced to Pilot, as certain port dues are based on vessel's registered tonnage.

CUSTOMS ALLOWANCES: Bonded stores are usually not sealed.

REPATRIATION: Facilities exist for nationals of those countries maintaining diplomatic relations with Mozambique. A valid Passport and visa is necessary as Immigration Authorities do not recognise a Seaman's Book as being a valid travel document.

AIRPORT: Maputo International Airport 4 km. from port.

HOLIDAYS: No cargo work on 1st January, on other holidays, work continues normally in the port.

TIME: Local time GMT plus 2 hours. No alterations made to clocks during the year.

TELEPHONES: A telephone will be placed on board the vessel.

SHORE LEAVE: Crew are allowed ashore, from 0600 hrs. – 1700 hrs. excepting nationals of those countries not maintaining diplomatic relations with Mozambique.

IDENTIFICATION CARDS: Crew and passengers are issued with Immigration Boarding Permits and they must be carried at all times. (Such permits to be returned to Immigration Officer prior to sailing.)

GENERAL: Crew and passengers not to take photographs in the dock area. Permission through Agent required to lower any boats or gear overside into the water or on to the wharf.

Do not immobilise main engines or carry out engine trials at the wharf until permission has been obtained by the Agent as the Authorities require vessels to maintain sufficient steam for main engines to be used at 2 hours' notice.

Customs guards to be supplied with meals and accommodation whilst at Inner Anchorage and alongside the wharf otherwise cost per guard will have to be paid by Agent on Owner's behalf.

DEVELOPMENTS: New buoyage system being installed.

Dredging in progress.

SHIPMASTER'S REPORT: April 1987.

The following navigational problems were encountered when arriving from South:

Canal Do Sul: The Canal Do Sul is closed and the buoys indicated on BA. Chart No. 644 no longer exist. All ships have to proceed via Canal Do Norte.

Canal Do Norte: It is advisable to proceed in daylight only as most of the buoys are missing or out of position.

Pilot boarding position is at Buoy No. 4 (25° 56′ S., 32° 45′ E.). No pilot launch available during our visit so outbound and inbound ships sometimes exchange Pilot with their own lifeboats. If one of the tugs is in operation, pilot will embark with that tug.

Berthing and unberthing was made without tugs using one anchor.

Most of the cranes were non-operational.

Before departure a thorough search for stowaways is to be made.

Due to problems of pilot transportation, Masters are sometimes asked to proceed outbound without pilot through Canal da Polana, this means dropping Pilot at Buoy No. 15. This is not to be recommended as positions of buoys are doubtful and numerous small fishing craft cross the channel.

When a tug is available the Pilot disembarks at Buoy No. 10.

Special attention has to be paid to Xefina Bank which is extending southwards.

SHIPMASTER'S REPORT: July 1988.
Vessel: 20,900 d.w.t.
Cargo: Loaded 17,500 tonnes of bulk raw sugar at the Sugar Terminal. Vessel used 2 loaders alternately at 500 t.p.h.
Sailing Draft: Forward: 9.2 m. Aft: 9.3 m.
Approaches: North Channel: Navigation limited to daylight hours only as some channel buoys are missing and some are unlit. IALA system used, red to port and green/black to starboard.
B.A. Chart 644:
Lacerda lighthouse unlit.
Macomana lighthouse unlit.
Necessary care must be taken when approaching No. 2 N. Buoy for clearing Baixo Cutfield Shoals.
No. 2 N. Red buoy missing.
No. 4 N. Red buoy in position but unlit.
No. 1 N. Black buoy missing.
No. 3 N. Black buoy missing.
No. 6 N. Red buoy in position but unlit and rusted.
No. 3 Black buoy in position but unlit.
No. 3 A. Green buoy is a new buoy laid in position Lat. 25° 55.5′ S., Long. 32° 51.2′ E. (approximate).

After No. 3 Buoy, steer to pass close East of No. 3 A Green buoy and then with approximate course 268° to No. 4 Red buoy which is the Pilot's boarding position.
Pilotage: Pilots are experienced and cooperative. Pilot ladder required on the leeside, combination with accommodation ladder not needed.
Tugs: Two tugs available. One is used for mooring/unmooring and the other for pilot service at Buoy No. 4.
Watchman: Local watchman is compulsory. Special attention is required prior to sailing as stowaways may try to board.
Fresh Water: Plentiful supply, rate about 25 t.p.h.
Provisions: Fresh fruit and vegetables and good provisions available from local market.
General: Extreme caution must be taken when navigating in the North Channel when in a loaded condition, between Buoys No. 4N – No. 6N. In this area the echo sounder shows approximately 30 cm. under keel clearance.

Dredger was working in the Inner Channel, close to Maputo Port.

Passage close to Baixo Rebeiro Beacon not recommended, when in a loaded condition due to suspect depths and at times a strong current.

Most buoys of the Inner Channel was discoloured and rusted.

AUTHORITY: National Directorate of Ports and Railways (DNPCF), P.O.Box 276, Maputo, Mozambique. *Tel:* 28790, 25152. *Telex:* 6-438, 6-208. *Contact:* Mr. F. Ferreira Mendes, National Director.

Maputo Port (CFM-S), P.O.Box 276, Maputo. *Tel:* 27173. *Telex:* 6-208. *Contact:* Dr. F. I. Diniz, Executive Director. Issufu D'Amarcy, Port Director.

AGENT: King and Sons (Maputo) Lta., P.O.Box 2902, Maputo, Mozambique. Tel: (27) 258-1-430021. Telex: 6-276. Cables: Baronet, Maputo.

MOZAMBIQUE: 14.58 S. 40.45 E.

DOCUMENTS:
Customs Clearance from last port.
Port Clearance.
Health Certificate.
6 Crew Lists.
6 Passenger Lists in Transit.
7 Passenger Lists Disembarking.
2 Stores Lists.
2 Lists Deck Stores.
2 Lists Cargo in Transit (main items of cargo only).
6 copies of Manifest of Mozambique Cargo.

PILOTAGE: One Pilot available, 24 hours pilot boat is black and grey. Ships take Pilot near Buoy No. 2 (Red Buoy) placed off Goa Island. At night ships should send Morse signals with Aldis lamp to the middle of Mozambique Island (location of port office). ETA should be given as soon as possible to pilot station off Mozambique Island and/or to ship's Agent.
ANCHORAGES: When waiting for Pilot, or due to their draft (more than 30 ft.) ships may drop anchor off red Buoy No. 2 (0.5 miles seawards). Depths between 60 ft. and 90 ft. Bottom with sand and some broken coral; current from North to South, sometimes up to 4 knots.
MAX. SIZE: Only ships with drafts less than 30 ft. can cross the bar and enter the Port.
HEALTH: Quarantine flag should be flown, even after calling at other ports in this country. Health Certificate given by Pilot.
RADIO: Radio Mozambique, call sign CRQ. Also available Maputo or Beira Radio Stations.
TUGS: Tugs are not necessary in this port.
BERTHING: No quay berths. Vessels work cargo at anchor.
STEVEDORES: All requirements on this purpose must be sent to the Agent.
MEDICAL: Medical assistance can be given at any time, even to vessels unable to cross the bar because of draft. Hospital with adequate facilities, and emergency services available.
FRESH WATER: Always available in any quantity. Supplied by barge of 40 tons capacity.
FUEL: Small quantities available.
CONSULS: No local representatives.
REPAIRS: Light repairs can be effected.
OPENING/CLOSING HATCHES: By stevedores.
CARGO GEAR: Vessels anchor in bay and load and discharge by lighter and barges.
HOLIDAYS: 1st January; 2nd March; 1st and 10th June; 15th August; 5th October; 1st November; 1st December; 8th December; 25th December. Cargo handling can be arranged on these days.
POLICE/AMBULANCE/FIRE: Maritime Police, Customs and Agents will always be on board during stay.
TELEPHONES: No telephones, but walkie-talkies are available; arrange with Agent.
IDENTIFICATION CARDS: Required.
AUTHORITY: Capitania do Porto de Mocambique.

NACALA: 14.32 S. 40.40 E. (See Plan)

PORT LIMITS: The line joining Ilha Goman to Cabo Columulomo Light at the entrance of Bay of Fernao Veloso.
DOCUMENTS:
6 Crew Lists.
6 Passenger Lists.
2 Supplies Lists.
2 Stores Lists.
4 Cargo Manifests.
3 Cargo Plans.
5 Ports of Call Lists.
2 Animal Lists.
2 Vaccination Lists.
1 Health Certificate.
1 Clearance from Last Port.

These documents are to be completed, and presented, at the time of report to local authorities.
PILOTAGE: Compulsory. Request Nacala Pilots on VHF radio on Channel 16, and then change to Channel 12 (Channel 11 is spare channel).

Advance notice of ETA required at least 24 hours before arrival, through the Agent, and then 4 hours before entering Fernao Veloso Bay, via VHF.

Pilot boat has white hull with black boot-topping and white superstructure. The area of boarding is usually 2 miles × 57° from the Nacala Lighthouse, except during the period of strong winds from N.E. to S.E., when Pilot will embark between Cape Fernao Veloso and Cape Sacamulo. Usual requirements for ladders are in force, and Pilot boarding requires the ladder to be about 3 ft. to 4 ft. above water.
ANCHORAGE: After entering the narrow passage between Cape Fernao Veloso and Cape Sacamulo, in the outer anchorage Bay of Muananculo and the inner Bay of Bengo, away from the middle fairway to the harbour. Maximum size of the vessel anchoring in the outer anchorage area is about 130,000 d.w.t., and 18.0 m. draft.
RESTRICTIONS: No night time restrictions. Berthing is possible 24 hours a day.
April 1992: Lighthouse lights extinguished due to delay in supply of gas.
HEALTH: International health regulations are to be observed. Any vessel, which is suspect, should inform the Harbour Office.
RADIO: Pilot radio station works with the SSB and VHF equipment. Port Fax No. 526390 (Telex not working). All early reports, ETA, etc., through the Agent.

Also see "Pilotage".
RADAR: No radar installation in the port.
TUGS: 1×960 h.p. and 1×2,640 h.p.
BERTHING:

Quay	*Length* (m.)	*Depth* (m.)
Container Terminal	335	14.0
	37	12.0
North Quay	300	9.0
	229	7.7
	90	7.0

CONTAINER HANDLING FACILITIES: 1,119 ground slots and connection possibilities for 26 reefer units. There is 1×5 ton crane for handling empty containers, and 1×25 ton rail-mounted transtainer for loading and unloading wagons and lorries. A 20 ton quay crane for loading and unloading the ships is also available.

For container handling, there is 1×42 ton front loader with flexible spreader (20 ft. – 40 ft.), and 2×32 ton front loaders.

For long distance transport, there are 3 tractors and 9 trailers with different dimensions.

Also stripping and stuffing operations available, in a 1,480 sq.m. container freight station.

GENERAL CARGO HANDLING FACILITIES: Nacala Port has a covered storage area of 15,692 sq.m., and an open area of about 25,000 sq.m.

For ships' operations there are 1×20 ton, 1×10 ton and 7×5 ton quay cranes.

Forklifts available, equipped also with bale clamps.

BULK HANDLING FACILITIES: Petrochemicals handled at the East end of the general cargo terminal (North Quay), with minimum depth of water 9.7 m., and a quay length of 190 m.

The pipeline diameter is 8 in. No slop discharge facilities available.

Maximum receiving rate of about 150 t.p.h. – 200 t.p.h.

Possibilities of handling bulk cargoes, such as grain, fertilisers, etc., at the North Quay.

STEVEDORES: Particulars of cargoes for discharge to be sent, with the ETA message, for arranging the gangs. Normally, the port is working in 3 shifts, from 0700 hrs. to 1500 hrs., from 1500 hrs. to 2300 hrs., and from 2300 hrs. to 0700 hrs. After 1100 hrs. on Saturdays, Sundays and public holidays, the work is charged as overtime, and must be ordered at least 48 hours in advance.

MEDICAL: Only simple diseases, and first aid emergency cases, can be handled in the local hospital. No dentist available.

TANKERS: See "Bulk Handling Facilities".

DENSITY: 1025 inside the bay.

FRESH WATER: Available by hose from the quay.

FUEL: Marine diesel available, delivered by lorries.

Some delays are to be expected in bunkering operations, due to lack of lorries.

SURVEYORS: Cargo inspectors available.

WATCHMEN: Should be ordered through the Agent, either from the port or other sources.

HATCHES: Opening and closing by crew members.

CERTIFICATES: Tonnage Certificate to be produced to Pilot, as certain port dues are based on vessel's registered tonnage.

AIRPORT: In Nacala, there is a military air base with services to Nampula on Monday, Tuesday, Thursday and Friday. Nearest airport is at Nampula, about 190 km. from the port, with 5 weekly domestic flights to Maputo.

TIME: GMT plus 2 hours.

HOLIDAYS: January 1st (New Year's Day); February 3rd (National Heroes Day); April 7th (Mozambican Womens Day); May 1st (Labour Day); June 25th (Independence Day); September 7th (Victory Day, commemorating the Lusaka Agreements and the end of the war for independence); September 14th (Nacala Day); September 25th (Armed Forces Day and Revolution Day); December 25th (Family Day).

Vessels are requested to "Dress ship" on these days.

POLICE/AMBULANCE/FIRE: The port has its own Police Force and Fire Brigade. The local hospital has an ambulance.

TELEPHONES: No connections for ships alongside. Public telephones for local or international calls are located in the Post Office building, in the city centre, close to the port.

BANKS: There is a branch office of the Bank of Mozambique in the city.

SHORE LEAVE: Crew and passengers need an Immigration Boarding Permit when leaving the port area.

GARBAGE DISPOSAL: Not available as yet.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: There are no seaman's clubs operating in Nacala. However, there is a local delegation of Club Ferroviario (which belongs to the Mocambique Ports and Railways organisation) and soccer or basketball matches can be arranged if requests are made to the Port Direction. In Nacala city center, which is very close to the port area, there are also religious services available for catholic, protestant and muslim religions as well as postage facilities.

GENERAL: The port authority hopes that the Shipmaster will give any reports about the lighthouses nearby.

SHIPMASTER'S REPORT: June 1988 (Updated 1992).

Port Limits: Vessel considered arrived when at entrance off Pta. Narenque. Free Pratique only granted after boarding by Immigration authorities at inner anchorage (off Baiai De Bengo) or at berth.

Documents: Last Port Clearance, 8 copies Crew Lists, Stores List, Crew Personal Property List, Manifest, Vaccination List and Agent's Forms (given on arrival). Shore passes issued at gate in exchange for Passport, shore leave up to 2200 hrs. only.

Pilotage: Available off Fernao Veloso, with prior arrangement. If B.A. Chart No. 649 on board, then advisable to move in without pilot, as delays are quite normal. Similarly, if outbound it is at Master's discretion (Small coasters only) to drop pilot off the berth or retain his services until past Pta. Narenque.

Pilots can be called on VHF Channels 12 and 16.

Advisable to approach at daybreak as lighthouses are unlit. For the same reason berthing/unberthing carried out in daylight hours only. A small pilot boat is available and Pilot is accompanied by a trainee.

Draft: Very deep water exists. Vessels with drafts up to 14.0 m. can berth at New S.W. Container Terminal. N.W. Quay has depths up to 9.5 m. and Berth No. 4 at N.E. end of N.W. Quay, used for product tankers, has depths of 12.0 m., depending on tide.

ETA: Messages to be radioed via Maputo Agents, who then inform Nacala branch by radio. At least 24 hours to be allowed for this information to reach Nacala.

Tug: One tug available, using ship's lines.

Medical: Minor medical complaints can be attended to by doctor arranged via agent.

Tankers: Discharge through 1×8 in. connection leading to storage tanks about 2 km. away. BP Mocambique in charge of liason, etc. We discharged 3,000 tons of jet fuel in 36 hours.

Fresh Water: Available ex-jetty, but as jetty infested by rats and cockroaches it is not advisable to use same for drinking.

Fuel: Not available.

Watchmen: As per Port Regulations, one watchman is compulsory.

Customs Allowance: No particular restrictions.

Ship's Certificates: Not required to be taken ashore.

Consuls: None.

Repairs: No facilities.

Time: GMT plus 2 hours throughout the year.

Provisions: Minimum amounts of fresh vegetables available locally at market. Currency must be changed officially through agent only and excess returned.

AUTHORITY: Empresa Nacional dos Portos, Direccao do Porto de Nacala, Caixa Postal No. 70, Nacala, Mozambique. *Contact:* Boaventura M.Cherinda, Port Director. Captain Erkki Lantta, Harbour Master.

AGENT: King and Sons (Maputo) Lta., P.O.Box 2902, Maputo, Mozambique. Tel: (27) 258-1-430021. Telex: 6-276. Cables: Baronet, Beira.

PEMBA: 13.00 S. 40.28 E.

DOCUMENTS:

6 Crew Lists.
6 Lists of Passengers Disembarking.
6 Lists of Passengers in Transit.
1 Master's Declaration.
1 Stores and Provisions List.
1 Health Declaration.
5 Sets of Cargo Manifests.
2 Sets of non-negotiable Bills of Lading.
Clearance Documents from last port.

PILOTAGE: It is necessary to order by radio request to Agent 14 hours before arrival.

ANCHORAGES: Vessels may anchor South of the dock about 300 m. off. Other suitable anchorages will be indicated by the Pilot.

RESTRICTIONS: Vessels may enter with Pilot at any hour day or night.

MAX. SIZE: Draft up to 27 ft. 6 in. for berthing.

HEALTH: In case of contagious disease on board, the Port Health Authorities must be advised in advance.

RADIO: Send messages through Beira radio.

TUGS: None available

BERTHING: One berth, length 182 m., depth alongside 28 ft.

STEVEDORES: In ETA message to Agent, indicate number of gangs required and advise quantity and description of cargo for discharge.

MEDICAL: In case of urgency advise Agent by radio before arrival. Hospital facilities available. Vaccinations can be performed.

FRESH WATER: Available.

FUEL: Available.

GANGWAY/DECK WATCHMEN: Not necessary as there is a permanent guard on board.

OPENING/CLOSING HATCHES: Performed by stevedores.

CUSTOMS ALLOWANCES: Bond is not sealed and no restrictions made.

REPATRIATION: Can be arranged.

AIRPORT: Situated 7 km. away. Flights to Beira and Maputo daily.

TIME: GMT plus 2 hours. No alterations during the year.

HOLIDAYS: No work performed from 1700 hrs. Christmas Eve until 0600 hrs. 26th December; no work performed from 1700 hrs. New Year's Eve until 0600 hrs. on 2nd January. Work may be arranged on the following holidays: 1st January, 3rd February, 7th April, 1st May, 25th June and 25th September.

POLICE/FIRE/AMBULANCE: Police, Tel: 2828; Hospital, Tel: 2211.

SHORE LEAVE: Allowed. Except for nationals of countries not maintaining diplomatic relations with Mozambique.

IDENTIFICATION CARDS: Required by police.

AUTHORITY: Capitao do Porto de Pemba.

Union of Myanmar (Burma)

YANGON (Rangoon): 16.47 N. 96.15 E. (See Plan)

DOCUMENTS:
Ship's Register.
Crew and Passenger List.
Dangerous Cargo List, if any.
Customs Declaration for Crew and Ship.

PILOTAGE: Compulsory. The services of Pilots are required to bring ships alongside.

Vessels bound for the port of Yangon should make for the *Dagon* Light Vessel (China Bakir) Lat. 15° 59.9′ N., Long. 96° 14.5′ E. and then proceed towards *Lanthaya* Light Vessel. Vessels of 26 ft. draft and over should anchor off *Dagon* Light Vessel due to insufficiency of depths at the pilot station at low water, and await instructions from the pilot vessel for embarking Pilot.

Vessels below 26 ft. draft may proceed direct to the pilot vessel for embarkation of Pilot.

The pilot vessel or its relief is normally cruising or anchored at Lat. 16° 11.0′ N., Long. 96° 19.6′ E., approximately 10 miles North of *Dagon* Light Vessel and approximately 2 miles East of Lanthaya Light Float and 42 miles from the Port of Yangon.

ANCHORAGES: Specific areas of the port are reserved for special anchorages as follows:
(a) *Petroleum Anchorage* at Liffey Reach just below Syriam, accommodating 2 vessels.
(b) *Explosives Anchorage* below Admiralty Jetty near Chokey Point.
(c) *Small Craft Anchorage* at King's Bank, accommodating 20 inland vessels and schooners, etc.

ETA: 48 hours advance notice of ETA required, confirmation to be made 24 hours later or one working day ahead of the ship's ETA to enable necessary arrangements to be made regarding Pilots. Information required in the advance notice are:
(a) ETA, *(b)* Fresh Water Draft, *(c)* Speed, *(d)* Gross tonnage, *(e)* LOA and LBP.

RESTRICTIONS: Generally on a flood tide between the time of LW to HW at the pilot station, depending on ship's actual draft and speed in order to obtain sufficient depths at the Outer Bar.

Navigation day and night during river passage, but entry into Inner Harbour is normally restricted to daylight hours.

The Master Attendant regularly issues Draft Forecasts to all vessels Agents advising them of the drafts to be obtained within the next 2 months.

MAX. SIZE: The port is accessible to vessel of 548 ft. LOA, and draft up to 28 ft. at Spring tides. The draft of the vessel entering the river is controlled by the depth available at the Outer Bar, carrying 12 ft. depth at datum. Entry into the harbour is controlled by the Inner Bar off Monkey Point, carrying from 10 ft. to 12 ft. depth at datum. These depths are subject to seasonal variations and are least during the dry season from November to May.

HEALTH:
(a) Maritime Declaration of Health signed by the Master and also by a Ship's Surgeon if one is available.
(b) Valid Derat or Derat Exemption Certificate.
(c) Valid Vaccination Certificates against cholera for crew and passengers (if a certified list of date of expiry of these Certificates is available, the issue of Pratique will be expedited).
(d) Pratique is issued by the Medical Officer on duty, after examination of the crew and passengers of the ship. The Pratique is automatic if the vessel arrives after touching other ports in the country. NO RADIO PRATIQUE IS ISSUED.
(e) Quarantine Clearance on sailing is essential.

RADIO: International single operator watch period for Zone "C". Assigned frequencies are 425, 454, 468, 512, 500 kHz and 2.8, 4.26 MHz, call sign XYCZ.

In cases of inability to contact the pilot vessel by wireless, the Master should send cable to the Harbour Master "Portrust" via Yangon Radio Station, call sign XYR.

Within harbour limits contact can be made with Port Tower by light visual signalling. VHF contact can also be made with Port Tower, call sign XYU, Channel 16 (calling frequency). The working frequencies are Channels 14, 12 and 6 (Hague Convention).

TUGS: Generally not used for mooring and berthing purposes, but available in emergency.

BERTHING: There are 11 wharf berths and 2 pontoon berths for sea-going vessels:

Rice Loading Berths:
(a) *Sule Pagoda Wharf,* Berth Nos. 1 & 2 accommodating two vessels of 450 ft. each. LWOST varies from 24 ft. to 28 ft. approx.
(b) *Ahlone Wharf,* length 440 ft. accommodating a vessel of 440 ft. LWOST varies from 26 ft. to 28 ft. approx.
(c) *Hteedan No. 1,* length 456 ft. accommodating a vessel of 460 ft. LWOST varies from 26 ft. to 30 ft. approx.

General Cargo Berths:
Sule Pagoda Wharf, Berth Nos. 3, 4, 5, 6 and 7 accommodating five vessels ranging from 450 ft. to 520 ft. LWOST varies from 24 ft. to 30 ft. approx.

Container Berths:
Bo Aung Gyaw Street Wharf: Berth Nos. 1 and 2, accommodating two vessels of 450 ft. each. LWOST varies from 26 ft. to 29 ft. approximate. 2×40 ton container cranes, 56 reefer points and storage for over 1,800 TEU.

Passenger Berth:
The Port Health Station. A Pontoon Jetty equipped with a large floating pontoon 500 ft. length and accommodating vessels of 520 ft. to 595 ft. LWOST varies from 25 ft. to 28 ft.

Moorings:
The port is equipped with 13 swinging moorings and 2 sets of fixed moorings in the Inner Harbour; 3 swinging mooring buoys at Hastings, and 2 fixed moorings for oil tankers. In addition, a number of mooring buoys are provided for small sized seagoing vessels.

Mooring and Berthing Procedure:
While in port, ships lie alongside wharves or moorings. The procedure is as follows:
(a) *Single Buoy Mooring* – Vessels moored with ship's own cable which is led through hawse pipe and shackled on to buoy cable. The shackle is provided by the Myanma Port Authority.
(b) *Fixed Mooring* – Same procedure as above but the vessel is moored to 4 buoys.
(c) *Berthing* – Normal ship's ropes and wires are used for berthing at wharves. In addition, wharves' mooring chains are also provided for securing to ship's bollards.

CARGO HANDLING EQUIPMENT: The heaviest lifting capacity of the port is a 40 ton crane at the Bo Aung Gyaw Street Wharf.

Heavy packages may be landed or shipped by a vessel's own tackle at the wharves, subject to prior notice being given to the Deputy General Manager (Traffic).

STEVEDORES: In two shifts of 0800 hrs. to 1600 hrs., and 2000 hrs. to 0400 hrs. Overtime work is arranged on special request from Agents. Stevedoring undertaken by Port Authority. To enable ship's Agents to order labour gangs in time, it is important to obtain in advance the accurate ETA of vessels. Latest time to order gangs is 1100 hrs. for booking for that night and the next day.

FRESH WATER: Available either directly alongside the wharves or in midstream, delivered by water boats.

FUEL: Fuel, diesel and gas oil (HSD) from Myanma Petroleum Products Enterprise. Fuel oil provided by barges of 150 tons to 180 tons capacity alongside vessel during daylight hours. Coal supplied by Government No. 3 Mining Enterprise.

FIRE PRECAUTIONS: A special land-based Port Fire Brigade is maintained by the Port Authority, supplemented by a fire-fighting vessel and tugs for emergencies in the river.

CONSULS: The following countries are represented by consulates or embassies at Yangon:

Afghanistan
Algeria
Australia
Austria
Bangladesh
Belgium
Bulgaria
Cambodia
China
C.I.S.
Cuba
Czechoslovakia
Denmark
Egypt
Finland
France
Germany
Hungary
India
Indonesia
Israel
Japan
Republic of Korea
Laos
Malaysia
Mongolia
Nepal
Netherlands
Nigeria
Norway
Pakistan
Philippines
Poland
Singapore
Sri Lanka
Thailand
U.K.
U.S.A.
Vietnam
Yugoslavia

REPAIRS: Deep-sea repairs are undertaken by MPA's engineers. The "Setsan Dry Dock", a tidal dock owned by the MPA, can take vessels up to 1,000 tons and 250 ft. in length.

The Myanma Shipyards can take vessels up to 2,000 tons and 300 ft. in length.

GANGWAY/DECK WATCHMEN: Available on application to the Deputy General Manager (Traffic).

The working hours of a watchman are the same as the wharf working hours.

OPENING/CLOSING HATCHES: Undertaken by port labour for hatch boards and pontoon type covers only.

POLICE/AMBULANCE/FIRE: Port Police 74520; Ambulance 71111; Port Fire Brigade 78653.

HOLIDAYS: Ships may work on holidays on application to the Deputy General Manager (Traffic) and on payment of holiday fees.

GARBAGE DISPOSAL: For garbage disposal, suitable arrangements may be made with the Shipping Agency Department of Myanma Port Authority when called for. There is no fixed rate and transportation and labour charges are at cost and service fees will be added.

WASTE OIL DISPOSAL: Not available at present.

SEAMAN'S CLUBS: None.

CURRENCY: Myanma Kyats. U.S.$ 1.00 = 6.30 Kyats.

SHIPMASTER'S REPORT: July 1978.

Approaches: Approach was from the Malacca Strait, in generally overcast and rainy weather. The last reliable fix obtained prior to picking up the Dagon Light Ship at 1330 hrs. on 6/7/78 was at 0530 hrs. on 5/7/78. From 1330 hrs. on 5th, 2° were allowed for Easterly set, apart from a 2-hour period on the 6th, when only the Compass Error was allowed. This would seem to indicate that an Easterly set was experienced, but it is possible that what actually occurred was that the vessel was set to the Eastward by the tide, from about 0900 hrs. on the 6th until the Dagon Light Ship was picked up. We sighted the Dagon at about the time and on about the bearing we expected.

The tidal information provided on B.A. Chart 823, although depending on observations obtained during the dry season, was most helpful.

On clearing the Rangoon River, shortly after HW Elephant Point, there was a slight South-Westerly tidal set, as one would expect. The departure Pilot provided the following information, which we were not able to check:

B.A. Chart 823: "Thuriya" Light Buoy is in position Lat. 15° 19′ N., Long. 95° 01′ E., and not as charted. (Charted position: Lat. 15° 20′ N., Long. 95° 10.5′ E.).

The two dangerous wrecks about 38 and 40 miles South of Thante Light are no longer dangerous.

B.A. Chart 833: The dangerous wreck between Upper Western and Upper Middle Buoys is no longer dangerous. We passed between the buoys without any difficulty, drawing 19 ft. 03 in., fresh water. The following is from our own observations: Upper Spit Buoy is now in approximate position 290°(T) – 7 cables from its charted position. All buoys, from and including Upper Spit Buoy to the berth, with the sole exception of "C.M.B." Buoy, were unlit.

Naturally, vessels do not transit this portion of the river during the hours of darkness. With the exception of Upper Spit Buoy all buoys, light floats and the light ship appeared to be in their charted positions. When crossing the bars and during the river passage very close attention must be paid to the steering. With a top-class helmsman who is really concentrating, little difficulty would be experienced. In order to carry the tide up to Rangoon, it is important that a vessel should arrive at the pilot station not later than HW Elephant Point; we were in fact 10 minutes late, and would not have continued except that we were fortunate enough to have the most senior Pilot on board.

It was noticed on departure that an inbound vessel giving an ETA at the pilot station 30 minutes after HW Elephant Point, was directed to anchor.

Anchorages: Vessels may anchor in the vicinity of the pilot station shown on B.A. Chart 823 or in the petroleum or explosives anchorages shown on B.A. Chart 833.

Berthing: Vessel was originally placed at a buoy berth, the anchor cable down the hawsepipe and shackled on to the buoy.

As we have a short length of cable inboard of each anchor with a joining shackle, this operation presented little difficulty but took considerable time.

When we were placed at the buoy, it was dark by the time the operation was completed, but if we had gone straight alongside this could have been done under twilight conditions. Neither the Pilot nor I could understand why the vessel was not berthed on arrival, since our berth was then vacant. The explanation I received was that the shore lighting was poor and that, as a safety precaution, ships are only berthed in full daylight.

At 0625 hrs. the next morning, we commenced unshackling from the buoy and the vessel was secured alongside No. 1 Berth, Sule Pagoda Wharf at 0805 hrs. We berthed starboard side to, stemming the ebb tide and river outflow. The buoy anchor remained hung off until after berthing. When berthing, the offshore anchor is placed in a convenient position to assist in getting the vessel off again. When alongside and the cable slack, we had 4.5 shackles out on the port anchor. Moorings were as follows: Forward – 3 headlines, 1 ship's wire and a shore mooring chain, all leading ahead. No spring. The shore chain is brought on board and turned up on the ship's bitts. Aft – 1 breastrope, 2 sternlines and ship's wire leading aft. No spring.

Departure: The vessel leaves the berth on the last of the ebb and drops down the harbour stern first to a position North of the transit beacons on the South bank, where she anchors until there is sufficient water to cross the Inner Bar and proceed downstream.

Pilotage: Is compulsory. River Pilots take the vessel from the pilot station to the port or buoy and Docking Pilots do the berthing and unberthing, including dropping down to the temporary anchorage. The Docking Pilot remains on board while at anchor. River Pilots, when boarding and leaving, require pilot ladder, manropes and a boatrope. Ship comes under the stern, never ahead, of the cutter, with ladder rigged on the lee side. Docking Pilots board and leave by the gangway.

Communications: Rangoon Radio, call sign XYR, keeps regular watch schedules on 6 HF frequencies. However from departure Lae on 24th June to 2nd July, nothing was heard of this station.

Two-way contact was established on 3rd July, but after the station had instructed the Radio Officer to change frequency, it ceased working.

It was not until 0500 hrs. GMT on 4th July that traffic could be cleared. Later that day it became possible to work XYR on MF. All calls were then answered promptly and an efficient service provided.

An advice of bad propogation conditions from Portishead Radio was in effect during the period covered by the above remarks. This may have had some bearing on the difficulties experienced. The vessel arrived at the pilot station at 0830 hrs. GMT, 6th July, 1978.

VHF: The Pilot cutter and the Harbour Master's Office are fitted with VHF Channel 16. This is efficiently operated.

Telephone: I spent many hours in the Agent's office, attempting to contact London. We were unsuccessful. The hours, local time, during which one may attempt to call London, are: via Hong Kong – 0900 to 1430 hrs.; via India – 1630 to 1800 hrs. These hours are nominated by the Port and Telecommunication Corporation.

Telex: There is a telex machine in the Agent's office, and the Operator's normal hours of duty are 0930 to 1630 hrs. It was possible to send an outward message only in these hours and so, on occasions, it was necessary to request that the Operator remain on duty until 2000 hrs. The reasons for the difficulty in sending outward messages is: Unless a special request is made otherwise, all outward messages are sent to a central transmitting point. Inward messages were received promptly.

Mail: Both to and from Europe and Australiasia, appeared to be reliable.

Agents: T.A.C. are a government corporation and handle every vessel that uses the port. All concerned are most charming, and very polite. All persons I came into contact with from T.A.C. spoke excellent English.

Documents: Required on arrival: 20 Crew Lists, 6 Crew Personal Effects Lists, 6 Ship's Declarations of Foreign Currency, 6 Crew Declarations of Foreign Currency, 1 International Health Declaration, 1 List of dates of Cholera Vaccinations.

Notes:

1. All on board must be in possession of valid Vaccination Certificate against cholera.
2. The Customs do an efficient rummage on arrival, and again on sailing. Their main concerns seem to be cigarettes, foreign currency and pornography.
3. It is most important that all paper money of any foreign country held either by the ship or by individuals is accurately declared and then placed in one or other of the ship's safes. The safes are then sealed and can only be opened with the approval of the resident Customs Officer. Time and trouble on arrival can be saved by collecting all foreign currency in advance. Some small amounts of foreign currency were found by rummagers, but a lenient attitude was taken and these sums were allowed to be placed under seal. The Penalties for attempting to evade the regulations with regard to foreign currency are severe.
4. All on board are required to be photographed, so that local shore passes may be issued. The passes are valid for 12 months from date of issue and cover subsequent calls at Rangoon or any other Burmese port. No shore leave is permitted until shore passes in quadruplicate have been processed. This happens quite swiftly and takes about 12 hours.
5. With the exception of the Health Declaration, there do not appear to be any pre-printed Burmese Forms, and the ship will have to make up her own.

Tugs: There are tugs in the port, but I understand that they are never used for berthing.

Departure: At least 6 up-to-date Crew Lists are required. All shore passes must be collected prior to departure, they are stamped by Immigration and returned to the holders.

All 3 government departments involved with the vessel (Customs, Immigration and Quarantine) issue a clearance on departure. In addition, the Master is given a letter from the Burma Ports Corporation for the River Pilot, stating that all sailing documents have been produced and giving permission for the vessel to proceed to sea.

Register and supporting Certificates: (Load Line, Safety Equipment, etc.) are taken ashore by Agents on arrival, against a receipt, and returned immediately prior to departure.

Officials: Supervisors and Tally Clerks wear uniform with badges of rank. They must be provided with an office on board, and it is customary to provide these gentlemen with meals. Two Customs Officers live on board at all times and accompany vessel to anchorage or buoy berth. These Officers must be fed in the dining saloon and provided with accommodation. On arrival the Customs seal the bond and, if requested to do so, will also seal the dry stores, which is a wise precaution.

Beer is not put under seal. The Customs Officer will make an issue of bonded items daily if requested. The only thing to which restrictions are applied is cigarettes, where the daily issue is limited to 40 per man. Customs also exercise a tight control over all local currency drawn from the Agents and all must be accounted for prior to departure, even cash spent on Provisions.

Cargo Work: Two shifts of 8 hours are normally worked, that is, 0800 – 1600 hrs. and 2000 – 0400 hrs. Cargo can be worked at any time. Overtime hours being 1600 – 2000 hrs. and 0400 – 0800 hrs. Ship's gear was used for discharge. Two gangs were employed at each hatch, and rates of discharge were: No. 2 – 10.35 t.p.h. No. 3 – 14.46 t.p.h. The rate of discharge at No. 2 was remarkably good when one takes into consideration that No. 2 after crane, due to a winch breakdown, was not available after the first 1.5 days. Two gangs were employed throughout at this hatch. After the crane failure the after gang were employed in shifting cargo to where the forward crane could plumb it.

Weather permitting, discharge continued 24 hours a day. A total of 37 hours 40 minutes working time was lost due to rain. When one takes into consideration the many delays and the fact that the Watersiders were discharging a random stow, the rate of discharge was most creditable. Crane drivers and Watersiders were very satisfactory; Supervisors were helpful. Pilferage was nil, damage to cargo was slight and there was no damage to the ship.

Pratique: Granted on arrival. There are no facilities for Radio Pratique.

Provisions: Obtained through the Shipchandler. But very expensive. We purchased salad and bread at the local market at reasonable prices and of reasonable quality. This was done by the Purser/Catering Officer, going there with the Agent and paying cash. This is common practice and was condoned by our Customs Officer.

As we had no contact with the Official Shipchandler, we do not know what his prices were or what his product range is. Any future vessel calling at Rangoon should arrive with as much in the storerooms as possible.

Fresh Water: Obtainable either from water boats or the wharf. Give 2 days notice. It is expensive, 10 Kyats (about 79 pence) a ton. As a precaution, we treated what we took with chloride of lime.

Repairs: We employed some electricians from the machine shop of the Central Electric Service to assist in our investigations of the winch fault at No. 2 hatch. An Electrical Engineer and 3 Electricians were provided and appeared competent. Unfortunately, they did not trace the fault.

Currency: The unit of currency is the Kyat, worth approximately 12.69 to the Pound Sterling.

Weather: Hot and humid, with much rain, it being the season of the S.W. monsoon. Winds in the port were generally light. At the time of our stay, the river was just beginning to rise as a result of the monsoonal rains in the high country, but had not reached full flood. There was, however, a continuous outflow past the port at all states of the tide.

Health: Up to date Cholera Vaccination Certificates are required by the local Authorities and anti-malaria precautions should be taken. Mosquitoes and many other insects are numerous, especially in the wet weather.

General: Five watchmen were provided. When at anchor or at buoy berth, the ship must feed them. When alongside, they eat ashore. The security at the gate is very strict indeed and all local people leaving the port area are searched. No ship's gear or personal effects went missing. There is no garbage collection at Rangoon, so the ship must make her own arrangements for storing waste. Burmese people are unfailingly polite and courteous and naturally expect the same treatment in return. The vessel can work cargo on any day.

Repatriation: Possible but not recommended.

SHIPMASTER'S REPORT: August 1982.

Navigation: Dagon Light Vessel was showing Gp. Fl. (3) 20 sec. on the vessel's arrival, but was unlit on departure 10 days later. The Racon was not operating. The light vessel was in its charted position.

The pilot vessel "Thamada", call sign XYCZ, anchors around position Lat. 16° 13′ N., Long. 96° 18′ E. In August 1982 the pilot vessel's VHF was not operating, but they could be contacted by WT on 500 kHz and also by Aldis lamp. When picking up a Pilot the pilot vessel will be under way; boat rope, manropes and heaving line are required; the Pilot comes off by motor launch from the pilot vessel. If the anchorage is crowded extreme caution is advised while manoeuvring, due to very strong tides, estimated at 6 knots to 7 knots at Springs. Many collisions have taken place during embarkation of Pilots.

Lanthaya Light Float was observed to be 1.8′ N.N.E. of its charted position. It is small and inconspicuous. Northwards of Lanthaya, buoys and light floats are moved as conditions in the channel require, and their charted positions should not be relied upon.

There are no navigational aids available which are useful in approaching the pilot station; however, acceptable results were obtained by taking RDF bearings of the Burma Broadcasting Service broadcast station operating on 955 kHz with antennae in position Lat. 16° 52′ N., Long. 96° 10′ E. (position from World Radio & TV Handbook 1982).

There is a Port Radio station at Rangoon Port, operating on VHF Channel 16, call sign "Port Tower".

Tugs: No tugs are available for berthing, however Pilots are very experienced and all were found to be excellent shiphandlers.

Formalities: Immigration require 4 photographs of each crew member and will issue shore passes; Agents can arrange a photographer to attend on board on arrival.

Customs Regulations are extremely strict, particularly with regard to foreign currency. All foreign currency must be declared and will be put under seal during the vessel's port stay. It has been reported that violations of currency regulations have resulted in severe prison sentences recently. Firearms and narcotics will also be placed under Customs seal. Shore-going crew must undergo Customs inspection at the Main Gate.

Derat is available.

Cargo: The vessel loaded a full cargo of 2,982 hoppus tons of Burmese round logs of mixed varieties; logs were very heavy, averaging out at 1.23 tonnes/cu.m. Cargo was brought alongside by trucks and loaded ex-wharf by ship's gear. Stevedores were inexperienced; stowage was poor and loading rate slow. Cargo was also found to be rat infested. Shippers originaly requested 600 (repeat six hundred) original B/L's, and when this request was dismissed they eventually agreed to 60, issued through Agents, covering 41 parcels of cargo.

Shippers also presented a proforma copy of "Burma Ports Corporation B/L Form" which they requested be issued instead of Owners' forms, stating that this was a standard Burmese B/L form. After studying the clauses contained in this B/L form it was rejected as being poorly written, badly printed, containing many misprints and having no provision for the inclusion of the "Clause Paramount". Masters are therefore advised to exercise caution in accepting a B/L for signature in this form, in order to safeguard Owners' interests.

General: There is a Philippine Embassy in Rangoon, where Filipino crew may renew or be issued with Passports conveniently. Call Embassy for appointment. Fresh water is available alongside or by barge. Bunkers are not available. Minor repairs can be undertaken, but are very expensive. Good medical facilities are available. Fresh provisions may be obtained at the local markets at very reasonable prices. The British Embassy is next door to the main post office. The Strand Hotel, near the British Embassy, provides good meals and adequate facilities at reasonable prices.

SHIPMASTER'S REPORT: August 1992.

Documents/Formalities:

Procedure for clearing the ship in the Port of Yangon (Rangoon).

(A) Official parties which come aboard for arrival formalities:

Quarantine (Health) Party	(2 – 4 persons)
Immigration Party	(4 – 6 persons)
Special Intelligence Party	(4 – 6 persons)
Naval Intelligence Party	(3 – 5 persons)
River Police Party	(3 – 5 persons)
Customs Boarding Officer	(1 person)
Customs Inspection Party	(2 – 5 persons)

Customs Search Party (Officers 4 – 5, ratings 10 – 15, but, as a rule, it is not less than 10 – 15 persons total).

Agent (Manager and 3 – 5 Assistants, including Superintendent, Operations Officer, etc.).

(B) Time and trouble on arrival can be saved by preparation in advance of all documents and forms which are required, also by collecting all foreign currency, ship's walkie-talkie, bonded stores (if any) in order that they may all be sealed.

With the exception of the Health Declaration, there does not appear to be any pre-printed Burmese forms, and the ship will have to make up her own.

Following papers should be duly prepared prior to the ship's arrival in the port:

1. For Quarantine Officers:

Maritime Declaration of Health	1 copy
Crew List	3 copies

Free Pratique granted on arrival. No Radio Pratique is issued. Quarantine clearance on sailing is essential.

2. For Immigration:

Declaration for Arrival/Departure Form	2 copies
Crew List	3 copies

All crew members photographs are required, in order that local Shore Passes may be issued. The Agent usually arranges this by photocopying the Seamen's Passports.

3. For Special Intelligence:

Certified Arrival Form	2 copies
Crew List	3 copies
Arms, Ammunition and Explosives List	2 copies

4. For Naval Intelligence:

Certificate of Arrival Form	2 copies
Crew List	2 copies
Arms, Ammunition and Explosives List	2 copies

5. For River Police:

River Police Department's Form	2 copies
Crew List	2 copies
Arms, Ammunition and Explosives List	2 copies

6. For Customs Boarding Officer:

History of the Vessel Form	1 copy
Crew List	1 copy
Declaration of Walkie-Talkie List	1 copy
Arms, Ammunition and Explosives List	1 copy
Bonded Stores List	1 copy
Private Property List	1 copy
Foreign Currency List	1 copy

Boarding Officer should be provided with these papers by Agent, but it is advisable to keep copies for Boarding Office separately, to avoid unwanted request of Boarding Officer during arrival formalities procedure, as sometimes the Agent is last to come on board (due to regulations).

Customs Boarding Officer lives on board at all times, and accompanies vessel to anchorage or buoy berth. This Officer must be fed in the messroom and provided with accommodation.

On arrival, the Customs Boarding Officer seals the bond, currency, ship's walkie-talkie, explosives (ship's pyrotechnics), and if required to do so, will also seal the dry stores, which is a wise precaution. Beer is not put under seal.

The Customs Boarding Officer will make an issue of bonded items daily, if requested.

7. For Customs Inspection:

Master's confirmation regarding ship's cargo, passengers and mail on board.

8. For Customs Search Party:

History of Vessel (in/out) Form	2 copies
Crew List	5 copies
Declaration of Walkie-Talkie List	2 copies
Arms, Ammunition and Explosives List	2 copies

The Customs Search Party do an efficient rummage on arrival, and again on sailing. Their main concerns seem to be drugs, cigarettes, foreign currency and pornography.

9. For Agent (of M.P.A. – Shipping Agency Department):

Myanma Port Authority Form of Import Manifest of Stores – Yangon	3 copies
Bonded Stores List	3 copies
Provision Stores List	3 copies
Deck Stores List	3 copies
Engine Stores List	3 copies
Arms, Ammunition and Explosives List	1 copy
Crew List	10 copies
Private Property List	3 copies
Foreign Currency List	3 copies
Ship's Particulars	1 copy

Ship's documents, which are given to the Agent for arrangements of clearance of the ship in and out:

Ship's Register.
Safety Equipment Certificate.
Safety Construction Certificate.
Safety Radio Telegraphy Certificate.
Load Line Certificate.
Port Clearance from Last Port of Call.

These documents are taken ashore by Agent on arrival, against a receipt, and returned immediately prior to departure.

3 Government Departments are involved with the vessel (Customs, Immigration and Quarantine), and issue Clearance on departure.

General:

1. Entertainment is extremely desirable. This is part and parcel of shipping life in Yangon.
2. Burmese people are unfailingly polite and courteous, and naturally expect the same treatment in return.
3. There are tugs in the port, but they were not used for berthing whilst our vessel in port. Pilots are very experienced, and all were found to be excellent ship handlers.
4. There is no garbage collection at Yangon, so the ship must make her own arrangements for storing waste.
5. Mosquitoes and many other insects are numerous, especially in the wet weather.
6. Navigation: Dagon Light Vessel was showing Gr. Fl. (3) 20 sec., but is sometimes not lit. The Racon is not operating.
7. Pilot vessel "Thamada" (call sign "XYCZ") anchors around position Lat. 16° 13′ N., Long. 96° 20′ E. It is equipped with VHF, and keeps watch permanently on Channel 16. To call on VHF, say "Pilot Vessel".

   When picking-up a pilot, the pilot vessel will be underway, when the sea condition is rough.

   Boat rope, manropes and heaving line are required. The pilot comes off by motor launch from pilot vessel.

   If the anchorage is crowded, extreme caution is advised while manoeuvring, due to very strong tides, estimated at 6 knots to 7 knots at Springs.
8. Yangon Port Information, which is shown in "Guide to Port Entry", is correct.

SHIPMASTER'S REPORT: September 1992.

1. Time: GMT plus 6.5 hours. No alterations during the year.
2. Communications: Communication between vessel and harbour and Harbour Authority was carried out by Telex No. 21208, and Agency Department of Myanma Port Authority by Telex No. 21208 (Telex No. 21447 is not working) via Inmarsat. Yangon Radio (call sign "XYR") does not keep watch schedules on HF (high frequency). All attempts to establish contact had negative results. The day before arrival at pilot station, contact was established with Yangon Radio (XYR) and pilot vessel (XYCZ) on MF. Yangon Radio keeps watch on MF according to schedule of Admiralty List of Radio Signals. The pilot vessel keeps a poor watch on 500 kHz. Pilot vessel keeps watch on VHF Channel 16 for calling another vessel, if it has any information from Harbour Master only, and does not answer other vessel's calls. Within harbour limits, contact can be made with Port Tower, call sign "XYU" on VHF Channel 16 (calling frequency).
3. ETA: Information required in advance of arrival: Exact ETA in local time, fresh water draft, speed, g.r.t., LOA, LBP, d.w.t., how many anchors on board, what is condition of radar. 48 hours advance notice of ETA required, confirmation to be made 24 hours later, or one working day ahead of ship's ETA.
4. Anchorages: At 0715 hrs., 31st August, vessel was anchored 3.5 miles S.E. of Lanthaya Light Float. At 1208 hrs., 15th September, vessel was unberthed during ebb flood, and anchored 1 mile from berth, and awaited tide up to Yangon, then proceeded via Inner Bar (near Monkey Point), and anchored at 1710 hrs. same day in New Explosives Anchorage to await daytime. Distance from coal berth to N.E. Anchorage – 14 miles. Distance from N.E. Anchorage to pilot station – 33 miles. Outer Bar located in the Western Channel (near Elephant Point).
5. Pilotage: Compulsory. River Pilots (3 men) took the vessel from pilot vessel (pilot station) to the Buoy No. 3, and Docking Pilots do the berthing and unberthing.

   River Pilots, when boarding and leaving, require pilot ladder, manropes and boatrope. Ladder rigged on the lee side.

   Docking Pilots board and leave by the gangway. Pilots are experienced.
6. Berthing: At 1045 hrs. on 2nd September, vessel was placed at Mooring Buoy No. 3 to obtain Pratique.

   Anchor cable down the hawsepipe and shackled on the buoy.

   At 1140 hrs. on 4th September, the vessel was secured alongside Sule Pagoda Wharf – Berth No. 4.

   We berthed starboard side to, stemming the ebb tide and river outflow. Tugs are not used during berthing.

   Sule Pagoda Wharf – Berth No. 4, is a berth for general cargo, and storage of cargo situated about 5 miles from ship.

   At 1820 hrs. on 9th September, vessel was shifted to Hteedan Coal Berth.
7. Formalities: Required on arrival.

   26 Crew Lists.
   5 Crew Personal Effects Lists.
   5 Ship's and Crew Declarations of Foreign Currency.
   3 Deck Stores Lists.
   3 Engine Stores Lists.
   5 Bonded Stores Lists.
   5 Stewards Provisions Lists.
   5 Arms and Ammunition Lists.
   10 Walkie-Talkie Lists.
   5 History of Vessel Lists.
   3 River Police Department Declarations.
   3 Naval Intelligence Unit Declarations.
   3 Special Intelligence Declarations.
   1 International Health Declaration.
   3 Ship's Particulars.
   3 Mail Lists.
   Ship's Register.
   Safety Construction Certificate.
   Safety Equipment Certificate.
   Safety Radiotelegraphy Certificate.
   Load Line Certificate.
   Register of Ship's Cargo Gear and Lifting Appliances.
   Last Port Clearance.
   List of Dates of Cholera Vaccinations.

   It is most important that all paper money of any foreign currency is accurately declared, and then placed in Master's safe under seal during the vessel's port stay.

   Immigration require 3 photographs of each crew member and will issue Shore Passes.

   Customs seal the bond, firearms (rockets), foreign currency and walkie-talkies.

   One cabin required for Customs Boarding Officer, who lives and eats on board before sailing.

   On arrival at Mooring Buoy No. 3, to obtain Pratique, the following Port Authority personnel came on board:

   1. Quarantine Officals – 4 men.
   2. Police Officers Special Intelligence, Naval Intelligence – 5 men.
   3. Immigration Officials – 9 men.
   4. Customs Inspection – 4 men.
   5. Customs Search Gang – 25 men.

   Time and trouble on arrival can be saved by collecting all foreign currency in advance, readiness of all papers, cigarettes, spirits, beer, soft drinks and food are required for entertainment (very important).

   Required on departure:
   20 copies Crew List.
   2 copies History of the Vessel.

   One cabin required for 2 policemen, who live and eat on board when the vessel awaits high tide at anchorage.
8. Pratique: There are no facilities for Radio Pratique. Pratique granted on arrival at the harbour port limits.
9. Agency Department of Myanma Port Authority. Telex: 21208. Cables: "Portrust Yangon". VHF: Channel 16 through Port Tower. Agency is Government company. Mr. Kyi Tha, the Agent, is experienced.
10. Cargo: The vessel loaded a full cargo of 5,901.55 tonnes of copper concentrate from 1450 hrs. on 4th September to 0100 hrs. on 15th September. Cargo was brought alongside by 8 – 11 trucks and loaded ex-wharf by ship's cranes. Each truck has 3 buckets with total capacity of 4.5 tonnes.

    Loading rate is very slow as a lot of time was lost due to the following:

    1. Rain – 49.3 hours lost, on average 4.7 hours per loading day.
    2. No stevedores – 38.25 hours lost, on average 3.6 hours per loading day.
    3. Very old technology for loading – on average loading rate was 565.8 tonnes per loading day.

    All attempts to improve loading process (to use payloaders, to save time during changes of gangs, to use special hook for loading 2 buckets at one time, to use buckets of larger capacity) failed, as local regulations (Customs, Immigration, Port Authority, etc.) are extremely strict, and each problem/question requires a lot of time and efforts for agreement between different departments, and very difficult to reach positive results. Local Government is military, and all Departments are under military control.
11. General: Watchmen are not compulsory, but recommended. 4 or 5 watchmen were provided, when the vessel was alongside the wharf, they eat ashore.

    There is no garbage collection at Yangon.

    Fresh water is available by the barge, but expensive, 56 Kyats (U.S.$ 9.51) per ton, and from Wharf 12 Kyats per ton. Minimum quantity of fresh water supplied is 50 tons.

    Medical facilities are available, but are very expensive.

    Fresh provisions may be obtained at the local markets at reasonable prices.

AUTHORITY: Myanma Port Authority, P.O.Box No. 1, Yangon, Union of Myanmar. *Tel:* 83122. *Telex:* BM 21208, BM 21219. *Cables:* Portrust Yangon. *Contact:* The Managing Director.

NOTES

Please also advise Shipping Guides Ltd.

Namibia

LUDERITZ: 26.39 S. 15.09 E. (See Plan)

PORT LIMITS: East of the line from Angra Pt. to a point 1,097 m. due North thereof, thence by a line from the latter point to the South shore extremity of N.E. Point.

DOCUMENTS:

1 copy Arrival Form T958 for Agent.
2 copies Crew List.
2 copies Passenger List.
Certificate of Ship's Registry.
Ship's Articles.
Manifests.
Charter Party.
Bills of Lading.
Official Log Book.
List of Dutiable Stores.
Ship's Radio Station Licence.
Safety Certificate.

PILOTAGE: ETA at least 72 hours in advance if possible; unless in an emergency. Cables addressed to Port Captain Luderitz.

All pilotage inside port limits is compulsory.

Pilot Boarding Positions: 1 mile North of Angra Point. Contact Pilot on VHF Channels 16 and 12.

Pilot Vessels: "Fisant": Black hull, white wheelhouse and yellow roof. Yellow funnel. "Tern": Black hull, white upperworks, wooden wheelhouse. Yellow funnel.

Specific Requirements:

2 manropes at ladder.
Lifebuoy at ladder.
Ship's officer in attendance when Pilot embarking or disembarking.

At night, the ladder is to be lit without blinding Pilot. No broken or slippery ladder rungs.

ANCHORAGES: Outside port limits: Shearwater Bay: Between Diaz Pt. and Angra Pt. Good holding ground. Depth up to 20 m.

Inside port limits: Luderitz Harbour: Between Angra Pt. and Shark Island. Good holding ground. Depth up to 16 m.

Robert Harbour: Between Shark and Penguin Islands. Good holding ground. Depth up to 9 m. Confined anchorage.

RESTRICTIONS: Docking and undocking may take place between 0600 hrs. and 2200 hrs. or at any other time in an emergency.

MAX. SIZE: Shearwater Bay: No restrictions. Luderitz Harbour: No length restrictions, draft 15 m. Robert Harbour: Length approx. 140 m., draft 7.5 m. Alongside main jetty: Length up to 105 m., draft 6.0 m. (In an emergency 6.1 m.)

HEALTH: Arrange for Pratique via Agent.

RADIO: Radio-telephone calls, cables etc. to Agents, Shippers, etc, through Walvis Bay Radio; call sign ZSV. Frequencies as per International Telecommunication Union list of Coast Stations.

VHF: VHF contact with Port Control on Channels 16 and 12. Working Channels: 6, 8, 9, 10, 11, 13, 14, 17, 67, 68, 69, 70, 71, 72, 73 and 74. Same VHF channels apply to Pilot and Tugs.

Diaz Point Lighthouse maintains a 24 hour watch on VHF Channel 16; with working channels as for Port Control. If no reply from port control, contact Diaz Point Lighthouse.

RADAR: No port radar service.

TUGS: Two small tugs are stationed at the Port: "Tern" (diesel) of 850 h.p. length 26 m. and "Fisant" (diesel) of 220 h.p. length 14 m.

Tugs usually join vessel at head of the channel in Robert Harbour. Tugs lines' are used; at no extra charge.

Tugs are equipped with fire fighting hoses and salvage pumps.

BERTHING: Entrance Channel: Length 708 m., width 60.9 m., depth 6.1 m.

Turning Basin: 236 m. by 198 m., depth 6.1 m.

Main Jetty: Length 242 m. Two berths of 92 m. length, depth 6.1 m.

Wooden Jetty: Length 168 m., depth 3.5 m.

One berth is available on each side of the main jetty for vessels up to 150 m. in length. A draft restriction of 6 m. at low tide exists. Sea bottom alongside berths and entire channel is soft mud and silt.

The wooden jetty is used mainly for the local fishing fleet of small wooden boats.

No specialised berths exist at Luderitz, at present.

CRANES: 2×4 ton cranes able to work over either side of jetty but unable to work in tandem. Any heavier lifts by ship's gear only.

STEVEDORES: 72 hours' notice is required in order to arrange gangs. Average rates: Frozen fish 18 t.p.h. General cargo 32 t.p.h. Timber 45 t.p.h.

MEDICAL: 2 doctors, one hospital (36 beds), one hospital (160 beds), notice of 4 hours required, except emergencies.

TANKERS: 2×10 in. diameter DGO pipe-lines, all necessary fittings ashore. SG 0.854.

DENSITY: 1025.

FRESH WATER: Available on jetty by pipe-line through meter at approximately 25 t.p.h.

FUEL: Gas oil connections to 2×254 mm. pipe-lines from shore tanks.

Gas oil bunkers points on the main jetty supply at approximately 25 t.p.h. 1,200,000 litres of gas oil are available.

Small quantities of gas oil by 6,819 litre capacity road tanker are also available at immediate notice.

CONSULS: None.

REPAIRS: Light engineering facilities exist. Underwater inspections and working divers available.

DRY DOCKS: One slipway of 400 tons capacity and 1×150 ton capacity. Used mainly by local fishing boats.

SURVEYORS: Department of Transport surveyor is available at Walvis Bay. Cargo surveys, underwater surveys and other independent surveys are available by Master Mariner (foreign-going).

GANGWAY/DECK WATCHMEN: Not necessary but available if required.

HATCHES: Opened and closed by crew.

CARGO GEAR: Alongside jetty by shore cranes (4 ton capacity) by ship's gear at anchor when using lighters. Eight lighters, 26 m. long, 150 ton capacity are stationed at the port.

REPATRIATION: Handled by Agent.

AIRPORT: 12 km. from harbour. 2 flights a week to and from Windhoek and Cape Town. Charter flights may be arranged.

TIME: GMT plus 2 hours.

HOLIDAYS: Cargo can be worked on any day.

POLICE/AMBULANCE/FIRE: Police: 10111, Ambulance: 2266, Fire: 2607.

TELEPHONES: Available R30.00 per connection plus usage.

SERVICES: Compass adjusting, diving and cargo surveys.

SHIP SUPPLY SERVICE: An Off-Shore Ship Supply Service is operated by the Namibian Transport Services (Harbours) by means of a small tug and (occasionally) by means of a launch.

If the vessel does not have an Agent at the port, a deposit is required before the service will be rendered. The service is provided on a 24 hour basis, provided (except in an emergency) the necessary arrangements are made during normal office hours.

The tug has a capacity of approximately 3 tons and 24 passengers, but the capacity of the launch is severely limited.

The normal rendezvous position is approximately 3 miles N.E. of Diaz Point Lighthouse (Position of lighthouse: Lat. 26° 38.2′ S., Long. 15° 05.6′ E.) but the tug, by special arrangement, will proceed further to seaward if required. The depth of water at the normal rendezvous position is 22 m.

SHORE LEAVE: 24 hours at anchorage, launch available. No restrictions when alongside.

IDENTIFICATION CARDS: Seaman's Book.

GARBAGE DISPOSAL: Drums are available. Collection on request through ship's Agent or Port Control. Tel: 06331-2337.

WASTE OIL DISPOSAL: Drums are available. A 1 cu.m. mobile tank for use on wooden jetty is available. Contact Port Control, Tel: 06331-2337.

SEAMAN'S CLUBS: None.

CURRENCY: South African Rand (R). U.S.$ 1.00 = R 2.70 (3.5.91).

DELAYS: No delays normally, except due to weather.

GENERAL: Fresh provisions, supplies and services available by arrangement with Agent.

Basic weather conditions: Summer – South to S.W. wind up to 35 knots frequently experienced. Winter – winds variable but mainly North up to 20 knots. Fog is frequently experienced West of Angra Pt.

Charts: BA. 3861 and 3863; South African Naval Charts: 1002 and 1003.

SHIP'S OFFICER'S REPORT: December 1983.

Medical: No facilities for blood tests; these can only be done when there is a direct flight to Capetown.

Surveyors: Port Captain acted as Cargo Surveyor.

Customs: Very strict regarding magazines. These should be sealed in bonded store, otherwise fines payable.

Shore Leave: Possible from anchorage using tug.

Stores: Fresh vegetables available, but at very high prices.

AUTHORITY: Namibian Transport Services, P.O.Box 88, Luderitz 9000. *Tel:* 2337 or 21240. *FAX:* (06331) 21230.

AGENT: King & Sons (Pty.) Ltd. P.O.Box 529, (Corner 13th Road and 3rd Street East), Walvis Bay 9190, Namibia. Tel: 0642-2771. Telex: 0908-3504. Fax: 0642-3994.

WALVIS BAY 22.57 S. 14.30 E. (See Plan)

PORT LIMITS: The area bounded on the West by a line drawn from Pelican Point Lighthouse to a point North (true) for a distance of 4 km; on the North by a line from this point drawn East (true) to the mainland; together with the foreshore therein and the jetties, harbour works and harbour lands vested in the Government. For the purposes of calculating port charges a vessel is regarded as an "arrived ship" when it enters the dredged channel in Walvis Bay Harbour or when the vessel anchors in the port limits.

DOCUMENTS:

5 copies Crew List.
8 copies Passenger List.
2 copies Report Inwards/Outwards.
2 Certificates of Clearance DA3.
2 copies Transire DA4 for each port of call.
Manifest of Cargo in duplicate.
3 copies Manifest of Stores DA5.
1 Portnet Clearance.
Shipping Master's Certificate.
Immigration Certificate.
Post Office Certificate.
Income Tax Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Load Line Certificate.

PILOTAGE: Pilotage is compulsory. The vessel's Master must radio his ETA to his local Agent, who completes Form T.958 for submission to the Port Authority.

Channel 16 on VHF radio can be used to call the Port Control Office, working Channel 12. Pilot boats are normally black with a white superstructure and have a yellow funnel with horizontal green stripes.

The Pilot boards at a point approximately 0.5 miles North of the Fairway Buoy (Entrance Channel Buoy) in the direction of the Bell Buoy (Pelican Point Spit Buoy).

The Pilot will inform the Master by means of the VHF on which side the pilot-boarding ladder and manropes are required.

ANCHORAGES: Varying in depth from 13 m. – 14 m. at LWOST 1.0 miles North of Fairway Buoy. Bottom – sand and silt. (Please also see "Africa Pilot" Vol. II).

RESTRICTIONS: The movement of Oil Tankers and vessels carrying explosives or dangerous goods are restricted to daytime hours (berthing 0600 hrs. – 2000 hrs., unberthing up to 2145 hrs). The maximum permissible draft is 10.4 m.

MAX. SIZE: Max. LOA 224 m., max. draft 10.4 m.

HEALTH: Master to contact Port Health via Walvis Bay Radio to request Pratique. Same procedure applicable if disease reported.

RADIO: Call sign ZSV. VHF radio in Port Captain's Office.

VHF: Port Control equipped with VHF Channels 16 – 12. Port working Channels 9 – 11.

RADAR: Radar is fitted to the harbour tugs and pilot boats. Master to contact Port Control for radar service.

TUGS: Two first-class tugs equipped with radar, wireless telegraph and telephone, direction-finding apparatus and salvage and fire-fighting appliances; 2 Pilot boats and 1 launch.

Tugs normally join a vessel on Pilot's request in the entrance channel and are secured by means of the tugs' wires.

BERTHING: 8 berths available excluding tanker berth. Quay length 1,409 m., max. permissible draft 9.9 m. (salt water). Load/discharge by shore cranes unless cargo of such nature that it is essential to use ship's derricks. Berth Nos. 1 – 6 general cargo, No. 7 container berth and No. 8 berth allocated to bulk loaders, also utilised as repair berth.

CRANES: 18 cranes available, 17 × 4 tons, 1 ×15 tons.

BULK CARGO FACILITIES: Berth Nos. 1 – 6 utilised if necessary. Berth Nos. 1 – 7 served by shore cranes. Max. draft 9.9 m. (salt water). Bulk cargoes at Walvis Bay consist of salt/petalite.

SPECIALISED CARGO HANDLING FACILITIES: Berth No. 7 utilised as container berth. Ro/Ro vessels berthed at No. 6, liquid chemicals at Berth No. 5. Container stacking area and 2 container stacking cranes available. Ship's gear will still be required for loading and unloading containers. Liquid chemicals are handled in tank containers.

STEVEDORES: Stevedoring is undertaken by private enterprise and stevedores are appointed by Ships' Agents.

Stevedores require minimum notice 72 hours prior arrival. Main export salt in bags rate 18/25 t.p.h. depending on method of delivery to ship's side (rail/road).

MEDICAL: Hospitals are available but prior arrangements have to be made with Agents for medical assistance.

TANKERS: Only one berth available. Max. length of vessel accommodated 650 ft. Diameter of load/discharge lines 10 in. and 12 in. Discharge rate 10 in. – 240 t.p.h. and 12 in. – 350 t.p.h. Max. draft 9.9 m.

DENSITY: 1025.

FRESH WATER: Available and delivered by hose ex-wharfside – hydrant at 35 t.p.h.

FUEL: Gas oil only available, 12 hours' notice required. Delivery by pipe-line or tank truck.

FIRE PRECAUTIONS: When berthed alongside a wharf or jetty, a ship having explosives or any other goods of a dangerous nature, the Master shall, if the Port Captain so directs, have a fireman in attendance, the cost whereof shall be borne by the Owner of the ship and the Master of any such ship shall also, at the expense of the Owner of the ship, adopt such other or further precautionary measures as the Port Captain may consider reasonably necessary for ensuring the safety of the harbour, the ship or the cargo.

CONSULS: France.

REPAIRS: All types of deck and engine repairs possible.

DRY DOCK: There are no dry-docks available at this port. A syncrolift with a lifting capacity of 2,000 tons, maximum permissible length of 72 m., max. beam 13 m., and a depth of 10 m. is operated and owned by the Department of Sea Fisheries.

SURVEYORS: Lloyd's and N.V. represented.

GANGWAY/DECK WATCHMEN: Arrangements have to be made with vessel's Agents to secure services of gangway/deck watchmen.

HATCHES: Opened by crew.

CUSTOMS ALLOWANCES: Officers: 200 cigarettes, wine 3 litres, spirits 1 litre, beer 2 litres.

Crew: 3 litres wine, 200 cigarettes.

Allowances are based on 4 day issues.

CARGO GEAR: Loading/discharging of cargo is effected by means of shore cranes. 30 ton mobile crane available in case of emergency.

REPATRIATION: All facilities available.

AIRPORT: Situated 14 km. from Walvis Bay. Served by Namib Air/Air Cape, 3 flights per week, Wednesday/Friday/Sunday.

TIME: GMT plus 2 hours.

HOLIDAYS: New Year's Day (1st January); Good Friday; Easter Monday; Ascension Day; Day of Covenant (16th December); Christmas Day; Boxing Day (26th December).

Cargo worked on all holidays except Christmas.

POLICE/AMBULANCE/FIRE: Police Tel. 10111; Ambulance Tel. 3441; Fire Department; Municipal: Tel. 3117.

TELEPHONES: Arrangements have to be made with Post Office to have a telephone connected.

SERVICES: 24 hour launch service available, divers inspect fouling, underwater photography, tank cleaning, hold cleaning, compass adjusting, radar repairs, hull cleaning.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Seaman's Book sufficient.

GARBAGE DISPOSAL: Collection service is available by means of 2×10 tonne high side trailers on a daily basis or when required. 18 purposely designed skips per berth are on the quays. Charge for garbage disposal R24.20 per cu.m. or part thereof.

WASTE OIL DISPOSAL: Road transport service available at R50 per hour. Capacity: 27,000 litres. Hopper barge and hire of sludge pump available for waste oil.

SEAMAN'S CLUBS: Mission to Seaman, 13th Road, Walvis Bay. Tel: 2594. Facilities include shop, telephone, church services, bus collection.

CURRENCY: South African Rand (R). U.S.$ 1.00 = R2.73 (16.4.91).

REGULATIONS: A copy of the Regulations are supplied gratis to Masters on arrival.

DELAYS: Most delays caused by fog.

AUTHORITY: Portnet, P.O.Box 361, Walvis Bay 9190, Namibia. *Tel:* (0642) 8201, 8202. *FAX:* (0642) 8390. *Contact:* Captain J-D von der Fecht, Port Manager.

AGENT: King & Sons (Pty.) Ltd., P.O.Box 529 (Corner 13th. Road and 3rd. Street East), Walvis Bay 9190. Tel: (0642) 2771. Telex: 0908-3504. Fax: (0642) 3994.

NOTES

Please also advise Shipping Guides Ltd.

Republic of Nauru

NAURU: 00.32 S. 166.56 E. (See Plan)

PORT LIMITS: Vessels to arrive approximately 4 miles to the West of the island and establish contact with Nauru Port Control on VHF Channel 16 to obtain further instructions. Vessels are advised not to approach closer than 0.5 miles off the island, due to very strong and variable currents.

DOCUMENTS:

International Declaration of Health, 1 copy.
Clearance from Last Port.
Crew Lists, 2 copies.
Passenger Lists, 2 copies.
Manifest, 1 copy.

PILOTAGE: Pilotage is compulsory. The pilot station is 0.25 miles bearing 315° (T) from the Northern-most buoy ('A1') of the Northern (No. 2) cantilever, on the West side of the Island, which is approximately 0.5 miles offshore.

Masters should inform the Harbour Master on departure from last port, 72 hours and 24 hours before arrival. ETA messages should be sent through Radio Nauru (C2N) or through Sydney Radio to telegraphic address "Nauruphos Nauru" or telex No. ZV 33082 Nruphos for attention of the Harbour Master. On receipt of the second ETA message, Nauruphos will advise the Master through Nauru Radio or Sydney Radio of any messages for the vessel.

The Harbour office is open from 0700 hrs. daily, 0730 hrs. Sundays, and the Harbour Master will contact vessels on VHF Channel 16 or 2182 kHz regarding berthing instructions.

Vessels should fly the Nauru National flag when approaching the island.

A safe, clean pilot ladder with 2 manropes should be rigged on the port side of the vessel with the bottom rung 0.7 m. above the water. Vessels should approach the pilot station from the North on a heading of about 220° (T).

The pilot normally remains on board throughout the period that the vessel is made fast to the mooring system. The weather is extremely unpredictable and the vessel may be required to slip and sail at very short notice.

ANCHORAGES: No sea anchorage is available at Nauru due to extreme depths of water all around the island. Vessels unable to moor due to adverse weather, late arrival or berth occupancy drift off the port and return by daylight next morning, or when required to do so by the Harbour Master.

There are no known shoals offshore.

RESTRICTIONS: There are no restrictions on draft or tide. Onshore winds (Westerly) generate an onshore set which may make ship handling unsafe when the Harbour Master will declare a non-weather working day. Vessels are only brought in to the moorings during daylight hours.

MAX. SIZE:

No. 1 (Southern) Cantilever:

Maximum arrival deadweight	18,000 tonnes.
Maximum sailing displacement	32,000 tonnes.
Maximum length	192.02 m.
Maximum beam	28.34 m.
Maximum airdraft	11.82 m.

No. 2 (Northern) Cantilver:

Maximum arrival deadweight	18,000 tonnes.
Maximum sailing displacement	42,000 tonnes.
Maximum length	192.02 m.
Maximum beam	28.34 m.
Maximum airdraft	12.73 m.

HEALTH: Masters of vessels approaching Nauru are required to send a telegram or telex directly to the Quarantine Officer, Nauru, not more than 24 hours and less than 12 hours before arrival either through Nauru Radio or Sydney Radio. The quarantine message should state the name of the last port, the date of departure from the last port, the number of crew and passengers, and the presence of any infectious disease. If no reply is received from the Quarantine Officer, the vessel should call Nauru Radio on VHF Channel 16 and obtain pratique, after arrival off the island. The telex number of the Quarantine Officer is ZV 33086 NRUMIC.

RADIO: Nauru Radio. Call Sign: C2N.

Hours of operation:	0800 – 1300 (local time)	2000 – 2330 (UTC)
	1300 – 1630 (local time)	0100 – 0430 (UTC)

For frequencies and schedules see 'Admiralty List of Radio Signals'. If difficulty is experienced in raising Nauru Radio, messages can be passed through Sydney Radio or any convenient Coastal Radio Station. Messages may also be sent to Nauru Radio on telex No. ZV 33086 NRUIMC or ZV 33081 GOVNRU.

There is a short wave radio in the Harbour Office and contact can be made on 2182 kHz. Other frequencies are 6215.5 kHz, 6221.6 kHz and 16590.2 kHz.

VHF: The Harbour Office (Nauru Port Control) has a VHF set with a range of 20 miles to the West of the island. Difficulty is experienced communicating by VHF with vessels to the East of the West side of the island.

Calling: Channel 16 – Working: Channel 14.

Nauru Radio Station is situated on the South side of the island. Some difficulty is experienced communicating by VHF with vessels to the North of the island. Nauru Radio operates on Channels 16, 11, 26 and 68.

RADAR: A radar set is installed in the Harbour Office for the purpose of monitoring rain squalls.

TUGS: No tugs available.

BERTHING: There are 2 sets of mooring buoys for the phosphate loading cantilevers. The mooring gear for making fast to the mooring system for vessels coming to load phosphate or discharge oil is supplied from ashore. Mooring gangs board the vessel at the pilot station to carry out the mooring operation under the direction of the duty Harbour Master (Pilot). All Harbour Master's are qualified Master Mariners. Ship's anchor cables are not used. The ship's forward and after cranes/derricks must be rigged on the port side for lifting the mooring gear on board.

A vessel is moored initially to the outer buoys which are anchored in approximately 600 m. of water and are then hove to an inner mooring system. In the loading position the vessel lies in about 30 m. of water and about 18 m. – 24 m. from the reef edge.

Loading of phosphate is from 2 cantilevers with a combined pour rate of 3,000 tonnes per hour.

Vessels handling containers or general cargo tie up to the outer buoys and use ship's lines. Lighters are brought alongside for the handling of cargo.

STEVEDORES: Supplied by Nauruphos, no advice required. When shore mooring ropes are used, the stevedore supervisors are in charge of the mooring gangs fore and aft. Cargo operations are normally conducted during daylight hours only. Occasionally vessels may be sailed after dark if it is possible to complete phosphate loading by 2200 hrs. General cargo is not handled after dark.

MEDICAL: Medical treatment can be given at short notice. There are 2 hospitals on Nauru and emergency surgery can be carried out. Cholera vaccinations are required if the vessel has come from an infected area.

If vessels are calling at the island solely for the purpose of obtaining medical assistance, the request for medical assistance should be sent directly to the Principal Immigration Officer, Nauru, on telex No. ZV 33086 NRUIMC or ZV 33081 GOVNRU.

TANKERS: Length and beam as for phosphate vessels. 8 in. discharge line, to storage tanks, capable of 60 p.s.i. discharge pressure.

Small tankers (less than 150 m.) usually use ship's lines for head and stern lines, but inner and outer breast lines are supplied from shore as for phosphate vessels.

DENSITY: The entire mooring system is in the open sea. Normal salt water at all states of tide and season.

FRESH WATER: Water on the island is scarce and has to be imported. Water will only be supplied in cases of emergency, and then in very small quantities.

FUEL: Island stocks are imported for use in the phosphate industry. Bunkers are not normally supplied. Limited quantities may only be made available in cases of extreme emergency.

CONSULS: Australian and Republic of China (Taiwan).

REPAIRS: Small repairs such as welding, brazing and lathe work may be carried out when such repairs are essential to allow the vessel to proceed on its voyage. Electronics technicians employed by the phosphate corporation may be able to effect repairs to electronic navigational aids providing that circuit diagrams are available.

Main engines may not be immobilised while the vessel is made fast to mooring system.

SURVEYORS: Nauru Phosphate Corporation is the appointed agent of Lloyd's of London. The Harbour Master performs the surveys. Draft surveys are the responsibility of the vessel.

GANGWAY/DECK WATCHMEN: The inshore gangway is usually used for labour to gain access to the vessel. The alighting platform of the gangway should be suspended about 2.0 m. above the water. A member of the crew should be available to raise or lower it as necessary.

OPENING/CLOSING HATCHES: Carried out by ship's crew.

CUSTOMS ALLOWANCES: No restrictions on crew consumption apply. Trading between ship and shore is prohibited.

CARGO GEAR: Cargo gear should be up to the standard demanded in Australian ports. Derricks and/or cranes must be topped and made ready for operation by the ship's crew who should instruct the winch/crane operators in their use. The handling of containers and general cargo is by ship's gear only.

REPATRIATION: Repatriation can be arranged. No facilities are provided for crew changes.

AIRPORT: Airport is 1 km. from the Harbour Office. Air Nauru operates regular flights to Australia, New Zealand, S.E. Asia and major locations in the Pacific.

TIME: GMT plus 12 hours. No alterations during the year.

HOLIDAYS: Christmas Day, New Year's Day, Good Friday and Easter Sunday are normally closed holidays. Other National holidays occur during the year but work normally continues on these days.

POLICE/AMBULANCE/FIRE: All emergencies are handled by the Harbour Masters.

TELEPHONES: Nauru International dialling code: 674.

No telephones are placed on board. The duty Harbour Master and Stevedore Supervisors carry radios for communication with the Harbour Office, wharf supervisors and plant operators. No radiotelephone facilities exist.

SERVICES: No special services are available.

BANKS: The Bank of Nauru is the only bank on the island. There are 2 branches of the bank, both within 0.5 km. of the Harbour Office.The main office is located in the Civic Centre. The currency of Nauru is the Australian dollar. Money transfers can be arranged directly with the bank, or through the Westpac Bank of Australia.Bank of Nauru, P.O.Box 289, Republic of Nauru, Central Pacific. Telex No. ZV 33085 BANKNRU. Telephone 5239 and 5240.

STORING: No facilities exist for revictualing or the provision of stores.

SHIP SUPPLY SERVICE: The Marine Department can provide a barge to ferry personnel to and from the ship in emergency cases. At all other times, use of the barges is subject to availability. A charge of A$50.00 is levied for the service.

SHORE LEAVE: This may be granted by the Master in consultation with the Harbour Master on board.

IDENTIFICATION CARDS: Some form of identification, Passport, Discharge Book, or I.D. card, should be carried by crew members.

REGULATIONS:

1. Unless otherwise advised, derricks and/or cranes must be rigged for discharging to or from lighters alongside the vessel.
2. The rigging and adjusting of derricks and cranes prior to, or during cargo operations is the ship's responsibility.

3. Shore crane drivers are supplied solely for the loading and discharge of cargo.
4. The opening and closing of hatches is the ship's responsibility.
5. Shore labour does not apply or release cargo lashings, except in the case of twistlocks within a container stow.
6. Hatch cleaning is not performed by shore labour as part of cargo operations.
7. The handling of ship's moorings is the responsibility of the ship's crew. Shore labour will handle the moorings when the vessel ties up alongside the phosphate loading cantilvers.
8. Normal hours are 0700 – 1900. Any variation is at the Harbour Master's discretion.
9. The pilot is to be provided with access to the wheelhouse at all times in order to operate the radar to detect rain squalls.
10. Mooring winches to be available at all times.
11. The engines are not to be immobilised, but are to be ready at 10 minutes notice. When notice is given, it is expected that the mooring winches will be immediately available.
12. The weather is extremely unpredictable. If the weather deteriorates, the vessel will be slipped from the moorings and put to sea *WHETHER OR NOT THE MASTER AND CREW ARE ON BOARD*. For this reason, it is imperative that the vessel is adequately manned at all times.
13. Barges may be provided to ferry crew ashore, subject to their availability. All requests should be referred to the pilot or Stevedore Supervisor.
14. Vessels must not approach the port unless requested to do so.
15. Trimming of bulk phosphate is not performed by shore labour.

DELAYS: Normally no delays should be expected. Vessels arriving in the afternoon usually berth the following day. One or two days delay may be experienced due to port congestion, but this is rare. Phosphate vessels usually take preference over other vessels which will be berthed after the phosphate vessels have tied up.

Delays can occur due to adverse weather, the duration of which is unpredictable.

GENERAL: The mooring system is in the open sea with no protection from the wind or waves from the West. Waves under the cantilevers are shorter and steeper than outside as a result of the shoaling effect of the coral reef. Vessels are continually rolling and heaving while under the cantilevers This makes it extremely dangerous for the ship's crew to open and close hatches with pontoons.

Vessels with derricks cause delays because it is usually not possible to swing the cantilevers between hatches for the various pours without heaving the vessel out on the moorings and back in again after shifting the cantilever.

Easterly trades predominate for most of the year when the mooring system is in the lee of the island. However, Westerly monsoons blow during the wet season from November to March. Westerly winds blow up to 45 knots and rain squalls are frequently experienced. Strong onshore currents remain for several days after the winds have eased. For this reason it is extremely dangerous to approach the buoyage system after Westerly winds.

During the monsoon season vessels should have sufficient fuel, fresh water and provisions for at least 30 days over and above the normal duration of the voyage.

Strong mooring winches are essential since no tugs are available and the vessel has to heave out on the mooring ropes before sailing.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Australian Dollar (A$). U.S.$ 1.00 = A$ 1.33 (2.5.91).

AUTHORITY: Nauru Phosphate Corporation, Marine Department, Aiwo District, Republic of Nauru, Central Pacific. *Tel:* 4192, 4191. *Telex:* ZV 33082 NRUPHOS "Attn. Harbour Master". *Cables:* Nauruphos, Nauru. *Fax:* Area Code 674, No. 4111. *Contact:* Harbour Master, Tel. Office 4189. Residence 4459.

NOTES

Please also advise Shipping Guides Ltd.

Netherlands

AMSTERDAM: 52.22 N. 04.54 E. (See Plan)

PORT LIMITS: Notice of Readiness will only be accepted (subject to C/P terms) if vessel has actually arrived at Amsterdam, which means that vessels have to enter from sea and pass the locks at Ymuiden, proceeding through the North Sea Canal to Amsterdam. There are various buoys and quays available where vessels can be moored waiting for final discharging berth.

DOCUMENTS:

Health Certificate. Forms obtainable from sea Pilot.
Crew List in triplicate.
2 copies of Crew Manifest for cigarettes, cigars, spirits, etc., belonging to crew.
Passenger List in triplicate.
1 copy of Manifest.
1 copy of Bills of Lading.
Dangerous Cargo List.
Ship's Register.
1 copy Stores List.
Also see "Rotterdam".

PILOTAGE: Pilotage is compulsory. Pilot boards from tender in the vicinity of Ymuiden between the light whistle buoy and the moles.

In order to avoid delays, Masters who require a Pilot must advise their ETA not less than 6 hours in advance to "Traffic Centre Ymuiden". This advice must be amended, if vessel's ETA changes more than 2 hours from the original advice.

The text of the message must contain: *(a)* the words "ETA-Pilot", *(b)* expected time arrival (group of 4 figures) in middle European time, *(c)* draft with indication of unit applied, *(d)* port of destination.

"Traffic Centre Ymuiden" (Telegraphic address "Pilot VTS IJmuiden") can be informed via Scheveningen Radio or via VHF Channel 12. Pilotage and navigation is possible at night.

Pilotage by Helicopter: When the pilot service by tender has been suspended owing to weather conditions it is possible to take a Pilot on board vessels by helicopter. Helicopter pilotage is carried out for vessels which have an obstacle free hoisting area on deck of minimum 4.6 m. in diameter. Deck plans should be provided in advance.

Vessels with draft of over 45 ft. (S.W.) will use helicopter pilotage.

Restrictions:

1. Min. visibility 800 m. at 150 ft. above sea level.
2. Max. wind Force 10 (55 knots).
3. Severe turbulence and icing conditions at or below 150 ft.

Pilot Ladders: Bottom of the pilot ladder should be 6 ft. above the water. Pilots strictly adhere to Regulation 17b, Chapter V of the International Convention for the Safety of Life at Sea, which reads as follows:

"Whenever the distance from sea level to the point of access to the ship is more than 30 ft. (9 m.), access from the pilot ladder to the ship shall be by means of an accommodation ladder or by another equally safe and convenient means".

Also see "Ymuiden".

ANCHORAGE: Anchoring in Ymuiden outer harbour, North Sea Canal and in harbour of Amsterdam is prohibited.

RESTRICTIONS: Entry possible at night.

MAX. SIZE: Vessels proceeding to Amsterdam have to pass locks at Ymuiden. Dimensions of Northern lock (largest): 400 m. long, 50 m. width and 15.00 m. deep at N.A.P. (N.A.P. is 1.13 m. above LLWS.) Max. LOA 325 m. Max. width 42 m., and with special permission up to 45 m.

At max. width 45 m. the max. draft is 40 ft. salt water. Between 45 m. width and 42 m. width the draft increases gradually from 40 ft. till 45 ft. salt water. All these ships have to pass the locks with special permission.

The official max. draft to enter Ymuiden is 54 ft. salt water. Vessels with a draft of 43 ft. to 45 ft. salt water may enter Ymuiden and proceed to Amsterdam.

RADIO: Cable Agents giving ETA, draft, cash and other requirements via Scheveningen Radio/PCH.

BERTHING: Possible at night. If no berth available vessels may be moored on buoys.

24 hours service.

TUGS: Sea-going tugs available between piers at Ymuiden assisting vessels, into locks or outer harbour. Harbour tugs available in locks assisting vessels to Amsterdam. The rates include use of tug hawser.

CRANES:

	Capacity	Number
General cargo cranes	1 – 30 tons	58
General cargo cranes for inland craft	1.5 – 5 tons	3
Bulk-cargo cranes (shipping)	2 – 16 tons	10
Container cranes	50 tons	3
Mobile container cranes	35 & 45 tons	2
Container railway cranes	35 tons	2
Van carriers	30 tons	3
Table cranes	5 – 30 tons	7
Transporter bridges	7 – 50 tons	8
Floating bulk cargo cranes	2.5 – 16 tons	8
General cargo cranes (industry)	1 – 40 tons	13
Bulk cargo cranes (industry)	1.5 – 6 tons	10
Mobile cranes (shipping)	1 – 6.5 tons	12
Floating derricks	10 – 300 tons	12

CARGO HANDLING FACILITIES: Grain:

I.G.M.A. (Internationale Graanoverslag Mij. Amsterdam B.V.): The grain terminal, Situated in Vlothaven, is specially designed for the fast discharge and transhipment of grain and derivatives.

Depth alongside 49 ft. 3 in.

A fast conveying installation transports grain into the silos or to receiving ships. Capacity of the silos: 52,700 tonnes. Also soyabeans are transhipped to the soya oil extraction plant next to the I.G.M.A. silo.

Equipment: The installation has a main jetty of 1,200 ft. length to accommodate 2 vessels up to 100,000 d.w.t. The ships are unloaded by 2 mobile pneumatic suckers, with a capacity of 400 t.p.h., 2 screw grain dischargers with a capacity of 800 t.p.h. each and 1 floating elevator with a capacity of 200 t.p.h. for heavy grain. Two crane/weigh tower combinations with a capacity of about 400 tons heavy grain each. A floating crane, capacity 15 tonnes is available for handling stores, spare parts, etc.

Despatch: With the modern equipment and the efficient way of handling, a good despatch can be realised. If two or three discharge units are available, a bulk carrier with 30,000 tons will be completed within 2 days. Daily discharge capacity in total is about 40,000 metric tons.

Supplies: Water obtainable from ashore, stores must be transhipped on barge at the quay as jetty is not accessible to trucks; bunkers by barge.

Pier C: Alongside this berth bulk carriers and tankers can be accommodated to load directly ex-silo. Max. draft 30 ft., max. airdraft 30 ft. Loading capacity 2,000 t.p.d.

Cargill B.V.: Located adjacent to the IGMA Grain Terminal.

Importing vessels are berthed alongside the IGMA pier and the plant receives the soyabeans directly by conveyor belt.

The finished products are loaded into coasters which moor alongside the jetty of the plant along the Mercurius Harbour. Loading capacity: About 200 t.p.h.

Ore, Coal, Agricultural Products, Derivates, etc.:

B.V. Overslagbedrijf "Amsterdam": This stevedoring company for the transhipment and storage of all kinds of dry bulk cargoes is situated in the West Dock, only 10 miles from Ymuiden. Along the quay with a length of 2,600 ft., large bulk carriers with a draft up to 49 ft. 03 in. fresh water can be accommodated. Vessels up to 54 ft. can be lightened at Ymuiden to a maximum draft of 45 ft. salt water.

There are no restrictions as to the length, height or beam of the ships. Maximum outreach of loading/discharging gear over water: 164 ft.; maximum height of loading/discharging gear above water level: 80 ft. 5 in.

Equipment: 4 high speed gantry cranes, gross lifting capacity 3×30 tons (20 tons net) and 1×50 tons (30 – 33 tons net) with built-in electronic weighing system. The 3×30 tons gantries have a maximum outreach over water of 131 ft., allowing a maximum air draft of 50 ft., whereas for the 50 tons gantry the maximum outreach over water is 164 ft., allowing a maximum airdraft of 80 ft.

Double independent conveyor belt-system (length 5 km.) for simultaneous stockpiling/reclaiming into barges and/or railcars with separate cranes for that purpose.

Loading machines for (push) barges and sea-going vessels up to 18,000 d.w.t.

Discharging equipment for railcars. Double track rail connection with Dutch Railway System with automatic weighing equipment. Storage capacity up to 3 million tons.

Capacity: Total discharging rate of gear: For ore up to 100,000 tons per 24 hours; for coal up to 60,000 tons; for derivatives up to 25,000 tons. Loading rate of gear into seagoing vessels from stockpile: up to 2,000 t.p.h. Ex barges: depending on size of barges.

Supplies: Water, stores and bunkers can be delivered by truck and/or barge.

Anthraciet Handels Vereniging: On the Adenhaven, quay of 180 m., water depth 33 ft., 1 table crane of 7.5 tons.

Scheepvaart en Steenkolen Maatschappij: In the Spoorweghaven, quay length 40 m., water depth 25 ft., 1 table crane of 6 tons.

Havenbedrijf de Rietlanden B.V.: Handles coal, minerals, ore, derivatives and fertilisers at 2 locations in the Port of Amsterdam, one in the Eastern port area, directly at the head of the Amsterdam Rhine Canal, the other in the Western port area.

Equipment: 2 gantry cranes with a capacity of 7 tons each; 3 floating cranes with a capacity up to 16 tons;

Excellent rail connections and weighing bridge;
Screening installations for coal and coke;
Storage capacity up to 200,000 tons;
Vast paved storage areas.

Very reasonable dispatch. Capacity about 15,000 tons per running day; with combined working of gantries and floating cranes even more. Quays with length of 4,800 ft. can accommodate large bulk carriers with a draft of 35 ft. With the floating cranes, vessels drawing up to 45 ft. can be handled at any place in the Port of Amsterdam.

Supplies: Stores, bunkers can be delivered by truck, and/or barge.

Phosphate: *Amfert B.V.*

At the fertiliser works, rock phosphate is discharged and after manufacture the ready product (fertiliser) shipped in bulk.

Equipment and berth: The main jetty has a depth alongside of 35 ft. and 2 vessels of up to about 25,000 tons can be accommodated. With the 2 grab cranes a daily out turn of 5,000 tons phosphate is reached.

Container and Ro-Ro/Ferry Terminals:

Combined Terminals Amsterdam V.O.F. (C.T.A.): Combined Terminals Amsterdam V.O.F. offer a complete container terminal service on the West Terminal which is located in the Westhaven.

Container Freight Station and Intercontainer Railway Terminal incorporated on the terminal site.

Roll-on/Roll-off ramp especially constructed for heavy axle loads. Car terminal facilities for handling large quantities of factory automobiles/trucks.

Berths:

Berth No. 1: Length 250 m. Depth alongside 13 m. (42 ft.)
No. 2: Length 215 m. Depth alongside 11.5 m. (37 ft.)
No. 3: Length 140 m. (Ro/Ro) Depth alongside 11.0 m. (35 ft.)
No. 4: Length 290 m. Depth alongside 11.0 m. (35 ft.)

Equipment: 3 Portainers, with lifting capacity 50 tons each, outreach 36 m. (116 ft.), rail width 20 m. (65 ft.) and backreach 24 m. (80 ft.) with 20 ft., 30 ft., 40 ft. and adjustable spreaders, also to lift two 20 ft. containers simultaneously.

Four multi-purpose-rail mounted dock cranes with lifting capacity of 30 tons on 20 m. (66 ft.) and 12 tons on 40 m. (131 ft.) outreach.

Two rail mounted transtainers, capacity 35 tons and 45 tons with 28 m. (90 ft.) and 40 m. (129 ft.) span rotating and adjustable spreader serving 3 railway tracks.

Eight van carriers, terminal tractors and chassis and heavy lift trucks equipped for containers, steel coils and pulp.

Facilities: Container storage yard 165,000 sq.m.
Car park 140,000 sq.m. (28 acres).
Container freight station 3,000 sq.m. (33,000 sq.ft.) 46 doors.
Two transit sheds 16,000 sq.m. (172,000 sq.ft.).

Workshop for the maintenance and repair of containers and road chassis.

40 reefer receptacles at the required voltages.

Depot of lease containers and road chassis. Container railway terminal.

Working Hours: Usually around the clock, 7 days per week.

Supplies: Fresh water obtainable from the quay, bunkers by barge.

Verenigd Cargadoorskantoor: VCK operates 2 modern stevedoring terminals of which one is equipped for Ro/Ro and passenger traffic: the Scandia Terminal. Regular ferry services sail from there to Norway (Summer passenger service) and Finland (cargo service).

Scandia Terminal: Scandia Terminal in the Suezhaven and Beringhaven, 10.5 nautical miles from the sea-locks in Ymuiden. Total area 105,080 sq.m., marshalling area 84,785 sq.m., quay length 771 m., 3 Ro/Ro ramps, one in Suezhaven and two in Beringhaven, shed space 20,295 sq.m., modern passenger building.

Vlothaven Terminal: 1 mobile container crane of 45 tons. 11 breakbulk cranes of 2 tons – 10 tons. Total area: 5,600 sq.m., quay length: 570 m., shed space: 13,700 sq.m. Marshalling area: 42,340 sq.m.

Also available on both terminals: side loaders (20 tons), tugmasters, slave trailers, flats, containers and forklift trucks.

P. Ter Haak & Zn. B.V.: Double berth Ro/Ro Terminal – Draft 39 ft. Regular Ro-Ro Service to East Coast of Sweden.

Molasses: Tradax–2 jetties, max. draft 11.30 m. receiving capacity 1,000 t.p.h. Max. d.w.t. 65,000 tons (approx.). Connections 8 in.

Minerals: Eggerding & Co. B.V. Length of quay 400 m. Depth alongside 33 ft. Discharge is carried out by floating cranes.

STEVEDORES: In order to enable Agents to order gangs in time it is recommended to keep Agents duly informed about ETA. No ETA to stevedores necessary.

MEDICAL: If immediate medical assistance will be required in the locks at Ymuiden, Agents must receive advance notice.

TANKERS: *Oiltanking B.V.:* 1 jetty for 2 vessels of 100,000 tons. Max. LOA 310 m., max. draft 15.0 m., 2 jetties for 2 vessels of 3,500 tons, 1 jetty (used in case of fire). One jetty for 1 ship up to 45,000 d.w.t. Pipe-line connection 6 in. and 8 in. Receiving rate 2,000 t.p.h. LPG loading rate 2,000 t.p.h. depending on grade and condition. Fresh water available from jetty, fuel by barge. Stores by barge or trucks. (Jetty not accessible to trucks). Dirty ballast by barge.

Mobil: 2 jetties, 1 for vessel of 30,000 tons and another for vessel of 80,000 tons. Max. LOA 255 m., max. draft 13.7 m. Pipe-line connections 10 in. and 12 in.

One jetty for coast tankers or LPG tankers up to 2,500 tons.

The receiving rate for crude oil is 4,000 cu.m./hr. The loading rate varies from 400–1,900 cu.m/hr. depending on grade.

Fresh water available from jetty. Fuel available, pipe-line 8 in. Facilities available for dirty ballast if vessel to load at berth. Max. capacity 10,000 tons. Stores by barge or truck (Jetty not accessible to trucks).

Amatex: 4 jetties, max. LOA 300 m., max. draft 12.5 m. Pipe-line connections 6 in. – 12 in.

Receiving rate, up to 2,000 t.p.h. depending on grade and back pressure, if any. The loading rate is about 1,000 t.p.h. depending on grade.

Fresh water available by barge. Fuel available by barge. There are facilities for dirty ballast under special conditions. Stores mainly by truck (Jetties not accessible to trucks).

Comos: Two jetties, max. LOA 300 m., max. draft 13.5 m. Pipe-line connections 8 in. and 12 in. Four jetties available for seagoing vessels and barges up to a max. draft 14 ft. 9 in.

The receiving capacity is about 2,000 t.p.h. and loading rate up to about 1,000 t.p.h.

Fresh water available by barge. Fuel available by barge or pipe-line. Stores by truck. There are no facilities for dirty ballast.

Smid & Hollander: 2 berths for receiving crude oil, max. LOA 245 m., max. draft 12.5 m. Fuel available at berth. Fresh water available by barge. Stores by truck (Jetty not accessible to trucks). There are no dirty ballast facilities.

Noord Europees Wijnopslagbedrijf B.V.: One jetty, max. draft 41 ft. For wines, fruit juice and alcohol. Fresh water and fuel available by barge. Stores by truck.

Cindu: Located in Petroleumhaven. Max. LOA 170 m., max. draft 10 m. Fresh water and fuel available by barge. No dirty ballast facilities.

De Humber: Located in Petroleumhaven. Max LOA 150 m., max. draft 10.0 m. Fresh water and fuel available by barge. No dirty ballast facilities.

Marbon: Located in Hornhaven. Max. LOA 100 m., max. draft 5.50 m. Fresh water and fuel available by barge. No dirty ballast facilities.

Schuurman: Located in Usselincxhaven. Max. LOA 180 m., max. draft 11.30 m. Receives molasses at up to 1,000 t.p.h. Fresh water and fuel available by barge. No dirty ballast facilities.

TCA (Tank Cleaning Amsterdam): Located at Petroleumhaven. 2 berths available for 100,000 d.w.t. and 30,000 d.w.t. vessels (See "Services").

DENSITY: Amsterdam is not a tidal port. The water is brackish to fresh.

FRESH WATER: Drinking and boiler water can be supplied by barge, or if connection available, from shore. Price depends on quantity ordered.

FUEL: All grades of fuel are available and delivered mainly by barge. Advance notice 48 hours.

FIRE PRECAUTIONS: No repair work to be carried out to tankers without permission of Harbour Authorities. Usual non-smoking precautions, etc.

CONSULS: In Amsterdam only. Many countries represented in The Hague and Rotterdam.

C = Consul. C.G. = Consul-General.

Consulates and Embassies: Argentina (C.G.), Austria (C.G.), Bangladesh (C.), Belgium (C.), Bolivia (C.), Brazil (C.), Central African Republic (C.), Chile (C.G.), Colombia (C.G.), Cyprus(C.), Denmark (C.G.), Dominican Republic (C.G.), Finland (C.G.), France (C.G.), Germany (C.G.), Ghana (C.G.), Great Britain (C.G.), Greece (C.), Haiti (C.), Iceland (C.G.), Italy (C.G.), Ivory Coast (C.), Jamaica (C.), Japan (C.G.), Luxembourg (C.), Malawi (C.), Mauritius (C.), Mexico (C.), Monaco (C.G.), Morocco (C.G.), Nepal (C.), Norway (C.G.), Panama (C.G.), Peru (C.G.), Philippines (C.G.), Senegal (C.), Spain (C.G.), Surinam (C.G.), Sweden (C.), Switzerland (C.G.), Thailand (C.), Togo (C.), Uganda (C.), U.S.A. (C.G.).

REPAIRS: All types of deck and engine repairs are possible including gas-freeing and tank-cleaning.

DRY DOCKS: Ship and engine repairs. Maintenance, survey, damage repairs, lengthenings, conversions, voyage repairs to vessels lying at berths from Amsterdam to Ymuiden. Repair, maintenance and construction of offshore equipment.

At the site of Shipdock Amsterdam B.V. dry docks are available capable of taking vessels up to 70,000 d.w.t.

Maximum sizes of vessels to be dry docked.

Graving docks	Length×Breadth×Depth (in feet)	Dock capacity in D.W.
No. 1	439× 63 ×16.1	10,000
No. 2	518× 69.5×19.0	18,000
No. 3	639× 86 ×26.6	32,000
No. 4	803×117 ×24.3	85,000

Total quay length 5,500 ft.

Equipped with 9 cranes up to 60 tons. Floating crane up to 300 tons available.

Oranjewerf B.V.:

Floating docks	*Length* (ft.)	*Breadth* (ft.)	*Depth on sill* (ft.)	*Lifting capacity* (tons)
1 floating dock	426	88	18	4,000
1 Transverse slipway	328	115	11	3,000

Det Norske Veritas, 75 Klaprozenweg	31 52 01

GANGWAY/DECK WATCHMEN: Not required. Dependent on commodity of cargo.

OPENING/CLOSING HATCHES: Liner vessels by crew or by stevedores, payable per man per hour. Tramp vessels as per Charter Party.

CERTIFICATES:

Ship's Register.
Usual Cargo Certificate.
Safety Radio.
Safety Equipment Certificate.
Crew Roll.

All usual certificates required for navigation.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per man or equivalent of tobacco or cigars. Wine and/or Spirits: 5 litres of wine per man. Spirits: total 5 litres for the whole ship.

CARGO GEAR: Usual cargo certificate.

REPATRIATION: Facilities for repatriation of crew to any destination are available.

AIRPORT: Distance to Schiphol Airport (served by regular airlines) 15 km.

TIME: GMT plus 1 hour. Summer time GMT plus 2 hours.

HOLIDAYS: New Year's Day; Good Friday; Easter Sunday; Easter Monday; Queen's Birthday (April 30th); Ascension Day; National Liberation Day (May 5th); Whit Sunday; Whit Monday; Christmas Day and Boxing Day.

Cargo can be worked during these days subject to labour being available at premium rates.

POLICE/AMBULANCE/FIRE: Police 222222; Ambulance 555555; Fire 212121.

SERVICES: Compass adjusting/direction finder calibration, representatives of all leading radio installations, radar and other nautical instruments available.

Tanker Cleaning Amsterdam B.V.: The largest jetty can accommodate vessels up to 870 ft. in length and has a depth of 33 ft. alongside the berth to hydraulically test cargo tanks.

2 jetties are available for smaller tankers up to 260 ft. and 600 ft. in length, and have a water depth alongside of 16 ft. and 18 ft. respectively.

Cold work may be carried out in the engine room during gas freeing operations in the cargo tanks subject to prior consultation and approval of the management and local authorities.

Barges are available for taking slops or contaminated oil.

Specialised equipment for alongside can be supplied for taking oil-spillages.

TELEPHONES: Telephone connections on board are only possible on certain quays (passenger ships). It is possible to rent portable mobile phones.

SHORE LEAVE: Crew members allowed ashore.

IDENTIFICATION CARDS: Not needed.

GARBAGE DISPOSAL: Can be arranged through ship's agent.

WASTE OIL DISPOSAL: A waste oil facility, operated by TCA Milieutechniek, Tanker Cleaning Amsterdam BV, 48 Petroleumhavenweg, 1041 AC Amsterdam. Tel: 020-130225/115773. Fax: 020-118723. The facility is situated on the South bank of the Noordzeekanaal, near Amsterdam. The company offers a vast range of services, details of which can be obtained direct from them.

SEAMAN'S CLUBS: Seamen's Welfare of Amsterdam is located at 14 Coenhavenweg, Havens West in Amsterdam. Tel: 020-880574.

The Seaman's Club works in close cooperation with the Apostleship of the Sea and Deutsches Seemannsheim. Seamen's Welfare offers table tennis, billiards, a shop, television, telephone service, a bar and information about Amsterdam. It also organises excursions, football matches and other entertainment.

The German Seaman's Home (Deutsches Seemannsheim) is located at 733 Keizersgracht. Tel: 020-220842.

It is possible to stay overnight at this club which also offers a wide range of services and information for the seaman, including arrival times and berthing places of ships, various magazines and newspapers, information about transportation and cultural and tourist attractions.

Churches: The Apostleship of the Sea works in close cooperation with the Seamen's Welfare Center. For assistance, conversation or religious services, Loodskotterhof 3. Tel: 020-333537. Mass can be celebrated onboard.

The Church of England is located at 42 Groenburgwal, services every Sunday at 1130 hrs. and 1830 hrs. Tel: 020-248877.

The English Reformed Church is located at 48 Begijnhof, services every Sunday at 1030 hrs. Tel: 020-249665.

Deutsche Evangelische Gemeinde is located at 44 J.J.Viottastraat, services every Sunday at 1030 hrs. Tel: 020-732522.

Roman Catholic Services are held at the Catholic Center for foreigners, 35 Begijnhof, in English every Sunday at 1200 hrs. and in French on Tuesday at 1100 hrs. For information about other languages and nationalities call Tel: 020-222310.

CURRENCY: Dutch Guilder (Fl). U.S.$ 1.00 = Fl 1.90 (15.4.91).

DELAYS: Usually no congestion.

AUTHORITY: Gemeentelijk Havenbedrijf Amsterdam. (Port Management of Amsterdam), De Ruyterkade, 7, 1013 AA Amsterdam. *Tel:* 20-5238600. *Telex:* 12247 Ampor Nl. *FAX:* 20-6209821. *Contact:* G.C.G. van den Heuvel, Executive Director. Captain C. Oudendijk, Harbour Master (Tel: 20-6221515).

DELFZIJL: 53.20 N. 06.56 E. (See Plan)

LOCATION: On the estuary of the River Ems, opposite Emden.

DOCUMENTS: See "Rotterdam".

PILOTAGE: Pilot boats normally cruise at Wester-Ems Buoy. During bad weather they withdraw into estuary, but never further than Borkum Roads. Pilot boats listen on Channel 6 and 16 and Pilot Office on Channel 14 VHF; distance from pilot station to Delfzijl 36 miles. Pilot service compulsory for all vessels with a length over 60 m. Foreign vessels may call Pilot on 2182 kHz. Traffic between the cutter and the vessel will be held on 1657 kHz. Tel: 05960-14988. Telex: 53785.

Approaching vessels from sea should inform the Pilot Commissioner of their ETA in M.E.T. with a notice at least 12 hours in advance via a coastal radio station; the pilot cutter may be informed via VHF at least 4 hours in advance.

The ETA message should contain the following details: *(a)* ETA Pilot Westereems (time in M.E.T. in a group of 4 figures); *(b)* Draft; *(c)* Port of destination; *(d)* Name, Call Sign and Gross Tonnage.

Departing vessels should apply for a Pilot at least 1 hour before ETD; the request should be made to the Office of the Inspector of Pilotage.

Pilotage from Delfzijl to Emden is compulsory.

ANCHORAGE: Vessels up to 4,000 tons d.w.t., which for some reason have to anchor outside the piers can do this East of the harbour entrance near Oterdum. Anchorage is situated within the following area: a line connecting the Buoys 53/PS-55-57 and PS2-BW28. Request for anchorage at the Pilot Office, VHF Channel 14. Larger vessels should seek an anchorage in the Doekegat. There is no anchorage inside the harbour.

ENTRANCE: The harbour entrance lies opposite the former village of Oterdum. The entrance extends to reach the deep water of the Bocht van Watum, and lies opposite the dredged channel between the Bocht van Watum and the Oostfriese Gaatje near Paapsand Sud.

The harbour entrance has an initial depth of N.A.P. −10 m., and a bottom width of 208 m. The harbour channel has the same depth, and a width of 100 m.

Depths: All depths are indicated in relation to N.A.P. LLWS at Delfzijl lies 2.03 m. below N.A.P. (Normal Amsterdam Level).

Tides: The range at Springs is 3.26 m. and at Neaps 2.59 m. Tidal movement is diurnal with an average range of 2.99 m.

MAX. SIZE: The harbour entrance has a depth of 8 m. at LLWS. Vessels drawing up to 9.3 m. can enter under normal HW circumstances; a keel clearance of 10% of the draft will be maintained. Masters of vessels with large draft are recommended to contact the Port Authority in good time with regard to the water level to be expected near Paapsand-Sud and in the Zeehavenkanaal. In the harbour "always afloat" can be guaranteed along the entire length of the Handelskade West for vessels with a draft up to 8.7 m. See "Depths" above.

TUGS: Tugs up to 32 tons bollard pull available. Additional tugs can arrive within 3 hours from Emden.

RADIO: Cable to Agents via Radio Scheveningen (PCH) on VHF Channel 27.

VHF: The Pilot Office at Delfzijl and Eemshaven is equipped with VHF Channel 14. The station is constantly manned 24 hours a day.

The Port Office is working on Channel 14 for general information and Channel 66 for vessels sailing in the VTS area. All movements should be reported to the VTS Operator.

The Eemskanaal – Lockmaster's Office is equipped with a VHF installation, Channel 11, which is constantly manned from Monday 0000 hrs. till Saturday 2400 hrs.

"Weiwerderbrug" (brug = bridge) is equipped with a VHF installation, Channel 22. The VHF station is manned from Monday 0600 hrs. till Saturday 1400 hrs. For bridge passage outside these hours call Port Office Delfzijl, Channel 14.

"Heemskesbrug": For bridge passage call Port Office Delfzijl, Channel 14.

RADAR: An integrated German/Dutch radar chain has been installed along the River Eems. The chain comprises the radar stations "Borkum" (German), "Oudeschip" (Dutch), "Emden" (German) and "Wybelsum" (German). The coordination of the stations has been centralised at Emden.

Radar assistance can be given when visibility decreases to a distance less than 2,000 m. The radar stations are working on a regular basis. Guidance and assistance can be given according to the table.

Station	*Area*	*VHF Channel*
"Borkum Radar"	River Eems from Westereems Buoys 1/2 or Huibertgat Buoys H1/H2 to Buoy 33	18
"Knock Radar"	River Eems from Buoy 33 to entrance Port of Delfzijl Buoys 56/57	20
"Delfzijl Port Control"	Port entrance to quays or locks.	66
"Wybelsum Radar"	River Eems from Buoys 56/57 to entrance Port of Emden	21
"Eemshaven Radar"	River Eems from Buoy 31 or Buoy 35 to a berth at Eemshaven (on request with 1 hour's notice; request to Pilot Boat on VHF Channel 6 or Pilot Station Delfzijl on VHF Channel 14).	4

BRIDGES: Bridge to the Damsterhaven may always be worked. Bridge to the Oosterhornhaven will be handled from Monday to Saturday (see "VHF – Weiwerderbrug"). On Sunday bridge may be opened on special request at the Harbour Master's Office.

BERTHING: The Outer Harbour is divided into 3 communicating basins: Handelshaven, Balkenhaven and Zeehavenkanaal.

Handelshaven, in the Western part of the Outer Harbour, has a deepwater quay, 570 m. long, with a depth of 11 m. alongside; A floating jetty of 320 m. length in a depth of 11 m. also jetties 110 m. and 130 m. in length, with a depth of 7 m. alongside.

Balkenhaven, East of Handelshaven, has depths of 8.5 m. to 5.5 m.; there are berths at 4 mooring buoys for small sea-going vessels.

Zeehavenkanaal is the Eastern part of the Outer Harbour and is being developed as a deep-sea harbour; it has a depth of 10.0 m. – 10.5 m. There are several private mooring facilities in the Zeehavenkanaal, from West to East:

a. Private quay of Wagenborg Terminal B.V. Length of quay 110 m. 1×35 ton crane. Depth 7.0 m.;
b. Private jetty of the Nedalco Factory. Tankers up to 25,000 d.w.t., LOA 200 m. and draft 9.0 m. can be accommodated. Loading capacity 250 t.p.h.; discharging capacity 350 t.p.h.;
c. Private jetty of N.A.M. Tankers up to 6,000 d.w.t. loading condensate can be handled. Vessels berth starboard side alongside. Depth alongside 9.5 m.;
d. Private jetty of AKZO is equipped with a loading station with a loading capacity of 1,200 tons salt/hour. Ships up to 35,000 d.w.t. can be accommodated here; depth alongside 11 m.; vessels berth starboard side alongside.
e. Private jetty of the Methanol Chemie Nederland (M.C.N.) equipped with a loading station with a loading capacity of 500 tons of methanol per hour. Tankers up to 200 m. LOA accepted. Vessels berth starboard side alongside. Depth 10.0 m.;
f. Private jetty of Aluminium Factory equipped with 1 crane and is able to accommodate ships up to 30,000 d.w.t., LOA 200 m. and draft 9.0 m. Discharging capacity 300 t.p.h.

The Oosterhornhaven behind the dyke is a basin with a total length of 3,100 m. and a width of 60 m.

Navigating Oosterhornhaven is prohibited for vessels having a LOA exceeding 75 m. and/or having a maximum beam exceeding 12.50 m. and or having a draft exceeding 4.50 m. or having a height of over 8.0 m., unless a special permission is obtained from the Harbour Master subject to certain conditions.

Amongst others there are mooring facilities located in this canal alongside the yard of Azko, Methanol Chemie and Dow Benelux, equipped with loading installation and a tanker jetty.

The Eemskanaal:

Several private mooring facilities are located here. These are the following:

Name	*Type*	*Suitable for*
Jonker's Terminal	Potatoflour, bulk term	Coasters
Aceco	Grain elevator	Inland vessels/Coasters
Terminal Delfzijl	Timber Terminal	Coasters
North Sea Petroleum	Oil storage	Inland vessels
O.M.D.	Oil storage	Inland vessels/Coasters
Eemsmond	Cement factory	Inland vessels/Coasters
Mulder/Marne	Grain elevator	Coasters
Cebo Holland	Mud/Cement Storage	Inland vessels/Coasters
Betoncentrale Eemsmond b.v.	Concrete mortar plant	Inland vessels/Coasters

The Sea Locks:

The link between the Outer Harbour and the Eemskanaal and also the Oosterhornhaven of the port area is formed by the provincial sea locks. Sea-going vessels up to 6,000 tons d.w.t. with a beam of 16 m., a length of 120 m., and a draft of up to 5 m. can use these locks. As this will generally apply to vessels in ballast, the locks for this size of vessel are only of importance for the Groningen Shipyards.

For loaded vessels, the limit lies between 2,000 and 2,200 d.w.t. In the Outer Harbour of the locks sufficient berths have been provided for vessels waiting to pass through the locks.

Dimensions of Locks:

The Western (small) Lock has a length of 123 m. at falling tide and 81 m. at rising tide, a width of 7 m., a depth of sill outside 4.2 m. inside 2.4 m.; across each lock head lies a bascule bridge. The Eastern (large) Lock has a length of 120 m., a width of 16 m., depth of sill 5.4 m.; across each lock head lies a drawbridge. The opening times of the locks are continuous on weekdays.

Sheds and Warehouses:

There are several sheds and warehouses (total capacity: 3,250 sq.m.); also open storage. Grain silo with a storage capacity of 2,000 tons loose and 500 tons in bags. Also several private sheds, warehouses and grain silos.

CRANES: There are 6 shore cranes at Handelskade West with capacities up to 30 tons for handling general cargoes and bulk commodities, a floating 60 ton crane and mobile cranes.

STEVEDORES: *Normal Working Hours:*

Morning shift	0800 – 1200
Afternoon Shift	1230 – 1600
Evening Shift	1630 – 2030
Night Shift	2100 – 0030

Work on Saturdays and Sundays: Work on Saturdays and Sundays can be arranged in the same manner as this is done in the ports of Rotterdam and Amsterdam, *viz.* in consultation with the stevedores.

DENSITY: Ranging between 1012 and 1018, depending on the tide and the season.

FRESH WATER: Water obtainable alongside the quays or can be delivered by motor tankers, capacity 20 t.p.h.

FUEL: Fuels in limited quantities for coasters are always available. For bunkering of larger vessels, arrangements should be made in advance.

CONSULS:

At Delfzijl		*At Groningen*	
Denmark	Tel: 05960-15820	Belgium	Tel: 050-141555
Finland	Tel: 05960-16016	France	Tel: 050-345322
Norway	Tel: 05960-15820		

REPAIRS: Most engine and deck repairs can be carried out by a local shipyard.

DRY DOCKS: At the Eemskanaal at the inner side of the locks a dockyard for ships up to 3,000 tonnes d.w.t. and a draft not exceeding 32 dm. is available.

In the Southern part of the Handelshaven there are 2 floating docks. Ships with max. sizes of length 125.0 m.; breadth 19.0 m. and draft 7.2 m. can be accommodated in the dock on the South side. Lifting capacity of the dock is 5,000 tonnes.

The dock on the North side can accommodate ships of 162 m. LOA, 21.0 m. beam and 8.0 m. draft. Lifting capacity 6,000 tonnes.

For larger vessels, dry-docking facilities exist in the nearby Port of Emden (Germany).

GANGWAY/DECK WATCHMEN: According to Port Regulations, Master has to keep watchmen on board.

AIRPORT: Eelde (Groningen).

OPENING/CLOSING HATCHES: Normally carried out by ship's crew.

CERTIFICATES: The International Tonnage Certificate should be shown to Harbour Master on first call every year.

HEALTH, MEDICAL ATTENDANCE, HOLIDAYS, LOCAL TIME, CUSTOMS ALLOWANCES: See "Rotterdam".

GARBAGE DISPOSAL: A special collection service is not available. Garbage containers are situated on the quay, free of charge.

WASTE OIL DISPOSAL: In the Netherlands, port authorities are responsible for the provision of reception facilities in their ports.

The Port Authority of Delfzijl/Eemshaven has appointed "Eems Milieutechniek BV" (EMT) as the sole port reception facility for Delfzijl and Eemshaven. EMT, in which Tanker Cleaning Amsterdam BV, Niestern Sander BV (Delfzijl) and North Sea Petroleum (Groningen) participate, collects and processes oily residues delivered to the bilge boat and/or vacuum lorry.

For further information please contact: Eems Milieutechniek BV, Visserijweg 10, 9936 HB Farmsum, Tel: 05960 – 18803, Fax: 05960 – 18796.

SEAMAN'S CLUBS: None.

CURRENCY: Dutch Guilder (Fl). U.S.$ 1.00 = Fl 2.00 (1.7.91).

REGULATIONS: *Regulations for Arrival and Departure of Sea-Going Vessels:*

1. The arrival of a sea-going vessel, other than vessels passing through the port, must be reported in writing by the Master, or his local representative at the Harbour Master's Office 24 hours prior to arrival;
2. The declaration of arrival must contain:
   - a. name, call sign and flag of vessel;
   - b. nature and amount of the cargo to be discharged and/or loaded;
   - c. dangerous goods, according to the IMO Code;
   - d. last port of call;
   - e. ETA and next port of call;
   - f. Maximum draft.
3. Declaration of Arrival must be made on the special forms or per teleprinter (53299 Hsddz);
4. At least 3 hours before departure the Master, the shipping company or its local Agent must notify the Harbour Master's Office of the intended departure, stating the estimated time of departure and the destination of the vessel.

AUTHORITY: Port of Delfzijl/Eemshaven Authority, Noordersingel 1, 9934 AK Delfzijl or P.O.Box 20004, 9930 PA Delfzijl. *Tel:* 05960 – 40400. *Telex:* 53299 Hsddz. *FAX:* 05960-30424. *Contact:* C. Biemond, Port Director. Captain R. K. Mast, Harbour Master. Captain J. Stokroos, Deputy Harbour Master.

DEN HELDER: 52.58 N. 04.47 E.

PILOTAGE: Not compulsory but advisable for Molengat and Schulpengat fairways.

Pilotage is compulsory East of Long. 04° 44′ E. for most classes of vessels.

RESTRICTIONS: Permission for entry must be granted by the harbour office from the Naval Base Control (Tel: (02230) 56822/52770).

MAX. SIZE: Max. draft 9.5 m. The largest vessel to visit the port was 300 m. LOA with draft 7.0 m.

RADIO/VHF: Pilot service on VHF Channel 12.

Naval Base Harbour Control and Municipal Port Control on VHF Channel 14.

V.A. Moorman Bridge on VHF Channel 18.

The locks are on VHF Channel 22.

TUGS: 9 private tugs available, up to 95 tonnes bollard pull.

BERTHING: The port is a supply centre for North Sea oil and gas platforms. The port also has a naval base and fishing harbour.

Industrial Harbour: For ships up to 70 m. LOA, beam 14.0 m. and draft 4.65 m.

Berths No. 52 – 55: Accepts vessels up to 70 m. LOA, beam 14.0 m. and draft 5.2 m.

Berths No. 36 – 38: Accepts vessels up to 120 m. LOA, beam 18.0 m. and draft 7.0 m.

Berths No. 32, 34 and 35: Accepts vessels up to 100 m. LOA, beam 18.0 m. and draft 7.0 m.

CRANES: Cranes from 40 tonnes to 110 tonnes available. Larger cranes up to 300 tonnes capacity are available on request. There is also a floating crane with capacity of 100 tonnes at 10 m. and 45 tonnes at 18 m.

STEVEDORES: *Working Hours:* Port works throughout 24 hours.

MEDICAL: Hospital available nearby.

DENSITY: 1025.

FRESH WATER: Available.

FUEL: Available by barge.

CONSULS: Norway.

REPAIRS: Facilities available.

DRY DOCKS: There are 2 graving docks and 3 floating docks operated by the Navy. Diving services available.

REPATRIATION: Facilities available.

AIRPORT: Schiphol Airport is 90 km. from the port.

TIME: G.M.T. plus 1 hour in Winter and G.M.T. plus 2 hours in Summer.

SERVICES: The following services are available: Radio and compass repairs, fumigation, dirty ballast facilities, garbage collection, provisions and launch service.

AUTHORITY: Den Helder Port Authority, Het Nieuwe Diep 37A, 1781 AE Den Helder, The Netherlands. *Tel:* (02230) 13955. *FAX:* (02230) 27780.

DORDRECHT: 51.49 N. 04.40 E. (See Plan)

LOCATION: At the junction of four important rivers, the "Merwede", which is the lower end of the Rhine and main route of all inland water traffic to Germany, France and Switzerland; the "Noord" leading to Rotterdam; the "Dordtse Kil" leading to Belgium and the "Oude Maas" giving Dordrecht its own open connection with the North Sea. Vessels up to 31 ft. can be accommodated.

Entrance: The main entrance is via Maasmond (see "Rotterdam"), Rotterdam Waterweg and Oude Maas, a distance of 26 miles above Hook of Holland, with a least depth of 32 ft. below NAP.

DOCUMENTS:

2 copies Cargo List.
2 copies Passenger List.
2 copies Stowaway List.
3 copies Crew List.
Health Certificate.
Also see "Rotterdam".

PILOTAGE: Compulsory. Vessels have to enter New Waterway at Hook of Holland and proceed to Dordrecht via this New Waterway and the River Oude Maas. Masters of vessels bound for Dordrecht should state destination in ETA message as Pilots for Dordrecht embark from pilot cutter at roads. Deep-drafted vessels may have to exchange Pilots just inside breakwaters at Hook of Holland. (See Rotterdam "Ordering a Pilot").

ANCHORAGE: At sea off Hook of Holland (see "Rotterdam"). No anchorage between entrance to New Waterway and Dordrecht.

RESTRICTIONS/MAX. SIZE: Maximum L.B.P.P. 175 m., beam 25 m., draft 31 ft. (MHW). Vessels exceeding maximum length or beam could be allowed to navigate the Oude Maas under certain conditions.

For dangerous cargoes, see "Rotterdam".

The Pilot will decide the number of tugs required for passage on the Oude Maas, usually a minimum of 3 – 4 tugs.

Vessels exceeding 135 m. LOA or 17.5 m. beam must give notice to the Harbour Co-ordination Centre (H.C.C.) before navigating the Oude Maas. (H.C.C. Tel: 010-4764855, Fax: 010-4773489, Telex: 27370 Drhcc NL.)

Notice should contain: Ship's name, call sign, nationality, g.r.t., length, beam and draft, first port of call and berth (port and berth in case of ships leaving or shifting berth), ETA in Oude Maas or time of departure if leaving/shifting berth, Agent's name.

Tides and Currents; The tides are diurnal, with a daily rise and fall of 0.80 m. The current turns about half an hour after HW and LW.

RADAR: Radar service provided by V.T.S. and Dordrecht Radar Post.

RADIO/VHF: Dordrecht on VHF Channels 4 and 19. Also see "Rotterdam".

TUGS: Tugboats ordered by Pilot when entering New Waterway. Tugs normally meet vessels at Dordrecht.

BERTHING: *Harbours:* There are 6 basins for sea-going vessels.

Wilhelmina Harbour: Has a water area of 52 acres, can accommodate ocean-going vessels with a draft of about 31 ft. A 300 ft. wide pier with railway connections, a spacious transit shed and an open storage site of 200,000 sq.ft. for bulk cargo has been constructed. Furthermore, at a distance of 80 ft. from this pier, there is a jetty 900 ft. long and 31 ft. wide with a depth alongside of about 31 ft. below NAP. Rivercraft can moor either directly alongside the large vessels or in the basin between pier and jetty. The basin has a depth varying between 13 ft. and 20 ft. below NAP. There are 9 mooring buoys.

Juliana Harbour: This harbour with its 3 basins has a water area of 67.5 acres and a depth of about 29 ft. below NAP.

Basin No. 1 has a depth up to 27 ft. below NAP and is used for handling chemicals and mineral oils. Gebr. Broere b.v. has a large tank storage installation with a capacity of 250,000 cu.m. The terminal has 7 jetties of which 6 are used for fast service to ocean-going tankers or river tankers and 1 jetty is used for river tankers only. The location is excellent for their distribution via river, rail and road to inland destinations.

Basin No. 2 has a depth up to 29 ft. In this basin there are 3 smaller companies handling gasoline, petrol and lubricating oil. Silo Dordrecht, also situated in this basin, is a company which mainly handles agricultural products and sometimes general cargo for which they have 2 sheds with a capacity of 30,000 sq.ft. A company called Trans Terminal Dordrecht, specialising in handling fertilisers, has an open storage area of 110,000 sq.ft. and two sheds with a capacity of 35,000 sq.ft. are also located here.

Basin No. 3 has a depth up to 17 ft., this will be 26 ft. in the near future. There are 2 sand/gravel jetties in this basin and one for blasting grit. The company which handles this blasting grit is called Nietim.

The Mallegat: 2 basins, has been closed by 2 dams, one 500 m. North of the Wilhelmina Harbour entrance and the other 600 m. South of the Juliana Harbour entrance. By closing the Mallegat, the area of the harbours of Dordrecht has been increased by about 40 acres. The North basin with a water area of 18 acres and a depth of 29 ft. below NAP. The South basin with a water area of 22 acres and a depth of 24 ft. below NAP. Besides, as a sea harbour. Dordrecht is an important centre of inland navigation.

Principal Riverside Quays:	*Length*	*Depth – NAP*
Buitenkalkhaven	1,000 ft.	12 ft.
Hooikade	250 ft.	11 ft.
Groothoofd		
Passenger Landing Pier	290 ft.	15 ft.
Merwekade	1,000 ft.	16 ft.
Handelskade	470 ft.	16 ft.

Coasters can be accommodated at the Handelskade, Buitenkalkhaven and 2nd Merwedehaven. For clearance of inward and outward bound coasters, the lower part of the Handelskade has been reconstructed. Mooring free of harbour dues is restricted to the time needed for clearance only.

Principal Harbours – Inland Vessels and Coasters:	*Length*	*Width*	*Depth – NAP*
Binnenkalkhaven	800 ft.	230 ft.	11 ft.
Bomhaven	265 ft.	165 ft.	10 ft.
Wolwevershaven	1,000 ft.	165 ft.	8 ft.
Riedijkshaven	650 ft.	120 ft.	10 ft.
1st Merwedehaven	2,000 ft.	400 ft.	10 ft.
2nd Merwedehaven	2,000 ft.	600 ft.	16.5 ft.
3rd Merwedehaven	2,000 ft.	600 ft.	15 ft.

CRANES: 2 Transporting bridges 15 tons each, 2 Portal cranes 12.5 tons each, 1 Portal crane 7 tons, 1 cargo crane 5 tons capacity.

BRIDGES: Bridges across the River Oude Maas are opened day and night. Sea traffic has preference over shore traffic.

Immediately above its confluence into Nieuwe Maas, the Oude Maas is spanned by 2 lifting bridges:

1. The Botlek Bridge with a free width of 53.80 m.
2. The Spijkenisse Bridge with a free width of 80.00 m.

TANKERS: Oil installation of Gebr. Broere N.V. has 7 tanker berths. Max. draft 9.0 m. There are other tanker berths for small tankers. No slop (residue) storage facilities.

DENSITY: Fresh water.

REPAIRS: B.V. Scheepswerf en Machinefabriek "De Biesbosch" Maasstraat 24, 3313 CR Dordrecht, Tel: 078-14 70 77, Telex: 29494 Biesb. NL.

Machinefabriek L. Straatman B.V. Kuipershaven 61, 3311 AM Dordrecht. Tel: 078-14 24 22.

B.V. Scheepswerf Hoebee, Merwedestraat 56, 3313 CS Dordrecht. Tel: 078-13 00 88.

Machinefabriek C.P. Bolier B.V., Grevelingenstraat 21, 3313 LB Dordrecht. Tel: 078-16 41 11, Telex: 29329 Bomak. N.L.

DRY DOCKS: Small dry dock available.

STEVEDORES: Working hours: 0730 hrs. on Monday until 1900 hrs. on Saturday.

FRESH WATER: At oil installations fresh water can be supplied from shore or supply by waterboat. Fresh water canbe ordered from the Harbour Master's Office.

FUEL: Available by barge, capacity 100 tons – 1,400 tons.

CONSULS: Denmark Tel: 132177, Norway Tel: 132177. Other consulates at Rotterdam at 20 km. distance.

POLICE/AMBULANCE/FIRE: Tel. Police 339911; Ambulance and Fire 133333. General Emergency 06-11.

AIRPORT: Rotterdam and Amsterdam airports at a distance of 25 km. and 90 km. respectively served by regular airlines.

PILOT CUTTERS, HEALTH, MEDICAL ATTENDANCE, BUNKERS, CUSTOMS ALLOWANCES: See "Rotterdam".

HOLIDAYS: New Year's Day, Easter Day, H.M. Birthday (30th April), Ascension Day, Whit Sunday, Christmas Day.

TIME: GMT plus 1 hour. Summer plus 2 hours.

GARBAGE DISPOSAL: General Information: Dutch port authorities are responsible for the provision of reception facilities in their ports. They publish who have been designated to receive waste from ships in their port. It is forbidden to deliver waste to persons who have no official designation as a port reception facility.

Fees: The costs incurred as a result of the delivery and further processing of waste are to be paid by the ship to the receiving company.

Advance notice requirements: In Dutch ports, the ship's need for reception facilities must be reported 24 hours in advance.

Contact Port Authority for details.

WASTE OIL DISPOSAL: See "Garbage Disposal".

SEAMAN'S CLUBS: See "Rotterdam".

CURRENCY: Dutch Guilders.

AUTHORITY: Havendienst Dordrecht, Merdekade 56, 3311 TH Dordrecht, Netherlands. *Tel:* 078-134211. *Telex:* 29492 Haven nl. *FAX:* 078-312141. *Contact:* J. Maat, Harbour Master.

EEMSHAVEN: 53.27 N. 06.50 E. (See Plan)

LOCATION: On the Western shore of the River Eems, about 15 km. N.W. of Delfzijl.

DOCUMENTS: See "Rotterdam".

PILOTAGE: See "Delfzijl".

ANCHORAGE: Near the Western Mole of the Eemshaven is an anchorage with a depth of about 16 m.

RESTRICTIONS: The entrance channel Doekegatkanaal has a depth of 11.5 m. thus enabling ships with draft up to about 11 m. to enter at HW.

Tides: The range at Springs is 2.78 m. and at Neaps 2.13 m. Tidal movement is diurnal with an average range of 2.49 m. (all approx.).

Depths: All depths are indicated in relation to N.A.P. LLWS at Eemshaven lies 1.84 m. below N.A.P. (Normal Amsterdam Level).

RADIO/TUGS/RADAR: See "Delfzijl".

VHF: Channel 19: "Eemshaven Port Control" – A new VTS will be installed on January 1st 1993. All ship movements should be reported to the VTS Operator.

Channel 14: Information channel and for ordering tugs, linesmen and pilot and weather information, etc.

BERTHING: The harbour is divided into 4 communicating basins:

Doekegatkanaal: Has a width at the entrance of 325 m. and a bottom width of 200 m. over the rest of the channel. At the end of the Doekegatkanaal is a turning basin with a diameter of 500 m. and a depth of 11.0 m.

Wilhelminahaven: East of the turning basin is a special basin for tankers with a depth of up to 15 m. and a bottom width of 200 m. This basin has a length of 600 m. Mooring facilities will be constructed by future industries.

Julianahaven: Located West of the turning basin. This basin has a length of 1,200 m. and a width of 250 m. to 300 m. ultimately. The depth of this basin varies between 12.0 m. and 14.0 m.

To the South of this basin a quay has been constructed with a length of 1,150 m. and a width of 300 m. This private quay is operated by three stevedoring firms:

1. Transit Centre Eemshaven: Quay length 469 m. 6 electrical cranes up to 20 tons lifting capacity; storage area 100,000 sq.m.; 35,000 sq.m. shed space. Handling general cargo and containers. The Eemshaven Sugar Terminal is located on the premises of and is managed by Transit Centre Eemshaven. A bulk sugar silo of 136 m. × 65 m. × 33 m., with storage capacity of 100,000 tons. Reception possible by bulk rail wagon, bulk road truck and bulk barge.

Loading into sea-going vessels is via 2 spiral shiploaders (120 t.p.h.) or by a bulk-loader (750 t.p.h.).

2. Terminal Eemshaven: Quay length 554 m.; 3 electrical spiralveyors; 2 electrical cranes of 5 ton lifting capacity; several mobile cranes up to 200 tons lifting capacity. Handling general cargo, containers and Ro/Ro traffic. The Ro/Ro ramp has a capacity of 92 tons and a ramp width of 7.0 m.

General cargo shed of 6,500 sq.m.; air-conditioned cold store, divided into 12 boxes with a total capacity of 13,500 pallets. Each box can be cooled down to temperatures from −2° C. to 14° C. for all kinds of fruit.

3. Sealane Coldstorage B.V.: Quay length: 110 m. A multi-temperature public bonded cold store, ranging from +14°C to −30°C, with 6 different rooms and a total capacity of 75,000 cu.m., is owned and operated by Sealane Coldstorage B.V. The cold storage is classed with Lloyd's Register: Lloyd's RSC 10/80 URSI. The cold store is located on the quay, with direct access to the vessel's side.

There is a temperature controlled airlock of 15,000 cu.m. with dock shelters for loading trucks and access to a railway loading station inside the store.

Emmahaven: Has been constructed South of the quay and West of the swinging basin. This basin with a length of 600 m. and a width of 130 m. has been dredged to 10 m.

In the N.W. corner a Ro/Ro facility is operated by A. G. Ems-Nederland b.v., serving the island of Borkum and can also be used for International Ro/Ro traffic. For trailers and cars, a fenced parking area is available.

A floating jetty for inland ships with a length of 225 m. has been constructed and is operated by the Port Authority.

STEVEDORES: See "Delfzijl".

DENSITY: Between 1018 and 1021, depending on tide.

FRESH WATER: Water can be delivered by private companies on the quays. It is also available at the floating jetty.

FUEL: Supply should be arranged in advance.

AIRPORT: Eelde (Groningen).

GANGWAY/CERTIFICATES: See "Delfzijl".

SUPPLIES: Fuel oil and provisions should be arranged in advance.

REGULATIONS: See "Delfzijl".

GARBAGE DISPOSAL: A special collection service is not available. Garbage containers are provided on the quay, free of charge.

WASTE OIL DISPOSAL: In the Netherlands, port authorities are responsible for the provision of reception facilities in their ports.

The Port Authority of Delfzijl/Eemshaven has appointed "Eems Milieutechniek BV" (EMT) as the sole port reception facility for Delfzijl and Eemshaven. EMT, in which Tanker Cleaning Amsterdam BV, Niestern Sander BV (Delfzijl) and North Sea Petroleum (Groningen) participate, collects and processes oily residues delivered to the bilge boat and/or vacuum lorry.

For further information please contact: Eems Milieutechniek BV, Visserijweg 10, 9936 HB Farmsum. Tel: 05960 – 18803. Fax: 05960 – 18796.

SEAMAN'S CLUBS: None.

CURRENCY: Dutch Guilders (Fl). U.S.$ 1.00 = Fl 2.00 (1.7.91).

AUTHORITY: Port of Delfzijl/Eemshaven Authority, Noordersingel 1, 9934 AK Delfzijl or P.O.Box 20004, 9930 PA Delfzijl. *Tel:* 05960-40400. *Telex:* 53299 Hsddz. *FAX:* 05960-30424. *Contact:* C. Biemond, Port Director. Captain R. K. Mast, Harbour Master. Captain J. Stokroos, Deputy Harbour Master.

FLUSHING (Vlissingen): 51.27 N. 03.35 E. (See Plan)

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
1 Store List.
1 Personal Effect List.
Ship's Register.
1 Manifest or Bill of Lading.
Also see "Rotterdam".

APPROACHES: Approaches to the Scheldt Estuary:

	MLWS (m.)	*Rise Spring* (m.)	*Rise Neap* (m.)
South Channel:			
Wielingen	8.0	4.7	3.8
Scheur	13.9	4.7	3.8
North Channel:			
Oostgat	8.0	3.9	3.0

PILOTAGE: Position of pilot cutters in the Scheldt Estuary: Pilotage is compulsory.

Wielingen (Southern Approach) or via Scheur: Vessels approaching the Scheldt Estuary from the English Channel pass the light vessels Sandettie Banks and West Hinder. The Belgian pilot cutter *Wandelaar* is stationed near Buoy A1 at Lat. 51° 22′ N., Long. 02° 53′ E. This cutter has a black hull with a white number on her bow, a yellow funnel with black top and flies a red flag with the letter "P" in white.

A vessel bound for Flushing to discharge, bunker, load, to embark or disembark passengers or for repairs will be provided with a Dutch Pilot, who will take the vessel into harbour. Other vessels for Flushing (sheltering, awaiting orders, unplanned repairs, etc.) will be provided with a Belgian Pilot to Flushing Roads, where a Dutch Pilot comes on board to take the ship into harbour.

Oostgat (Northern Approach): Vessels approaching the Scheldt Estuary from the North can take a Pilot in the vicinity of the S.B.Z. Lightbuoy (Lat. 51° 42.3′ N., Long. 03° 14.3′ E.) where a Dutch pilot cutter is stationed, flying a blue flag with the letter "L" in white. As a rule vessels bound for Flushing are provided with a Dutch Pilot.

ETA Messages: Masters' telegrams via Scheveningen Radio, call-sign PCH, are passed on to Agents 24 hours a day, week-ends inclusive.

For this reason it is advisable that Masters communicate with Agents via Scheveningen Radio, via which station Agents also route their messages to vessels.

Vessels bound for the River Scheldt should cable, at least 4 hours in advance, their:

1. ETA "Wandelaar" (Southern Approach) to:
   "Pilotage Ostend", via Ostend Radio (OST):
2. ETA "Steenbank" (Northern Approach) to:
   "Pilotage Flushing", via Scheveningen Radio (PCH).

The ETA message should contain the following details: *(a)* the words "ETA Pilot Wandelaar or Steenbank". *(b)* ETA central European time shown in a group of four figures. *(c)* draft (S.W. or FW) with indication of unit applied. *(d)* port of destination and berth.

Pilot cutters may be contacted on VHF Channel 6.

During bad weather both pilot cutters shift to Flushing Roads.

ANCHORAGE: The Roads of Flushing offer a safe and spacious anchorage with a sandy bottom. Vessels anchoring in the Roads are recommended to do so Southward of the Koopmanshaven (the Western harbour of Flushing) at not less than 0.75 miles from the Northern Coast. In this part of the Roads depths vary from 10 m. (33 ft.) to 26 m. (85 ft.).

The greatest depths and the strongest tides are encountered on the Southern part of the Roads. When lying there vessels are less exposed to the risk of collision in foggy weather etc. and are well away from vessels proceeding up and down the river, manoeuvring for the purpose of landing and/or embarking Pilots, and from ferry boats crossing between Flushing and Breskens.

At the Northern part of the Roads the tidal stream slackens gradually until HW is reached and under normal conditions of tide and wind the ebb stream is already felt along the shore from half an hour after HW until 1 hour after LW. From 1 hour after LW the flood tide sets in again and is felt until shortly after HW.

At the South side of the Roads the tidal stream is running until slightly over an hour after HW when the stream slackens and turns. 2 hours after HW the stream is running in N.W. direction gradually veering West.

A new anchorage Wielingen Noord, North of the line of the lightbuoys W6 and W10, is marked by yellow conical buoys. It is strongly recommended that vessels carrying dangerous cargoes anchor there, exceptional circumstances excepted and weather permitting.

MAX. SIZE: *Flushing East Harbour:* Entrance 12.5 m. at MLLWS. A depth of 11.3 m. (length 550 m.) and 13.3 m. (length 350 m.) alongside the quay.

Max. draft at Buoys 41 ft. (2 berths).

Outer Harbour: West side, max. draft 9.5 m.

Inner Docks: Max. depth 24 ft.

Total: Max. length 280 m., max. draft 15 m. (S.W.), max. d.w.t., 100,000 tons. However, draft is controlled by the depth in the approach channels.

HEALTH: No certficates required. In event of any disease or fever contact Agents.

RADIO: All messages to Agents via Scheveningen Radio.

Flushing Radio can be reached by VHF Channel 21. Harbour tugboats and pilot cutters operate on VHF Channel 6. Port Authority VHF Channel 9.

RADAR/VHF: Port radar service available. River service under consideration. Flushing Radio Channel 21 VHF. Every 5 minutes each hour this station transmits information regarding visibility, water-level, hindrances, anchorages, etc. Harbour tugs Channel 6.

TUGS: Join vessels in Flushing Roads. Vessel's lines usually used. Extra for tug lines. For contract holders 5% reduction.

BERTHING: *Outer Harbour:* West side, quay of 350 m. long, depth of water 11.5 m.. MLLWS. Quay height above sea level 2 m. at high tide and 7 m. at low tide. Opposite the West Side Quay is an oil jetty with depth of 9.5 m. alongside (LLWS). The jetty is owned by the Oil Terminal Flushing. In Northern part of Outer Harbour a landing stage with length of 360 ft. Depth at low tide 6.0 m. Depth at HW 8.8 m.

Flushing East Harbour: Quay length 530 m., depth 11.3 m. LWOST and 350 m., depth 13.3 m.

The Bijleveld Harbour, situated in the North West part of Flushing East Harbour has a public quay with a length of 800 m. and depth 9.0 m. LLWS on the West side and a quay with a length of 400 m. and depth 10.5 m. LLWS on the East side. The quay will be used for the transhipment of refrigerated products and steel.

The new Kaloothaven Terminal, situated in the South part of Flushing East Harbour is operational. The quay has a total length of 650 m. and has a depth at LLWS alongside over 250 m. of 10.5 m. and over 400 m. of 5.0 m., and a depth of 16.5 m. with floating cranes and pontoon placed between vessel and quay. The terminal is a coal transhipment facility and can handle vessels of 150,000 d.w.t. Coal is handled by floating cranes of 25 tons capacity. The stockyard has a capacity for 230,000 tons.

Inner Docks: A double lock and sluice give access from Outer Harbour to inner docks and canal through Walcheren. Largest lock length 140 m., width 22 m., depth on still LWOST of 5.4 m.. The other lock is 65 m. long, 7.8 m. wide, and 3.0 m. deep.

STEVEDORES: Provided by N.V. Haven Van Vlissingen (Port of Flushing Limited). Tel: 01184-26000. Telex: 37837 A.

Stevedore Company – Westerschelde. Tel: 01184-66000. Telex: 37798.
Flushing Stevedoring Co. Tel: 72800.

MECHANISED CARGO HANDLING: Quay length 2,800 ft. equipped with 2 portainers (65 tons capacity), suitable for handling 20 ft. up to 40 ft. containers. Straddle carriers capacity 32 tons and fork-lifts capacity 32 tons available.

Roll-on/Roll-off service between Flushing and Sheerness. Service twice a day. Vessels berth in the Outer Harbour at the Olau Line Terminal. At Flushing-East, Ro/Ro facilities for deep sea vessels, as well as Ro/Ro facilities for short sea Ro/Ro traffic.

LPG HANDLING FACILITIES:

Eurogas Terminal, Flushing East: The Eurogas Terminal is dedicated solely to storage and throughput of Liquefied Petroleum Gases and Chemical Gases.

Documents: Eurogas has been authorised by the Dutch Customs Authorities to prepare and complete all necessary Customs and transportation documents, which reduces waiting time to an absolute minimum.

Pilotage: In close co-operation with Eurogas, the shipping Agent and the Pilot, the Harbour Authorities control the arrival and subsequent mooring in the Quarles Harbour.

Max. Size:

				Facilities	
Vessel Size	*Length* (m.)	*Beam* (m.)	*Draft* (m.)	*Refr.*	*Press.*
Jetty 1	213	38	9.5	×	×
Jetty 2	295	44	13.5	×	×
Jetty 3	110	12	5.0	–	×
Jetty 4	110	12	5.0	–	×

The harbour has a depth of 16 m. NAP (13.50 m. LLWS) and is therefore accessible to all existing fully loaded LPG-carriers. Maximum drafts may also be dependent on the prevailing least depth in 'Het Scheur' and the near approaches to the jetties and are conditional on the agreed procedures and Port Authority requirements for the safe movement of LPG-carriers. For safety reasons loading/unloading can be stopped due to high wind forces depending on wind direction.

Berthing: Jetty 1: At which inland barges and oceangoing vessels with a draft of max. 9.5 m., overall length of max. 213 m., a max. bow to manifold distance of 115 m., a max. stern to manifold distance of 108 m. and a max. beam of 38 m. can safely reach and leave and at which such vessels can always lie safely afloat.

Loading and discharging shall normally be allowed to continue as long as the ship's manifold connection stays within the reach of the loading arm of Eurogas.

The reach of the loading arm can accommodate:

- max. height +14.0 m. NAP (Normaal Amsterdams Peil) which is comparable with approx. 11.5 m. above water-level at HW.
- minimum height −1.5 m. NAP which is comparable with approx. 1 m. above water-level at LW.

- range out of centre loading arm parallel to berthing line approx. 5 m.
- range out of – and perpendicular on berthing line approx. 7 m.

Jetty 2: At which inland barges and ocean going vessels with a draft of max. 13.5 m., overall length of max. 295 m., a max. bow to manifold distance of 150 m., and a max. stern to manifold distance of 150 m. and a max. beam of 44 m. can safely reach and leave and at which vessels can always lie safely afloat.

Loading and discharging shall normally be allowed to continue as long as the ship's manifold connection stays within the reach of the loading arm of Eurogas.

The reach of the loading arm shall be able to accommodate:

- max. height +28 m. NAP which is comparable with approx. 25.5 m. above water-level at HW.
- minimum height −1.5 m. NAP which is comparable with approx. 1 m. above water-level at LW.
- range out of centre loading arm parallel to berthing line approx. 7 m.
- range out of – and perpendicular on berthing line approx. 12 m.

Jetty 3/4: At which inland barges and coastal vessels with a draft of max. 5 m., overall length of max. 110 m., a max. bow to manifold distance of 40 m. (Jetty 3), and 55 m. (Jetty 4), a max. stern to manifold distance of 50 m. and a max. beam of 12 m. can safely reach and leave and at which vessels can always lie safely afloat.

Jetty 4 is also suitable for small coastal vessels (max. deadweight approx. 1,500 tonnes), ship size depending on manifold allocation.

Loading and discharging shall normally be allowed to continue as long as the ship's manifold connection stays within the reach of the loading arm of Eurogas.

The reach of the loading arm shall be able to accommodate:

- max. height +14.0 m. NAP.
- minimum height −1.5 m. NAP.
- range out of centre loading arm parallel to berthing line approx. 5 m.
- range out of – and perpendicular on berthing line approx. 6 m.

Discharging: Eurogas operate 24 hours a day, 7 days a week.

Eurogas and the independent surveyor check the facilities of the vessel and the quantity of the cargo before discharge commences.

Receiving Capacities at Various Jetties (all in cu.m./hr.)

	Into refrigerated tanks	Into pressure tanks or to other jetties
Jetty 1	1,000 (per tank)	500
Jetty 2	3,200 (per tank)	500
Jetty 3	—	500
Jetty 4	—	500

In order to minimise laytime on jetties, refrigerated propane and butane can be discharged simultaneously at Jetty 1 and 2.

Additionally, all pipe-lines on shore can be cooled down before the arrival of a vessel by means of separate cool-down lines. All jetties are equipped with vapour return facilities including a blower-system at Jetty 2.

Board/board transfers between all the jetties can be realised with or without the use of 2 heaters. These heaters have a capacity of 500 cu.m./hr. each, with a temperature differential of up to 47°C under all weather conditions.

Loading: 4 vessels/barges, 3 railcars and 4 road trucks can be loaded simultaneously with capacities as described below.

Railcars and road trucks are each loaded on a weighbridge. The consecutive loading of 2 products into 1 railcar/road truck can take place without disconnecting and reconnecting of loading arms and necessary shunting/shifting to another loading point.

Loading Capacities in cu.m./hr.	*Product.* *Refrig.*	*Press.*
1. From the refrigerated tanks:		
To Jetty 1 or 2 (per tank)	600	–
To Jetty 3 or 4	–	–
Via heater to pressure tank		500
Via heater to Jetty 1, 2, 3 and 4	–	500
2. From the pressure tanks:		
To Jetty 1, 2, 3 or 4		350
To each railcar loading point		120
To each roadtruck loading point		80

Storage: The terminal consists of 6 pressure tanks with a gross capacity of 3,369 cu.m. each, and 2 refrigerated tanks of 55,000 cu.m. each. Total capacity is therefore 130,000 cu.m.

The refrigerated tanks are constructed with double integrity steel inner tanks and a concrete outer wall capable of holding refrigerated product.

In the pressure tanks, chemical gases can also be stored.

Product List:

1. Refrigerated tanks: propane, butane and/or mixtures.
2. Pressure tanks: butane, isobutane, butadiene, butylene, isobutylene, cyclopropane, propane, propylene-oxide, propylene.

Products for the pressurised storage are:

Spheres 1, 2, 3, 4, 5 and 6. Butane, isobutane, butadiene, butylene, isobutylene, cyclopropane, propane, propylene-oxide. Spheres 4 and 5 also propylene.

A. Pressure tanks: Product stored in tanks 1, 2, 3 and 6 shall have a vapour pressure of less than 13.5 bar gauge at 30°C.

B. Pressure tanks: Product stored in tanks 4 and 5 shall have a vapour pressure of less than 16.5 bar gauge at 30°C.

C. Refrigerated tanks: 2% mol. max. ethane content in propane was the design basis for the refrigerated system. The tolerances on the compressors and the cooling system are the technical limitations on storage of products with higher ethane contents.

Safety: E.S.D. systems (Emergency Shut Down systems)

Activated by:

(a) Gas detection system.
(b) Loading arms limit switches.
(c) Ship's E.S.D. system.
(d) Control-room.
(e) Local push buttons.
(f) General E.S.D. pressure storage fill system.
(g) Fill shut down (overflow).
(h) Shut down sendout system.

Gas Detection System.
Sensors located at:

(a) Annular space tanks.
(b) Fan intake.
(c) Roof tanks.
(d) Relief valves' exhaustline.
(e) Area general.
(f) Process area.
(g) Boiler house.
(h) Office heating air intake.
(i) Jetties.
(j) Existing pressure storage.
(k) Generators' area.
(l) Expansion-tank water/glycol system.

Firefighting: The terminal site has been equipped with all sorts of fire-fighting apparatus like:

– 45 water guns, which can spray 1,600 litres per minute each over a distance of 70 m;

– sprinkler installations at all vital points;

– 2 separated pumping systems, to be sure of water supply under all circumstances; 1 at the harbour with 2 diesel-powered pumps with a total capacity of 2,000,000 litres water per hour, the other 65,000,000 litres at the pond which is constructed on the site.

– Eurogas has its own fire brigade, with a special fire-fighting truck which can also travel on rails. In this way every part of the terminal site and its perimeter can be reached with the greatest possible speed.

Operator: Eurogas Terminals C.V.

Office: Frankrijkweg 4, 4455 TR Nieuwdorp. Tel: 01196-12820. Telex: 55684.

MEDICAL: Two hospitals available.

TANKERS: Vessels carrying over 4,400 gallons of combustible liquids with a flash point up to 21°C, or over 22,000 gallons with flash point up to 55°C require Harbour Master's permission for entry.

2 discharging berths alongside the quay. Discharge lines 3×8 in. diameter with capacity of about 2,000 t.p.h.

Total: See "Max. Size".

One jetty for tankers up to 100,000 d.w.t. and 3 jetties for barges and coasters with depth of 20 ft. and 30 ft.

Cautionary Advice: Due to adverse tidal conditions, vessels may tend to drift away from jetty during period before high tide. It is, therefore, very important that ships pay particular attention to moorings.

Connections:

Commodity	Loading arms
Fuel oil	2×12 in.
Clean products	2×10 in.
Bunkers (fuel oil only)	1× 8 in.

The two fuel oil loading arms can also be used for the discharge of crude oil. The loading arms are hydraulically operated.

Deballasting: One 12 in. and one 10 in. loading arm can also be used for the discharge of dirty ballast water in unlimited quantities at the rate of about 1,000 t.p.h.

Capacities: Discharging rate of crude oil 3,000 t.p.h. and the loading rate of fuel oil about 2,700 t.p.h.

Supplies: Water obtainable from jetty. Bunkers by barge. Stores by small vehicles max. axle load 12 tons.

DENSITY: About 1024.

FRESH WATER: Can be supplied either alongside the quay or by water boat. Possible to supply fresh water in Flushing Roads weather permitting.

FUEL: All grades obtainable from major oil companies and supplied by barge only.

Economical bunkering arrangements can be made at the sheltered anchorage Schaar van Everingen, a few miles up river from Flushing. No harbour dues. Max. draft HW Neaps 42 ft. Springs 45 ft.(S.W.).

CONSULS:

Belgium	Tel: 66989	Germany	Tel: 01185-2618
Denmark	Tel: 12711	Norway	Tel: 12272
France	Tel: 16732	Sweden	Tel: 16828

REPAIRS: All repairs possible.

DRY DOCKS: Largest (Graving) Length 229 m., width 36.1 m., draft 8.5 m. (HW), 90,000 d.w.t. and 2 smaller docks.

A dry dock with 300,000 metric d.w.t. capacity is planned.

GANGWAY/DECK WATCHMEN: Available but not compulsory or necessary.

OPENING/CLOSING HATCHES: On liners by crew or stevedores, ship's option.

CERTIFICATES: On arrival, ship's register only.

CUSTOMS ALLOWANCES: 200 cigarettes for each member of crew and total on board out of bond 5 litres spirits and 100 litres wine.

CARGO GEAR: The port is equipped with modern mobile cranes, which can be used both in the outer harbour and in the inner docks, with the following capacities:

2 cranes – 30 tons	3 cranes – 12 tons	1 crane – 8 tons
2 cranes – 25 tons	2 cranes – 10 tons	

Floating cranes are available with capacities of 225, 75, 40 and 8 tons.

REPATRIATION: All facilities available for crew changes; good railway connections.

AIRPORT: Rotterdam (Zestienhoven) 125 km.; Brussels (Melsbroek) 150 km.; Amsterdam (Schiphol) 180 km.

TIME: GMT plus 1 hour. Summertime, GMT plus 2 hours.

HOLIDAYS: New Year's Day (January 1st); Easter Monday; Queen's Birthday (April 30th); Ascension Day; Whit Monday; Christmas Day (December 25th); Boxing Day (December 26th).

Work can be arranged on above days, however dependent upon permission of the Docker's Inspection.

POLICE/AMBULANCE/FIRE: Police 13333; Ambulance and Fire 14444.
TELEPHONES: Possible to place telephones on board and for vessels berthing at the shipyard "De Schelde".
SERVICES: Compass Adjuster; Radio/radar services also calibration of the Direction Finder, Seamen's Home (Mission to Seamen); Lloyd's Sub-agents; Ship's Laundries.
SHORE LEAVE: After clearing inwards, crew members are allowed to go ashore without special permission.
IDENTIFICATION CARDS: Not required.
GARBAGE DISPOSAL: Garbage container placed alongside on request by Wielemaker B.V. (Tel: 01185-2440). Charge depends on quantity.
WASTE OIL DISPOSAL: The shore reception facility is located at the ship repair yard owned by Martens B.V. (Tel: 01105-1775).
SEAMAN'S CLUBS: Missions to Seamen (The Flying Angel). Tel: 01184-67063.
AUTHORITY: Flushing Ports Authority, Engelandweg, Sloehaven, Vlissingen-Oost, P.O.Box 1056, 4388 ZH Oost-Souburg, Netherlands. *Tel:* 01184-68080. *Telex:* 37865 Haven Nl. *FAX:* 01184-67020. *Contact:* Captain J.Verkiel, Harbour Master. Tel: 01185-2958 (Residence). Captain E.A.v.d.Berg, Deputy Harbour Master.

GRONINGEN: 53.15 N. 06.34 E. (See Plan)

The port is connected with the Ems Estuary via the Eemskanaal and the lock at Delfzijl.
DOCUMENTS: See "Rotterdam".
Clearing is done at Delfzijl.
PILOTAGE: For the approach of the lock see "Delfzijl".
The length of the lock is 120 m. and the width 16 m. Depth over sill at LW 3.9 m. and at canal level 6.07 m.

On the locks Canal-Pilots are available but pilotage on the canal is not compulsory. The length of the canal is 14 miles and it has a least depth of 5.2 m. There are 4 bridges all 16 m. wide.
MAX. SIZE: Maximum size for ships passing lock and navigating canal; beam 13 m. and draft 4.5 m. (Vessels with greater beam and draft possible with permission of the Canal Authority.)
TUGS: Available at Delfzijl and Groningen.
BERTHING: *Hunzehaven:* South side 300 m. quayage, railway connected, max. draft 4.5 m., 3 grab cranes 3.5 tons.
Oosterhaven: North side 75 m. quayage, max. beam 12 m., max. draft 3.6 m.
Deense Haven: 3 mooring buoys, max. draft 4.5 m. One private grab crane on wharf, capacity 8 tons.
Eemskanaal: Private silo. Max. beam 12 m., max. draft 3.6 m., private timber yard max. beam 12 m., max. draft 3.6 m.
Van Starkenborghkanaal: Private silo. Max. beam 9.6 m., max. draft 2.9 m., private timber yard max. beam 9.6 m., max. draft 2.9 m.
CRANES: Floating sheerlegs up to 250 tons.
STEVEDORES: Available.
MECHANICAL CARGO HANDLING: Silos with equipment for bulk-handling of grain on Eemskanaal and Van Starkenborghkanaal.
MEDICAL: 3 hospitals available.
FRESH WATER: Supplied by Authority's water boats.
FUEL: By barge only.
CONSULS: Belgium, Tel: 138222; Norway, Tel: 189444; Spain, Tel: 137879.
REPAIRS: All repairs possible at Delfzijl.
DRY DOCKS: Transverse slipway at Delfzijl.
CERTIFICATES: On arrival, Ship's Register only.
AIRPORT: Eelde, 10 km. from Groningen, daily services to Schiphol.
HOLIDAYS: New Year's Day, Easter Monday, Queen's Birthday (30th April), Ascension Day, Whit Monday, Christmas Day, Boxing Day.
POLICE/AMBULANCE/FIRE: Police Tel: 121212; Ambulance Tel: 123456; Fire Brigade Tel: 123456.
TELEPHONES: Can be placed on board alongside Hunzehaven Quay.
AUTHORITY: Gemeentelijk Havenbedrijf Groningen, Bornholmstraat 4, 9723 Ax Groningen. ~~*Tel:* 050-120306 and 125777.~~ *Contact:* A. J. F. van Kuik, Harbour Master. *Tel:* 05960-23376 (Private).

MOERDIJK: 51.42 N. 04.38 E.

SHIPMASTER'S REPORT: June 1987.

DOCUMENTS:
- 6 copies Crew List.
- 2 copies Crew Declaration.
- 2 copies Manifest.
- 1 copy Health Declaration.
- 3 copies Crew Manifest.

PILOTAGE: Pilot normally boards at the Maas Centre Buoy, except when there is very poor weather when small vessels that know the area (with hydrocarbons) can proceed inside the Hook of Holland breakwaters and embark the Pilot there.

There is a special Pilot for Dordrecht and Moerdijk.

The average pilotage time to Moerdijk, depending on the state of the tide, is 4 hours.

River Passage: Pilots sometimes take small vessels up river on automatic pilot. On reaching the Oude Maas bridges, about 10 minutes after Botlek, the Pilot requires a man forward and changes to manual steering.
ANCHORAGE: Vessels use anchorages in the Hook of Holland area.
TUGS: Sea-going vessels are obliged to use a tug when berthing, leaving or warping at Berths No. 3, 4 and 6, unless the LOA is less than 80 m. and the vessel is equipped with a bow-thruster. When the vessel is leaving Berths No. 3, 4 and 6 with the bow in the direction of departure, a tug is in most cases not necessary. Also see "Berthing".
BERTHING: Vessel berth at Shell Moerdijk at Jetty "T" where there are 5 berths for small vessels. The largest vessel handled is about 20,000 d.w.t.
The maximum draft is 7.8 m. (there is a tunnel under the Oude Maas near Dordrecht).

Vessels with a draft of 6.5 m. can navigate at any state of the tide, there is a shoal patch near Moerdijk.

Larger vessels are berthed against flat face of the "T". Ethylene is handled at Berth No.2 on the "T". Normally vessels berth head in – port side to, without the use of tugs. However, should the vessel have to berth starboard side to, a tug is required.

Mooring consisted of 2 head/stern lines and 2 springs. A mooring boat is provided and the fenders are good. Shore gangway provided.

When entering and leaving, the pilot has to be very careful that the bow overhang does not hit the Chicksans on Berth No. 3.
CARGO: Vessels discharge ethylene. However vessels are also able to load at this berth.

If 2 vessels are carrying the same product, only 1 vessel is allowed to discharge at one time.

There is one Chicksan (8 in. 150 ASA) for discharge at both Berths No. 2 and 3. Rate of discharge 80 t.p.h.

Samples are taken about 3 hours after commencement of discharge.
FRESH WATER: Fresh water is available on both berths from a hydrant and is metered. The charge is DFL 2.75 per ton.
GENERAL: All services are provided from Rotterdam. A telephone is placed on board but there is no meter. The meter indicating the total charges is at the gate office. Cost of call to U.K. is DFL 1.20 per minute and to Rotterdam DFL 0.25 per minute.

Vessel used Dirkzwager message agency at Maasluis (telex 26751 dirknl) for all communications with Pilot and Harbour Authority prior to arrival. This service can also be used for after hours messages to the agent, etc.

There is a lay-by berth available at Shell Moerdijk for small vessels.

Should the vessel be taking on stores, the truck is only allowed as far as the car park which is about 150 m. from the vessel.

The best way to Dordrecht from Rotterdam is by train from Lage Zwaluwe Station. Taxi from the car park to the station costs DFL 32.50.
Chart: B.A. Chart 137

SHIPMASTER'S REPORT: December 1988.

The following is an update on Shipmaster's Report, dated June 1987.
BERTHING: Vessels with a draft of 7.5 m. (not 6.5 m.) can navigate at any state of the tide.

Normally vessels berth starboard side to at Berth No. 2 and port side to at Berth No. 3 without use of tug. Vessels can berth starboard side to at Berth No. 3 if a tug is used.
CARGO: Rate of discharge for ethylene is 110 t.p.h.

Generally, there is no surveyor. The terminal will not sign ullage sheet.

Make sure that the Loading Master signs the Statement of Fact on completion.

Time between completion and sailing is over 3 hours.
GENERAL: Lay-by Berth at Shell is suitable for vessels 100 m. LOA and 8.0 m. draft.
DEVELOPMENTS: Loading/discharging facilities to be upgraded in 1989 with extra ethylene lines for faster turnarounds.

AUTHORITY: Industrie en Havenschap Moerdijk, Steenweg 100, 4781 AS Moerdijk. *Tel:* 01683 – 2550. *Fax:* 01683 – 2417.

ROTTERDAM: 51.55 N. 04.24 E. (See Plan)

DOCUMENTS: The following documents have to be handed over to Customs and Immigration Authorities:
- 3 copies General Declaration.
- 2 copies Crew List.
- 2 copies Passenger List.
- 2 copies Crew Customs Declarations (Personal Effects List).

In addition to the above the following documents have to be available on board for inspection by Customs, Immigration Authorities and Netherlands Shipping Inspectorate:
- Ship's Register or Certificate of Registry.
- Cargo List, manifest or certificate.
- Bill of Lading.
- Log Book.
- Crew List.
- Stores List.
- International Health Certificate or Declaration of Health.
- Tonnage Certificate.
- *Tanker Check List (to be handed over to the pilot).
- *Tovalop Certificate.
- *Dangerous Cargo List.
- *Gas Free Certificate.
- Safety Equipment Certificate.
- Certificate of Depth.

* If appropriate, depending on the type of vessel.

Oil Pollution Damage Certificate: In Dutch ports, tankers carrying over 2,000 tons of oil or oil products in bulk have to produce a Certificate of Insurance in respect of civil liability for oil pollution damage (TOVALOP certificate). Fines will be imposed if vessels do not comply with these international regulations. Authorities will not allow such vessels to leave port.

Inspection of international statutory certificates: Surveyors of the Netherlands Shipping Inspectorate (NSI) will check certificates at random in accordance with the Memorandum of understanding on Port State Control (MOU).

If the required certificates are not on board or not valid, or if there are clear grounds for believing that the ship does not substantially meet the requirements of the relevant conventions, a more detailed inspection will be carried out.

On all tankships entering or leaving the port area of Rotterdam the E.E.C. Tanker Check List has to be filled out and handed over to the pilot.

Pilots may report deficiencies to the NSI.

Shipmaster's Report: November 1988.

River Police: 2 copies Crew List on arrival and 2 copies Crew List on departure.

Agent	1 copy Stores List.
	1 copy Personal Effects List.
Customs	1 copy Personal Effects List.

PILOTAGE: Pilotage is compulsory for the following:

Vessels with a length over 40 m. (without disciplinary measures).

Vessels sailing for or from berths along the Nieuwe Waterweg and the Nieuwe Maas with a length over 60 m. (with disciplinary measures).

Vessels sailing for or from berths along the Beerkanaal and Calandkanaal with a length over 70 m. (with disciplinary measures).

Vessels carrying dangerous goods.

Pilot cutters: Pilot cutters cruise continuously, day and night, off entrance to the New Rotterdam Waterway, one cruises North of line North Mole/Maasbuoy and the other near Maas Center Buoy.

Characteristic signals:

1. The distinguishing mark of the pilot cutter is the word "PILOT" on each side of the vessel.
2. By day: Pilot flag, being a blue flag with the letter 'L', displayed from the main top mast.
3. At night: Lights as prescribed by the Regulations for Preventing Collisions at Sea.
4. During bad visibility: The fog signal prescribed by Rule 35 of these Regulations.

Pilotage Authority: The Pilotage Authority for the Rotterdam Rijnmond region is the Rotterdam-Rijnmond Pilots Corporation. The pilots are supported by their company "Loodswezen Nederland B.V." which is responsible for equipment, etc.

Ordering a Pilot: Vessels with a draft less than 17.37 m. bound for the New Waterway must send an ETA 6 hours before arrival at Maas Centre. Deviations in ETA of more than 1 hour to be reported. ETA to be send to: 'PILOTVTS ROTTERDAM', via (in order of preference):

TOR or Satellite No. 26751 (dirknl)
Telegram Scheveningen Radio (PCH)
"Maas Approach" VHF Channel 1

Contents of ETA Message:

(a) Ship's name and call sign.
(b) Date and time group transmission of ETA (first two digits: date; last four digits: time. State if local time or UTC).
(c) Date and time group (see above) expected at boarding position and the words "Maas Centre".
(d) Request pilot.
(e) Deepest draft in metres and centimetres (4 digits).
(f) LOA and GRT.
(g) Destination.

Consult Notice to Shipping No. 58/1988.

ETA-messages through your local agent are not considered to be a message according to these regulations.

Non-compliance with these regulations might cause delay to your vessel.

On arrival at the pilot station vessels requiring a Pilot are to display the following signals, seperately or together:

1. *By day:* International code signal 'G', Pilot flag, vis., vessel's National Flag with white border from foremast.
2. *By night:* Morse signal 'G' by flash light. Blue lights at intervals of 15 minutes. A bright white light shown just above bulwark for 1 minute at short intervals.
3. *During bad visibility:* At least 3 seconds after the normal fog signal the international code signal 'G'. Pilot vessel will answer: the normal fog signals, followed after at least 3 seconds by international code signal 'H' (I have a Pilot on board).
4. Radio central VHF Channel 2 "Pilot Maas".

Pilotage for Deep Draft Vessels and Helicopter Service: Vessels drawing over 57 ft. (SW) must use the "Euro-channel" between the "Euro Buoy" and the "Maas Centre Buoy". Pilots board by helicopter in position Lat. 52° 00′ N., Long. 03° 00′ E. Helicopter may ask vessel to work on VHF Channel 9 or 16.

Radio communication (according P.J.M.O. recommendation):

1. HF frequency 5645 kHz: Ships will be informed by telegram of the time of departure from base and ETA of the Helicopter over the ship, which must be acknowledged. Listening watch should be maintained by the vessel on HF frequency 5645 kHz as from the advised departure time of the helicopter. Urgent messages for the vessel may be sent on this frequency by the helicopter and/or KLM helicopters home-base. The ship may close down listening watch on this HF frequency only after VHF contact with the helicopter has been established.

2. VHF frequency 156.30 MHz (Channel 9): The helicopter will contact the vessel on the VHF-FM voice frequency VHF Channel 9 or Channel 16, when within range (usually between 20 and 40 nautical miles distance from the ship). The helicopter may request the ship to change to another VHF Channel if radio traffic requires this. All instructions from the helicopter pilot to the vessel and vice versa will be on this VHF frequency. The call-sign of the helicopter is the word "helicopter" followed by the group of registration letters, of which the ship is informed in the departure telegram.

3. Operational information: As soon as VHF contact is established (normally initiated by the helicopter), the vessel shall advise the helicopter pilot of its position, courses, speed (when under way), the actual wind direction and speed over the deck, pitch, roll and condition of deck (e.g. dry, spray, wet, etc.). The helicopter pilot will confirm the acceptability of those conditions, or ask for a possible change in heading and/or speed.

Restrictions:

1. Min. visibility 800 m. at 150 ft. above sea level.
2. Max. wind Force 10 (55 knots).
3. Severe turbulence and icing conditions at or below 150 ft.

Pilot Ladders: Vessels with a freeboard over 9 m. must provide an accommodation ladder in addition to the pilot ladder. If boarding equipment does not strictly comply with the SOLAS provisions, Pilots must be embarked/disembarked by helicopter. Generally Pilots refuse to use the mechanical pilot hoists or other constructions which do not comply with the recommendations of the "International Maritime Pilots Association" (I.M.P.A.).

DEEP SEA PILOTAGE: See "Brixham" or "Cherbourg".

SHORE BASED PILOTAGE: In order to promote the safety and the smooth handling of maritime traffic, it is possible to provide "Shore based pilotage". This means that the Pilot, insofar as he is unable to board the vessel to be piloted, can also perform his task from another vessel or from the shore.

There are a number of conditions attached to "Shore based pilotage" of which the most important are stated below.

1. *Informative shore-based radar assistance:*
As a result of extension of the shore-based radar coverage outside, and an increase of range of the VHF Channels concerned in seaward direction.
The Shore-Based Radar Sectors, as seen from the sea are:
Maas Approach
Pilot Maas
Maas Entrance

1.1 *Maas Approach Radar:*
Communication VHF Channel 1.
The radar working area involves the sea area, including the anchorages within the sector with a radius of 23 nautical miles, calculated from the position of the light-platform Goeree (approx. position 51° 55′ N., 03° 40′ E.), with the exception of the working area of "Pilot Maas" situated within this sector.

"Maas Approach" gives general nautical information and renders (informative) shore-based radar assistance, up to the following shore-based radar sector "Pilot Maas", where the pilot cruising ground is, or up to the anchorages. In order to make early identification, c.q. information possible "Maas Approach" is to be contacted, if possible, 3 hours prior to arrival at the pilot cruising ground "Maas Centre", but in any case for traffic coming from the Southwest near the "M.W.1 Buoy" and for traffic coming from the North, near the platform "PD 15".

These rules do not alter the instructions for obtaining a Pilot in the Rijnmond District, as stated in the Notice to Shipping.

1.2 *Pilot Maas Radar:*
Communication VHF Channel 2.
The radar working area involves that part of the legally determined pilot-water in the sea area just off the Hook of Holland within which the pilot cruising grounds are located.

In the Pilot Maas-sector (advisory) shore-based radar assistance is rendered with respect to embarkation/disembarkation of the Pilot.

1.3 *Maas Entrance Radar:*
Communication VHF Channel 3.
The radar working area involves that part of the legally determined pilot-water in the sea area off the Hook of Holland, East of the Sector Pilot Maas, Maas Entrance up to the Calandcanal and the Rotterdam Waterway up to kilometerpole 1031 (TCH traffic station).

Maas Entrance Radar provides the informative shore-based radar assistance.

2. *Shore based pilotage in the Rijnmond District:*
As a rule a pilot will embark a vessel in order to perform his task but, during periods in which pilot boats cannot be operational at sea on account of weather circumstances, it frequently happens that seagoing vessels enter or leave the Hook of Holland estuary without a Pilot.

Other vessels have to anchor in one of the anchorages, or will be kept outside, due to the impossibility of taking a Pilot on board.

In order to promote the safe and smooth handling of these vessels and other maritime traffic, the estuary of Hook of Holland has been provided with the so-called "Shore based pilotage".

This takes place according to the following principles:

2.1 During the periods from the moment that the Pilot Boat Service outside – on account of weather circumstances – will be suspended for "small vessels", until the time pilot service will be resumed.

Furthermore, "Shore based pilotage" can be used occasionally during normal weather conditions, in case the construction of certain vessels make it impossible to embark/disembark the pilot outside.

2.2 "Shore based pilotage" is carried out from the pilot cruising area outside to the Maas Entrance near TCH, and vice-versa.

2.3 The Pilots perform their tasks from the traffic stations Pilot Maas (VHF Channel 2) and Maas Entrance (VHF Channel 3).

2.4 In case the Master of a vessel with compulsory pilotage indicates that he wants to enter Maas Entrance during the period as described under 2.1, he will be informed by Traffic station Maas Approach that "Shore based pilotage" can be provided, taking into account all relevant factors of the admission policy for such a vessel.

The Master should explicitly accept this proposal, since the present Pilot Act does not yet provide a formal basis for this kind of pilotage.

The Master of a vessel with Non-Compulsory Pilotage can, at his request, also ask for "Shore based pilotage".

2.5 In view of the entire admission policy, it will be considered, with regard to each vessel, whether it is acceptable in view of the circumstances and taking into account all relevant legislation, rules and regulations in connection with the safety of shipping and surroundings – that the vessel concerned enters or leaves Maas Entrance without a Pilot, whether or not using "Shore based pilotage".

2.6 —

2.6.1 Sea-going vessels with Compulsory Pilotage should stay outside if they do not want to make use of the possibility to enter by means of "Shore based pilotage".

2.6.2 Sea-going vessels with Compulsory Pilotage on account of their cargo should in principle remain outside if they do not want to use "Shore based pilotage" for entering.

2.7 With respect to the vessels mentioned under 2.6.2. that should have a Pilot on board, it will be considered whether these vessels, dependent on among other things their size and the Master's knowledge of the area, can be allowed to enter Maas Entrance with "Shore based pilotage", all in view of the admission policy.

2.8 Large sea-going vessels can only navigate in Euro Channel, Maas Channel and Maas Entrance if a qualified and – for this purpose – trained Pilot is *on board* as stated in the Government Harbour Master's Notice to Shipping.

2.9 —

2.9.1 In principle, outbound sea-going vessels with Compulsory pilotage, in particular those with dangerous cargo, as mentioned under 2.6.2. should, also in view of 2.4 and 2.5, actually have a Pilot on board until the pilot cruising area.

2.9.2 In view of 2.4, 2.6.1. and 2.6.2., vessels with "Compulsory" pilotage should on no account disembark at the Berghaven.

2.10 Vessels or coupled vessels which, in view of among others The Inland Navigation Police Regulations art. 1.06 and 1.21 and the Special Rules and Regulations Rotterdam Waterway, are judged by the Government Harbour Master to be "Special Transport", should have a qualified Pilot on board.

2.11 Requests for "Shore based pilotage" should be made to:
Inward bound: Maas Approach Radar,
Outward bound: (before departure) Harbour Co-ordination Centre Rotterdam, Central Traffic Controller Rotterdam, (VHF Channel 11).

ANCHORAGES: The following 5 anchorages are available:

1. Long term anchorage for deep draft vessels (17.37 m. or more) North of North Hinder Junction.
2. Short term anchorage for deep draft vessels (17.37 m. or more).
3. "Maas Outer". Recommended max. draft 17.37 m.
4. "Maas West". Recommended max. draft N. 12.20 m. S. 9.10 m.
5. "Maas Noord". Recommended max. draft 13.70 m.

RESTRICTIONS:

Dangerous Goods: Regulations are based on several Governmental laws and Municipal bye-laws.

The "Dangerous Goods Department" of the Municipal Port Management is the centre where all information on dangerous goods on board vessels is collected, administrated and distributed to those concerned.

Inspection on board vessels berthed in the Port of Rotterdam will be carried out mainly by inspectors of the Municipal Dangerous Goods Department, although in certain cases (e.g. explosives). Governmental Dangerous Goods Inspectors are in charge as well.

For detailed information the following Regulation should be consulted: Rotterdam Port Bye Laws (Havenverordening Rotterdam).

From these regulations the following significant obligations have been extracted:

1. *Signals:* Vessels carrying:
In Packages:
(a) More than 100 kg. gross of IMO class 1 hazard division 1.1 and 1.5
(b) More than 1,000 kg. gross of IMO class 1 hazard division 1.2, 1.3 and 1.4 or IMO class 5.2 in packages with an explosive label.
(c) More than 1,000 kg. gross of IMO class 2 with a poison label.
In Bulk:
(d) Any dangerous substances in any quantity. Also empty tanks which are not certified as being clean by an acknowledged expert should hoist the following signals before entering Rotterdam Waterway area:
I. *by day* the international signal flag "B";
II. *by night* 1 red light.

2. *Prior Notification:* Masters of vessels carrying:
(a) Dangerous goods of IMO class 1 and 5.2 in packages.
(b) More than 1,000 kg. gross weight per substance of the other IMO classes in packages.
(c) Dangerous substances in bulk: Report these commodities to the Dangerous Goods Dept. of the Municipal Harbour Master 24 hours before arrival.

3. *Explosives:*
There is a restriction on the carriage of explosives by ships, dependent on kind, quantity and stowage of the explosives.

Permission to deliver explosives is given by the Minister of Transport.

Masters of vessels are advised to make sure whether such a permission has been granted.

4. *Dangerous Cargo List:*
Apart from these obligations the Rotterdam Port Bye-Laws prescribe that a vessel having any dangerous cargo on board is prohibited from being in the harbour unless there is a list on board and an identical list has been submitted to the Harbour Master, stating the correct technical names, IMO class, gross quantities and the stowage of these materials.

5. *Operational Notice:*
Masters of vessels showing the signals as mentioned above ("B" flag or 1 red light) shall give notice to "Maas Approach" on VHF Channel 1 on arrival.

This notice shall be given at least half an hour but not more than 1 hour before the ship enters the Rotterdam Waterway area or if sailing from the Europoort area. Upon departure: on Channel 13 to "Regionale Verkeerscentrale".

This notice shall contain: Ship's name, position, destination and expected time needed for passage in the port area.

When visibility is less than 500 m., ships are prohibited from navigating the Rotterdam Waterway, unless permission has been obtained from "Regionale Verkeerscentrale" on VHF Channel 13. Navigation on the Rotterdam Waterway might be prohibited if circumstances make it necessary.

Restrictions for entering:

Entry times: Depend on prevailing circumstances.

Europoort:
Tankers: Up to 74 ft. (SW) draft; some berth's have tide restrictions.

Vessels with a draft of 57 ft. (SW) or more and/or a length of 250 m. or more must comply with the "Shipping Rules for Large Vessels".

On entering Europoort, tugs are made fast just inside the breakwaters. At all times tug's hawsers must be used. The time at which deeply loaded vessels destined for Europoort enter the New Waterway depends on the prevailing circumstances and is always subject to agreements made between the Pilot Service and the Harbour Master.

Botlek and 3rd Petroleumharbour:
Max. draft 44 ft. (SW), exceptionally 45 ft. (SW), under certain conditions. Vessels exceeding 200 m. and/or drafts over 33 ft. are tidebound.

To obtain permission one should apply to the Harbour Master at Harbour Co-ordination Centre (H.C.C.).

Waalhaven:
Vessels with a draft of 36 ft. (SW), or a length of 200 m. or more should arrive at the entrance of the Waalhaven at slack water Rotterdam.

Basins at the right bank of the river Maas,Maashaven,Rijnhaven:
Vessels with a draft of 28 ft. or more and a length of 180 m. or more are generally tidebound. All harbours in Rotterdam can be entered at any time during day and night.

Shipping Rules for Large vessels:

Vessels drawing 17.4 m. (57 ft.) up to 22.52 m. (74 ft.):
These vessels must use the approach channels "Eurogeul" and "Maasgeul". Such vessels must report at least 8 hours prior to their arrival at the Pilot "rendezvous" position (52° N., 03° E.) by radio telegram to Harbour Co-ordination Centre (HCC) Rotterdam via Scheveningen Radio (PCH) or to Dirkzwager Maassluis (Telex No. 26751) if vessels equipped with "Telex Over Radio" and/or Inmarsat the following information:
(a) Name and call sign of the vessel.
(b) Tonnage in GRT and deepest draft in salt water.
(c) ETA at rendezvous position.
(d) Confirmation of correct functioning of:
1. Gyro compass-equipment.
2. Radar.
3. VHF, operational on Channels 1, 2, 3, 6, 11 and 13.
4. Decca Navigator Mark XII or Mark XXI provided with a connection for the so-called Brown Pattern Indicator. (Brown Box Connection).

Vessels with a length of 250 m. or more but with a draft of less than 57 ft. (SW) (not bound to use the approach channels) must report, at least 6 hours prior to their arrival at the Maasbuoy, the information mentioned under (a), (b), (c), and (d) 1, 2 and 3.

The intention to leave Europoort must be reported by the Master or the Agents at least 3 hours prior to the departure to Harbour Co-ordination Centre, Rotterdam, giving the information mentioned under (a), (b), (c), and (d) 1, 2 and 3. For leaving Europoort also (d)4.

The 6 hours' report prior to arrival will also be considered the 6 hours' ETA message for obtaining a Pilot.

Vessels equipped with a "T.O.R." or Maritex installation can send their messages to Harbour Co-ordination Centre Rotterdam via Dirkzwager's message relay and ship's reporting station (Telex No. 26751 "dirk nl").

Outward bound vessels drawing 57 ft. (S.W.) or more, having to make use of the "Maasgeul" and "Eurogeul" must give 12 hours Notice of Departure to the Harbour Co-ordination Centre/Municipal Harbour Service through their Agent.

Vessels drawing 20.7 m. (68 ft.) up to 22.52 m. (74 ft.):
These vessels, which must use the selected route via "The Straits of Dover" and the Southern North Sea to the "Eurogeul" are urgently recommended:
1. To act in accordance with the instructions of the manual "Deep Draft Planning Guide", Greenwich Buoy to Europoort.

2. Preferable to make use of the services of a certified North Sea Pilot as from Greenwich Buoy.
3. To report 24 hours prior to arrival at the rendezvous area near Cherbourg, by telegram to Harbour Co-ordination Centre, Rotterdam via Scheveningen Radio (PCH) or to Dirkzwager Maassluis (Telex No. 26751).

The telegram should contain:
- (a) Name and call sign of the vessel;
- (b) Tonnage in GRT and deepest draft in salt water;
- (c) ETA Pilot-location near Cherbourg, at about 13 miles North of Cap de la Hague.
- (d) The order for a river pilot for the "Eurogeul" to be embarked by helicopter near Cherbourg;
- (e) Confirmation of correct functioning of:
  1. Gyro compass equipment.
  2. Radar.
  3. VHF, operational on Channels 1, 2, 3, 6, 11 and 13.
  4. Decca Navigator Mark XII or Mark XXI provided with a connection for the so-called Brown Pattern Indicator (Brown Box Connection).
- (f) If necessary required expert assistance for equipment mentioned under (e).

4. To confirm or amend via Scheveningen Radio the telegram mentioned under 3, 12 hours before arrival "rendezvous" location Cherbourg or by T.O.R. and or Inmarsat via Dirkzwager Maasslius (Telex No. 26751).
5. To make use of Dutch sea charts issued by the Hydrographic Service:
No. 1971 – Sandettie to North Hinder.
No. 1972 – North Hinder to Europoort.

Shifting: Vessels which have lightened at Europoort/Maasvlakte terminals should arrive at Botlek entrance at about 15 minutes after high water at Rotterdam.

Shifting rules Europoort - Botlek:

Length overall:	Max.draft allowed:
up to 270 m. (885 ft.)	44 ft. S.W.
270 m. – 300 m. (885 ft. – 916 ft.)	42 ft. S.W.

VLCC Verolme maximum draft allowed: 27 ft. (trim 3 ft.).

Tidal Information.

The mean height of M.H.W. off the Hook of Holland 105 cm. above Datum (N.A.P.)

LLWS (Low Low Water Spring) 84 cm. below Datum

MLW (Mean Low Water) 64 cm. below Datum

All permissible drafts and depths of water mentioned are given at NAP unless otherwise mentioned.

HEALTH: The Master has to fill in and sign a Maritime Declaration of Health, which is handed to him by the Pilot. Vessels subject to medical inspection have to hoist flag signal according to Pilot's orders. In case of quarantine problems, the pilot will contact the head of the department of Infectious Diseases of the Municipal Health Service (GGD). Telephone 010 – 4339419.

RADIO: *ETA messages and T.O.R./Maritex:* Masters' telegrams via Scheveningen Radio, call-sign PCH, are passed to Agents 24 hours a day, weekends inclusive. For this reason it is advisable that Masters communicate with agent via Scheveningen Radio, via which station they also route messages to vessels. Vessels equipped with "Telex Over Radio" may, outside office hours channel their messages to Agent via Dirkzwager's message relay and ships' reporting station at Maassluis, telex No. 26751, Answerback "dirk nl". Such messages are passed on to Agent immediately, also during weekends.

Combination Carriers (OBO's): Combination carriers must, as per Rotterdam Port Bye-laws, comply with the following regulations when calling to load and discharge dry cargo:
- (a) The dry cargo holds may not contain combustible or remnant liquids.
- (b) The spaces adjacent to the dry cargo holds:
  may not contain combustible or remnant liquids; or
  must be gas free; or
  must contain an inert gas under positive pressure.
- (c) Slops or previously carried oil cargoes may not be stowed adjacent to a dry cargo hold and must contain an inert gas.

At least 24 hours prior to arrival the following information must be cabled:
1. The nature of the dry cargo;
2. Nature of operation (loading or discharging);
3. Where loading and discharging will take place;
4. The chemical or technical name of the last liquid cargo;
5. The date of discharging of the last liquid cargo;
6. The stowage of the cargo residues of combustible liquids;
7. Description of the atmosphere above the cargo residues referred to in 6;
8. Description of the atmosphere of all other spaces.

In case of repairs, tank cleaning or delivery of slops, a combination carrier is considered to be a tank vessel and should comply with the regulations applicable to this kind of ship.

RADAR/VHF: A chain of 26 shore-based radar stations permits navigation during all weather conditions. Radio and radar station Maas Approach at Hook of Holland, communicates via VHF Channel 1 (Port Operations).

Masters are requested to call this station, especially during bad visibility, well in advance of arrival at pilot station. Maas Approach provides nautical information for vessels within range and acts as a link with pilot cutters.

Radio-Radar Station: The radio station "Traffic Centre Hook (TCH)" in Hook of Holland acts as a Communication Centre and as a Traffic Regulation Station near the entrance and on the New Waterway. The station provides weather forecasts on request by VHF Channel 13. Radar assistance is provided on VHF Channel 66 from "CA2-NW1" Separation Buoy into Europoort and vice versa. Information on berths, Harbour Pilots, tugs and linesmen in Europoort can be obtained on VHF Channel 11.

VESSEL TRAFFIC MANAGEMENT SYSTEM: A VTMS is in operation for the approaches to Europoort and the New Waterway; It covers an area from 38 miles West of Noorderhoofd up to 2 miles East of the van Brienenoord Bridge and 4 miles East of the Spijkenisse Bridge in the Oude Maas river, including all adjacent harbour basins.

The area is divided into three regions, each having its own Traffic Centre to communicate with the shipping (VHF Channel 13). The three regions are sub-divided into 12 sectors, each having a traffic attendant and a seperate VHF-channel.

Traffic Centre Hook of Holland:		*Traffic Centre Botlek:*	
Maas Approach	VHF 1		
Pilot Maas	VHF 2	Maassluis	VHF 80
Maas Entrance	VHF 3	Botlek	VHF 61
Waterweg	VHF 65	Oude Maas	VHF 62
Europoort	VHF 66		
Traffic Centre City:			
Eemhaven	VHF 63		
Waalhaven	VHF 60		
Maasbruggen	VHF 81		
Brienenoord	VHF 21		

TUGS: Tugs normally join vessels on river when nearing the basin where vessels will be accommodated. The towing lines used are always from the tug.

BRIDGES: The New Waterway connects the Port of Rotterdam with the North Sea, without any locks or bridges. Only to reach some shipyards, situated East of Rotterdam, vessels have to pass the "Maasbridges" (Koningshaven), which are opened as follows:

Sunday	*Monday to Saturday*	*Possible Extension*	*Total Minutes Sunday*	*Total Minutes Mon-Sat*

2040-2052*				
2240-2252	2240-2252	2255	15	15

* For difficult transports and tide bound ships the opening of the bridge on Sunday till 2255 hrs. is possible in accordance with the management of the Dutch Railways via the Central Traffic Controller in the Harbour Co-ordination Centre.

To reach berths in Brittaniehaven, vessels have to pass the Calandbridge. To reach berths in Seinehaven and Neckarhaven, vessels have to pass the Rozenburg locks (between the Calandcanal and the Hartelcanal).

GENERAL CARGO FACILITIES:

Europe Combined Terminals (ECT):
Multi Cargo Division, Seattleweg 7, P.O.Box 7400, NL-3000 HK Rotterdam. Tel: 010 – 4916911. Telex: 28301 ECT NL. Contact: R.P.A. Hoorweg – Director, Multi Cargo Division. Ing. H. van Leeuwen – Director, Multi Cargo Division.

Margriet Terminal (Prinses Margriethaven/Prinses Beatrixhaven):
Berths and cranage: Total quay length 2,700 m., depth 10.65 m., served by 4×30 tonne level-luffing portal cranes, 3×25 tonne cranes, 4×17.5 tonne cranes and 2×67 tonne mobile cranes.
Direct-call liner services: A.C.S., Alianca, Bank Line, Black Star Line, Bore Line, Capricorne, C.A.V.N., Ciamar, Columbus Line, Consolidated Forwarders/Caltram, Eurosal, Eurocaribe, Ewas-Containers, Ewas-Conventional, Express Service, Feeders ACS, F.M.G., Hamburg-Sud, Hapag Lloyd Brasil, Hoegh Lines, H.S.D.G., India SS Co., Navibulgar, Nedlloyd Guyana, Sitram, SNC, Star Shipping.
Terminal facilities: Storage 2,000 TEU (five-high); 1 rail-mounted Nelcon yard gantry (45 tonne); various front-handlers (to 42 tonne).
Consolidation: CFS on terminal. Covered area 5,700 sq.m.
Computer systems: Hardware Unisys 1955; software Meddata; Functions container control.
Hardware DEC Vax 11/750; software external; Functions container control.

Beatrix Terminal (Prinses Beatrixhaven/Prins Johan Frisohaven):
Berths and cranage: Container/ro-ro multi-purpose facility, total quay length 3,215 m., max.depth 10.5 m., equipped with 1×45 tonne Kocks container gantry crane, 20 quay cranes (28 – 40 tonnes), three ro-ro ramps (one adjustable) and one floating ramp.
Direct-call liner services: Amtrans, Assi, Associated Levant Lines, A.T.L., Combo Line, Cosco, E.A.L., G & C Africa Line, G & C South America Line, Iraqi Line, L.N. Shipping, M.S.C., Nedlloyd Pacific, Norbulk, Rhine Ro/Ro, Seafix, Saecs, Sonatram, T.F.H. Line, Tor Line, Transinsular, U.A.S.C.
Terminal facilities: Total area 45 ha. (7.5 ha.covered, 4,000 sq.m. reefer shed); storage 9,000 TEU; 62 electric reefer points; 28 front-handlers (10-42 tonnes); 15 Terberg yard tractors; 54 PlanMarine yard chassis(40 ft. flatbed).
Consolidation: CFS on terminal, total area 11 ha.; covered area 8,000 sq.m.; storage on terminal; reefer points on terminal; 64 forklifts (3-10 tonnes).
Computer systems: Hardware Unisys B1915.
Rail facilities: Rail connection.

Botlek Terminal (1st Werkhaven):
Berths and cranage: Total quay length 810 m., depth 11 m., container, ro-ro facility, 2×50 tonne Nelcon container gantry cranes.
Direct-call liner services: Bulcon, Koala, Scancarriers, BCSL, Samband, KCL, Stork Line.
Terminal facilities: Total area 30 ha.; storage 3,000 TEU (3 high); reefer points on terminal, front handlers up to 42 tonne; yard tractors DAF/SISU (10), yard chassis (20).
Computer systems: Will be connected to Unisys B5955.
Rail facilities: Rail connected, locomotive.

Seaport Terminals B.V.: Seaport Terminals B.V., Merseyweg 70, 3197 KG Botlek Rotterdam. P.O.Box 1197, 3180 AD Rozenburg. Tel: 01819 – 44911. Telex: 29783. Fax: 01819 – 12015.

The "Multi-Purpose terminal" of Messrs. Seaport Terminals is situated in the Brittaniehaven, in the Eastern part of Europoort, 10 nautical miles from the entrance.

Maximum draft: 12.65 m.
Quay length: 1,245 m.
Ro/Ro ramps: 2 adjustable ramps of 300 tons each.
Cranes: 1 mobile crane of 50 tons; 1 gantry crane of 70 tons; 4 level-luffing cranes of 25 – 40 tons.
Terminal size: 285,000 sq.m.
Terminal width: 270 m.
Sheds: 1×11,300 sq.m.; 1×17,500 sq.m.; 1×18,900 sq.m.

Seaport Terminals also owns a terminal at Merwehaven with special cold stores and temperature controlled sheds for the storage of fresh fruits and vegetables.

The total capacity of Merwehaven area is:
Quay length: 2,000 m.
Cranes: 28 (5 up to 35 tons)
Sheds: total shed space: 89,400 sq.m.

Lehnkering Montan B.V.: Seinehaven (East Europoort):
The company is owned by the Deutsche Metall Gesellschaft.
Terminal Area: 9 hectares (24 acres)
Quay length: 250 m.
Cranes: 2 fixed
3 mobile
1 transtainer
Sheds: 2

R.H.P.M. New Terminal B.V.: R.H.P.M. New Terminal B.V., Lloydstraat 35, 3024 EA Rotterdam. Tel: 010 – 4789922. Telex: 24253. Fax: 010 – 4777538.
Located at the right bank of the River Meuse:

Lloydkade:
Quay frontage: 530 m. – draft 9.0 m.
Shed space: 5,350 sq.m.
Open storage space: 1,000 sq.m.
Cranes: 2 with a lifting capacity of 45 tons.
5 with a lifting capacity of 5 tons.

Schiehaven:
Quay frontage: 340 m. – draft 9.0 m.
Shed space: 3,200 sq.m.
Open storage space: 4,200 sq.m.
Cranes: 1 with a lifting capacity of 25 tons.
2 with a lifting capacity of 3 tons.
3 with a lifting capacity of 5 tons.

Jobshaven:
Quay frontage: 148 m. – draft 6.0 m.
Shed space: 1,590 sq.m.
Open storage space: None.
Cranes: 1 with a lifting capacity of 5 tons.

Located at the left bank of the River Meuse:
Wilhelminakade:
Quay frontage: 540 m. – draft 10.0 m.
Shed space: 9,450 sq.m.
Open storage space: 7,500 sq.m. (partly special container yard)
Cranes: 1 with a lifting capacity of 38.5 tons.
1 with a lifting capacity of 30 tons.
4 with a lifting capacity of 5 tons.

Equipment for container handling:
On right bank-location:
- 2 heavy forklift trucks, capacity 40 tons.
- 1 tugmaster
- 2 Mafi wagons (40 ft.)

On left bank-location:
- 1 stacking crane, capacity 40 tons.
- 1 PPM reach stacker, capacity 40 tons.
- 1 heavy lift truck, capacity 28 tons.
- 1 tugmaster
- 2 Mafi wagons (40 ft.)

Multi-Terminals Waalhaven B.V.: Multi-Terminals Waalhaven B.V., Pannerdenstraat 50, 3008 EA Rotterdam. Tel: 010 – 4002922. Telex: 28023/28224. Fax: 010 – 4280263
Quay Number: 2200
Pier 2 multi-purpose terminal situated in the Waalhaven basin.
2 Ro/Ro-ramps (stern and quarter-stern).
Draft: 10.65 m. (N.A.P.)
15 cargo/container cranes, up to 60 tons capacity.
Quay length: 1,000 m.
Free of charge telephone-service aboard of vessels berthed alongside the terminal.

HANNO Rotterdam: Hanno Rotterdam Multipurpose Terminal, Maashaven North side. Harbour Nos: 1300-1307. Tel: 010 – 4858244. Telex: 28965. Fax: 010 – 4854674.
Max. depth: 11.60 m. (38 ft.)
Quay length: 1,775 m.
Storage capacity:
Containers 7,500 TEU's
Customised cargo 35,000 sq.m. shed space
35,000 sq.m. open space
Cranes: 4 container/heavy lift cranes×39 tons
8 general cargo cranes
Transtainers: 3

Nederlands Transport Bureau B.V.: Waalhaven, North side.
General cargo handling. Fertiliser loading, both bagged and in bulk.

Quay length (m.)	*Max. draft* (m.)
200	12 m. (39 ft. 3 in.) F.W.
1,200	10 m. (32 ft. 8 in.) F.W.
150	9 m. (29 ft. 6 in.) F.W.

GRAIN HANDLING FACILITIES: Also see "Radio".

1. G.E.M. Europoort Terminal I:
Discharging pier, outside:
Max. draft at MLW: 59 ft. SW
Quay Length: 352 m.
Number of Elevators: 4 shore
Total Discharge Capacity: 4,000 t.p.h.
Silo Capacity (tons): 110,000 (vertical silo)
Discharging pier inside dolphins:
Max. draft at MLW: 45 ft. 6 in. SW inside
60 ft. SW outside
Quay Length: 315 m.
Number of Elevators: 4 floating
Total Discharge Capacity: 3,600 t.p.h.
Loading Capacity: 3,600 t.p.h. (up to 100,000 tons)
Coaster piers for loading of coasters/seagoing vessels:
Max. draft at MLW: (a) 23 ft. SW (b) 36 ft. SW
Quay Length: (a) 2×150 m. (b) 170 m.

Number of Elevators: (a) 8 loading spouts
(b) 4 loading spouts
Total loading Capacity: (a) 2,400 t.p.h.
(b) 1,200 t.p.h.

Barge piers:
Max. draft at MLW: 21 ft. SW
Number of Elevators: 16 loading spouts
Loading Capacity: 4,800 t.p.h.

2. G.E.M. Europoort Terminal II:
Discharging pier:
Max. draft at MLW: 52 ft. 6 in. SW
Quay Length: 230 m., max.ship length 300 m.
Number of Elevators: 3 shore
Total Discharge Capacity: 3,000 t.p.h.
Loading Capacity: 2,000 t.p.h.
Silo Capacity (tons): 100,000 (vertical silo)
Coaster pier:
Max. draft at MLW: 13 ft. SW
21 ft. SW
Loading Capacity: 2,000 t.p.h.

3. GEM Botlek Terminal Rotterdam:
Discharging Pier:
Max. draft at MLW: 42 ft. 6 in. SW
Quay Length: 2×245 m.
Number of Elevators: 4 shore
Total Discharge Capacity: 2,800 t.p.h.
Silo Capacity (tons): 60,000 (vertical silo)
32,000 (flat store)
Loading pier (main jetty):
Max. draft at MLW: 32 ft. 6 in. SW
Quay Length: 2×142 m.
Number of Elevators: 6 loading spouts
Loading Capacity: 2,400 t.p.h.
Floating unloader:
Number of Elevators: 2
Total Discharge Capacity: 600 t.p.h.

4. Maashaven Silo:
Max. draft at MLW: 26 ft. FW
Quay Length: 157 m.
Number of Elevators: 2
Total Discharge Capacity: max. 500 t.p.h.
Loading Capacity: max. 400 t.p.h.
Silo Capacity (tons): 90,000

Weighing: During transhipment and storage operations, agri-bulk cargoes are weighed accurately at both shore and floating installations by means of computerised weighing equipment.

This equipment is checked several times a week by the Royal Dutch Grain and Feed Trade Association. Loaded weight certificates can be provided.

Overtime: No extra expenses for work in overtime are charged by the stevedores, except for work on Sundays and holidays and the nights proceeding and following them.

BULK HANDLING FACILITIES: Also see "Radio".

1. EMO B.V. Maasvlakte. Europees Massagoed – Overslagbedrijf (EMO) B.V.: (European Bulk Transhipment Company). World's largest bulk transhipment and storage installation for ore and coal is situated on the Maasvlakte, which has been reclaimed from the North Sea.

3 fully loaded bulk carriers up to 350,000 d.w.t. can be discharged simultaneously.

A conveyor belt system connects the discharging pier in the Mississippihaven with the barge loading section in the Hartelhaven and with the stockpiling area.

Terminal capacity:
Unloading capacity: 28 million t.p.a.
up to 100,000 t.p.d.
As from 1992: 35 million t.p.a.
up to 150,000 t.p.d.
Sea Quay:
Draft at mean low tide: 24 m. (74 ft.)
Quay length: 1,050 m. (3,445 ft.)
Mooring facility: 350,000 d.w.t.
Unloading equipment: 2×50 tonne unloaders
1×85 tonne unloader
Outreach above water: 45 m. (148 ft.)
Grab clearance: 30 m. (98 ft.)
As from 1992 an additional 85 tonne unloader will be available.
Loading equipment: continuous shiploader
Outreach above water: 31.5 m. (103 ft.)
Loading capacity: 50,000 t.p.d.
Stockyard
Storage capacity: 4 million tons
Storage yard equipment: 3 stacker-reclaimers
As from 1992 a 4th stacker-reclaimer will be in operation.
Barge quay:
Quay depth at mean low tide: 6 m. (20 ft.)
Quay length: 950 m. (3,120 ft.)
Loading equipment: 2 barge loading units
Loading capacity: up to 80,000 t.p.d.
As from 1992 a 3rd barge loader will be available.
Unloading equipment for barges: 2×50 tonne unloaders
Wagon loading
Loading capacity: up to 2,500 t.p.h./
up to 10 full trains per day
Blending installation
As from 1992: 6 bunkers of 4,500 tonne each

Screening installations
2 semi mobile Liewell: 150 t.p.h. – 200 t.p.h. per unit
(Lehmann) units
2 mobile units

2. Europoort C.V.: Ertsoverslagbedrijf Europoort C.V.:

This transhipment installation, specialised in the handling of iron ore, is situated between Caland Canal and Dintelhaven.

A conveyor belt system connects the discharging quay in the Caland Canal with the barge loading section in the Dintelhaven, both direct and via the stockpiling area.

Discharging section:
Quay length: (a) 645 m. (b) 395 m.
Max. draft at M.L.W.: (a) 59 ft. S.W. (b) 74 ft. S.W.
Equipment: 3 unloading towers
conveyor-belts
4 stacker/reclaimers
Discharging: Max. 6,900 t.p.h.
average 4,500 t.p.h.
Max. outreach discharging gear: 34.75 m. (114 ft.)
Max. height of gear above MHW: 24 m. (78 ft. 8 in.)
Capacities: storage 3.5 million tons
Loading section:
Quay length: 850 m.
Max. draft at M.L.W.: 20 ft. S.W.
Equipment: 2 loading machines
Loading rate: Max. 6,000 t.p.h.
Max. outreach loading gear: 18.1 m. (59 ft. 4 in.)
Transhipment Capacity: 20 million tons a year.

3. G.E.M. Europoort Terminal I:
Discharging section:
Quay length: (a) 580 m. (b) 370 m.
Max. draft at M.L.W.: (a) 59 ft. S.W. (b) 42 ft. 6 in. S.W.
Equipment: (a) 4 shore elevators. (b) 5 floating elevators
Discharging: (a) Max. 4,000 t.p.h. (b) Max. 5,400 t.p.h.
Max. outreach discharging gear: (a) 28 m.(92 ft.)
(b) 35.2 m.(115 ft.)
Max. height of gear above MHW: (a) 23.8 m.(77 ft. 10 in.)
(b) 23 m.(75 ft.)
Loading rate: Vessels at buoys up to
30,000 d.w.t.: 1,000 t.p.h./elevator.
Capacities: Silo 110,000 tons
Loading section:
Quay length: (a) 2×150 m. (b) 1 x 170 m.
Max. draft at M.L.W.: (a) 23 ft. S.W. (b) 36 ft. S.W.
Equipment: (a) 8 loading pipes. (b) 2 loading pipes
Discharging: (a) Max. 1,200 t.p.h. (b) Max. 3,800 t.p.h.
Loading rate: Vessels at buoys up to
30,000 d.w.t.: 1,000 t.p.h./elevator
At installation: up to 8,000 d.w.t.: 2,400 t.p.h.
up to 25,000 d.w.t.: 1,200 t.p.h.

4. G.E.M. Europoort Terminal II:
Quay length: 230 m.
Max. draft at M.L.W.: 54 ft. 6 in. S.W.
Equipment: 3 unloading towers
1 weighing tower
conveyor-belts, silos
loading installation
Discharging: Max. 3,800 t.p.h.
Max. outreach discharging gear: 25.3 m. (83 ft.)
Max. height of gear above MHW: 20 m. (66 ft.)
Loading rate: Max. 2,000 t.p.h. for
vessels up to 30,000 d.w.t.
Max. outreach loading gear: 24 m. (79 ft.)
Capacities: Silo 100,000 tons

5. G.E.M. Botlek Terminal/Rotterdam ports:
Discharging section:
Quay length: 2×245 m.
Max. draft at M.L.W.: 42 ft. 6 in. S.W.
Equipment: 5 shore elevators;
conveyor-belts, silos
Discharging: Max. 3,500 t.p.h.
Max. outreach discharging gear: 25 m. (84 ft.)
Max. height of gear above MHW: 18 m. (59 ft.)
Capacities: Silo 60,000 tons
flat store 32,000 tons
Loading section:
Quay length: 142 m.
Max. draft at M.L.W.: 32 ft. S.W.
Equipment: 4 loading pipes
Loading rate: Max. 1,600 t.p.h. up to
25,000 d.w.t.
Max. outreach loading gear: 13.5 m. (44 ft. 4 in.)

6 (A). Kon. Frans Swarttouw B.V – St. Laurenshaven Terminal:
Discharging section:
Quay length: 835 m.
Max. draft at M.L.W.: 42 ft. 8 in. S.W.
(Max. draft allowed at H.W. in Botlek 44 ft. SW, under certain conditions 45 ft. SW).
Equipment: (a) 2 transporter bridges. (b) 1 transporter bridge
3 cranes
Discharging: (a) Max. 1,400 t.p.h. (b) 650 t.p.h.
cranes: Max. 400/650 t.p.h.
Max. outreach discharging gear: (a) 44.5 m. (146 ft.)
(b) 40.8 m. (134 ft.)
cranes : 32 m. (105 ft.)

Max. height of gear above MHW: (a) 25.2 m. (82 ft. 10 in.)
(b) 16.5 m. (75 ft.)
cranes : 35.8 m. (117 ft. 6 in.)/
28 m. (91 ft. 1 in.)
Loading rate: If direct overboard dependent on size
Max. outreach loading gear: If direct overboard see discharging gear
Capacities: 1.1 million tons open storage
39 silos/sheds – 361,440 cu.m.

Quay length: 647 m.
Max. draft at M.L.W.: 32 ft. 10 in. S.W.
Equipment: 1 mobile crane
Discharging/loading: Max. 300 t.p.h.
Max. outreach discharging/loading gear: 35 m. (114 ft. 10 in.)
Max. height of gear above M.H.W.: 30 m. (98 ft. 05 in.)
Loading section:
Quay length: 180 m.
Max. draft at M.L.W.: 23 ft. S.W.
Equipment: 2 loading machines
Loading rate: Max. 1,000 t.p.h.
Max. outreach loading gear: 16.5 m. (54 ft. 2 in.)

6 (B). Kon. Frans Swarttouw B.V. – Botlek Terminal:
Discharging section:
Quay length: (a) 250 m. (b) 250 m.
Max. draft at M.L.W.: (a) 42 ft. 8 in. S.W. (b) 38 ft. S.W.
(Max. draft allowed at H.W. in Botlek 44 ft. S.W., under certain conditions 45 ft. S.W.)
Equipment: 2 unloaders
conveyor belt
1 stacker
Discharging: Max. 2,000 t.p.h.
Average 1,600 t.p.h.
Max. outreach discharging gear: 19.5 m. (64 ft.)
Max. height of gear above MHW: 14.6 m. (48 ft.)
Discharging/loading: 1 floating crane, average 1,000 t.p.h.
Max. outreach discharging/loading gear: 29.5 m. (96 ft. 09 in.)
Max. height of gear above M.H.W. 32 m. (105 ft.)
Capacities: Storage 1.3 million tons
Loading section:
Quay length: 200 m.
Max. draft at M.L.W.: 29 ft. S.W.
Equipment: 1 reclaimer
2 loading machines
1 wagon loading unit
Loading rate: Max. 4,400 t.p.h.
Average 1,000 t.p.h. for vessels up to 15,000 d.w.t.
Max. outreach loading gear: 18.5 m. (60 ft. 07 in.)

6 (C). Kon. Frans Swarttouw – Vulcaanhaven-Vlaardingen:
Quay length: 440 m.
Max. draft at M.L.W. quay: 34 ft. 6 in. F.W.
buoys: 40 ft. F.W.
(Max. draft allowed in Vulcaanhaven under certain conditions 39 ft. F.W.)
Equipment: 3 transporter bridges
2 electric cranes
1 bulk loading machine
2 floating cranes
Discharging: bridge: Max. 1,950 t.p.h.
electric crane: Max. 600 t.p.h.
floating crane: Max. 800 t.p.h.
Max. outreach discharging gear: bridges: 42 m. (138 ft.)
electric crane: 36 m. (118 ft.)
floating crane: 21 m. (68 ft. 11 in.)
Max. height of gear above MHW: bridges: 16 m. (52 ft. 6 in.)
electric crane: 18 m. (59 ft.)
floating crane: 21.5 m. (70 ft. 06 in.)
Loading rate: Phosphates via belt, Max. 600 t.p.h.
Max. outreach loading gear: 20 m. (66 ft.)
Capacities: 0.5 million tons open paved storage
8 silos – 77,250 cu.m.
8 sheds – 80,360 cu.m.

7. Interstevedoring B.V.: Hometerminal, Waalhaven Pier I.
Buoys in various basins
Equipment: 3 floating cranes
Discharging: Max. 1,000 t.p.h.
Max. outreach discharging gear: 40 m.
Max. height of gear above MHW: 27.5 m.

Equipment: 1 floating crane
Discharging: Max. 1,400 t.p.h.
Max. outreach discharging gear: 40 m.
Max. height of gear above MHW: 29 m.

Equipment: 1 floating crane
Discharging: 1,750 t.p.h.
Max. outreach discharging gear: 43 m.
Max. height of gear above MHW: 31.5 m.

Equipment: 1 floating crane
Discharging: max. 1,000 t.p.h.
Max. outreach discharging gear: 30 m.
Max. height of gear above MHW: 23 m.

Equipment: 1 floating crane
Discharging: max. 600 t.p.h.
Max. outreach discharging gear: 25 m.
Max. height of gear above MHW: 15 m.

Equipment: 6 floating weigher/loaders
Max. 60,000 tons/24 hrs.

CONTAINER HANDLING FACILITIES:
ECT Divisions
Number of containers handled by ECT.
1989 1,407,147
1990 .... 1,435,712 (up to April 1990)
Terminal operating company:
Europe Combined Terminals (ECT) – Delta Terminal (Europahaven): Delta Container Division, Europaweg 875, P.O. Box 7400, NL-3000 HK Rotterdam. Tel: 010 – 4916911. Telex: 28056 ECT NL. Contact: Ir. J.C. Rijsenbrij, Director, Delta Container Division
Berths and cranage: Total quay length 1,250 m., served by 7 Nelcon 55/67 tonne container gantry cranes.
Hartelhaven: Container barge terminal berth, length 260 m., served by 2 Nelcon 50/55 tonne container gantry cranes.
Direct-call liner services: Ace group, ACL, Bugsier, CGM, Cho Yang, Comar, Comvelt, Hapag-Lloyd, Incotrans, Maersk, NedScans, OPDR, Portlink, Rheintainer, ScanDutch, Unifeeder, Van Nievelt Goudriaan.
Terminal facilities: Total area 81 ha.; 260 electric reefer points; 21 Nelcon straddle carriers (35 tonne); 7 Kalmar/LMV type 16/1200 (16 tonne) fronthandlers; 30 DAF/Floor yard tractors; 75 Floor yard chassis; 25 Buiscar trailer trains.
Computer systems: Hardware Unisys: 4×AG-serie; Software inhouse: Functions multi-user container control system. Sealand Terminal container control system, training, finance and system development.
Rail facilities: 4× 600 m. rail tracks served by two 50/55 tonne Nelcon rail-mounted transfer gantries.
Future plans: Development of the second phase has started. It is planned to open a new 60 ha. facility for Sealand by the end of 1992.

Europe Combined Terminals (ECT) – Alexander Terminal (Prins Willem Alexanderhaven/Prinses Margriethaven): Home Container Division: Seattleweg 7, P.O. Box 7400, NL-3000 HK, Rotterdam. Tel: 010 – 4916911. Telex: 28301 ECT NL. Contact: R.P.A. Hoorweg, Director – Home Container Division and A.Stolk, Director – Home Container Division
Prins Willem Alexanderhaven: Quay length 1,800 m., minimum depth 13 m., equipped with 5×41 tonne Paceco, 1×41 tonne Paceco-Vickers and 3×50 tonne Conrad Stork container gantry cranes.
Prinses Margriethaven: Total quay length 1,100 m., minimum depth 13 m., equipped with 1×48 tonne Peiner, 1×53 tonne Demag and 1×41 tonne Paceco-Vickers container gantry crane, and 1×45 tonne Nelcon container barge gantry crane and 1×37 tonne Demag container gantry crane.
Direct-call Liner Services: ACT(A), Anzecs, B&I, Bugsier, CGN, CMA, Comar, Comvelt, Contship Gulf, CSC, CTG, Cunard Ellerman, DSR, EAC-WAS, Eagle, Euroasia, Evergreen, Hapag-Lloyd, Incotrans, JCS, Merzario, Necol, Nedlloyd, Norasia, P&OCL, Portlink, Red Sea Express, Rheintainer, Saecs, Sealand, Senator, Unifeeder, Van Nievelt Goudriaan, Yangming.
Terminal Facilities: Prins Willem Alexanderhaven/Prinses Margriethaven: Total area 96 ha. (Alexander Terminal 88 ha. Control Terminal 8 ha.); 536 electric reefer points, 48 liquid nitrogen; 4 rail-mounted Conrad Stork yard gantries (45 tonne); 30 Nelcon straddle carriers; 20 Kalmar-LMV front-handlers (16 tonne); 3 Linde front-handlers (2×4 tonne, 1×2 tonne); 77 DAF yard tractors; 535 DAF yard chassis; 3 Buiscar trailer.
Consolidation: CFS on terminal. Covered area 1.7 ha.
Computer systems: Hardware: Unisys B5955. Software: In-house; Functions multi-user container control system.
Hardware: Unisys B5955. Software: in-house; Functions Sealand terminal container control system.
Rail facilities: Three 500 m. tracks on the terminal, served by 2×41/45 tonne Demag/Nelcon rail-mounted road/rail transfer gantries. Inland rail terminal of 2.5 ha. at Venlo (175 km. distant). Daily shuttle services to and from the Alexander Terminal and to the Delta Terminal.
Hours of working: 24 hours a day, seven days a week.

Unitcentre B.V.:
Unitcentre B.V., Container Terminals, Zaltbommelstraat 10, 3089 JK Rotterdam. P.O.Box 5048, 3008 AA Rotterdam. Tel: 010 – 4237911. Telex: 28325 (uccom nl). Fax: 010 – 4950806
Quay Number: 2530.
Facilities and equipment at Pier 7: 800 m. quay length. 40 ft. draft. 4 gantry cranes of which 3 are post-Panamax with self-trimming and 360° rotating container spreaders. 6 rail-mounted transtainers, 14 rows with 5 over 4 stacking reefer stations plug-in/plug-out points and porthole facilities.
Facilities and equipment at Pier 6: 800 m. quay length. 43 ft. draft. 3 post-Panamax cranes with self-trimming and 360° rotating container spreaders. 2 rail-mounted transtainers, 14 rows with 5 over 4 stacking reefer stations plug-in/plug-out points.
Also available on Piers 6 and 7 are 4×42 tons reach stackers capable of 4-high stacking with toplift spreaders. 2×42 tons forklift trucks, 1×16 tons forklift truck, all capable of 3-high stacking with toplift spreaders.
Heijplaatterminal:
Facilities and equipment: 800 m. quay length. 35 ft. draft. 3 slewing cranes with automatic container spreader. Ro/Ro stern ramp. 2×24 tons and 1×28 tons forklift trucks, capable of 3-high stacking with toplift spreaders.
Annual capacity: Pier 6 – 225,000 containers; Pier 7 – 300,000 containers; Heijplaatterminal – 75,000 containers.
All operations are fully computerised with V.D.U.'s in the cranes/transtainers/reach stackers linked directly to the computer system. Real time.

Bell Lines:
Bell Lijn B.V., Brielse laan 85, 3081 AB Rotterdam. Tel: 010 – 4861022. Telex: 20688. Fax: 010 – 4846995.

Bell Lijn B.V., situated in the Britanniehaven, container terminal for Bell Lines with services to Teesport, Newport, Harwich and Waterford (Ireland). Also available for other container shipping companies for vessels up to approximately 500 TEU. Total annual capacity: 300,000 TEU., Max. draft: 7.00 m. at N.A.P. (before quay). Quay length: 300 m. Pier width: 52 m. Storage area also available.

Container gantries: Capacity/Outreach 30/35 tons at 19/23.5 m.

Rail connected (2 tracks under gantries) and possibility to connect reefers.

Uniport Multipurpose Terminals B.V.: A new multipurpose terminal for middle sized container carriers is available in the Merwehaven.

Quay length:	350 m.
Maximum draft:	10 m. (32 ft. 8 in.)
1 gantry crane:	45 tons (reach 35 m.)
1 heavy lift crane:	45 tons (reach 40 m.)
2 stacker cranes:	45 tons
Terminal Area:	35,000 sq.m.
Shed space for stuffing/stripping:	2,000 sq.m.
Transhipment capacity:	60 containers per hour
Annual capacity:	55,000-60,000 containers
Future capacity:	70,000-80,000 containers.

The terminal is planned to be extended either by extension of the terminal in the Merwehaven or in a new terminal in the Waalhaven.

SPECIALISED CARGO-HANDLING FACILITIES:

Fruit:

There are two modern fruit terminals in the Merwehaven:

1. *Rotterdam Fruit Pier (R.F.P.):* Owned and operated by the fruit importers: Velleman en Tas, Citronas and International Fruit Company. Facilities: 5,000 sq.m. temperature-controlled transit shed (temp: 4° C – 8° C).

5,000 sq.m. cold store for the storage of fruit.

Quay length: 260 m. Max. draft 31 ft. at low tide.

2. *Fruit Terminal Rotterdam (F.T.R.):* Owned by Rotterdam Fruit Pier (R.F.P.) and Fruit Stevedores Rotterdam (F.S.R.).

Fruit Stevedores Rotterdam (F.S.R.) – a joint venture between Seaport Terminals (82%) and Europe Combined Terminals (18%) are acting as stevedores and terminal operators on both fruit terminals in the Merwehaven.

Facilities: Three large temperature controlled transit sheds (temp. 4° C – 8° C) covering 33,000 sq.m.in total, plus adjacent cold stores for the storage of fruit covering 2,600 sq.m.

Each shed can contain 6,000 pallets of fruit. The short side of each shed runs parallel to the quay side, whilst, via a row of doors in both long sides 48 lorries can be loaded simultaniously per shed.

14 quay cranes of 5-8 tons capacity.

Quay length: 600 m. Max. draft alongside: 31 ft. at low tide.

Future planning: Further cold storage capacity for fruit will be added in the near future.

Juice:

European Juice Terminal B.V. (E.J.T.):
Port Number 260.

Located at the IJselharbour at Rotterdam. EJT stands for a modern equipped terminal (construction started in September 1984) handling the discharge and storage of Brazilian Orange Juice Concentrate (Brazil being the leading force in the world juice market).

At the terminal, storage takes place under −10° C in tanks having a capacity of 1,000 tons each.

Two bulk reefer carriers ("Orange Star" and "Orange Blossom") are purpose built and carry 12,000 tons concentrate each.

Thousands of road tankers are taking the concentrate to customers spread all over Europe. As a whole, Rotterdam handles 80% of all orange juice destined for consumption in Europe. About half of this goes into storage owned and operated by EJT and the remainder is shipped directly to processing plants.

Cold store: HIWA Rotterdam Port Cold Stores are planning to enlarge their present cold store capacity of 80,000 cu.m. in the Ijsselhaven in 1991 to 120,000 cu.m.

HIWA specialises in the handling and storage of frozen fruit juice concentrates in metal drums.

Maximum draft: 33 ft. F.W. Quay length: 310 m.

Forest Products:

Europe Combined Terminals (ECT) – Forest Products Division:
Seattleweg 7, P.O.Box 7400, NL-3000 HK Rotterdam. Tel: 010 – 4916911. Telex: 28301 ECT NL. Contact: C.J. Weststrate, Director – Forest Products Division

Beatrix Terminal: Prinses Beatrixhaven/Prins Johan Frisohaven.

Berths and cranage: Container/ro-ro multi-purpose facility, total quay length 3,215 m., max.depth 10.5 m., equipped with one 45 tonne Kocks container gantry crane, 20 quay cranes (28 – 40 tonnes), three ro-ro ramps (one adjustable) and one floating ramp.

Direct-call liner services: Assi, Cosco, L.N. Shipping, Norbulk, Rhine ro-ro, Seafix, Tor Line.

Terminal facilities: Total area 45 ha. (7.5 ha. covered), 4,000 sq.m. reefer shed; storage 9,000 TEU; 62 electric reefer points; 28 front-handlers (10 – 42 tonnes); 15 Terberg yard tractors; 54 PlanMarine yard chassis (40 ft. flatbed).

Consolidation: CFS on terminal. Total area 11 ha.; covered area 8,000 sq.m.; storage on terminal; reefer points on terminal; 64 forklifts (3 – 10 tonnes).

Computer systems: Hardware: Unisys B1915.

Rail facilities: Rail connection.

Cars:

Europe Combined Terminal (ECT) – Car Division:
Seattleweg 7 , P.O.Box 7400, NL-3000 HK Rotterdam. Tel: 010 – 4916911. Telex: 28301 ECT NL. Contact: Mr J. van Delft.

Brittannie Terminal (Carterminal/Brittanniehaven).

Berths and cranage: Total quay length 300 m., draft 10.65 m.

Terminal facilities: Total area 220,000 sq.m.

Ro/Ro Facilities:

Company	*Location*	*No. of ramps*
Stena Line B.V.	Hook of Holland	2
Multi-Terminals B.V.	Waalhaven Pier 2	2
Unitcentre B.V.	Heyplaat	1
Seaport Terminals B.V.	Brittanniehaven	2
E.C.T. B.V.	Beatrix Terminal	3

No facilities for discharging dirty ballast at Mobil at 2nd. Petrol Haven, Texaco at 5th Petrol Haven, Tank Terminal Rotterdam, Panocean and Paktank.

No bunkers (ex-installation) at Mobil Oil, Esso, Tank Terminal Rotterdam, Panocean Matex, Texaco.

Moerdijk:

Dimensions of sea-going ships on the river Oude Maas: Vessels sailing for the rivers Oude Maas and Dordtse Kil with a length of more than 135 m. or a breadth of more than 17.5 m. must contact the Harbour Co-ordination Centre (H.C.C.).

The maximum length allowed is 175 m. (between perpendiculars).

The maximum breadth allowed is 25 m.

Passage with a length of more than 175 m. and/or a breadth of more than 25 m. is possible under certain conditions.

This permission must be applied for at the Harbour Co-ordination Centre in good time, in writing either by telex or fax.

"In good time" is to be understood: for incoming ships, at least 24 hours prior to entering the River Oude Maas. For outgoing ships and ships shifting berth, at least 24 hours prior to leaving berth.

The application for these ships should contain the following data:

1. Ship's name and call sign.
2. Nationality.
3. Length and breadth in metres.
4. Expected date and time of arrival at the Oude Maas, Dordtse Kil or departure from berth.
5. Gross tonnage and deepest draft on arrival. (Draft in fresh water.).

The address for permission is: Harbour Co-ordination Centre, 15 Galvanistraat, 3029 AD Rotterdam. Tel: 010 – 4251400. Telex: HCC-24045. Fax: 010 – 4771800.

Restrictions: Max. draft Oude Maas 31 ft.(FW), draft Dordtse Kil 25 ft. 6 in. (FW); max. length 175 m. (between perpendiculars), max. breadth 25 m., max. height 41 m., channel width (100 m. – 150 m.).

The use of tugs is compulsory for certain categories of vessels, the number of which depends upon length, draft and circumstances.

Also see "Moerdijk".

DENSITY:

Europoort: At high water 1025; at low water 1022.

Botlek: At high water 1014; at low water 1001.

Waalhaven and other basins in the Rotterdam port area: at high water 1004 and at low water 1000. All depending on the amount of fresh water carried down river.

STEVEDORES: Official office hours in Rotterdam are: Monday – Friday 0900-1700 hrs. Saturdays 0900-1200 hrs.

1. Bulk Cargoes other than Agribulk:

EMO B.V. and Europoort C.V.: Around the clock, weekends inclusive.

Other bulk stevedores:

Monday 0730 hrs. – Saturday 1400 hrs. continuously. For work between Saturday 1400 hrs. and Monday 0730 hrs. permission is required from the labour authorities and unions. Labourers are only available on a voluntary basis.

2. Agribulk – GEM Europoort Terminal I and II, GEM Botlek Terminal and Rotterdam: Monday 0730 hrs. until Saturday 1530 hrs. Meal breaks: 30 minutes per shift.

In principle, no work is performed on Saturday nights, Sundays and official holidays.

Overtime: Work during weekends and holidays to be agreed with the management.

3. Containers: The large Container terminals ECT and Unit-centre operate around the clock, weekends inclusive.

No work is permitted: 24th December 1530 hrs. – 26th December 0715 hrs., 31st December 1530 hrs. – 1st January 1515 hrs.

4. General cargo: The shift hours are as follows: Day shift 0730-1600 hrs. Evening shift 1600-0015 hrs. Night shift 0000-0730 hrs.

Normal working hours are during the day shifts and the evening shifts on Monday till Friday as well as the day shift on Saturday. Generally gangs will be allocated on basis, 2 for the day shift and 1 for the evening shift. For the night shift overtime has to be paid, as well as for work on Sundays and holidays, starting as from the end of the day shift on the preceding day until the beginning of the day shift on the next day.

5. Oil: At the oil refineries of Shell, Texaco, Esso, Kuwait Petroleum Europoort (K.P.E.) and BP, tankers can discharge continuously, including weekends without extra charge. This also applies to the Maasvlakte Oil Terminal, Maatschap Europoort Terminal (MET) and Europak.

The oil storage companies operate around the clock at overtime rates:

Paktank	2nd and 3rd Petroleum Harbour
Matex Nederland	Vlaardingen and 3rd Petroleum Harbour
Panocean	Chemieharbour,Botlek, 1st Petroleum Harbour
Tank Terminal Rotterdam	Torontohaven, Botlek.

MEDICAL: All medical facilities are available. Advance notice only in emergency or if attendance required during the weekend.

OPENING/CLOSING HATCHES: On liners by stevedores. On tramp vessels by crew; stevedores lift beams.

FRESH WATER: Fresh water can be supplied ex-quay at many berths. Where no shore connections are available and at buoys fresh water can be delivered by waterboat.

FUEL: All types of oil bunkers can be supplied by means of barges or ex-shore installations for tankers. Coasters can take bunkers ex-installation during their inward or outward passage. Advance notice is required for vessels which are only 24 hours or less in port and for bunkering during weekends.

FIRE PRECAUTIONS: No craft are allowed alongside tankers during discharge or loading of dangerous cargoes and during ballasting.

GANGWAY/DECK WATCHMEN: Recommended.

CERTIFICATES: See "Documents".

REPAIRS: A variety of shipyards and workshops are available for engineering and all types of repairs. Various yards are specialised in the construction of dredgers, ferry boats, offshore equipment, heavy derrick vessels and/or jumboizing vessels.

If VLCC's with a length of over 270 m. do not have full engine power for manoeuvering or have not made sufficient engine trials after repairs, they must be escorted to and from the repair yards by 2 tugs of sufficient capacity. The Government Harbour Master must be notified in this respect 12 hours prior to arrival or departure.

For repairs on board any vessel outside a ship repair yard, permission from the Municipal Harbour Master is required. Depending on nature and location of repairs, a certificate may be required to be issued by a recognised marine chemist after inspection.

For sea-going vessels an application for permission shall be made by telex to the Harbour Master of Rotterdam (Harbour Co-ordination Centre, Dangerous goods Department. Telex: GEVST 25720), containing the following information:

1. Ship's name.
2. Date of commencement of repairs.
3. Duration of repairs.
4. Berth.
5. Nature of repairs.
6. Location of repairs.
7. By whom repairs will be carried out.
8. Any cargo-operations, bunkering etc., during repairs.
9. Cargo on board and stowage.
10. Effect of repairs on ship's manoeuvrability and time and duration of immobilised situation.

The Municipal Dangerous Goods Department will contact the Labour Inspectorate, which organisation is in charge of the National law: Cleaning and repairing tank vessels.

Voyage repairs are carried out in the entire port area, including Botlek and Europoort/Maasvlakte.

Some shipyards are situated beyond the bridges across the River Maas, East of Rotterdam. They can be reached via the Koningshaven, where a traffic and a railway bridge have to be passed. Max. draft at HW: 21 ft. (FW.) LW: 17 ft. (FW.) For opening times see "Bridges".

YVC Bolnes B.V.:

(v/h De Groot en van Vliet), Repair yard and Engine works, Oostdijk 25, 3077 CP Rotterdam, Holland. P.O. Box 9357, 3007 AJ Rotterdam, Holland. Tel: 010 – 4799799. Telex: 20459 Vliet Nl. Fax: 010 – 4793760.

Docks: 1 – 175 m. × 25.80 m. Lifting capacity 13,000 tons.
1 – 160 m. × 23.85 m. Lifting capacity 11,000 tons.

Slipways: 1 – 123 m. Lifting capacity 3,600 tons.
1 – 97 m. Lifting capacity 2,700 tons.

Repair quays: Total length 600 m.

Cranes: 4×15 ton, 2×12 ton and 1×6 ton.

Wilton Fijenoord B.V.:

P.O. Box 22, 3100 AA Schiedam.
Location: Admiraal Trompstraat 2, Vlaardingen. Tel: 31.10.4269200.
Fax: 31.10.4732577. Telex: 21451/24436.
Port Number 550.

Drydock facilities up to 160,000 d.w.t. Maintenance, repair and conversion of naval, merchant and offshore craft. Maintenance and repair work also throughout the Rotterdam port area. The open connection with the North Sea ensures accessibility for very large vessels and offshore constructions. Completely covered 40,000 d.w.t. building dock available.

Facilities include servicing and repairs to all types of engines. Wilton-Fijenoord is an authorised repairer for MAN - B & W engines, SEMT - Pielstick and Mitsubishi UE type engines. Specialised in stainless steel cladding of rudder stocks, tail shafts, rudder pintles, etc.

1: Company's Name: Dok- en Werfmaatschappij Wilton Fijenoord B.V.
2: Location: Schiedam.
3: Total of Dry docks and/or Slipways: 7 drydocks, no slipways.
4: Type Drydocks:
   4 floating drydocks.
   3 graving drydocks, one of which is covered.
5: Length:
   Floating Drydock No. 2 LOA 111.24 m.
   Floating Drydock No. 3 LOA 155.44 m.
   Floating Drydock No. 4 LOA 231.33 m.
   Floating Drydock No. 5 LOA 195.45 m.
   Graving Drydock No. 6 LOA 210.83 m.
   Graving Drydock No. 7 LOA 216.55 m.
   Graving Drydock No. 8 LOA 307.37 m.
6: Entrance Breadth:
   Floating Drydock No. 2: 17.48 m. (between fenders)
   Floating Drydock No. 3: 23.16 m. (between fenders)
   Floating Drydock No. 4: 36.57 m. (between fenders)
   Floating Drydock No. 5: 29.26 m. (between fenders)
   Graving Drydock No. 6: 28.35 m. (between fenders)
   Graving Drydock No. 7: 28.35 m. (between fenders)
   Graving Drydock No. 8: 46.13 m. (between fenders)

7: Max. draft allowed:
  Floating Drydock No. 2: 19 ft.
  Floating Drydock No. 3: 14 ft. fwd., 20 ft. aft.
  Floating Drydock No. 4: 25 ft.
  Floating Drydock No. 5: 26 ft.
  Graving Drydock No. 6: 26 ft. fwd., 28 ft. aft.
  Graving Drydock No. 7: 26 ft. fwd., 28 ft. aft.
  Graving Drydock No. 8: 28 ft. fwd., 30 ft. aft.
8: Lifting power:
  Floating Drydock No. 2: 9,000 d.w.t.
  Floating Drydock No. 3: 20,000 d.w.t.
  Floating Drydock No. 4: 90,000 d.w.t.
  Floating Drydock No. 5: 38,000 d.w.t.
  Graving Drydock No. 6: 40,000 d.w.t.
  Graving Drydock No. 7: 42,000 d.w.t.
  Graving Drydock No. 8: 160,000 d.w.t.
9: Repair Quays:
  Berth 10 and 20: 28 ft.
  Berth 12, 14, 16 and 18: 26 ft.
  Berth 22 and 24: 26 ft.
  Berth 29 and 30: 30 ft.

General Remarks: Graving Drydock No. 6 is covered and can be used for maritime and non-maritime projects.

Verolme Botlek B.V.:
Ship and offshore repair yard.
P.O.Box 1001, 3180 AA Rozenburg.
Location: Prof.Gerbrandweg 25, Rotterdam Botlek. Tel: 31.1819.14644. Fax: 31.1819.18082. Telex: 29710.
Port Number 4550.

Verolme Botlek (UK) Ltd., 30 Hill Street, Mayfair, London WIX 7FU. Tel: 071-491-3646. Fax: 071-495-0243.

Verolme Botlek Norway A/S, Moellergaten 24 VII, 0179 OSLO l. Tel: 2.362684. Fax: 2.381176. Telex 74242.

General: Verolme Botlek is the first available repair yard for vessels entering the Port of Rotterdam and can accommodate either in dry dock, or alongside the yard's repair berths, any type or size of vessel. Modern workshop facilities for mechanical, pipe and structural repairs are available. Port repair services throughout the Port of Rotterdam.

Van der Giessen-de Noord:
Van Der Giessen-de Noord, Maritime Services Division B.V., Alblasserdam, 2952 AZ Alblasserdam, Holland. Tel: 01859 – 13844. Fax: 01859 – 13514. Telex: 29314.

U.K. Agents: Anglo Dutch Engineering Co. Ltd., 4 Masons Avenue, Croydon, Surrey, CRO 1EH. Tel: 081-686-9717. Telex: 946940.

3 longitudinal slips:
  No. 1: 80 m. × 9.5 m., draft 3.3 m., lifting capacity 1,200 tons.
  No. 2: 115 m. × 20 m., draft 5.10 m., lifting capacity 3,000 tons.
  No. 3: 105 m. × 20 m., draft 4.70 m., lifting capacity 3,000 tons.
2 Shiplifts:
  Sternlift No. 1: 125 m. × 13.80 m., draft 4.00 m., lifting capacity 500 tons.
  Shiplift No. 2: 51 m. × 14 m. draft 6.00 m., lifting capacity 1,250 tons.
4 Repair quays. 2×20 ton and 1×15 ton cranes. Yard area: 73,000 sq.m.

Vlaardingen Oost Shiprepair:
Vlaardingen Oost Scheepsreparatie B.V., P.O. Box 47, Schiedamsedijk 2, 3134 KK Vlaardingen. Tel: 010 – 4342744. Fax: 010 – 4340887. Telex: 22119.
Location: Vulcaanharbour No. 612, 12 miles from sea, downstream of Rotterdam bridges, no locks.
Docks and slipway: Dock lifting capacity: Up to 5,400 tons for vessels up to approx. 14,000 d.w.t. Slipway capacity: Up to 3,500 tons for vessels up to 27 m. width.
Berthing facilities: 390 m. with a max. draft of 7 m.
Mooring facilities: On the buoys for ships up to 80,000 d.w.t. with max.draft of 13 m.
Cranes: 8 cranes up to 17.5 tons.
Yard area/Outfit quays: About 11,000 sq.m./550 m.

Van Brink Shipyard B.V.:
Van Brink Shipyard B.V., Waalhaven Pier 8, Ophemerstraat 60, 3089 JE Rotterdam. Tel: 010 – 4291511 (day and night). Telex: 28111 brink NL. Fax: 010 – 4295923.
U.K. Agents: Ship Repairers and Shipbuilders Ltd., 45/46 Lower Marsh, London SE1 7RG. Tel: 071-928-5265/4302. Telex: 918828 SRS G. Fax: 071-928-5346.

Port repairs to hull, deck and electrical equipment, cleaning and engine repairs to all makes and types. Work boats and floating cranes up to 25 tons. Official representative for MAN B & W Alpha Diesel Propulsion Systems.
Dry docking: 3 Floating docks.
  90 m. × 20 m. × 5.20 m. Lifting capacity 4,000 tons; 95 m. × 17 m. × 5.20 m. Lifting capacity 3,200 tons; 67 m. × 14 m. × 3 m. Lifting capacity 700 tons.
Repair quays: 3.
  Steel construction, mechanical workshop, carpentry.

D.van de Wetering B.V.:
Bunschotenweg 134, 3089 KC Rotterdam, Holland. Tel: 010 – 4296255 (day and night). Telex: 28122 NL. Fax: 010 – 4294035.
U.K. Agents: G.C. Ridley & Co. Ltd., 11 The Ivory House, St. Katherine-by-the-Tower, London E1 9AT. Tel: 071-481-1744. Telex: 885852. Fax: 071-488-2668.
Engine Repairs: All types.
Specialised work: Port repairs for hulls, deck and electrical equipment. Lay-by berth facilities.
Other work: After-sales service and spare parts for: Daihatsu auxiliary diesel engines, Hansin propulsion diesel engines, Kvaerner Eureka pumps, Tanabe Air compressors, Naniwa pumps, Kvaerner Brug deck equipment, Ameron glassfibre piping, Tsuji deck machinery.

DRY DOCKS: Largest dry dock for vessels up to 500,000 d.w.t. with tank cleaning installation for the largest vessels. See "Repairs".

CUSTOMS ALLOWANCES: Spirits: 5 litres per vessel plus 1 bottle per man. Wine: 5 litres per man. Each crew member permitted out of bond for use on board only, 200 cigarettes or 25 cigars, or 500 gm. tobacco.
  Each crew member is permitted to take 40 cigarettes if he goes ashore.

REPATRIATION: All arrangements for crew changes and repatriation can be made.

AIRPORT: Rotterdam Zestienhoven Airport (distance 6 km.) and Amsterdam Schiphol Airport (distance 70 km.) are served by national and international airlines.

TIME: During Winter GMT plus 1 hour. During Summer GMT plus 2 hours.

HOLIDAYS: New Year's Day, Easter Sunday, Easter Monday, Ascension Day (4th. May), National Liberation Day (5th. May), Whit Sunday (19th. May), Whit Monday (20th. May), Christmas Day, Boxing Day.

POLICE/AMBULANCE/FIRE: Police Head Office. Tel: 4242911. Telex: 23587. Fax: 4241911. Address: Haagseveer 23, 3011 AH Rotterdam.
  General alarm, accidents, Ambulance, Fire. Tel: 06-11.
  River police. Tel: 4243410.
  Emigration office. Tel: 4243430. Fax: 4241934. Address: Sint Jacobsweg 6, 3024 EJ Rotterdam.

TELEPHONES: At major shipyards, oil and grain terminals a telephone is usually placed on board without extra charge.

EMERGENCY CO-ORDINATION:
Emergencies/Disasters:
Contingency information: A disaster, aircraft accident, leaking tanker, explosion, poisonous gas dispersion or any other imminent danger where human life might be involved, happily seldom occur in the Netherlands. Nevertheless, there always remains a small chance, an accident can happen. And even an occurence far away can affect the port area (e.g. Chernobyl).

The risks to which one is exposed nowadays have increased. Especially to dangerous goods. The government has to reduce the effects of a disaster. A special organisation exists to fight catastrophes. IF SIRENS ARE HEARD IT MEANS: ALARM!!!
Then there is the more important matter of more than only a bad smell, or an irritating air. If you hear the sirens, immediately enter (somewhere) and stay inside. This effects everybody. Close windows and doors and shut down the air conditioning.
Tune to Rotterdam Port Office and/or Radio Rijnmond. Rotterdam Port Office will inform you in both Dutch and English language on VHF Channel 11.

On FM 93.4 MHz on your radio you will be (mostly in Dutch language) informed about the danger and the activities: to stay inside or to evacuate. Also information will be given about the area affected. You will also be told when the situation is regarded safe. Also the Harbour Office (VHF Channel 11) can provide the necessary information.

If only a limited area is affected you will be informed by either patrol cars (police) or patrol boats (Port of Rotterdam) by means of loudspeaker installations.

If the advice is given to "remain inside" the advice says: Render help to others! Offer shelter. Inform other people who did not hear the alarm. If you hear via Radio Rijnmond (93.4 FM) or VHF Channel 11 that a gas dispersion or radioactivity exists, immediately:
  extinguish open fires and boilers, also the pilot-flames;
  close all air inlets and escapes;
  choose accommodation, if possible in the centre; off the wind. If possible on the highest level, but without ventilation;
  Take a radio with you and remain listening;
  Radio Rijnmond will be your most important information source as telephones will probably refuse to assist due to an instant lack of capacity;
  Keep wet cloths ready to cover nose and mouth if necessary;
  Do not smoke and avoid exertion so as to limit the use of oxygen.
  Stay inside until further notice.

It might happen that all people have to leave the area for some time. E.g. due to a gas dispersion.

A likely decision will be ordered by the mayor of the city and transmitted by the radio.
  In that case:
  Shut down all engines;
  Take only the utmost necessities; valuables, passports, money, clothes, toilet articles, domestic animals and if possible a portable radio;
  lock doors.

The municipality will provide public transport if possible. You will hear about this from the patrol cars or boats or via Radio Rijnmond.

Reception centres will be established for refugees. Sick and disabled people are if necessary transported by ambulance or wheelchair taxis.
Notice: On each first Monday every month the sirenes are tested at 1200 hrs. If this day is an official holiday, the test will be carried out the next week.

The siren might go off due to technical trouble. Radio Rijnmond (93.4 FM) will inform if this is the case.

PORT RECEPTION FACILITIES:
Sources of waste on board ships: Any vessel has a wide variety of potential pollutants (harmful substances) on board, such as cargo, bunkers, stores, etc.

Each of these potential pollutants may generate waste materials in due course. Bulk liquid cargoes will also generate oily and chemical residues after cleaning cargo and bunker tanks, bunkers may make sludge during purification, leakages in and cleaning of engine rooms may generate bilge-water and residues from stores and packing material may form garbage.

In order to prevent the pollution of the marine environment by discharges into sea from ships of harmful substances or effluents containing such substances, MARPOL 73/78 was established. To achieve this aim, MARPOL 73/78 contains 5 annexes, in which detailed regulations are given with respect to the handling on board ships and the discharge into the sea of 5 main groups of harmful substances.

IN PORT ANY DISCHARGE INTO THE WATER OF POLLUTANT MATERIAL FROM SHIPS IS PROHIBITED.

Adequacy of reception facilities: Different sources of pollution should be checked in order to determine the need and the adequacy of reception facilities in port.

Ship related sources from which harmful substances may enter the water as a result of ship's operations are:

Any ship when disposing of fuel oil residues and oily bilges;
Any ship when disposing of garbage;
Tanker operations where harmful substances are discharged as a result of tank cleaning procedures and ballasting operations;
Ships, other than tankers during ballasting and cleaning fuel tanks and the discharge of this ballast and washing;
Chemical tankers where residues and mixtures of noxious liquid substances, which have been handled in port are required to be discharged to reception facilities;
Marine casualties such as stranding, foundering and collisions;
Terminal operations where harmful substances can be spilled during loading and unloading cargo and the bunkering of oil on all types of ships and barges;
Operations in transfering oil and noxious liquid substances from one vessel to another, such as in the case of lightering operations or bunker from barges.

It is clear that the adequacy of port reception facilities only should be related to the first 5 causes. The three other causes shall be dealt with by spill response operations. According to the Convention (MARPOL 73/78), ports are required to provide adequate reception facilities for residues and mixtures of harmful substances to such an extent that ships are not caused *undue delay* when discharging their residues and mixtures to reception facilities.

Spills into the marine environment in port: Harmful substances entering the marine environment, caused by marine casualties, leakages and spills, including overflows from bunkers and cargo tanks, will call for spill response operations. Because of the rapid changes in spill location and conditions, a swift response to any spill, which floats on the surface, is necessary.

The Port Authority, in conjunction with other emergency services, employs facilities in case of marine accidents in port, where pollutant material enters the water.

A contingency plan for major spills includes the following actions, executed by the Harbour Co-ordination Centre (HCC) of the port:

Collect and disseminate information, follow up the evolution of the situation, estimate the scale of the spill;
Co-ordinate traffic and if appropriate, direct the clean-up operation;
Keep adequate and detailed records.

The contingency plan contains information regarding the availability of:

Means of assistance: towage, patrol boats, traffic control.
Means of action to contain and recover the spill: oil booms, recovery vessels equipped with skimming devices, vacuum trucks and transport barges.
Means of control of the source: leak containment equipment, pumping units, salvage equipment, etc.

Overflows as a result of bunker operations form a major part of accidental water pollution in the Port of Rotterdam. Because, in the Port of Rotterdam the vast majority of all bunker operations are carried out by self propelled tanker barges, protective measures to prevent such overflows are obvious and shall be applicable to all ship-to-ship operations in general and to bunker vessel/seagoing vessel operations in particular.

Protective measures are:

Effective deck watch in attendance on board both ships.
An agreed ship/ship communication system in operation.
Agreed procedures for bunker handling.
An agreed emergency shutdown procedure.
Certified bunker hoses, in good condition and properly rigged.
Effectively plugged scuppers on deck of both vessels and drip-trays in position.
Unused bunker connections shall be blanked.
Sea and overboard discharge valves, when not in use, shall be closed and lashed.

Disposal of ship's waste: The sea and inland waters are continuously in need of protection against the threat of pollution. It is obvious that the practice of disposing or dumping of waste in the marine environment must be stopped. Enforcement of the international MARPOL Convention is one way of protecting the sea against pollution. As a complement of the prohibition of disposing of residues and mixtures of harmful substances at sea, ports have to provide adequate reception facilities. Naturally these reception facilities are not only open to sea vessels but to inland barges as well.

According to Dutch Law (Act for the Prevention of Pollution from ships), port authorities are entitled to lay down regulations on the use of reception facilities in their own harbour.

On this basis the Port of Rotterdam has drafted a new chapter regarding port reception facilities in the Port By-Laws. These regulations have been used as a model for the Port By-Laws of all Dutch ports. The By-Laws stipulate the conditions under which the Port Management will designate facilities to receive both oily and chemical waste and garbage.

Five categories of facilities will be eligible for designation under certain conditions, provided these facilities are licenced under the Chemical Waste Act:

(A) Terminals with loading and unloading facilities for liquid bulk cargoes and ship repair yards. These companies may only receive those substances that are included in their chemical waste permit and have been handled during respectively cargo and repair operations by that particular company.

(B) Companies that are exclusively or primarily involved in the collection, storage , treatment, processing and disposal of harmful substances from ships. These companies must have permanent premises ashore and include the ship cleaning stations.

(C) Companies with mobile collecting facilities for liquid waste, such as barges and trucks, who possess no permanent premises ashore, with a permit for collection and delivery under the Chemical Waste Act, that obliges them to deliver their waste to companies designated under (B).

(D) Companies with permanent premises for the reception, processing and disposal of garbage and residues of dry cargo.

(E) Companies with mobile collecting facilities for garbage and residues of dry cargo, who are obliged to deliver this waste to the companies designated under (D).

Under the Prevention of Pollution from Ships Act, ships have been prohibited from discharging harmful substances to facilities of non designated companies. Reception by unauthorised units is likewise prohibited. Both contraventions are economic offences under Dutch Law.

The designation of a port reception facility shall be made with due observance of the proportion between the anticipated offer of harmful substances from ships on one hand and the reception capacity within the harbour on the other hand.

Waste disposal strategy: For the reception and treatment of oillike and chemical waste from ships, a strategy has been put up. In the first place the reception and treatment of harmful substances shall be useful to an appropriate disposal of this waste. This suitability principle has three elements:

Continuity, a responsible economic and technical functioning of a treatment plant will be of paramount importance for a continuous process chain in general and for a continuous reception of waste material in particular.
Disposal procedures, optimum environmental treatment methods and recycling has to be promoted, reduction of quantities and harmfulness of residues with responsible treatment must be realised.
Capacity and dispersion, treatment capacity has to harmonise with the delivery of harmful substances, optimum dispersion and placing of reception facilities has to be realised.

In the second place disposal activities must be executed by private companies, while any monopoly shall be prevented.

Aforementioned strategy plays an important role in the policy of the Ministry of Environment regarding the issuing of licences in accordance with the Chemical Waste Act for the collection, storage, treatment and final disposal of harmful substances.

Any licencee is obliged to accept all harmful substances, which have been offered to him. In this way it is always insured that a ship that wants to deliver harmful substances to a reception facility will be able to do so under the restrictions and requirements which have been communicated.

These conditions take into account:

The types of harmful substances that will be received;
The tariffs of the costs to be charged to ships that deliver harmful substances;
The reporting in advance of the intension of the ship to deliver harmful substances;
The reporting of the reception of the harmful substances on a so called transfer form by the reception facility.

Cleaning:

For cleaning and gas freeing, the Master has to report at least 24 hours prior to the arrival to the Harbour Co-ordination Centre (H.C.C.) the following in writing:

(a) Name and call sign of ship;
(b) Nationality and port of registry;
(c) Name of the agent, shipowner or charterer;
(d) Date and time of cleaning operations;
(e) Berth where cleaning is to be carried out;
(f) Indication of tanks to be cleaned;
(g) Chemical or technical name of the last carried products;
(h) Method of cleaning.

Tank Cleaning – Waste Water:

TCR Environmental Techniques (Tankcleaning Rotterdam) has a complete Port Reception Facility (MARPOL – Treaty) with floating and rolling equipment for all cleaning jobs and for the collection and processing of all kinds of dirty waste water, such as ballast water, slops and industrial chemical wastes. Shore installation at TCR (Rotterdam-Botlek).

SEAMAN'S CLUBS:

International Seaman's Centre – Heyplaat, Oostbroekweg 4, 3089 KL Rotterdam Heyplaat. Tel: 010 – 4290702. Bar, barbeque, basketball, billiards, darts, information, library, mail service, money-exchange, shop, quiet room, snacks, soccer, swimming pool, table-tennis, telephone service, TV, Video, track, volleyball.

Seaman's Centre – "De Beer/Europoort", Europaweg 208, 3198 LD Rotterdam Europoort. Tel: 01819 – 63133/63343. Bar, barbeque, basketball, library, mail service, money exchange, shop, snacks, snooker, soccer, swimming pool, table-tennis, telephones, TV, Video, tennis, volleyball.

Seaman's Home – Rotterdam, Willemskade 13, 3016 DK Rotterdam. Tel: 010 – 4119260/4110124. Restaurant, bar, shop, money-exchange, laundry, telephone service, mail service, information, social assistance, church, sports, billiards, table football, darts, radio, TV/Video, reading room.

DEVELOPMENTS: A new 60 ha. ECT/Sealand Terminal will be realised next to the successful Delta Multi User Terminal of ECT at Maasvlakte. It will be operational at the beginning of 1993.

SHIPMASTER'S REPORT: November 1981.

On Stores Lists, wines and spirits should be total amounts in litres.

Require 4 Crew Lists, 2 Stores Lists and 2 Crew Declarations. Immigration board and take one Crew List and leave one stamped. Any personnel joining should have their particulars put on the back of this Crew List which will be collected by the Agent prior to departure.

Regulations regarding craft coming alongside are very strict. Basically, once discharging, ballasting or gas-freeing operations have commenced then no craft is allowed to come alongside a vessel if its engine is running when it is less than 25 m. from the vessel. Therefore, if bunkering or storing from barges these craft must be alongside before discharge etc., commences.

SHIPMASTER'S REPORT: July 1984.

Agents required us to use Dirkzwager Radio for all communications to them, chandlers and shore authorities. COW permissible but only after inspection by harbour authorities. Berthing Pilot boards around entrance to Europoort.

SHIPMASTER'S REPORT: September 1988.
Berth: Akzo Zout Chemie, Botlek.
Pilotage: Call "Maas Pilot" when approaching pilot boarding ground. The Pilot boards from a small boat which is sent from the large pilot cutter, or from a yellow launch in the vicinity of the Maas Centre Buoy.
Anchorage: The anchorage used by small vessels is to the South of the Maas Centre Buoy, outside the separation zone.
Tugs: Tugs not used.
Berthing: Akzo Zout Chemie, Botlek, is located in Chemiehaven. This is the South arm within the Botlek complex, on the East side. The berth is well fendered and low and is mainly used by small vessels and barges. Good leads for mooring lines are available.

The vessel is swung off the berth using the port anchor and berths starboard side to. Care should be taken when berthing as ships/barges are berthed at the Stolt (Panocean) Berths on the opposite side of the dock. Mooring usually consists of 2 head/stern lines and 1 spring at each end.

Cargo Operations: Initially the vessel had to purge with nitrogen. This was done on the berth, but with the nitrogen being supplied by Hoek Loes from trucks. The nitrogen was heated, both within the truck and by a heater at the manifold, to approximately 50°C. They can supply at 80°C if they can get trucks nearer to the ship. The nitrogen was supplied at 700 cu.m.p.h., but they can supply at up to 2,000 cu.m.p.h. if requested, but with corresponding drop in temperature.

Vessel loaded VCM through 4 in. (300 ASA) liquid line and 3 in. (300 ASA) vapour line (flexible hose attached to side of liquid arm). Shore supply and connect all reducers. Initially they required 1 ft. to be loaded into the tank, after which samples are taken. Analysis of each tank takes approximately 1.5 hours. As soon as first tank is cleared, vessel can commence loading, but only into that tank. Once all tanks are cleared, it is required that each tank is loaded individually so that the inhibitor can be added in the correct quantities. This takes approximately 2 minutes for each tank.

The maximum rate that shore can supply is 220 t.p.h. Cargo can be supplied at ambient temperature from pressure storage, or fully refrigerated.

Due to a mix-up between Charterers, cargo was initially supplied at ambient temperature and final 30 minutes at ambient temperature, due to the lack of refrigerated cargo. Refrigerated cargo was loaded at −15°C at the manifold and the final tank temperatures were −11.8°C.

Vapour is returned ashore and is passed through a scrubber before being vented. However, due to the size of the line (2 in. on the jetty) throughput is low. To increase this and reduce the tank pressures from 2 Bar down to 300 mb. prior to sailing, for the last 3 hours of loading, 2 compressors blowing ashore were used.

There is a control room at the head of the jetty which may be contacted by radio. Most communications were by word of mouth.

Caleb Brett have a surveyor permanently stationed within the plant. He handles all surveys and samples and the adding of inhibitor. In addition to taking samples at commencement of loading (first foot), samples are also taken when each tank is completed.

A telephone is placed on board the vessel.
Fresh Water: Available by barge.
General: Stores have to be manhandled along the jetty, but shore crane can be used to place large items aboard the vessel.

SHIPMASTER'S REPORT: May 1989.

Pilot ladder required 2 ft. above water.

Sea Pilot takes EEC Check List for tankers and Health Declaration.

Vessels with a draft of 9.0 m. and over are to display deep draft signals.

Vessels proceeding to Europoort display a green light.

Agent requires copies (for Customs Clearance) of Bills of Lading, Letters of Protest, ullage reports at loading port(s) and ullage report arrival Rotterdam.

Any duty free items purchased by crew must be locked up ready for Customs inspection.

AUTHORITY: Municipal Harbour Master, Havenstraat 6, 3115 HD Schiedam. Postal Address: P.O. Box 79, 3100 AB Schiedam. *Tel:* (010) 4622222 (ext. 168-169). *FAX:* (10) 4271962. *Contact:* Captain Th. Sabel, Harbour Master.

TERNEUZEN: 51.20 N. 03.50 E. (See Plan)

LOCATION: At mouth of the ship canal from the River Scheldt to Ghent. Lat. 51° 20′ 14″ N., Long. 3° 49′ 39″ E.

DOCUMENTS: Customs Clearance takes place in the docks, except vessels bound for Belgium. Clearing of ships comprises the production of a document signed by the Master, accompanied by the following documents: Crew List (2 copies), Stores List (2 copies) and Cargo Manifests (3 copies).

Masters are requested to have Crew List completed beforehand to avoid delay in the lock.

Also see "Rotterdam".

PILOTAGE: Compulsory for all sea-going vessels entering, leaving, and navigating inland waterways. Sea Pilot meets inward vessels at Buoy A1, Lat. 51° 22.00′ N., Long. 2° 53.24′ E. for ships entering by Wielingen Channel; or at Middensteen Bank Buoy, Lat. 51° 39.30′ N., Long. 3° 19.00′ E. for ships entering by the Oostgat Channel.

In Wielingen Channel Belgian and Dutch Pilots available. In Oostgat Channel a Dutch pilot cutter is stationed. Belgian pilot boat carries at the masthead a red flag with a white letter "P", the Dutch pilot boat has a blue flag with a white letter "L". Communicate with pilot cutter by VHF Channel 6.

Also see "Ghent – Pilotage" in Belgium.

Warning: In approaches Masters may encounter fishing boats steaming a parallel course about 300 ft. apart. The net is being towed between the two vessels. If there is danger of fouling the net, the fishing vessels will display by day International Code flag "D", or by night a searchlight from each vessel.

ANCHORAGE: Vessels anchor outside fairway where depth is at least 49 ft. Mud bottom and good holding ground.

RESTRICTIONS: No restrictions on night entry.

MAX. SIZE: Controlling depth 31 ft. 4 in. Keel clearance 3 ft. 0 in. Height of tide 12 ft. to 15 ft. A vessel of max. draft 40 ft. 6 in. can reach Terneuzen in most circumstances.

Ships not exceeding the following dimensions are allowed to pass through West lock and canal: Length 256 m., breadth 34 m., draft in fresh water (canal) 12.25 m.

Vessels loading a maximum cargo for Ghent should not exceed 12.25 m. draft (Fresh water).

Also see "Ghent" – "Shipmaster's Report".

Also see "Berthing".

HEALTH: Arriving vessels are only subject to medical examination when arriving from countries where contagious diseases reported or when such cases suspected on board. Medical Officer will board in Terneuzen Roads or Outer Harbour.

RADIO/RADAR: Communicate via Traffic Control Terneuzen on Channel 3 between Buoys PvN/Spr and No. 35 including the Braakmanhaven West, East and Ferry Harbour.

Radar Control also operates between Buoys No. 17 and 35 on Channel 3. 24 hour watch maintained.

Every hour plus 5 minutes a weather-bulletin, navigation reports and warnings are given.

Communicate on the Canal via Traffic Control Terneuzen, Channel 11.

TUGS: Towage compulsory for ships exceeding 180 m. LOA; also for car-carriers and ships exceeding 245 m. LOA there are specific rules. Tugs can be ordered from Terneuzen Tugboat Company or Towage and Salvage Union Ltd. respectively by Channel 72 and Channel 32. Both companies maintain continuous listening watch on Channels 3, 6, 11 and 14.

Slop barge can be ordered from tug companies.

BERTHING: The port has 4 outer harbours: Braakman, West, East and Ferry. The Braakman Harbour is only in use for handling chemical products. There are 2 jetties, also see "Dow Chemical". Braakman Jetty 450 m. in length, max. length of ship 140 m. Ocean Dock 350 m. length, least depth 14.5 m., max. length of ship 280 m. The West Harbour has 2 locks (West and Middle), which is mainly used by sea-going vessels. The East Harbour has 1 lock (East Lock) for inland craft, while the Ferry Harbour (no locks) is used mainly by fishing craft and yachts. Ships not exceeding the following dimensions are allowed to pass through the West Lock and Canal: length 256 m., breadth 34 m., fresh water draft (canal), 12.25 m. East Lock: ships of a length 185 m., breadth 22.80 m., draft 4.0 m. can pass. This lock is used by inland craft. Sea-going vessels with a max. length of 70 m. and a max. draft of 4.0 m. may also pass through the East Lock.

There are 4 harbours on the East bank of the canal situated about 1 mile South of Terneuzen Locks.

Noorderkanaalhaven (Northern Canal Harbour): Length of North Quay, 170 m., max. draft 5.50 m.; South Quay, 192 m., max. draft 5.50 m.; in the middle of the harbour max. draft 7.50 m.

Zuiderkanaalhaven (Southern Canal Harbour): Length of North Quay, 225 m., max. draft 2 m.; South Quay, 230 m., max. draft 5.75 m.; in the middle of the harbour max. draft 8.25 m. and 5 m.

Massagoedhaven (Bulk Harbour): Length of North Quay 504 m., max. draft 12.25 m. and 7.50 m. Length of South Quay 275 m., max. draft 7.50 m.

Zevenaarhaven (Zevenaar Harbour): Length of North Quay 1060 m., max. draft 12.25 m.; South Quay, 790 m., max. draft 8 m., in the middle of the harbour max. draft 12.25 m.

New terminal (August de Meyer B.V.) built by extending Zevenaar Harbour. The basin has been extended by 300 m. and deepened to 13.5 m. to provide accommodation for vessels, up to 65,000 d.w.t. The terminal is equipped with 2 Kangaroo cranes (36 tons capacity), each with a capacity of 440 t.p.h. and fitted with dust-free grabs. The 2 warehouses have a capacity of 130,000 tons in total.

Sluiskil (sub-port, about 4 miles South of Terneuzen) length of quay, 900 m., max. draft 10 m. to 10.50 m.

Sas van Gent (sub-port, on the canal about 7 miles South of Terneuzen) length of quay, 210 m., max. draft 7.00 m.

There are several sheds and warehouses, total capacity 160,000 sq.ft., also open storage, total capacity, 100,000 sq.ft. Grain silo with a storage capacity of 10,000 tons. Vessels up to 80,000 d.w.t. which for some reason have to anchor outside the piers can do so on the River Scheldt near Buoy No. 27. Ships with max. draft of 40 ft. 6 in. can reach Terneuzen under practically all circumstances.

Cranage: 10 movable cranes of 5 tons capacity; 4 floating cranes, 1×8.5 tons and 3×16 tons; 1 floating derrick of 40 tons. At Sluiskil there are 2 coke-loading plants, 3 cranes of 15 tons and 4 loading bridges. Sas van Gent has 2×5 ton cranes. Water and provisions available.

Container and Ro/Ro Facilities: Ro/Ro Harbour, width 24 m., max. draft 7.25 m. In Zevenaarharbour a Ro/Ro berth for 2 vessels, depth 9 m. and 8.50 m.

Ore and Bulk Cargo Facilities: Available at the Massagoed Harbour.

Dow Chemical: *On the Scheldt River – The Scheldt Jetty:* The Scheldt Jetty provides 1 berth only and is suitable for accommodating vessels, ranging from barge-size up to ocean-going ships with a maximum of 22,500 tonnes deadweight (d.w.t.).

The jetty has no draft limitations and the maximum allowable length of the vessels (LOA) is 200 m. Also see "Product Handling Facilities".

In the Braakman Harbour – The Barge and Coaster Docks: The Barge and Coaster Docks have 3 platforms, providing 5 berths for loading and unloading purposes.

Certain draft limitations as well as size restrictions for the various berths have to be taken into account. See "The Braakman Harbour". For product handling facilities at the Barge and Coaster Docks see "Product Handling Facilities".

In the Braakman Harbour – The Ocean Dock: The Ocean Dock provides 2 berths and is suitable for accommodating vessels, ranging from barge-size up to ocean-going ships with a maximum of 100,000 tonnes deadweight (d.w.t.).

Certain draft limitations as well as size restrictions have to be taken into account, see "Braakman Harbour". For product handling facilities at the Ocean Dock see "Product Handling Facilities".

Berthing: A seagoing vessel calling at the Ocean Dock has to be:

(a) Moored with the bow in N.W. direction. Except as otherwise agreed by the Harbour Master.

(b) Turned away from the Ocean Dock.

A seagoing vessel calling at the Barge and Coaster Dock has to make its turn to starboard unless wind or other circumstances justify a different decision.

Masters must ensure that their vessels remain afloat under all circumstances.

Masters must moor their vessel in such a manner that the berth can be left without delay, unless decided otherwise by, or on behalf of the Harbour Master. At least 1 steel cable must be positioned on both the bow and the stern of the vessel. Each cable must be properly attached and adjusted for easy pick-up by a tug.

General Facilities and Limitations: Bunkering facilities are not available.

Supplies of bunker oils, fresh water or large quantities of stores can be supplied with a barge alongside the vessel. In this case the cargo operations have to be interrupted for the time the barge is alongside. Depending on conditions in the port such operations will as a rule be limited to those vessels for which bunkering on the roads is legally not allowed (LPG vessels).

Bunkering at the berth requires 24 hours' notice and will be co-ordinated by the Loading Master. Limited quantities of stores can be taken on board via the jetties.

If for bunkering or any other reason a barge or boat has to moor alongside a ship, moored on one of the Dow Jetties, the Loading Master has to be informed 24 hours before the operation.

With the permission of the Loading Master it is allowed to transport cylinders with acetylene, nitrogen, helium, hydrogen, freon and oxygen from the jetty on board the moored ships and vice versa. By hoisting the cylinders it is obliged to use the specially made blue hoisting-containers from Dow. The cylinder valves must be protected by the screw-caps.

Slops or ballast water cannot be received at the jetty.

Tank cleaning of oil or chemical tankers is not permitted alongside the jetties. LPG vessels can be purged. Nitrogen and methane for purging purposes are available.

Vessels, moored at the Dow Jetties, have to comply with the International Ship/Shore Safety Check List and the additional Dow Marine Safety Regulations.

An intercom set and a telephone will be placed on board immediately after berthing. The intercom is for direct communication with the Loading Master

Charges for the telephone will be made via the ship's Agency. The telephone number of the set placed on board depends on the berth where the vessel is moored.

The following numbers are in use:

A West:	01150 – 72653
A East:	None
B West:	01150 – 72899
B East:	01150 – 72899
C:	01150 – 72679
OD North:	01150 – 73118
OD South:	01150 – 73118
Scheldt Jetty:	01150 – 19637 – 72211

The Braakman Harbour: General lay-out: See "Plan".

It should be noted that given water depths on the plans are valid immediately after dredging. A certain siltation should be taken into account. *The average rate of the siltation is unknown.*

Given water depths are translated to the General Mean Level for the Netherlands (N.A.P.). For the calculation of actual water depths, undermentioned tidal differences should be taken into account.

Tidal differences in metres:
High Water Spring (HWS) +2.7
High Water (HW) +2.0
Mean Level (N.A.P.) ±0.0
Low Water (LW) −2.0
Low Water Spring (LWS) −2.6

Barge and Coaster Docks:
Dock A (West) – Max. size 10,000 d.w.t. Depth 11 m.
Dock A (East) – Depth 7.5 m.
Dock B (West) – Max. size 15,000 d.w.t. Depth 11 m.
Dock B (East) – Max. size 8,000 d.w.t. Depth 9.5 m.
Dock C (West) – Max. size 10,000 d.w.t. Depth 11 m.

In addition to the information, given on the Plan, the following "General Directives" should be observed:

The overall length of vessels is restricted to a maximum of 140 m. at Dock A (East) and Dock B (East), and 165 m. at Docks A, B and C (West).

Mooring at Berth B (East) is limited to the port side only.

The Ocean Dock: North and South Berth: Max. d.w.t. 100,000 tonnes. Max. length 280 m. Depth 14.5 m. L.L.W.S.

In addition to the information, given on the Plans, the following "General Directives" should be observed:

Time of berthing at/or departing from the Ocean Dock depends on tidal conditions and max. d.w.t. or draft of each vessel and will be appointed by the pilotage.

The maximum allowable draft of vessels is determined by the water depth at the Scheldt River Entrance, at Scheur. At present max. draft is at least 43 ft. (approx.). New figures are published every month.

Berthing with ship's bow pointing seaward is compulsory.

Port Regulations: To maintain order and safety of Navigation and based on Article 4 of the Port Regulations, the Harbour Master of Terneuzen has announced the following with regard to the Braakman Harbour and the berths, situated therein:

Admittance into the Harbour:

1. The largest admissable lengths and/or widths are for:
Sea-going vessels:
– in the harbour : length overall 280 m.
– along the Ocean Dock : length overall 280 m.
– along the A, B and C Docks (West) : length overall 165 m.
– along the A and B Docks (East) : length overall 140 m.

Vessels exceeding 250 m. LOA should give ETA 36 hours in advance.

inland craft : length 140 m.
push barges : length 185 m.
width 22.8 m.
An additional length of 8 m. is permitted, provided that the maximum length of the barge does not exceed 153 m. and the pushtug is lashed in the axis of the barge.
lashed barges : length 110 m.
width 22.8 m.

2. It is prohibited to enter the harbour with vessels or boats which:
a. Do not have to load or unload in the harbour.
b. Do not have to carry out any work.
c. Are not equipped with an VHF radio, suitable for transmitting and receiving on Channel 3.

3. Dispensation from measurements and conditions as mentioned above can be granted by the Harbour Master or his Substitute, except for the max. admittable LOA of 280 m.

Dow Chemical Marine Department can be contacted by VHF radio on Channels 6, 8, 13 and 34. Constant radio watch is kept on Channels 13 and 34.

Traffic Control:

1. Traffic is controlled by the Terneuzen Traffic Control Station. Tel: 01150-95651. (Traffic leader Tel: 01150-12161). Telex: 55482. FAX: 20527. VHF: Channel 3. Call sign: Radar Terneuzen.

2. The procedure of "Reporting in Writing" is also compulsory for inland craft, whereby the term of 3 hours also applies for the activities as mentioned below.

Masters of seagoing vessels and inland craft must report by VHF on Channel 3 to Terneuzen Traffic Control Station, call sign "Radar Terneuzen", when:

(a) On the Western Scheldt River with destination Braakman Harbour and:

Ascending the river: Entering the radio area "Radar Terneuzen" and in the neighbourhood of Buoy 17.

Sailing down the river: Entering the radio area "Radar Terneuzen" and in the neighbourhood of Buoy 22.

(b) Entering or leaving the harbour.
(c) After berthing and before unberthing.
(d) Changing berth.

4. All traffic inside the harbour or harbour entrance is obliged to have VHF radio tuned to Channel 3.

5. If necessitated by weather, or other circumstances, the required number of tug boats will be determined by the Harbour Master.

6. *Seagoing* vessels, having to carry the signals in accordance with Article 22 of the Decree of the Ministry of Transport and Public Works, dated 31/12/1971 Nr.A-5/071054 (Regulations for Dangerous Goods) are not allowed to enter the harbour if the visibility is 500 m. or less.

Inland craft, having to carry the signals in accordance with Article 10 of the Decree of the Ministry of Transport and Public Works, dated 31/12/1971 (Regulations of Dangerous Goods) are not allowed to enter the harbour if the visibility is 500 m. or less.

During approach under the above conditions vessels may be ordered by the Harbour Master, to berth or drop the anchor at a suitable place.

Dispensation from the paragraphs as provided above may be granted by the Harbour Master.

7. Entering and leaving the harbour is prohibited if a red light is shown below the green and red harbour lights.

Mooring:

1. Masters must ensure that their vessels remain afloat under all circumstances.

2. Masters must moor their vessel in such a manner that the berth can be left without delay, unless decided otherwise by, or on behalf of the Harbour Master.

At least 1 steel wire must be positioned on both the bow and the quarter of the ship. Each wire must be properly made fast and adjusted for easy pick-up by a tug.

Pilotage: Pilotage is compulsory for sea-going vessels, entering, leaving or manoeuvring in the harbour.

Dispensation may be granted by the Harbour Master.

Marking:

1. The entrance of the harbour is marked by a fixed green, and a fixed red light on top of piles on West side and East side of the white leading lights.

2. Night and day, the axis of the harbour entrance is marked by 2 synchronous interrupted white leading lights (iso 2 sec.) located on the Southern Harbour Dyke. Bearing is 191°.

3. The green and red harbour lights are located respectively 170 m. and 215 m. from the axis, indicated by the white leading lights.

The minimum width of the harbour entrance on either side of the axis, measured at right angles, is 112 m.

4. Night and day the centre of the turning-basin, West of the Ocean Dock, is indicated by interrupted green leading lights (3 sec. on, 1 sec. off). These lights are located on the Southern Harbour Dyke. Bearing is 211.5°.

5. The centre of the almost circular turning basin lies at the intersection of the green leading lights and the Westward lengthened axis of the Ocean Dock. The radius of the turning basin is 200 m.

6. During fog, 2 sodium fog-lights are lit underneath the green light of the harbour entrance.

One of these fog lights is directed towards the Scheldt River, the other one towards the harbour.

During the night and poor visibility, the piles, marking the harbour entrance are illuminated by floodlights.

7. The shoal in the harbour, extending from the South side of the Barge and Coaster Docks to further Southward is covered by 3 light buoys, located on a water depth of N.A.P. −7.5 m.

Depths:

1. The dredged bottom-depths in the harbour are:
In the Harbour Entrance : N.A.P − 15 m.
In the Turning Basin : N.A.P − 16 m.
The Western Berths of the
B & C Docks : N.A.P − 11 m.
B & C Dock Berth B-East : N.A.P − 9.5 m.
B & C Dock Berth A-East : N.A.P − 7.5 m.

The above mentioned bottom depths are typical figures and certain deviations as a result of siltation can occur.

2. Information with regard to permitted draft can be obtained from the Harbour Masters' Office or from the Traffic Control Station.

Tugs: A sea-going vessel mooring, or leaving a berth has to be assisted by at least:
(a) 1 tug if the length overall is less than 100 m.
(b) 2 tugs with sufficient power if the overall length exceeds 100 m. unless the vessel is equipped with a functioning bow-thruster when only 1 tug is required.
(c) The number of tugs may be 1 less when leaving Berths B-West or B-East and when moored with the bow to the North.

Assisting tug must be attached to the towing lines on the sea-going vessel.

Loading/Discharging:

Manifold Position:

The manifold position for ships bound for Terneuzen should be:
– about midships.
– 2 m. minimum from rail.
1 m. minimum above deck.
– Flange connection 6 in. minimum.

A well supported manifold is required and the space around and above the manifold should be free of obstructions.

Product Handling Facilities and Capabilities:

Marine Loading Equipment: All LPG products are loaded/unloaded at the Barge and Coaster Docks. Butane and propane can also be loaded/unloaded at the Ocean Dock. The following equipment is available:

B & C (A-West): 2 stainles steel loading arms for propane, nominal diameter 6 in., minimum temp. −104°C.

1 carbon steel loading arm for butane and propane, nominal diameter 6 in., with integrated vapour return line, nominal diameter 4 in., minimum temp. −10°C.

B & C (A-East): 1 carbon steel loading arm for butane and propane, nominal diameter 6 in., with integrated vapour return line, nominal diameter 4 in., minimum temp. −10°C.

B & C (B-West): 1 carbon steel loading arm for butane and propane, nominal diameter 8 in., with integrated vapour return line, nominal diameter 4 in., minimum temp. −10°C.

B & C (B-East): 1 carbon steel loading arm for butane and propane, nominal diameter 8 in., with integrated vapour return line, nominal diameter 4 in., minimum temp. −10°C.

B & C (Dock C): 2 stainless steel loading arms for propane, nominal diameter 6 in., minimum temp. −104°C.

O.D. (South): 2 low temperature steel loading arms for butane and propane, nominal diameter 10 in., minimum temp. −50°C.

O.D. (North): 2 low temperature steel loading arms for butane and propane, nominal diameter 12 in., minimum temp. −50°C.

Except for the carbon steel loading arm on Berth A (West and East), all other arms are equipped with an emergency shut-off/disconnecting device and a fire fighting nozzle, directed on the ship's cargo line manifold.

On the Braakman Jetty a C-4 vaporiser and booster pump are available for C-4 unloading from barges which do not have own discharge facilities.

Propane can be unloaded with this booster-pump as well.

Nitrogen or methane supply from shore is necessary to produce enough over-pressure in the ship tanks, when unloading C3's.

Purging:

Purging of LPG vessels with nitrogen or methane can be carried out at the Barge and Coaster Docks. Maximum delivery rate of nitrogen is 2,000 N cu.m./hr., methane 1,800 N cu.m./hr.

Nitrogen can be heated to a temperature of +70°C to increase the drying effect of the vessel's cargo tanks which were waterwashed prior to the purge. Prior to loading LPG, vessels must meet the requirements as laid down in the "Guidelines for Cargotank Condition".

Conditions for unloading Propane and Butane:

All refrigerated propane and butane vessels should arrive with tanks over-pressure not exceeding 60 mb. to achieve maximum discharge rates.

Unloading of propane and butane is without vapour return.

Transfer Capabilities:

Discharge rates for refrigerated propane and butane are about 1,100 cu.m./hr.

Loading rates for refrigerated propane and butane are about 800 cu.m./hr.

Loading rates for pressurised propane and butane are about 250 cu.m./hr.

Storage:

Butane and propane are stored in refrigerated and pressurised tanks and loaded/unloaded at either ambient temperature or refrigerated. Refrigerated propane delivery is at −38°C and butane delivery is at −5°C.

LPG Storage Tanks:

2×50,000 cu.m. propane/butane fully refrigerated.
1×15,000 cu.m. butane fully refrigerated.
1×5,000 cu.m. butane pressurised.
2×3,000 cu.m. propane/butane pressurised.

Ventmasts must have clearly marked purge connections for either steam or nitrogen.

The vessel must have updated cargo-piping diagrams on board. Copies of drawings must be submitted to Dow on request.

Inspection – Visual Inspection:

Cargo tanks, pumps and refrigeration plants shall be easily accessible for inspection, and crew will upon request open the blinds, valves, drums, etc., as appropriate in accordance with vessel's safety practices.

Cargo Transfer Operations:

Loading or unloading will not start until the appropriate safety and operating procedures have been communicated by the Loading Master to the responsible ship's officer. The vessel must be securely moored alongside the jetty. If requested by the Loading Master additional mooring lines should be attached.

The Loading Master must be informed about the true set pressure of the cargo tank safety valves.

Non-used line ends must be blanked off. All bolt holes must be filled at all pipe connections.

Gas detection on board must be in good order. The Master must permit testing upon request. Master must allow the installation of additional shore gas detectors on deck during loading/unloading operations.

In case of inerted tanks and/or void-spaces, the Master is fully responsible for the necessary warning tags.

If a sprinkler test is requested by the Loading Master or Government Representatives, this must be permitted. If an ESD test is requested by the Loading Master or Government Representatives, this must also be permitted. Upon request the Master must state the valve closure time of his ESD system, to assure safe transfer at short ESD valve closing times. Dow reserves the right to the product transfer rates in order to keep the pressure, as a result of an activated ESD system, below the safety valve settings at no cost to Dow.

Pneumatic ESD connections for shore connections must be clearly marked.

(ESD = Emergency Shut Down.)

At the berth, the venting of gas through ventstacks is not permitted.

Upon request of the Loading Master, cargo pumps must be checked for proper functioning. Leakage of gas must not exceed a concentration of 30% LEL outside a circle of 25 cm. If the vessel's cargo compressors have to be used for loading or unloading operations, they will be tested as well. The Master must give full co-operation for these tests.

Safety:

1. Fire/emergency: In case of Fire/emergency (including personal accidents).

(a.) Inform jetty operator.

(b.) Dial 94982, report name, position, emergency situation and required help.

2. Communication: Ship to jetty and Marine office by means of portable telephone or intercom on board. Telephone: dial 18920, ext. 2563 Marine office, ext. 3165 Loading Master.

3. Use of intercom: Push button and call operator or office. Release button and wait. Always mention your ship's name. (If there are more ships alongside).

4. Emergency shutdown: Loading: To prevent overloading of ship's tanks and emergency shutdown can be carried out on deck by means of "the emergency shutdown switch" after which the shore-valve will immediately close.

5. Fire on board: Stop loading/unloading operations. Inform shore personnel.

6. Fire ashore or on other vessels: Stop loading/unloading operations. Make ship ready for departure. Wait for instructions.

7. Supervision: At all times during loading/unloading operations, adequate supervision must be carried out on deck and in the cargo-control room.

8. Tank cleaning: Tank cleaning or gas venting into the atmosphere alongside the jetty is strictly prohibited.

9. Deballasting: No deballasting of cargo tanks is allowed without permission of the Loading Master or his representative.

10. After loading: The loading arm will be blown with Nitrogen under pressure. You will receive approximately 3 cu.m. more.

Alarm signals: (Every Monday at 1200 hrs. there is an alarm test). Sounding of following signals:

Attention: 5 3 5 3 5 5 3 seconds: Stop cargo transfer, wait for instructions.

Evacuation: 1 1 1 1 1 1 seconds: Prepare ship for departure.

All clear: 20 seconds: Recommence operations (contact jetty operator). In case of loading: Loading will be stopped from: Ship/shore.

MEDICAL: One modern hospital available.

TANKERS: Slop tanker available. Also see "Berthing" – Dow Chemical.

FRESH WATER: Available from water barge.

FUEL: Fuel oil and lubricating oil available from lighter or tanker barge. Bunker coal available by prior arrangement.

CONSULS: Belgium, France, Finland, Norway and Spain.

REPAIRS: Terneuzen Shipbuilding Yard situated at junction of East and West Canal branches. Able carry out hull and engine repairs. Floating cranes and diving equipment available.

GANGWAY/DECK WATCHMEN: Available. Tariff increase 100% on Sundays and holidays.

OPENING/CLOSING HATCHES: Can be effected by crew or stevedores.

CUSTOMS ALLOWANCES: See "Rotterdam".

SURVEYORS: See "Flushing" or "Rotterdam".

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: See "Rotterdam".

SERVICES: Repairs of radio, radar, etc., can be effected.

EMERGENCY CO-ORDINATION CENTRE: Harbour-Control Terneuzen continuous watch on VHF Channel 11. Tel: 12161. Telex: 55482.

BANKS: Amsterdam-Rotterdam Bank, Herengracht 15, 4531 GM Terneuzen. Tel: 94041. Telex: 55249.

Raiffeisen-Boerenleenbank, Herengracht 1, 4531 GM Terneuzen. Tel: 94651. Telex: 55260.

Algemene Bank Nederland, Herengracht 11, 4531 GM Terneuzen. Tel: 95051. Telex: 55429.

STORING: Vessels can be stored by barge and truck. At Braakman Harbour only with special permission of Dow Chemical Company, and not during loading and discharging. Trucks can proceed alongside at the berth except at Braakman Harbour. Approximate distance from truck to ship at Braakman Harbour, about 300 m.

At Braakman Harbour, no forklift trucks can be used to handle stores.

For Customs Regulations, see "Rotterdam".

Local Riggers can be employed to assist with storing.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: General Information: Dutch port authorities are responsible for the provision of reception facilities in their ports. They publish who have been designated to receive waste from ships in their port. It is forbidden to deliver waste to persons who have no official designation as a port reception facility.

Fees: The costs incurred as a result of the delivery and further processing of waste are to be paid by the ship to the receiving company.

Advance Notice Requirements: In Dutch ports the ship's need for reception facilities must be reported 24 hours in advance.

Contact Port Authority for further information.

WASTE OIL DISPOSAL: See "Garbage Disposal".

SEAMAN'S CLUBS: Seaman's Friend Society, Varenscentrum, Westkolkstraat 17, 4531 AV Terneuzen. Tel: 01150-95373. Facilities include free transport, bar, souvenirs, reading and writing facilities, newspapers, TV, games, telephone, currency exchange and postal services.

CURRENCY: Dutch Guilders.

DEVELOPMENTS: Plans made to widen and deepen Outer Harbour.

SHIPMASTER'S REPORT: May 1988.

Chart: B.A. Chart No. 120.

Pilot: Vessels arriving from the West take Pilot at Wandelaar "A1" Buoy. Pilot on VHF Channel 6 and Telex No. 4682125.

If vessel arriving from the North, Pilot is taken at Steenbank. Pilot on VHF Channel 6 and Telex No. 4437811.

Gas ships with tank capacity over 1,500 cu.m., passage has to be via Schooneveld. If under 1,500 cu.m. the inside route via Oostgat can be used.

Under normal circumstances the Pilot taking the vessel to Terneuzen will also berth the vessel.

Anchorage: Vessels with dangerous cargo awaiting a berth at Terneuzen should anchor at Wielingen North Anchorage which is 3 miles West of Flushing, depth of water 7 fathoms.

Flushing Control monitors VHF Channel 21.

Everingen Anchorage, off Terneuzen, may be used for bunkers and repairs only. Loaded gas ships cannot wait at this anchorage.

If vessel awaiting orders she should stay to the North of "A1" Buoy.

Tugs: If berthing at Dow Chemical, vessels up to 100 m. LOA require 1 tug and if over 100 m. LOA, 2 tugs are required. We used 1 tug aft with the tug's line but the tug was too powerful for a small vessel.

Berths: For gas ships there are 4 berths available. These berths are both sides of Berth A and the West side only of Berths B and C. Vessels head North at all berths. Shore gangway used at all berths and the fendering was good. Depth alongside at low water 8.5 m.

Pilots advise that the maximum draft permissible at Ocean Pier is 14 m. and at any tide 10 m.

Cargo: Shore capacity for ethylene is 10,000 tonnes. Normal production 200 tonnes per day. Normally ethylene is exported from Terneuzen but at present there are problems with the production plant.

At present the shore reliquefaction plant is not working at full capacity and this is restricting discharge rate.

For handling of ethylene a 6 in. arm and a 4 in. vapour return line are used. Hot gas blown from ship on completion.

Berth C handles ethylene, propane, styrene, cumene, naphtha, resin oil and aromatic oil. Discharge rate for ethylene is 111 t.p.h. It takes about 3 hours for samples.

General: At present the maximum draft to Antwerp is 50 ft. if using 2 tides and 48 ft. if proceeding on 1 tide.

Fresh water is not available at Dow Chemical berths. Fresh water is provided by barge from Terneuzen.

Whilst at Flushing Anchorage, Ostend Radio is best for public correspondence, vessels can also use PCH. If anchored off Terneuzen it is best to use Antwerp Radio.

Barges with stores may proceed alongside before discharging, whilst sampling or after discharge. Stores can also be brought down the jetty with the aid of shore trolleys and crane. Bunkers may only be taken after completion of discharge.

Officials: Customs and Immigration board on arrival at the Berth. There was also an immigration check whilst at anchor off Flushing as the vessel had Eastern Block crew.

AUTHORITY: Havenschap Terneuzen, Maritiem District Scheldemond, Buitenhaven 1, 4531 BX Terneuzen. *Tel:* 01150-82400. *Telex:* 55104. *FAX:* 01150-20232 (office hours), 01150-30699 (24 hours - Control Centre). *Contact:* Captain J.W.P.Prins, Harbour Master.

VLAARDINGEN: 51.54 N. 04.20 E.

On the Waterway about 5 miles from Rotterdam.

DOCUMENTS: See "Rotterdam".

PILOTAGE: See "Rotterdam".

VHF: Port Authority on Channel 20.

TUGS: Available.

BERTHING:

Old Harbour (Municipal): Berths No. 634-653 and 701-705. For tugs and inland craft. Depth at entrance 10 ft. at LW. Total length of quay 2,000 m.

Koningin Wilhelmina Harbour (Municipal): Berths No. 634-653. Depth 12 ft. to 17 ft. at LW. Length of quay 1,300 m.

Vulcaan Harbour (Private): Berth No. 601-620. Suitable for vessels up to a draft of 10.4 m. (34 ft.) at LW. Stevedoring by: Frans Swarttouw's Havenbedrijf.

Length of quay for cargo handling 750 m. Phosphate loading jetty (on riverside) for barges 140 m. 3×16 ton electric cranes, 3×6 ton electric cranes and 2×5 ton mobile cranes. Belt conveyors on phosphate jetty. Large shed with a capacity of 30,000 tons and 6 storage tanks with a total capacity of 90,000 tons for various bulk cargoes.

Nieuwe Matex Wharves (Private): Berths No. 621-633. 3 berths for seagoing vessels on riverside up to 35 ft. draft at LW. Several berths for barges and coasters on inner side of jetty up to 22 ft. draft.

Large tank installation; bonded warehouses. 424 storage tanks (total) capacity 450,000 cu.m. for vegetable and mineral oils, molasses, latex and chemicals.

Lensveld Wharf (Private): Berth No. 654. For general cargo and timber. Max. draft 14 ft. at LW.

Lever-Sunlight Jetty (Private): Berth No. 712. Jetty 75 m. Max draft 10 ft. at LW (no harbour dues).

N.V. Van Neerbos Ind. en Handels My. Jetty (Private): Berth No. 715. Length of jetty 70 m. Max. draft 10 ft. at LW. 1×3 ton electric crane.

Mostert Absorbents Jetty (Private): Berth No. 716. Max. draft 20 ft. at LW.

Hydro Agri Fertiliser Works Harbour (Private): Berths No.731-744. Length of harbour 300 m. Max. draft 11 ft. to 14 ft. at LW. Two jetties on riverside: Phosphate discharging jetty, max. draft 16 ft. and acid discharging jetty, max. draft 23 ft. at LW. Harbour dues by arrangement.

FRESH WATER: Available by barge.

FUEL: Available by barge.

REPAIRS: *Ship Repair Yard "Vlaardingen Oost":* All kinds of repairs undertaken. Outfitting quay of 1,100 ft. length. Anchor and chain factory. *Machinefabriek Kreber:* Builders and repairers of boilers, engines and various kinds of dredgers.

SURVEYORS: Saybolt Cargo Inspectors available at Vlaardingen, others (Caleb, Brett, Bureau Verwey, etc.) at Rotterdam. Lloyd's Register, American Bureau, Bureau Veritas and Det Norske Veritas Surveyors available at Rotterdam.

DRY DOCKS: Three dry docks (capacity 3,500, 4,200 and 5,300 tons) and one broadside slipway of 400 ft. (capacity 3,500 tons) in Vulcaan Harbour, (Western part).

AIRPORT: Rotterdam Airport (designed for international short and medium haul air traffic) lies at a distance of 10 km. from the Vlaardingen port area.

EMERGENCY CO-ORDINATION CENTRE: Alarmcentrale Politie, Tel: (010) 4344444. VHF Channel 11 (Port of Rotterdam).

AUTHORITY: Port of Vlaardingen, Oosthavenkade 85a, P.O. Box 141, 3130 AC Vlaardingen. Harbour Number 660. *Tel:* (010) – 4344700. *FAX:* (010) 4344373. *Contact:* Mr.S.van Berge, Harbour Master.

YMUIDEN (Ijmuiden): 52.28 N. 04.34 E. (See Plan)

Also refer to "Amsterdam".

DOCUMENTS:

2 Personal Effects Lists.
2 Stores Lists.
3 Crew Lists.
3 Passenger Lists.
Declaration of Health.

Also see "Rotterdam".

APPROACHES: The approach channel "IJ-geul" for navigation for ships with a draft of up to 54 ft. (16.5 m.). The channel leads to the Port of Ymuiden.

Approach Channel "IJ-geul": The navigation channel, officially known as the IJ-geul, has a width of 450 m. and is 23 km. long, when measured up to the piers at Ymuiden. The section of the channel within the piers is 4 km. long, and it is considerably narrower at some places.

Navigation: A number of measures have been taken to ensure a safe passage through the navigation channel. Ships which, due to their draft, need to use the new channel are obliged to take a Pilot on board. In other words it is prohibited to enter the channel without a Pilot. The Pilot boards the ship from a helicopter about 45 km. from the coast or is taken off at the Hook of Holland.

The deep draft ships can only sail in during a certain period of the tide (approx. 3 hours after flood-tide). Certain conditions (excessively high waves) can lead to a temporary closure of the channel. A special system has been developed to recognise and to forecast these conditions. A navigation plan that takes account of the water level prediction, weather and wave height forecasts and the draft of the ship in question is prepared and relayed to the Pilot. The conditions are continuously monitored and, if necessary, the plan is adjusted. Use is also made of a portable Decca receiver, which the Pilot takes on board with him. These portable receivers make use of more than the 2 customary transmitting stations, which means a considerable improvement in the determining of position – and as a consequence – improved navigation. Furthermore, these receivers are specially adapted to the situation at Ymuiden. Altogether this means that the Pilot can ascertain the position of the ship quite accurately, even at night or in fog, which leads to considerable improvement in safety.

A circular emergency anchorage area has been planned with a diameter of 1,600 m. about 10 km. from the pier. This emergency anchorage area is desirable because, should a disaster occur, the harbour mouth could suddenly become obstructed, preventing the ships in the channel from entering, whilst they would be unable to retrace their course back due to the approaching ebb-tide.

PILOTAGE: On entering and leaving Ymuiden Government pilotage is compulsory. Pilots will board ships at sea, being transported from shore to the pilot boarding position by means of a sea-going tender. The boarding position is in the vicinity of the outer buoy.

"Traffic Centre Ymuiden" (Telegraphic address "Pilots VTS Ijmuiden") can be informed via Scheveningen Radio or via VHF Channel 12. Pilotage and navigation are possible at night.

Pilot Ladders: Bottom of the pilot ladder should be 6 ft. above the water. Pilots strictly adhere to Regulation 17b, Chapter V of the International Convention for the Safety of Life at Sea, which reads as follows:

"Whenever the distance from sea level to the point of access to the ship is more than 30 ft. (9 m.), access from the pilot ladder to the ship shall be by means of an accommodation ladder or by another equally safe and convenient means".

Pilot from Helicopter: When the pilot service per pilot tender has been suspended owing to weather conditions it is possible to take a Pilot on board vessels by helicopter. Helicopter pilotage is carried out for vessels which have an obstacle free hoisting area on deck of minimum 15 ft. in diameter. Deck plans should be provided in advance.

Vessels over 45 ft. draft always take helicopter pilotage.

Helicopter rates:

Dfl. 5,045. – per flying hour/pro rata exclusive fuel costs.
Dfl. 305. – per hoist transfer.
Dfl. 432. – Additional charge per flying hour from 1800 until 0600 hrs. and on Saturdays, Sundays and Dutch public holidays.

A variable fee per flying hour for fuel consumption fluctuating monthly.

Restrictions

1. Minimum visibility 800 m. at 150 ft. above sea level.
2. Maximum wind Force 10 (55 knots).
3. Severe turbulence and icing conditions.

Remote Pilotage (RP): During periods that pilot service is suspended for (small) vessels, shipping approaching Ymuiden can obtain the information and advice of a pilot at the Port Operation Centre, under the following conditions and provisions:

1. RP is for shipping for which pilotage is compulsory and vessels which voluntarily wish to make use of the service of a pilot.
2. RP will only be provided when it is impossible to board a vessel because of the weather conditions or for other reasons.
3. The Master explicitly announces that he wishes to approach the harbour using RP and that there is no objection to this under the terms of the access policy conducted.
4. The Master is obliged to take the pilot on board between the breakwaters.

Pre-Entry Reports:

Note: All reports must be updated if vessel delayed one hour or more.

7 Days Before Arrival: (Vessels using lock system with draft over 13.1 m. up to 13.7 m. and/or beam over 42 m. up to 45 m. and/or length over 325 m. up to 370 m.).

To: Pilot VTS Ymuiden.
Giving: IMO SRS Items: Alpha Bravo Golf India Juliet Oscar Papa Quebec Tango Uniform X-Ray.

Via: Telex: 71169 PIVTS NL.
Fax: 02550-32535.
Tel: 02550-64500 or Agent.

24 Hours Before Arrival in Netherlands Waters: (Tankers, dangerous cargo and draft over 13.7 m. up to 16.5 m.).

To: Pilot VTS Ymuiden.
Giving: As previous report.
Via: Telex, Fax, Tel. or Agent.
Note: Tanker Check List, if appropriate to Pilot on boarding.

8 Hours Before Arrival: (52° 30′ N., 03° 50′ E.). (Draft over 13.7 m. up to 16.5 m.).

To: Pilot VTS Ymuiden.
Giving: As previous report.
Via: Telex, Fax, Tel. or Agent.

6 Hours Before Arrival at Outer Buoy: All ships.

To: Pilot VTS Ymuiden.
Giving: As previous report.
Via: Telex, Fax, Tel. or Agent.

ANCHORAGE: Vessels may anchor off Ymuiden. Recommended area is 2 miles N.W. of Outer Buoy.

RESTRICTIONS/MAX. SIZE: All drafts listed below have been calculated in salt water with a specific gravity of 1.026.

Maximum Dimensions of Vessels: The approach channel to the port mouth of Ymuiden (IJ-geul) and the fairway in the Outer Harbour of Ymuiden via the Northern fairway to the Outer Quay No. 2 of Hoogovens is accessible for vessels with a maximum draft of 54 ft. in salt water. The maximum length of a vessel with a draft of 54 ft. that must swing is 300 m. Before vessels with a length of 250 m. – 300 m. and a draft of 49 ft. 3 in. can swing, consultation should be made as to the time of the swing manoeuvre in connection with the water level. Maximum draft of vessels longer than 300 m. to a maximum length of 350 m., that must swing, is 39 ft. 9 in. Ships with a draft of more than 45 ft. must remain in the channel and therefore should, when making a sailing plan, report at least 48 hours before entering Dutch waters.

In addition to the above mentioned report vessels restricted to the channel should report at least 24 hours before passing the Western border of the approach area. This approach area is located between the co-ordinates:

Lat. 52° 31′ 47″ N., Long. 3° 48′ 29″ E. and
Lat. 52° 27′ 25″ N., Long. 3° 41′ 20″ E.

This report should be corrected if there is more than 1 hour deviation, and should in any case be repeated at least 6 hours before arrival at the approach area.

Maximum dimensions for the North Sea Canal via the Northern fairway and the Northern Lock.

1. *Without a Licence:*
   Length: 325 m.
   Beam: 42 m.
   Draft: 131 dm. (43 ft.)
2. *With Licence:*
   Beam: 45 m.
   Draft: 137 dm. (45 ft.)

Note: Should the beam exceed 42 m., restrictions will apply regarding the maximum permitted draft. Applications of such a licence are judged on basis tentatively fixed criteria per case.

Licences to exceed the maximum permitted draft and/or beam, to sail with an irregular transport should be applied for at least 7 days in advance.

Address: Directorate-General Shipping and Maritime Affairs, Head Traffic Service, Seinpostweg 19, 1976 BT Ymuiden. Telex: 71169 PIVTS NL. FAX: 02550-35144.

HEALTH: Pratique granted automatically on arrival after completion of Maritime Declaration of Health. In case of suspected disease on board notify Agent by radio before arrival advising full details.

RADIO: *Obo-Carriers:* Masters of this type of vessel must, when calling to load and/or discharge dry cargo, cable at least 24 hours prior to arrival, the following information:

1. That vessel has no slops on board and is certified gas free or alternatively;
2. a. Correct name of liquid cargo carried last, with place and date of discharge.
   b. Stowage of cargo remnants (gases and/or liquids) and whether mixed with water or not.
   c. Whether non-gas free spaces are adjacent to dry cargo holds and if so, which holds.
   d. Which spaces contain inert gas.

Also see "Pilotage".

RADAR/VHF: The port is equipped with a shore based radar installation to facilitate navigation if necessary. Ymuiden has a VHF installation and Masters of vessels entering or leaving the port area must contact the Port Operations Centre (callsign – Ymuiden Port Control) by VHF to obtain information for safe navigation and rapid locking.

VHF Channels:

- In the approach area to Ymuiden seawards from the outer buoy: Channel 12 (Traffic Centre Ymuiden).
- From the outer buoy to the locks: Channel 9 (Ymuiden Port Control).
- On the North Sea Canal from the locks to kilometre 11.2: Channel 11 (Traffic Service North Sea Canal).
- On the North Sea Canal Eastwards at kilometre 11.2: Channel 14 (Traffic Service North Sea Canal).
- In the Port of Amsterdam: Channel 14.

TUGS: Available. Meet vessel in harbour entrance if required.

BERTHING: Steelworks Harbour (Private): Coal and ore cargoes discharged to Blast Furnace and Steel Works Company in Outer Harbour.

Quay 1: Length of quay: 1,360 ft. Depth alongside quay: 29 ft. 6 in. LLWS.

Opposite the quay there are 3 dolphins available where one vessel can wait for a loading/discharging berth (up to 34 ft. depth).

Equipment:
2 cranes, lifting capacity 30 tons, max. outreach 57 ft.
1 crane, lifting capacity 30 tons, max. outreach 63 ft.

Finished products such as rolling mill products, pig-iron, cast iron, steel ingots, slabs and coils are handled.

Supplies: Water obtainable from quay. Stores can be delivered by truck, bunkers by barge.

Quay 2: Length of quay: 1,800 ft. Depth alongside quay: 45 ft. (East) and 52 ft. (West) at LLWS.

Max. draft: The entrance to Outer Harbour is accessible to vessels up to 43 ft. draft and with special permission of the Harbour Authorities up to 45 ft. draft salt water.

Equipment:
3 bridge cranes, lifting capacity 40 tons each, max. outreach 115 ft.
2 conveyor belt systems (capacity 6,000 t.p.h.).

Despatch:
About 60,000 tons iron ore per 24 hours. About 50,000 tons coal per 24 hours.

Supplies: Water obtainable from quay. Stores can be delivered by truck, bunkers by barge.

Quay 3: Length of quay: 825 ft. Depth alongside quay: 31 ft. 6 in. LLWS. With special permission of the harbour authorities, max. sailing draft 34 ft. West of the quay are 4 dolphins available where a vessel can wait for a loading/discharging berth (up to 31 ft. 6 in. draft).

Equipment: 2 cranes with a capacity of 60 tons each. Outreach 70 ft.

Inner Harbours: These harbours are mainly used for loading or discharging smaller vessels having drafts between 11 ft. and 20 ft.

Finished products such as rolling mill products, pig-iron, cast iron, steel ingots, slabs, coils but also fertilisers are handled.

CRANES: Inner Harbour No. 1 – 1 portal crane.
Inner Harbour No. 2 – 1×7.5 ton portal crane.
Inner Harbour No. 3 – 3×30 ton portal cranes.

STEVEDORES: *Working Hours:* In the Outer Harbours round the clock, also on Sundays and holidays.

In the Inner Harbour round the clock except from 1400 hrs. on Saturdays until 0600 hrs. on Monday.

FRESH WATER: Available from quay.

FUEL: Available by barge.

CONSULS: And all general information; refer to "Amsterdam".

MEDICAL: Doctors, hospital and all services available.

REPAIRS: Possible.

DRY DOCKS: None.

CUSTOMS ALLOWANCES: 200 cigarettes for each crew member; 5 litres spirits for whole ship.

AUTHORITY: Directorate General of Shipping and Maritime Affairs, Head of Traffic Service, Seinpostweg 19, 1976 BT Ymuiden. *Tel:* 02550-19027. *FAX:* 02550-35144. *Telex:* 71169 HOCYM NL.

ZAANDAM (Zaanstad): 52.26 N. 04.49 E. **(See Plan)**

LOCATION: Zaandam lies on the Northern side of the North Sea Canal, near to Amsterdam. See "North Sea Canal" and "Amsterdam" plans. The Port of Zaanstad is divided into two parts by "Wilhelmina" sluice, the outer harbour being for large vessels and the inner harbour for coasters, etc.

PORT LIMITS: A line drawn from the Western side of Nieuwe Zeehaven entrance to the Eastern side of Zijkanaal "G" entrance defines the port limits.

DOCUMENTS: IMO Crew List, IMO fal form 5, other Customs papers to be supplied by Agents.

PILOTAGE: Procedure, etc. same as for Amsterdam. Not compulsory, but recommended. Pilot will take vessels all the way to Zaanstad. Amsterdam Harbour Service should be notified on VHF Channel 14 of vessel's intentions, they will arrange for Zaanstad Harbour Service vessel to meet the vessel at the entrance to Zijkanaal "G" and direct it to its berth. When a vessel is leaving for sea, notice should be given to the Sluice Command via VHF Channel 11.

ANCHORAGE: It is prohibited to anchor in the port of Zaanstad.

RESTRICTIONS: Vessels with dangerous cargoes will not be handled at night.

All Zaandam harbours have direct unrestricted connection with the North Sea Canal.

LOCKS: Wilhelmina Sluice is 116.8 m. long, 12 m. wide and has a depth of 2.80 m.

MAX. SIZE: Max. draft 10.0 m.

HEALTH: Same as Ymuiden.

RADIO: Scheveningen Radio.

VHF: Wilhelmina Sluice – Channel 20. Alexander Bridge – Channel 18.

RADAR: No port radar service.

TUGS: Available.

BERTHING: (Docks)

Isaac Baarthaven: Length 900 m., width 70 m., depth 9 m. Quayage 370 m., with depths of 5 m. – 9 m. alongside. Ro/Ro quay at Houtcentrum with length 25 m. and depth 9.0 m.

Dirk Metselaarhaven: Length 600 m., width 112 m., depth 10 m. Quayage 180 m., for transshipping liquids only (Private).

Zijkanaal E: Length 400 m., width 45 m. depth 7 m. Quayage 40 m., for transhipping only.

W. Thomassenharbour: Length 700 m., width 130 m., depth 10.0 m. Vessels up to 10 m. draft can berth. Quay with length 200 m., 4 berths with approximate width of 70 m. and 2 mooring buoys. No bridges and no locks.

CRANES: Mobile cranes only.

BULK CARGO FACILITIES: None.

SPECIALISED CARGO HANDLING FACILITIES: Ro/Ro vessels can be discharged in Isaac Baarthaven.

STEVEDORES: *Working Hours:* Monday – Friday 0600 hrs. – 1700 hrs.

Overtime possible from 1700 hrs. – 0800 hrs. and Saturday and Sunday.

MEDICAL: Full hospital facilities available without prior notice. Tel. 075-502911.

DENSITY: 1015.

FRESH WATER: Available.

FUEL: Arranged from Amsterdam.

REPAIRS: Possible.

DRY DOCKS: At Amsterdam, and Zaandam (Max. 90 m.).

CONSULS: Ghana, Tel: 075-351631.

All others at Amsterdam (10 km.).

REPATRIATION: Possible.

AIRPORT: Schiphol Airport (Amsterdam) 20 km.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: Port holidays similar to major Dutch ports, plus 2 extra holidays (Whit Tuesday and 1st May).

POLICE/AMBULANCE/FIRE: Tel: 06-11.

GARBAGE DISPOSAL: General Information: Dutch port authorities are responsible for the provision of reception facilities in their ports. They publish who have been designated to receive waste from ships in their port. It is forbidden to deliver waste to persons who have no official designation as a port reception facility.

Fees: The costs incurred as a result of the delivery and further processing of waste are to be paid by the ship to the receiving company.

Advance notice requirements: In Dutch ports the ship's need for reception facilities must be reported 24 hours in advance.

Contact Port Authority for further details.

WASTE OIL DISPOSAL: See "Garbage Disposal".

SEAMAN'S CLUBS: Available at Amsterdam.

CURRENCY: Dutch Guilder (Fl). U.S.$ 1.00 = Fl 1.90 (10.4.91).

GENERAL: *Dirty Ballast:* Facilities available at Amsterdam.

Provisions: Available locally.

Chart: No. 124.

Prevailing Wind: Westerly.

AUTHORITY: Municipality of Zaanstad, Westkade 2, 1506 BA Zaandam, Netherlands. *Tel:* 075-816888. *Telex:* 19110. *FAX:* 075-816799. *Contact:* P.C.C. Majoor, Harbour Director. (Tel. 075-816522).

Netherlands Antilles

BARCADERA, Aruba: 12.29 N. 70.00 W. (See Plan)

LOCATION: The industrial harbour of Aruba is situated 3 miles S.E. of Oranjestad.
DOCUMENTS: Documents and all general information, refer to "Oranjestad".
PILOTAGE: Compulsory.
RESTRICTIONS: Harbour open day and night. Depth of water in entrance is 36 ft. Depth of water alongside is 31 ft. Swinging basin width 1,000 ft.
MAX. SIZE: Max. LOA 185 m., max. draft 31 ft.
TUGS: Available.
BERTHING: 1,150 ft. of dockside accommodation.
FRESH WATER: Not available.
FUEL: Can be supplied.
AUTHORITY: See "Oranjestad".

BONAIRE TERMINAL (Brasil): 12.13 N. 68.23 W. (See Plan)

OPERATORS: Bonaire Petroleum Corporation N.V. Terminal is capable of handling all types of crude oil and heavy oils (bunker C and residual fuels). Heated and non-heated storage tanks are available for storage, blending and transhipment.
LOCATION: No. 1 Jetty is situated on the South coast of the Northern portion of the Island of Bonaire in Lat. 12° 13′ 12.9″ N., Long. 68° 23′ 17.2″ W.
DOCUMENTS:
5 Crew Lists.
2 Stores List.
2 Lists of Personal Effects of Crew.
5 Medicine and Drugs Lists.
1 Vaccination List.
PILOTAGE: Compulsory. The Pilot-Berthing Master will board the vessel at the established arrival point in Lat. 12° 10′ N., Long. 68° 25′ W., which is 2.5 miles, 235° True from No. 1 Jetty.
